Summary Section

Investment Objective

The investment objective of the Performance Trust Total Return Bond Fund (the “Fund”) is to purchase undervalued fixed income assets and achieve investment returns through interest income and potential capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees <i>(fees paid directly from your investment)</i>		None
Annual Fund Operating Expenses		
<i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management Fees		0.60%
Other Expenses ⁽¹⁾		1.03%
Total Annual Fund Operating Expenses		1.63%
Fee Waiver/Expense Reimbursement		-0.68%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement ⁽²⁾		0.95%
⁽¹⁾	Because the Fund is new, these expenses are based on estimated amounts for the Fund's current fiscal year.	
⁽²⁾	Pursuant to an operating expense limitation agreement between the Fund's investment adviser, Performance Trust Investment Advisors, LLC (the "Adviser"), and the Fund, the Adviser has agreed to waive its fees and/or reimburse expenses of the Fund to ensure that Total Annual Fund Operating Expenses (exclusive generally of interest and tax expenses, brokerage commissions, extraordinary and non-recurring expenses and acquired fund fees and expenses) for the Fund does not exceed 0.95% of the Fund's average net assets through _____, 2013, subject thereafter to annual re-approval of the agreement by the Trust's Board of Trustees (the "Board of Trustees"). This operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees. The Adviser is permitted to seek reimbursement from the Fund, subject to limitations, for fees it waives and Fund expenses it pays.	

Example

This Example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

1 Year	3 Years
\$97	\$303

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the annual fund operating expenses or in the Example, affect the Fund's performance.

Principal Investment Strategies

Under normal circumstances, the Fund intends to invest at least 80% of its net assets in fixed income instruments. “Fixed income instruments” include bonds, debt securities and other fixed income instruments issued by various U.S. Government or private-sector entities.

[Table of Contents](#)

The Fund will invest in fixed income instruments guaranteed by, or secured by collateral that is guaranteed by, the U.S. Government, its agencies, instrumentalities or sponsored corporations. This may include direct obligations of the U.S. Government or its agencies or instrumentalities or sponsored corporations, as well as mortgage-backed securities of the U.S. Government or its agencies.

The Fund's investments in debt securities may also consist of residential mortgage-backed securities ("RMBS") in the prime and "Alt-A" first lien mortgage sectors. Alt-A is one of three general classifications of mortgages along with prime and subprime. The risk profile of Alt-A mortgages falls between prime and subprime.

The Fund's remaining investments will consist of fixed income instruments and other investments including, but not limited to: asset-backed securities; corporate bonds, including high-yield bonds rated below investment grade by a nationally recognized statistical rating organization ("NRSRO"), commonly known as "junk bonds"; municipal bonds; real-estate investment trusts ("REITs"); or other investments. The Fund may also invest a portion of its assets in derivative instruments, including futures contracts, options and swaps as a substitute for taking positions in fixed income instruments or to reduce exposure to other risks.

The Fund's portfolio managers intend to construct the Fund's investment portfolio with a target weighted average effective duration of no less than one year and no more than ten years. The duration of the Fund's investment portfolio may vary materially from its target from time to time, and there is no assurance that the duration of the Fund's investment portfolio will conform to these limits.

The Fund's portfolio managers select investments for the Fund using scenario-based total return analysis, a process whereby the Adviser estimates the expected value of an investment after a period of time, assuming specific changes in the value of the investment or key factors that would affect its value, such as changes in interest rates, yield curve shifts and time horizons. The Fund's portfolio turnover rate is not intended to be high, although a higher turnover rate may occur as market conditions warrant. The Fund's portfolio managers may sell an investment to satisfy redemption requests, when a security no longer satisfies the Fund's investment criteria as described above, or when a more attractive investment opportunity becomes available.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund.** The principal risks of investing in the Fund include:

- **Management Risk.** The risk that strategies employed by the Adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.
- **General Market Risk.** The risk that certain investments selected for the Fund's portfolio may be worth less than the price originally paid for them, or less than they were worth at an earlier time.
- **Recent Market Events.** U.S. and international markets have experienced significant volatility since 2008, which has adversely affected the debt markets. The U.S. mortgage-backed securities market in particular has experienced recent difficulties that may adversely affect the value of certain mortgage-backed securities held by the Fund. These market difficulties have reduced investor demand for mortgage-backed securities resulting in limited liquidity for such securities. It is possible that such limited liquidity in such secondary markets could continue or worsen. If the U.S. economy continues to experience difficulties, the incidence of mortgage foreclosures may increase, which may adversely affect the value of the mortgage-backed securities owned by the Fund.

[Table of Contents](#)

- **New Fund Risk.** There can be no assurance that the Fund will grow to or maintain an economically viable size.
- **Fixed Income Securities Risks.** Interest rates may go up resulting in a decrease in the value of the fixed income securities held by the Fund. Credit risk is the risk that an issuer will not make timely payments of principal and interest. There is also the risk that an issuer may “call,” or repay, its high yielding bonds before their maturity dates. Fixed income securities may be subject to risk of prepayment, and may decline in value because of mortgage foreclosures or defaults on the underlying obligations. Fixed income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. Limited trading opportunities for certain fixed income securities may make it more difficult to sell or buy a security at a favorable price or time.
- **Mortgage-Backed Securities Risk:**
 - **Credit and Market Risks of Mortgage-Backed Securities.** The mortgage loans or the guarantees underlying mortgage-backed securities are subject to the risk of default or may otherwise fail, leading to non-payment of interest and principal.
 - **Prepayment Risk of Mortgage-Backed Securities.** In times of declining interest rates, the Fund’s higher yielding securities will be prepaid and the Fund will have to replace them with securities having a lower yield.
 - **Extension Risk of Mortgage-Backed Securities.** In times of rising interest rates, mortgage prepayments will slow causing portfolio securities considered short or intermediate term to be long-term securities which fluctuate more widely in response to changes in interest rates than shorter term securities.
 - **Inverse Floater, Interest-Only and Principal-Only Securities Risk.** These securities are extremely sensitive to changes in interest rates and prepayment rates.
- **Residential Mortgage-Backed Securities Risk.** RMBS are subject to the risks generally associated with fixed income securities and mortgage-backed securities. Delinquencies and defaults by borrowers in payments on the underlying mortgages, and the related losses, are affected by general economic conditions, the borrower’s equity in the mortgaged property and the borrower’s financial circumstances. The risks associated with RMBS are greater for those in the Alt-A first lien mortgage sectors than those in the prime first lien mortgage sectors, but the risks exist for all RMBS. Recently, delinquency and defaults on residential mortgages have increased and may continue to increase.
- **Asset-Backed Securities Investment Risk.** The risk that the impairment of the value of the collateral underlying a security in which the Fund invests such as non-payment of loans, will result in a reduction in the value of the security.
- **Government-Sponsored Entities Risk.** The Fund invests in securities issued or guaranteed by government-sponsored entities. However, these securities may not be guaranteed or insured by the U.S. Government and may only be supported by the credit of the issuing agency.
- **High-Yield Fixed Income Securities Risk.** The fixed income securities held by the Fund that are rated below investment grade are subject to additional risk factors such as increased possibility of default, illiquidity of the security, and changes in value based on public perception of the issuer. Such securities are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities.
- **Liquidity Risk.** There may be no willing buyer of the Fund’s portfolio securities and the Fund may have to sell those securities at a lower price or may not be able to sell the securities at all each of which would have a negative effect on performance.
- **Real Estate Investment Trust Risk.** A REIT’s share price may decline because of adverse developments affecting the real estate industry including changes in interest rates. The returns from REITs may trail returns from the overall market. Additionally, there is always a risk that a REIT will fail to qualify for favorable tax treatment.
- **Derivative Securities Risk.** The risk that the Fund’s use of derivatives will cause losses due to the unexpected effect of market movements on a derivative’s price, or because the derivatives do not perform as anticipated, or are not correlated with the performance of other investments which they are used to hedge or if the Fund is unable to liquidate a position because of an illiquid secondary market.

[Table of Contents](#)

- **High Portfolio Turnover Rate Risk:** a high portfolio turnover rate (100% or more) has the potential to result in increased brokerage transaction costs and the realization by the Fund and distribution to shareholders of a greater amount of capital gains than if the Fund had a low portfolio turnover rate. This may mean that you would be likely to have a higher tax liability. Distributions to shareholders of short-term capital gains are taxed as ordinary income under federal tax laws.

Performance

Performance information for the Fund has not been presented because, as of the date of this Prospectus, the Fund has not been in operation for a full calendar year.

Management

Investment Adviser

Performance Trust Investment Advisors, LLC serves as the Fund's investment adviser.

Portfolio Managers

The following individuals serve as the Fund's portfolio managers:

Name

Peter B. Cook, CFA, CPA

Bradley D. Bonga

G. Michael Plaiss

Anthony J. Harris, CPA

Primary Title

Chief Investment Officer

Senior Portfolio Manager

Portfolio Manager

Portfolio Manager

Purchase and Sale of Fund Shares

You may conduct transactions by mail (Performance Trust Total Return Bond Fund, c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701 (for regular mail) or 615 East Michigan Street, 3rd Floor (for overnight or express mail), Milwaukee, WI 53202), or by telephone at ____-____-____. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. The minimum initial amount of investment in the Fund is \$5,000. Subsequent investments may be made with a minimum investment amount of \$500.

Tax Information

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer, or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your adviser or visit your financial intermediary's website for more information.

[Table of Contents](#)

Principal Investment Strategies, Related Risks and Disclosure of Portfolio Holdings

Investment Objective

The Fund's investment objective is to purchase undervalued fixed income assets and achieve investment returns through interest income and potential capital appreciation.

Principal Investment Strategies

Under normal circumstances, the Fund intends to invest at least 80% of its net assets in fixed income instruments. "Fixed income instruments" include bonds, debt securities and other fixed income instruments issued by various U.S. Government or private-sector entities.

To achieve its investment objective, the Fund will invest in bonds guaranteed by, or secured by collateral that is guaranteed by, the U.S. Government, its agencies, instrumentalities or sponsored corporations. This may include direct obligations of the U.S. Government or its agencies or mortgage-backed securities of the U.S. Government or its agencies. The Fund may invest in stripped mortgage-backed securities, which receive differing proportions of the interest and principal payments from the underlying assets, including interest-only and principal-only securities. The Fund may also invest in inverse floaters, which are bonds or other types of debt instruments whose coupon rates have an inverse relationship to short-term interest rates or a specified benchmark index, such as LIBOR (London Interbank Offered Rate).

In addition, the Fund may invest in RMBS in the prime and "Alt-A" first lien mortgage sectors. Alt-A is one of three general classifications of mortgages along with prime and subprime. The risk profile of Alt-A mortgages falls between prime and subprime. Alt-A loans are not prime loans (those that are within the guidelines for purchase by the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac")) usually because of one or more of the following factors: the credit risk of the borrower (i.e., lower credit score); reduced borrower income and asset documentation; higher borrower debt to income ratios; higher loan to value ratios; and/or the loans exceed the size limits for purchase under their respective charters.

The Fund's remaining investments will consist of fixed income instruments and other investments which the Adviser believes have the best risk/reward opportunities as identified by scenario-based total return analysis, a process whereby the Adviser estimates the expected value of an investment after a period of time, assuming specific changes in the value of the investment or key factors that would affect its value, such as changes in interest rates or credit quality. These investments may include, but are not limited to: asset-backed securities; corporate bonds, including high-yield bonds rated below investment grade by a NRSRO, commonly known as "junk bonds"; municipal bonds; REITs; or other investments. The Fund may invest in futures contracts, options and swaps. The Fund may sometimes use derivatives as a substitute for taking positions in bonds and/or as part of a strategy designed to reduce exposure to other risks.

The Fund's portfolio managers intend to construct the Fund's investment portfolio with a target weighted average effective duration of no less than one year and no more than ten years. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of the security's price to changes in interest rates. The duration of the Fund's investment portfolio may vary materially from its target from time to time, and there is no assurance that the duration of the Fund's investment portfolio will conform to these limits.

