Item 2. Management's Discussion and Analysis of Financial Condition and Plan of Operations

This statement may include projections of future results and “forward looking statements” as that term is defined in Section 27A of the Securities Act of 1933 as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934 as amended (the “Exchange Act”). All statements that are included in this Quarterly Report, other than statements of historical fact, are forward looking statements. Although management believes that the expectations reflected in these forward looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct.

Financial Summary

Results of Operations for the Six-Months Ended June 30, 2007

The Company reports a net loss of \$840,446 for the six-month period ending June 30, 2007 versus a net loss of \$1,135,938 for the six-months ended June 30, 2006. For each six-month period, the net loss was primarily comprised of loss from operations; \$794,649 for the six-month period ending June 30, 2007 compared to \$1,112,889 for the six-month period ending June 30, 2006.

For the six-month period ending June 30, 2007, total revenues were \$2,673 compared to \$9,705 for the six-month period ending June 30, 2006. As the Company is a Development Stage Company its revenue streams are not established and are not impacted by economic or market trends.

Stock-based compensation for the six-month period ending June 30, 2007 was \$339,348 compared to \$593,064 for the six-month period ending June 30, 2006.

Selling, general and administrative expenses (net of stock-based compensation) were \$252,340 for the six-month period ending June 30, 2007 compared to \$300,920 for the six-month period ending June 30, 2006.

Research and development expenses were \$159,219 for the six-month period ending June 30, 2007 compared to \$182,128 for the six-month period ending June 30, 2006. This 12.6% decrease amounting to \$22,909 is mostly attributed to a continued reduction in costs from third-party contractors.

Rent for the two periods remained relatively consistent; \$46,415 for the six-month period ending June 30, 2007 compared to \$46,482 for the six-month period ending June 30, 2006.

Management Discussion and Plan of Operations

WordLogic Corporation is a technology company that delivers predictive interface solutions for computing devices ranging from small hand-held devices to conventional desktop computers. Incorporated in the United States, the company's research, testing and marketing facilities are located in Vancouver, British Columbia, Canada.

The Company has one wholly-owned subsidiary, 602531 British Columbia that was incorporated under the laws of British Columbia on March 2, 2000. This subsidiary holds WordLogic Corporation's intellectual property including its patents and trademarks.

Recent Business Activities

On January 9, 2007 the Company announced it had developed a new text entry/text messaging input solution for cell phones utilizing the WordLogic's patent pending prediction engine. This new solution for cell phones is more efficient, user friendly and provides a more compelling text entry interface for users than existing solutions. In addition, the functionality and configuration of the technology can be expanded and/or modified to suit a user's or manufacturers' specific needs.

On February 27, 2007 the Company retained Mr. Gordon Friesen to act as an advisor to access capital for the Company. Friesen was retained to provide WordLogic with access to an extensive database of investors, stock brokers, and money managers and will make introductions to potential funding sources for the Company's software development and patent-application activities. He will also coordinate WordLogic's presence in the investment community as well as professional sales support from his team of technology professionals.

On March 15, 2007 the Company entered into a worldwide non-exclusive license with Cre8txt Limited of Bolton, UK. Cre8txt has developed a keyboard utilizing the skills of people who already use SMS (Short Message Service) texting on mobile phones. Texting has become massively popular with today's youth, particularly in Europe, where SMS has been ahead of North America and Asia. Worldwide, young people have developed a language based on SMS text and some can actually type text faster using a numerical keyboard layout rather than using a traditional computer QWERTY keyboard. The Cre8txt keyboard is similar to a mobile phone keypad, and will utilize the WordLogic(TM) predictive text technology. The WordLogic Prediction Engine will predict text selected from a database of frequently used words, and will also be capable of translating SMS Text language into full text.

Plan of Operations

The Company's management has historically and continues to satisfy cash requirements through cash infusions from officers and affiliates in exchange for debt and/or common stock. No officer or affiliate has made any commitment or is obligated to continue to provide cash through loans or purchases of equity. There is no assurance the Company will achieve profitable operations.

A critical component of our operating plan impacting our continued existence is the ability to obtain additional capital through additional equity and/or debt financing. We do not anticipate enough positive internal operating cash flow until such time as we can generate substantial revenues, which may take the next few years to fully realize. In the event we cannot obtain the necessary capital to pursue our strategic plan, we may have to cease or significantly curtail our operations. This would materially impact our ability to continue operations.

Our near term cash requirements are anticipated to be offset through the receipt of funds from private placement offerings and loans obtained through private sources. Since inception, we have financed cash flow requirements through debt financing and issuance of common stock for cash and services. As we expand operational activities, we may continue to experience net negative cash flows from operations, pending receipt of servicing or licensing fees, and will be required to obtain additional financing to fund operations through common stock offerings and bank borrowings to the extent necessary to provide working capital.

WORDLOGIC CORPORATION
(A DEVELOPMENT STAGE COMPANY)

Our operating history makes predictions of future operating results difficult to ascertain. Our prospects must be considered in light of the risks, expenses and difficulties frequently encountered by companies in their early stage of development. Such risks include, but are not limited to, an evolving and unpredictable business model and the management of growth. To address these risks we must, among other things, obtain a customer base, implement and successfully execute our business and marketing strategy, continue to develop and upgrade technology and products, respond to competitive developments, and attract, retain and motivate qualified personnel. There can be no assurance that we will be successful in addressing such risks, and the failure to do so can have a material adverse effect on our business prospects, financial condition and results of operations.

Going Concern

Our continuation as a going concern is dependent upon our ability to generate sufficient cash flow to meet our obligations on a timely basis and ultimately to attain profitability. We have limited capital with which to pursue our business plan. There can be no assurance that our future operations will be significant and profitable, or that we will have sufficient resources to meet our objectives. We may pursue either the option of debt or equity financing or a combination of both in order to raise sufficient capital in order to meet our financial requirements and to fund our business plan. There is no assurance that we will be successful in raising additional funds.

Our future success will be dependent upon our ability to create and provide effective and competitive software products that meet customers changing requirements; including the effective use of leading technologies to continue to enhance its current products and to influence and respond to emerging industry standards and other technological changes on a timely and cost-effective basis.

Item 3. Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Based on this evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report. There were no changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting
