☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934
FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2008

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
FOR THE TRANSITION PERIOD FROM _____ TO _____

Commission File Number: 001-16517

PHOENIX

THE PHOENIX COMPANIES, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or organization)

06-1599088
(I.R.S. Employer Identification No.)

One American Row, Hartford, Connecticut
(Address of principal executive offices)

06102-5056
(Zip Code)

(860) 403-5000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES ☒ NO ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐
(Do not check if smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES ☐ NO ☒

On July 31, 2008, the registrant had 114.4 million shares of common stock outstanding.

THE PHOENIX COMPANIES, INC.
Notes to Unaudited Interim Consolidated Financial Statements
Three and Six Months Ended June 30, 2008 and 2007

1. Organization and Operations

Our unaudited interim consolidated financial statements include the accounts of The Phoenix Companies, Inc. (the “Company”), its subsidiaries and certain sponsored collateralized obligation trusts as described in Note 11. The Phoenix Companies, Inc. is a holding company and our operations are conducted through subsidiaries, the principal ones of which are Phoenix Life Insurance Company (“Phoenix Life”) and Phoenix Investment Partners, Ltd. (“PXP”). We have eliminated significant intercompany accounts and transactions in consolidating these financial statements.

On February 7, 2008, we announced our intention to spin off our asset management subsidiary, PXP, by way of a dividend of PXP’s stock to our shareholders. The spin-off and related transactions are expected to be completed in the third quarter of 2008. The notes to these financial statements include disclosures that reflect our business and organization as currently structured.

2. Basis of Presentation and Significant Accounting Policies

We have prepared these financial statements in accordance with accounting principles generally accepted in the United States of America (“GAAP”) which differ materially from the accounting practices prescribed by various insurance regulatory authorities.

Use of estimates

In preparing these financial statements in conformity with GAAP, we are required to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from these estimates. We employ significant estimates and assumptions in the determination of deferred policy acquisition costs; policyholder liabilities and accruals; the valuation of intangible assets; the valuation of investments in debt and equity securities and venture capital partnerships; the valuation of deferred tax assets; pension and other postemployment benefits liabilities; and accruals for contingent liabilities. Our significant accounting policies are presented in the notes to our consolidated financial statements in our 2007 Annual Report on Form 10-K.

Our interim consolidated financial statements do not include all of the disclosures required by GAAP for annual financial statements. In our opinion, we have included all adjustments, consisting of normal, recurring adjustments, considered necessary for a fair statement of the results for the interim periods. Financial results for the three- and six-month periods in 2008 are not necessarily indicative of the results that may be expected for the year 2008. These consolidated financial statements should be read in conjunction with our consolidated financial statements in our 2007 Annual Report on Form 10-K.

Accounting Change

Effective April 1, 2008, we changed our method of accounting for the cost of certain of our long duration reinsurance contracts accounted for in accordance with Statement of Financial Accounting Standards No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts* (“SFAS 113”). In conjunction with this change, we also changed our method of accounting for the impact of reinsurance costs on deferred acquisition costs. SFAS 113 requires us to amortize the estimated cost of reinsurance over the life of the underlying reinsured contracts. Under our previous method, we recognized reinsurance recoveries as part of the net cost of reinsurance and amortized this balance over the estimated lives of the underlying reinsured contracts in proportion to estimated gross profits (“EGPs”) consistent with the method used for amortizing deferred policy acquisition costs. Under the new method, reinsurance recoveries are recognized in the same period as the related reinsured claim. In conjunction with this change, we also changed our policy for determining EGPs relating to these contracts to include the effects of reinsurance, where previously these effects had not been included.

2. Basis of Presentation and Significant Accounting Policies (continued)

We adopted the new method because we believe that it better reflects the economics of the underlying reinsurance activity by better matching the reinsurance recovery with the insured loss that gave rise to that recovery. We also believe that the new method is consistent with management's intent in purchasing reinsurance, which is to protect the Company against large and unexpected claims. Comparative amounts from prior periods have been adjusted to apply the new method retrospectively in these financial statements. The following financial statement line items were affected by the change in accounting principle. Certain balances shown "as originally reported" have been reclassified to conform to the current period presentation.

Balance Sheet

(\$ in millions)	June 30, 2008		
	As calculated under the new method	As calculated under the former method	Effect of change
Deferred policy acquisition costs	\$ 2,351.0	\$ 2,348.8	\$ 2.2
Deferred income tax asset	76.2	78.1	(1.9)
Policy liabilities and accruals	13,800.2	13,803.4	(3.2)
Accumulated deficit	(50.6)	(54.1)	3.5

(\$ in millions)	December 31, 2007		
	As adjusted	As originally reported	Effect of change
Deferred policy acquisition costs	\$ 2,089.9	\$ 2,081.2	\$ 8.7
Deferred income tax asset	42.8	36.9	5.9
Policy liabilities and accruals	13,816.7	13,791.2	25.5
Accumulated deficit	(20.7)	(9.8)	(10.9)

As of January 1, 2007, the cumulative effect of the new method on our stockholders' equity was a decrease of \$4.7 million, which was recorded to accumulated deficit.

Following is a description of our accounting for deferred policy acquisition costs, which has been updated from our 2007 Annual Report on Form 10-K to reflect a change in our method of accounting for the effects of reinsurance.

Deferred policy acquisition costs

The costs of acquiring new business, principally commissions, underwriting, distribution and policy issue expenses, all of which vary with and are primarily related to production of new business, are deferred. In connection with our 1997 acquisition of the Confederation Life business, we recognized an asset for the present value of future profits representing the present value of estimated net cash flows embedded in the existing contracts acquired. This asset is included in deferred policy acquisition costs.

We amortize deferred policy acquisition costs and present value of future profits based on the related policy's classification. For individual participating life insurance policies, deferred policy acquisition costs and present value of future profits are amortized in proportion to estimated gross margins. For universal life, variable universal life and accumulation annuities, deferred policy acquisition costs and present value of future profits are amortized in proportion to EGPs. Policies may be surrendered for value or exchanged for a different one of our products (internal replacement). The deferred policy acquisition costs balance associated with the replaced or surrendered policies is amortized to reflect these surrenders.

Each year, we develop future EGPs for the products sold during that year. The EGPs for products sold in a particular year are aggregated into cohorts. Future EGPs are projected for the estimated lives of the contracts. The amortization of deferred policy acquisition costs and present value of future profits requires the use of various assumptions, estimates and judgments about the future. The assumptions, in the aggregate, are considered important in the projections of EGPs. The assumptions developed as part of our annual process are based on our current best estimates of future events, which are likely to be different for each year's cohort. Assumptions considered to be significant in the development of EGPs include separate account fund performance, surrender and lapse rates, interest margin, mortality, premium persistency, funding patterns, expenses and reinsurance costs and recoveries. These assumptions are reviewed on a regular basis and are based on our past experience, industry studies, regulatory requirements and estimates about the future.

To determine the reasonableness of the prior assumptions used and their impact on previously projected account values and the related EGPs, we evaluate, on a quarterly basis, our previously projected EGPs. Our process to assess the reasonableness of our EGPs involves the use of internally developed models, together with studies and actual experience. Incorporated in each scenario are our current best estimate assumptions with respect to separate account returns, surrender and lapse rates, interest margin, mortality, premium persistency, funding patterns, expenses and reinsurance costs and recoveries.

2. Basis of Presentation and Significant Accounting Policies (continued)

Underlying assumptions for future periods of EGPs are not altered unless experience deviates significantly from original assumptions. For example, when lapses of our insurance products meaningfully exceed levels assumed in determining the amortization of deferred policy acquisition costs, we adjust amortization to reflect the change in future premiums or EGPs resulting from the unexpected lapses. In the event that we were to revise assumptions used for prior year cohorts, our estimate of projected account values would change and the related EGPs in the deferred policy acquisition cost amortization model would be adjusted to reflect such change. This process is known as “unlocking”. Continued favorable experience on key assumptions, which could include increasing separate account fund return performance, decreasing lapses or decreasing mortality could result in an unlocking which would result in a decrease to deferred policy acquisition cost amortization and an increase in the deferred policy acquisition costs asset. Finally, an analysis is performed periodically to assess whether there are sufficient gross margins or gross profits to amortize the remaining deferred policy acquisition costs balances.

Adoption of new accounting standards

On February 15, 2007, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (“SFAS 159”), which gives entities the option to measure eligible financial assets, financial liabilities and firm commitments at fair value (i.e., the fair value option), on an instrument-by-instrument basis, that are otherwise not permitted to be accounted for at fair value under other accounting standards. The election to use the fair value option is available when an entity first recognizes a financial asset or financial liability or upon entering into a firm commitment. Subsequent changes in fair value must be recorded in earnings. Additionally, SFAS 159 allows for a one-time election for existing positions upon adoption, with the transition adjustment recorded to beginning retained earnings. We adopted SFAS 159 as of January 1, 2008 with no net effect to equity, as further described below.

We elected to apply the SFAS 159 fair value option to available-for-sale equity securities with a fair value of \$74.6 million at January 1, 2008. These securities back our deferred compensation liabilities. Previously, changes in the fair value of the securities were recorded in other comprehensive income while changes in the liability were recorded in earnings. Electing the fair value option resulted in a decrease to accumulated other comprehensive loss and an offsetting increase to accumulated deficit of \$2.9 million, net of tax, and allows us to mitigate the associated accounting volatility. Following election of the fair value option, changes in the fair value of these securities are recorded in earnings.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 provides guidance on how to measure fair value when required under existing accounting standards. The statement establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels (“Level 1, 2 and 3”). Level 1 inputs are observable inputs that reflect quoted prices for identical assets or liabilities in active markets that we have the ability to access at the measurement date. Level 2 inputs are observable inputs, other than quoted prices included in Level 1, for the asset or liability. Level 3 inputs are unobservable inputs reflecting our estimates of the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). Quantitative and qualitative disclosures will focus on the inputs used to measure fair value for both recurring and non-recurring fair value measurements and the effects of the measurements in the financial statements. We adopted SFAS 157 effective January 1, 2008 with no material impact on our financial position and results of operations.

We adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (“FIN 48”), on January 1, 2007. As a result of the implementation of FIN 48, we recognized an increase in reserves for uncertain tax benefits through a cumulative effect adjustment of approximately \$4.0 million, which was accounted for as an increase to the January 1, 2007 balance of accumulated deficit. Including the cumulative effect adjustment, we had approximately \$23.9 million of total gross unrecognized tax benefits as of January 1, 2007. The amount of unrecognized tax benefits at January 1, 2007 that would, if recognized, impact the annual effective tax rate upon recognition was \$21.0 million. See Note 13 to these financial statements for more information.

The company is presently under audit with the Internal Revenue Service (“IRS”) for 2004 and 2005. It is reasonably possible that the exam will conclude within the next 12 months. An estimate of the change in FIN 48 liabilities cannot be made at this time due to the number of items still being reviewed by the IRS.

2. Basis of Presentation and Significant Accounting Policies (continued)

In March 2006, the FASB issued SFAS No. 156, *Accounting for Servicing of Financial Assets, an amendment of FASB Statement No. 140* (“SFAS 156”). SFAS 156 provides guidance on recognition and disclosure of servicing assets and liabilities and is effective beginning January 1, 2007. We adopted this standard effective January 1, 2007 with no material impact on our financial position and results of operations.

In September 2005, the Accounting Standards Executive Committee (“AcSEC”) of the AICPA issued Statement of Position 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts* (“SOP 05-1”). SOP 05-1 provides guidance on accounting by insurance enterprises for deferred policy acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in Statement of Financial Accounting Standards No. 97 (“SFAS No. 97”). The SOP defines an internal replacement as a modification in product benefits, features, rights, or coverages that occurs by the exchange of a contract for a new contract, or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. This SOP is effective for internal replacements occurring in fiscal years beginning after December 15, 2006. We adopted this standard effective January 1, 2007 with no material effect on our financial position and results of operations.

Accounting standards not yet adopted

In May 2008, the FASB issued SFAS No. 163, *Accounting for Financial Guarantee Insurance Contracts, an Interpretation of FASB Statement No. 60* (“SFAS 163”). Financial guarantee insurance and reinsurance contracts are contracts issued by insurance enterprises that provide protection to the holder of a financial obligation from a financial loss in the event of a default. The new accounting standard applies to recognition and measurement of premium revenue and claim liabilities on such contracts and to related disclosures. SFAS 163 will be effective for us on January 1, 2009. We do not have financial guarantee insurance products and, accordingly, do not expect our adoption of SFAS 163 to have an effect on our financial position and results of operations.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (“SFAS 162”). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of GAAP-basis financial statements. The Standard is effective 60 days following SEC approval of the Public Company Accounting Oversight Board amendments to remove the hierarchy of generally accepted accounting principles from the auditing standards. SFAS 162 is not expected to have an impact on our financial position and results of operations.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133* (“SFAS 161”). This statement amends and expands the requirement for qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. SFAS 161 will be effective for us on January 1, 2009.

In December 2007, the FASB issued SFAS No. 141(R), *Accounting for Business Combinations* (“SFAS 141(R)”). SFAS 141(R) requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction, establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed and requires the acquirer to disclose all information needed to evaluate and understand the nature and financial effect of the combination and is effective beginning for fiscal years beginning after December 15, 2008. We will adopt this standard effective January 1, 2009 and do not expect it to have a material impact on our financial position and results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* (“SFAS 160”). SFAS 160 requires all entities to report noncontrolling interests in subsidiaries in the same way—as equity in the consolidated financial statements and requires that associated transactions be treated as equity transactions—and is effective beginning for fiscal years beginning after December 15, 2008. We will adopt this standard effective January 1, 2009 and do not expect it to have a material impact on our financial position and results of operations.

3. Business Combinations and Dispositions

PFG Holdings, Inc.

In 2003, we acquired the remaining interest in PFG Holdings, Inc. (“PFG”), the holding company for our private placement operation. The initial purchase consideration was \$16.7 million in addition to a contingent obligation for additional purchase consideration based on the achievement of certain performance targets through 2007 and the appraised value of PFG as of December 31, 2007. Through November 2007, we paid additional consideration of \$19.4 million, including \$13.4 million, \$0.0 million and \$3.0 million during 2007, 2006 and 2005 respectively. In November 2007, we amended the original purchase agreement to extend the term of the agreement through the end of 2009 and to establish a more objective mechanism to value PFG and calculate the final amount of contingent consideration. As a result, we may be obligated to make additional cash payments of \$17.6 million by June 2010 if certain performance targets are met through December 2009. Since the contingent payments are based on the achievement of performance targets, the actual payments may be lower. If the performance targets are exceeded, the actual payments may be higher, subject to a maximum of \$77.1 million. In accordance with EITF 95-8, *Accounting for Contingent Consideration Paid to the Shareholders of an Acquired Enterprise in a Purchase Business Combination*, a portion of the contingent payments will be accounted for as goodwill, and the amounts related to performance in excess of targets will be expensed, if and when achieved.

EMCO

On December 20, 2007, we sold all of the outstanding stock of Emprendimiento Compartido S.A. (“EMCO”), an Argentine wholly-owned subsidiary. We realized an after-tax loss of \$4.8 million on this sale. This loss, as well as EMCO’s results up through the date of sale, is reported in discontinued operations in these financial statements. Prior year results have also been reported in discontinued operations.

Kayne Anderson Rudnick Investment Management, LLC

As a result of a step acquisition completed in 2005, PXP owns 100% of Kayne Anderson Rudnick Investment Management, LLC (“KAR”). In connection with the purchase, we issued promissory notes to the sellers in the amount of \$67.0 million to finance the remainder of the acquisition, of which \$9.8 million was paid on January 3, 2006. The remainder, plus deferred interest, was paid on January 2, 2007. The interest rate on the notes was 4.75%.

Lombard International Assurance S.A.

On January 11, 2005, we disposed of our interests in Lombard International Assurance S.A. (“Lombard”) for consideration of \$59.0 million. In the first quarter of 2007, 2006 and 2005, we realized after-tax gains of \$8.9 million, \$6.5 million and \$9.3 million, respectively, which included earn-out gain consideration received. We are not entitled to any additional consideration related to this sale going forward.

4. Business Segments

We have two reportable operating segments—Life and Annuity, and Asset Management. Businesses that are not sufficiently material to require separate disclosure as well as interest expense and indebtedness are included in Corporate and Other.