The Fund's investment process begins with an evaluation of both interest rate and applicable credit risk. The Adviser makes a forward projection of a fixed income instrument's total return characteristics over a variety of interest rate scenarios, yield curve shifts and time horizons. For fixed income instruments with credit components, a careful assessment of credit risk is made. Fixed income instruments with superior risk reward characteristics, with respect to criteria such as price, interest rate sensitivity and credit quality, are selected for the Fund's portfolio. The Adviser's risk management process is enhanced by appropriate diversification of security type, type of issuer and geographic location.

[Table of Contents](#)

The Fund's portfolio turnover rate is not intended to be high, although a higher turnover rate may occur as market conditions warrant. The Fund's portfolio managers may sell an investment to satisfy redemption requests, when a security no longer satisfies the Fund's investment criteria as described above, or when a more attractive investment opportunity becomes available.

Temporary Strategies; Cash or Similar Investments. For temporary defensive purposes, the Adviser may invest up to 100% of the Fund's total assets in high-quality, short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. Taking a temporary defensive position may result in the Fund not achieving its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market funds' management fees and operational expenses.

Change in Investment Objective. The Fund's investment objective may be changed without the approval of the Fund's shareholders upon 60 days' written notice to shareholders. The Fund will not make any change in its investment policy of investing at least 80% of net assets in investments suggested by the Fund's name without first changing the Fund's name and providing shareholders with at least 60 days' prior written notice.

Principal Risks

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested, and the amount of risk you are willing to take. Remember, in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund.** The principal risks of investing in the Fund are:

- *Management Risk.* The ability of the Fund to meet its investment objective is directly related to the Adviser's investment strategies for the Fund. The value of your investment in the Fund may vary with the effectiveness of the Adviser's research, analysis and asset allocation among portfolio securities. If the Adviser's investment strategies do not produce the expected results, your investment could be diminished or even lost.
- *Recent Market Events.* U.S. and international markets have experienced significant volatility since 2008. The debt markets have experienced substantially lower valuations, reduced liquidity, price volatility, credit downgrades, increased likelihood of default and valuation difficulties. As a result of this significant volatility, many of the foregoing risks associated with an investment in the Fund may be increased. In particular, the mortgage-backed securities market in the U.S. has experienced difficulties that may adversely affect the performance and market value of certain mortgages and mortgage-backed securities. Delinquencies and losses on mortgage loans generally have increased recently. In addition, a number of mortgage loan originators have recently experienced serious financial difficulties or bankruptcy. Largely due to the foregoing, reduced investor demand for mortgage loans and mortgage-backed securities and increased investor yield requirements have caused limited liquidity in the secondary market for mortgage-backed securities, which can adversely affect the market value of mortgage-backed securities, including those held by the Fund. It is possible that such limited liquidity in such secondary markets could continue or worsen. If the U.S. economy continues to experience difficulties, the incidence of mortgage foreclosures may increase, which may adversely affect the value of any mortgage-backed securities owned by the Fund.

[Table of Contents](#)

- *New Fund Risk.* There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Board of Trustees may determine to liquidate the Fund. Liquidation can be initiated without shareholder approval by the Board of Trustees if it determines it is in the best interest of shareholders. As a result, the timing of any liquidation may not be favorable to certain individual shareholders.
- *Fixed Income Securities Risk.* Fixed income securities held by the Fund are subject to interest rate risk, call risk, prepayment and extension risk, credit risk, and liquidity risk, which are more fully described below.
- *Interest Rate Risk.* Fixed income securities are subject to the risk that the securities could lose value because of interest rate changes. For example, bonds tend to decrease in value if interest rates rise. Fixed income securities with longer maturities sometimes offer higher yields, but are subject to greater price shifts as a result of interest rate changes than fixed income securities with shorter maturities.
- *Call Risk.* During periods of declining interest rates, a bond issuer may “call,” or repay, its high yielding bonds before their maturity dates. The Fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in its income.
- *Prepayment and Extension Risk.* Many types of fixed income securities are subject to prepayment risk. Prepayment occurs when the issuer of a fixed income security can repay principal prior to the security’s maturity. Fixed income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. In addition, the potential impact of prepayment features on the price of a fixed income security can be difficult to predict and result in greater volatility. On the other hand, rising interest rates could cause prepayments of the obligations to decrease, extending the life of mortgage- and asset-backed securities with lower payment rates. This is known as extension risk and may increase the Fund’s sensitivity to rising rates and its potential for price declines.
- *Credit Risk.* Fixed income securities are generally subject to the risk that the issuer may be unable to make principal and interest payments when they are due. There is also the risk that the securities could lose value because of a loss of confidence in the ability of the borrower to pay back debt. Lower rated fixed income securities involve greater credit risk, including the possibility of default or bankruptcy.
- *Liquidity Risk.* Trading opportunities are more limited for fixed income securities that have not received any credit ratings, have received ratings below investment grade or are not widely held. These features make it more difficult to sell or buy a security at a favorable price or time. Consequently, the Fund may have to accept a lower price to sell a security, sell other securities to raise cash or give up an investment opportunity, any of which could have a negative effect on its performance. Infrequent trading of securities may also lead to an increase in their price volatility. Liquidity risk also refers to the possibility that the Fund may not be able to sell a security or close out an investment contract when it wants to. If this happens, the Fund will be required to hold the security or keep the position open, and it could incur losses.
- *Mortgage-Backed Securities Risk.* Mortgage-backed securities are subject to the risks generally associated with fixed income securities listed above. The risk of prepayment is more likely to occur when interest rates fall because many borrowers refinance mortgages to take advantage of more favorable rates. Prepayments on mortgage-backed securities are also affected by other factors, such as the volume of home sales. The Fund’s yield will be reduced if cash from prepaid securities is reinvested in securities with lower interest rates. The risk of prepayment may also decrease the value of mortgage-backed securities. The value of these securities may decline in value because of mortgage foreclosures or defaults on the underlying obligations. Inverse floater, interest-only and principal-only securities are extremely sensitive to changes in interest rates and prepayment rates. The market value of such securities generally is more sensitive to changes in prepayment and interest rates than is the case with traditional mortgage-backed securities, and in some cases such market value may be extremely volatile.

[Table of Contents](#)

- *Residential Mortgage-Backed Securities Risk.* Residential mortgage-backed securities are subject to the risks generally associated with debt securities and mortgage-backed securities. Credit risk on RMBS arises from losses due to delinquencies and defaults by borrowers in payments on the underlying mortgages. The rate of delinquencies and defaults on RMBS and the amount of the resulting losses depend on a number of factors, including general economic conditions, particularly those in the area where the related mortgaged property is located, the level of the borrower's equity in the mortgaged property and the individual financial circumstances of the borrower. The risks associated with RMBS are greater for those in the Alt-A first lien mortgage sectors than those in the prime first lien mortgage sectors, but the risks exist for all RMBS. Recently, delinquency and defaults on residential mortgage loans have increased significantly and may continue to increase. Residential property values in many geographical areas have declined, and the continued decline (or lack of increase) in those values may result in additional increases in delinquencies and defaults on residential mortgages.
- *High-Yield Fixed Income Securities Risk.* High-yield fixed income securities or "junk bonds" are fixed income securities rated below investment grade by a NRSRO. Although junk bonds generally pay higher rates of interest than higher-rated securities, they are subject to a greater risk of loss of income and principal. Junk bonds are subject to greater credit risk than higher-grade securities and have a higher risk of default. Companies issuing high-yield junk bonds are more likely to experience financial difficulties that may lead to a weakened capacity to make principal and interest payments than issuers of higher grade securities. Issuers of junk bonds are often highly leveraged and are more vulnerable to changes in the economy, such as a recession or rising interest rates, which may affect their ability to meet their interest or principal payment obligations.
- *Derivative Securities Risk.* Investments in futures contracts, options and swaps made by the Fund may be considered to be derivative securities. Derivatives can be volatile and involve various types and degrees of risks, depending upon the characteristics of a particular derivative. Derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in a derivative could have a large potential impact on the performance of the Fund's investments. The Fund could experience a loss if derivatives do not perform as anticipated, or are not correlated with the performance of other investments which they are used to hedge or if the Fund is unable to liquidate a position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.
- *U.S. Government and U.S. Agency Obligations Risk.* U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. As a result, there is a risk that these entities will default on a financial obligation. For instance, securities issued by the Government National Mortgage Association, commonly known as "Ginnie Mae," are supported by the full faith and credit of the U.S. government. Securities issued by Fannie Mae and Freddie Mac are supported only by the discretionary authority of the U.S. government. However, the obligations of Fannie Mae and Freddie Mac have been placed into conservatorship until the entities are restored to a solvent financial condition. Securities issued by the Student Loan Marketing Association are supported only by the credit of that agency.

[Table of Contents](#)

- *Real Estate Investment Trust ("REIT") Risks.* Investments in REITs will subject the Funds to various risks. The first, real estate industry risk, is the risk that REIT share prices will decline because of adverse developments affecting the real estate industry and real property values. In general, real estate values can be affected by a variety of factors, including supply and demand for properties, the economic health of the country or of different regions, and the strength of specific industries that rent properties. REITs often invest in highly leveraged properties. The second risk is the risk that returns from REITs, which typically are small or medium capitalization stocks, will trail returns from the overall stock market. The third, interest rate risk, is the risk that changes in interest rates may hurt real estate values or make REIT shares less attractive than other income producing investments. REITs are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. Qualification as a REIT under the Code in any particular year is a complex analysis that depends on a number of factors. There can be no assurance that the entities in which the Funds invest with the expectation that they will be taxed as a REIT will qualify as a REIT. An entity that fails to qualify as a REIT would be subject to a corporate level tax, would not be entitled to a deduction for dividends paid to its shareholders and would not pass through to its shareholders the long-term capital gains character of such gains earned by the entity. If a Fund were to invest in an entity that failed to qualify as a REIT, such failure could drastically reduce that Fund's yield on that investment. REITs can be classified as equity REITs, mortgage REITs and hybrid REITs. Equity REITs invest primarily in real property and earn rental income from leasing those properties. They may also realize gains or losses from the sale of properties. Equity REITs will be affected by conditions in the real estate rental market and by changes in the value of the properties they own. Mortgage REITs invest primarily in mortgages and similar real estate interests and receive interest payments from the owners of the mortgaged properties. They are paid interest by the owners of the financed properties. Mortgage REITs will be affected by changes in creditworthiness of borrowers and changes in interest rates. Hybrid REITs invest both in real property and in mortgages. Equity and mortgage REITs are dependent upon management skills, may not be diversified and are subject to the risks of financing projects. Dividends paid by REITs will not generally qualify for the reduced U.S. federal income tax rates applicable to qualified dividends under the Code. The Fund's investments in REITs may include an additional risk to shareholders in that some or all of a REIT's annual distributions to its investors may constitute a non-taxable return of capital. Any such return of capital will generally reduce the Fund's basis in the REIT investment, but not below zero. To the extent the distributions from a particular REIT exceed the Fund's basis in such REIT, the Fund will generally recognize gain. In part because REIT distributions often include a nontaxable return of capital, Fund distributions to shareholders may also include a nontaxable return of capital. Shareholders that receive such a distribution will also reduce their tax basis in their share of the Fund, but not below zero. To the extent the distribution exceeds a shareholder's basis in the Fund's shares, such shareholder will generally recognize capital gain.
- *High Portfolio Turnover Rate Risk.* High portfolio turnover rates could generate capital gains that must be distributed to shareholders as short-term capital gains taxed at ordinary income rates (currently as high as 35%) and could increase brokerage commission costs. To the extent that a Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund. Rapid portfolio turnover also exposes shareholders to a higher current realization of short-term capital gains taxed at ordinary income rates.

Portfolio Holdings Information

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the SAI. Currently, disclosure of the Fund's holdings is required to be made quarterly within 60 days of the end of each fiscal quarter in the annual and semi-annual reports to Fund shareholders and in the quarterly holdings report on Form N-Q. The annual and semi-annual reports will be available by contacting Performance Trust Total Return Bond Fund, c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, WI 53201-0701 or calling ____-____-____.

