

Exhibit 3

This Form ATS-N amendment is an amendment to Part II, Item 7.d. We have marked added text in color and underlined; we have marked deleted text in color and strikethrough.

Part II, Item 7.d.

The following is a summary of the roles and responsibilities in Liquidnet that have access to trading information, the trading information that is accessible by the employees in these roles and the basis for the access. These employees can be located in the US or other Liquidnet regions, as Members and customers outside the US can trade US equities through the Liquidnet ATSS in an equivalent manner to US Members and customers.

A. Trade Coverage personnel (ATS sales coverage)

Roles and responsibilities

ATS Sales coverage personnel (also referred to as Trade Coverage personnel) sit on the Sales desk. Their role is to facilitate negotiations involving Members, monitor Member and customer orders that interact with the Liquidnet ATSS and respond to inquiries and diagnose issues. Trade coverage personnel can communicate real-time or historical Liquidnet trade execution data to Members, subject to compliance with participant Transparency Controls settings. Trade Coverage personnel can communicate real-time or historical public or readily-available execution data to Members; for example, to notify Members of the closing volume in a stock in the overall market for one or more prior days. Trade coverage personnel can provide transaction cost analysis reports to Members. Trade Coverage personnel can distribute reports relating to trade analytics prepared by other Liquidnet personnel as long as the analytics are not symbol-specific. Readily-available data means data that is available to industry participants through Bloomberg and similar subscription services. Trade Coverage personnel cannot execute Member or customer orders. Trade Coverage personnel provide services for the ATS portion of LNI's business.

Internal support tools

Through various internal support tools, Trade Coverage personnel can view: Members and customers live and broken match data (including potential match quantity); negotiation histories; Liquidnet algo, Liquidnet-only, LN auto-ex, automated negotiation and manual targeted invitation orders created by Members and customers; activity relating to specific Liquidnet products (such as targeted invitations); information relating to OMS placements; interaction between LNI and the Negotiation and H2O ATSS; and all trades executed by LNI. Trade Coverage personnel can view this information at the Member, customer and trader level. When a Trade Coverage representative can view a match through an internal support tool, the Trade Coverage representative can view both sides to the match.

Trade Coverage personnel can view the following information relating to the traders who access the H2O ATS: whether or not the trader is logged in; the traders current number of indications in the system and the shares and principal value represented by those indications; number, shares and principal value of outside and invalid indications; and the traders historical executed ADV through the system.

Member and trader performance and activity through Liquidnet

Trade Coverage personnel have access to reports on Member and trader performance and activity through the system, including positive action rates (PAR) and realization rates of individual Members and traders. Realization rate is the percentage of matched shares executed by a party. Reports can be broken out by date, country, sector, market cap and similar aggregated categories. These reports do not include symbol information. Reports can include for the relevant period data on matched liquidity, match rate, contra PAR, contra realization rate, trading revenue and percentage of volume traded through different order types.

Reports also can include data on indications received from a Member by instrument type, including aggregate number of indications, principal value or shares and the time of the most recent indication received from a Member. These reports do not include symbol information. Liquidity data is not broken out between buy and sell liquidity.

These reports can be product-specific. Examples of product-specific information would be the number of proposed orders submitted by a trader or Member to the algo ranking model, the number of targeted invitations sent or received by a Member or trader, the number and size of executions resulting from targeted invitations sent or received by a Member or trader, and response rates on targeted invitations sent or received by a Member.

Transition of personnel from Trade Coverage to Execution Consultant or Business Development role

For a limited time period Trade Coverage personnel transitioning to an Execution Consultant or Business Development role can perform both functions on the same day but at different times of the day.

Sales supervisory personnel

Personnel with management and supervisory responsibility for Trade Coverage personnel have access to the same information available to the Trade Coverage personnel whom they supervise.

