CUSIP No.

Pricing Date* November , 2023
Settlement Date* December , 2023
Maturity Date* December , 2024
*Subject to change based on the actual date the notes are priced for initial sale to the public (the "pricing date")

Market-Linked One Look Notes Linked to the VanEck® Gold Miners ETF

- Maturity of approximately one year
- If the Underlying Fund is flat or increases a return of [24.00% to 30.00%]
- 1-to-1 downside exposure to decreases in the Underlying Fund, with up to 100.00% of the principal amount at risk
- All payments are subject to the credit risk of HSBC Bank plc
- No interest payments
- In addition to the underwriting discount set forth below, the notes include a hedging-related charge of \$0.05 per unit. See "Supplement to the Plan of Distribution—Role of MLPF&S and BofAS"
- No listing on any securities exchange
- Any payment on the notes, including any repayment of principal, is not guaranteed by any third party and is subject to the risk of exercise of any UK bail-in power (as described on page TS-3 of this document) by a relevant UK resolution authority. If HSBC Bank plc were to default on its payment obligations or become subject to the exercise of any UK bail-in power (or any other resolution measure) by a relevant UK resolution authority, you might not receive all or part of any amounts owed to you under the notes. See "Consent to UK Bail-in Power" and "Risk Factors" in this document and "Risk Factors" in the accompanying prospectus supplement for more information

The notes are being issued by HSBC Bank plc ("HSBC"). Investing in the notes involves a number of risks. There are important differences between the notes and a conventional debt security, including different investment risks and costs. See "Risk Factors" and "Additional Risk Factors" beginning on page TS-7 of this term sheet and "Risk Factors" beginning on page PS-7 of product supplement EQUITY SUN-1.

The estimated initial value of the notes on the pricing date is expected to be between \$9.20 and \$9.70 per unit, which will be less than the public offering price listed below. The market value of the notes at any time will reflect many factors and cannot be predicted with accuracy. See "Summary" on page TS-2 and "Risk Factors" beginning on page TS-7 of this term sheet for additional information.

Notwithstanding and to the exclusion of any other term of the notes or any other agreements, arrangements or understandings between HSBC and any holder or beneficial owner of the notes, by acquiring the notes (or a beneficial interest therein), each holder and each beneficial owner of the notes acknowledges, accepts and agrees to be bound by, and consents to, the exercise of, any UK bail-in power (or any other resolution measure) by any relevant UK resolution authority in relation to the notes. See "Consent to UK Bail-in Power" on page TS-3 of this document.

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this document, the accompanying product supplement, prospectus or prospectus supplement. Any representation to the contrary is a criminal offense.

	Per Unit	Total
Public offering price ⁽¹⁾	\$ 10.00	\$
Underwriting discount ⁽¹⁾	\$ 0.15	\$
Proceeds, before expenses, to HSBC.....	\$ 9.85	\$

- (1) For any purchase of 300,000 units or more in a single transaction by an individual investor or in combined transactions with the investor's household in this offering, the public offering price and the underwriting discount will be \$9.95 per unit and \$0.10 per unit, respectively. See "Supplement to the Plan of Distribution" below.

The notes:

Are Not FDIC Insured	Are Not Covered by the UK Financial Services Compensation Scheme	May Lose Value
-----------------------------	---	-----------------------

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

Summary

The Market-Linked One Look Notes Linked to the VanEck® Gold Miners ETF, due December , 2024 (the “notes”) are our senior unsecured debt securities and are not a direct or indirect obligation of any third party. The notes are not deposit liabilities of HSBC and are not covered by the UK Financial Services Compensation Scheme or insured by the U.S. Federal Deposit Insurance Corporation or any other governmental agency or deposit insurance agency of the United States, the United Kingdom or any other jurisdiction. **The notes will rank equally with all of our other senior unsecured debt, except for such debt as may be preferred by operation of law. Any payments due on the notes, including any repayment of principal, are subject to the credit risk of HSBC and to the risk of exercise of any UK bail-in power (as described herein) (or any other resolution measure) by a relevant UK resolution authority.** The notes provide you with a Step Up Payment if the Ending Value of the Market Measure, which is the VanEck® Gold Miners ETF (the “Underlying Fund”), is equal to or greater than the Starting Value. If the Ending Value is less than the Starting Value, you will lose all or a portion of the principal amount of your notes. Any payments on the notes will be calculated based on the \$10 principal amount per unit and will depend on the performance of the Underlying Fund, subject to our credit risk. See “Terms of the Notes” below.

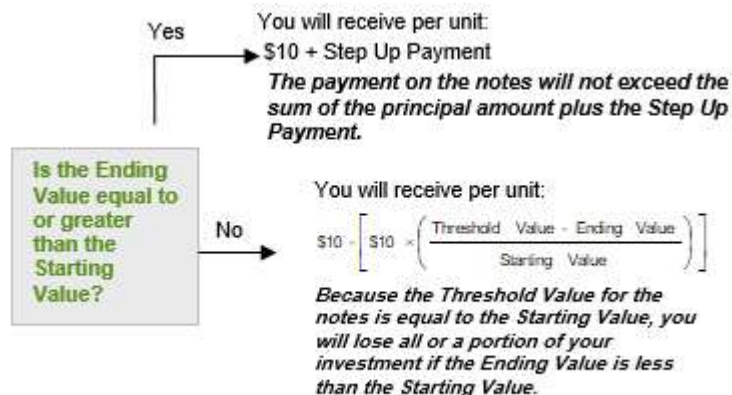

The estimated initial value of the notes will be less than the price you pay to purchase the notes. The estimated initial value is determined by reference to our internal pricing models and reflects our internal funding rate, which is the borrowing rate we pay to issue market-linked notes, and the market prices for hedging arrangements related to the notes (which may include call options, put options or other derivatives). This internal funding rate is typically lower than the rate we would use when we issue conventional fixed or floating rate debt securities. The difference in the borrowing rate, as well as the underwriting discount and the costs associated with hedging the notes, including the hedging related charge described below, will reduce the economic terms of the notes. The estimated initial value will be calculated on the pricing date and will be set forth in the pricing supplement to which this term sheet relates.