Management of the Fund

The Adviser

The Fund has entered into an investment advisory agreement ("Advisory Agreement") with Performance Trust Investment Advisors, LLC, an Illinois limited liability company located at 500 West Madison, Suite 350, Chicago, Illinois 60661. The Adviser is a SEC registered investment adviser, and as of July 31, 2010, the Adviser had \$____ million in assets under management. Under the Advisory Agreement, the Adviser manages the Fund's investments subject to the supervision of the Board of Trustees. The Adviser is entitled to an annual management fee of 0.60% of the Fund's average daily net assets.

Fund Expenses. The Fund is responsible for its own operating expenses. Pursuant to an operating expense limitation agreement between the Adviser and the Fund, the Adviser has agreed to reduce its management fees and/or pay expenses of the Fund to ensure that the total amount of Fund operating expenses (exclusive generally of interest, acquired fund fees and expenses, leverage and tax expenses, dividends and interest expenses on short positions, brokerage commissions, and extraordinary expenses) does not exceed 0.95% of the average net assets of the Fund for an initial three-year term beginning with the Fund's commencement of operations, and subject to annual re-approval of the agreement by the Board of Trustees thereafter. Any reduction in management fees or payment of expenses made by the Adviser may be reimbursed by the Fund in subsequent fiscal years if the Adviser so requests. This reimbursement may be requested if the aggregate amount actually paid by the Fund toward operating expenses for such fiscal year (taking into account the reimbursement) does not exceed the applicable limitation on Fund expenses. The Adviser is permitted to be reimbursed for management fee reductions and/or expense payments made in the prior three fiscal years. Any such reimbursement will be reviewed and approved by the Board of Trustees. The Fund must pay its current ordinary operating expenses before the Adviser is entitled to any reimbursement of management fees and/or expenses. In addition, any such reimbursement from the Fund to the Adviser will be subject to the applicable limitation on the Fund's expenses. This operating expense limitation agreement can only be terminated by, or with the consent of, the Board of Trustees.

A discussion regarding the basis of the Board of Trustees' approval of the Advisory Agreement will be available in the Fund's next semi-annual report to shareholders.

Portfolio Managers

The Adviser uses a team approach for portfolio security selection and decision-making. The portfolio managers are jointly responsible for the Fund's day-to-day investment decisions. Peter B. Cook is responsible for development and general oversight of the Fund's investment strategy. The names and backgrounds of the Fund's portfolio management team members are as follows:

Peter B. Cook, CFA®, CPA

Mr. Cook, Chief Investment Officer of the Adviser, is responsible for overseeing the portfolio management of the Fund. Prior to joining the Adviser in 2006, Mr. Cook founded and managed Rochester Partners, a long/short equity hedge fund, from 1997 through 2006. Previously, he ran an equity hedge fund for Templeton Global Investors ("Templeton") and managed Templeton's global equity trading desk in Nassau, Bahamas. Prior to joining Templeton, Mr. Cook was Vice President at UBS in New York, specializing in interest rate and currency swaps. He achieved his CPA certification in 1982 while employed at Deloitte & Touche LLP. Mr. Cook has achieved degrees of BS of Accountancy from University of Illinois and MBA from University of Chicago with a specialization in International Finance. He is currently an active leader in the CFA® Society of Chicago, focusing on continuing education issues.

[Table of Contents](#)

Bradley D. Bonga

Mr. Bonga, Senior Portfolio Manager of the Adviser, leads the Adviser's portfolio management team and is the Senior Portfolio Manager on two RMBS hedge funds, Performance Trust Opportunity Fund ("PTOF") 2 and PTOF 3, managed by the Adviser. Prior to joining the Adviser in 2008, Mr. Bonga established Bonga & Associates, a fixed income advisory firm. From 1998 to 2006, Mr. Bonga worked with the Adviser's affiliated broker-dealer, Performance Trust Capital Partners, LLC ("PTCP"), where he held positions in sales, trading, structuring, and new product development. He was also head trader for PTCP responsible for trading and structuring agency mortgage-backed securities, municipal bonds, corporate bonds and other fixed income instruments. He is a member of the Board of Directors of BNC National Bank in Phoenix, Arizona. Mr. Bonga graduated from Wheaton College with a BA degree in Business Economics.

G. Michael Plaiss

Mr. Plaiss serves as a member of the Adviser's portfolio management team, and focuses on modeling RMBS cash flows and portfolio attribution. He also serves as co-portfolio manager of PTOF 2 and PTOF 3. Prior to joining the Adviser in 2009, Mr. Plaiss served as Chief Investment Officer of Strategic Capital Investment Advisors, Inc., from 2004 to 2009. Mr. Plaiss acquired more than twelve years' experience managing fixed-income portfolios for banks and insurance companies including five years with Kentucky Farm Bureau, where he managed more than \$700 million in municipal bonds, corporate bonds, agency securities and mortgage-backed securities. Mr. Plaiss graduated from Indiana University, Bloomington with a degree in Economics.

Anthony J. Harris, CPA

Mr. Harris serves as a member of the Adviser's portfolio management team, and is co-portfolio manager of PTOF 2 and PTOF 3 and portfolio manager of an asset-backed securities fund managed by the Adviser. Prior to joining the Adviser in 2009, Mr. Harris structured and invested in securitized products at Six Degrees Capital Management, an alternative fixed income investment manager, from 2007 to 2009. From 2001 to 2007, he structured and invested in securitized products at BMO Capital Markets Corp., a financial services provider. Mr. Harris began his career with PricewaterhouseCoopers and passed the CPA exam in 1998. Mr. Harris received a Bachelor of Business Administration from University of Michigan Ross School of Business with an emphasis in Accounting, and a MBA from the University of Chicago Booth School of Business with an emphasis in Finance and Economics.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed and ownership of securities in the Fund.

CFA® is a registered trademark owned by the CFA Institute.

Shareholder Information

Share Price

The price of the Fund's shares is based on the Fund's net asset value ("NAV"). The NAV is calculated by dividing the value of the Fund's total assets, less its liabilities, by the number of its shares outstanding. In calculating the NAV, portfolio securities are valued using current market values or official closing prices, if available. The NAV is calculated at the close of regular trading of the NYSE, which is generally 4:00 p.m., Eastern time. The NAV will not be calculated on days that the NYSE is closed for trading.

[Table of Contents](#)

Each security owned by the Fund that is listed on a securities exchange is valued at its last sale price on that exchange on the date as of which assets are valued. Where the security is listed on more than one exchange, the Fund will use the price on the exchange that the Fund generally considers to be the principal exchange on which the stock is traded. Portfolio securities listed on the NASDAQ Stock Market, Inc. ("NASDAQ") will be valued at the NASDAQ Official Closing Price, which may not necessarily represent the last sale price. If there has been no sale on such exchange or on NASDAQ on such day, the security is valued at the mean between the bid and asked prices on such day. When market quotations are not readily available, a security or other asset is valued at its fair value as determined under fair value pricing procedures approved by the Board of Trustees. These fair value pricing procedures will also be used to price a security when corporate events, events in the securities market and/or world events cause the Adviser to believe that a security's last sale price may not reflect its actual market value. The intended effect of using fair value pricing procedures is to ensure that the Fund is accurately priced. The Board of Trustees will regularly evaluate whether the Fund's fair value pricing procedures continue to be appropriate in light of the specific circumstances of the Fund and the quality of prices obtained through their application by the Trust's valuation committee.

When fair value pricing is employed, the prices of securities used by the Fund to calculate its NAV may differ from quoted or published prices for the same securities. Due to the subjective and variable nature of fair value pricing, it is possible that the fair value determined for a particular security may be materially different from the price of the security quoted or published by others, or the value when trading resumes or is realized upon its sale. Therefore, if a shareholder purchases or redeems Fund shares when the Fund holds securities priced at a fair value, the number of shares purchased or redeemed may be higher or lower than it would be if the Fund were using market value pricing.

Investors may be charged a fee if they effect transactions through a broker or agent. The Fund has authorized one or more brokers or financial intermediaries ("Authorized Intermediary") to receive on its behalf purchase and redemption orders. Such Authorized Intermediaries may be authorized to designate other intermediaries to receive purchase and redemption orders on the Fund's behalf. In such cases, the Fund will be deemed to have received a purchase or redemption order when an Authorized Intermediary or, if applicable, a broker's authorized designee, receives the order. Customer orders will be priced at the Fund's NAV next computed after the order is received in good order by an Authorized Intermediary or its authorized designee.

How to Purchase Shares

Shares of the Fund are purchased at the next NAV calculated after your purchase order is received in good order by the Fund, or by an Authorized Intermediary, as discussed below.

Investment Minimums. The minimum initial investment in the Fund is \$5,000. The minimum investment amount for subsequent investments is \$500. The Fund reserves the right to waive the minimum initial investment or minimum subsequent investment amounts in its sole discretion. Shareholders will be given at least 30 days' written notice of any increase in the minimum dollar amount of initial or subsequent investments.

Fund shares may be offered through Authorized Intermediaries (including broker-dealers) and their agents in fee-based programs and other programs. In these programs, Authorized Intermediaries have made arrangements with the Fund and are authorized to buy and sell shares of the Fund that charge their customers transaction or other distribution or service fees with respect to their customers' investments in the Fund. If you are purchasing shares through financial intermediaries, including Authorized Intermediaries, you must follow the procedures established by your financial intermediary. Your financial intermediary is responsible for sending your purchase order and wiring payment to U.S. Bancorp Fund Services, LLC, the Fund's transfer agent (the "Transfer Agent"). Your financial intermediary holds the shares in your name and receives all confirmations of purchases and sales. Financial intermediaries placing orders for themselves or on behalf of their customers should call the Fund toll free at ____-____-____, or follow the instructions listed in the following sections titled "Investing by Telephone," "Purchase by Mail" and "Purchase by Wire."

[Table of Contents](#)

If you place an order for the Fund's shares through a financial institution in accordance with such financial institution's procedures, and such financial institution then transmits your order to the Transfer Agent in accordance with the Transfer Agent's instructions, your purchase will be processed at the NAV next calculated after the Transfer Agent receives your order. The financial institution must promise to send to the Transfer Agent immediately available funds in the amount of the purchase price in accordance with the Transfer Agent's procedures. If payment is not received within the time specified, the Transfer Agent may rescind the transaction and the financial institution will be held liable for any resulting fees or losses.

In the case of Authorized Intermediaries that have made satisfactory payment or redemption arrangements with the Fund, orders will be processed at the applicable price next calculated after receipt by the Authorized Intermediary, consistent with applicable laws and regulations. Financial institutions, including Authorized Intermediaries, may set cut-off times for the receipt of orders that are earlier than the cut-off times established by the Fund. For more information about your financial institution's rules and procedures, and whether your financial institution is an Authorized Intermediary, you should contact your financial institution directly.

All account applications ("Account Applications") to purchase Fund shares are subject to acceptance by the Fund and are not binding until so accepted. The Fund reserves the right to reject any purchase order if, in its discretion, it is in the Fund's best interest to do so. For example, a purchase order may be refused if it appears so large that it would disrupt the management of the Fund. Purchases may also be rejected from persons believed to be "market-timers," as described under "Tools to Combat Frequent Transactions," below. A service fee, currently \$25, as well as any loss sustained by the Fund, will be deducted from a shareholder's account for any purchases that do not clear. The Fund and the Transfer Agent will not be responsible for any losses, liability, cost or expense resulting from rejecting any purchase order. Your order will not be accepted until the completed Account Application is received by the Fund or the Transfer Agent.

Shares of the Fund have not been registered for sale outside of the United States. The Fund generally does not sell shares to investors residing outside the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses.

Purchase Requests Must be Received in Good Order

Your share price will be the next NAV per share calculated after the Transfer Agent or your Authorized Intermediary receives your purchase request in good order. "Good order" means that your purchase request includes:

- the name of the Fund;
- the dollar amount of shares to be purchased;
- your account application or investment stub; and
- a check payable to "Performance Trust Total Return Bond Fund."