The Life and Annuity segment includes individual life insurance and annuity products including universal life, variable universal life, term life and fixed and variable annuities. It also includes the results of our Closed Block, which consists primarily of participating whole life products. We allocate capital to our Life and Annuity segment based on risk-based capital for our insurance products. We used 300% of risk-based capital levels for the three- and six-month periods ended June 30, 2008 and 2007. Capital within our life insurance companies that is unallocated is included in Corporate and Other operations.

Within Asset Management, we focus on two customer groups—retail investors and institutional clients. We provide investment management services to retail customers through open-end mutual funds, closed-end funds and managed accounts. Managed accounts include intermediary programs sponsored and distributed by non-affiliated broker-dealers, and direct managed accounts which are sold and administered by us. We also provide transfer agency, accounting and administrative services to our open-end mutual funds.

4. Business Segments (continued)

Through our institutional group, we provide investment management services primarily to corporations, multi-employer retirement funds and foundations, as well as to endowment and special purpose funds. In addition, we manage structured finance products, including collateralized debt obligations backed by portfolios of assets, for example, public high yield bonds, mortgage-backed and asset-backed securities or bank loans. See Note 11 to these financial statements for additional information.

Our investment management services are provided by wholly owned managers as well as unaffiliated managers through sub-advisory agreements. We provide managers with consolidated distribution and administrative support, thereby allowing each manager to focus on investment management. We monitor the quality of the managers' products by assessing their performance, style consistency and the discipline with which they apply their investment processes.

We allocate capital to our Asset Management segment on the basis of the historical capital within that segment. Excess investment income on debt and equity securities pledged as collateral represent investment advisory fees earned by our asset management subsidiary and are allocated to the Asset Management segment as investment management fees for segment reporting purposes only.

Corporate and Other includes corporate operations that are not allocated to business segments. Corporate operations consist primarily of:

- interest expense;
- wind-down businesses which include group pension, guaranteed investment contract business and international operations that do not meet the criteria to be separately disclosed; and
- investment income on debt and equity securities pledged as collateral, as well as interest expense on non-recourse collateralized obligations, both related to two consolidated collateralized obligation trusts we sponsor.

The accounting policies of the reportable operating segments are the same as those described in our Significant Accounting Policies in Note 2 to our financial statements in our 2007 Annual Report on Form 10-K. We allocate net investment income based on the assets allocated to the segments. We allocate certain costs and expenses to the segments based on a review of the nature of the costs, time studies and other methodologies.

In managing our business, we analyze segment performance on the basis of "operating income" which does not equate to "net income" as determined in accordance with GAAP. Rather, it is the measure of profit or loss used by the Company to evaluate performance, allocate resources and manage our operations.

Operating income is calculated by excluding realized investment gains (losses) and certain other items because we do not consider them to be related to the operating performance of our segments. The size and timing of realized investment gains and losses are often subject to our discretion. Certain other items are also excluded from operating income if, in our opinion, they are not indicative of overall operating trends. While some of these items may be significant components of net income in accordance with GAAP, we believe that operating income, and measures that are derived from or incorporate operating income, are appropriate measures that are useful to investors because they identify the earnings attributable to the ongoing operations of the business.

The criteria used to identify an item that will be excluded from operating income include: whether the item is infrequent and is material to the segment's income; or whether it results from a change in regulatory requirements, or relates to other unusual circumstances. Items excluded from operating income may vary from period to period. Because these items are excluded based on our discretion, inconsistencies in the application of our selection criteria may exist. Operating income is not a substitute for net income determined in accordance with GAAP and may be different from similarly titled measures of other companies. However, the Company believes that the presentation of operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of our business.

5. Demutualization and Closed Block

In 1999, we began the process of reorganizing and demutualizing our then principal operating company, Phoenix Home Life Mutual Insurance Company. We completed the process in June 2001, when all policyholder membership interests in this mutual company were extinguished and eligible policyholders of the mutual company received shares of common stock of The Phoenix Companies, Inc., together with cash and policy credits, as compensation. To protect the future dividends of these policyholders, we also established a closed block for their existing policies.

Because closed block liabilities exceed assets, we have a net closed block liability at each period-end. This net liability represents the maximum future earnings contribution to be recognized from the closed block and the change in this net liability each period is in the earnings contribution recognized from the closed block for the period. To the extent that actual cash flows differ from amounts anticipated, we may adjust policyholder dividends. If the closed block has excess funds, those funds will be available only to the closed block policyholders. However, if the closed block has insufficient funds to make policy benefit payments that are guaranteed, the payments will be made from assets outside of the closed block.

Closed Block Assets and Liabilities: (\$ in millions)	June 30, 2008	Dec 31, 2007	Inception (Dec 31, 1999)
Debt securities	\$ 6,671.0	\$ 6,919.4	\$ 4,773.1

Number of securities		1,730		1,464		3,194

Unrealized losses on below investment grade debt securities held outside the closed block with a fair value of less than 80% of the amortized cost of the securities totaled \$33.7 million at June 30, 2008 (\$10.2 million after offsets for taxes and deferred policy acquisition costs). However, none of this unrealized loss remained more than 20% below amortized cost for greater than 12 months.

Unrealized losses on below investment grade debt securities held in the closed block with a fair value of less than 80% of the securities amortized cost totaled \$27.2 million at June 30, 2008 (\$0.0 million after offsets for change in policy dividend obligation). However, none of this unrealized loss remained more than 20% below amortized cost for greater than 12 months.

The securities are considered to be temporarily impaired at June 30, 2008 as each of these securities has performed, and is expected to perform, in accordance with their original contractual terms, and we have the ability and intent to hold these securities until they recover their value.

8. Investing Activities (continued)

In determining that the securities are not other-than-temporarily impaired, we considered and evaluated the factors cited below. In making these evaluations, we must exercise considerable judgment. Accordingly, there can be no assurance that actual results will not differ from our judgments and that such differences may require the future recognition of other-than-temporary impairment charges that could have a material effect on our financial position and results of operations. In addition, the value of, and the realization of any loss on, a debt security or equity security is subject to numerous risks, including interest rate risk, market risk, credit risk and liquidity risk. The magnitude of any loss incurred by us may be affected by the relative concentration of our investments in any one issuer or industry. We have established specific policies limiting the concentration of our investments in any single issuer and industry and believe our investment portfolio is prudently diversified.

At the end of each reporting period, we review all securities for potential recognition of an other-than-temporary impairment. We maintain a watch list of securities in default, near default or otherwise considered by our investment professionals as being distressed, potentially distressed or requiring a heightened level of scrutiny. We also identify securities whose carrying value has been below amortized cost on a continuous basis for zero to six months, six months to 12 months and greater than 12 months. Using this analysis, coupled with our watch list, we review securities to determine if a security is other-than-temporarily impaired.

Our assessment of whether an investment in a debt or equity security is other-than-temporarily impaired includes whether the issuer has:

- defaulted on payment obligations;
- declared that it will default at a future point outside the current reporting period;
- announced that a restructuring will occur outside the current reporting period;
- severe liquidity problems that cannot be resolved;
- filed for bankruptcy;
- a financial condition which suggests that future payments are highly unlikely;
- deteriorating financial condition and quality of assets;
- sustained significant losses during the current year;
- announced adverse changes or events such as changes or planned changes in senior management, restructurings, or a sale of assets; and/or
- been affected by any other factors that indicate that the fair value of the investment may have been negatively impacted.

In determining whether collateralized securities are impaired, we obtain underlying mortgage data from the security's trustee and analyze it for performance trends. A security-specific stress analysis is performed using the most recent trustee information. This analysis forms the basis for our determination of whether the security will pay in accordance with the contractual cash flows.

If we determine that the security is impaired, we write it down to its then current fair value and record a realized loss in that period.

9. Financing Activities

Indebtedness

Indebtedness: (\$ in millions)

	June 30, 2008		December 31, 2007	
	Carrying Value	Fair Value	Carrying Value	Fair Value
7.15% surplus notes	\$ 174.0	\$ 179.1	\$ 174.0	\$ 179.6
6.675% senior unsecured bonds	—	—	153.7	153.7
7.45% senior unsecured bonds	300.0	195.2	300.0	243.1
Total indebtedness	\$ 474.0	\$ 374.3	\$ 627.7	\$ 576.4

Our 7.15% surplus notes are an obligation of Phoenix Life and are due December 15, 2034. The carrying value of the 2034 notes is net of \$1.0 million of unamortized original issue discount. Interest payments are at an annual rate of 7.15%, require the prior approval of the Superintendent of Insurance of the State of New York and may be made only out of surplus funds which the Superintendent determines to be available for such payments under New York Insurance Law. The notes may be redeemed at the option of Phoenix Life at any time at the “make-whole” redemption price set forth in the offering circular. New York Insurance Law provides that the notes are not part of the legal liabilities of Phoenix Life.

On April 2, 2008, the Company and its subsidiary, Phoenix Life, amended and restated our existing \$150 million unsecured senior revolving credit facility (the “Amended and Restated Facility”). The Amended and Restated Facility amends and restates the terms of the original facility dated November 22, 2004 (the “Original Facility”) and the terms of the amendment and restatement of the Original Facility dated June 6, 2006 (the “Amended Facility”).

The financing commitments under the Amended and Restated Facility will terminate on June 6, 2009. The Amended and Restated Facility reflects amendments that, in anticipation of the spin-off of the Company’s wholly-owned subsidiary, PXP, to the Company’s shareholders (the “Spin-off”), (i) release PXP from its obligations under the Amended Facility and provide that PXP is not a borrower under the Amended and Restated Facility effective as of April 2, 2008, and (ii) adjust a certain financial covenant of the borrowers upon the consummation of the Spin-off. The adjusted covenant is related to the minimum consolidated net worth required to be maintained following the Spin-off.

Potential borrowers on the credit line are The Phoenix Companies, Inc. and Phoenix Life. We unconditionally guarantee any loans under this facility to Phoenix Life. Base rate loans will bear interest at the greater of Wachovia Bank, National Association’s prime commercial rate or the federal funds rate plus 0.50%. Eurodollar rate loans will bear interest at LIBOR plus an applicable percentage based on our Standard & Poor’s and Moody’s ratings. There are no current borrowings on the credit facility.

9. Financing Activities (continued)

The credit facility contains covenants that require us at all times to maintain a minimum level of consolidated stockholders' equity, based on GAAP standards in effect on June 6, 2006 and a maximum consolidated debt-to-capital ratio of 30%. In addition, Phoenix Life must maintain a minimum risk-based capital ratio of 250% and a minimum A.M. Best financial strength rating of "A-".

We were in compliance with all of our credit facility covenants at June 30, 2008.

In December 2002, we issued 6,147,500 of 7.25% equity units in a public offering at \$25 per unit for gross proceeds of \$153.7 million (net proceeds of \$149.1 million). Each equity unit consisted of an unsecured, subordinated note and a purchase contract (equity forward on our common stock collateralized by the note). On November 7, 2005, the notes were remarketed as senior unsecured obligations and the interest rate was reset to 6.675% at that time. The holders of the purchase contracts have been paid a contract adjustment payment at a rate of 0.65% per year. The present value of the future contract adjustment payments of \$2.8 million was recorded as a charge to paid-in capital at inception. On February 16, 2006, these holders purchased 17,423,839 shares of our common stock in aggregate as part of the settlement of the original transaction. On February 19, 2008, the \$153.7 million of senior unsecured obligations matured and were paid in full.

Our senior unsecured bonds were issued in December 2001 for gross proceeds of \$300.0 million (net proceeds of \$290.6 million) and mature in January 2032. We pay interest at an annual rate of 7.45%. We may redeem any or all of the bonds from January 2007 at a redemption price equal to 100% of principal plus accrued and unpaid interest to the redemption date.

We have recorded indebtedness at unpaid principal balances of each instrument net of issue discount. We have determined the fair value of indebtedness based on contractual cash flows discounted at market rates for surplus notes and on quoted market prices for bonds and equity units. The Phoenix Companies, Inc. and its subsidiaries may, from time to time, purchase its bond securities in the open market subject to considerations including, but not limited to, market conditions, relative valuations, capital allocation and the continued determination that it is in the best interest of the company and its stakeholders.

Future minimum annual principal payments on indebtedness as of June 30, 2008 are: in 2032, \$300.0 million and in 2034, \$175.0 million.

Common stock dividends

On May 2, 2008, we declared a dividend of \$0.16 per share to shareholders of record on June 13, 2008. We paid that dividend on July 11, 2008. In the prior year, we declared a dividend of \$0.16 per share on April 26, 2007 to our shareholders of record on June 13, 2007; we paid that dividend on July 11, 2007.

The Phoenix Life Board of Directors declared dividends of \$30.0 million and \$25.0 million on July 9, 2008 and March 19, 2008, respectively, to the Company, Phoenix Life's sole shareholder. These dividends were paid in July 2008 and April 2008, respectively. During 2007, the Phoenix Life Board of Directors paid total dividends of \$30.0 million, \$30.0 million and \$32.2 million to the Company in April, July and November, respectively.

10. Separate Accounts, Death Benefits and Other Insurance Benefit Features

Separate account products are those for which a separate investment and liability account is maintained on behalf of the policyholder. Investment objectives for these separate accounts vary by fund account type, as outlined in the applicable fund prospectus or separate account plan of operations. Our separate account products include variable annuities and variable life insurance contracts. The assets supporting these contracts are carried at fair value and reported as Separate account assets with an equivalent amount reported as Separate account liabilities. Amounts assessed against the policyholder for mortality, administration, and other services are included within revenue in insurance, investment management and product fees. During the six-month periods ended June 30, 2008 and 2007, there were no gains or losses on transfers of assets from the general account to a separate account.

10. Separate Accounts, Death Benefits and Other Insurance Benefit Features (continued)

Many of our variable contracts offer various guaranteed minimum death, accumulation, withdrawal and income benefits. These benefits are offered in various forms as described in the footnotes to the table below. We currently reinsure a significant portion of the death benefit guarantees associated with our in-force block of business. We establish policy benefit liabilities for minimum death and income benefit guarantees relating to certain annuity policies as follows:

- Liabilities associated with the guaranteed minimum death benefit (“GMDB”) are determined by estimating the expected value of death benefits in excess of the projected account balance and recognizing the excess ratably over the accumulation period based on total expected assessments. The assumptions used for calculating the liabilities are generally consistent with those used for amortizing deferred policy acquisition costs.
- Liabilities associated with the guaranteed minimum income benefit (“GMIB”) are determined by estimating the expected value of the income benefits in excess of the projected account balance at the date of annuitization and recognizing the excess ratably over the accumulation period based on total expected assessments. The assumptions used for calculating such guaranteed income benefit liabilities are generally consistent with those used for amortizing deferred policy acquisition costs.

The GMDB and GMIB guarantees are recorded in policy liabilities and accruals on our balance sheet. Changes in the liability are recorded in policy benefits, excluding policyholder dividends, on our statement of operations. In a manner consistent with our policy for deferred policy acquisition costs, we regularly evaluate estimates used and adjust the additional liability balances, with a related charge or credit to benefit expense if actual experience or other evidence suggests that earlier assumptions should be revised.

We also offer certain variable products with a guaranteed minimum withdrawal benefit (“GMWB”), a guaranteed minimum accumulation benefit (“GMAB”) and a guaranteed pay-out annuity floor (“GPAF”).

The GMWB rider guarantees the policyholder a minimum amount of withdrawals and benefit payments over time, regardless of the investment performance of the contract, subject to an annual limit. Optional resets are available. In addition, we introduced a feature for these contracts, beginning in the fourth quarter of 2005, which allows the policyholder to receive the guaranteed annual withdrawal amount for as long as they are alive.

The GMAB rider provides the contractholder with a minimum accumulation of their purchase payments deposited within a specific time period, adjusted for withdrawals, after a specified amount of time determined at the time of issuance of the variable annuity contract.

The GPAF rider provides the policyholder with a minimum payment amount if the variable annuity payment falls below this amount on the payment calculation date.

The GMWB, GMAB and GPAF represent embedded derivatives in the variable annuity contracts that are required to be reported separately from the host variable annuity contract. They are carried at fair value and reported in policyholder deposit funds. The fair value of the GMWB, GMAB and GPAF obligation is calculated based on actuarial and capital market assumptions related to the projected cash flows, including benefits and related contract charges, over the lives of the contracts, incorporating expectations concerning policyholder behavior. As markets change, mature and evolve and actual policyholder behavior emerges, management continually evaluates the appropriateness of its assumptions.

As of June 30, 2008 and December 31, 2007, 100% of the aggregate account value with the GMWB, GMAB and GPAF features was not reinsured. In order to minimize the volatility associated with the unreinsured liabilities, we have established an alternative risk management strategy. We began hedging our GMAB exposure in 2006 and GMWB exposure during the fourth quarter of 2007 using equity options, equity futures and swaps. These investments are included in other investments on our balance sheet.

