FORWARD-LOOKING STATEMENTS

Statements contained in this press release that are not based on historical fact, including without limitation statements containing the words “believes,” “may,” “plans,” “will,” “estimate,” “continue,” “anticipates,” “intends,” “expects” and similar expressions, constitute “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 and constitute “forward-looking information” within the meaning of applicable Canadian securities laws. All such statements are made pursuant to the “safe harbor” provisions of applicable securities legislation. Forward-looking statements may involve, but are not limited to, comments with respect to our strategies or future actions, our targets, expectations for our financial condition and the results of, or outlook for, our operations, research development and product and drug development. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Many such risks, uncertainties and other factors are taken into account as part of our assumptions underlying these forward-looking statements and include, among others, the following: general economic and business conditions, both nationally and in the regions in which we operate; market demand; technological changes that could impact our existing products or our ability to develop and commercialize future products; competition; existing governmental regulations and changes in, or the failure to comply with, governmental regulations; adverse results or unexpected delays in drug discovery and clinical development processes; decisions, and the timing of decisions, made by health regulatory agencies regarding approval of our technology and products; the requirement for substantial funding to conduct research and development and to expand commercialization activities or consummate acquisitions; sales numbers and future guidance publicly provided by Boston Scientific Corporation regarding sales of their paclitaxel-eluting coronary stent products; and any other factors that may affect performance. In addition, our business is subject to certain operating risks that may cause the actual results expressed or implied by the forward-looking statements in this report to differ materially from our actual results. These operating risks include: our ability to attract and retain qualified personnel; our ability to successfully complete preclinical and clinical development of our products; changes in business strategy or development plans; our failure to obtain patent protection for discoveries; loss of patent protection resulting from third party challenges to our patents; commercialization limitations imposed by patents owned or controlled by third parties; our ability to obtain rights to technology from licensors; liability for patent claims and other claims asserted against us; our ability to obtain and enforce timely patent and other intellectual property protection for our technology and products; the ability to enter into, and to maintain, corporate alliances relating to the development and commercialization of our technology and products; market acceptance of our technology and products; our ability to successfully manufacture, market and sell our products; the ability of Boston Scientific Corporation to successfully manufacture, market and sell their paclitaxel-eluting coronary stent products; the continued availability of capital to finance our activities; our ability to continue to integrate into our business the operations of American Medical Instruments Holdings, Inc. (“AMI”); our ability to achieve the operational and other synergies and the other commercial or financial benefits expected as a result of the acquisition of AMI; and any other factors referenced in our annual information

form and other filings with the applicable Canadian securities regulatory authorities or the SEC. **Given these uncertainties, assumptions and risk factors, readers are cautioned not to place undue reliance on such forward-looking statements. We disclaim any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements contained in this prospectus to reflect future results, events or developments.**

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

FOR IMMEDIATE RELEASE

NEWS RELEASE

Thursday, August 2, 2007

ANGIOTECH REPORTS SECOND QUARTER RESULTS

Vancouver, BC, August 2, 2007 – Angiotech Pharmaceuticals, Inc. (NASDAQ: ANPI, TSX: ANP), a global specialty pharmaceutical and medical device company, today announced its financial results for the second quarter ended June 30, 2007.

“We continued to focus on the development and commercialization of our key catalyst products during the second quarter,” said Dr. William Hunter, President and CEO of Angiotech. “In particular, we made significant strides in building out our sales and marketing infrastructure, while at the same time reaching important milestones such as securing a CE Mark for our Quill® SRS product line.”

“Over the last quarter, we made good progress with the continued implementation of our various growth, organizational change, and operational improvement initiatives, while at the same time delivering solid operating results,” commented Thomas Bailey, Chief Financial Officer of Angiotech.

Financial Highlights

- Total revenue, as adjusted for non-recurring items, was \$75.3 million in the second quarter. Total revenue under generally accepted accounting principles (“GAAP”) was \$72.4 million.
- Net product sales, as adjusted, of \$45.4 million increased \$2.9 million, or 6.9%, as compared to the first quarter, and were derived principally from sales of our various single use, specialty medical devices, as well as from sales of medical device components to third parties.
- Royalty revenue was \$29.9 million. This includes \$28.4 million of royalty revenue derived from sales by Boston Scientific Corporation (“BSC”) of paclitaxel-eluting coronary stent systems. This represents an average gross royalty rate of 7.6 percent for U.S. sales and 5.5 percent for sales in other countries.
- Adjusted EBITDA (earnings before interest, taxes, depreciation and amortization, adjusted to exclude certain non-cash, non-recurring, and other items) was \$15.6 million.
- GAAP net loss from continuing operations and net loss per share from continuing operations were \$15.0 million and \$0.18 respectively. Our GAAP results reflect several non-recurring items, including: in-process research and development expense of \$8.0 million (the majority of which related to the extension of our research collaboration with CombinatoRx, Incorporated (“CombinatoRx”)); costs accrued of \$3.0 million relating to the discontinuation of our Contour Threads brand name; and restructuring costs of \$2.1 million, the majority of which related to the closure of our manufacturing facility in Syracuse, New York.
- Adjusted net income from continuing operations and adjusted net income per share from continuing operations were \$5.0 million and \$0.06, respectively.
- An income tax recovery of \$10.5 million as reported in our GAAP results was derived from several concurrent factors, including deductions related to the amortization of identifiable

intangible assets, deductions relating to certain international financing structures, and provincial income tax credits.