All purchase requests received in good order before the close of the NYSE (generally 4:00 p.m., Eastern time) will be processed on that same day. Purchase requests received after the close of the NYSE (generally 4:00 p.m., Eastern time) will receive the next business day's NAV per share.

Investing by Telephone. If you have completed the "Telephone Options - Purchase Authorization" section of the Account Application, you may purchase additional shares by telephoning the Fund toll free at ____-____-____. This option allows investors to move money from their bank account to their Fund account upon request. Only bank accounts held at domestic institutions that are Automated Clearing House ("ACH") members may be used for telephone transactions. The minimum telephone purchase amount is \$500. If your order is received prior to the close of the NYSE (generally 4:00 p.m., Eastern time), shares will be purchased in your account at the price determined on the day your order is placed. During periods of high market activity, shareholders may encounter higher than usual call waiting times. Please allow sufficient time to place your telephone transaction.

[Table of Contents](#)

Purchase by Mail. To purchase the Fund’s shares by mail, simply complete and sign the Account Application and mail it, along with a check made payable to “Performance Trust Total Return Bond Fund” to:

Regular Mail Performance Trust Total Return Bond Fund c/o U.S. Bancorp Fund Services, LLC P.O. Box 701 Milwaukee, WI 53201-0701	Overnight or Express Mail Performance Trust Total Return Bond Fund c/o U.S. Bancorp Fund Services, LLC 615 East Michigan Street, 3rd Floor Milwaukee, WI 53202
--	---

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents. All purchase checks must be in U.S. dollars drawn on a domestic financial institution. The Fund will not accept payment in cash or money orders. The Fund also does not accept cashier’s checks in amounts of less than \$10,000. To prevent check fraud, the Fund will not accept third party checks, Treasury checks, credit card checks, traveler’s checks or starter checks for the purchase of shares. The Fund is unable to accept post-dated checks, post-dated on-line bill pay checks, or any conditional order or payment.

The transfer agent will charge a \$25 fee against a shareholders account, in addition to any loss sustained by the Fund, for any payment that is returned. It is the policy of the Fund not to accept applications under certain circumstances or in amounts considered disadvantageous to shareholders. The Fund reserves the right to reject any application.

Purchase by Wire. If you are making your first investment in the Fund, before you wire funds the Transfer Agent must have a completed Account Application. You can mail or use an overnight service to deliver your Account Application to the Transfer Agent at the above address. Upon receipt of your completed Account Application, the Transfer Agent will establish an account for you. Once your account has been established, you may instruct your bank to send the wire. Prior to sending the wire, please call the Transfer Agent at ____-____-____ to advise them of the wire and to ensure proper credit upon receipt. Your bank must include the name of the Fund, your name and your account number so that monies can be correctly applied. Your bank should transmit immediately available funds by wire to:

Wire to:	U.S. Bank, N.A.
ABA Number:	075000022
Credit:	U.S. Bancorp Fund Services, LLC
Account:	112-952-137
Further Credit:	Performance Trust Total Return Bond Fund (Shareholder Name/Account Registration) (Shareholder Account Number)

Wired funds must be received prior to the close of the NYSE (generally 4:00 p.m., Eastern time), to be eligible for same day pricing. The Fund and U.S. Bank, N.A. are not responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions.

Subsequent Investments. The minimum subsequent investment amount is \$500. Shareholders will be given at least 30 days’ written notice of any increase in the minimum dollar amount of subsequent investments. You may add to your account at any time by purchasing shares by mail, by telephone or by wire. You must call to notify the Fund at ____-____-____ before wiring. An investment stub, which is attached to your individual account statement, should accompany any investments made through the mail. All purchase requests must include your shareholder account number.

[Table of Contents](#)

Automatic Investment Plan. For your convenience, the Fund offers an Automatic Investment Plan (“AIP”). Under the AIP, after your initial investment, you may authorize the Fund to withdraw automatically from your personal checking or savings account an amount that you wish to invest, which must be at least \$500 on a monthly or quarterly basis. In order to participate in the AIP, your bank must be a member of the ACH network. If you wish to enroll in the AIP, complete the appropriate section in the Account Application. The Fund may terminate or modify this privilege at any time. You may terminate your participation in the AIP at any time by notifying the Transfer Agent five days prior to the effective date. A fee will be charged if your bank does not honor the AIP draft for any reason.

Anti-Money Laundering Program. Please note that the Fund has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”) and related anti-money laundering laws and regulations. In order to ensure compliance with these laws, the Account Application asks for, among other things, the following information for all “customers” seeking to open an “account” (as those terms are defined in rules adopted pursuant to the USA PATRIOT Act):

- full name;
- date of birth (individuals only);
- Social Security or taxpayer identification number; and
- permanent street address (P.O. Box only is not acceptable).

Accounts opened by entities, such as corporations, limited liability companies, partnerships or trusts, will require additional documentation. Please note that if any information listed above is missing, your Account Application will be returned and your account will not be opened. In compliance with the USA PATRIOT Act and other applicable anti-money laundering laws and regulations, the Transfer Agent will verify the information on your application as part of the Program. The Fund reserves the right to request additional clarifying information and may close your account if such clarifying information is not received by the Fund within a reasonable time of the request or if the Fund cannot form a reasonable belief as to the true identity of a customer. If you require additional assistance when completing your application, please contact the Transfer Agent at ____-____-____.

How to Redeem Shares

In general, orders to sell or “redeem” shares may be placed directly with the Fund or through a broker-dealer or financial institution. However, if you originally purchased your shares through a broker-dealer or financial institution, your redemption order must be placed with the same institution in accordance with the procedures established by that institution. Your financial institution is responsible for sending your order to the Transfer Agent and for crediting your account with the proceeds. You may redeem part or all of your investment in the Fund’s shares on any business day that the applicable Fund calculates its NAV. To redeem shares of the Fund, you must contact the Fund either by mail or by phone to place a redemption order. Your redemption request must be received in good order (as discussed under “Payment of Redemption Proceeds,” below) prior to the close of the regular trading session of the NYSE (generally 4:00 p.m., Eastern time) in order to obtain that day’s closing NAV. Redemption requests received after the close of the NYSE will be treated as though received on the next business day.

[Table of Contents](#)

Shareholders who have an IRA or other retirement plan must indicate on their redemption request whether or not to withhold federal income tax. Redemption requests failing to indicate an election not to have tax withheld will generally be subject to 10% withholding.

Payment of Redemption Proceeds. You may redeem your Fund shares at a price equal to the NAV next determined after the Transfer Agent receives your redemption request in good order. Your redemption request cannot be processed on days the NYSE is closed. All requests received in good order by the Fund before the close of the regular trading session of the NYSE (generally 4:00 p.m., Eastern time) will usually be sent on the next business day.

A redemption request will be deemed in “good order” if it includes:

- the shareholder’s name;
- the name of the Fund you are invested in;
- the account number;
- the share or dollar amount to be redeemed; and
- signatures by all shareholders on the account and signature guarantee(s), if applicable.

You may have a check sent to the address of record, proceeds may be wired to your pre-established bank account or funds may be sent via electronic funds transfer through the ACH network using the bank instructions previously established on your account. Redemption proceeds will typically be sent on the business day following your redemption. Wires are subject to a \$15 fee. There is no charge to have proceeds sent via ACH, however, funds are typically credited to your bank within two to three days after redemption. In all cases, proceeds will be processed within seven calendar days after the Fund receives your redemption request.

Before selling recently purchased shares, please note that if the Transfer Agent has not yet collected payment for the shares you are selling, it may delay sending the proceeds until the payment is collected, which may take up to 12 calendar days from the purchase date. Furthermore, there are certain times when you may be unable to sell Fund shares or receive proceeds. Specifically, the Fund may suspend the right to redeem shares or postpone the date of payment upon redemption for more than seven calendar days: (1) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (2) for any period during which an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets; or (3) for such other periods as the SEC may permit for the protection of shareholders.

Redemption proceeds will be sent to the address of record. The Fund will not be responsible for interest lost on redemption amounts due to lost or misdirected mail. The Transfer Agent may require a signature guarantee for certain redemption requests. A signature guarantee assures that your signature is genuine and protects you from unauthorized account redemptions. Signature guarantees can be obtained from banks and securities dealers, *but not from a notary public*. A signature guarantee of each owner is required in the following situations:

- if ownership is changed on your account;
- when redemption proceeds are payable or sent to any person, address or bank account not on record;
- for written requests to wire redemption proceeds (if not previously authorized on the account);
- if a change of address request has been received by the Transfer Agent within the last 15 days;
- for all redemptions in excess of \$100,000 from any shareholder account.

[Table of Contents](#)

Non-financial transactions, including establishing or modifying certain services on an account, may require a signature verification from a Signature Validation Program member or other acceptable form of authentication from a financial institution source.

In addition to the situations described above, the Fund and/or the Transfer Agent reserve the right to require a signature guarantee in other instances based on the circumstances relative to the particular situation.

Redemption by Mail. You can execute most redemptions by furnishing an unconditional written request to the Fund to redeem your shares at the current NAV. Redemption requests in writing should be sent to the Transfer Agent at:

Regular Mail

Performance Trust Total Return Bond Fund
c/o U.S. Bancorp Fund Services, LLC
P.O. Box 701
Milwaukee, WI 53201-0701

Overnight or Express Mail

Performance Trust Total Return Bond Fund
c/o U.S. Bancorp Fund Services, LLC
615 East Michigan Street, 3rd Floor
Milwaukee, WI 53202

The Fund does not consider the U.S. Postal Service or other independent delivery services to be its agents.

Wire Redemption. Wire transfers may be arranged to redeem shares. However, the Transfer Agent charges a fee, currently \$15, per wire redemption against your account on dollar specific trades, and from proceeds on complete redemptions and share-specific trades.

Telephone Redemption. If you have been authorized to perform telephone transactions (either by completing the required portion of your Account Application or by subsequent arrangement in writing with the Fund), you may redeem shares, in amounts of \$100,000 or less, by instructing the Fund by phone at ____-____-____. A signature guarantee may be required of all shareholders in order to qualify for or to change telephone redemption privileges on an existing account. Telephone redemptions cannot be made if you notify the Transfer Agent of a change of address within 15 days before the redemption request. If you have a retirement account, you may not redeem shares by telephone. During periods of high market activity, shareholders may encounter higher than usual call waiting times. Please allow sufficient time to place your telephone transaction.

Note: Neither the Fund nor any of its service providers will be liable for any loss or expense in acting upon instructions that are reasonably believed to be genuine. To confirm that all telephone instructions are genuine, the Fund will use reasonable procedures, such as requesting:

- that you correctly state your Fund account number;
- the name in which your account is registered; or
- the Social Security or taxpayer identification number under which the account is registered.

Systematic Withdrawal Program. The Fund offers a systematic withdrawal plan (the “SWP”) whereby shareholders or their representatives may request a redemption in a specific dollar amount be sent to them each month, calendar quarter or annually. Investors may choose to have a check sent to the address of record, or proceeds may be sent to a pre-designated bank account via the ACH network. To start this program, your account must have Fund shares with a value of at least \$10,000, and the minimum amount that may be withdrawn each month or quarter is \$100. This program may be terminated or modified by the Fund at any time. Any request to change or terminate your SWP should be communicated in writing or by telephone to the Transfer Agent no later than five days before the next scheduled withdrawal. A withdrawal under the SWP involves a redemption of Fund shares, and may result in a gain or loss for federal income tax purposes. In addition, if the amount withdrawn exceeds the distributions credited to your account, the account ultimately may be depleted. To establish the SWP, complete the SWP section of the Account Application. Please call ____-____-____ for additional information regarding the SWP.

[Table of Contents](#)

The Fund's Right to Redeem an Account. The Fund reserves the right to redeem the shares of any shareholder whose account balance is less than \$2,500, other than as a result of a decline in the NAV of the Fund or for market reasons. The Fund will provide shareholders with written notice 30 days prior to redeeming the shareholder's account.

Redemption-in-Kind. The Fund generally pays redemption proceeds in cash. However, under unusual conditions that make the payment of cash unwise (and for the protection of the Fund's remaining shareholders), the Fund may pay all or part of a shareholder's redemption proceeds in liquid securities with a market value equal to the redemption price (redemption-in-kind).