Embedded Derivative Liabilities: (\$ in millions)

	June 30, 2008	Dec 31, 2007
GMWB	\$ (0.1)	\$ (1.5)
GMAB	5.3	1.8
GPAF	1.9	1.7

10. Separate Accounts, Death Benefits and Other Insurance Benefit Features (continued)

For those guarantees of benefits that are payable in the event of death, the net amount at risk is generally defined as the current guaranteed minimum death benefit in excess of the current account balance at the balance sheet date. For guarantees of benefits that are payable upon annuitization, the net amount at risk is generally defined as the present value of the minimum guaranteed annuity payments available to the policy holder determined in accordance with the terms of the contract in excess of the current account balance. For guarantees of accumulation balances, the net amount at risk is generally defined as the guaranteed minimum accumulation balance minus the current account balance.

Additional Insurance Benefits:

(\$ in millions)

	Account Value	Net Amount At Risk After Reinsurance	Average Attained Age of Annuitant
GMDB return of premium	\$ 1,377.8	\$ 21.4	59
GMDB step up	1,867.9	118.5	60
GMDB earnings enhancement benefit (EEB)	68.7	0.1	60
GMDB greater of annual step up and roll up	36.3	6.2	63
Total GMDB at June 30, 2008	\$ 3,350.7	\$ 146.2	
GMIB	\$ 648.9		60
GMAB	430.3		55
GMWB	372.9		61
GPAF	28.8		74
Total at June 30, 2008	\$ 1,480.9		

With the return of premium, the death benefit is the greater of current account value or premiums paid (less any adjusted partial withdrawals).

With the step up, the death benefit is the greater of current account value, premiums paid (less any adjusted partial withdrawals) or the annual step up amount prior to the eldest original owner attaining a certain age. On and after the eldest original owner attains that age, the death benefit is the greater of current account value or the death benefit at the end of the contract year prior to the eldest original owner's attaining that age plus premium payments (less any adjusted partial withdrawals) made since that date.

With the EEB, the death benefit is the greater of the premiums paid (less any adjusted partial withdrawals) or the current account value plus the EEB. The EEB is an additional amount designed to reduce the impact of taxes associated with distributing contract gains upon death.

With the greater of annual step up and annual roll up, the death benefit is the greater of premium payments (less any adjusted partial withdrawals), the annual step up amount, the annual roll up amount or the current account value prior to the eldest original owner attaining age 81. On and after the eldest original owner attained age 81, the death benefit is the greater of current account value or the death benefit at the end of the contract year prior to the eldest original owner's attained age of 81 plus premium payments (less any adjusted partial withdrawals) made since that date.

Liabilities for universal life are generally determined by estimating the expected value of losses when death benefits exceed revenues and recognizing those benefits ratably over the accumulation period based on total expected assessments. The assumptions used in estimating these liabilities are consistent with those used for amortizing deferred policy acquisition costs. A single set of best estimate assumptions is used since these insurance benefits do not vary significantly with capital markets volatility. At June 30, 2008 and December 31, 2007, we held additional universal life benefit reserves of \$45.8 million and \$34.7 million, respectively.

11. Investments Pledged as Collateral and Non-recourse Collateralized Obligations

We are involved with various entities in the normal course of business that are deemed to be variable interest entities and, as a result, we may be deemed to hold interests in those entities. In particular, we serve as the investment advisor to seven collateralized obligation trusts. These seven collateralized obligation trusts are investment trusts with aggregate assets of \$1.4 billion that are primarily invested in a variety of fixed income securities acquired from third parties. These collateralized obligation trusts, in turn, issued tranching collateralized obligations and residual equity securities to third parties, as well as to our principal life insurance subsidiary's general account. The collateralized obligation trusts reside in bankruptcy remote special purpose entities for which we provide neither recourse nor guarantees. Accordingly, our sole financial exposure to these collateralized obligation trusts stems from our life insurance subsidiary's general account direct investment in certain debt or equity securities issued by these collateralized obligation trusts and our investment management fee revenues related to our asset management affiliates' advisory services. Our maximum exposure to loss with respect to our life insurance subsidiary's direct investment in the seven collateralized obligation trusts is \$9.5 million at June 30, 2008 (none of which relates to trusts that are consolidated). All of that exposure relates to investment grade debt securities.

We consolidated two collateralized obligation trusts as of June 30, 2008 and December 31, 2007. As of June 30, 2008, our direct investment in these two consolidated collateralized obligation trusts was zero. We recognized investment income on debt and equity securities pledged as collateral, net of interest expense on collateralized obligations and applicable minority interest of \$0.2 million and \$0.3 million for the six months ended June 30, 2008 and 2007, respectively, related to the consolidated collateralized obligation trusts.

Assets pledged as collateral are comprised of available-for-sale debt and equity securities at fair value of \$176.2 million and \$219.1 million at June 30, 2008 and December 31, 2007, respectively. In addition, cash and accrued investment income of \$5.7 million and \$13.4 million are included in these amounts at June 30, 2008 and December 31, 2007, respectively.

Fair Value and Cost of Debt and Equity Securities

Pledged as Collateral:

(\$ in millions)

	June 30, 2008		December 31, 2007	
	Fair Value	Cost	Fair Value	Cost
Debt securities pledged as collateral	\$ 176.2	\$ 165.4	\$ 219.1	\$ 219.3
Equity securities pledged as collateral	—	0.1	—	0.1
Total debt and equity securities pledged as collateral	\$ 176.2	\$ 165.5	\$ 219.1	\$ 219.4

Non-recourse collateralized obligations are comprised of callable collateralized obligations of \$248.7 million and \$307.2 million at June 30, 2008 and December 31, 2007, respectively, and non-recourse derivative cash flow hedge liabilities of \$7.6 million (notional amount of \$170.4 million with a maturity of June 2009) and \$10.7 million (notional amount of \$211.1 million with a maturity of June 1, 2009) at June 30, 2008 and December 31, 2007, respectively.

Gross and Net Unrealized Gains and Losses from Debt and Equity Securities Pledged as Collateral:

(\$ in millions)

	June 30, 2008		December 31, 2007	
	Gains	Losses	Gains	Losses
Debt securities pledged as collateral	\$ 18.2	\$ (7.4)	\$ 29.0	\$ (29.2)
Equity securities pledged as collateral	—	(0.1)	—	(0.1)
Total	\$ 18.2	\$ (7.5)	\$ 29.0	\$ (29.3)
Net unrealized gains (losses)	\$ 10.7			\$ (0.3)

Gross unrealized losses related to debt securities pledged as collateral whose fair value is less than the security's amortized cost total \$7.4 million at June 30, 2008. Debt securities with a fair value less than 80% of the security's amortized cost total \$5.7 million at June 30, 2008. The majority of these debt securities are investment grade issues that continue to perform to their original contractual terms at June 30, 2008.

We recognized a \$0.0 million and \$0.8 million charge to earnings in the quarters ended June 30, 2008 and 2007, respectively, related to the other-than-temporary impairment of debt securities pledged as collateral.

11. Investments Pledged as Collateral and Non-recourse Collateralized Obligations (continued)

The effect of the method of consolidation of the collateralized debt obligation trusts was to change our net income by \$0.6 million and \$(0.1) million for the six months ended June 30, 2008 and 2007, respectively, and to decrease our stockholders' equity by \$74.4 million and \$85.4 million as of June 30, 2008 and December 31, 2007, respectively. The impact to net income and stockholders' equity primarily relate to realized and unrealized investment and derivative cash flow gains and losses within the collateralized obligation trusts, which will ultimately be borne by third-party investors in the non-recourse collateralized obligations. Accordingly, these gains and losses and any future gains or losses under this method of consolidation will ultimately reverse upon the deconsolidation, maturity or other liquidation of the non-recourse collateralized obligations.

GAAP requires us to consolidate all the assets and liabilities of these collateralized obligation trusts, which results in the recognition of realized and unrealized losses even though we have no legal obligation to fund such losses in the settlement of the collateralized obligations.

The amount of derivative cash flow hedge ineffectiveness recognized on these collateralized obligation trusts for the six months ended June 30, 2008 and 2007 increased realized gains by \$0.6 million and \$0.3 million, respectively.

12. Fair Value

SFAS No. 157 ("SFAS 157") defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

SFAS 157 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels, from highest to lowest, are defined as follows:

- Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets. Level 1 securities include highly liquid government bonds, mortgage products, exchange-traded equities and exchange-traded corporate debt.
- Level 2 – inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Examples of such instruments include certain collateralized mortgage and debt obligations and certain high-yield debt securities.
- Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value measurement. Securities classified within Level 3 include broker quoted investments, certain residual interests in securitizations and other less liquid securities. Most valuations that are based on brokers' prices are classified as Level 3 due to a lack of transparency in the process they use to develop prices.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

12. Fair Value (continued)

The following table presents the financial instruments carried at fair value as of June 30, 2008, by SFAS 157 valuation hierarchy (as described above).

Assets and Liabilities at Fair Value:

(\$ in millions)

Assets

	As of June 30, 2008			
	Level 1	Level 2	Level 3	Total
Available-for-sale debt securities	\$ 236.7	\$ 9,866.0	\$ 1,239.9	\$ 11,342.6
Available-for-sale equity securities	164.8	—	24.3	189.1
Derivative assets	—	48.8	—	48.8
Separate account assets	10,481.1	93.6	1.9	10,576.6
Debt and equity securities pledged as collateral	—	169.5	6.7	176.2
Fair value option investments	70.9	42.2	—	113.1
Total assets	\$ 10,953.5	\$ 10,220.1	\$ 1,272.8	\$ 22,446.4

Liabilities

Embedded derivative liabilities	\$ —	\$ —	\$ 7.1	\$ 7.1
Total liabilities	\$ —	\$ —	\$ 7.1	\$ 7.1

Available-for-sale debt securities are reported net of \$51.3 million of investments included in other assets on our balance sheet because they are allocated to discontinued reinsurance operations. See Note 17 to these financial statements for further information.

Fair value option investments at June 30, 2008 include \$70.9 million of available-for-sale equity securities backing our deferred compensation liabilities. Prior to our adoption of SFAS 159, changes in the fair value of the securities were recorded in other comprehensive income while changes in the deferred compensation liability were recorded in earnings. Electing the fair value option allows us to mitigate the associated accounting volatility.

Fair value option investments also include a structured loan asset valued at \$42.2 million as of June 30, 2008. We elected to apply the fair value option to this note at the time of its acquisition. We purchased the note to obtain principal protection without sacrificing earnings potential. Election of the fair value option allows current earnings recognition and is more consistent with management's view of the security's underlying economics.

We have an established process for determining fair values. Fair value is based upon quoted market prices, where available. If listed prices or quotes are not available, fair value is based upon internally developed models that use primarily market-based or independently-sourced market parameters, including interest rate yield curves, option volatilities and currency rates. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments include amounts to reflect counterparty credit quality, our own creditworthiness, liquidity and unobservable parameters that are applied consistently over time. The majority of the valuations of Level 3 assets were obtained from independent third-party broker quotes.

Following is a description of our valuation methodologies for assets and liabilities measured at fair value. Such valuation methodologies were applied to all of the assets and liabilities carried at fair value, whether as a result of the adoption of SFAS 159 or previously carried at fair value.

Derivatives

Exchange-traded derivatives valued using quoted prices are classified within Level 1 of the valuation hierarchy. However, few classes of derivative contracts are listed on an exchange; therefore, the majority of our derivative positions are valued using internally developed models that use as their basis readily observable market parameters and are classified within Level 2 of the valuation hierarchy. Such derivatives include basic interest rate swaps, options and credit default swaps.

Fair values for over-the-counter ("OTC") derivative financial instruments, principally forwards, options and swaps, represent the present value of amounts estimated to be received from or paid to a marketplace participant in settlement of these instruments (i.e., the amount we would expect to receive in a derivative asset assignment or would expect to pay to have a derivative liability assumed). These derivatives are valued using pricing models based on the net present value of estimated future cash flows and directly observed prices from exchange-traded derivatives or other OTC trades, while taking into account the counterparty's credit ratings, or our own credit ratings, as appropriate. Determining the fair value for OTC derivative contracts can require a significant level of estimation and management judgment.

12. Fair Value (continued)

New and/or complex instruments may have immature or limited markets. As a result, the pricing models used for valuation often incorporate significant estimates and assumptions that market participants would use in pricing the instrument, which may impact the results of operations reported in the consolidated financial statements. For long-dated and illiquid contracts, extrapolation methods are applied to observed market data in order to estimate inputs and assumptions that are not directly observable. This enables us to mark-to-market all positions consistently when only a subset of prices are directly observable. Values for OTC derivatives are verified using observed information about the costs of hedging the risk and other trades in the market. As the markets for these products develop, we will continually refine our pricing models to correlate more closely to the market risk of these instruments.

Retained Interest in Securitization

Retained interests in securitizations do not trade in an active, open market with readily observable prices. Accordingly, we estimate the fair value of certain retained interests in securitizations using discounted cash flow (“DCF”) models.

For certain other retained interests in securitizations (such as interest-only strips), a single interest rate path DCF model is used and generally includes assumptions based upon projected finance charges related to the securitized assets, estimated net credit losses, prepayment assumptions and contractual interest paid to third-party investors. Changes in the assumptions used may have a significant impact on our valuation of retained interests and such interests are therefore typically classified within Level 3 of the valuation hierarchy.

We compare the fair value estimates and assumptions to observable market data where available and to recent market activity and actual portfolio experience.

Private equity investments

The valuation of nonpublic private equity investments requires significant management judgment due to the absence of quoted market prices, inherent lack of liquidity and the long-term nature of such assets. Private equity investments are valued initially based upon transaction price. The carrying values of private equity investments are adjusted either upwards or downwards from the transaction price to reflect expected exit values as evidenced by financing and sale transactions with third parties, or when determination of a valuation adjustment is confirmed through ongoing reviews by senior investment managers. A variety of factors are reviewed and monitored to assess positive and negative changes in valuation including, but not limited to, current operating performance and future expectations of the particular investment, industry valuations of comparable public companies, changes in market outlook and the third-party financing environment over time. In determining valuation adjustments resulting from the investment review process, emphasis is placed on current company performance and market conditions. Private equity investments are included in Level 3 of the valuation hierarchy.

Private equity investments may also include publicly held equity securities, generally obtained through the initial public offering of privately held equity investments. Such securities are marked-to-market at the quoted public value less adjustments for regulatory or contractual sales restrictions. Discounts for restrictions are quantified by analyzing the length of the restriction period and the volatility of the equity security. Publicly held securities within our private equity investments are primarily classified in Level 2 of the valuation hierarchy.

Beneficial interests issued by consolidated Variable Interest Entities (“VIEs”)

The fair value of beneficial interests issued by consolidated VIEs (beneficial interests) is estimated based upon the fair value of the underlying assets held by the VIEs. The valuation of beneficial interests does not include an adjustment to reflect our credit quality as the holders of these beneficial interests do not have recourse to our general credit. As the inputs into the valuation are generally based upon readily observable pricing information, the majority of beneficial interests used by consolidated VIEs are classified within Level 2 of the valuation hierarchy.

Separate Accounts

Separate account assets are primarily invested in mutual funds but also have investments in fixed maturity and equity securities. The separate account investments are valued in the same manner, and using the same pricing sources and inputs, as the fixed maturity, equity security and short-term investments of the Company. Mutual funds are included in Level 1. Most debt securities and short-term investments are included in Level 2.

12. Fair Value (continued)

Valuation of Embedded Derivatives

Embedded derivatives are guarantees that we make on certain variable annuity contracts, including GMAB and GMWB. These embedded derivatives are fair valued using a risk neutral stochastic valuation methodology. The inputs to our fair value methodology include information derived from the asset derivatives market, including the volatility surface and the swap curve. Several additional inputs are not obtained from independent sources, but instead reflect our own assumptions about what market participants would use in pricing the contracts. These inputs are therefore considered “unobservable” and fall into Level 3 of the fair value hierarchy. These inputs include mortality rates, lapse rates and policyholder behavior assumptions. Because there are significant Level 3 inputs included in our fair value methodology for these embedded derivative liabilities, we consider the above-described methodology as a whole to be Level 3.

