AGRONIX, INC.

(A Development Stage Company)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

MARCH 31, 2002

1. OPERATIONS AND GOING CONCERN

The company was incorporated under the laws of Florida, U.S.A. on May 6, 1996 as RCA Trading Co. The company changed its name to Agronix, Inc. on June 18, 2001.

Pursuant to a share exchange agreement entered into on October 16, 2000 and closed on March 26, 2001, between the shareholders of the Agronix and shareholders of a private Company, American Waste Recovery, Inc. ("AWR"), the Company purchased all of the outstanding shares of AWR. AWR was incorporated under the laws of Nevada, U.S.A. on January 20, 2000 as American Bio Recovery, Inc.; on January 26, 2000, its name was changed to American Waste Recovery, Inc. The consideration for this acquisition was the issuance by the company of 6,622,250 common shares.

As a result of this transaction, AWR has become a wholly-owned subsidiary of Agronix and the former shareholders of AWR in turn became owners of the majority of the issued and outstanding shares of Agronix. Since the former shareholders of AWR have acquired control of Agronix through this transaction, it is considered a reverse acquisition and these financial statements are presented from the perspective of AWR (the accounting parent in this transaction). These financial statements present the consolidated results of operations from AWR's date of incorporation (January 20, 2000) to March 31, 2002 including the results of operations of Agronix since March 26, 2001.

Agronix has focused its activities on the development of its acquired technologies for commercial use, for identifying prime international locations to build commercial plants, and forming strategic alliances for the implementation of its global business plan. No significant revenues have been realized and planned principal operations have not yet commenced. Agronix is engaged in the acquisition and development of technologies that convert organic residues into agricultural products such as growth substrates, organic fertilizers, soil amendments and chemical commodities for agriculture and industry use.

These financial statements have been prepared on the basis of accounting principles applicable to a going concern which assumes that the Company will continue to operate for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. The Company's continued existence is dependent upon its ability to raise additional capital and to ultimately achieve profitable operations. It is management's intention to pursue market acceptance for its product and identify funding sources until such time that there is sufficient operating cash flow to fund operating requirements.

If the going concern assumptions were not appropriate for these financial statements, then adjustments could be necessary in the carrying values of assets and liabilities, the reported expenses and the balance sheet classifications used.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

CONSOLIDATION

These consolidated financial statements are presented in U.S. dollars in accordance with accounting principles generally accepted in the United States of America and include the accounts of the company and its wholly-owned subsidiary, AWR.

ACCOUNTING FOR STOCK OPTIONS

In October 1995, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 123, Accounting for Stock-Based Compensation ("SFAS"), which requires entities to calculate the fair value of stock awards granted to employees. This statement provides entities with the option of electing either to expense the fair value of employee stock-based compensation or to continue to recognize compensation expense under previously existing accounting pronouncements set out in APB 25 and to provide pro-forma disclosures of net earnings (loss) and, if presented, earnings (loss) per share, as if the above-referenced fair value method of accounting was used in determining compensation expense.

The company has elected to account for stock-based employee or director compensation arrangements in accordance with Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees ("APB No. 25").

Stock options issued to non-employees are recorded at the fair value of the services received or at the fair value of the options issued, whichever is more reliably measurable. Compensation is charged to expense over the shorter of the term of service or the vesting period.

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options and warrants which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions, including the expected stock price volatility.

CAPITAL ASSETS

Capital assets are recorded at cost less accumulated depreciation. Depreciation is recorded on the straight-line method at the following rates:

Office equipment	20 %	straight line
Computer equipment	30 %	straight line
Computer software	50 %	straight line

INVESTMENTS

The company uses the equity method to account for investments in companies such as 3884171 Canada Inc. and other business ventures over which it exercises significant influence.

TECHNOLOGY

The company capitalizes the acquisition costs of technologies when their technological feasibility has been established; otherwise such costs are charged to operations.

RESEARCH AND DEVELOPMENT

The Company records all research and development costs in accordance with SFAS 2 "Accounting for Research and Development Costs". As such, all research and development costs are expensed as they are incurred, until such time as the research and development outcome is proven for commercial use, at which time the costs are capitalized and amortized.

LONG-LIVED ASSETS

The company monitors the recoverability of long-lived assets, including capital assets and its investments in and advances to 3884171 Canada Inc., based on estimates using factors such as current market value, future asset utilization, and future undiscounted cash flows expected to result from the use of the related assets. The company's policy is to record any impairment loss in the period when it is determined that the carrying amount of the asset may not be recoverable. Any impairment loss is calculated as the excess of the asset's carrying value over its estimated realizable value.

