## Quarterly Report

### Management's Discussion and Analysis of Financial Condition

This statement includes projections of future results and “forward looking statements” as that term is defined in Section 27A of the Securities Act of 1933 as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934 as amended (the “Exchange Act”). All statements that are included in this Quarterly Report, other than statements of historical fact, are forward looking statements. Although management believes that the expectations reflected in these forward looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct.

#### Financial Summary

Results of Operations for the Three-Months Ended March 31, 2001

The Majority of the net loss was due to basic operational expenses including rent, postage and bank fees.

Liquidity and Capital Resources for the Three-months ended March 31, 2001.

During the Three-month period March 31, 2001, the Company’s cash position decreased by \$963. The Company used \$1,325 to purchase sublimation equipment and materials and the remainder it used in its basic operations.

#### Management Plan of Operations

The Company is has experienced difficulty selling its current offering of securities to expand operations. The company continues to rely on the officers’ contributions of time and money to develop the current business plan. Efforts continue to fully subscribe the offering.

The company has identified a subcontractor for etched products and has delivered an initial sale at a 23% margin. This low margin is nearly all profit, as the subcontractor will direct ship under our logo.

The company has had difficulty locating a suitable sales person for its banner products, but continues to search for the right individual.

The company has raised some money from its offering and along with loans from its officers purchased sublimation equipment and materials in an effort to generate some internal revenue source. These purchases enable the company to place full colour images on ceramic mugs and other materials treated for this transfer process. The intent is to develop sales of a high margin product to fund basic operations.

Currently a custom full color print on a ceramic mug can be produced for approximately \$3 and are planned for sale at in the \$6 to \$10 price range based on complexity and quantity. The company is currently filling its first order of this new product. The addition of a photo upload protocol to the website is currently being explored. Customers could then send their own photos with their order via the Internet and have them placed on various products in photo quality color.

The company’s basic operational expenses are very low and are expected to increase only as a direct result from increased sales. The interim steps discussed above are expected to increase revenue sufficiently to cover basic operational expenses.