Level 3 Financial Assets and Liabilities

The following table sets forth a summary of changes in the fair value of our Level 3 financial assets and liabilities. As required by SFAS 157, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. For example, a hypothetical derivative contract with Level 1, Level 2 and significant Level 3 inputs would be classified as a Level 3 financial instrument in its entirety. Subsequently, even if only Level 1 and Level 2 inputs are adjusted, the resulting gain or loss is classified as Level 3. Further, Level 3 instruments are frequently hedged with instruments that are classified as Level 1 or Level 2 and, accordingly, gains or losses reported as Level 3 in the table below may be offset by gains or losses attributable to instruments classified in Level 1 or 2 of the fair value hierarchy.

Level 3 Financial Assets and Liabilities:

(\$ in millions)

	Three Months Ended June 30, 2008		Six Months Ended June 30, 2008	
	Assets	Liabilities	Assets	Liabilities
Balance, beginning of period	\$ 1,268.2	\$ (12.0)	\$ 1,518.9	\$ (0.3)
Purchases/(sales), net	(27.7)	—	(120.5)	—
Net transfers	55.0	—	(20.3)	—
Realized gains (losses)	(19.3)	4.9	(45.2)	(6.8)
Unrealized gains (losses) included in other comprehensive income (loss)	(3.9)	—	(60.7)	—
Amortization/accretion	0.5	—	0.6	—
Balance, end of period	\$ 1,272.8	\$ (7.1)	\$ 1,272.8	\$ (7.1)
Portion of gain (loss) included in net income relating to those assets/liabilities still held	\$ (25.2)	\$ 4.9	\$ (56.5)	\$ (6.8)

13. Income Taxes

For the three and six months ended June 30, 2008 and 2007, the effective income tax rates applicable to income from continuing operations differ from the 35.0% U.S. federal statutory tax rate. Items giving rise to the differences and the effects are as follows:

Analysis of Effective Income Tax Rates:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Income taxes at statutory rate	35.0%	35.0%	35.0%	35.0%
Dividends received deduction	(3.4%)	(1.4%)	(2.4%)	(1.5%)
Low income housing tax credit	(3.3%)	(2.1%)	(2.4%)	(2.3%)
State income taxes, net of federal tax	14.6%	0.9%	(4.5%)	0.5%
Realized gains (losses) on available securities pledged as collateral	(3.0%)	0.1%	3.1%	—%
Release of foreign tax credit valuation allowance	—%	(17.9%)	—%	(5.7%)
Recognition of foreign tax credit benefit	—%	(9.8%)	—%	(3.1%)
Adjustments to tax accruals	(27.4%)	—%	12.1%	—%
Adjustments to deferred tax on reserves	—%	—%	4.8%	—%
Other, net	(1.1%)	(1.3%)	3.1%	(1.9%)
Effective income taxes rates applicable to continuing operations	11.4%	3.5%	48.8%	21.0%

Our effective income tax expense rate of 11.4% and 48.8% for the three and six months ended June 30, 2008 varies from the expected annual effective tax rate applied to ordinary income of 27.7% and 24.6%, respectively, primarily due to tax accrual adjustments and deferred tax adjustments relating to reserves. The estimated annual effective income tax rate applied to ordinary income for the three and six months ended June 30, 2007 was 22.0% and 28.1%, respectively. Throughout the year, we will re-evaluate our estimated annual effective income tax rate and make adjustments as necessary.

Our federal income tax returns are routinely audited by the IRS and estimated provisions are routinely provided in the financial statements in anticipation of the results of these audits. Unfavorable resolution of any particular issue could result in additional use of cash to pay liabilities that would be deemed owed to the IRS. Additionally, any unfavorable or favorable resolution of any particular issue could result in an increase or decrease, respectively, to our effective income tax rate to the extent that our estimates differ from the ultimate resolution. As of June 30, 2008, we had current taxes receivable of \$4.4 million.

See Note 2 to these financial statements for information regarding the implementation of FIN 48.

14. Employee Benefits

Pension and other postretirement benefits

We provide our employees with postemployment benefits that include retirement benefits, through pension and savings plans, and other benefits, including health care and life insurance. The components of pension and postretirement benefit costs follow:

Components of Pension Benefit Costs: (\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Service cost	\$ 1.7	\$ 3.8	\$ 4.0	\$ 7.3
Interest cost	9.8	9.6	19.5	18.8
Expected return on plan assets	(10.3)	(9.9)	(20.6)	(19.9)
Net loss amortization	1.9	2.2	3.5	3.5
Prior service cost amortization	(0.1)	0.3	0.1	0.5
Pension benefit cost	\$ 3.0	\$ 6.0	\$ 6.5	\$ 10.2

14. Employee Benefits (continued)

Components of Other Postretirement Benefit Costs: (\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Service cost	\$ 0.4	\$ 0.4	\$ 0.8	\$ 0.8
Interest cost	1.0	0.8	2.0	1.9
Prior service cost amortization	—	(0.4)	—	(0.8)
Net gain amortization	(0.4)	(0.1)	(0.8)	(0.1)
Other postretirement benefit cost	\$ 1.0	\$ 0.7	\$ 2.0	\$ 1.8

Savings plans

During the three months ended June 30, 2008 and 2007, we incurred costs of \$1.9 million and \$1.2 million, respectively, for contributions to our employer-sponsored savings plans. During the six months ended June 30, 2008 and 2007, we incurred costs of \$4.6 million and \$3.0 million, respectively, for contributions to our employer-sponsored savings plans.

15. Share-based compensation

On January 1, 2006, the Company adopted SFAS 123(R) using the modified prospective method.

We provide share-based compensation to certain of our employees and non-employee directors, as further described below. The compensation cost that has been charged against income for these plans is summarized in the following table:

Share-Based Compensation Plans: (\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Compensation cost charged to income	\$ 2.2	\$ 3.3	\$ 5.9	\$ 5.9
Income tax benefit	\$ 0.8	\$ 1.2	\$ 2.1	\$ 1.8

We did not capitalize any cost of stock-based compensation during the three- and six-month periods ended June 30, 2008 and 2007.

Stock options

We have stock option plans under which we grant options for a fixed number of common shares to employees and non-employee directors. Our options have an exercise price equal to the market value of the shares at the date of grant. Each option, once vested, entitles the holder to purchase one share of our common stock. The employees' options generally vest over a three-year period while the directors' options vest immediately. The fair values of options granted are measured as of the grant date and expensed ratably over the vesting period.

Stock Option Activity at Weighted-Average Exercise Price:

	Three Months Ended June 30,			
	2008		2007	
	Common Shares	Price	Common Shares	Price
Outstanding, beginning of period	5,152,115	\$ 13.80	4,886,447	\$ 14.88
Granted	10,000	10.45	2,500	14.00
Exercised	(9,343)	10.78	(50,443)	11.60
Forfeited	(34,037)	12.53	(167,115)	15.93
Expired/unexercised	(45,498)	15.83	(13,700)	16.20
Outstanding, end of period	5,073,237	\$ 13.79	4,657,689	\$ 14.87

15. Share-based compensation (continued)

Stock Option Activity at Weighted-Average Exercise Price:

	Six Months Ended June 30,			
	2008		2007	
	Common Shares	Price	Common Shares	Price
Outstanding, beginning of period	4,087,486	\$ 14.79	4,522,618	\$ 14.85
Granted	1,423,832	11.37	481,500	14.10
Exercised	(16,567)	10.53	(139,776)	10.19
Forfeited	(64,474)	13.01	(192,953)	15.74
Expired/unexercised	(357,040)	15.97	(13,700)	16.20
Outstanding, end of period	5,073,237	\$ 13.79	4,657,689	\$ 14.87

Options granted during the three and six months ended June 30, 2008 had a weighted-average fair value of \$4.96 and \$4.47, respectively.

The intrinsic value of stock options exercised during the three and six months ended June 30, 2008 was less than \$0.1 million.

As of June 30, 2008, 3.2 million of outstanding stock options were exercisable, with a weighted-average exercise price of \$14.79.

As of June 30, 2008, there was \$6.8 million of total unrecognized compensation cost related to unvested stock option grants.

Restricted stock units

We have restricted stock unit ("RSU") plans under which we grant RSUs to employees and non-employee directors. Each RSU, once vested, entitles the holder to one share of our common stock when the restriction expires. We recognize compensation expense over the vesting period of the RSUs.

RSU Activity at Weighted-Average Grant Price:

	Three Months Ended June 30,			
	2008		2007	
	RSUs	Price	RSUs	Price
Outstanding, beginning of period	2,245,173	\$ 11.73	1,744,347	\$ 11.35
Awarded	34,406	12.24	25,650	14.25
Converted to common shares/applied to taxes	(719)	12.72	—	—
Canceled	(22,690)	13.72	(3,742)	14.47
Outstanding, end of period	2,256,170	\$ 11.72	1,766,255	\$ 11.39

RSU Activity at Weighted-Average Grant Price:

	Six Months Ended June 30,			
	2008		2007	
	RSUs	Price	RSUs	Price
Outstanding, beginning of period	1,664,021	\$ 11.86	1,432,454	\$ 10.73
Awarded	784,218	11.99	832,653	13.38
Converted to common shares/applied to taxes	(99,323)	13.80	(483,504)	12.77
Canceled	(92,746)	14.32	(15,348)	14.57
Outstanding, end of period	2,256,170	\$ 11.72	1,766,255	\$ 11.39

The intrinsic value of RSUs converted during the three months ended June 30, 2008 was less than \$0.1 million. The intrinsic value of RSUs converted during the six months ended June 30, 2008 was \$1.2 million.

As of June 30, 2008, there was \$10.2 million of total unrecognized compensation cost related to unvested RSU grants.

In addition to the RSU activity above, 2.6 million RSUs are subject to future issuance based on the achievement of performance criteria established under certain of our incentive plans. The performance contingencies for these RSUs will be resolved no later than December 31, 2010.

17. Contingent Liabilities

Litigation and Arbitration

We are regularly involved in litigation and arbitration, both as a defendant and as a plaintiff. The litigation and arbitration naming us as a defendant ordinarily involves our activities as an insurer, employer, investor, investment advisor or taxpayer. It is not feasible to predict or determine the ultimate outcome of all legal or arbitration proceedings or to provide reasonable ranges of potential losses. We believe that the outcomes of our litigation and arbitration matters are not likely, either individually or in the aggregate, to have a material adverse effect on our consolidated financial condition. However, given the large or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation and arbitration, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on our results of operations or cash flows in particular quarterly or annual periods.

On May 20, 2008, SCM Advisors, LLC (“SCM”), an indirect wholly-owned subsidiary of the Company, was named a respondent in an arbitration commenced with the American Arbitration Association by former institutional clients, Forethought Investment Management, Inc., Forethought Life Insurance Company, Forethought Life Assurance Company and Forethought Financial Group, Inc., for alleged losses sustained while SCM was providing investment advisory services. The investment losses are primarily related to investments in collateralized debt obligations. The Company believes that the claims lack merit and SCM intends to defend this matter vigorously.

Regulatory Matters

State regulatory bodies, the Securities and Exchange Commission (“SEC”), the Financial Industry Regulatory Authority (“FINRA”) and other regulatory bodies regularly make inquiries of us and, from time to time, conduct examinations or investigations concerning our compliance with, among other things, insurance laws, securities laws, and laws governing the activities of broker-dealers. We endeavor to respond to such inquiries in an appropriate way and to take corrective action if warranted.

For example, in October 2007, the New York State Insurance Department commenced the on-site portion of its routine quinquennial financial and market conduct exam of Phoenix Life and its New York domiciled life insurance subsidiary for the five year period ending December 31, 2007.

17. Contingent Liabilities (continued)

In addition, federal and state regulatory authorities from time to time make inquiries and conduct examinations regarding compliance by Phoenix Life and its subsidiaries with securities and other laws and regulations affecting their registered products. We endeavor to respond to such inquiries in an appropriate way and to take corrective action if warranted. There has been a significant increase in federal and state regulatory activity relating to financial services companies, with a number of recent regulatory inquiries focusing on late-trading, market timing and valuation issues. Our products entitle us to impose restrictions on transfers between separate account sub-accounts associated with our variable products.

In 2005, the Boston District Office of the SEC completed a compliance examination of certain of the Company's affiliates that are registered under the Investment Company Act of 1940 or the Investment Advisers Act of 1940. Following the examination, the staff of the Boston District Office issued a deficiency letter primarily focused on perceived weaknesses in procedures for monitoring trading to prevent market timing activity. The staff requested the Company to conduct an analysis as to whether shareholders, policyholders and contractholders who invested in the funds that may have been affected by undetected market timing activity had suffered harm and to advise the staff whether the Company believes reimbursement is necessary or appropriate under the circumstances. A third party was retained to assist the Company in preparing the analysis. Based on this analysis, the Company advised the SEC that it does not believe that reimbursement is appropriate.

Over the past several years, a number of companies have announced settlements of enforcement actions with various regulatory agencies, primarily the SEC and the New York Attorney General's Office. While no such action has been initiated against us, it is possible that one or more regulatory agencies may pursue this type of action against us in the future.

Financial services companies have also been the subject of broad industry inquiries by state regulators and attorneys general which do not appear to be company-specific. In May 2005, we received a subpoena from the Connecticut Attorney General's office and an inquiry from the Connecticut Insurance Department requesting information regarding finite reinsurance. We cooperated fully and have had no further inquiry since responding.

These types of regulatory actions may be difficult to assess or quantify, may seek recovery of indeterminate amounts, including punitive and treble damages, and the nature and magnitude of their outcomes may remain unknown for substantial periods of time. While it is not feasible to predict or determine the ultimate outcome of all pending inquiries, investigations, legal proceedings and other regulatory actions, or to provide reasonable ranges of potential losses, we believe that their outcomes are not likely, either individually or in the aggregate, to have a material adverse effect on our consolidated financial condition. However, given the large or indeterminate amounts sought in certain of these actions and the inherent unpredictability of regulatory matters, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on our results of operation or cash flows in particular quarterly or annual periods.

Discontinued Reinsurance Operations

In 1999, we discontinued our reinsurance operations through a combination of sale, reinsurance and placement of certain retained group accident and health reinsurance business into run-off. We adopted a formal plan to stop writing new contracts covering these risks and to end the existing contracts as soon as those contracts would permit. However, we remain liable for claims under contracts which have not been commuted.

For example, we participate in a workers' compensation reinsurance pool formerly managed by Unicover Managers, Inc. ("Unicover"). The pool ceased accepting new risks in early 1999. Further, we were a retrocessionaire (meaning a reinsurer of other reinsurers) of the Unicover pool. We have been involved in disputes relating to the activities of Unicover. These disputes have been substantially resolved or settled.

Our discontinued group accident and health reinsurance operations also include other (non-Unicover) workers' compensation reinsurance contracts and personal accident reinsurance contracts, including contracts assumed in the London market. We are engaged in arbitrations, disputes or investigations with several ceding companies over the validity of, or amount of liabilities assumed under, their contracts. These arbitrations, disputes and investigations are in various stages.

We bought retrocessional reinsurance for a significant portion of our assumed reinsurance liabilities. Some of the retrocessionaires have disputed the validity of, or amount of liabilities assumed under, their contracts with us. Most of these disputes with retrocessionaires have been resolved or settled. The remaining arbitrations and disputes are at various stages.

17. Contingent Liabilities (continued)

We have established reserves for claims and related expenses that we expect to pay on our discontinued group accident and health reinsurance business. These reserves are based on currently known facts and estimates about, among other things, the amount of insured losses and expenses that we believe we will pay, the period over which they will be paid, the amount of reinsurance we believe we will collect from our retrocessionaires and the likely legal and administrative costs of winding down the business.

We expect our reserves and reinsurance to cover the run-off of the business; however, unfavorable or favorable claims and/or reinsurance recovery experience is reasonably possible and could result in our recognition of additional losses or gains, respectively, in future years. Given the uncertainty associated with litigation and other dispute resolution proceedings, as well as the lack of sufficient claims information, the range of any reasonably possible additional future losses or gains is not currently estimable. However, it is our opinion, based on current information and after consideration of the provisions made in these financial statements, that any future adverse or favorable development of recorded reserves and/or reinsurance recoverables will not have a material adverse effect on our consolidated financial position. Nevertheless, it is possible that future developments could have a material adverse effect on our consolidated results of operations or cash flows in particular quarterly or annual periods.

18. Accounting Adjustments

During 2008, we identified an item related to the collateralized debt obligations that we consolidate under FIN 46(R) that required adjustment. We recorded a correction to the valuation of debt and equity securities pledged as collateral which increased the unrealized gain by \$21.8 million for the year-to-date period. We evaluated the financial impact of this accounting adjustment and concluded that it was not material to current or prior periods. See Note 8 to these financial statements for additional information on unrealized investment gains and losses.