LOSS PER SHARE

The company follows SFAS No. 128 to calculate earnings per share. Basic loss per share is computed using the weighed effect of all common shares issued and outstanding. Fully diluted earnings per share has not been presented as the effect on basic earnings per share is anti-dilutive.

Prior year earnings per share have been restated to reflect the two-for-one stock split which occurred on January 9, 2002.

USE OF ESTIMATES

In preparing financial statements in conformity with accounting principles accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements for the reporting period. Actual results may differ from those estimates.

RECENT ACCOUNTING PRONOUNCEMENTS

The Financial Accounting Standards Board ("FASB") has issued the following pronouncements, none of which are expected to have a significant impact on the financial statements:

SFAS 141 & 142

On July 20, 2001, the FASB issued SFAS 141, Business Combinations, and SFAS 142, Goodwill and

Intangible Assets. SFAS 142 is effective for fiscal years beginning after December 15, 2001; however, certain provisions of this statement apply to goodwill and other intangible assets acquired between July 1, 2001 and the effective date of SFAS 142. Major provisions of these statements and their effective dates for the company are as follows:

- a) all business combinations initiated after June 30, 2001 must use the purchase method of accounting. The pooling of interest method of accounting is prohibited except for transactions initiated before July 1, 2001.
- b) intangible assets acquired in a business combination must be recorded separately from goodwill if they arise from contractual or other legal rights or are separable from the acquired entity and can be sold, transferred, licensed, rented or exchanged, either individually or as part of a related contract, asset or liability.
- c) effective January 1, 2002, goodwill and intangible assets with indefinite lives will be tested for impairment annually and whenever there is an impairment indicator.
- d) all acquired goodwill must be assigned to reporting units for purposes of impairment testing and segment reporting.

SFAS 143 & 144

In July, 2001, the FASB issued SFAS No. 143, Accounting for Asset Retirement Obligations. This statement addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. This statement applies to all entities. It applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development and (or) the normal operation of a long-lived asset, except for certain obligations of lessees. This statement is effective for financial statements issued for fiscal years beginning after June 15, 2002.

In August 2001, the FASB issued SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. This statement addresses financial accounting and reporting for the impairment or disposal of long-lived assets and supersedes FASB Statement No. 121, Accounting for the Impairment of Long-Lived Assets to be Disposed Of. The provisions of the statement are effective for financial statements issued for fiscal years beginning after December 15, 2001.

3. CAPITAL ASSETS

		Cost	Accumulated Amortization	Net March 31 2002	Net December 31 2001

	<u>\$ 17,040</u>		<u>\$ 15,277</u>	<u>\$ 9,998</u>
			<u>1,763</u>	

4. INVESTMENT IN AND ADVANCES TO 3887141 CANADA INC.

Pursuant to an agreement entered into by the Company and Bio-Max Inc. ("Bio-Max") (a Quebec City, Canada based developer of organic waste processing plants), a subsidiary (3884171 Canada Inc. ("Newco")) was created in which the Company owns 20% of the issued and outstanding common shares and Bio-Max owns 80% of the issued and outstanding common shares. Newco has been established to further the development and commercialization of Bio-Max's "Robo II" technology into Agronix/Bio-Max "Robo III" technology [Agronix Bio-Conversion Reactor System (BCR)] using Agronix intellectual property rights and proprietary bio-conversion formulae.

Under the terms of the agreement:

(a) Bio-Max contributed the Robo II technology as its capital contribution for an 80% interest in Newco. The Company contributed \$20 Cdn and its technical process improvements, its intellectual property rights and proprietary bio-conversion formulae as its capital contribution for a 20% interest in Newco with a 3 year option to purchase a further 30% of Newco for \$1,500,000 million CAD. Should the Company exercise this option, it would be a 50/50 partner with Bio-Max in Newco.

(b) The Company and Bio-Max have given each other a right of first refusal to match any offer to purchase any shares of Newco owned by each of them.

(c) Agronix has the world licensing rights for Robo III from Newco with the exception of the Francophone countries.

(d) Agronix has advanced \$224,000 CAD to Newco which has completed Robo III engineering and the Bio-Conversion Reactor System (BCR) to be constructed for commercial plant operations throughout the world.