Terms of the Notes

Issuer:	HSBC Bank plc (“HSBC”)
Principal Amount:	\$10.00 per unit
Term:	Approximately one year
Market Measure:	The VanEck® Gold Miners ETF (Bloomberg symbol: “GDX”)
Starting Value:	The Closing Market Price of the Underlying Fund on the pricing date.
Ending Value:	The Closing Market Price of the Underlying Fund on the calculation day times the Price Multiplier on that day. The scheduled calculation day is subject to postponement in the event of Market Disruption Events, as described beginning on page PS-26 of product supplement EQUITY SUN-1.
Step Up Payment:	[\$2.40 to \$3.00] per unit, which represents a return of [24.00% to 30.00%] over the principal amount. The actual Step Up Payment will be determined on the pricing date.
Threshold Value:	100.00% of the Starting Value.
Calculation Day:	Approximately the fifth scheduled Market Measure Business Day immediately preceding the maturity date.
Price Multiplier:	1, subject to adjustment for certain corporate events relating to the Underlying Fund, as described beginning on page PS-28 of product supplement EQUITY SUN-1.
Fees Charged:	The public offering price of the notes includes the underwriting discount of \$0.15 per unit as listed on the cover page and an additional charge of \$0.05 per unit more fully described on page TS-14.
Calculation Agent:	BofA Securities, Inc. (“BofAS”) and HSBC, acting jointly.

Redemption Amount Determination

On the maturity date, you will receive a cash payment per unit determined as follows:

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

The terms and risks of the notes are contained in this term sheet and the documents listed below (together, the “Note Prospectus”). The documents have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated below or obtained from Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPF&S”) or BofAS by calling 1-800-294-1322:

- Product supplement EQUITY SUN-1 dated December 29, 2022:
https://www.sec.gov/Archives/edgar/data/1140465/000110465922130915/tm2233040d5_424b5.htm
- Prospectus supplement dated August 31, 2022:
https://www.sec.gov/Archives/edgar/data/1140465/000110465922096478/tm2223547d4_424b2.htm
- Prospectus dated August 31, 2022:
https://www.sec.gov/Archives/edgar/data/1140465/000110465922096461/tm2223384-4_424b3.htm

Our Central Index Key, or CIK, on the SEC website is 1140465. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. You should carefully consider, among other things, the matters set forth under “Risk Factors” in the section indicated on the cover of this term sheet. The notes involve risks not associated with conventional debt securities. Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement EQUITY SUN-1. Unless otherwise indicated or unless the context requires otherwise, all references in this document to “we,” “us,” “our,” or similar references are to HSBC.

Consent to UK Bail-in Power

Notwithstanding and to the exclusion of any other term of the notes or any other agreements, arrangements or understandings between us and any holder or beneficial owner of the notes, by acquiring the notes (or a beneficial interest therein), each holder and each beneficial owner of the notes acknowledges, accepts and agrees to be bound by, and consents to, the exercise of, any UK bail-in power (or any other resolution measure) by a relevant UK resolution authority.

Under the UK Banking Act 2009, as amended (the “Banking Act”), a relevant UK resolution authority may exercise a UK bail-in power in circumstances in which a relevant UK resolution authority is satisfied that the resolution conditions are met. These conditions include that a UK bank or investment firm is failing or is likely to fail to satisfy the Financial Services and Markets Act 2000 (as amended, the “FSMA”) threshold conditions for authorization to carry on certain regulated activities (within the meaning of section 55B FSMA).

The UK bail-in power includes any write-down, conversion, transfer, modification and/or suspension power, which allows for (i) the reduction or cancellation of all, or a portion, of the principal amount of, interest on, or any other amounts payable on, the notes; (ii) the conversion of all, or a portion, of the principal amount of, interest on, or any other amounts payable on, the notes into shares or other securities or other obligations of HSBC or another person (and the issue to, or conferral on, the holder or beneficial owner of the notes such shares, securities or obligations); (iii) the cancellation of the notes and/or (iv) the amendment or alteration of the maturity of the notes, or amendment of the amount of interest or any other amounts due on the notes, or the dates on which interest or any other amounts become payable, including by suspending payment for a temporary period; which UK bail-in power may be exercised by means of a variation of the terms of the notes solely to give effect to the exercise by a relevant UK resolution authority of such UK bail-in power. Each holder and each beneficial owner of the notes further acknowledges and agrees that the rights of holders and beneficial owners of the notes are subject to, and will be varied, if necessary, to give effect to, the exercise of any UK bail-in power by a relevant UK resolution authority.

For more information, please see “Risk Factors — Issuer-related Risks — You may lose some or all of your investment if any UK bail-in power (or any other resolution measure) is exercised by a relevant UK resolution authority” in this document, and “Description of Debt Securities — Agreement with Respect to the Exercise of UK Bail-in Power” in the accompanying prospectus and “Risk Factors — Risks Relating to All Note Issuances — Under the terms of your notes, you will agree to be bound by the exercise of any UK bail-in power by the relevant UK resolution authority,” “— The notes are the subject of the UK bail-in power, which may result in your notes being written down to zero or converted into other securities, including unlisted equity securities,” “—Your rights may be limited in respect of the exercise of the UK bail-in power by the relevant UK resolution authority,” “— Other powers contemplated by the Banking Act may affect your rights under, and the value of your investment in, the notes” and “— The circumstances under which the relevant UK resolution authority would exercise its UK bail-in power or other resolution tools under the Banking Act or future legislative or regulatory proposals are uncertain, which may affect the value of your notes” in the accompanying prospectus supplement.

The preceding discussion supersedes the discussion in the accompanying prospectus supplement to the extent it is inconsistent therewith.

