Explanatory Note to Form 10KSB Amendment 1:

The Company has restated its December 31, 2004 consolidated financial statements to reflect the beneficial conversion feature associated with the convertible note payable discussed in Note 4 to the accompanying consolidated financial statements. The beneficial conversion, totaling \$127,379 (\$29,718 in 2004 and \$97,661 in 2003), has been recognized as interest expense with a corresponding increase to additional paid-in capital in the accompanying consolidated financial statements.

Note 8 to the accompanying consolidated financial statements sets forth the effects of the restatement discussed above. Amounts reflected in the note as "As Previously Reported" represent those amounts included in the Company's initial Annual Report on Form 10-KSB for the year ended December 31, 2004.

The revisions, consisting of the non-cash beneficial conversion discussed above, had no impact on the Company's total shareholders' deficit. Nevertheless, management considered it necessary to immediately restate the 2004 consolidated financial statements for transparency. The note holder did not take advantage of the imbedded beneficial conversion feature as of December 31, 2004.

Changes to our original Form 10KSB by this amendment are limited to those revisions related to the beneficial conversion expense discussed above. No other changes or updated disclosures have been made or are implied in this amended report. This amended discusses the state of the company as of the date of the original filing of Form 10KSB for the year ended December 31, 2004.

Forward-Looking Statements

Certain statements concerning the Company's plans and intentions included herein may constitute forward-looking statements for purposes of the Securities Litigation Reform Act of 1995 for which the Company claims a safe harbor under that Act. There are a number of factors that may affect the future results of the Company, including, but not limited to, (a) the ability of the Company to obtain additional funding for operations, (b) the continued availability of management to develop the business plan and (c) successful development and market acceptance of the Company's products.

This annual report may contain both historical facts and forward-looking statements. Any forward-looking statements involve risks and uncertainties, including, but not limited to, those mentioned above. Moreover, future revenue and margin trends cannot be reliably predicted.

General

WordLogic Corporation (formerly The American West.com, Inc.) began operations in the Spring of 1999. The company was an Internet based company whose primary business was to facilitate business-to-business and business-to-consumer sales and person-to-person (auction) trading of clothing, furnishings, accessories, art, memorabilia, travel/entertainment packages, and all other goods and services with an American Old West theme.

Pursuant to an Agreement and Plan of Merger dated as of March 11, 2003; the company entered into such agreement to merge with and acquire the assets of WordLogic Corporation, a Delaware corporation. In anticipation of closing of the Agreement and Plan of Merger, the company changed its name from "The American West.com, Inc." to "WordLogic Corporation" and changed the symbol under which the company's common stock trades on the Over-The-Counter Bulletin Board. The closing of the Agreement occurred on May 27, 2003.

The Company has one wholly-owned subsidiary, 602531 British Columbia that was incorporated under the laws of British Columbia on March 2, 2000. This subsidiary holds WordLogic Corporation's intellectual property including its patents and trademarks.

The Company has authorized 100,000,000 shares of common stock, par value \$.001 At December 31, 2004 21,951,663 shares of common stock were issued and outstanding.

Our common stock trades on the Over-the-Counter Bulletin Board under the OTCBB symbol "WLGC".

The Company has a December 31st fiscal year end.

Description of Business

WordLogic Corporation is a technology company that delivers predictive interface solutions for computing devices ranging from small hand-held devices to conventional desktop computers. Incorporated in the United States, the company's research, testing and marketing facilities are located in Vancouver, British Columbia, Canada.

WordLogic Corporation's principal activity is to research, develop, market, license and sell intellectual property including the WordLogic™ Predictive Keyboard. The company currently holds one patent for "Data Entry for Personal Computing Devices" and has five additional pending patents.

The WordLogic Predictive Keyboard software makes text and data entry fast, efficient and simple. Innovative in design and featuring high-speed text prediction, the software was originally designed for computing and communication devices with limited screen dimensions ranging from small hand-held devices such as PDAs and SmartPhones to larger in-vehicle or mounted touch screen devices.

The desktop version of the WordLogic software provides an on-screen, software-based keyboard that, with a single keystroke, begins predicting the next most common letter, words and with WordChunking™, automatically completes words and phrases. It is currently available in two languages, English and Dutch. The software will be available in French, German, Spanish, Italian, and Portuguese in the near future. The software is compatible with any device operating on the PC platform.