Specifically, if the amount you are redeeming during any 90-day period is in excess of the lesser of \$250,000 or 1% of the NAV of the Fund being redeemed, valued at the beginning of such period, the Fund has the right to redeem your shares by giving you the amount that exceeds \$250,000 or 1% of the NAV of the Fund being redeemed in securities instead of cash. If the Fund pays your redemption proceeds by a distribution of securities, you could incur brokerage or other charges in converting the securities to cash, and will bear any market risks associated with such securities until they are converted into cash.

Tools to Combat Frequent Transactions

The Fund is intended for long-term investors. Short-term "market-timers" who engage in frequent purchases and redemptions can disrupt the Fund's investment program and create additional transaction costs that are borne by all of the Fund's shareholders. The Board of Trustees has adopted policies and procedures that are designed to discourage excessive, short-term trading and other abusive trading practices that may disrupt portfolio management strategies and harm performance. The Fund takes steps to reduce the frequency and effect of these activities in the Fund. These steps may include, among other things, monitoring trading activity and using fair value pricing, as determined by the Board of Trustees, when the Adviser determines current market prices are not readily available. Although these efforts are designed to discourage abusive trading practices, these tools cannot eliminate the possibility that such activity will occur. The Fund seeks to exercise its judgment in implementing these tools to the best of its ability in a manner that it believes is consistent with shareholder interests. Except as noted herein, the Fund will apply all restrictions uniformly in all applicable cases.

The Fund uses a variety of techniques to monitor for and detect abusive trading practices. These techniques may change from time to time as determined by the Fund in its sole discretion. To minimize harm to the Fund and its shareholders, the Fund reserves the right to reject any purchase order (but not a redemption request) in whole or in part, for any reason (including, without limitation, purchases by persons whose trading activity in Fund shares is believed by the Adviser to be harmful to the Fund) and without prior notice. The Fund may decide to restrict purchase and sale activity in its shares based on various factors, including whether frequent purchase and sale activity will disrupt portfolio management strategies and adversely affect Fund performance.

The Fund monitors selected trades in an effort to detect short-term trading activities. Short-term trading occurs when an investor (through one or more accounts) makes more than one round-trip (a purchase into a fund followed by a redemption) within a short period of time. Investors are limited to no more than four round-trip transactions in a 12-month period after which time future purchases into the Fund will be restricted. If, as a result of this monitoring, the Fund believes that an investor has engaged in excessive short-term trading, they may, in their discretion, ask the shareholder to stop such activities or refuse to process purchases in the shareholder's accounts. In making such judgments, the Fund seeks to act in a manner that it believes is consistent with the best interests of shareholders.

[Table of Contents](#)

Due to the complexity and subjectivity involved in identifying abusive trading activity and the volume of shareholder transactions the Fund handles, there can be no assurance that the Fund's efforts will identify all trades or trading practices that may be considered abusive. In particular, since the Fund receives purchase and sale orders through financial intermediaries that use group or omnibus accounts, the Fund cannot always detect frequent trading. However, the Fund will work with financial institutions as necessary to discourage shareholders from engaging in abusive trading practices and to impose restrictions on excessive trades. In this regard, the Fund has entered into information sharing agreements with financial intermediaries pursuant to which these intermediaries are required to provide to the Fund, at the Fund's request, certain information relating to their customers investing in the Fund through non-disclosed or omnibus accounts. The Fund will use this information to attempt to identify abusive trading practices. Financial intermediaries are contractually required to follow any instructions from the Fund to restrict or prohibit future purchases from shareholders that are found to have engaged in abusive trading in violation of the Fund's policies. However, the Fund cannot guarantee the accuracy of the information provided to them from financial intermediaries and cannot ensure that they will always be able to detect abusive trading practices that occur through non-disclosed and omnibus accounts. As a result, the Fund's ability to monitor and discourage abusive trading practices in non-disclosed or omnibus accounts may be limited.

Other Fund Policies

If you elect telephone privileges on the Account Application or in a letter to the Fund, you may be responsible for any fraudulent telephone orders as long as the Fund has taken reasonable precautions to verify your identity. In addition, once you place a telephone transaction request, it cannot be canceled or modified.

During periods of significant economic or market change, telephone transactions may be difficult to complete. If you are unable to contact the Fund by telephone, you may also mail the requests to the Fund at the address listed previously in the "How to Purchase Shares" section.

Telephone trades must be received by or prior to the close of the NYSE (generally 4:00 p.m., Eastern time). During periods of high market activity, shareholders may encounter higher than usual call waiting times. Please allow sufficient time to ensure that you will be able to complete your telephone transaction prior to the close of the NYSE.

Your broker-dealer or other financial institution may establish policies that differ from those of the Fund. For example, the institution may charge transaction fees, set higher minimum investments or impose certain limitations on buying or selling shares in addition to those identified in this Prospectus. Contact your broker-dealer or other financial institution for details.

The Adviser retains the right to close the Fund (or partially close the Fund) to new purchases if it is determined to be in the best interest of shareholders. Based on market and Fund conditions, the Adviser may decide to close the Fund to new investors, all investors or certain classes of investors (such as Fund supermarkets) at any time. If the Fund is closed to new purchases it will continue to honor redemption requests, unless the right to redeem shares has been temporarily suspended as permitted by federal law.

Householding. In an effort to decrease costs, the Fund intends to reduce the number of duplicate prospectuses and annual and semi-annual reports you receive by sending only one copy of each to those addresses shared by two or more accounts and to shareholders the Fund reasonably believes are from the same family or household. Once implemented, if you would like to discontinue householding for your accounts, please call toll-free at ____-____-____ to request individual copies of these documents. Once the Fund receives notice to stop householding, the Fund will begin sending individual copies 30 days after receiving your request. This policy does not apply to account statements.

Distribution of Fund Shares and Payments to Financial Intermediaries

The Distributor

Quasar Distributors, LLC (the “Distributor”) is located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, and serves as distributor and principal underwriter to the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. Shares of the Fund are offered on a continuous basis.

Payments to Financial Intermediaries

The Fund may pay service fees to intermediaries, such as banks, broker-dealers, financial advisors or other financial institutions, including affiliates of the Adviser, for sub-administration, sub-transfer agency and other shareholder services associated with shareholders whose shares are held of record in omnibus accounts, other group accounts or accounts traded through registered securities clearing agents.

The Adviser, out of its own resources and without additional cost to the Fund or its shareholders, may provide additional cash payments or non-cash compensation to intermediaries who sell shares of the Fund. These payments and compensation are in addition to service fees paid by the Fund, if any. Payments are generally made to intermediaries that provide shareholder servicing, marketing support or access to sales meetings, sales representatives and management representatives of the intermediary. Compensation may also be paid to intermediaries for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. Compensation may be paid as an expense reimbursement in cases in which the intermediary provides shareholder services to the Fund. The Adviser may also pay cash compensation in the form of finder’s fees that vary depending on the dollar amount of the shares sold.

Distributions and Taxes

Distributions

Distributions from the net investment income of the Fund will be declared and paid monthly. The Funds will distribute any net realized long-term or short-term capital gains at least annually, typically within the month of December. The Fund may make additional distributions of net capital gains if it deems it desirable at another time during any year.

All distributions will be reinvested in Fund shares unless you choose one of the following options: (1) receive distributions of net capital gains in cash, while reinvesting net investment income distributions in additional Fund shares; (2) receive all distributions in cash; or (3) reinvest net capital gain distributions in additional Fund shares, while receiving distributions of net investment income in cash.

If you wish to change your distribution option, write to the Transfer Agent in advance of the payment date of the distribution. However, any such change will be effective only as to distributions for which the record date is five or more business days after the Transfer Agent has received the written request.

If you elect to receive distributions in cash and the U.S. Postal Service cannot deliver your check, or if a check remains uncashed for six months, the Fund reserves the right to reinvest the distribution check in your account at the Fund’s then current NAV and to reinvest all subsequent distributions.

Tax Consequences

Distributions of the Fund’s net investment income (which includes, but is not limited to, interest, dividends, net short-term capital gains and net gains from foreign currency transactions), if any, are generally taxable to the Fund’s shareholders as ordinary income. To the extent that the Fund’s distributions of net investment income are designated as attributable to “qualified dividend” income, such income may be subject to tax at the reduced rate of federal income tax applicable to non-corporate shareholders for net long-term capital gains, if certain holding period requirements have been satisfied by the Fund and the shareholder. To the extent the Fund’s distributions of net investment income are attributable to net short-term capital gains; such distributions will be treated as ordinary income for the purposes of income tax reporting and will not be available to offset a shareholder’s capital losses from other investments.

[Table of Contents](#)

Distributions of net capital gains (net long-term capital gains less net short-term capital losses) are generally taxable as long-term capital gains (currently at a maximum rate of 15%) regardless of the length of time a shareholder has owned Fund shares.

You will be taxed in the same manner whether you receive your distributions (whether of net investment income or net capital gains) in cash or reinvest them in additional Fund shares.

Shareholders that sell or redeem shares generally will have a capital gain or loss from the sale or redemption. The amount of the gain or loss and the applicable rate of federal income tax will depend generally upon the amount paid for the shares, the amount received from the sale or redemption and how long the shares were held by a shareholder. If you purchase Fund shares within 30 days before or after redeeming other Fund shares at a loss, all or part of that loss will not be deductible and will instead increase the basis of the newly purchased shares.

Shareholders will be advised annually as to the federal tax status of all distributions made by the Fund for the preceding year. Distributions by the Fund may also be subject to state and local taxes. Additional tax information may be found in the SAI.

Due to the nature of the Fund’s investment strategies and potential high portfolio turnover rate, much of the Fund’s net investment income will likely be attributable to net short-term capital gains. Such distributions will be treated as ordinary dividend income for the purposes of income tax reporting, will not be taxable as “qualified dividend” income and will not be available to offset a shareholder’s capital losses from other investments.

This section is not intended to be a full discussion of federal tax laws and the effect of such laws on you. There may be other federal, state, foreign or local tax considerations applicable to a particular investor. You are urged to consult your own tax adviser.

Financial Highlights

Because the Fund has recently commenced operations, there are no financial highlights available at this time.

PRIVACY NOTICE

The Fund collects non-public personal information about you from the following sources:

- information we receive about you on applications or other forms;
- information you give us orally; and/or
- information about your transactions with us or others.

We do not disclose any non-public personal information about our shareholders or former shareholders without the shareholder's authorization, except as permitted by law or in response to inquiries from governmental authorities. We may share information with affiliated parties and unaffiliated third parties with whom we have contracts for servicing the Fund. We will provide unaffiliated third parties with only the information necessary to carry out their assigned responsibility. All shareholder records will be disposed of in accordance with applicable law. We maintain physical, electronic and procedural safeguards to protect your non-public personal information and require third parties to treat your non-public personal information with the same high degree of confidentiality.

In the event that you hold shares of the Fund through a financial intermediary, including, but not limited to, a broker-dealer, bank or trust company, the privacy policy of your financial intermediary would govern how your non-public personal information would be shared with unaffiliated third parties.

The Trust

The Trust is a Delaware statutory trust organized on May 29, 2001, and is registered with the Securities and Exchange Commission (“SEC”) as an open-end management investment company. The Fund is one series, or mutual fund, formed by the Trust. The Fund is a diversified series and has its own investment objective and policies. As of the date of this SAI, shares of twenty-four other series of the Trust are offered in separate prospectuses and SAIs. The Trust may start additional series and offer shares of a new fund under the Trust at any time.

The Trust is authorized to issue an unlimited number of interests (or shares). Interests in the Fund are represented by shares of beneficial interest each with a par value of \$0.001. Each series of the Trust has equal voting rights and liquidation rights, and are voted in the aggregate and not by the series except in matters where a separate vote is required by the Investment Company Act of 1940, as amended (the “1940 Act”), or when the matters affect only the interests of a particular series. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned. The Trust does not normally hold annual meetings of shareholders. The Trust’s Board of Trustees (the “Board of Trustees”) shall promptly call and give notice of a meeting of shareholders for the purpose of voting upon removal of any trustee when requested to do so in writing by shareholders holding 10% or more of the Trust’s outstanding shares.