Investor Considerations

You may wish to consider an investment in the notes if:

- You are a retail investor outside the EEA and the UK (each as defined below), or an institutional buyer (for restrictions on offers or sales to retail investors in the EEA and the UK, see “Supplement to the Plan of Distribution—Selling Restrictions” beginning on page TS-13 below.
- You anticipate that the Underlying Fund will not decrease from the Starting Value to the Ending Value.
- You accept that the return on the notes will be limited to the return represented by the Step Up Payment.
- You are willing to risk a loss of principal and return if the Underlying Fund decreases from the Starting Value to the Ending Value.
- You are willing to forgo the interest payments that are paid on traditional interest bearing debt securities.
- You are willing to forgo dividends or other benefits of owning the shares of the Underlying Fund or the securities held by the Underlying Fund.
- You are willing to accept that a secondary market is not expected to develop for the notes, and understand that the market prices for the notes, if any, may be less than the principal amount and will be affected by various factors, including our actual and perceived creditworthiness, our internal funding rate and the fees charged, as described on page TS-2.
- You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes.
- You are willing and able to consent to the exercise of any UK bail-in power (or any other resolution measure) by a relevant UK resolution authority.

The notes may not be an appropriate investment for you if:

- You are a retail investor in the EEA or the UK as described under “Supplement to the Plan of Distribution—Selling Restrictions” beginning on page TS-13 below.
- You believe that the Underlying Fund will decrease from the Starting Value to the Ending Value or that it will increase by more than the return represented by the Step Up Payment.
- You seek an uncapped return on your investment.
- You seek principal repayment or preservation of capital.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the shares of the Underlying Fund or the securities held by the Underlying Fund.
- You seek an investment for which there will be a liquid secondary market.
- You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.
- You are unwilling or unable to consent to the exercise of any UK bail-in power (or any other resolution measure) by a relevant UK resolution authority.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Hypothetical Payout Profile at Maturity

The graph below is based on **hypothetical** numbers and values.

Market-Linked One Look Notes

This graph reflects the returns on the notes, based on the Threshold Value of 100% of the Starting Value, a hypothetical Step Up Payment of \$2.70 per unit (the midpoint of the Step Up Payment range of [\$2.40 to \$3.00]). The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the Underlying Fund, excluding dividends.

This graph has been prepared for purposes of illustration only.

Hypothetical Payments at Maturity

The following table and examples are for purposes of illustration only. They are based on **hypothetical** values and show **hypothetical** returns on the notes. **The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Threshold Value, Ending Value and Step Up Payment, and whether you hold the notes to maturity.**

The following table is based on a Starting Value of 100, a Threshold Value of 100 and the Step Up Payment of \$2.70 per unit. It illustrates the effect of a range of Ending Values on the Redemption Amount per unit of the notes and the total rate of return to holders of the notes. The following examples do not take into account any tax consequences from investing in the notes.

Ending Value	Percentage Change from the Starting Value to the Ending Value	Redemption Amount per Unit	Total Rate of Return on the Notes
0.00	-100.00%	\$0.00	-100.00%
50.00	-50.00%	\$5.00	-50.00%
75.00	-25.00%	\$7.50	-25.00%
80.00	-20.00%	\$8.00	-20.00%
90.00	-10.00%	\$9.00	-10.00%
95.00	-5.00%	\$9.50	-5.00%
100.00 ⁽¹⁾⁽²⁾	0.00%	\$12.70 ⁽³⁾	27.00%
105.00	5.00%	\$12.70	27.00%
110.00	10.00%	\$12.70	27.00%
120.00	20.00%	\$12.70	27.00%
127.00	27.00%	\$12.70	27.00%
150.00	50.00%	\$12.70	27.00%
200.00	100.00%	\$12.70	27.00%

(1) This is the **hypothetical** Threshold Value.

(2) The **hypothetical** Starting Value of 100.00 used in these examples has been chosen for illustrative purposes only, and does not represent a likely actual Starting Value for the Underlying Fund.

(3) This amount represents the sum of the principal amount and the Step Up Payment of \$2.70.

For recent actual prices of the Underlying Fund, see "The Underlying Fund" section below. In addition, all payments on the notes are subject to issuer credit risk.

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

Redemption Amount Calculation Examples

Example 1

The Ending Value is 50.00, or 50.00% of the Starting Value:

Starting Value: 100.00

Threshold Value: 100.00

Ending Value: 50.00

$$\$10 - \left[\$10 \times \left(\frac{100 - 50}{100} \right) \right] = \$5.00 \quad \text{Redemption Amount per unit}$$

Example 2

The Ending Value is 110.00, or 110.00% of the Starting Value:

Starting Value: 100.00

Ending Value: 110.00

$$\$10.00 + \$2.70 = \$12.70 \quad \text{Redemption Amount per unit, the principal amount plus the Step Up Payment, since the Ending Value is equal to or greater than the Starting Value.}$$

Example 3

The Ending Value is 150.00, or 150.00% of the Starting Value:

Starting Value: 100.00

Ending Value: 150.00

$$\$10.00 + \$2.70 = \$12.70 \quad \text{Redemption Amount per unit, the principal amount plus the Step Up Payment, since the Ending Value is equal to or greater than the Starting Value.}$$

In this example, even though the Ending Value greater than the Starting Value by more than the return represented by the Step Up Payment, your return on the notes will be limited to the return represented by the Step Up Payment.

Risk Factors

We urge you to read the section “Risk Factors” in the product supplement and in the accompanying prospectus supplement. Investing in the notes is not equivalent to investing directly in the Underlying Fund or the securities held by the Underlying Fund. You should understand the risks of investing in the notes and should reach an investment decision only after careful consideration, with your advisers, with respect to the notes in light of your particular financial and other circumstances and the information set forth in this term sheet and the accompanying product supplement, prospectus supplement and prospectus.