B. Business Development personnel

Roles and responsibilities

~~Business Development personnel are responsible for selling the different Liquidnet products, including products available through Liquidnet 5. Business Development personnel also perform the Trade Coverage role. Certain employees within the Business Development team, known as New Sales personnel, are primarily responsible for prospecting and onboarding new Members and customers. Liquidnet Trade Coverage and Business Development (including New Sales personnel) are sometimes referred to collectively as Sales.~~

Access to data

~~Business Development personnel have access to the same or equivalent data as Trade Coverage personnel.~~

C.B. Execution and quantitative services personnel

Liquidnets Execution and Quantitative Services group (EQS) includes the following groups and functions:

- * Trading Desk (high-touch coverage)
- * Execution Consultants (low-touch coverage)
- * [Business Development](#)
- * [Quantitative Performance](#) Analytics
- * [Liquidity Partnerships](#)
- * Algo Design and Research
- * [Best Execution analysis personnel](#)
- * [Head of Trading Alpha](#).

Access to data by personnel performing each function is described below. Some of these functions may be combined in certain Liquidnet regions, as described below. In particular, in the APAC, EMEA and Canada regions, the same personnel can perform the Trading Desk and Execution Consultant functions. In the US, Execution Consultants can perform the Trading Desk function on a back-up basis. Execution and Quantitative Services personnel provide services for the non-ATS portion of LNI's business, and the same personnel can perform the Execution Consultant and Liquidity Partnership functions. APAC means Liquidnets Asia-Pacific region; EMEA means Liquidnets Europe, Middle East and Africa region.

D.C. Trading Desk personnel

Roles and responsibilities

Trading Desk personnel sit on the trading desk in the applicable region. They can trade orders sent to the desk by a customer in accordance with the customers instructions. Through the EMS used by the Trading Desk:

- * Trading Desk personnel handle, troubleshoot and monitor all high-touch customer orders.
- * Trading Desk personnel also can view and monitor low-touch Member and customer algo orders and provide consultative support to Members and customers in connection with these orders.

Trading desk personnel provide services for the non-ATS portion of LNI's business.

Access to data

Through internal support tools, Trading Desk personnel can view execution information of Members and customers relating to their trading desk and algo orders. Trading Desk personnel can see whether trading desk orders were crossed by Liquidnet in one of its ATSs or executed on an external venue. Trading Desk personnel can view whether an execution resulted from a targeted invitation.

Trading Desk personnel cannot view matching indications.

Trading Desk supervisory personnel

Personnel with management and supervisory responsibility for trading desk activity can view Liquidnet trading activity for supervisory purposes.

E.D. Execution Consultants

Roles and responsibilities

Liquidnet's Execution Consultants are responsible for providing execution consulting services to Members and customers with a focus on Liquidnet's algorithmic offering. This team also is responsible for providing various TCA (transaction cost analysis) reports for Members and customers. The Execution Consultants also monitor the performance of Liquidnet's algos and recommend modifications, where appropriate, to improve algo performance. In real-time, Execution Consultants also can troubleshoot an algo order that is not performing properly, where instructed by a customer; troubleshooting can include modifying the parameters of the algo order. [Execution Consultants can communicate real-time or historical Liquidnet trade execution data to customers, subject to compliance with participant Transparency Controls settings. Execution Consultants can provide trading analytics to customers. This includes providing a description of the analytics that the Execution Consultant is providing and distributing reports provided by other Liquidnet personnel.](#) Execution Consultants provide services for the non-ATS portion of LNI's business.

Access to data

Through Liquidnets EMS, Execution Consultants can monitor all low-touch participant algo orders high-touch trading desk orders and provide consultative support to participants in connection with these orders.

Liquidnets Execution Consultants have access to one or more internal Liquidnet tools to conduct transaction cost analysis for the overall community and on behalf of individual participants. Execution consultants access such tools in connection with: evaluating and communicating the performance of the various Liquidnet algo types on an aggregated basis; and the generation of TCA reports for individual participants. These tools include all participant trade information on a real-time and historical basis, including target quantity with respect to parent orders and negotiation quantity (i.e., the quantity submitted during a negotiation) with respect to negotiated orders. Members and customers that do not want Liquidnet personnel to access their order information for the purpose of generating Member and customer-specific TCA reports on their behalf can notify their Liquidnet coverage team.