The company's investment in and advances to Newco have been accounted for as follows:

	March 31 2002	37620 2001
Investment in shares	\$13	\$13
Advances, non-interest bearing, no stated terms of repayment	<u>143,295</u>	<u>143,004</u>
	<u>\$143,308</u>	<u>\$143,017</u>

5. DUE TO RELATED PARTIES

	March 31 2002	37620 2001
Revolving credit facility with a shareholder, unsecured, non-interest bearing, principal due on June 30, 2002	\$ 7,000	\$ 7,000
Demand loan from a company controlled by a shareholder - unsecured, principal in the amount of \$100,000 Cdn; 12% per annum simple interest; interest payable monthly; repayable on demand or on June 30, 2002	<u>62,710</u>	<u>62,870</u>
	<u>\$69,710</u>	<u>\$69,870</u>

6. CAPITAL STOCK

On June 11, 2001 the Company amended its Articles of Incorporation to change the authorized number of shares from 20,000,000 common shares to 25,000,000 and the authorized number of preferred shares from 5,000,000 to 10,000,000.

On January 9, 2002 the company amended its outstanding number of common shares to reflect a two-for-one split. As a result, the 9,726,857 issued and outstanding shares as of that date changed to a total of 19,453,714 issued and outstanding shares. In addition, the company amended its Articles of Incorporation to change the authorized number of shares from 25,000,000 to 50,000,000 common shares. The Company has retroactively reflected this two-for-one split in these financial statements.

STOCK OPTIONS

The following table summarizes information about outstanding and exercisable stock options at March 31, 2002:

<u>Options Outstanding</u>					<u>Options Exercisable</u>

<u>3,870,000</u>				<u>\$0.64</u>	<u>3,580,000</u>	<u>\$0.64</u>	

Summary of share option activity and information concerning options at March 31, 2002:

	Three months ended March 31, 2002	Year ended December 31, 2001
Balance, beginning of period	3,670,000	2,340,000
Granted	200,000	1,530,000
Cancelled	-	(200,000)
Balance, end of period	<u>3,870,000</u>	<u>3,670,000</u>

The company granted options to purchase 200,000 shares of the company's common stock to consultants during the period ended March 31, 2002. Compensation expense of \$139,750 related to these options has been recorded.

The company accounts for the options issued to directors and employees in accordance with the provisions of APB Opinion No. 25, Accounting for Stock Options Issued to Employees. Had compensation cost for the employee stock option plan been determined based on the fair value at the grant date consistent with the method of SFAS No. 123, Accounting for Stock-Based Compensation, the company's net loss and net loss per share would have been the pro forma amounts indicated below:

	Three months ended March 31, 2002	Three months ended March 31, 2001
Net loss:		
Actual net loss	(326,736)	(177,641)
Proforma net loss	(703,736)	(236,266)
Loss per share:		
Actual net loss per share	(0.02)	(0.03)
Proforma net loss per share	(0.02)	(0.09)

The fair value of each option grant was estimated at the grant date using the Black-Scholes option-pricing model for the period from inception to March 31, 2002, assuming a risk-free interest rate of 2.10% (2001: 4.85%), volatility of 67.6% (2001: 0%), zero dividend yield (2001: zero), and an expected life of six years.

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options and warrants which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions, including the expected stock price volatility. Because the company's employee stock options and warrants have characteristics significantly

different from traded options, and because changes in the subjective input assumptions can materially affect the fair value estimates, in management's opinion, the existing models do not necessarily provide a reliable measure of the fair value of its employee stock options.

PERFORMANCE SHARES

On January 27, 2000, 1,000,000 performance shares were issued into escrow for the company's President and C.E.O. For each \$0.25 of cumulative cash flow generated by the company from its operations, two performance shares will be released from escrow. All shares remain in escrow at March 31, 2002.

7. RESEARCH AND DEVELOPMENT

During 2000, AWR acquired certain soil and organic matter expertise and intellectual property from an unrelated organic residue consultant based in Ottawa, Canada. The consideration for this acquisition was 300,000 AWR common shares issued at an estimate of their fair value of \$0.50 Cdn.per share. This research and development acquired has yet to be proven commercially and its acquisition has been expensed.

During 2001, 220,000 Agronix shares were issued at an estimate of their fair value of \$0.50 Cdn per share to three separate parties with soil science and engineering expertise. The shares were consideration for engineering activity which was required to advance the design of the BCIR system to the point that it meets specific functional and economic requirements and is ready for manufacture.

