The accompanying notes are an integral part of these consolidated financial statements.

Notes to Unaudited Consolidated Financial Statements**Note 1 – Basis of Presentation****Interim Financial Statements**

The accompanying unaudited consolidated financial statements are presented in accordance with the requirements for Form 10-QSB and Article 10 of Regulation S-X and Regulation S-B. Accordingly, they do not include all the disclosures normally required by generally accepted accounting principles. Reference should be made to the Medical International Technology, Inc. (the "Company") Form 10-KSB for the year ended September 30, 2004, for additional disclosures including a summary of the Company's accounting policies, which have not significantly changed.

Note 2 – Summary of Significant Accounting Policies**Principles of consolidation**

The accompanying consolidated financial statements include the accounts and transactions of Medical International Technology, Inc. and its wholly owned subsidiary, Medical International Technologies (MIT Canada) Inc. Intercompany transactions and balances have been eliminated in consolidation.

Foreign Currency Translations

The Company operates out of its offices in Montreal, Canada and maintains its books and records in Canadian Dollars. The consolidated financial statements herein have been converted into U.S. Dollars. Balance sheet accounts are translated at exchange rates in effect at the end of the period and income statement accounts have been translated at average exchange rates for the period. Translation gains and losses are included as a separate component of stockholders' equity.

Allowance for Doubtful Accounts

The allowance for doubtful accounts on accounts receivable is charged to income in amounts sufficient to maintain the allowance for uncollectible accounts at a level management believes is adequate to cover any probable losses. Management determines the adequacy of the allowance based on historical write-off percentages and the current status of accounts receivable. Accounts receivable are charged off against the allowance when collectibility is determined to be permanently impaired. As of March 31, 2005, the Company did not establish any reserve for doubtful accounts.

Inventories

Inventories are stated at the lower of cost determined by the FIFO method or market.

Property and Equipment

The cost of property and equipment is depreciated over the estimated useful lives of the related assets, which range from 5 to 7 years. Depreciation is computed on the straight-line method for financial reporting purposes and on the declining balance method for income tax reporting purposes. Depreciation expense for the Three-months ended March 31, 2005 and 2004 were \$9,707, and \$11,480, respectively.

Intangible assets

Patents are being amortized over their respective remaining lives ranging from 9.5 years through 17 years.

Net Loss Per Share

The Company adopted the provisions of Statement of Financial Accounting Standards ("SFAS") No. 128, "Earnings Per Share" ("EPS") that established standards for the computation, presentation and disclosure of earnings per share, replacing the presentation of Primary EPS with a presentation of Basic EPS.

Notes to Unaudited Consolidated Financial Statements**Issuances Involving Non-cash Consideration**

All issuances of the Company's stock for non-cash consideration have been assigned a dollar amount equaling either the market value of the shares issued or the value of consideration received whichever is more readily determinable.

Cash and Cash Equivalents

For purpose of the statements of cash flows, the Company considers cash and cash equivalents to include all stable, highly liquid investments with maturities of three months or less.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Long-Lived Assets

In August 2001, SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," was issued establishing new rules and clarifying implementation issues with SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of," by allowing a probability-weighted cash flow estimation approach to measure the impairment loss of a long-lived asset. The statement also established new standards for accounting for discontinued operations. Transactions that qualify for reporting in discontinued operations include the disposal of a component of an entity's operations that comprises operations and cash flow that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity. The Company has adopted this standard and its adoption had no significant effect on the Company's financial statements.

Reclassification

Certain amounts in March 31, 2004 have been reclassified to conform to the March 31, 2005 presentation. Such reclassification had no effect on net income as previously reported.

Income Taxes

The Company accounts for its income taxes under the provisions of Statement of Financial Accounting Standards 109 ("SFAS 109"). The method of accounting for income taxes under SFAS 109 is an asset and liability method. The asset and liability method requires the recognition of deferred tax liabilities and assets for the expected future tax consequences of temporary differences between tax bases and financial reporting bases of other assets and liabilities.