Through other internal support tools, Execution Consultants can view all execution information of Members and customers and can view whether an execution resulted from a targeted invitation.

Through an internal support tool known as Touchpoint, Execution Consultants have access to all order and execution information of participants, regardless of order type, except that Execution Consultants cannot view manual negotiation, automated negotiation and manual targeted invitation orders. Through Touchpoint, Execution Consultants can run the algo ranking model for any low-touch algo order of a participant. A Member or customer can elect through Liquidnet Transparency Controls to restrict Execution Consultants (and Business Development personnel, as described in the next sub-section) to only view the Members or customers algo orders and executions (including surge capture and residuals).

E. Business Development personnel

Roles and responsibilities

Business Development personnel (also referred to as relationship managers) are responsible for selling the different Liquidnet products, including products available through the Liquidnet desktop application. Business Development can communicate real-time or historical Liquidnet trade execution data to customers, subject to compliance with participant Transparency Controls settings. Business Development can provide trading analytics to customers. This includes providing a description of the analytics that the Business Development is providing and distributing reports provided by other Liquidnet personnel.

Access to data

Business Development personnel have access to the same or equivalent data as Execution Consultant personnel, except that Business Development personnel do not have access to the Liquidnet EMS.

F. QuantitativePerformance Analytics personnel

Roles and responsibilities

Liquidnets Performance Analytics personnel are responsible for providing tailored trade performance reports, analyses and consultation to Members and customers concerning the use and optimization of Liquidnets algos and other trading products. These personnel also provide reports and analyses on community performance on an aggregate basis, as well as transaction cost analysis. Liquidnets Quantitative Analytics personnel are responsible for transaction cost reporting and providing decision support analytics to Members and customers. Quantitative Analytics personnel also conduct quantitative research on market micro-structure and develop models for use by Liquidnet algo development personnel. QuantitativePerformance Analytics personnel provide services for the non-ATS portion of LNIs business.

Access to data

Performance Analytics personnel have access to all order and execution information on an intraday basis. They also have access, on a T+1 basis, to symbol-specific information concerning active and broken matches (including match quantity and time), indication and negotiation history (including outside indications and contra party), and targeted invitations.

Liquidnets QuantitativePerformance Analytics personnel have access to the same transaction cost analysis tools as described above for Execution Consultants.

Through other internal support tools, quantitative analytics personnel can view all execution information of Members and customers and all Member and customer algo order and execution information. QuantitativePerformance Analytics personnel also have access to all LNI order and execution information for model development and research.

Broken match data

Through a Liquidnet reporting tool, QuantitativePerformance Analytics personnel have access to data relating to broken matches. The purpose of this access is to enable QuantitativePerformance Analytics personnel to address Member queries relating to broken matches. For this purpose, matches can consist of matches with contra-indications and

matches with contra-orders from Members and customers. [QuantitativePerformance](#) Analytics personnel can access all data relating to broken matches for this purpose, including:

- * Begin match time
- * End match time
- * Symbol
- * Information regarding the Members indication, including limit price, available quantity and quantity executed, at the begin and end match times
- * Information regarding the contras indication or order, as applicable, including limit price, available quantity, order quantity, and quantity executed, at the begin and end match times.

A Members consent is required before [QuantitativePerformance](#) Analytics personnel can access this data on behalf of a Member. The consent of contras is not required, but the contras are not identified through this reporting tool.

[QuantitativePerformance](#) Analytics personnel can provide their analysis to the requesting Member with respect to the match to which the Members query relates (but without providing any contra information) or with respect to the Members matches in general.