With respect to the Fund, the Trust may offer more than one class of shares. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class.

Each share of the Fund represents an equal proportionate interest in the assets and liabilities belonging to the Fund and is entitled to such distributions out of the income belonging to the Fund as are declared by the Board of Trustees. The Board of Trustees has the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series so long as the proportionate beneficial interests in the assets belonging to that series and the rights of shares of any other series are in no way affected. Additionally, in case of any liquidation of a series, the holders of shares of the series being liquidated are entitled to receive a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series are borne by that series. Any general expenses of the Trust not readily identifiable as belonging to a particular series are allocated by, or under the direction of, the Board of Trustees on the basis of relative net assets, number of shareholders or other equitable method. No shareholder is liable to further calls or to assessment by the Trust without his or her express consent.

The assets of the Fund received for the issue or sale of its shares, and all income, earnings, profits and proceeds thereof, subject only to the rights of creditors, shall constitute the underlying assets of the Fund. In the event of the dissolution or liquidation of the Fund, the holders of shares of the Fund are entitled to share pro rata in the net assets of the Fund available for distribution to shareholders.

Performance Trust Investment Advisors, LLC (the “Adviser”) serves as the investment adviser to the Fund.

Investment Policies, Strategies and Associated Risks

The investment objective of the Fund is to purchase undervalued fixed income assets and achieve investment returns through interest income and potential capital appreciation. The Fund is diversified. Under applicable federal laws, to qualify as a diversified fund, the Fund, with respect to at least 75% of its total assets, may not invest greater than 5% of its assets in any one issuer and may not hold greater than 10% of the securities of one issuer. The remaining 25% of the Fund’s total assets does not need to be “diversified” and may be invested in the securities of a single issuer, subject to other applicable laws. The diversification of a mutual fund’s holdings is measured at the time the fund purchases a security. However, if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund’s total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers. Because the Fund is diversified, the Fund is less subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities.

There is no assurance that the Fund will achieve its investment objective. The following discussion supplements the description of the Fund's investment objective and principal investment strategies set forth in the Prospectus. Except for the fundamental investment limitations listed below (see "Fundamental Investment Limitations"), the Fund's investment strategies and policies are not fundamental and may be changed by sole action of the Board of Trustees, without shareholder approval. While the Fund is permitted to hold securities and engage in various strategies as described hereafter, it is not obligated to do so. The Fund's investment objective and strategies may be changed without the approval of the Fund's shareholders upon 60 days' written notice to shareholders.

Whenever an investment policy or limitation states a maximum percentage of the Fund's assets that may be invested in any security, or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund's acquisition or sale of such security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent change in values, net assets or other circumstances will not be considered when determining whether an investment complies with the Fund's investment policies and limitations. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by the Fund, the Fund may receive stock, real estate or other investments that the Fund would not, or could not, buy. If this happens, the Fund will sell such investments as soon as practicable while trying to maximize the return to its shareholders. Please note, however, that the guidance referenced in the first two sentences of this paragraph does not apply to the Fund's investments in illiquid securities or the Fund's borrowing of money.

Mortgage-Backed Securities and Asset-Backed Securities

Mortgage-backed securities represent direct or indirect participations in, or are secured by and payable from, mortgage loans secured by real property, and include single- and multi-class pass-through securities and collateralized mortgage obligations ("CMOs"). Such securities may be issued or guaranteed by U.S. Government agencies or instrumentalities, such as the Government National Mortgage Association ("GNMA"), commonly known as "Ginnie Mae," Federal National Mortgage Association ("FNMA"), commonly known as "Fannie Mae," Federal Home Loan Mortgage Corporation ("FHLMC"), commonly known as "Freddie Mae," or by private issuers, generally originators and investors in mortgage loans, including savings associations, mortgage bankers, commercial banks, investment bankers and special purpose entities (collectively, "private lenders").

Mortgage-backed securities issued by private lenders may be supported by pools of mortgage loans or other mortgage-backed securities that are guaranteed, directly or indirectly, by the U.S. Government or one of its agencies or instrumentalities, or they may be issued without any governmental guarantee of the underlying mortgage assets but with some form of non-governmental credit enhancement. Until recently, FNMA and FHLMC were government-sponsored corporations owned entirely by private stockholders. In September 2008, at the direction of the U.S. Department of the Treasury, FNMA and FHLMC were placed into conservatorship under the FHFA. The U.S. government also took steps to provide additional financial support to FNMA and FHLMC. No assurance can be given that the U.S. Treasury initiatives with respect to FNMA and FHLMC will be successful.

Asset-backed debt obligations represent direct or indirect participation in, or are secured by and payable from, assets such as motor vehicle installment sales contracts, other installment loan contracts, home equity loans, leases of various types of property and receivables from credit card or other revolving credit arrangements. The credit quality of most asset-backed securities depends primarily on the credit quality of the assets underlying such securities, how well the entity issuing the security is insulated from the credit risk and bankruptcy of the originator or any other affiliated entities and the amount and quality of any credit enhancement of the securities. Payments or distributions of principal and interest on asset-backed debt obligations may be supported by non-governmental credit enhancements including letters of credit, reserve funds, over-collateralization and guarantees by third parties.

The rate of principal payment on mortgage- and asset-backed securities generally depends on the rate of principal payments received on the underlying assets, which in turn may be affected by a variety of economic and other factors. As a result, the yield on any mortgage- or asset-backed security is difficult to predict with precision and actual yield to maturity may be more or less than the anticipated yield to maturity. The yield characteristics of mortgage- and asset-backed debt obligations differ from those of traditional debt obligations. Among the principal differences are that interest and principal payments are made more frequently on mortgage- and asset-backed debt obligations, usually monthly, and that principal may be prepaid at any time because the underlying assets generally may be prepaid at any time. As a result, if these debt obligations or securities are purchased at a premium, a prepayment rate that is faster than expected will reduce yield to maturity, while a prepayment rate that is slower than expected will have the opposite effect of increasing the yield to maturity. Conversely, if these debt obligations or securities are purchased at a discount, a prepayment rate that is faster than expected will increase yield to maturity, while a prepayment rate that is slower than expected will reduce yield to maturity. Mortgage-backed securities available for reinvestment by the Fund are likely to be greater during a period of declining interest rates and, as a result, are likely to be reinvested at lower interest rates than during a period of rising interest rates. Accelerated prepayments on debt obligations or securities purchased at a premium also impose a risk of loss of principal because the premium may not have been fully amortized at the time the principal is prepaid in full. The market for privately issued mortgage-backed securities is smaller and less liquid than the market for government-sponsored mortgage-backed securities.

While asset-backed securities may be issued with only one class of security, many asset-backed securities are issued in more than one class, each with different payment terms. Mortgage-backed securities may be issued with either a single class of security or multiple classes, which are commonly referred to as a CMO. Multiple class mortgage- and asset-backed securities are issued for two main reasons. First, multiple classes may be used as a method of providing selective credit support. This is accomplished typically through creation of one or more classes whose right to payments on the asset-backed security is made subordinate to the right to such payments of the remaining class or classes. Second, multiple classes may permit the issuance of securities with payment terms, interest rates or other characteristics differing both from those of each other and from those of the underlying assets. Examples include separate trading of registered interest and principal of securities ("STRIPS") (mortgage- and asset-backed securities entitling the holder to disproportionate interests with respect to the allocation of interest and principal of the assets backing the security), and securities with class or classes having characteristics that mimic the characteristics of non-asset-backed securities, such as floating interest rates (i.e., interest rates that adjust as a specified benchmark changes) or scheduled amortization of principal.

The Fund may invest in stripped mortgage-backed securities, which receive differing proportions of the interest and principal payments from the underlying assets, including interest-only (“IO”) and principal-only (“PO”) securities. IO and PO mortgage-backed securities may be illiquid. The market value of such securities generally is more sensitive to changes in prepayment and interest rates than is the case with traditional mortgage-backed securities, and in some cases such market value may be extremely volatile.

Mortgage- and asset-backed securities, other than as described above, or in which the payment streams on the underlying assets are allocated in a manner different than those described above may be issued in the future. The Fund may invest in such mortgage- and asset-backed securities if such investment is otherwise consistent with its investment objective and policies and with the investment restrictions of the Fund.

If the Fund purchases mortgage- or asset-backed securities that are “subordinated” to other interests in the same mortgage pool, the Fund as a holder of those securities may only receive payments after the pool’s obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the mortgages held by a mortgage pool may substantially limit the pool’s ability to make payments of principal or interest to the Fund as a holder of such subordinated securities, reducing the values of those securities or in some cases rendering them worthless. The risk of such defaults is generally higher in the case of mortgage pools that include so called “subprime” mortgages. An unexpectedly high or low rate of prepayments on a pool’s underlying mortgages may have a similar effect on subordinated securities. A mortgage pool may issue securities subject to various levels of subordination, and the risk of non-payment affects securities at each level, although the risk is greater in the case of more highly subordinated securities.

Debt Securities

The Fund’s investments in debt securities may include obligations of any rating or maturity. The Fund may invest in investment grade corporate debt securities and lower-rated corporate debt securities (commonly known as “junk bonds”). Lower rated or high-yield debt securities, generally referred to as “junk bonds,” include corporate high-yield debt securities, zero-coupon securities, paid-in kind securities and strips. Investment grade corporate bonds are those rated BBB or better by Standard & Poor’s Rating Service (“S&P”) or Baa or better by Moody’s Investors Service, Inc. (“Moody’s”). Securities rated BBB by S&P are considered investment grade, but Moody’s considers securities rated Baa to have speculative characteristics. See [Appendix A](#) for a description of corporate bond ratings. The Fund may also invest in unrated securities.

Junk Bonds. Junk bonds generally offer a higher current yield than is available for higher grade issues. Companies issuing high-yield junk bonds are more likely to experience financial difficulties that may lead to a weakened capacity to make principal and interest payments than issuers of higher grade securities. Issuers of junk bonds are often highly leveraged and are more vulnerable to changes in the economy, such as a recession or rising interest rates, which may affect their ability to meet their interest or principal payment obligations. During periods of economic downturn or rising interest rates, highly leveraged issuers may experience financial stress that could adversely affect their ability to make payments of interest and principal and could increase the possibility of default. In addition, the market for lower rated debt securities has expanded rapidly in recent years, and its growth has paralleled a long economic expansion. At times in recent years, the prices of many lower rated debt securities declined substantially, reflecting an expectation that many issuers of such securities might experience financial difficulties. As a result, the yields on lower rated debt securities rose dramatically, but the higher yields did not reflect the value of the income stream that holders of such securities expected, but rather the risk that such securities would lose a substantial portion of their value as a result of the issuer’s financial restructuring or default. There can be no assurance that such declines will not recur. The market for lower rated debt issues generally is thinner and less active than that for higher quality securities, which may limit the Fund’s ability to sell such securities at fair value in response to changes in the economy or financial markets. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of lower-rated securities, especially in a thinly traded market. Changes by recognized rating services in their ratings of a debt security affect the value of these investments. The Fund will not necessarily dispose of a security when its rating is reduced below its rating at the time of purchase. However, the Adviser will monitor the investment to determine whether continued investment in the security will further the Fund’s investment objective.

Corporate Debt Securities. Corporate debt securities are debt securities issued by businesses to finance their operations, although corporate debt instruments may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities, with the primary difference being their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured.