- Cash and long-term investments were \$144.2 million, and net debt was \$437.2 million.

Business Highlights

Our focus for 2007 continues to be on our three main catalysts: Quill® SRS, 5-FU CVC and Vascular Wrap™. From an operational perspective, we are building out our global sales and marketing organization as well as organizing our business operations for maximum capacity utilization, efficiency in the supply chain, and ensuring that we have adequate manufacturing capacity in the areas of anticipated growth in future years. We made significant advancements on all of these fronts during the second quarter.

Quill® SRS

- We secured European approval for CE mark of our Quill® Self-Retaining System (SRS) and expect to launch Quill® SRS commercially in Europe mid-year.

Vascular Wrap™

- We re-obtained the exclusive rights from Edwards Lifesciences Corporation to market and distribute our Vascular Wrap™/ePTFE graft combination product candidate through our own sales force and distribution network in Europe.
- We initiated a pivotal human clinical trial in Europe designed to evaluate the safety and efficacy of the Vascular Wrap™ in the prevention of stenosis following surgical implantation of an ePTFE vascular graft in the upper extremity for vascular (AV) access in hemodialysis patients. It is expected that results from this study will serve as a base of European experience for CE Mark submission along with supporting data from a similar U.S. pivotal trial initiated in March.

5-FU CVC

- Shortly after the end of the second quarter, we completed enrolment of our 5-FU CVC pivotal study. We expect to have preliminary data results compiled in the fall, and present the final data in early 2008.

Sales and Marketing

- Expansion of the sales and marketing team is on track in Europe, Asia, and the United States, with key personnel hired into the Surgical, Interventional and Specialties-OEM areas.

Operations

- As part of our continuing effort to increase capacity utilization, reduce labour and other direct manufacturing costs and ensure adequate capacity in key growth areas, including Quill®, we made the decision to close our manufacturing facility in Syracuse, New York and to transfer the product manufacturing and technical knowledge to our operations in Puerto Rico and Reading, Pennsylvania. The closure of the Syracuse facility will occur over the next twelve to eighteen months.

Other Business Highlights

- Shortly after the end of the second quarter, Cook Incorporated (“Cook”) and BSC announced several new human clinical trials of next-generation products incorporating our proprietary paclitaxel technology. These trials are of Cook’s Zilver® PTX™ paclitaxel-eluting peripheral stent for use in arteries outside of the heart, and of BSC’s TAXUS Petal™ bifurcation coronary stent and TAXUS Element™ platinum chromium coronary stent respectively.

- We announced the extension of our collaboration agreement with CombinatoRx from the initial two and a half year term to a total of five years. The collaboration will continue to focus on evaluating and identifying drug candidates that are combinations of known pharmaceutical compounds that could be useful to treat selected local diseases or in selected surgical or medical device applications.

Financial Information and Certain Non GAAP Financial Measures

This press release contains the condensed financial statements derived from the unaudited consolidated interim financial statements for the three- and six-month periods ended June 30, 2007, and audited consolidated financial statements for the year ended December 31, 2006. Full unaudited consolidated interim financial statements and Management's Discussion and Analysis for the three- and six-month periods ended June 30, 2007, will be filed with the relevant regulatory agencies, as well as posted on our website at www.angiotech.com.

We completed the acquisition of the operations of American Medical Instruments Holdings, Inc. ("AMI") on March 23, 2006. Because of the timing of the AMI acquisition, our operating results for the three month period ended June 30, 2006 include AMI's results of operations from the period of March 24, 2006 to June 30, 2006, as compared to the current quarter which reflects combined results from the period of April 1, 2007 to June 30, 2007. Our results for the quarter ended June 30, 2007 therefore reflect a slightly shorter time period, and as a result do not reflect a comparable operating period as compared to the second quarter of 2006.

The results for the six month period ended June 30, 2007 fully include the results of AMI. As AMI was acquired on March 23, 2006, the comparative six month period ended June 30, 2006 only includes the results of the AMI operations for the period March 23, 2006 to June 30, 2007.

Amounts, unless specified otherwise, are expressed in U.S. dollars. Financial results are reported under GAAP unless otherwise noted. All per share amounts are stated on a diluted basis unless otherwise noted.

