MEDICURE ANNOUNCES ANDA COLLABORATION WITH APICORE

WINNIPEG, CANADA – (January 6, 2016) Medicure Inc. ("**Medicure**" or the "**Company**") (TSXV:MPH, OTC:MCUJF), a specialty pharmaceutical company, is pleased to announce that the Company has initiated the development of a high-value cardiovascular generic drug. The project is a collaboration between Medicure International, Inc. (a wholly owned subsidiary of Medicure Inc.) and Apicore US LLC (together with its affiliates "**Apicore**"), a leading-edge manufacturer of generic active pharmaceutical ingredients ("**API's**").

The collaborative project is focused on the development of an intravenous abbreviated New Drug Application ("**ANDA**") drug product for an acute cardiovascular indication. Medicure and Apicore have entered into an exclusive product supply and development agreement under which Medicure holds all commercial rights. The companies anticipate filing the ANDA with the U.S. Food and Drug Administration by the end of 2016.

Medicure, through its affiliates, is a minority shareholder in Apicore and holds an option to acquire all of the issued shares of Apicore until July 2017, as previously announced on July 3, 2014.

About Apicore

Apicore is a leading process R&D and API manufacturing service provider for the worldwide pharmaceutical industry. Apicore offers a wide portfolio of services ranging from manufacture of API's for the generic industry to custom synthesis for early phase pharmaceutical research, and branded products. For more information, please visit Apicore online at www.apicore.com.

About Medicure Inc.

Medicure is a specialty pharmaceutical company focused on the development and commercialization of therapeutics for the U.S. hospital market. The primary focus of the Company and its subsidiaries is the marketing and distribution of AGGRASTAT (tirofiban HCl) for non-ST elevation acute coronary syndrome in the United States, where it is sold through the Company's U.S. subsidiary, Medicure Pharma, Inc. For more information on Medicure please visit www.medicure.com.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Forward Looking Information: Statements contained in this press release that are not statements of historical fact, including, without limitation, statements containing the words “believes”, “may”, “plans”, “will”, “estimates”, “continues”, “anticipates”, “intends”, “expects” and similar expressions, may constitute “forward-looking information” within the meaning of applicable Canadian and U.S. federal securities laws (such forward-looking information and forward-looking statements are hereinafter collectively referred to as “forward-looking statements”). Forward-looking statements, including the successful development of a generic drug and the filing of an ANDA with the US FDA, are based on the current assumptions, estimates, analysis and opinions of management of the Company made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors which the Company believes to be relevant and reasonable in the circumstances. Inherent in forward-looking statements are known and unknown risks, uncertainties and other factors beyond the Company's ability to predict or control that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements, and as such, readers are cautioned not to place undue reliance on forward-looking statements. Such risk factors include, among others, the Company's future product revenues, stage of development, additional capital requirements, risks associated with the completion and timing of clinical trials and obtaining regulatory approval to market the Company's products, the ability to protect its intellectual property, dependence upon collaborative partners, changes in government regulation or regulatory approval processes, and rapid technological change in the industry. Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, assumptions about: general business and economic conditions; the impact of changes in Canadian-US dollar and other foreign exchange rates on the Company's revenues, costs and results; the timing of the receipt of regulatory and governmental approvals for the Company's research and development projects; the availability of financing for the Company's commercial operations and/or research and development projects, or the availability of financing on reasonable terms; results of current and future clinical trials; the uncertainties associated with the acceptance and demand for new products and market competition. The foregoing list of important factors and assumptions is not exhaustive. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of factors, other than as may be required by applicable legislation. Additional discussion regarding the risks and uncertainties relating to the Company and its business can be found in the Company's other filings with the applicable Canadian securities regulatory authorities or the US Securities and Exchange Commission, and in the “Risk Factors” section of its Form 20F for the seven months ended December 31, 2014.