The WordLogic™ Predictive Keyboard has the ability to learn and adapt to a user's vocabulary, which makes information entry more efficient each time it is used. Its patented word prediction and WordChunking™ technology allows for fast and accurate word completion especially for long or complex words and phrases.

How the Software Works

When a user types the first letter of a word, an on-screen keyboard highlights the next five most common letters as well as the most frequently used words beginning with the entered letters. As the user continues to type, the selection of words is narrowed down, providing the most likely word as selectable options in the prediction window.

PC.

The desired word can then be selected by either using the mouse or keyboard. By simply holding down any letter – for example, the next letter to be typed -- or just by holding down the spacebar – the user activates the prediction window, and can select desired words using the arrow keys. This ability to hold a letter down while using other keys simultaneously is unique to the WordLogic software, and does not restrict key commands for other software applications running on the

Once comfortable with the WordLogic Predictive Keyboard, a user has the option to display only the predicted words, or completely hide the prediction window, providing an unobstructed view of the applications with already unrestricted use of the keys. At any time, a user can invoke the prediction window by simply holding down a letter or the spacebar.

The WordLogic Predictive Keyboard "intuitively" detects new words and allows them to be added on the fly to a

user's personal dictionary. A similar functionality is offered for phrases through use of Control-C.

Marketing Plan

The Company presently markets its Desktop software online. In addition, the Company markets its PDA software in seven languages to consumers using online commerce engines such as handango.com and pocketgear.com. The company intends to license its technology to OEMs and other software developers in return for a royalty based on the number of units sold and will continue to market its product to end users via the Web and direct marketing programs. There are also numerous vertical market opportunities for the company in terms of industry-specific applications. For example the learning disabled market, customized dictionaries and the use of the WordLogic technology by other software developers.

The Company also intends to generate royalty income from the licensing and sale of its intellectual property including the WordLogic™ Predictive Keyboard and its patent portfolio.

2004 Business Activities

On March 4, 2004, the Company's first Patent was granted. As its patent portfolio of five additional patents becomes crystallized, the Company will claim royalty rights from any software applications, operating systems or handheld wireless devices that infringe upon existing or future patents. These patents will provide the foundation for Company's expandable technology and are expected provide broad coverage and a commercial pathway to increase revenue streams through the enforcement of intellectual property rights.

The Company released version 4.1 of its PDA software in March 2004.

On July 23, 2004 the Company reached a settlement agreement with Hewlett Packard Company regarding a copyright infringement claim, as well as related claims, filed by the Company against Hewlett Packard Company in the United States District Court. The Company realized a net gain on the settlement totaling \$1,600,000

During the year ended December 31, 2004 the Company commenced with the development of a desktop version of its Predictive Keyboard™. On February 15, 2005 the company announced the availability of a preview version of Predictive Keyboard™ for Desktop PCs and on March 31, 2005 the Company commercially released the new software via download on its website and also on a USB Flash Drive through its e-commerce engine.

On November 16, 2004, the Company announced the appointment of Dr. David Stirling as Vice President of Business Development for the newly-created Educational Division. Prior to joining WordLogic, Dr. Stirling was Principal of Kyuquot Elementary Secondary School and Director of the Houpsitas Adult Learning Center in Kyuquot, British Columbia. Throughout his career, Dr Stirling has been developing individual education programs for students with learning difficulties. Dr. Stirling has utilized the WordLogic Predictive Keyboard™ with his students and has discovered that is a powerful tool in enabling individuals to communicate effectively.

There have been no disagreements between the Company and its independent accountants on any matter of accounting principles or practices or financial statement disclosure.

Submission of Matters to a Vote of Security Holders

WordLogic Corporation conducted an Annual Meeting of Shareholders on June 17, 2004; for the purpose of considering and acting upon the following:

1. The election of two (2) directors to the Board of Directors,
2. Approval of Independent Public Accountant, and
3. Approval to increase the number of authorized common shares of the corporation.

All matters were voted on and passed at the Annual Meeting of Shareholders.