Targeted invitation analysis

In connection with providing analysis for surveillance monitoring of targeted invitations, [QuantitativePerformance](#) Analytics personnel have intra-day and historical access to the relevant details of targeted invitations sent by Members, including, symbol, create time, end time, side and quantity.

G. Performance Analytics personnel

Roles and responsibilities

~~Performance Analytics personnel within the Quantitative Analytics group are responsible for providing tailored trade performance reports, analyses and consultation to Members and customers concerning the use and optimization of Liquidnets algos and other trading products. These personnel also provide reports and analyses on community performance on an aggregate basis, as well as transaction cost analysis.~~

Access to data

~~Performance Analytics personnel have access to all order and execution information on an intraday basis. They also have access, on a T+1 basis, to symbol specific information concerning active and broken matches (including match quantity and time), indication and negotiation history (including outside indications and contra party), and targeted invitations.~~

~~Performance Analytics personnel also have access to the same transaction cost analysis tools and data as other Quantitative Analytics personnel, as disclosed above.~~

H.G. Liquidity partnerships personnel

Roles and responsibilities

Liquidnets liquidity partnerships personnel are part of EQS and have responsibility for managing LNI relationships with LPs and automated routing customers. Liquidity partnerships personnel provide services for the ATS and non-ATS portions of LNI business.

Access to data

These personnel have access to symbol-specific information concerning orders transmitted and executed by all LPs on a T+1 basis. Liquidity partnership personnel also have access on a real-time and historical basis to aggregated (non-symbol specific) information on orders transmitted and executed by LPs over daily and monthly time periods. Data can be broken out by type of order (IOC; resting; and conditional) and LP and customer name. Data for a daily or monthly period can include: number of orders; number of executions; aggregate and average share quantity of orders and executions; executed shares and orders relative to submitted and matched shares and orders; average order duration; and revenue generated from the contra by LP, customer and order type. Liquidity partnership personnel also have access to symbol-specific, real-time information concerning Member and customer algo orders transmitted and executed through Liquidnets EMS, and they also review various reports for surveillance purposes.

I.H. Algo Design and Research personnel

Roles and responsibilities

Liquidnets Algo Design and Research personnel are responsible for the design, research and specification of LNI algorithms, as well as related models and analytic signals used by LNI algos. This team has responsibility for the design, research and specification of algorithms that provide best execution for Members and customers in accordance with Member and customer requirements and LNI regulatory obligations. Product Support personnel can escalate production issues to this team for research and resolution. EQS personnel also may escalate to the Algo Design and Research team Member and customer queries relating to trading decisions made by LNI algos. Algo Design and Research personnel provide services for the non-ATS portion of LNI business.

Access to data

To facilitate these objectives, Liquidnets Algo Design and Research personnel have access to algo order information on a real-time and historical basis, including for algo orders created by Members through the desktop application, algo orders transmitted by customers from their EMS, and algo orders created by the Trading Desk. Algo Design and Research personnel also have access on a T+1 basis to symbol-specific information concerning all orders transmitted and executed by LPs. Algo order information includes executions, the target quantity of the algo order and the transmission of shares on a firm or conditional basis either to a Liquidnet ATS or an external venue. Liquidnets Algo Design and Research personnel access this information through the LNI EMS, system logs and other internal real-time and historical reporting tools, including LNIs internal TCA tool (limited to algo order information). Liquidnets Algo Design and Research personnel cannot engage in trading activity and cannot modify any parameters of a Liquidnet algo order.

I. Best execution analysis personnel

Roles and responsibilities

One employee is responsible for preparing the data for Liquidnets monthly best execution meeting for the US and Canada. This employee generates aggregated (not symbol-specific) data for review by Liquidnets Best Execution Committee.

Access to data

When acting in this capacity, this employee has access to matched indication, order, execution and other trading information on a T+1 basis solely for purposes of preparing this aggregated data for review by the Committee. This employee is an Execution Consultant and Liquidity Partnership employee and can act as a Trading Desk employee on a back-up basis.