A further 500,000 shares were issued during 2001 at an estimate of their fair value of \$0.50 Cdn per share to three separate parties with soil science and engineering expertise. The shares were consideration for routine, on-going efforts to refine, enrich, and otherwise improve upon the qualities of the existing BCR system, and the engineering follow-through in the early phase of commercial production.

The company has incurred research and development expenses as follows:

	Cumulative From Inception (January 20, 2000) to March 31, 2002	For the Three Month Period Ended March 31, 2002	For the Three Month Period Ended March 31, 2001
Acquisition of organic matter expertise and intellectual property	\$150,000	\$-	\$-
Technical development of BCR System	189,039	21,812	-
Technical development of BCIR System	<u>71,456</u>	=	=
	<u>\$410,495</u>	<u>\$21,812</u>	<u>\$-</u>

8. COMMITMENTS

Collaborative Research and Development Agreement

The Company has consolidated its research and development activities at Carleton University in Ottawa, Canada where it has committed to fund research being carried out by Carleton University for a period of five years. The company will own any new technologies and/or intellectual property arising out of these

research and development activities. Upon execution of a formal agreement, the company will contribute approximately \$90,000 per year in cash for five years and \$1,725,000 in kind to further research and development in this area. No expenditures have yet been made under this agreement.

Licensing Agreement

The Company has entered into a licensing agreement with a U.K. registered Company whereby the Company has committed to provide exclusive rights to introduce the Company's technology throughout Europe. Under the agreement the Company has received a convertible loan note, the principal amount of \$8,000,000 with an agreed value of GBP 5,673,759; non-interest bearing and convertible on July 21, 2002 into 2,466,852 shares of non-diluted common shares of the licensee, or immediately upon the licensee being listed on any recognized stock exchange, if this occurs prior to July 21, 2002.

This transaction has not been recorded in the financial statements, as there is uncertainty as to the collectibility of the \$8,000,000 note. In addition, the fair market value of the 2,466,852 common shares which would be received on conversion cannot be readily determined.

Option to purchase land

The Company has acquired an option to purchase a 73 acre parcel of land in the Fraser Valley region of British Columbia, Canada, on which it intends to construct its initial pilot plant in Western Canada. Under the agreement, the Company has agreed to pay \$2,000 Cdn. per month to extend the land purchase option to May 18, 2002. The agreed purchase price of the land is \$1,800,000 Cdn. The Company is required to make a payment of \$100,000 Cdn. to secure the purchase agreement.

9. INCOME TAXES

At March 31, 2002, the company has net operating losses carried forward of approximately \$1,400,000 that may be offset against future taxable income to 2020. No future tax benefit has been recorded in the financial statements, as the company believes that it is more likely than not that the carryforwards will expire unused between the 2018 and 2022 taxation years. Accordingly, the potential tax benefits of the loss carry-forwards are offset by a valuation allowance of the same amount.

10. RELATED PARTY TRANSACTIONS

During the period ended March 31, 2002, the company paid \$14,127 in consulting fees to its president and C.E.O. and \$103,115 to other shareholders as consulting fees. The consulting fees of \$103,115 paid to other shareholders include cash payments of \$11,913 and 172,000 common shares valued at \$91,202.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

The following discussion contains certain statements that may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that refer to expectations, projections or other characterization of future events or circumstances, and especially those which include variations of the words "believes," "intends," "estimates," "anticipates," "expects," "plans," or similar words or variations thereof, are likely to be forward-looking statements, and as such, are likely to concern matters involving risk, uncertainty, unpredictability and other factors that could materially and adversely affect the outcome or results indicated by or inferred from the statements themselves. Therefore, the reader is advised that the following discussion should be considered in light of the discussion of risks and other factors contained in this Form 10QSB and in the Company's other filings with the Securities and Exchange Commission, and that no statements contained in the following discussion or in this Form 10QSB should be construed as a guarantee or assurance of future performance or future results.

Introduction

During the second quarter 2001, the Company held a special shareholders' meeting which approved a name change from RCA Trading Co. d.b.a. American Waste Recovery, Inc. to Agronix, Inc. This name change complements the market/industry in which the Company does business. At that time, the number of authorized shares of common stock of the Company was voted to be increased from 10,000,000 to 25,000,000, and 10,000,000 shares of preferred stock were also authorized. In January 2002, in conjunction with a 2:1 forward split of its issued and outstanding common stock, the Company increased its authorized common stock from 25,000,000 to 50,000,000 shares.