Final voting results were reported in WordLogic Corporation's Quarterly Report on Form 10-QSB for the period ending June 30, 2004; as filed with the Securities and Exchange Commission on August 13, 2004.

Compliance with Section 16(a) of the Exchange Act

Section 16(a) of the Securities Exchange Act of 1934 requires the company's directors and officers, and persons who own more than ten-percent (10%) of the company's common stock, to file with the Securities and Exchange Commission reports of ownership on Form 3 and reports of change in ownership on Forms 4 and 5. Such officers, directors and ten-percent stockholders are also required to furnish the company with copies of all Section 16(a) reports they file. Based solely on its review of the copies of such forms received by the company and on written representations from certain reporting persons, the company believes that all Section 16(a) reports applicable to its officers, directors and ten-percent stockholders with respect to the fiscal year ended December 31, 2004 were filed.

Additional Information

Reports on Form 8-K

On February 16, 2005, WordLogic Corporation filed a Report on Form 8-K disclosing Other Events – Press Release; announcing a preview version of Predictive Keyboard™ for Desktop PCs.

On January 26, 2005, WordLogic Corporation filed a Report on Form 8-K disclosing Other Events – Press Release; announcing details as pertaining to a new patent application.

On July 26, 2004, WordLogic Corporation filed a Report on Form 8-K disclosing Other Events – Press Release; announcing a settlement regarding WordLogic's alleged copyright infringement suit against Hewlett-Packard.

Legal Proceedings

In March 2002, Hewlett-Packard Company ("HP") was granted a license to distribute a trial version of the WordLogic Predictive Keyboard. In December 2002, the Company filed a Copyright infringement claim, as well as related claims under California State law, against HP in the United States District Court for the Northern District of California, San Jose Division.

The case was scheduled for trial in October 2004. Although HP continued to deny liability, on July 22, 2004, the parties signed a settlement agreement whereby HP agreed to pay the Company \$2 million in exchange for the Company agreeing to release its claims and dismiss the lawsuit. The settlement has now been completed. The Company's attorneys retained \$400,000 out the settlement as payment for fees and costs related to the case, and the remainder has been paid to the Company. The net gain on the settlement, totaling \$1,600,000, is included in the accompanying condensed statements of operations as an extraordinary gain.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
WordLogic Corporation:

We have audited the accompanying consolidated balance sheet of WordLogic Corporation and its subsidiary (a development stage company) as of December 31, 2004, and the related consolidated statements of operations, changes in shareholders' deficit, and cash flows for the years ended December 31, 2004 and 2003. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of WordLogic Corporation and its subsidiary as of December 31, 2004, and the results of their operations and their cash flows for the years ended December 31, 2004 and 2003 in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has suffered significant operating losses since inception and has a net capital deficit at December 31, 2004, which raises a substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As described in Note 8 to the consolidated financial statements, the Company has restated its consolidated balance sheet as of December 31, 2004 and its consolidated statements of operations, changes in shareholders' deficit and cash flows for the year ended December 31, 2004 because of the subsequent discovery by management of the beneficial conversion feature discussed in Note 4.

Notes to Consolidated Financial Statements

(1) Summary of Significant Accounting Policies***Organization and Basis of Presentation***

WordLogic Corporation (the “Company” or “WLC”), formerly TheAmericanWest.com, Inc., was incorporated under the laws of the State of Nevada on March 30, 1999. The Company’s primary business is the development and commercialization of data entry software for handheld computing devices.

Reverse Merger

On March 11, 2003, WLC entered into an Agreement and Plan of Merger (the “Agreement”) with WordLogic Corporation-private company (“WCPC”), a British Columbia, Canada corporation. On May 27, 2003, WLC issued 19,016,657 shares of its common stock in exchange for all 19,016,657 outstanding common shares of WCPC, and the two companies merged. This merger has been treated as a recapitalization of WCPC, with WLC the legal surviving entity. Since WLC had, prior to the recapitalization, minimal assets and no operations, the recapitalization has been accounted for as the sale of 2,907,006 shares of WCPC’s common stock for the net assets of WLC. Following the closing, WLC remained the surviving corporation with 21,923,663 common shares outstanding, of which the former shareholders of WCPC own approximately 86.74 percent.