J. Commission Management Services personnel

Roles and responsibilities

Liquidnets Commission Management Services personnel are part of Liquidnets EQS and Member Services groups. Liquidnets commission management services include commission aggregation, commission analyzer and broker vote services. Commission management personnel provide services for the non-ATS portion of LNIs business.

Access to data

Liquidnets Commission Management Services personnel have access to all LNI trade and allocation information.

K. Head of Trading Alpha

Roles and responsibilities

The Head of Trading Alpha is responsible for the provision of analytics products and services to Liquidnets participants. In this capacity, the Head of Trading Alpha: oversees the Performance Analytics function; supervises Product personnel involved in the development of analytics products; communicates to customers on using analytics in their algo and other trading strategies; trains Liquidnet personnel on communicating to customers relating to analytics; and generates commentary to Liquidnet participants relating to Liquidnet and third-party trading analytics.

Access to data

The Head of Trading Alpha has access to Touchpoint (to the same extent as Execution Consultants), Helm, Liquidnet trading analytics, the user behavior analytics dashboard and reports prepared by Performance Analytics and Product personnel.

~~A. Best execution analysis personnel~~

~~Roles and responsibilities~~

~~One employee is responsible for preparing the data for Liquidnets monthly best execution meeting for the US and Canada. This employee generates aggregated (not symbol specific) data for review by Liquidnets Best Execution Committee.~~

~~Access to data~~

~~When acting in this capacity, this employee has access to matched indication, order, execution and other trading information on a T+1 basis solely for purposes of preparing this aggregated data for review by the Committee. This employee is an Execution Consultant and Liquidity Partnership employee and can act as a Trading Desk employee on a back-up basis.~~

B.L. Sales Analytics group personnel

Roles and responsibilities

The Sales Analytics team provides data and reports to internal Liquidnet customers, such as Corporate Leadership, Sales and Marketing, for use in monitoring, developing and enhancing Liquidnets products and services as well as in support of Liquidnets sales and marketing efforts. In addition, Sales Analytics personnel provide Members and customers with analysis and reporting that offers Members and customers insight into how they are using Liquidnets products and services. The Sales Analytics team is part of Liquidnets Sales group. Sales Analytics personnel provide services for the ATS and non-ATS portions of LNIs business.

Access to data

Sales Analytics personnel have access to indication, order and trade information in the database and through internal reporting tools. Reports, which can include trading information, may only be provided by the Sales Analytics group to employees in other groups if those employees are authorized, pursuant to Liquidnets policies, to have access to the associated data. Sales Analytics personnel also have access to one or more internal TCA tools to run TCA reports for participants.

E.M. Product Support and Implementation personnel

Roles and responsibilities

Product Support and Implementation personnel are part of Liquidnets Member Services group. Product Support and Implementation personnel assist with implementation of participants, maintain up-time of the system, support connectivity with participants, and assist in resolving technical and functional issues affecting participants in their use of the system. Product Support and Implementation personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

Liquidnets Product Support personnel have access to indication, order and trade information in the database and through the various Liquidnet support tools to assist in addressing technical and functional issues affecting Members and customers. Product Support and Implementation personnel also have access to logs from each Member's Liquidnet desktop trading application and OMS interface with Liquidnet to assist in researching and troubleshooting implementation issues, evaluating additional liquidity from a Member that could be provided to the system, and suggesting technical improvement to a Member's interface.

D.N. Trade Services personnel

Roles and responsibilities

Trade Services is part of Liquidnets Member Services group. Trade Services handles account set-up, trade allocations and trade settlement. Trade Support personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

Trade Services personnel have access to Member and customer execution, account, allocation and settlement information and the full quantity of any executed order.

E.O. LCM personnel

Roles and responsibilities

Liquidnet Capital Markets (LCM) personnel work on public issuer transactions for equities. The LCM team works with issuers, individual and corporate control persons, private equity firms and venture capital firms to attract secondary offering, corporate repurchase, and control-person transactions for the benefit of LNI Members and customers. LCM customers do not have access to the Liquidnet desktop trading application; all listed shares transactions are facilitated through the LNI trading desk. LCM personnel provide services for the non-ATS portion of LNI's business.