Certain financial results presented in this press release include non-GAAP measures that exclude certain items. Adjusted net income from continuing operations, adjusted net income per share from continuing operations and adjusted earnings before interest, taxes, depreciation and amortization ("adjusted EBITDA") exclude acquisition related amortization charges, acquired in-process research and development relating to license agreements and acquisitions, stock-based compensation expense, foreign exchange gains or losses relating to translation of foreign currency cash and investment balances and other non-recurring items. Adjusted net income from continuing operations, adjusted net income per share from continuing operations and adjusted EBITDA also exclude litigation expenses related to defending intellectual property claims. Revenue, as adjusted, excludes non-recurring, non-operating revenue derived from license agreements and other license revenue, net of license fees due to licensors and excludes amounts accrued for costs incurred, and potential future costs, related to our offer to accept returns of Contour Threads brand product as part of the brand name consolidation and discontinuation. Adjusted net income from continuing operations, adjusted net income per share from continuing operations, revenue from continuing operations, as adjusted and adjusted EBITDA do not have any standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures presented by other issuers. Management uses these non-GAAP or adjusted operating measures to establish operational goals, and believes that these measures may assist investors in analyzing the underlying trends in our business over time. Investors should consider these non-GAAP measures in addition to, not as a substitute for, or as superior to, financial reporting

measures prepared in accordance with GAAP. We have provided a reconciliation of these measures to GAAP in the attached tables.

Conference Call Information

A conference call to discuss these financial results will be held today, Thursday, August 2, 2007 at 8:00 AM PT (11:00 AM ET).

Dial-in information:

North America (toll free): (866) 578-5788

International: (617) 213-8057

Enter passcode: 78719252

A replay archive of the conference call will be available until August 9, 2007 by calling (888) 286-8010 (in North America) or (617) 801-6888 (International) and entering Access Code 92205136.

A live webcast will be available to all interested parties through the Investors section of Angiotech's website: www.angiotech.com.

Forward Looking Statements

Statements contained in this press release that are not based on historical fact, including without limitation statements containing the words "believes," "may," "plans," "will," "estimate," "continue," "anticipates," "intends," "expects" and similar expressions, constitute "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 and constitute "forward-looking information" within the meaning of applicable Canadian securities laws. All such statements are made pursuant to the "safe harbor" provisions of applicable securities legislation. Forward-looking statements may involve, but are not limited to, comments with respect to our strategies or future actions, our targets, expectations for our financial condition and the results of, or outlook for, our operations, research development and product and drug development. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Many such risks, uncertainties and other factors are taken into account as part of our assumptions underlying these forward-looking statements and include, among others, the following: general economic and business conditions, both nationally and in the regions in which we operate; market demand; technological changes that could impact our existing products or our ability to develop and commercialize future products; competition; existing governmental regulations and changes in, or the failure to comply with, governmental regulations; adverse results or unexpected delays in drug discovery and clinical development processes; decisions, and the timing of decisions, made by health regulatory agencies regarding approval of our technology and products; the requirement for substantial funding to conduct research and development and to expand commercialization activities or consummate acquisitions; sales numbers and future guidance publicly provided by Boston Scientific Corporation regarding sales of their paclitaxel-eluting coronary stent products; and any other factors that may affect performance. In addition, our business is subject to certain operating risks that may cause the actual results expressed or implied by the forward-looking statements in this report to differ materially from our actual results. These operating risks include: our ability to attract and retain qualified personnel; our ability to successfully complete preclinical and clinical development of our products; changes in business strategy or development plans; our failure to obtain patent protection for discoveries; loss of patent protection resulting from third party

challenges to our patents; commercialization limitations imposed by patents owned or controlled by third parties; our ability to obtain rights to technology from licensors; liability for patent claims and other claims asserted against us; our ability to obtain and enforce timely patent and other intellectual property protection for our technology and products; the ability to enter into, and to maintain, corporate alliances relating to the development and commercialization of our technology and products; market acceptance of our technology and products; our ability to successfully manufacture, market and sell our products; the ability of Boston Scientific Corporation to successfully manufacture, market and sell their paclitaxel-eluting coronary stent products; the continued availability of capital to finance our activities; our ability to continue to integrate into our business the operations of American Medical Instruments Holdings, Inc. (“AMI”); our ability to achieve the operational and other synergies and the other commercial or financial benefits expected as a result of the acquisition of AMI; and any other factors referenced in our annual information form and other filings with the applicable Canadian securities regulatory authorities or the SEC. **Given these uncertainties, assumptions and risk factors, readers are cautioned not to place undue reliance on such forward-looking statements. We disclaim any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements contained in this prospectus to reflect future results, events or developments.**

About Angiotech Pharmaceuticals

Angiotech Pharmaceuticals, Inc. is a global specialty pharmaceutical and medical device company with over 1,500 dedicated employees. Angiotech discovers, develops and markets innovative treatment solutions for diseases or complications associated with medical device implants, surgical interventions and acute injury.