In connection with the closing of the Agreement, WLC changed its name to “WordLogic Corporation” (formerly TheAmericanWest.com, Inc.) and changed its OTCBB symbol under which its common stock trades on the Over-The-Counter Bulletin Board to “WLGC”. WLC’s directors resigned their positions and the executive officers of WCPC were appointed to fill the vacancies created by the resignations, which resulted in a change in control.

Going concern

Inherent in the Company’s business are various risks and uncertainties, including its limited sources of operating capital and historical operating losses. The Company’s continuation as a going concern is dependent upon its ability to generate sufficient cash flow to meet its obligations on a timely basis and ultimately to attain profitability. The Company’s management intends to satisfy cash requirements through cash infusions from officers and affiliates in exchange for debt and/or common stock. There is no assurance the cash infusions will continue in the future or that the Company will achieve profitable operations. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

The Company’s future success will be dependent upon its ability to create and provide effective and competitive software products that meet customers changing requirements; including the effective use of leading technologies to continue to enhance its current products and to influence and respond to emerging industry standards and other technological changes on a timely and cost-effective basis.

Development Stage

Following its reverse merger on May 27, 2003, the Company entered the development stage and became a development stage enterprise in accordance with Statement of Financial Accounting Standard (“SFAS”) No. 7, *Accounting and Reporting by Development Stage Enterprises*. The \$461,694 income recognized by the Company from May 27, 2003 through December 31, 2004, which includes the extraordinary gain of \$1,600,000 is included in the accompanying consolidated financial statements as “equity accumulated during development stage”.

Basis of Consolidation

The consolidated financial statements include the accounts of WordLogic Corporation and its wholly owned subsidiary 602531 British Columbia Ltd., an entity incorporated under the laws of the Province of British Columbia, Canada. All significant intercompany balances and transactions have been eliminated in consolidation.

Notes to Consolidated Financial Statements

Use of Estimates

The preparation of the consolidated financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassification

Certain balances for the year ended December 31, 2003, have been reclassified to conform with the current year presentation with no effect on net income.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with original maturities of three months or less when acquired, to be cash equivalents. The Company had no cash equivalents at December 31, 2004.

Receivables

The Company considers its receivables to be fully collectible; accordingly, no allowance for doubtful accounts is required.

Functional Currency

The Company's functional currency is the Canadian dollar; however, the accompanying consolidated financial statements and footnotes refer to United States ("U.S.") dollars unless Canadian dollars are specifically designated with "CDN".

Property, Equipment and Depreciation

Property and equipment are stated at cost and are depreciated over their estimated useful lives as follows:

Asset	Method	Rate
Computer equipment	Straight-line	33.3%
Computer software	Straight-line	100.0%
Furniture and fixtures	Declining balance	20.0%
Other equipment	Declining balance	20.0%

Depreciation is recorded at one-half of the normal rate in the year of acquisition.

Upon retirement or disposition of equipment, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in operations. Repairs and maintenance are charged to expense as incurred and expenditures for additions and improvements are capitalized.

Impairment of Long-Lived Assets

The Company evaluates the carrying value of its long-lived assets under the provisions of SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. Statement No. 144 requires impairment losses to be recorded on long-lived assets used in operations when indicators of impairment are present and the undiscounted future cash flows estimated to be generated by those assets are less than the assets' carrying amount. If such assets are impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying value or fair value, less costs to sell.

Notes to Consolidated Financial Statements

Software Development Costs

Software development costs are recorded in accordance with Statement on Financial Accounting Standards (“SFAS”) Statement No. 86, “Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed”. Costs incurred to establish the technological feasibility of computer software to be sold, leased, or otherwise marketed are expensed as incurred to research and development costs. Once technological feasibility is established, the cost of producing product masters for the software is capitalized. Capitalization of the software development costs ceases and amortization of the capitalized costs commences when the product is available for general release to customers. Capitalized costs are amortized based on the greater of (a) the ratio of current gross revenues to the total current and anticipated future gross revenues, or (b) the straight-line method over the remaining estimated economic life of the product.

Research and Development

Expenditures relating to the development of new products and processes, including significant improvements to existing products, are expensed as incurred.