General

LCM personnel do not have access to any Member or customer indication, negotiation, match or order information. LCM personnel can access Liquidnet execution information after T+20 and provide this information to LCM customers. The parties to the trade are not identified to LCM personnel.

F.P. Enterprise Technology Services personnel

Roles and responsibilities

Liquidnet's Enterprise Technology Services (ETS) group maintains the computers, networks, databases and connectivity that comprise the Liquidnet system. ETS personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

A subset of the ETS group (Production Support and Database Administration) has access to indication, order, execution and other trading information to troubleshoot production and system issues, when directed by the Product Support group. These ETS personnel are located in a keycard protected area and are on a separate network segment from other Liquidnet personnel for certain purposes.

G.Q. Software Development and Quality Assurance personnel

Roles and responsibilities

Software Development and Quality Assurance personnel are responsible for development, enhancement, and maintenance of the software components of the Liquidnet system. Software Development and Quality Assurance personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

These personnel have access to indication, order, execution and other trading information on a real-time basis in connection with the performance of their duties.

H.R. Product personnel

Roles and responsibilities

Liquidnet's Product group is responsible for the design and enhancement of Liquidnet's trading products. Product personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

Liquidnet's Product personnel have access to indication, order, execution and other trading information for the products that they work on (for example, the Liquidnet desktop trading application, algos, TCA and commission management).

Product personnel can access and analyze trader usage data to enhance Liquidnet's products. An example of analyzing trader usage data would be to identify the conditions under which a trader is more likely to respond to a targeted invitation.

Members of Liquidnet's Product group have access to reports on Member and trader performance and activity through Liquidnet, as described above in the Sales coverage section. These reports are not symbol-specific and do not include symbol-level information.

In addition, designated Members of Liquidnet's Product group have access to the EMS used by the LNI trading desk and Execution Consultants. This access is to assist LNI in responding to inquiries from Members and customers relating to system functionality in connection with day-to-day trading activity by Members and customers. Designated members of the Product group with responsibility for internal support tools have access to the same data as Member Services personnel.

I.S. Business Intelligence

Roles and responsibilities

The Business Intelligence (BI) team develops reports for use by internal groups, including Sales Analytics, Corporate Leadership, Sales, and Marketing, for use in monitoring, developing and enhancing Liquidnets products and services as well as in support of Liquidnets sales and marketing efforts. BI personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

BI personnel have access to indication, order, execution and other trading information in the Liquidnet database that includes all order and other trading information. Reports, which can include trading information, may only be provided by the Business Intelligence group to employees in other groups if those employees are authorized, pursuant to Liquidnets policies, to have access to the associated data.

J.T. Legal, Compliance and SRM personnel

Roles and responsibilities

Liquidnets Legal and Compliance personnel are responsible for working with the business units to establish and enforce Liquidnets legal and compliance policies. Compliance includes the Liquidity Watch monitoring and surveillance function. Liquidnets Security and Risk Management (SRM) personnel are responsible for working with the business units to establish and enforce Liquidnets policies relating to information security. Legal, Compliance and SRM personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

Liquidnets Liquidity Watch personnel have access to indication, order, execution and other trading information as well as commission aggregation information as part of their ongoing surveillance activity. Liquidnets Legal, Compliance and SRM personnel are permitted to access trading information in fulfilling their responsibilities, including for the conduct of investigations.

K.U. Finance personnel

Roles and responsibilities

Designated members of Liquidnets Finance team have responsibility for accounts payable and receivable operations in connection with the operation of Liquidnets business. Finance personnel provide services for the ATS and non-ATS portions of LNI's business.

Access to data

As part of these responsibilities, these designated members of the Finance Department have access to trading information after the end of the trading day.