The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small, medium and large capitalizations. Corporate debt may be rated investment grade or below investment grade and may carry variable or floating rates of interest. Because of the wide range of types and maturities of corporate debt securities, as well as the range of creditworthiness of their issuers, corporate debt securities have widely varying potentials for return and varying risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment grade may have a modest return on principal but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that the Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt securities may vary based on the priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. The issuer may not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities falls when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

Auction Rate Securities. Auction Rate Securities ("ARS") are long-term, variable-rate bonds tied to short-term interest rates. ARS have a long-term nominal maturity with interest rates reset through a modified Dutch auction, at predetermined short-term intervals, usually seven, 28 or 35 days. ARS trade at par and are "callable" (meaning that the issuer may require the bondholder to sell the bond back to the issuer) at par on any interest payment date. Common issuers of ARS include municipalities, non-profit hospitals, utilities, housing finance agencies, student loan finance authorities and universities. Credit risk associated with ARS is similar to the default risk associated with other municipal and corporate bond issuers. Bond insurance is usually used to lower the credit risk of ARS. ARS are subject to liquidity risk if the auction process used to reset the interest rates fails because there are more orders to sell the ARS than bids to purchase the ARS. If an auction process fails, existing holders of ARS would have to continue to hold their ARS until there were a sufficient number of bids to purchase the ARS at the next auction to calculate the interest rate reset. Since mid-February 2008, most auctions have failed due to insufficient demand for securities and have continued to fail for an extended period of time. Failed auctions may adversely impact the liquidity of ARS investments. Although some issuers of ARS are redeeming or are considering redeeming these securities, such issuers are not obligated to do so. Therefore, there is no guarantee that a liquid market will exist for ARS at a time when the Fund wishes to dispose of these securities.

Zero-Coupon Securities. The Fund may invest in zero-coupon bonds as part of its investment strategy, without limitation. Zero-coupon securities make no periodic interest payments but are sold at a deep discount to their face value. The buyer recognizes a rate of return determined by the gradual appreciation of the security, which is redeemed at face value on a specified maturity date. The discount varies depending on the time remaining until maturity, as well as market interest rates, the liquidity of the security, and the issuer's perceived credit quality. If the issuer defaults, the holder may not receive any return on his or her investment. Because zero-coupon securities bear no interest and compound semiannually at the rate fixed at the time of issuance, their value generally is more volatile than the value of other debt securities. Since zero-coupon bondholders do not receive interest payments, when interest rates rise, zero-coupon securities fall more dramatically in value than bonds that pay interest on a current basis. When interest rates fall, zero-coupon securities rise more rapidly in value because they reflect a fixed rate of return. An investment in zero-coupon and delayed interest securities may cause the Fund to recognize income, and therefore the Fund may be required to make distributions to shareholders before the Fund receives any cash payments on its investment.

Unrated Debt Securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their debt securities. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed by the Adviser to determine whether to purchase unrated bonds for the Fund.

U.S. Government Obligations

The Fund may invest in U.S. Government obligations. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government. U.S. Treasury obligations differ mainly in the length of their maturity. Treasury bills, the most frequently issued marketable government securities, have a maturity of up to one year and are issued on a discount basis.

Payment of principal and interest on U.S. Government obligations be backed by the full faith and credit of the United States. U.S. Government obligations are subject to fluctuations in market value due to fluctuations in market interest rates. As a general matter, the value of debt instruments, including U.S. Government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. Government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

Agency Obligations

As a non-principal strategy, the Fund may make investments in agency obligations, such as the Export-Import Bank of the United States, Tennessee Valley Authority, Resolution Funding Corporation, Farmers Home Administration, Federal Home Loan Banks, Federal Intermediate Credit Banks, Federal Farm Credit Banks, Federal Land Banks, Federal Housing Administration, GNMA, FNMA, FHLMC and the Student Loan Marketing Association ("SLMA"). Some, such as those of the Export-Import Bank of United States, are supported only by the right of the issuer to borrow from the Treasury; others, such as those of the FNMA and FHLMC, are supported by only the discretionary authority of the U.S. government to purchase the agency's obligations; still others, such as those of the SLMA, are supported only by the credit of the instrumentality. No assurance can be given that the U.S. government would provide financial support to U.S. government-sponsored instrumentalities because they are not obligated by law to do so. As a result, there is a risk that these entities will default on a financial obligation. For instance, in September 2008, at the direction of the U.S. Treasury, FNMA and FHLMC were placed into conservatorship under the Federal Housing Finance Agency ("FHFA"), a newly created independent regulator.

[Table of Contents](#)

Derivatives

The Fund may invest in derivative securities. Derivatives are financial instruments whose value is based on an underlying asset, such as a stock or a bond, an underlying economic factor, such as an interest rate or a market benchmark, such as an index. Unless otherwise stated in the Fund's prospectus, the Fund may use derivatives for risk management purposes, including to gain exposure to various markets in a cost efficient manner, to reduce transaction costs, alter duration or to remain fully invested. The Fund may also invest in derivatives to protect it from broad fluctuations in market prices, interest rates or foreign currency exchange rates (a practice known as "hedging"). When hedging is successful, the Fund will have offset a portion of the depreciation in the value of its portfolio securities by the appreciation in the value of the derivative position. Although techniques other than the sale and purchase of derivatives could be used to control the exposure of the Fund to market fluctuations, the use of derivatives may be a more effective means of hedging this exposure. To the extent that the Fund engages in hedging, there can be no assurance that any hedge will be effective or that there will be a hedge in place at any given time.

Options, Futures and Other Strategies

General. The Fund may use certain options (both traded on an exchange and over-the-counter ("OTC")), futures contracts (sometimes referred to as "futures") and options on futures contracts (collectively, "Financial Instruments") as a substitute for a comparable market position in the underlying security, to attempt to hedge or limit the exposure of the Fund's position, to create a synthetic money market position, for certain tax-related purposes and to effect closing transactions.

The use of Financial Instruments is subject to applicable regulations of the SEC, the several exchanges upon which they are traded and the Commodity Futures Trading Commission (the "CFTC"). In addition, the Fund's ability to use Financial Instruments will be limited by tax considerations. Pursuant to a claim for exemption filed with the National Futures Association on behalf of the Fund, the Fund is not deemed to be a commodity pool operator or a commodity pool under the Commodity Exchange Act and is not subject to registration or regulation as such under the Commodity Exchange Act. In addition to the instruments, strategies and risks described below and in the Prospectus, the Adviser may discover additional opportunities in connection with Financial Instruments and other similar or related techniques. These new opportunities may become available as the Adviser develops new techniques, as regulatory authorities broaden the range of permitted transactions and as new Financial Instruments or other techniques are developed. The Adviser may utilize these opportunities to the extent that they are consistent with the Fund's investment objective and permitted by the Fund's investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below or in the Prospectus.

Special Risks. The use of Financial Instruments involves special considerations and risks, certain of which are described below. Risks pertaining to particular Financial Instruments are described in the sections that follow.

[Table of Contents](#)

(1) Successful use of most Financial Instruments depends upon the Adviser's ability to predict movements of the overall securities markets, which requires different skills than predicting changes in the prices of individual securities. The ordinary spreads between prices in the cash and futures markets, due to the differences in the natures of those markets, are subject to distortion. Due to the possibility of distortion, a correct forecast of stock market trends by the Adviser may still not result in a successful transaction. The Adviser may be incorrect in its expectations as to the extent of market movements or the time span within which the movements take place, which, thus, may result in the strategy being unsuccessful.

(2) Options and futures prices can diverge from the prices of their underlying instruments. Options and futures prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract, which may not affect security prices the same way. Imperfect or no correlation also may result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, and from imposition of daily price fluctuation limits or trading halts.

(3) As described below, the Fund might be required to maintain assets as "cover," maintain segregated accounts or make margin payments when it takes positions in Financial Instruments involving obligations to third parties (e.g., Financial Instruments other than purchased options). If the Fund were unable to close out its positions in such Financial Instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expired or matured. These requirements might impair the Fund's ability to sell a portfolio security or make an investment when it would otherwise be favorable to do so or require that the Fund sell a portfolio security at a disadvantageous time. The Fund's ability to close out a position in a Financial Instrument prior to expiration or maturity depends on the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the other party to the transaction (the "counter-party") to enter into a transaction closing out the position. Therefore, there is no assurance that any position can be closed out at a time and price that is favorable to the Fund.

(4) Losses may arise due to unanticipated market price movements, lack of a liquid secondary market for any particular instrument at a particular time or due to losses from premiums paid by the Fund on options transactions.

Cover. Transactions using Financial Instruments, other than purchased options, expose the Fund to an obligation to another party. The Fund will not enter into any such transactions unless it owns either (1) an offsetting ("covered") position in securities or other options or futures contracts or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. The Fund will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with its custodian, U.S. Bank, N.A. (the "Custodian"), in the prescribed amount as determined daily.

Assets used as cover or held in an account cannot be sold while the position in the corresponding Financial Instrument is open, unless they are replaced with other appropriate assets. As a result, the commitment of a large portion of the Fund's assets to cover accounts could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

Options. The value of an option position will reflect, among other things, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment and general market conditions. Options that expire unexercised have no value. Options currently are traded on the Chicago Board Options Exchange ("CBOE"), the NYSE Amex and other exchanges, as well as the OTC markets.

By buying a call option on a security, the Fund has the right, in return for the premium paid, to buy the security underlying the option at the exercise price. By writing (selling) a call option and receiving a premium, the Fund becomes obligated during the term of the option to deliver securities underlying the option at the exercise price if the option is exercised. By buying a put option, the Fund has the right, in return for the premium, to sell the security underlying the option at the exercise price. By writing a put option, the Fund becomes obligated during the term of the option to purchase the securities underlying the option at the exercise price.

Because options premiums paid or received by the Fund are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities.

The Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, the Fund may terminate its obligation under a call or put option that it had written by purchasing an identical call or put option. This is known as a closing purchase transaction. Conversely, the Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option. This is known as a closing sale transaction. Closing transactions permit the Fund to realize profits or limit losses on an option position prior to its exercise or expiration.

Risks of Options on Commodities, Currencies and Securities. Exchange-traded options in the United States are issued by a clearing organization affiliated with the exchange on which the option is listed that, in effect, guarantees completion of every exchange-traded option transaction. In contrast, OTC options are contracts between the Fund and its counter-party (usually a securities dealer or a bank) with no clearing organization guarantee. Thus, when the Fund purchases an OTC option, it relies on the counter-party from whom it purchased the option to make or take delivery of the underlying investment upon exercise of the option. Failure by the counter-party to do so would result in the loss of any premium paid by the Fund as well as the loss of any expected benefit of the transaction.

The Fund's ability to establish and close out positions in exchange-traded options depends on the existence of a liquid market. However, there can be no assurance that such a market will exist at any particular time. Closing transactions can be made for OTC options only by negotiating directly with the counter-party or by a transaction in the secondary market if any such market exists. There can be no assurance that the Fund will in fact be able to close out an OTC option position at a favorable price prior to expiration. In the event of insolvency of the counter-party, the Fund might be unable to close out an OTC option position at any time prior to its expiration.

If the Fund were unable to effect a closing transaction for an option it had purchased, it would have to exercise the option to realize any profit. The inability to enter into a closing purchase transaction for a covered call option written by the Fund could cause material losses because the Fund would be unable to sell the investment used as cover for the written option until the option expires or is exercised.

Options on Indices. An index fluctuates with changes in the market values of the securities included in the index. Options on indices give the holder the right to receive an amount of cash upon exercise of the option. Receipt of this cash amount will depend upon the closing level of the index upon which the option is based being greater than (in the case of a call) or less than (in the case of put) the exercise price of the option. Some stock index options are based on a broad market index such as the S&P 500 Index, the NYSE Composite Index or the NYSE Arca Index or on a narrower index such as the Philadelphia Stock Exchange Over-the-Counter Index.

Each of the exchanges has established limitations governing the maximum number of call or put options on the same index that may be bought or written by a single investor, whether acting alone or in concert with others (regardless of whether such options are written on the same or different exchanges or are held or written on one or more accounts or through one or more brokers). Under these limitations, option positions of all investment companies advised by the Adviser are combined for purposes of these limits. Pursuant to these limitations, an exchange may order the liquidation of positions and may impose other sanctions or restrictions. These position limits may restrict the number of listed options that the Fund may buy or sell.