During the first quarter of 2007, we identified certain items that required adjustment. The adjustments relate primarily to two areas:

- Overaccrual of interest expense. Between 2002 and 2006, interest was accrued on a note payable for more than was owed. The effect was immaterial in any one period and accumulated over several years to an overaccrual of approximately \$1.4 million after-tax.
- Under reporting of realized investment gains. We did not reflect approximately \$2.7 million of after-tax realized investment gains associated primarily with the sale of a subsidiary in 1999. Instead, these gains were recognized as unrealized gains and included in accumulated other comprehensive income.

Management has evaluated the financial impact of the previously mentioned accounting adjustments and concluded that the effect both individually and in the aggregate was not material to the current year or any prior period. Accordingly, prior period financial statements have not been restated. Instead, to reflect these adjustments, we have recorded a cumulative increase to net income in the three months ended March 31, 2007 of \$4.1 million after-tax. Of this increase, \$2.7 million was related to net realized investment gains and \$1.4 million was related to interest expense on indebtedness.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

The discussion in this Form 10-Q may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. We intend for these forward-looking statements to be covered by the safe harbor provisions of the federal securities laws relating to forward-looking statements. These include statements relating to trends in, or representing management's beliefs about our future strategies, operations and financial results, as well as other statements including, but not limited to, words such as "anticipate," "believe," "plan," "estimate," "expect," "intend," "may," "should" and other similar expressions. Forward-looking statements are made based upon management's current expectations and beliefs concerning trends and future developments and their potential effects on us. They are not guarantees of future performance. Actual results may differ materially from those suggested by forward-looking statements as a result of risks and uncertainties which include, among others: (i) changes in general market and business conditions, interest rates and the debt and equity markets; (ii) the possibility that mortality rates, persistency rates or funding levels may differ significantly from our pricing expectations; (iii) the availability, pricing and terms of reinsurance coverage generally and the inability or unwillingness of our reinsurers to meet their obligations to us specifically; (iv) our dependence on non-affiliated distributors for our product sales, (v) downgrades in our debt or financial strength ratings; (vi) our dependence on third parties to maintain critical business and administrative functions; (vii) the ability of independent trustees of our mutual funds and closed-end funds, intermediary program sponsors, managed account clients and institutional asset management clients to terminate their relationships with us; (viii) our ability to attract and retain key personnel in a competitive environment; (ix) the poor relative investment performance of some of our asset management strategies and the resulting outflows in our assets under management; (x) the possibility that the goodwill or intangible assets associated with our asset management business could become impaired, requiring a charge to earnings; (xi) the strong competition we face in our business from mutual fund companies, banks, asset management firms and other insurance companies; (xii) our reliance, as a holding company, on dividends and other payments from our subsidiaries to meet our financial obligations and pay future dividends, particularly since our insurance subsidiaries' ability to pay dividends is subject to regulatory restrictions; (xiii) the potential need to fund deficiencies in our closed block; (xiv) tax developments that may affect us directly, or indirectly through the cost of, the demand for or profitability of our products or services; (xv) other legislative or regulatory developments; (xvi) legal or regulatory actions; (xvii) changes in accounting standards; (xviii) the potential effects of the spin-off of PXP on our expense levels, liquidity and third-party relationships; and (xix) other risks and uncertainties described herein or in any of our filings with the SEC. We undertake no obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section reviews our consolidated financial condition as of June 30, 2008 as compared to December 31, 2007; our consolidated results of operations for the three and six months ended June 30, 2008 and 2007; and, where appropriate, factors that may affect our future financial performance. This discussion should be read in conjunction with the unaudited interim financial statements and notes contained in this filing as well as in conjunction with our consolidated financial statements for the year ended December 31, 2007 in our 2007 Annual Report on Form 10-K.

Business Overview and Earnings Drivers

For an overview of our current business and an explanation of the key drivers of our revenues, expenses and overall profitability, please see the "Overview" discussion in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2007 Annual Report on Form 10-K.

Recent Developments

Spin-Off of Asset Management Business

On February 7, 2008, we announced our intention to spin off our asset management subsidiary, Phoenix Investment Partners, Ltd. ("PXP"), by way of a dividend of PXP's stock to the Company's shareholders. The spin-off and related transactions are expected to be completed in the third quarter of 2008. At this point, decisions regarding the capital structure, expense and overhead support structure and other matters are under review and consideration.

Upon completion of the spin-off, our shareholders will have separate, publicly-traded ownership interests in the Company and PXP. PXP will consist of the Company's entire asset management business, with the exception of Goodwin Capital Advisors, Inc., which will remain with the Company and continue to manage the Company's general account assets, as well as third-party assets. The Company and PXP will be independent of each other and have separate boards of directors and management. To facilitate PXP's separation from the Company, each company will continue certain existing arrangements during a transition period following completion of the spin-off.

Recent Acquisitions and Dispositions

See our 2007 Annual Report on Form 10-K for a discussion of our recent acquisitions and dispositions.

Impact of New Accounting Standards

For a discussion of accounting standards, see Note 2 to our consolidated financial statements in this Form 10-Q.

Critical Accounting Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Critical accounting estimates are reflective of significant judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

As further described below, during 2008 we changed our method of accounting for reinsurance and for calculating deferred policy acquisition cost amortization. See our 2007 Annual Report on Form 10-K for a discussion of additional critical accounting estimates.

Accounting Change

Effective April 1, 2008, we changed our method of accounting for the cost of certain of our long duration reinsurance contracts accounted for in accordance with SFAS No. 113, *Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts* ("SFAS 113"). In conjunction with this change, we also changed our method of accounting for the impact of reinsurance costs on deferred acquisition costs. SFAS 113 requires us to amortize the estimated cost of reinsurance over the life of the underlying reinsured contracts. Under our previous method, we recognized reinsurance recoveries as part of the net cost of reinsurance and amortized this balance over the estimated lives of the underlying reinsured contracts in proportion to estimated gross profits ("EGPs") consistent with the method used for amortizing deferred policy acquisition costs. Under the new method, reinsurance recoveries are recognized in the same period as the related reinsured claim. In conjunction with this change, we also changed our policy for determining EGPs relating to these contracts to include the effects of reinsurance, where previously these effects had not been included.

We adopted the new method because we believe that it better reflects the economics of the underlying reinsurance activity by better matching the reinsurance recovery with the insured loss that gave rise to that recovery. We also believe that the new method is consistent with management's intent in purchasing reinsurance, which is to protect the Company against large and unexpected claims. Following is a description of our accounting for deferred policy acquisition costs, which has been updated from our 2007 Annual Report on Form 10-K to reflect a change in our method of accounting for the effects of reinsurance.

Deferred Policy Acquisition Costs and Present Value of Future Profits

We amortize deferred policy acquisition costs and present value of future profits based on the related policy's classification. For individual participating life insurance policies, deferred policy acquisition costs and present value of future profits are amortized in proportion to estimated gross margins. For universal life, variable universal life and accumulation annuities, deferred policy acquisition costs and present value of future profits are amortized in proportion to estimated gross profits ("EGPs"). Policies may be surrendered for value or exchanged for a different one of our products (internal replacement). The deferred policy acquisition costs balance associated with the replaced or surrendered policies is amortized to reflect these surrenders.

Each year, we develop future EGPs for the products sold during that year. The EGPs for products sold in a particular year are aggregated into cohorts. Future EGPs are projected for the estimated lives of the contracts. The amortization of deferred policy acquisition costs and present value of future profits requires the use of various assumptions, estimates and judgments about the future. The assumptions, in the aggregate, are considered important in the projections of EGPs. The assumptions developed as part of our annual process are based on our current best estimates of future events, which are likely to be different for each year's cohort. Assumptions considered to be significant in the development of EGPs include separate account fund performance, surrender and lapse rates, interest margin, mortality, premium persistency, funding patterns, expenses and reinsurance costs and recoveries. These assumptions are reviewed on a regular basis and are based on our past experience, industry studies, regulatory requirements and estimates about the future.

To determine the reasonableness of the prior assumptions used and their impact on previously projected account values and the related EGPs, we evaluate, on a quarterly basis, our previously projected EGPs. Our process to assess the reasonableness of our EGPs involves the use of internally developed models, together with studies and actual experience. Incorporated in each scenario are our current best estimate assumptions with respect to separate account returns, surrender and lapse rates, interest margin, mortality, premium persistency, funding patterns, expenses and reinsurance costs and recoveries.

Underlying assumptions for future periods of EGPs are not altered unless experience deviates significantly from original assumptions. For example, when lapses of our insurance products meaningfully exceed levels assumed in determining the amortization of deferred policy acquisition costs, we adjust amortization to reflect the change in future premiums or EGPs resulting from the unexpected lapses. In the event that we were to revise assumptions used for prior year cohorts, our estimate of projected account values would change and the related EGPs in the deferred policy acquisition cost amortization model would be adjusted to reflect such change. This process is known as "unlocking". Continued favorable experience on key assumptions, which could include increasing separate account fund return performance, decreasing lapses or decreasing mortality could result in an unlocking which would result in a decrease to deferred policy acquisition cost amortization and an increase in the deferred policy acquisition costs asset. Finally, an analysis is performed periodically to assess whether there are sufficient gross margins or gross profits to amortize the remaining deferred policy acquisition costs balances.

The separate account fund performance assumption is critical to the development of the EGPs related to our variable annuity and variable life insurance businesses. As equity markets do not move in a systematic manner, we use a mean reversion method (reversion to the mean assumption), a common industry practice, to determine the future equity market growth rate assumption used for the amortization of deferred policy acquisition costs. This practice assumes that the expectation for long-term appreciation is not changed by minor short-term market fluctuations. The average long-term rate of assumed separate account fund performance used in estimating gross profits was 6.0% (after fund fees and mortality and expense charges) for the variable annuity business and 6.9% (after fund fees and mortality and expense charges) for the variable life business at both December 31, 2007 and 2006.

We perform analysis with respect to the sensitivity of a change in the separate account performance assumption as it is critical to the development of the EGPs related to our variable annuity and variable life insurance business. Equity market movements have a significant impact on the account value of variable life and annuity products and the fees earned on these. EGPs could increase or decrease with these movements in the equity market. Sustained and significant changes in the equity markets could therefore have an impact on deferred policy acquisition cost amortization. Periodically, we also perform analysis with respect to the sensitivity of a change in assumed mortality as it is critical to the development of the EGPs related to our universal life insurance business.

As part of our analysis of separate account returns, we perform two sensitivity tests. If at December 31, 2007 we had used a 100 basis points lower separate account return assumption (after fund fees and mortality and expense charges) for both the variable annuity and the variable life businesses and used our current best estimate assumptions for all other assumptions to project account values forward from the current value to reproject EGPs, the estimated increase to amortization and decrease to net income would be approximately \$2.3 million, after-tax.

If, instead, at December 31, 2007 we had used a 100 basis points higher separate account return assumption (after fund fees and mortality and expense charges) for both the variable annuity and variable life businesses and used our current best estimate assumptions for all other assumptions to project account values forward from the current value to reproject EGPs, the estimated decrease to amortization and increase to net income would be approximately \$2.2 million, after-tax.

These revisions are not currently required or anticipated.

Consolidated Results of Operations

Executive Overview and Outlook

Analysis of Consolidated Results of Operations and Outlook

Our 2008 second quarter and year-to-date results reflect challenges in the financial markets as well as the expenses related to our planned spin-off transaction and resolution of a proxy contest. Volatile conditions in the financial markets have resulted in lower asset-based fee revenues, increased deferred policy acquisition cost amortization and higher net realized investment losses. Consolidated net results decreased in the 2008 quarter period to net income of \$6.2 million, or \$0.05 per share, compared with net income of \$30.9 million in the prior year quarter. For the year-to-date period, results decreased to a net loss of \$8.2 million, compared with income of \$79.6 million in the prior year period.

Pre-tax net income in our Life and Annuity segment was \$29.3 million for the quarter, and \$37.8 million for the year-to-date period, both down from the comparable prior year periods. Our results for both years incorporate the effect of an accounting change which is more fully discussed in Note 2 to our financial statements in this Form 10-Q. This result reflects higher amortization of deferred policy acquisition costs and lower net investment income and interest margins, partially offset by lower operating expenses and higher mortality margins.

Total policy acquisition cost amortization in our Life and Annuity segment increased \$15.4 million and \$19.7 million in the three and six months, respectively, ended June 30, 2008, compared with the same periods in 2007. The increase in amortization was caused by growth in the universal life business, the impact of market declines on annuity and variable universal life, and higher surrenders. Net investment income on surplus and assets supporting the open block traditional life products decreased in the quarter and year-to-date periods by \$8.6 million and \$21.2 million, respectively, reflecting lower investment yields and lower asset levels in 2008. Also, while there were increases during the three- and six-month periods in income earned on the assets supporting universal life reserves, these represented lower yields and were more than offset by increases in interest credited on the related policyholder fund balances. Consequently, interest margin on universal life products decreased \$2.2 million and \$4.3 million in the three and six months ended June 30, 2008 relative to the prior year periods. We also had lower interest margins on our annuity portfolio, mainly driven by the run-off of discontinued products. Non-deferred expenses decreased during the 2008 quarter and year-to-date periods by \$9.2 million and \$5.9 million, respectively, driven by the Company's Operational Excellence initiative and lower incentive compensation accruals. Mortality margins in universal life and variable universal life increased \$11.3 million and \$20.0 million in the three- and six-month periods of 2008, reflecting increases in cost of insurance fee revenues that were only partially offset by higher net benefits. After-tax net realized losses, discussed below, further decreased Life and Annuity income by \$1.4 million and \$14.5 million for the three- and six-month periods in 2008 relative to the prior year.

Net results in our Asset Management segment decreased in the three- and six-month periods in 2008 to net losses of \$2.1 million and \$11.4 million, respectively. These losses compared to net income of \$1.5 million and \$1.3 million in the comparable prior year periods. The year-to-date loss in 2008 was driven by a non-cash identified intangible asset impairment of \$10.5 million (\$6.5 million after tax). The impairment related to the termination of certain management contracts and related factors. Both the quarter and year-to-date periods also reflect decreases in fee revenues, only partially offset by lower expenses, driven by lower assets under management. Average fee-earning assets under management during the three and six months ended June 30, 2008 were \$34.8 billion and \$38.6 billion, compared with \$46.7 billion and \$46.4 billion, respectively, in the prior year periods. This decrease was primarily due to net outflows from our managed account, open-end mutual funds and institutional products, as well as the closure of three structured products. Asset Management had net outflows of \$2.2 billion during the second quarter of 2008, an improvement over the first quarter. Net outflows for the year-to-date period were \$6.6 billion, which included the first quarter redemption of \$3.7 billion related to certain management contracts which triggered the above-mentioned impairment. After-tax net realized losses, discussed below, further decreased Asset Management results by \$0.6 million and \$1.3 million for the three- and six-month periods in 2008 relative to the prior year.

During the three and six months ended June 30, 2008, we incurred net losses in Corporate and Other of \$20.9 million and \$34.5 million, respectively. These represented increases of \$17.7 million and \$37.6 million over the comparable prior year periods. During the first quarter of 2008, we announced our intention to spin off our asset management business; in connection with preparations for the spin-off, we incurred related expenses of \$2.9 million and \$3.9 million during the first and second quarters, respectively. In addition, in the first and second quarters of 2008 we incurred proxy solicitation expenses of \$4.6 million and \$4.8 million, respectively, related to a proxy contest. Proxy solicitation expenses in 2007 were \$0.3 million. These expense increases in the 2008 periods were partially offset by lower interest expense resulting from the February 2008 maturity and repayment of one of our senior unsecured obligations. After-tax net realized losses, discussed below, further decreased Corporate and Other results by \$5.3 million and \$18.3 million for the three- and six-month periods in 2008 relative to the prior year.

Current year results were also lower due to after-tax net realized investment losses of \$8.6 million and \$22.9 million during the three- and six-month periods, respectively. These results compared with a loss of \$1.1 million from the 2007 quarter and net gains of \$11.3 million during the 2007 year-to-date period. Total second quarter impairments included pre-tax impairments on residential mortgage-backed securities of \$24.9 million (\$16.2 million after-tax). Year-to-date impairments on residential mortgage-backed securities were \$57.5 million (\$37.4 million after-tax) for 2008. These losses were primarily in the Alt-A and sub-prime sectors, with some losses in subordinated tranches of prime portfolios. The first quarter of 2007 included a \$13.7 million pre-tax gain related to an earn-out payment of our sale of Lombard International Assurance S.A. ("Lombard").