Income Taxes

The Company accounts for income taxes under the provisions of SFAS No. 109, *Accounting for Income Taxes* (SFAS 109). SFAS 109 requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the consolidated financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

Revenue Recognition

The Company’s revenue is earned through one royalty-based contract to utilize the Company’s hand-held data entry software. The contract runs for a period of twelve months and automatically renews for successive twelve month periods unless either party notifies the other party of its election not to renew at least 60 days prior to the end of the term. Royalty revenues are earned based on the number of products sold containing the Company’s hand-held data entry software.

Revenue is recognized after it has been earned, collection is probable, and the value has been determined under the terms of the royalty contract.

Financial Instruments

The Company’s financial instruments, including cash, accounts receivable, and accounts payable and other liabilities are carried at cost, which approximates their fair value due to the short-term maturity of these instruments. The debt obligations are carried at cost, which approximates fair value due to the prevailing market rate for similar instruments.

Foreign Currency Translation

The accounts of the Company’s foreign operations have been translated into United States dollars. Assets and liabilities of those operations are translated in U.S. dollars using exchange rates as of the balance sheet date; income and expenses are translated using the weighted average exchange rates for the reporting period. Translation adjustments are deferred in accumulated other comprehensive income (loss), a separate component of shareholders’ equity.

Notes to Consolidated Financial Statements

Stock-based Compensation

The Company accounts for stock-based employee compensation arrangements in accordance with Accounting Principles Board (“APB”) Opinion 25, “Accounting for Stock Issued to Employees” and complies with the disclosure provisions of SFAS No. 123, “Accounting for Stock-Based Compensation.” Under APB No. 25, compensation expense is recorded under the intrinsic value method and is based on the difference, if any, on the date of grant, between the fair value of the Company’s stock and the exercise price. The Company accounts for stock issued to non-employees in accordance with the provisions of SFAS No. 123. SFAS 123 requires the fair value based method of accounting for stock issued to non-employees in exchange for services.

Companies that elect to use the method provided in APB 25 are required to disclose pro forma net income and pro forma earnings per share information that would have resulted from the use of the fair value based method. The Company has elected to continue to determine the value of stock-based compensation arrangements under the provisions of APB 25. Pro forma disclosures have been included in Note 5.

Earnings (loss) per share

The Company computes net income per share in accordance with Statement of Financial Accounting Standards No. 128 “Earnings Per Share.” Under the provisions of SFAS No. 128, basic net income per share is computed by dividing the net income available to common shareholders for the period by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing the net income available to common shareholders for the period by the weighted average number of common and common equivalent shares outstanding during the period. Common equivalent shares, consisting of common shares issuable upon the exercise of stock options are included in diluted net income per share to the extent such shares are dilutive.

(2) Related Party Transactions

As of December 31, 2003, the Company owed an affiliate \$45,788 for working capital advances. During the year ended December 31, 2004, the affiliate advanced an additional \$69,388 to the Company. The Company repaid the balance of \$115,176 during the year.

The Company rents office space from an affiliate on a month-to-month basis. Monthly lease payments vary based on the amount of office space utilized by the Company. Office rent incurred by the Company totaled \$72,908 and \$65,773 during the years ended December 31, 2004 and 2003, respectively.

As of December 31, 2003, the Company had notes payable due to an affiliate and a principal shareholder in the amount of \$294,773. During the year ended December 31, 2004, the affiliate advanced the Company an additional \$163,844. The Company repaid the principal balance of \$458,617 and related interest of \$107,864. Interest on the notes commenced on October 1, 2001 at rates ranging from ten to fifteen percent. Interest expense totaled \$19,763 and \$27,008 for the years ended December 31, 2004 and 2003, respectively. At December 31, 2004, the Company had \$-0- notes payable due to related parties.

Notes to Consolidated Financial Statements

(3) Property and Equipment

Property and equipment consisted of the following at December 31, 2004:

Office equipment.....	\$	2,444
Computer equipment.....		89,319
Computer software.....		2,280
Furniture and fixtures.....		9,659
		<u>103,702</u>
Less accumulated depreciation.....		<u>(75,202)</u>
	\$	<u><u>28,500</u></u>

Depreciation expense totaled \$11,416 and \$12,057 for the years ended December 31, 2004 and 2003, respectively.