L.V. OTAS personnel

Roles and responsibilities

OTAS personnel are involved in the development and support of the Liquidnet and OTAS analytics products, including Discovery and Best Ex Replay. OTAS personnel provide services for the non-ATS portion of LNI's business.

Access to data

OTAS personnel have access to information relating to trader usage of the Discovery, Best Ex Replay and Action Stream functionality, which are provided through the Liquidnet desktop trading application. Discovery provides analytics to traders relating to individual stocks. Best Ex Replay provides analytics to traders to assist with best execution analysis. Action Stream provides notifications to a trader relating to a trader's activity through the system or information that a trader could otherwise see or have seen through the Liquidnet desktop trading application. The analytics provided by Discovery are based on overall market activity and not based on Liquidnet-specific activity. The sending of analytics or a notification to a trader can be based on the indications provided by the trader's firm to Liquidnet or the trader's activity through Liquidnet.

In addition, product personnel can engage OTAS personnel to assist in conducting an analysis of trader usage data for other products. When performing this function, OTAS personnel are provided access to trader usage data but without identifying trader or participant names. OTAS personnel access this data through Liquidnet systems.

Qtech

Liquidnet outsources development and support work relating to the OTAS analytics products (including Discovery and Best Ex Replay) to Qtech (UK) Limited, a UK-formed technology consulting firm, and its affiliate, Qtech Analytics Private Limited, a company organized in India (Qtech India). Qtech personnel work in London and in India. Qtech employees work in a data center in India that includes employees of MSBC Group (Qtech India's parent company) and employees of other companies owned by MSBC. Qtech employees can access information relating to Liquidnet and OTAS analytics products and participant usage of such products in connection with their development and support roles. Qtech support personnel can access indication information for all indications of Members that are enabled for Action Stream or Discovery. This data is recorded on specific servers to which Qtech personnel have access; these servers are located in Liquidnet data centers in the US and Europe. These servers also record indication information of a participant during any period of time when a

participant has the blotter window open in Liquidnet 5, even if the participant is not enabled for Action Stream or Discovery. The data above includes Member and user names. Qtech personnel may provide development and support services for other companies owned by MSBC Group and their clients.

M.W. Management personnel access to aggregated liquidity information

To assist Liquidnets Corporate Leadership and Sales management personnel in evaluating Liquidnets business performance, these personnel have access on a next-day basis to reports that include aggregated quantity of Member liquidity, broken out between buy and sell liquidity. This data is aggregated, and is not broken out by Member. The aggregated categories are as follows: country; sector; index and market cap (e.g., large, mid, small and micro). Liquidity information is based on the order quantity from a Members OMS or other indication quantity communicated by a Member to Liquidnet. Management personnel provide services for the ATS and non-ATS portions of LNIs business.

N.X. Aggregated data

In addition to the above, Liquidnet can provide trading data to employees where the data is not symbol-specific. In particular, Liquidnet can provide trading data to any employees broken out by the following categories and similar aggregated categories: country; sector; index and market cap (e.g., large, mid, small and micro). This data is used for business planning, sales and marketing purposes.

O.Y. Salesforce CRM system

Liquidnet personnel, other than LCM personnel, have access to the primary version of Liquidnets Salesforce CRM (customer relationship management) system. Liquidnets CRM system contains standard CRM information relating to participants, including participant contact information, participant actual and target revenue information, participant trading volume information (not symbol-specific), the status of support incidents, and reports on participant meetings and calls. Through Salesforce, Liquidnet personnel can receive alerts relating to participant PAR, realization rate and similar performance metrics; these metrics are not symbol-specific. The CRM system does not contain symbol-specific information, but users can enter specific symbols into the CRM in connection with the resolution of trade errors and other trading incidents. LCM personnel have access to a separate instance of Salesforce specifically created for the LCM team containing standard CRM information relating only to LCM customers, including contact information, the status of support incidents, and reports on LCM customer meetings and calls.