Analysis of Consolidated Financial Condition

Stockholders' equity, excluding accumulated other comprehensive loss, decreased during the year-to-date period in 2008 by \$24.2 million to \$2,393.0 million at June 30, 2008, primarily due to a net loss and the declaration of a stockholder dividend of \$18.8 million during the second quarter. Total assets decreased \$586.6 million to \$29,634.8 million at June 30, 2008, primarily due to unrealized losses on general account debt securities, lower separate account assets due to weak market performance and a lower cash balance at the period end, partially offset by higher deferred acquisition costs related to new product sales.

Results of Operations by Segment

In managing our business, we analyze segment performance on the basis of "operating income" which does not equate to "net income" as determined in accordance with GAAP. Rather, it is the measure of profit or loss used by the Company to evaluate performance, allocate resources and manage our operations.

Operating income is calculated by excluding realized investment gains (losses) and certain other items because we do not consider them to be related to the operating performance of our segments. The size and timing of realized investment gains and losses are often subject to our discretion. Certain other items are also excluded from operating income if, in our opinion, they are not indicative of overall operating trends. While some of these items may be significant components of net income in accordance with GAAP, we believe that operating income, and measures that are derived from or incorporate operating income, are appropriate measures that are useful to investors because they identify the earnings attributable to the ongoing operations of the business.

The criteria used to identify an item that will be excluded from operating income include: whether the item is infrequent and is material to the segment's income; or whether it results from a change in regulatory requirements, or relates to other unusual circumstances. Items excluded from operating income may vary from period to period. Because these items are excluded based on our discretion, inconsistencies in the application of our selection criteria may exist. Operating income, and other measures that are derived from or incorporate operating income, are not substitutes for net income determined in accordance with GAAP and may be different from similarly titled measures of other companies. However, the Company believes that the presentation of operating income as measured for management purposes enhances the understanding of results of operations by highlighting the results from ongoing operations and the underlying profitability factors of our business.

**Results of Operations by Segment
as Reconciled to Consolidated Net Income:**
(\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,

Net income (loss)	\$ 6.2	\$ 30.9	\$ (8.2)	\$ 79.6

Segment Allocations

We allocate capital to our Life and Annuity segment based on risk-based capital (“RBC”) for our insurance products. We used a 300% risk-based capital ratio for allocations in 2007 and 2008. Capital within our Life Companies that is unallocated is included in Corporate and Other. We allocate capital to our Asset Management segment on the basis of the historical capital within that segment. We allocate net investment income based on the assets allocated to the segments. We allocate tax benefits related to tax-advantaged investments to the segment that holds the investment. We allocate certain costs and expenses to the segments based on a review of the nature of the costs, time studies and other methodologies.

Life and Annuity Segment

Net income	\$ 29.3	\$ 32.3	\$ (3.0)	(9%)

Three months ended June 30, 2008 compared to three months ended June 30, 2007

Life and Annuity net income and operating income decreased primarily as a result of lower investment earnings and higher mortality costs and policy acquisition cost amortization, partially offset by higher insurance, investment management and product fees.

- Net investment income decreased due to lower yields, lower partnership and other gains and lower total assets levels, only partially offset by earnings on a higher asset base in the universal life line of business.
- Insurance, investment management and product fees increased from higher cost of insurance changes for universal life insurance, reflecting continued growth of the in force block of business.

Total segment benefits and expenses increased primarily due to the following:

- Benefit costs increased due to higher mortality costs for universal and variable universal life insurance, reflecting higher claims, and an increase in the liability for guaranteed minimum income benefits for annuities resulting from poor market performance for the quarter.
- Policy acquisition cost amortization increased due to higher insurance margins and recent growth in the universal life business, and from higher surrenders and weak market performance in the annuity and variable universal life businesses.

Realized losses reflect higher impairments for 2008, related primarily to mortgage-backed securities.

Summary Life and Annuity Financial Data:

(\$ in millions)

Realized investment gains (losses), net of income taxes and other offsets	(13.5)	1.0	(14.5)	(1,450%)
Net income	\$ 37.8	\$ 74.1	\$ (36.3)	(49%)

Six months ended June 30, 2008 compared to six months ended June 30, 2007

Life and Annuity net income and operating income decreased as a result of lower premiums and investment earnings, higher mortality costs and higher policy acquisition cost amortization, partially offset by higher insurance, investment management and product fees.

- Net investment income decreased due to lower yields, lower partnership and other gains and lower assets levels, only partially offset by earnings on a higher asset base in the universal life line of business.
- Traditional premium income decreased primarily due to the fact that we no longer sell participating policies, resulting in a decline in renewal of participating life premiums. The decline in premiums was largely offset by a decrease in policy benefits related to the reduction of in-force policies for traditional life insurance.
- Insurance, investment management and product fees increased from higher cost of insurance charges for universal life insurance, reflecting continued growth of the in force block of business.

Total segment benefits and expenses increased primarily due to the following:

- Benefit costs increased due to higher mortality costs for universal and variable universal life insurance, reflecting higher claims, and an increase in the liability for guaranteed minimum income benefits for annuities resulting from poor market performance for the period.
- Policy acquisition cost amortization increased due to higher insurance margins and recent growth in the universal life business, and from higher surrenders and weak market performance in the annuity and variable universal life businesses.

The decrease in income taxes was primarily due to the decrease in pre-tax operating income.

Realized losses reflect higher impairments for 2008, related primarily to mortgage-backed securities.

Annuity Funds on Deposit

Annuity Funds on Deposit:

(\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Deposits	\$ 230.3	\$ 306.3	\$ 428.3	\$ 493.4
Performance and interest credited	214.6	372.5	(1.2)	542.1
Fees	(20.0)	(17.6)	(38.6)	(35.4)
Benefits and surrenders	(270.7)	(316.6)	(653.8)	(597.5)
Change in funds on deposit	154.2	344.6	(265.3)	402.6
Funds on deposit, beginning of period	8,810.0	8,735.6	9,229.5	8,677.6
Annuity funds on deposit, end of period	\$ 8,964.2	\$ 9,080.2	\$ 8,964.2	\$ 9,080.2

Three and six months ended June 30, 2008 compared to three and six months ended June 30, 2007

For the three months ended June 30, 2008, annuity funds on deposit increased less than they had during the comparable prior year quarter. For the six-month period in 2008 they decreased, compared to an increase in 2007. The primary causes of these decreases were reduced fund performance due to weaker equity markets and lower new deposits.

Variable Universal Life Funds on Deposit:

(\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Deposits	\$ 90.7	\$ 47.9	\$ 142.7	\$ 99.5
Performance and interest credited	11.3	112.7	(105.6)	170.8
Fees and cost of insurance	(30.3)	(28.0)	(59.9)	(55.9)
Benefits and surrenders	(50.3)	(35.1)	(85.6)	(65.1)
Change in funds on deposit	21.4	97.5	(108.4)	149.3
Funds on deposit, beginning of period	2,566.3	2,364.7	2,696.1	2,312.9
Variable universal life funds on deposit, end of period	\$ 2,587.7	\$ 2,462.2	\$ 2,587.7	\$ 2,462.2

Three and six months ended June 30, 2008 compared to three and six months ended June 30, 2007

For the three months ended June 30, 2008, variable universal life funds on deposit increased less than they had during the comparable prior year quarter. For the six-month period in 2008 they decreased, compared to an increase in 2007. A modest positive performance for the 2008 quarter and negative performance for the 2008 year-to-date period resulted from weak equity markets. These decreases relative to the prior year were partially offset by higher deposits driven by strong sales.

Universal Life Funds on Deposit:

(\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Deposits	\$ 149.7	\$ 100.2	\$ 328.8	\$ 192.5
Interest credited	24.3	21.0	48.1	42.0
Fees and cost of insurance	(98.2)	(68.4)	(196.3)	(132.7)
Benefits and surrenders	(32.2)	(23.5)	(60.9)	(53.7)
Change in funds on deposit	43.6	29.3	119.7	48.1
Funds on deposit, beginning of period	2,200.0	1,922.9	2,123.9	1,904.1
Universal life funds on deposit, end of period	\$ 2,243.6	\$ 1,952.2	\$ 2,243.6	\$ 1,952.2

Three and six months ended June 30, 2008 compared to three and six months ended June 30, 2007

For the three and six months ended June 30, 2008, universal life funds on deposit increased \$14.3 million and \$71.6 million, respectively, more than they had during the comparable prior year periods. These increases were driven primarily by higher sales, partially offset by higher fees and cost of insurance charges.

Life and Annuity Segment Revenues by Product
(\$ in millions)

	Three Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007	
Variable universal life insurance	\$ 34.9	\$ 32.1	\$ 2.8	9%
Universal life insurance	126.8	97.6	29.2	30%
Other life insurance	1.9	1.4	0.5	36%
Total core life insurance	163.6	131.1	32.5	25%
Traditional life insurance	380.0	384.9	(4.9)	(1%)
Total life insurance	543.6	516.0	27.6	5%
Annuities	39.2	46.4	(7.2)	(16%)
Segment revenues	\$ 582.8	\$ 562.4	\$ 20.4	4%

Three months ended June 30, 2008 compared to three months ended June 30, 2007

Variable universal life insurance revenue increased modestly with an increase in fees from a higher level of sales in 2008 and cost of insurance charges.

Universal life insurance revenue increased significantly primarily due to higher cost of insurance charges from the growth of in-force business and fees from a higher level of sales in 2008.

Traditional life insurance revenue decreased primarily due to lower investment income and modestly lower premiums, resulting from the fact that we no longer sell participating life policies. However, there is an offsetting decrease in policy benefits related to the reduction of in-force policies for traditional life insurance.

Annuity revenue decreased primarily due to lower interest earned on general account funds from the run-off of discontinued products, partially offset by an increase in separate account based fees due to higher asset balances.

Life and Annuity Segment Revenues by Product
(\$ in millions)

	Six Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007	
Variable universal life insurance	\$ 68.5	\$ 64.9	\$ 3.6	6%
Universal life insurance	251.2	191.5	59.7	31%
Other life insurance	3.8	3.0	0.8	27%
Total core life insurance	323.5	259.4	64.1	25%
Traditional life insurance	747.5	784.2	(36.7)	(5%)
Total life insurance	1,071.0	1,043.6	27.4	3%
Annuities	78.6	92.4	(13.8)	(15%)
Segment revenues	\$ 1,149.6	\$ 1,136.0	\$ 13.6	1%

Six months ended June 30, 2008 compared to six months ended June 30, 2007

Variable universal life insurance revenue increased due to an increase in fees, from a higher level of sales in 2008 and cost of insurance charges, partially offset by lower surrender charges.

Universal life insurance revenue increased significantly primarily due to higher cost of insurance charges from the growth of in-force business and fees from a higher level of sales in 2008.

Traditional life insurance revenue decreased primarily due to lower premiums resulting from the fact that we no longer sell participating life policies. However, there is an offsetting decrease in policy benefits related to the reduction of in-force policies for traditional life insurance. In addition, investment income declined due to lower earnings on other invested assets, which were unusually high in 2007.

Annuity revenue decreased primarily due to lower interest earned on general account funds from the run-off of discontinued products, partially offset by an increase in separate account based fees due to higher asset balances.

**Composition of Life and Annuity Operating Income
before Income Taxes by Product:**
(\$ in millions)

	Three Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007	
Variable universal life insurance	\$ 9.3	\$ 10.8	\$ (1.5)	(14%)
Universal life insurance	13.1	14.3	(1.2)	(8%)
Other life insurance	(1.9)	0.6	(2.5)	(417%)
Total core life insurance	20.5	25.7	(5.2)	(20%)
Traditional life insurance	23.9	16.3	7.6	47%
Total life insurance	44.4	42.0	2.4	6%
Annuities	1.1	5.2	(4.1)	(79%)
Operating income before income taxes	\$ 45.5	\$ 47.2	\$ (1.7)	(4%)

Three months ended June 30, 2008 compared to three months ended June 30, 2007

Variable universal life pre-tax operating income decreased due to higher amortization of policy acquisition costs, from higher surrenders and weak fund performance, partially offset by lower operating expenses.

Universal life pre-tax operating income decreased due to higher amortization of policy acquisition costs, lower investment margins and higher operating expenses, partially offset by higher mortality margins. Amortization of policy acquisition costs increased due to higher mortality margins.

Traditional life pre-tax operating income increased primarily due to lower expenses and policy benefits, partially offset by lower investment income.

Annuity pre-tax operating income decreased primarily due to lower investment margins and higher amortization of policy acquisition costs, from higher surrenders, primarily for discontinued products, and poor fund performance, partially offset by higher fees and lower operating expenses.

**Composition of Life and Annuity Operating Income
before Income Taxes by Product:**
(\$ in millions)

	Six Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007

Net income (loss)	\$ (2.1)	\$ 1.5	\$ (3.6)	(240%)

Three months ended June 30, 2008 compared to three months ended June 30, 2007

Asset Management net income and operating income decreased primarily as a result of lower investment management fees which was driven by lower assets under management. A more detailed explanation of key drivers of earnings is explained below:

- Investment management fees decreased due to net outflows and unfavorable market performance of \$8.3 billion and \$4.6 billion, respectively, over the past four quarters.
- Mutual fund ancillary fees and other revenue decreased due to declines in mutual fund assets under management. The mutual fund ancillary fees decrease was partially offset by a corresponding decrease in trail payments which are a component of other operating expenses.
- Other operating expenses decreased primarily due to a decrease in employment expenses resulting from lower sales-based and other variable incentive compensation combined with lower trail payments explained above. Also contributing to the decrease in other operating expenses were decreases in shared services provided by the parent company. Partially offsetting these items were higher external legal costs.

Summary Asset Management Financial Data: (\$ in millions)

	Six Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007

Net income (loss)	\$ (11.4)	\$ 1.3	\$ (12.7)	(977%)

Six months ended June 30, 2008 compared to six months ended June 30, 2007

Asset Management net income and operating income decreased primarily as a result of a first quarter 2008 impairment charge that was recorded at one of our asset management subsidiaries. The impairment was primarily the result of the termination of an institutional client. We recorded a non-cash impairment charge of \$10.5 million pre-tax against the related identified intangible asset. In connection with this impairment, as required by SFAS 142, we also performed a test for impairment of the operating segment's goodwill. No impairment of goodwill was deemed necessary. The other key drivers of earnings are explained below:

- Investment management fees decreased due to net outflows and unfavorable market performance of \$8.3 billion and \$4.6 billion, respectively, over the past four quarters.
- Mutual fund ancillary fees and other revenue decreased due to declines in mutual fund assets under management. The mutual fund ancillary fees decrease was partially offset by a corresponding decrease in trail payments which are a component of other operating expenses.
- Other operating expenses decreased primarily due to a decrease in employment expenses resulting from lower sales-based and other variable incentive compensation combined with lower trail payments explained above. Also contributing to the decrease in other operating expenses were decreases in shared services provided by the parent company. Partially offsetting these items were higher portfolio management expenses and higher external legal costs.

Our investment management fees are based on assets under management. Approximately 33% of our investment management fees were based on beginning of quarter assets under management which causes fee revenues to lag behind changes in assets under management. The remaining 67% were based on average daily closing asset values. The following table shows average assets under management.

Assets Under Management:
(\$ in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Average fee earning assets				
Money market mutual funds	\$ 5,860.0	\$ 5,350.9	\$ 5,868.9	\$ 5,580.7
All other mutual funds	15,604.8	17,510.1	15,531.1	17,148.4
Managed accounts	4,624.7	6,529.0	5,036.2	6,685.0
Institutional	6,849.7	12,130.2	8,654.3	12,138.8
Structured finance products	1,824.0	5,201.7	3,535.2	4,887.8
Total	\$ 34,763.2	\$ 46,721.9	\$ 38,625.7	\$ 46,440.7

Three and six months ended June 30, 2008 compared to three and six months ended June 30, 2007

Average fee earning assets decreased for both comparative periods primarily due to the redemption of a large institutional client at one of our subsidiaries in the first quarter of 2008, combined with unfavorable equity market performance over the past three quarters and unfavorable structured finance performance over the past four quarters. Also contributing to the decrease was net outflows in managed accounts and mutual funds over the past four quarters.