Plan of Operations

Agronix, Inc. is in the business of acquiring and developing technologies that convert organic wastes (animal manure, sewage sludge, bio-solids, produce processing waste, etc.) into agricultural products such as growth substrates, organic fertilizer, soil amendments and other value added agri-products. The Company is also engaged in the business of developing a technology that is used to recover chemical commodities from organic waste for a wide variety of industries such as agriculture, food, oil & gas, paper, clothing and pharmaceuticals. The Company's Bio-Conversion Reactor System (BCR System) is now fully engineered and ready to enter the market. The Company is presently reviewing locations in North America and Europe to launch its first plant.

The Company remains in the development stage and does not have an established source of revenue sufficient to cover its operating costs. As of March 31, 2002, the Company had cash on hand of \$47,357, which is not sufficient to allow it to pay its operating expenses and carry out its plan of operation for the next twelve months. Therefore, it is the Company's intention to seek additional financing through private and public placements of its common stock and to seek commercial alliances and begin production where market opportunities exist.

Pursuant to an agreement entered into by the Company and BIOMAX Inc., a Canadian Company located

in Quebec City (a developer of automated organic waste processing plants), the Company and Biomax have created a subsidiary (“Newco”) to further develop and commercialize Biomax’s “Robo II” technology. In exchange for its technology contribution, Biomax will receive an 80% interest in Newco, and for its cash contribution of \$224,000 CAD, intellectual property and proprietary soil science expertise Agronix has received exclusive licensing rights and a 20% equity interest. Agronix has the right to purchase a further 30% equity interest over the next 3 years for \$1,500,000 CAD.

The Company is presently working in the British Columbia, Canada, Fraser Valley, Abbotsford Region to locate its first 50,000-ton per year bioconversion plant. In the second quarter of the previous fiscal year, the Company located and contracted for the acquisition of 73-acre parcel of land for a purchase price of \$1,800,000 Cdn. The Company has negotiated a purchase option of CAD \$2,000 per month until April 30, 2002 to preserve its cash flow and must make a payment of \$100,000 CAD to secure this purchase agreement.

Agronix is actively involved in negotiations to joint venture Bio-Conversion Reactor System (BCR) plants in the following jurisdictions:

USA – Florida, New Jersey, New Hampshire

Europe – Geneva, Switzerland (Greater Regional District); Castleblayney, Ireland

Canada – Abbotsford, British Columbia, Newfoundland; St. Martine, Quebec;

Lethbridge, Alberta.

Additionally, the Company is presently negotiating with a large feed supplier with operations in the US and Canada to secure take-out contracts for Agronix’s BCR plant organic fertilizers and growth substrates.

Furthermore, an organic product producer and retail distributor in Quebec, Canada is negotiating with Agronix for East Coast US distribution of the BCR organic fertilizers and growth substrates.

The Company estimates that it will require funding of approximately \$7,500,000 Cdn to complete construction of the proposed Abbotsford plant. The Company has entered into discussions with the Farm Credit Corporation (FCC) of Canada to provide 100% financing for the Abbotsford plant and for all subsequent plants to be constructed in Canada, but there is no assurance that this funding will be available. In the event funding is available from FCC it is expected to be provided through a joint venture partnership that is partly owned by farmers and partly owned by the Company.

The Company and Agriculture and Agri-food Canada have mutually agreed not to enter into a formal research agreement with each other. The Company has consolidated its research and development activities at Carleton University in Ottawa where its has committed to fund research being carried out by Carleton University for a period of 5 years. The Company will own any new technologies and/or intellectual property arising out of these research and development activities.

Subsequent to March 31, 2002, the Company has closed its private placement offering of up to 2,000,000 shares of common stock at a price of \$1.00 per share. In addition, the Company has cancelled its agreement with Epsom Investment Services N.V. to seek funding for a maximum of \$10,000,000 at \$1.00 per share contingent upon approval of the Company's shares for trading on the NASD Bulletin Board.

The Company's shares have been approved for trading on the OTC Bulletin Board under the symbol "AGNI."

PART II

ITEM 1. LEGAL PROCEEDINGS

None.

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

Issuance of Options

During the first quarter of 2002, the Company granted options to purchase of 200,000 shares of common stock to consultants. The options have an exercise price of \$1.00, and an exercise term of one year.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K.

No reports on Form 8-K were filed during the quarter ended March 31, 2002.

SIGNATURES

In accordance with the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