In addition to the risks in the product supplement identified below, you should review “Risk Factors” in the accompanying prospectus supplement, including the explanation of risks relating to the notes described in the section “—Risks Relating to All Note Issuances.”

Structure-related Risks

- Depending on the performance of the Underlying Fund as measured shortly before the maturity date, you may lose up to 100% of the principal amount.
- Your return on the notes may be less than the yield you could earn by owning a conventional fixed or floating rate debt security of comparable maturity.
- Your investment return is limited to the return represented by the Step Up Payment and may be less than a comparable investment directly in the Underlying Fund or the securities held by the Underlying Fund.

Issuer-related Risks

- Payments on the notes are subject to our credit risk, and actual or perceived changes in our creditworthiness are expected to affect the value of the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.
- The notes are not insured or guaranteed by any governmental agency of the United Kingdom, the United States or any other jurisdiction.
- You may lose some or all of your investment if any UK bail-in power (or any other resolution measure) is exercised by a relevant UK resolution authority. See “Risk Factors—Structure-related Risks—You may lose some or all of your investment if any U.K. bail-in power (or any other resolution measure) is exercised by a relevant U.K. resolution authority” in product supplement EQUITY SUN-1.

Valuation- and Market-related Risks

- The estimated initial value of the notes will be less than the public offering price and may differ from the market value of the notes in the secondary market, if any. We will determine the estimated initial value by reference to our internal pricing models. These pricing models consider certain assumptions and variables, which can include volatility and interest rates. These pricing models rely in part on certain forecasts about future events, which may prove to be incorrect. Different pricing models and assumptions could provide valuations for the notes that are different from our estimated initial value. The estimated initial value will reflect our internal funding rate we use to issue market-linked notes, as well as the mid-market value of the hedging arrangements related to the notes (which may include call options, put options or other derivatives).
- Our internal funding rate for the issuance of these notes is lower than the rate we would use when we issue conventional fixed or floating rate debt securities. This is one of the factors that may result in the market value of the notes being less than their estimated initial value. As a result of the difference between our internal funding rate and the rate we would use when we issue conventional fixed or floating rate debt securities, the estimated initial value of the notes may be lower if it were based on the levels at which our fixed or floating rate debt securities trade in the secondary market. In addition, if we were to use the rate we use for our conventional fixed or floating rate debt issuances, we would expect the economic terms of the notes to be more favorable to you.
- The price of your notes in the secondary market, if any, immediately after the pricing date is expected to be less than the public offering price. The public offering price takes into account certain costs, principally the underwriting discount, the hedging costs described on page TS-14 and the costs associated with issuing the notes. The costs associated with issuing the notes will be used or retained by us or one of our affiliates. If you were to sell your notes in the secondary market, if any, the price you would receive for your notes may be less than the price you paid for them.
- The estimated initial value does not represent a minimum price at which we, MLPF&S, BofAS or any of our respective affiliates would be willing to purchase your notes in the secondary market (if any exists) at any time. The price of your notes in the secondary market, if any, at any time after issuance will vary based on many factors, including the price of the Underlying Fund and changes in market conditions, and cannot be predicted with accuracy. The notes are not designed to be short-term trading instruments, and you should, therefore, be able and willing to hold the notes to maturity. Any sale of the notes prior to maturity could result in a loss to you.
- A trading market is not expected to develop for the notes. None of us, MLPF&S or BofAS is obligated to make a market for, or to repurchase, the notes. There is no assurance that any party will be willing to purchase your notes at any price in any secondary market.

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

Conflict-related Risks

- Our business, hedging and trading activities, and those of MLPF&S, BofAS and our respective affiliates (including trades in shares of the Underlying Fund or the securities held by the Underlying Fund), and any hedging and trading activities we, MLPF&S, BofAS or our respective affiliates engage in for our clients' accounts, may affect the market value and return of the notes and may create conflicts of interest with you.
- There may be potential conflicts of interest involving the calculation agents, one of which is us and one of which is BofAS. We have the right to appoint and remove the calculation agents.

Market Measure-related Risks

- The sponsor and the investment advisor of the Underlying Fund or the sponsor of the Underlying Index may adjust the Underlying Fund or the Underlying Index in a way that could adversely affect the price of the Underlying Fund and consequently, the return on the notes, and they have no obligation to consider your interests.
- As a noteholder, you will have no rights of a holder of shares of the Underlying Fund or the securities held by the Underlying Fund, and you will not be entitled to receive securities, dividends or other distributions by the issuers of those securities.
- While we, MLPF&S, BofAS or our respective affiliates may from time to time own securities of companies included in the Underlying Fund, we, MLPF&S, BofAS and our respective affiliates do not control any company included in the Underlying Fund, and have not verified any disclosure made by any other company.
- There are liquidity and management risks associated with the Underlying Fund.
- The performance of the Underlying Fund may not correlate with the performance of its Underlying Index as well as the net asset value per share of the Underlying Fund, especially during periods of market volatility when the liquidity and the market price of shares of the Underlying Fund and/or the securities held by the Underlying Fund may be adversely affected, sometimes materially.
- The payments on the notes will not be adjusted for all corporate events that could affect the Underlying Fund. See "Description of the Notes—Anti-Dilution and Discontinuance Adjustments Relating to Underlying Funds" beginning on page PS-29 of product supplement EQUITY SUN-1.

Tax-related Risks

- The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See "Summary Tax Consequences" below and "U.S. Federal Income Tax Summary" beginning on page PS-40 of product supplement EQUITY SUN-1.

Additional Risk Factors

All of the securities held by the Underlying Fund are concentrated in one industry.

All of the securities held by the Underlying Fund are issued by companies in the gold and silver mining industry. As a result, the securities that will determine the performance of the notes are concentrated in one industry. Although an investment in the notes will not give holders any ownership or other direct interests in the securities held by the Underlying Fund, the return on an investment in the notes will be subject to certain risks similar to those associated with direct equity investments in the gold and silver mining industry. Accordingly, by investing in the notes, you will not benefit from the diversification which could result from an investment linked to companies that operate in multiple sectors.