Corporate and Other

Summary Corporate and Other Financial Data: (\$ in millions)

	Three Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007	
Results of operations				
Corporate investment income	\$ (0.3)	\$ 1.5	\$ (1.8)	(120%)
Investment income from collateralized obligations	2.0	4.2	(2.2)	(52%)
Interest expense on indebtedness	(8.8)	(11.6)	2.8	(24%)
Interest expense on non-recourse collateralized obligations	(1.9)	(4.1)	2.2	(54%)
Corporate expenses	(11.6)	(5.5)	(6.1)	111%
Other	(0.5)	(0.7)	0.2	29%

Allocated income tax benefit	7.4	14.7	(7.3)	(50%)
Operating loss	(13.7)	(1.5)	(12.2)	813%
Realized investment losses, net of income taxes and other offsets	(7.3)	(1.8)	(5.5)	306%
Net loss	\$ (21.0)	\$ (3.3)	\$ (17.7)	536%

Three months ended June 30, 2008 compared to three months ended June 30, 2007

Corporate and other net income and operating income decreased compared to the prior year due primarily to higher expenses, which reflected the costs associated with the proxy solicitation of \$4.8 million and the spin-off of our asset management business of \$3.9 million. Interest expense decreased as a result of the pay off of the \$153.7 million equity unit notes in February 2008. In addition, we had net realized investment losses during the 2008 quarter, compared to net gains in the prior year. Current year net losses were driven primarily by impairment losses related to residential mortgage-backed securities. The higher prior year income tax benefit was driven by utilization of foreign tax credits, which did not recur in 2008.

Summary Corporate and Other Financial Data: (\$ in millions)

	Six Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007	
Results of operations				
Corporate investment income	\$ 0.6	\$ 3.0	\$ (2.4)	(80%)
Investment income from collateralized obligations	5.2	8.2	(3.0)	(37%)
Interest expense on indebtedness	(19.0)	(21.1)	2.1	(10%)
Interest expense on non-recourse collateralized obligations	(5.1)	(8.1)	3.0	(37%)
Corporate expenses	(22.8)	(8.4)	(14.4)	171%
Other	(0.6)	1.0	(1.6)	(160%)
Operating loss before income taxes	(41.7)	(25.4)	(16.3)	64%
Allocated income tax benefit	15.5	18.4	(2.9)	(16%)
Operating loss	(26.2)	(7.0)	(19.2)	274%
Realized investment gains (losses), net of income taxes and other offsets	(8.4)	10.0	(18.4)	(184%)
Net income (loss)	\$ (34.6)	\$ 3.0	\$ (37.6)	(1,253%)

Six months ended June 30, 2008 compared to six months ended June 30, 2007

Corporate and other net income and operating income decreased compared to the prior year due primarily to higher expenses, which reflected the costs associated with the proxy solicitation of \$9.4 million and the spin-off of our asset management business of \$6.8 million. Interest expense increased due to a correction of accrued interest in the prior year. Excluding that correction, interest expense for 2008 would have declined as a result of the pay off of the \$153.7 million equity unit notes in February 2008. In addition, we had net realized investment losses during the 2008 period, compared to net gains in the prior year. Current year net losses included impairment losses related to residential mortgage-backed securities, while gains for the prior year included a final earn-out payment related to the sale of Lombard in 2005. The higher prior year income tax benefit was driven by utilization of foreign tax credits, which did not recur in 2008.

General Account

The invested assets in the Life Companies' general account are generally of high quality and broadly diversified across asset classes, sectors and individual credits and issuers. Our investment professionals manage these general account assets in investment segments that support specific product liabilities. These investment segments have distinct investment policies that are structured to support the financial characteristics of the related liabilities within them. Segmentation of assets allows us to manage the risks and measure returns on capital for our various businesses and products.

Separate Accounts

Separate account assets are managed in accordance with the specific investment contracts and guidelines relating to our variable products. We generally do not bear any investment risk on assets held in separate accounts. Rather, we receive investment management fees based on assets under management. Assets held in separate accounts are not available to satisfy general account obligations.

Debt and Equity Securities Pledged as Collateral and Non-recourse Collateralized Obligations

Investments pledged as collateral trusts are assets held for the benefit of those institutional clients, which have investments in structured bond products offered and managed by our asset management subsidiary.

See Note 11 to our consolidated financial statements in this Form 10-Q as well as Note 11 to our consolidated financial statements in our 2007 Annual Report on Form 10-K for more information.

Debt and Equity Securities Held in Our General Account

Our general account debt securities portfolio consists primarily of investment grade publicly-traded and privately-placed corporate bonds, residential mortgage-backed securities, commercial mortgage-backed securities and asset-backed securities. As of June 30, 2008, our general account held debt securities with a carrying value of \$11,291.3 million, representing 76.7% of total general account investments. Public debt securities represented 72.0% of total debt securities, with the remaining 28.0% represented by private debt securities.

We consolidate debt and equity securities on our consolidated balance sheet that are pledged as collateral for the settlement of collateralized obligation liabilities related to two collateralized obligation trusts we sponsor. See Note 11 to our consolidated financial statements in this Form 10-Q for additional information on these debt and equity securities pledged as collateral.

We manage credit risk through industry and issuer diversification. Maximum exposure to an issuer is defined by quality ratings, with higher quality issuers having larger exposure limits. Our investment approach emphasizes a high level of industry diversification. The top five industry holdings as of June 30, 2008 in our debt securities portfolios are banking (7.1%), diversified financial services (4.3%), electrical utilities (3.9%), insurance (3.3%) and hospital and management services (2.2%).

Residential Mortgage-Backed Securities

The weakness in the U.S. residential real estate markets, increases in mortgage rates and the effects of relaxed underwriting standards for mortgages and home equity loans have led to higher delinquency rates and losses for the residential mortgage-backed securities market. Delinquency rates for all sectors of the residential mortgage-backed market, including sub-prime, Alt-A, and now even prime, have increased beyond historical averages.

We invest directly in residential mortgage-backed securities through our general account. To the extent these assets deteriorate in credit quality and decline in value for an extended period, we may realize impairment losses. We have been focused on identifying those securities that can withstand significant increases in delinquencies and foreclosures in the underlying mortgage pools before incurring a loss of principal.

Most of our residential mortgage-backed securities portfolio is highly rated. As of June 30, 2008, 97% of the total residential portfolio was rated AAA or AA. We have \$210.0 million of sub-prime exposure, \$260.0 million of Alt-A exposure, and \$568.4 million of prime exposure, which combined amount to less than 7% of our general account. Substantially all of our sub-prime, Alt-A, and prime exposure is investment grade, with 87% being AAA rated, and another 7% in AA securities. We have employed a disciplined approach in the analysis and monitoring of our mortgage-backed securities. Our approach involves a monthly review of each security. Underlying mortgage data is obtained from the security's trustee and analyzed for performance trends. A security-specific stress analysis is performed using the most recent trustee information. This analysis forms the basis for our determination of whether the security will pay in accordance with the contractual cash flows. Year-to-date through June 30, 2008, we have taken impairments of \$51 million on our residential mortgage-backed securities portfolio. This represents 2.4% of our total residential mortgage-backed securities portfolio and 0.4% of the general account. The losses consist of \$22.9 million from prime, \$21.2 million from Alt-A and \$6.4 million from sub-prime.

Total impairment losses increased \$12.0 million and \$51.4 million for the 2008 quarter and year-to-date period, respectively, as compared to the comparable 2007 periods.

Debt security impairments for the three and six months ended June 30, 2008 include impairment losses of \$24.8 million and \$54.7 million, respectively, related to residential mortgage-backed securities. Of these impairment losses, \$11.1 million and \$22.8 million relate to the closed block.

During the first quarter of 2008, we recorded an impairment loss of \$7.3 million in a limited partnership investment. During the second quarter of 2008 we recorded an impairment loss of \$1.5 million in a private equity security.

Affiliate transactions of \$0.0 million in 2008 and \$13.7 million in 2007 are attributable to the Lombard earn-out associated with the sale of Lombard that occurred in the first quarter of 2005.

There were no realized impairment losses on debt and equity securities pledged as collateral relating to our direct investments in the consolidated collateralized obligation trusts for the three and six months ended June 30, 2008 and 2007, respectively.

Applicable deferred income taxes (benefit)	1.4	(0.4)	1.4	(0.4)	—	—
Offsets to net unrealized gains (losses)	18.5	(9.3)	1.4	(0.4)	17.1	(8.9)
Unrealized gains (losses) after offsets	\$ 2.6	\$ (0.7)	\$ 2.6	\$ (0.7)	\$ —	\$ —
Net unrealized gains after offsets	\$ 1.9		\$ 1.9		\$ —	

Total net unrealized losses on debt and equity securities as of June 30, 2008 were \$554.0 million (unrealized gains of \$184.4 million less unrealized losses of \$738.4 million). Of that net amount, net unrealized losses of \$328.2 million were outside the closed block (\$101.3 million after applicable deferred policy acquisition costs and deferred income taxes) and net unrealized losses of \$225.5 million were in the closed block (\$0.0 million after applicable policyholder dividend obligation).

At the end of each reporting period, we review all securities for potential recognition of an other-than-temporary impairment. We maintain a watch list of securities in default, near default or otherwise considered by our investment professionals as being distressed, potentially distressed or requiring a heightened level of scrutiny. We also identify securities whose carrying value has been below amortized cost on a continuous basis for zero to six months, six months to 12 months and greater than 12 months. This analysis is provided for investment grade and below investment grade securities and closed block and outside of closed block securities. Using this analysis, coupled with our watch list, we review all securities whose fair value is less than 80% of amortized cost (significant unrealized loss) with emphasis on below investment grade securities with a continuous significant unrealized loss in excess of six months. In addition, we review securities that had experienced lesser percentage declines in value on a more selective basis to determine if a security is other-than-temporarily impaired.

Our assessment of whether an investment in a debt or equity security is other-than-temporarily impaired includes whether the issuer has:

- defaulted on payment obligations;
- declared that it will default at a future point outside the current reporting period;
- announced that a restructuring will occur outside the current reporting period;
- severe liquidity problems that cannot be resolved;
- filed for bankruptcy;
- a financial condition which suggests that future payments are highly unlikely;
- deteriorating financial condition and quality of assets;
- sustained significant losses during the current year;
- announced adverse changes or events such as changes or planned changes in senior management, restructurings, or a sale of assets; and/or
- been affected by any other factors that indicate that the fair value of the investment may have been negatively impacted.

In determining whether collateralized securities are impaired, we obtain underlying mortgage data from the security's trustee and analyze it for performance trends. A security-specific stress analysis is performed using the most recent trustee information. This analysis forms the basis for our determination of whether the security will pay in accordance with the contractual cash flows.

If we determine that the security is impaired, we write it down to its then current fair value and record a realized loss in that period.

The following tables present certain information with respect to our gross unrealized losses with respect to our investments in general account debt securities, both outside and inside the closed block, as of June 30, 2008. In the tables, we separately present information that is applicable to unrealized losses both outside and inside the closed block. We believe it is unlikely that there would be any effect on our net income related to the realization of investment losses inside the closed block due to the current policyholder dividend obligation liability in the closed block. See Note 5 to our consolidated financial statements in this Form 10-Q for more information regarding the closed block. Applicable deferred policy acquisition costs and deferred income taxes further reduce the effect on our comprehensive income.

Duration of Gross Unrealized Losses on

General Account Securities Outside Closed Block:

(\$ in millions)

	As of June 30, 2008			
	Total	0 – 6 Months	6 – 12 Months	Over 12 Months
Debt securities outside closed block

**Duration of Gross Unrealized Losses on
General Account Securities Inside Closed Block:**
(\$ in millions)

	As of June 30, 2008			
	Total	0 – 6 Months	6 – 12 Months	Over 12 Months
Debt securities inside closed block				
Total fair value	\$ 3,803.3	\$ 1,751.7	\$ 266.5	\$ 1,785.1
Total amortized cost	4,157.4	1,812.9	317.7	2,026.8
Unrealized losses	<u>\$ (354.1)</u>	<u>\$ (61.2)</u>	<u>\$ (51.2)</u>	<u>\$ (241.7)</u>
Unrealized losses after offsets	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>
Number of securities	<u>832</u>	<u>339</u>	<u>88</u>	<u>405</u>
 Investment grade:				
Unrealized losses	<u>\$ (299.9)</u>	<u>\$ (53.3)</u>	<u>\$ (45.5)</u>	<u>\$ (201.1)</u>
Unrealized losses after offsets	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>
 Below investment grade:				
Unrealized losses	<u>\$ (54.2)</u>	<u>\$ (7.9)</u>	<u>\$ (5.7)</u>	<u>\$ (40.6)</u>
Unrealized losses after offsets	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>
 Equity securities inside closed block				
Unrealized losses	<u>\$ (8.9)</u>	<u>\$ (4.8)</u>	<u>\$ (4.1)</u>	<u>\$ —</u>
Unrealized losses after offsets	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>
Number of securities	<u>106</u>	<u>79</u>	<u>27</u>	<u>—</u>

For debt securities inside the closed block with gross unrealized losses, 84.7% of the unrealized losses pertain to investment grade securities and 15.3% of the unrealized losses pertain to below investment grade securities at June 30, 2008.

The following table represents those securities whose fair value is less than 80% of amortized cost (significant unrealized loss) that have been at a significant unrealized loss position on a continuous basis.

**Duration of Gross Unrealized Losses on
General Account Securities Inside Closed Block:**
(*\$ in millions*)

Duration of Gross Unrealized Losses on		As of June 30, 2008			
General Account Securities Inside Closed Block:

Unrealized losses over 20% of cost after offsets		\$ —	\$ —	\$ —	\$ —
Number of securities		39	34	5	—

In determining that the securities giving rise to the previously mentioned unrealized losses were not other-than-temporarily impaired, we considered and evaluated the factors cited above. In making these evaluations, we must exercise considerable judgment. Accordingly, there can be no assurance that actual results will not differ from our judgments and that such differences may require the future recognition of other-than-temporary impairment charges that could have a material effect on our financial position and results of operations. In addition, the value of, and the realization of any loss on, a debt security or equity security is subject to numerous risks, including interest rate risk, market risk, credit risk and liquidity risk. The magnitude of any loss incurred by us may be affected by the relative concentration of our investments in any one issuer or industry. We have established specific policies limiting the concentration of our investments in any single issuer and industry and believe our investment portfolio is prudently diversified.

Lombard International Assurance S.A.

On January 11, 2005, we disposed of our interests in Lombard for consideration of \$59.0 million. In the first quarter of 2007, 2006 and 2005, we realized after-tax gains of \$8.9 million, \$6.5 million and \$9.3 million, respectively, which included earn-out gain consideration received. We do not expect any further consideration related to this sale going forward.

Liquidity and Capital Resources

In the normal course of business, we enter into transactions involving various types of financial instruments such as debt and equity securities. These instruments have credit risk and also may be subject to risk of loss due to interest rate and market fluctuations.

Liquidity refers to the ability of a company to generate sufficient cash flow to meet its cash requirements. The following discussion includes both liquidity and capital resources as these subjects are interrelated.

The Phoenix Companies, Inc. (consolidated)

Summary Consolidated Cash Flows:

(\$ in millions)

	Six Months Ended June 30,		Increase (decrease) and percentage change	
	2008	2007	2008 vs. 2007	
Continuing operations:				
Cash from operating activities	\$ 21.1	\$ 95.1	\$ (74.0)	(78%)
Cash from investing activities	180.0	186.7	(6.7)	(4%)
Cash for financing activities	(341.5)	(335.6)	(5.9)	(2%)
Discontinued operations:				
Cash from (for) operating activities	(11.5)	(7.8)	(3.7)	(47%)
Cash from (for) investing activities	17.4	18.1	(0.7)	(4%)

Six months ended June 30, 2008 compared to six months ended June 30, 2007

Continuing Operations

Cash from operating activities decreased \$74.0 million primarily due to higher policy acquisition costs paid, related to increased sales, and to higher expense payments, including those related to our planned spin-off transaction and resolution of a proxy contest.

Cash from investing activities decreased \$6.7 million principally due to higher investment sales and repayments, net of purchases, of \$11.7 million.

Cash used for financing activities decreased \$5.9 million primarily due to increased outflows for indebtedness repayments, offset by lower net policyholder outflows. In 2008, our \$153.7 million of equity units matured and were repaid, while in 2007 we paid off \$57.2 million in promissory notes.

See Note 9 to our consolidated financial statements in this Form 10-Q for additional information on financing activities.

The Phoenix Companies, Inc. Sources and Uses of Cash

Our primary sources of liquidity have been dividends from Phoenix Life and interest income received from PXP. Under New York Insurance Law, Phoenix Life can pay stockholder dividends to the holding company in any calendar year without prior approval from the New York Superintendent of Insurance in the amount of the lesser of 10% of Phoenix Life's surplus to policyholders as of the immediately preceding calendar year or Phoenix Life's statutory net gain from operations for the immediately preceding calendar year, not including realized capital gains. Phoenix Life is able to pay a dividend of \$83.8 million in 2008 under this provision.

On May 2, 2008, we declared a dividend of \$0.16 per share to shareholders of record on June 13, 2008. We paid that dividend on July 11, 2008. In the prior year, we declared a dividend of \$0.16 per share on April 26, 2007 to our shareholders of record on June 13, 2007; we paid that dividend on July 11, 2007.

The Phoenix Life Board of Directors declared dividends of \$30.0 million and \$25.0 million on July 9, 2008 and March 19, 2008, respectively, to the Company, Phoenix Life's sole shareholder. These dividends were paid in July 2008 and April 2008, respectively. During 2007, the Phoenix Life Board of Directors paid total dividends of \$30.0 million, \$30.0 million and \$32.2 million to the Company in April, July and November, respectively.

See Note 22 to our consolidated financial statements in our 2007 Annual Report on Form 10-K for more information on Phoenix Life statutory financial information and regulatory matters.

We sponsor postemployment benefit plans through pension and savings plans and postretirement health care and life insurance for employees of Phoenix Life and PXP. Funding of these obligations is provided by Phoenix Life and PXP on a 100% cost reimbursement basis through administrative services agreements with the holding company. See Note 14 to our consolidated financial statements in this Form 10-Q for additional information.

The holding company does not expect to receive dividends from PXP in the near term because this subsidiary will likely use a substantial portion of its cash flows from operations to repay intercompany debt and interest on debt.

On April 2, 2008, the Company and its subsidiary, Phoenix Life, amended and restated our existing \$150 million unsecured senior revolving credit facility (the “Amended and Restated Facility”). The Amended and Restated Facility amends and restates the terms of the original facility dated November 22, 2004 (the “Original Facility”) and the terms of the amendment and restatement of the Original Facility dated June 6, 2006 (the “Amended Facility”).

The financing commitments under the Amended and Restated Facility will terminate on June 6, 2009. The Amended and Restated Facility reflects amendments that, in anticipation of the spin-off of the Company’s wholly-owned subsidiary, PXP, to the Company’s shareholders (the “Spin-off”), (i) release PXP from its obligations under the Amended Facility and provide that PXP is not a borrower under the Amended and Restated Facility effective as of April 2, 2008, and (ii) adjust a certain financial covenant of the borrowers upon the consummation of the Spin-off. The adjusted covenant is related to the minimum consolidated net worth required to be maintained following the Spin-off.

Potential borrowers on the credit line are the Company and Phoenix Life. The Company unconditionally guarantees any loans under this facility to Phoenix Life. Base rate loans will bear interest at the greater of Wachovia Bank, National Association’s prime commercial rate or the federal funds rate plus 0.50%. Eurodollar rate loans will bear interest at LIBOR plus an applicable percentage based on our Standard & Poor’s and Moody’s ratings. There are no current borrowings on the credit facility.

The credit facility contains covenants that require us at all times to maintain a minimum level of consolidated stockholders’ equity, based on GAAP standards in effect on June 6, 2006 and a maximum consolidated debt-to-capital ratio of 30%. In addition, Phoenix Life must maintain a minimum risk-based capital ratio of 250% and a minimum A.M. Best financial strength rating of “A-”.

We were in compliance with all of our credit facility covenants at June 30, 2008.

Future minimum annual principal payments on indebtedness as of June 30, 2008 are: in 2032, \$300.0 million and in 2034, \$175.0 million.

The Company and its subsidiaries may, from time to time, purchase our 7.45% Quarterly Interest Bonds, due 2032, in the open market subject to considerations including, but not limited to, market conditions, relative valuations, capital allocation and the continued determination that it is in the best interest of the Company and its shareholders.

Ratings

Rating agencies assign Phoenix Life financial strength ratings and assign us debt ratings based in each case on their opinions of the relevant company’s ability to meet its financial obligations. Ratings changes may result in increased or decreased interest costs in connection with future borrowings. Such an increase or decrease would affect our earnings and could affect our ability to finance our future growth. Downgrades may also trigger defaults or repurchase obligations.

The financial strength and debt ratings as of June 30, 2008 were as follows:

<u>Rating Agency</u>	<u>Financial Strength Rating of Phoenix Life</u>	<u>Outlook</u>	<u>Senior Debt Rating of The Phoenix Companies, Inc.</u>	<u>Outlook</u>
A.M. Best Company, Inc.	A (“Excellent”)	Stable	bbb (“Adequate”)	Positive
Fitch	A+ (“Strong”)	Negative	Not rated	
Moody’s	A3 (“Good”)	Stable	Baa3 (“Adequate”)	Stable
Standard & Poor’s	A- (“Strong”)	Stable	BBB- (“Good”)	Stable

These ratings are not a recommendation to buy or hold any of our securities.

See Note 9 to our consolidated financial statements in this Form 10-Q for additional information on financing activities.

See Note 17 to our consolidated financial statements in this Form 10-Q for more information on our contingent liabilities.

Life Companies Sources and Uses of Cash

The Life Companies' liquidity requirements principally relate to: the liabilities associated with various life insurance and annuity products; the payment of dividends by Phoenix Life to us; operating expenses; contributions to subsidiaries; and payment of principal and interest by Phoenix Life on its outstanding debt obligations. Liabilities arising from life insurance and annuity products include the payment of benefits, as well as cash payments in connection with policy surrenders, withdrawals and loans. The Life Companies also have liabilities arising from the runoff of the remaining group accident and health reinsurance discontinued operations.

Historically, our Life Companies have used cash flow from operations and investment activities to fund liquidity requirements. Their principal cash inflows from life insurance and annuities activities come from premiums, annuity deposits and charges on insurance policies and annuity contracts. In the case of Phoenix Life, cash inflows also include dividends, distributions and other payments from subsidiaries. Principal cash inflows from investment activities result from repayments of principal, proceeds from maturities, sales of invested assets and investment income. The principal cash inflows from our discontinued group accident and health reinsurance operations come from our reinsurance, recoveries from other retrocessionaires and investment activities.

See our 2007 Annual Report on Form 10-K for additional information as to liquidity and capital resources related to our Life Companies.

Phoenix Investment Partners, Ltd. (PXP) Sources and Uses of Cash

PXP's liquidity requirements are primarily to fund operating expenses and pay its debt and interest obligations. PXP also requires liquidity to fund any potential acquisitions. Historically, PXP's principal source of liquidity has been cash flow from operations. We expect that cash flow from operations will continue to be its principal source of working capital. We believe that PXP's current and anticipated sources of liquidity are adequate to meet its present and anticipated needs.

See our 2007 Annual Report on Form 10-K for additional information as to liquidity and capital resources related to PXP.

Consolidated Financial Condition

Consolidated Balance Sheet:

(\$ in millions)

Consolidated Balance Sheet: (\$ in millions)	June 30, 2008	Dec 31, 2007	Increase (decrease) and percentage change 2008 vs. 2007	
ASSETS:				
Available-for-sale debt securities, at fair value	\$ 11,291.3	\$ 11,970.0	\$ (678.7)	(6%)

Accumulated deficit	(50.6)	(20.7)	(29.9)	144%
Accumulated other comprehensive loss	(215.9)	(138.2)	(77.7)	56%
Treasury stock	(179.5)	(179.5)	—	—%
Total stockholders' equity	2,177.1	2,279.0	(101.9)	(4%)
Total liabilities and stockholders' equity	\$ 29,634.8	\$ 30,221.4	\$ (586.6)	(2%)

June 30, 2008 compared to December 31, 2007

The fair value of available-for-sale debt securities decreased due to the change in fair value of bonds and funding of annuity withdrawals related primarily to discontinued products.

Venture capital partnerships increased primarily due to additional contributions of \$30.3 million, largely in the closed block.

Other investments decreased primarily due to the reclassification of certain investments to the fair value option investments line on the consolidated balance sheet discussed below.

Fair value option investments represent investments for which the fair value option was elected under SFAS 159. See Note 2 to our consolidated financial statements in this Form 10-Q for additional information.

Cash and cash equivalents decreased primarily due to cash used by financing activities of \$341.5 million, partially offset by cash from investing activities of \$197.4 million. Cash used for financing activities related to repayment of the equity unit notes of \$153.7 million and payments for net withdrawals on policyholder deposit funds of \$149.8 million. Cash from investing activities primarily related to higher investment sales, repayments and maturities net of purchases.

Receivables increased primarily due to higher reinsurance recoverable balances, which resulted from higher death claims activity in 2008.

**Composition of Deferred Policy Acquisition Costs
by Product:**
(\$ in millions)

	June 30, 2008	Dec 31, 2007	Increase (decrease) and percentage change 2008 vs. 2007	
Variable universal life	\$ 362.0	\$ 367.2	\$ (5.2)	(1%)
Universal life	1,029.9	821.1	208.8	25%
Variable annuities	345.2	310.0	35.2	11%
Fixed annuities	10.5	14.0	(3.5)	(25%)
Traditional life	603.4	577.6	25.8	4%
Total deferred policy acquisition costs	\$ 2,351.0	\$ 2,089.9	\$ 261.1	12%

Deferred policy acquisition costs increased primarily due to the deferral of \$248.1 million in first year acquisitions costs, including \$195.1 million related to universal life sales and \$28.9 million related to annuity sales.

Deferred income taxes increased due to changes in the tax basis of assets and liabilities during the first quarter of 2008.

Other intangible assets decreased as a result of the \$10.5 million impairment of certain management contract in our asset management business and recurring amortization.

Other assets increased due to an increase in prepaid reinsurance premiums and timing of certain suspense items.

Policyholder deposit funds decreased due to net outflows, primarily from discontinued annuity products.

Indebtedness decreased due to the pay off of our equity unit notes.

Other liabilities increased mainly as a result of unsettled investment purchases at June 30, 2008.

Contractual Obligations and Commercial Commitments

As of June 30, 2008, there were no significant changes to our outstanding contractual obligations and commercial commitments as disclosed in our 2007 Annual Report on Form 10-K.

Commitments Related to Recent Business Combinations

Under the terms of purchase agreements related to certain recent business combinations, we are subject to certain contractual obligations and commitments related to additional purchase consideration and other purchase arrangements as described in our 2007 Annual Report on Form 10-K.

Off-Balance Sheet Arrangements

As of June 30, 2008 and December 31, 2007, we did not have any significant off-balance sheet arrangements as defined by Item 303(a)(4)(ii) of SEC Regulation S-K. See Note 11 to our consolidated financial statements in this Form 10-Q for information on variable interest entities.

Reinsurance

We maintain life reinsurance programs designed to protect against large or unusual losses in our life insurance business. Based on our review of their financial statements, reputations in the reinsurance marketplace and other relevant information, we believe that we have no material exposure to uncollectible life reinsurance.

Statutory Capital and Surplus and Risk Based Capital

Phoenix Life's consolidated statutory basis capital and surplus (including AVR) decreased from \$1,055.6 million at December 31, 2007 to \$942.1 million at June 30, 2008. The principal factors resulting in this decrease are losses from operations of \$13.0 million, net realized losses of \$64.6 million and a \$25.0 million dividend to its sole shareholder, The Phoenix Companies, Inc., which was declared in March 2008.

At June 30, 2008, Phoenix Life's and each of its insurance subsidiaries' estimated Total Adjusted Capital levels were in excess of 350% of Company Action Level.

The Phoenix Life Board of Directors declared dividends of \$30.0 million and \$25.0 million on July 9, 2008 and March 19, 2008, respectively, to the Company, Phoenix Life's sole shareholder. These dividends were paid in July 2008 and April 2008, respectively. During 2007, the Phoenix Life Board of Directors paid total dividends of \$30.0 million, \$30.0 million and \$32.2 million to the Company in April, July and November, respectively.

Net Capital Requirements

Our broker-dealer subsidiaries are each subject to the net capital requirements imposed on registered broker-dealers by the Securities Exchange Act of 1934. Each are also required to maintain a ratio of aggregate indebtedness to net capital that does not exceed 15:1. At June 30, 2008, the largest of these subsidiaries had net capital of approximately \$7.3 million, which is \$6.3 million in excess of its required minimum net capital of \$1.0 million. The ratio of aggregate indebtedness to net capital for that subsidiary was 2:1. The ratios of aggregate indebtedness to net capital for each of our other broker-dealer subsidiaries were also below the regulatory ratio at June 30, 2008 and their respective net capital each exceeded the applicable regulatory minimum.

Obligations Related to Pension and Postretirement Employee Benefit Plans

As of June 30, 2008, there were no material changes to our obligations related to pension and postretirement employee benefit plans as described in our 2007 Annual Report on Form 10-K.

See Note 14 to our consolidated financial statements in this Form 10-Q for additional information.

Enterprise Risk Management

We have implemented a comprehensive, enterprise-wide risk management program, overseen by our Chief Risk Officer, who reports to the Chief Financial Officer. We have also established an Enterprise Risk Management Committee, chaired by the Chief Executive Officer, to follow our risk management principles and accomplish our objectives. In addition, we have established several management committees overseeing and addressing issues pertaining to all our major risks—product, market and operations—and capital management.

See our 2007 Annual Report on Form 10-K for more information regarding our enterprise risk management. There were no material changes in our exposure to operational and market risk exposure at June 30, 2008 in comparison to December 31, 2007.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information about our management of market risk, see the Enterprise Risk Management section of Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2007 Annual Report on Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have carried out an evaluation under the supervision and with the participation of our management, including our Principal Executive Officer and our Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, these officers have concluded that, as of June 30, 2008, the disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports we file and submit under the Securities and Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

During the three months ended June 30, 2008, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are regularly involved in litigation and arbitration, both as a defendant and as a plaintiff. In addition, various regulatory bodies regularly make inquiries of us and, from time to time, conduct examinations or investigations concerning our compliance with, among other things, insurance laws, securities laws, laws governing the activities of broker-dealers and other laws and regulations affecting our registered products. It is not feasible to predict or determine the ultimate outcome of all legal or regulatory proceedings or to provide reasonable ranges of potential losses. We believe that the outcomes of our litigation and regulatory matters are not likely, either individually or in the aggregate, to have a material adverse effect on our consolidated financial condition. However, given the large or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation and regulatory matters, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on our results of operations or cash flows in particular quarterly or annual periods. See Item 1A, "Risk Factors" in our Form 10-K for the year ended December 31, 2007 and Note 17 to our consolidated financial statements in this Form 10-Q for additional information.

ITEM 1A. RISK FACTORS

There are no material changes to our Risk Factors as described in our 2007 Annual Report on Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

- (a) During the three months ended March 31, 2008, we issued 22,483 restricted stock units ("RSUs") to 12 of our independent directors, without registration under the Securities Exchange Act of 1934 in reliance on an applicable exemption from registration under the Securities Act of 1933. Each RSU is potentially convertible into one share of our common stock.
- (b) Not applicable.
- (c) Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

For a discussion of the matters submitted to a vote of our shareholders during our Annual Meeting held on May 2, 2008, please see Part II, Item 4. "Submission of Matters to a Vote of Security Holders" in our Quarterly Report on Form 10-Q for the period ended March 31, 2008.

ITEM 5. OTHER INFORMATION

- (a) Not applicable.
- (b) No material changes.

ITEM 6. EXHIBITS

Exhibit

- 3.1 Amended and Restated Certificate of Incorporation of The Phoenix Companies, Inc. (incorporated herein by reference to Exhibit 3.1 to The Phoenix Companies, Inc. Registration Statement on Form S-1 (Registration No. 333-73896), filed November 21, 2001, as amended)
- 3.2 By-Laws of The Phoenix Companies, Inc., as amended June 5, 2003 (incorporated herein by reference to Exhibit 3.2 to The Phoenix Companies, Inc. Annual Report on Form 10-K filed March 11, 2005)
- 4.1 Amended and Restated Certificate of Incorporation and By-Laws of The Phoenix Companies, Inc. (incorporated herein by reference to Exhibits 3.1 and 3.2 hereto, respectively)
- 10.1 The Phoenix Companies, Inc. Stock Incentive Plan (incorporated herein by reference to Exhibit 10.2 to The Phoenix Companies, Inc. Registration Statement on Form S-1 (Registration No. 333-55268), filed February 9, 2001)
- 10.2 The Phoenix Companies, Inc. Stock Incentive Plan, as amended and restated to be effective as of January 1, 2009 (incorporated herein by reference to Exhibit 10.2 to The Phoenix Companies, Inc. Quarterly Report on Form 10-Q filed May 8, 2008)
- 10.3 Form of Incentive Stock Option Agreement under The Phoenix Companies, Inc. Stock Incentive Plan (incorporated herein by reference to Exhibit 10.3 to The Phoenix Companies, Inc. Annual Report on Form 10-K filed March 11, 2005)