Fair Value of Financial Instruments

Pursuant to SFAS No. 107, "Disclosures About Fair Value of Financial Instruments", the Company is required to estimate the fair value of all financial instruments included on its balance sheet as of March 31, 2005. The Company considers the carrying value of such amounts in the financial statements to approximate their face value.

Revenue Recognition

The Company recognizes revenue when the related product is shipped to the respective customer.

Notes to Unaudited Consolidated Financial Statements**Note 3 - Intangible Assets**

Amortization expense for the Six-months ended March 31, 2005 and 2004 were \$116, and \$69, respectively.

Note 4 - Stock Activity

For the six-months ended March 31, 2005, the Company issued 760,004 shares of its common stock for consulting services. The value assigned to these shares totaled \$38,001 based upon the market value of the shares on the date of issuance. Of the 760,004, shares issued none were issued to the officers, directors and other related parties.

Note 5 – Commitment and Contingency

On May 14, 2003 the Company issued 100,000 common shares for services rendered. Due to the lack of value of the shares issued, the creditor has requested additional shares to be issued to make up for the shortfall. The total amount in dispute is \$46,537.

However the company has agreed with the creditor to reimburse the equivalent of \$1,000 CDN or \$780US per month, and so far it has paid Three month so the amount in dispute is reduced to \$44,197, the ultimate resolution of this matter is not expected to have a material adverse effect on The Company's financial position.

Item 2. Management's Discussion and Analysis of Financial Condition and Plan of Operations

All statements that are included in this Quarterly Report, other than statements of historical fact, are forward looking statements. Although management believes that the expectations reflected in these forward looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct.

Results of Operations for the Three-Months ended March 31, 2005 and 2004

For the three-months ended March 31, 2005, the Company experienced a net loss from operations of \$127,584, primarily comprised of research and development expenses of \$69,102 and selling, general and administrative expenses of \$48,905. For the three-months ended March 31, 2004, the Company's net loss from operations was \$104,786.

Selling, general and administrative expenses for the three-months ended March 31, 2005 were \$48,905; compared to \$45,777 the previous year.

For the three-months ended March 31, 2005, the Company's sales were \$80,848 resulting in an increase in sales of \$31,381 compared to sales for the same period last year.

Gross profit for the three-months ended March 31, 2005 was \$50,927 or 62% of sales as compared to 51% for the same period last year. MIT utilizes machined components in our products resulting in reduced unit costs as order volumes increase. Small quantity and customized orders significantly impact the gross profit derived from the sale of our products.

As of March 31, 2005, the Company maintains \$64,656 as advances towards future sales pertaining to its non-exclusive distribution agreement with WLT Distributors Inc.

Liquidity and Capital Resources

For the six months ended March 31, 2005 the Company's cash position increased by \$33,239. The Company spent \$115,614 from its operations and received \$142,978 from financing activities. Financing activities included an amount received from related parties of \$59,307.

For the six months ended March 31, 2004 the Company's cash position increased by \$13,158. The Company spent \$37,506 from its operations and received \$37,828 from financing activities. Financing activities included the repayments of its principal amount of its business loan of \$8,536.

Medical International Technology, Inc. expects that revenues from existing and developing sales may not meet its liquidity requirements for the next 12 month period at its current level of operations. The company continues to rely on management to develop the business and work to develop sales. Management has and may continue to supplement cash flows from sales with additional equity and debt financing. Substantially, expanded operations are expected to require additional capital, either from a future offering of equity or the company pursuing other methods of financing, as appropriate.

Management Plan of Operations

Medical International Technology, Inc. (MIT) is receiving revenues from sales. The company has maintained operations from these revenues and through equity and debt financing. Products are currently developed, assembled and shipped from our facility. Component manufacturing is subcontracted to various suppliers and machine shops.

MIT continues to promote its injectors in many countries including the United States of America. MIT is exerting every effort and using its resources to promote its products and to open markets for its technology. As we continue to market our products, we hope to gain broader acceptance of the needle-free injection technology.