A limited number of securities may affect the level of the Underlying Index, and the Underlying Index is not necessarily representative of the gold and silver mining industry.

As of October 26, 2023, the top two securities included in the Underlying Index constituted 18.16% of the total weight of the Underlying Index and the top six securities included in the Underlying Index constituted 44.43% of the total weight of the Underlying Index. Because the Underlying Fund attempts to track the performance of the Underlying Index, any reduction in the market price of those securities is likely to have a substantial adverse impact on the price of the Underlying Fund and the value of the notes.

While the securities included in the Underlying Index are common stocks, American Depositary Receipts ("ADRs") or global depositary receipts ("GDRs") of companies generally considered to be involved in various segments of the gold and silver mining industry, the securities included in the Underlying Index may not follow the price movements of the entire gold and silver mining industry generally. If the securities included in the Underlying Index (and, accordingly, the securities held by the Underlying Fund) decline in value, the Underlying Fund will decline in value even if security prices in the gold and silver mining industry generally increase in value.

The notes will be subject to small-capitalization or mid-capitalization companies risk.

The Underlying Fund may invest in companies that may be considered small-capitalization or mid-capitalization companies. These companies often have greater stock price volatility, lower trading volume and less liquidity than large-capitalization companies and therefore the Underlying Fund's share price may be more volatile than an investment in stocks issued by large-capitalization companies. Stock prices of small-capitalization or mid-capitalization companies are also more vulnerable than those of large-capitalization companies to adverse business and economic developments, and the stocks of small-capitalization or mid-capitalization companies may be thinly traded, making it difficult for the Underlying Fund to buy and sell them. In addition, small-capitalization or mid-

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

capitalization companies are typically less stable financially than large-capitalization companies and may depend on a small number of key personnel, making them more vulnerable to loss of personnel. Small-capitalization or mid-capitalization companies are often subject to less analyst coverage and may be in early, and less predictable, periods of their corporate existences. Such companies tend to have smaller revenues, less diverse product lines, smaller shares of their product or service markets, fewer financial resources and less competitive strengths than large-capitalization companies and are more susceptible to adverse developments related to their products. These factors could adversely affect the price of the Underlying Fund during the term of the notes, which may adversely affect the value of your notes.

There is no direct correlation between the value of the notes or the price of the Underlying Fund, on the one hand, and gold and silver prices, on the other hand.

Although the price of gold or silver is one factor that may influence the performance of the securities held by the Underlying Fund, the notes are not linked to the gold or silver spot prices or to gold or silver futures. There is no direct linkage between the price of the Underlying Fund and the prices of gold and silver. While gold and silver prices may be one factor that could affect the prices of the securities included in the Underlying Index and, consequently, the price of the Underlying Fund and the amount payable on the notes are not directly linked to the movement of gold and silver prices and may be affected by factors unrelated to those movements. Investing in the notes is not the same as investing in gold or silver, and you should not invest in the notes if you wish to invest in a product that is linked directly to the price of gold or silver.

NYSE Arca, Inc. ("NYSE Arca"), the sponsor and compiler of the Underlying Index, retains significant control and discretionary decision-making over the Underlying Index and is responsible for decisions regarding the interpretation of and amendments to the Underlying Index rules, which may have an adverse effect on the price of the Underlying Fund, the market value of the notes and the amount payable on the notes.

NYSE Arca is the compiler of the Underlying Index and, as such, is responsible for the day-to-day management of the Underlying Index and for decisions regarding the interpretation of the rules governing the Underlying Index. NYSE Arca has the discretion to make operational adjustments to the Underlying Index and to the Underlying Index components, including discretion to exclude companies that otherwise meet the minimum criteria for inclusion in the Underlying Index. In addition, NYSE Arca retains the power to supplement, amend in whole or in part, revise or withdraw the Underlying Index rules at any time, any of which may lead to changes in the way the Underlying Index is compiled or calculated or adversely affect the Underlying Index in another way. Any of these adjustments to the Underlying Index or the Underlying Index rules may adversely affect the composition of the Underlying Index, the price of the Underlying Fund, the market value of the notes and the amount payable on the notes. The Underlying Index sponsor has no obligation to take the needs of any buyer, seller or holder of the notes into consideration at any time.

The performance of the Underlying Fund may be influenced by gold and silver prices.

To the extent the price of gold or silver has a limited effect, if any, on the prices of the securities held by the Underlying Fund, gold prices and silver prices are subject to volatile price movements over short periods of time, represent trading in commodities markets, which are substantially different from equities markets, and are affected by numerous factors. These include economic factors, including the structure of and confidence in the global monetary system, expectations of the future rate of inflation, the relative strength of, and confidence in, the U.S. dollar (the currency in which the prices of gold and silver are generally quoted), interest rates and gold and silver borrowing and lending rates, and global or regional economic, financial, political, regulatory, judicial, or other events.

Gold prices and silver prices may also be affected by industry factors such as industrial and jewellery demand, lending, sales and purchases of gold and silver by the official sector, including central banks and other governmental agencies and multilateral institutions which hold gold and silver, levels of gold and silver production and production costs, and short-term changes in supply and demand because of trading activities in the gold and silver markets. It is not possible to predict the aggregate effects of all or any combination of these factors. Any negative developments with respect to these factors may have an adverse effect on gold and silver prices and, as a result, on the prices of the securities held by the Underlying Fund and the price of the Underlying Fund.

