

While the H2O ATS does not route orders, LNI, which routes LNI resting orders to the H2O ATS and LPC orders to the Negotiation ATS (as described in the Form ATS-N for the Negotiation ATS), interacts with the ATSs in a coordinated manner.

In particular, LNI can simultaneously transmit an LNI resting order to the H2O ATS and an LPC order to the Negotiation ATS-N. Prior to commencing a negotiation in the Negotiation ATS with respect to an LPC order, LNI pauses the LNI resting order in the H2O ATS. After the negotiation is completed, LNI can resume the LNI resting order in the H2O ATS if there are remaining shares for the parent order.

LP orders and broker block accepts only interact with the H2O ATS and do not interact with the Negotiation ATS.