Distribution and Sales

MIT has adopted an approach with potential distributors; whereby, new distributors are allowed six months to test the market for the AGRO-JET. MIT is then able better evaluate potential distributors before signing long term Distribution Agreements.

MIT has experienced difficulties with distributors meeting their purchasing schedules. Several distributors are not meeting contracted purchasing schedules, some of which have been revised to reduce minimum purchase schedules and eliminate exclusivity in the associated market. We continue to work with these distributors to assist them in developing their respective markets.

On September 15th, 2004, the Japanese Ministry of Agriculture, Fishery and Forestry (MAFF) granted MIT's Japanese Distributor "Frontier International Co. Ltd" permission to market and sell freely MIT's AGRO-JET needle-free injectors in Japan. Frontier International had initially signed a 3-year agreement with MIT in September 2003, for the distribution of the AGRO-JET. Due to regulations imposed by MAFF in January 2004 on new technology imports, it was forced to suspend the sales pending clearance from MAFF and the issuance of an official import permit. In anticipation of receiving that permit, Frontier had placed an order for the AGRO-JET with predetermined deliveries; it is expected that Frontier International will resume its purchase schedule as agreed to in the current Distribution Agreement.

On March 8, 2005 we announced the sale of 25 of MED-JET -- MBX low pressure needle-free injectors designed for anesthetics use to Winsor (Hong Kong) Inc. Dr. Stephen Chow of Winsor (Hong Kong) Inc. had initially placed an order of 2 units at the 63rd Annual Meeting of the American Academy of Dermatology in New Orleans. The order was later increased to 25 units. Winsor (Hong Kong) Inc. is a leading esthetic products distributor in Hong Kong, with a staff of 200 employees. Winsor has the largest distribution network in Hong Kong and caters to over 500 Skin Care salons.

The MED-JET -- MBX is being tested for its efficacy in anesthetizing patients who receive medical treatments which involve multiple injections such as for hyperhidrosis (excessive sweating of the hands, feet and under arms) and BOTOX(r) injections.

Product Development

Medical International Technologies has filed for FDA approval for its needle-free injector - the MED-JET®, designed specifically for human mass inoculations. The MED-JET® is capable of delivering many types of medications like vaccines, insulin and other types of injectables. Its low-pressure technology offers an advantage to alternative high pressure systems that can cause blowbacks and expose medical workers and patients alike to microscopic traces of blood.

Other advantages include its light weight (0.5 kg) and an excellent medication absorption rate. The system is designed to inject up to 600 individuals an hour. The MED-JET has patent protection and is already approved for use in human medicine in Canada.

The approval process can be expensive and may take an extended period of time. There can be no assurance that this system will receive approval from the FDA or if approved gain broad acceptance by the medical community or individual patients.

On April 25, 2005 we announced that our needle free injector has been chosen for testing in a study regarding the treatment of Hyperhydrosis. Dr. Antranik Benohanian MD, FRCPC, Dermatologist at Saint-Luc Hospital of The Montreal University Hospital Centre, has begun tests of MIT's human injectors in his Hyperhydrosis studies. In addition to the underarms, Hyperhydrosis often occurs in the palms, soles of the feet and even the face. Currently, treatments typically carried out by needle injections that must be repeated every 4-6 months, resulting in excessive pain to patients. Many patients are reluctant to receive multiple injections in their hand and their face due to the pain associated with traditional injections.

MIT's MedJet(r) MBX injector is expected to reduce patient's pain and discomfort in these sensitive areas of the body that is caused by traditional needle injections. In addition, MIT's needle free injector results in a less severe puncture since it has a volume of .02cc to .3cc. It is important to be able to increase or decrease the volume and pressure of injection, based on the comfort level of the patient. This technology is unique to MIT's MedJet(r) MBX Injector.

Hyperhydrosis is the medical term for excessive sweating. Millions of people worldwide suffer from this condition. In a recent survey (J Am Acad Dermatol 2004;51(2):241-258), an estimated 2.8% of the U.S. population is affected by some form of this condition, with about a third of them describing their excessive sweating as barely tolerable or worse. BOTOX(r) injections were approved by the FDA in July 2004 to treat severe Hyperhydrosis. Phase III clinical studies supporting the FDA approval show that 80% of patients experienced a 50% decrease in sweat production. (source: Allergan, Inc. July 20, 2004 press release)

MIT is continually researching and developing its products to respond to the market needs.

Forward-Looking Statements

Certain statements concerning the Company's plans and intentions included herein may constitute forward-looking statements for purposes of the Securities Litigation Reform Act of 1995 for which the Company claims a safe harbor under that Act. There are a number of factors that may affect the future results of the Company, including, but not limited to, (a) the ability of the company to obtain additional funding for operations, (b) the continued availability of management to develop the business plan and (c) successful development and market acceptance of the company's products.

This periodic report may contain both historical facts and forward-looking statements. Any forward-looking statements involve risks and uncertainties, including, but not limited to, those mentioned above. Moreover, future revenue and margin trends cannot be reliably predicted.

Item 3. Controls and Procedures

Medical International Technology, Inc. management, including the Principal Executive Officer and Principal Financial Officer, have conducted an evaluation of the effectiveness of disclosure controls and procedures pursuant to Exchange Act Rule 13a-14(c) and 15d-14(c). This evaluation was conducted within 90 days prior to the filing of this report. Based on that evaluation, the Principal Executive Officer and Principal Financial Officer concluded that the disclosure controls and procedures are effective in ensuring that all material information required to be filed in this quarterly report has been made known to them in a timely fashion. There have been no significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date the Principal Executive Officer and Principal Financial Officer completed their evaluation.

Part II. OTHER INFORMATION**Item 1. Legal Proceedings**

Medical International Technology, Inc. has not received notice of and legal proceedings being against the company as of the date of this report.

On May 14, 2003 the Company issued 100,000 common shares for services rendered. Due to the lack of value of the shares issued, the creditor requested additional shares to be issued to make up for the shortfall. The total amount in dispute was \$46,537 and had not been reconciled between the parties. The parties have recently agreed to reimburse the creditor approximately \$780 per month. As of March 31, 2005 the amount in dispute has been reduced to \$44,197, the resolution of this matter is not expected to have a material adverse effect on The Company's financial position.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

For the six-months ended March 31, 2005, the Company issued 760,004 shares of its common stock as payment for account payables related to consulting services. The value assigned to these shares totaled \$38,001 based upon the market value of the shares on the date of issuance. Of the 760,004, shares issued none were issued to the officers, directors and other related parties. The Company's payables were reduced by \$38,001 as a result of the stock transaction. All shares were issued as exempted transactions under Section 4(2) of the Securities Act of 1933 and are subject to Rule 144 of the Securities Act of 1933. The recipient(s) of our stock took their shares for investment purposes without a view to distribution. Furthermore, they had access to information concerning our Company and our business prospects; there was no general solicitation or advertising for the purchase of our shares; there were no commissions paid; and the securities are restricted pursuant to Rule 144.

During the six-months ended March 31, 2005, the Company received requests to distribute the 10,500,000 common shares that were held by our wholly owned subsidiary Medical International Technology (MIT Canada) Inc. These shares were originally issued for the acquisition of the operations of MIT Canada in July of 2002. The shares were subject to distribution to approximately 24 shareholders upon their conversion of preferred shares in MIT Canada, Inc., pursuant to the acquisition agreement.

All shares were converted and reissued as exempted transactions under Section 4(2) of the Securities Act of 1933 and are subject to Rule 144 of the Securities Act of 1933. Exemptions being non exclusive the transactions are believed to be exempt from registration under Regulation D promulgated under Section 4(2) of the Securities Act and Regulation "S" related any the foreign transactions. The recipient(s) of our stock took their shares for investment purposes without a view to distribution. The transactions were an exchange resulting in an investment similar to the one originally entered into by the recipient(s), management and business operations remained constant for the recipient(s). Furthermore, they had access to information concerning our Company and our business prospects; there was no general solicitation or advertising for the purchase of our shares; there were no commissions paid; and the securities are restricted pursuant to Rule 144.