The Underlying Fund

All disclosures contained in this term sheet regarding the Underlying Fund and the Underlying Index, including, without limitation, their make-up, method of their calculation, and changes in their components, have been derived from publicly available sources, which we have not independently verified. The information reflects the policies of, and is subject to change by, Van Eck Associates Corporation, which is the investment advisor of the Underlying Fund. The consequences of any discontinuance of the Underlying Fund or the Underlying Index are discussed in the section entitled “Description of the Notes—Anti-Dilution and Discontinuance Adjustments Relating to Underlying Funds—Discontinuance of or Material Change to an Underlying Fund” beginning on page PS-32 of product supplement EQUITY SUN-1. None of us, the calculation agents, MLPF&S or BofAS accepts any responsibility for the calculation, maintenance or publication of the Underlying Fund, the Underlying Index or any successor fund or index.

The VanEck® Gold Miners ETF

The VanEck® Gold Miners ETF (the “GDX”) is an investment portfolio maintained and managed by VanEck ETF Trust (the “VanEck Trust”). Van Eck Associates Corporation (“Van Eck”) is the investment adviser to the Underlying Fund. Prior to September 1, 2021, the VanEck® Gold Miners ETF’s name was the VanEck Vectors® Gold Miners ETF. The Underlying Fund is an exchange-traded fund that trades on the NYSE Arca under the ticker symbol “GDX.”

Information provided to or filed with the SEC by the VanEck ETF Trust pursuant to the Securities Act of 1933 and the Investment Company Act of 1940 can be located by reference to SEC file numbers 333-123257 and 811-10325, respectively, through the SEC’s website at <http://www.sec.gov>.

Investment Objective and Strategy

The Underlying Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the NYSE® Arca Gold Miners Index® (the “Underlying Index”). The Underlying Index, calculated by NYSE Arca, is a modified market capitalization-weighted index consisting of common stocks and depositary receipts of publicly traded companies involved primarily in mining for gold and silver.

The Underlying Fund normally invests at least 80% of its total assets in common stocks and depositary receipts of companies involved in the gold and silver mining industry which may include small- and medium-capitalization companies and foreign issuers. The weight of companies more significantly exposed to silver mining will not exceed 20% as of each rebalance date.

The Underlying Fund, using a “passive” or indexing investment approach, attempts to approximate the investment performance of the Underlying Index by investing in a portfolio of securities that generally replicates the Underlying Index. Unlike many investment companies that try to “beat” the performance of a benchmark index, the Underlying Fund does not try to “beat” the Underlying Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Underlying Fund will substantially outperform the Underlying Index but also may reduce some of the risks of active management, such as poor security selection. The returns of the Underlying Fund may be affected by certain management fees and other expenses, which are detailed in its prospectus.

Correlation

The Underlying Index is a theoretical financial calculation, while the Underlying Fund is an actual investment portfolio. While the Underlying Fund seeks to track the performance of the Underlying Index (i.e., achieve a high degree of correlation with the Underlying Index), the Underlying Fund’s return may not match the return of the Underlying Index due to operating expenses, transaction costs, cash flows, regulatory requirements and operational inefficiencies.

The NYSE® Arca Gold Miners Index®

The Underlying Index is a rules-based index designed to measure the performance of highly capitalized companies in the gold mining industry. ICE Data Indices, LLC (the “IDI”) is the index sponsor and the index administrator. The Underlying Index is reported by Bloomberg under the ticker symbol “GDM.” The Underlying Index has a base date of December 19, 2002 and a base level of 500.00.

Objectives and Guiding Principles

The Underlying Index is a modified market capitalization weighted index comprised of publicly traded companies involved primarily in the mining of gold or silver. The Underlying Index includes common stocks, American Depositary Receipts or Global Depositary Receipts of selected companies that are involved in mining for gold and silver and that are listed for trading and electronically quoted on a major stock market that is accessible by foreign investors. Generally, this includes exchanges in most developed markets and major emerging markets, and includes companies that are cross-listed, i.e., both U.S. and Canadian listings. NYSE Arca will use its discretion to avoid exchanges and markets that are considered “frontier” in nature or have major restrictions to foreign ownership or investability. The Index includes companies that derive at least 50% of their revenues from gold mining and related activities (40% for companies that are already included in the Index). Also, the Index will maintain an exposure to companies with a significant revenue exposure to silver mining in addition to gold mining, which will not exceed 20% of the Index weight at each rebalance. Only companies with market capitalization greater than \$750 million that have a daily average trading volume of at least 50,000 shares and an average daily value traded of at least \$1 million over the past three months are eligible for inclusion in the Underlying Index. Starting in December 2013, for companies already included in the Index, the market capitalization requirement at each rebalance will be \$450 million, the average daily volume requirement will be at least 30,000 shares over the past three months and the average daily value traded requirement will be at

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

least \$600,000 over the past three months. NYSE Arca has the discretion to not include all companies that meet the minimum criteria for inclusion.

Index Calculation

The current index level would be calculated by dividing the current modified index market capitalization by the index divisor. The divisor was determined on the initial capitalization base of the index at the base level and may be updated as a result of corporate actions and composition changes. The Underlying Index is weighted based on the market capitalization of each of the component securities, modified to conform to the following asset diversification requirements, which are applied in conjunction with the scheduled quarterly adjustments to the NYSE® Arca Gold Miners Index:

- i. the weight of any single component security may not account for more than 20% of the total value of the Underlying Index;
- ii. the component securities are split into two subgroups-large and small, which are ranked by their unadjusted market capitalization weight in the Underlying Index. Large stocks are defined as having an index weight greater than or equal to 5%. Small stocks are defined as having an index weight below 5%; and
- iii. the final aggregate weight of those component securities which individually represent more than 4.5% of the total value of the Underlying Index may not account for more than 45% of the total value of the Underlying Index.

The Underlying Index is reviewed quarterly so that the Underlying Index components continue to represent the universe of companies involved in the gold and silver mining industry. The IDI may at any time and from time to time change the number of securities comprising the group by adding or deleting one or more securities, or replacing one or more securities contained in the group with one or more substitute securities of its choice, if in the IDI's discretion such addition, deletion or substitution is necessary or appropriate to maintain the quality and/or character of the Underlying Index. Changes to the Underlying Index compositions and/or the component share weights in the Underlying Index typically take effect after the close of trading on the third Friday of each calendar quarter month in connection with the quarterly index rebalance.

At the time of the quarterly rebalance, the weights for the components stocks (taking into account expected component changes and share adjustments), are modified in accordance with the following procedures:

Diversification Rule 1: If any component stock exceeds 20% of the total value of the Underlying Index, then all stocks greater than 20% of the Underlying Index are reduced to represent 20% of the value of the Underlying Index. The aggregate amount by which all component stocks are reduced is redistributed proportionately across the remaining stocks that represent less than 20% of the value of the Underlying Index. After this redistribution, if any other stock then exceeds 20%, the stock is set to 20% of the value of the Underlying Index and the redistribution is repeated.

If there is no component stock over 20% of the total value of the Underlying Index to start, then Diversification Rule 1 is not executed.

Diversification Rule 2: The components are sorted into two groups – (1) Large components, with a starting index weight of 5% or greater, and (2) Small components, with a weight of under 5% (after any adjustments for Diversification Rule 1). If there are no components that classify as Large components after Diversification Rule 1 is run, then Diversification Rule 2 is not executed. Alternatively, if the starting aggregate weight of the Large components after Diversification Rule 1 is run is not greater than 45% of the starting index weight, then Diversification Rule 2 is not executed.

If Diversification Rule 2 is indeed executed, then the (1) large group and (2) small group will represent 45% and 55%, respectively, of the final index weight. This will be adjusted for through the following process:

1. The weight of each of the large stocks will be scaled down proportionately (with a floor of 5%) so that the aggregate weight of the large components will be reduced to represent 45% of the Underlying Index. If any large component stock falls below a weight equal to the product of 5% and the proportion by which the stocks were scaled down following this distribution, then the weight of the stock is set equal to 5% and the components with weights greater than 5% will be reduced proportionately.
2. The weight of each of the small components will be scaled up proportionately from the redistribution of the large components. If any small component stock exceeds a weight equal to the product of 4.5% and the proportion by which the stocks were scaled down following this distribution, then the weight of the stock is set equal to 4.5%. The redistribution of weight to the remaining stocks is repeated until the entire amount has been redistributed.

Index Maintenance

The Underlying Index is reviewed quarterly to ensure that that the selection and weightings of the constituents continues to reflect as closely as possible the index's objective of measuring the performance of highly capitalized companies in the Gold Mining industry. Components will be removed from the Underlying Index during the quarterly review if either (1) the market capitalization falls below \$450 million or (2) the traded average daily shares for the previous three months is less than 30,000 shares and the average daily traded value for the previous three months is less than \$600,000. The Underlying Index is weighted based on the market capitalization of each of the component stocks, modified to conform to the following asset diversification requirements, which are applied in conjunction with the scheduled quarterly adjustments to the index as described above. In case of an event that could affect one or more constituents, the IDI will inform the market about the intended treatment of the event in the index shortly after the firm details have become available and have been confirmed. When possible, the corporate action will be announced, even if not all information is known, at least one trading day before the effective date of the action. Once the corporate action has been effectuated, the IDI will confirm the changes in a separate announcement.

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

Components would be removed from the index as a result of periodic corporate actions as well as the results of the quarterly rebalances/reconstitutions. All removals in the quarterly rebalances/reconstitutions will be announced at least six trading days before the effective date of the removal. It should be noted that in the case of mergers and acquisitions, every effort will be made to remove the company at some reasonable time ahead of the suspension in trading in the acquired company. There will be certain situations and corporate actions that would require the removal of a company that has already ceased trading. In those cases, the company will be removed from the index at its last traded price, or, at the discretion of the IDI, at a derived price that most accurately represents its post-suspension value. There will be certain situations and corporate actions that would require a removal of a company with less than six trading days of notice. In those cases, the removal would be announced no later than 15:00 ET on the trading day preceding the effective date of the removal. The new composition of the index, including the companies to be a part of the index and their corresponding new index shares, will be announced at least six trading days before the effective date and can be accessed from NYSE Market Data website.

The following graph shows the daily historical performance of the Underlying Fund on its primary exchange in the period from January 1, 2013 through November 6, 2023. We obtained this historical data from Bloomberg L.P. We have not independently verified the accuracy or completeness of the information obtained from Bloomberg L.P. On November 6, 2023, the Closing Market Price of the Underlying Fund was \$29.15. The graph below may have been adjusted to reflect certain corporate actions, such as stock splits and reverse stock splits.

Historical Performance of the Underlying Fund

This historical data on the Underlying Fund is not necessarily indicative of the future performance of the Underlying Fund or what the value of the notes may be. Any historical upward or downward trend in the price per share of the Underlying Fund during any period set forth above is not an indication that the price per share of the Underlying Fund is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the prices and trading pattern of the Underlying Fund.

Supplement to the Plan of Distribution

We may deliver the notes against payment therefor in New York, New York on a date that is greater than two business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement of the notes occurs more than two business days from the pricing date, purchasers who wish to trade the notes more than two business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units. If you place an order to purchase the notes, you are consenting to MLPF&S and/or one of its affiliates acting as a principal in effecting the transaction for your account.

MLPF&S will purchase the notes from BofAS for resale, and will receive a selling concession in connection with the sale of the notes in an amount up to the full amount of underwriting discount set forth on the cover of this term sheet.

MLPF&S and BofAS may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices, and these will include MLPF&S's and BofAS's trading commissions and mark-ups or mark-downs. MLPF&S and BofAS may act as principal or agent in these market-making transactions; however, neither is obligated to engage in any such transactions. At their discretion, for a short, undetermined initial period after the issuance of the notes, MLPF&S and BofAS may offer to buy the notes in the secondary market at a price that may exceed the estimated initial value of the notes. Any price offered by MLPF&S or BofAS for the notes will be based on then-prevailing market conditions and other considerations, including the performance of the Underlying Fund, the remaining term of the notes, and the issuer's creditworthiness. However, neither we nor any of our affiliates are obligated to purchase your notes at any price, or at any time, and we cannot assure you that we, MLPF&S, BofAS or any of our respective affiliates will purchase your notes at a price that equals or exceeds the estimated initial value of the notes.