(4) Convertible Note Payable

At December 31, 2003, the Company had a convertible promissory note outstanding in the amount of \$582,616. During the year ended December 31, 2004, the Company received additional proceeds of \$299,852 and repaid \$216,525 of the principal balance and \$60,205 of accrued interest. The note has a face value of up to \$1,000,000 which carries an eight percent interest rate and matures on March 31, 2006. Principal and accrued interest are payable in any combination of cash and common stock of the Company at the option of the lender. The Company can repay principal and interest with common stock at a rate of 85 percent of the stock's market value on the date of advance. As of December 31, 2004, the convertible promissory note has an outstanding principal balance of \$665,943 and accrued interest of \$15,154 reflected on the accompanying consolidated financial statement. Interest expense during the year ended December 31, 2004 totaled \$57,130.

The intrinsic value of the imbedded beneficial conversion feature related to the option for conversion into the Company's common stock totaled \$29,718 and \$97,661 for the years ended December 31, 2004 and 2003, respectively. The beneficial conversion is recognized as interest expense with a corresponding increase to additional paid-in capital in the accompanying consolidated financial statements.

The consolidated financial statements have been adjusted because management discovered an error in the consolidated financial statements included in the December 31, 2004 Form 10-KSB. The error, consisting of the non-cash beneficial conversion discussed above, had no impact on the Company's total shareholders' deficit. Nevertheless, management considered it necessary to immediately restate the 2004 consolidated financial statements for transparency. The note holder did not take advantage of the imbedded beneficial conversion feature as of December 31, 2004.

(5) Shareholders' Deficit

Common Stock

During the years ended December 31, 2004 and 2003, the Company issued 71,600 and 4,066 restricted shares, respectively, of its common stock in exchange for consulting services and payables. The transactions were recorded based on the value of the services rendered. The Company recorded \$40,451 and \$1,138 as stock-based compensation for the years ended December 31, 2004 and 2003, respectively.

During the year ended December 31, 2004, the Company issued 16,400 shares of its common stock to unrelated third parties as payment for account payables related to consulting services. The shares issued in the transaction were valued based on the value of the services rendered. The Company's payables were reduced by \$7,004 as a result of the stock transaction.

Notes to Consolidated Financial Statements

During the years ended December 31, 2003, common stock option holders exercised options to purchase 210,773 shares of the Company's common stock. The Company received proceeds totaling \$12,276 for the exercised options.

Common Stock Options

A summary of changes in the number of stock options outstanding for the years ended December 31, 2004 and 2003 is as follows:

	Number of Shares	Weighted Average Exercise Price Per Share

Notes to Consolidated Financial Statements

Stock options - employees

During the year ended December 31, 2004, the Company granted 1,010,000 options to employees. The options carry exercise price of \$0.60 per share and expires through June 1, 2011. Options granted vest on a monthly interval and certain options vest immediately. The Company's common stock had a market value ranging from \$0.60 to \$1.50 per share on the date of grant. As a result, the Company recognized stock-based compensation totaling \$9,000 in accordance with APB 25. The weighted average exercise price and weighted average fair value of the options as of December 31, 2004 were \$0.60 and \$0.61, respectively.

During the year ended December 31, 2003, the Company granted 1,000,000 options to employees. The options carry exercise prices ranging from \$.30 to \$.57 per share and expire on April 1, 2008. The Company's common stock had a market value of \$.65 on the date of grant. As a result, the Company recognized stock-based compensation totaling \$188,000 in accordance with APB 25. The weighted average exercise price and weighted average fair value of the options as of December 31, 2003 were \$.46 and \$.23, respectively.

Pro forma information regarding net income and earnings per share is required by SFAS 123 as if the Company had accounted for the granted stock options under the fair value method of that Statement. The fair value for these options was estimated at the date of grant using the Black-Scholes option-pricing model with the following assumptions:

	2004	2003
Risk-free interest rate.....	1.01-2.03%	2.50%
Dividend yield.....	0.00%	0.00%
Volatility factor.....	90.14-99.90%	40.73%
Weighted average expected life.....	1-5 years	1 year

The Black-Scholes options valuation model was developed for use in estimating the fair value of traded options, which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its stock options. However, the Company has presented the pro forma net loss and pro forma basic and diluted loss per common share using the assumptions noted above.

	For the Years Ended December 31,	
	2004	2003
Net income (loss), as reported	\$ 934,608	\$ (838,809)
Pro forma net income (loss)	\$ 855,378	\$ (885,009)
Basic net income (loss) per common share, as reported	\$ 0.04	\$ (0.04)
Diluted net income (loss) per common share, as reported	\$ 0.04	\$ (0.04)
Pro forma basic net income (loss) per common share	\$ 0.04	\$ (0.04)
Pro forma diluted net income (loss) per common share	\$ 0.04	\$ (0.04)

Notes to Consolidated Financial Statements

Stock options - non-employees

During the year ended December 31, 2004, the Company granted a consultant options to purchase 100,000 shares of the Company's common stock. The options carry an exercise price of \$0.60 per share and vest on a monthly interval. The Company determined the fair value of the options at \$0.48 per share and recorded stock based compensation of \$1,344 in accordance with SFAS 123.

During the year ended December 31, 2003, the Company granted a consultant options to purchase 600,000 shares of the Company's common stock, of which 540,000 were cancelled prior to December 31, 2003. The options carry exercise prices ranging from \$.30 to \$.57 per share. The Company determined the fair value of the options at \$0.15 and \$0.36 per share and recorded stock based compensation of \$13,220, in accordance with SFAS 123.

(6) Litigation Settlement

In March 2002, Hewlett-Packard Company ("HP") was granted a license to distribute a trial version of the WordLogic Predictive Keyboard. In December 2002, the Company filed a Copyright infringement claim, as well as related claims under California State law, against HP in the United States District Court for the Northern District of California, San Jose Division.

The case was scheduled for trial in October 2004. Although HP continued to deny liability, on July 22, 2004, the parties signed a settlement agreement whereby HP agreed to pay the Company \$2 million in exchange for the Company agreeing to release its claims and dismiss the lawsuit. The settlement has now been completed. The Company's attorneys retained \$400,000 out the settlement as payment for fees and costs related to the case, and the remainder has been paid to the Company. The net gain on the settlement, totaling \$1,600,000, is included in the accompanying condensed statements of operations as an extraordinary gain.

(7) Income Taxes

A reconciliation of the U.S. statutory federal income tax rate to the effective tax rate is as follows:

	Years Ended December 31,	
	2004	2003
U.S. federal statutory graduated rate.....	34.00%	34.00%
Net operating loss for which tax benefit is currently available.....	-34.00%	-34.00%
	<u>0.00%</u>	<u>0.00%</u>

At December 31, 2004, the Company has a net operating loss carryforward for federal income tax purposes of approximately \$1,098,891, which was fully allowed for in the valuation allowance of \$1,098,891. The valuation allowance offsets the net deferred tax asset for which there is no assurance of recovery. The change in the valuation allowance for the years ended December 31, 2004 and 2003 was \$964,326 and \$251,990, respectively. Due to the uncertainty of the ultimate utilization of the net operating loss carryforward, no tax benefit for losses has been provided by the Company in the accompanying financial statements. The net operating loss carryforward will expire through the year 2023.

The valuation allowance will be evaluated at the end of each year, considering positive and negative evidence about whether the deferred tax asset will be realized. At that time, the allowance will either be increased or reduced; reduction could result in the complete elimination of the allowance if positive evidence indicates that the value of the deferred tax assets is no longer impaired and the allowance is no longer required.

Should the Company undergo an ownership change as defined in Section 382 of the Internal Revenue Code, the Company's tax net operating loss carryforwards generated prior to the ownership change will be subject to an annual limitation, which could reduce or defer the utilization of these losses.

Notes to Consolidated Financial Statements

(8) Restatement

The Company has restated its December 31, 2004 consolidated financial statements to reflect the beneficial conversion feature associated with the convertible note payable discussed in Note 4. The beneficial conversion, totaling \$127,379 (\$29,718 in 2004 and \$97,661 in 2003), has been recognized as interest expense with a corresponding increase to additional paid-in capital in the accompanying consolidated financial statements.

The following sets forth the effects of the restatement discussed above. Amounts reflected as “As Previously Reported” represent those amounts included in the Company’s initial Annual Report on Form 10-KSB for the year ended December 31, 2004.