The value of the notes shown on your account statement provided by MLPF&S will be based on BofAS's estimate of the value of the notes if BofAS or one of its affiliates were to make a market in the notes, which it is not obligated to do. This estimate will be based upon the price that BofAS may pay for the notes in light of then-prevailing market conditions, and other considerations, as mentioned above, and will include transaction costs. At certain times, this price may be higher than or lower than the estimated initial value of the notes.

The distribution of the Note Prospectus in connection with these offers or sales will be solely for the purpose of providing investors with the description of the terms of the notes that was made available to investors in connection with their initial offering. Secondary market investors should not, and will not be authorized to, rely on the Note Prospectus for information regarding HSBC or for any purpose other than that described in the immediately preceding sentence.

An investor's household, as referenced on the cover of this term sheet, will generally include accounts held by any of the following, as determined by MLPF&S in its discretion and acting in good faith based upon information then available to MLPF&S:

- the investor's spouse (including a domestic partner), siblings, parents, grandparents, spouse's parents, children and grandchildren, but excluding accounts held by aunts, uncles, cousins, nieces, nephews or any other family relationship not directly above or below the individual investor;
- a family investment vehicle, including foundations, limited partnerships and personal holding companies, but only if the beneficial owners of the vehicle consist solely of the investor or members of the investor's household as described above; and
- a trust where the grantors and/or beneficiaries of the trust consist solely of the investor or members of the investor's household as described above; provided that, purchases of the notes by a trust generally cannot be aggregated together with any purchases made by a trustee's personal account.

Purchases in retirement accounts will not be considered part of the same household as an individual investor's personal or other non-retirement account, except for individual retirement accounts ("IRAs"), simplified employee pension plans ("SEPs"), savings incentive match plan for employees ("SIMPLEs"), and single-participant or owners only accounts (i.e., retirement accounts held by self-employed individuals, business owners or partners with no employees other than their spouses).

Please contact your Merrill financial advisor if you have any questions about the application of these provisions to your specific circumstances or think you are eligible.

Selling Restrictions

Prohibition of sales to UK retail investors. The notes are not intended to be offered, sold or otherwise made available to, and should not be offered, sold or otherwise made available to, any retail investor in the United Kingdom ("UK"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended, the "EUWA"); (ii) a customer within the meaning of the United Kingdom Financial Services and Markets Act 2000 (as amended, the "FSMA") and any rules or regulations made under the FSMA to implement Directive 2016/97 (EU), where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of UK domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of UK domestic law by virtue of the EUWA. Consequently, no key information document required by Regulation (EU) No. 1286/2014 as it forms part of UK domestic law

Market-Linked One Look Notes

Linked to the VanEck® Gold Miners ETF, due December , 2024

by virtue of the EUWA (the “UK PRIIPs Regulation”) for offering or selling the notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

Prohibition of sales to EEA retail investors. The notes are not intended to be offered, sold or otherwise made available to, and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“EEA”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “MiFID II”); (ii) a customer within the meaning of Directive 2016/97 (EU) (as amended), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129, as amended. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “EU PRIIPs Regulation”) for offering or selling the notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling such notes or otherwise making them available to any retail investor in the EEA may be unlawful under the EU PRIIPs Regulation.

The preceding discussion supersedes the discussion in the accompanying prospectus supplement to the extent it is inconsistent therewith.

Role of MLPF&S and BofAS

BofAS will participate as selling agent in the distribution of the notes. Under our distribution agreement with BofAS, BofAS will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount.

Payments on the notes, including the amount you receive at maturity, will be calculated based on the \$10 per unit principal amount and will depend on the performance of the Underlying Fund. In order to meet these payment obligations, at the time we issue the notes, we may choose to enter into certain hedging arrangements (which may include call options, put options or other derivatives) with BofAS or one of its affiliates. The terms of these hedging arrangements are determined by BofAS seeking bids from market participants, which could include one of our affiliates and MLPF&S, BofAS and their affiliates. These hedging arrangements take into account a number of factors, including the issuer’s creditworthiness, interest rate movements, the volatility of the Underlying Fund, the tenor of the notes and the tenor of the hedging arrangements. The economic terms of the notes depend in part on the terms of the hedging arrangements.

BofAS has advised us that the hedging arrangements will include a hedging related charge of approximately \$0.05 per unit, reflecting an estimated profit to be credited to BofAS from these transactions. Since hedging entails risk and may be influenced by unpredictable market forces, additional profits and losses from these hedging arrangements may be realized by BofAS or any third party hedge providers.

For further information, see “Risk Factors” beginning on page PS-7 of product supplement EQUITY SUN-1.

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- There is no statutory, judicial, or administrative authority directly addressing the characterization of the notes.
- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as pre-paid executory contracts with respect to the Underlying Fund.
- Under this characterization and tax treatment of the notes, subject to the discussion of the constructive ownership rules of Section 1260 of the Code beginning on page PS-41 of product supplement EQUITY SUN-1, a U.S. holder (as defined in the prospectus supplement) generally will recognize capital gain or loss upon maturity or upon a sale or exchange of the notes prior to maturity. This capital gain or loss generally will be long-term capital gain or loss if you held the notes for more than one year.
- No assurance can be given that the IRS or any court will agree with this characterization and tax treatment.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. You should review carefully the discussion under the section entitled “U.S. Federal Income Tax Summary” beginning on page PS-40 of product supplement EQUITY SUN-1.

Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you these documents if you so request by calling MLPF&S or BofAS toll-free at 1-800-294-1322.