Puts and calls on indices are similar to puts and calls on securities or futures contracts except that all settlements are in cash and gain or loss depends on changes in the index in question rather than on price movements in individual securities or futures contracts. When the Fund writes a call on an index, it receives a premium and agrees that, prior to the expiration date, the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the closing level of the index upon which the call is based is greater than the exercise price of the call. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call times a specified multiple ("multiplier"), which determines the total value for each point of such difference. When the Fund buys a call on an index, it pays a premium and has the same rights to such call as are indicated above. When the Fund buys a put on an index, it pays a premium and has the right, prior to the expiration date, to require the seller of the put, upon the Fund's exercise of the put, to deliver to the Fund an amount of cash if the closing level of the index upon which the put is based is less than the exercise price of the put, which amount of cash is determined by the multiplier, as described above for calls. When the Fund writes a put on an index, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the closing level of the index and the exercise price times the multiplier if the closing level is less than the exercise price.

Risks of Options on Indices. If the Fund has purchased an index option and exercises it before the closing index value for that day is available, it runs the risk that the level of the underlying index may subsequently change. If such a change causes the exercised option to fall out-of-the-money, the Fund will be required to pay the difference between the closing index value and the exercise price of the option (times the applicable multiplier) to the assigned writer.

OTC Options. Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. While this type of arrangement allows the Fund great flexibility to tailor the option to its needs, OTC options generally involve greater risk than exchange-traded options, which are guaranteed by the clearing organization of the exchanges where they are traded.

Futures Contracts and Options on Futures Contracts. A futures contract obligates the seller to deliver (and the purchaser to take delivery of) the specified security on the expiration date of the contract. An index futures contract obligates the seller to deliver (and the purchaser to take) an amount of cash equal to a specific dollar amount times the difference between the value of a specific index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying securities in the index is made.

When the Fund writes an option on a futures contract, it becomes obligated, in return for the premium paid, to assume a position in the futures contract at a specified exercise price at any time during the term of the option. If the Fund writes a call, it assumes a short futures position. If it writes a put, it assumes a long futures position. When the Fund purchases an option on a futures contract, it acquires the right in return for the premium it pays to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put).

Whether the Fund realizes a gain or loss from futures activities depends upon movements in the underlying security or index. The extent of the Fund's loss from an unhedged short position in futures contracts or from writing unhedged call options on futures contracts is potentially unlimited. The Fund only purchases and sells futures contracts and options on futures contracts that are traded on a U.S. exchange or board of trade.

No price is paid upon entering into a futures contract. Instead, at the inception of a futures contract the Fund is required to deposit "initial margin" in an amount generally equal to 10% or less of the contract value. Margin also must be deposited when writing a call or put option on a futures contract, in accordance with applicable exchange rules. Unlike margin in securities transactions, initial margin does not represent a borrowing, but rather is in the nature of a performance bond or good-faith deposit that is returned to the Fund at the termination of the transaction if all contractual obligations have been satisfied. Under certain circumstances, such as periods of high volatility, the Fund may be required by an exchange to increase the level of its initial margin payment, and initial margin requirements might be increased generally in the future by regulatory action.

Subsequent "variation margin" payments are made to and from the futures commission merchant daily as the value of the futures position varies, a process known as "marking-to-market." Variation margin does not involve borrowing, but rather represents a daily settlement of the Fund's obligations to or from a futures commission merchant. When the Fund purchases an option on a futures contract, the premium paid plus transaction costs is all that is at risk. In contrast, when the Fund purchases or sells a futures contract or writes a call or put option thereon, it is subject to daily variation margin calls that could be substantial in the event of adverse price movements. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

Purchasers and sellers of futures contracts and options on futures can enter into offsetting closing transactions, similar to closing transactions in options, by selling or purchasing, respectively, an instrument identical to the instrument purchased or sold. Positions in futures and options on futures contracts may be closed only on an exchange or board of trade that provides a secondary market. However, there can be no assurance that a liquid secondary market will exist for a particular contract at a particular time. In such event, it may not be possible to close a futures contract or options position.

Under certain circumstances, futures exchanges may establish daily limits on the amount that the price of a futures contract or an option on a futures contract can vary from the previous day's settlement price. Once that limit is reached, no trades may be made that day at a price beyond the limit. Daily price limits do not limit potential losses because prices could move to the daily limit for several consecutive days with little or no trading, thereby preventing liquidation of unfavorable positions.

If the Fund were unable to liquidate a futures contract or an option on a futures position due to the absence of a liquid secondary market or the imposition of price limits, it could incur substantial losses. The Fund would continue to be subject to market risk with respect to the position. In addition, except in the case of purchased options, the Fund would continue to be required to make daily variation margin payments and might be required to maintain cash or liquid assets in an account.

Risks of Futures Contracts and Options Thereon. The ordinary spreads between prices in the cash and futures markets (including the options on futures markets), due to differences in the natures of those markets, are subject to the following factors, which may create distortions. First, all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions, which could distort the normal relationships between the cash and futures markets. Second, the liquidity of the futures market depends on participants entering into offsetting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortion. Third, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities market. Therefore, increased participation by speculators in the futures market may cause temporary price distortions.

Combined Positions. The Fund may purchase and write options in combination with each other. For example, the Fund may purchase a put option and write a call option on the same underlying instrument in order to construct a combined position whose risk and return characteristics are similar to selling a futures contract. Another possible combined position would involve writing a call option at one strike price and buying a call option at a lower price, in order to reduce the risk of the written call option in the event of a substantial price increase. Because combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open and close out.

Swap Agreements

The Fund may enter into swap agreements. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or “swapped” between the parties are calculated with respect to a “notional amount,” i.e., the return on or increase in value of a particular dollar amount invested in a “basket” of securities representing a particular index.

Most swap agreements entered into by the Fund calculate the obligations of the parties to the agreement on a “net basis.” Consequently, the Fund’s current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the “net amount”). Payments may be made at the conclusion of a swap agreement or periodically during its term.

Swap agreements do not involve the delivery of securities or other underlying assets. Accordingly, if a swap is entered into on a net basis, if the other party to a swap agreement defaults, the Fund’s risk of loss consists of the net amount of payments that such Fund is contractually entitled to receive, if any.

The net amount of the excess, if any, of the Fund’s obligations over its entitlements with respect to a swap agreement entered into on a net basis will be accrued daily and an amount of cash or liquid asset having an aggregate net asset value (“NAV”) at least equal to the accrued excess will be maintained in an account with the Custodian that satisfies the 1940 Act. The Fund will also establish and maintain such accounts with respect to its total obligations under any swaps that are not entered into on a net basis. Obligations under swap agreements so covered will not be construed to be “senior securities” for purposes of the Fund’s investment restriction concerning senior securities.

Because they are two-party contracts and may have terms of greater than seven days, swap agreements may be considered to be illiquid for the Fund illiquid investment limitations. The Fund will not enter into any swap agreement unless the Adviser believes that the other party to the transaction is creditworthy. The Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty.

The Fund may enter into a swap agreement in circumstances where the Adviser believes that it may be more cost effective or practical than buying the underlying securities or a futures contract or an option on such securities. The counterparty to any swap agreement will typically be a bank, investment banking firm or broker/dealer. The counterparty will generally agree to pay the Fund the amount, if any, by which the notional amount of the swap agreement would have increased in value had it been invested in the particular stocks represented in the index, plus the dividends that would have been received on those stocks. The Fund will agree to pay to the counterparty a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such stocks. Therefore, the return to the Fund on any swap agreement should be the gain or loss on the notional amount plus dividends on the stocks less the interest paid by the Fund on the notional amount.

The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid in comparison with the markets for other similar instruments that are traded in the OTC market. The Adviser, under the supervision of the Board, is responsible for determining and monitoring the liquidity of Fund transactions in swap agreements.

Real Estate Investment Trusts (“REITs”)

REITs invest primarily in real property and earn rental income from leasing those properties. They also may realize gains or losses from the sale of properties. REITs generally exercise some degree of control over the operational aspects of their real estate investments, lease terms and property maintenance and repair. Mortgage REITs invest primarily in mortgages and similar real estate interests and receive interest payments from the owners of the mortgaged properties and are paid interest by the owners of the financed properties. Hybrid REITs invest both in real property and in mortgages.

A REIT generally is not taxed on income distributed to its shareholders if it complies with certain federal tax requirements relating primarily to its organization, ownership, assets and income and, further, if it distributes the vast majority of its taxable income to shareholders each year. Consequently, REITs tend to focus on income-producing real estate investments.

A Fund’s investments in REITs may be adversely affected by deteriorations of the real estate rental market, in the case of REITs that primarily own real estate, or by deteriorations in the creditworthiness of property owners and changes in interest rates in the case of REITs that primarily hold mortgages. REITs also are dependent upon specialized management skills, may not be diversified in their holdings and are subject to the risks of financing projects. REITs also may be subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. Under certain circumstances, a REIT may fail to qualify for such tax-free pass-through of income, which would subject the REIT to federal income taxes and adversely affect the value of its securities.

When-Issued Securities

When-issued securities transactions involve a commitment by the Fund to purchase or sell particular securities with payment and delivery taking place at a future date, and permit the Fund to lock in a price or yield on a security it owns or intends to purchase, regardless of future changes in interest rates or market action. No income accrues to the purchaser of a security on a when-issued basis prior to delivery. Such securities are recorded as an asset and are subject to changes in value based upon changes in the general level of interest rates. Purchasing a security on a when-issued basis can involve a risk that the market price at the time of delivery may be lower than the agreed-upon purchase price, in which case there could be an unrealized loss at the time of delivery. The Funds will only make commitments to purchase securities on a when-issued basis with the intention of actually acquiring the securities, but may sell them before the settlement date if it is deemed advisable. The Fund will establish in a segregated account, or earmark as segregated on the books of the Fund or the Fund's custodian, an amount of liquid assets equal to 102% of the amount of its commitment to purchase securities on a when-issued basis. These assets will be marked-to-market daily, and the Fund will increase the aggregate value of the assets, as necessary, to ensure that the assets are at least equal to 102% of the amount of the Fund's commitments.

Temporary Strategies; Cash or Similar Investments

For temporary defensive purposes, the Adviser may invest up to 100% of the Fund's total assets in high-quality, short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of other mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. Taking a temporary defensive position may result in the Fund not achieving its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market funds' management fees and operational expenses.

For longer periods of time, the Fund may hold a substantial cash position. If the market advances during periods when the Fund is holding a large cash position, the Fund may not participate to the extent it would have if the Fund had been more fully invested, and this may result in the Fund not achieving its investment objective during that period. To the extent that the Fund uses a money market fund for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market fund's advisory fees and operational expenses.

The Fund may invest in any of the following securities and instruments:

Money Market Mutual Funds. The Fund may invest in money market mutual funds in connection with its management of daily cash positions or as a temporary defensive measure. Generally, money market mutual funds seek to earn income consistent with the preservation of capital and maintenance of liquidity. They primarily invest in high quality money market obligations, including securities issued or guaranteed by the U.S. Government or its agencies and instrumentalities, bank obligations and high-grade corporate instruments. These investments generally mature within 397 days from the date of purchase. An investment in a money market mutual fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any government agency. The Fund's investments in money market mutual funds may be used for cash management purposes and to maintain liquidity in order to satisfy redemption requests or pay unanticipated expenses.

Your cost of investing in the Fund will generally be higher than the cost of investing directly in the underlying money market mutual fund shares. You will indirectly bear fees and expenses charged by the underlying money market mutual funds in addition to the Fund's direct fees and expenses. Furthermore, the use of this strategy could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes payable by you.

[Table of Contents](#)

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits. The Fund may acquire certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by the Fund will be dollar-denominated obligations of domestic or foreign banks or financial institutions which at the time of purchase have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operations of the banking industry.

As a result of federal and state laws and regulations, domestic banks are, among other things, required to maintain specified levels of reserves, limited in the amount which they can loan to a single borrower and subject to other regulations designed to promote financial soundness. However, such laws and regulations do not necessarily apply to foreign bank obligations that the Fund may acquire.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under the investment objective and policies stated above and in the Prospectus, the Fund may make interest-bearing time or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. The Fund may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. The Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short-term notes will consist of issues rated at the time of purchase "A-2" or higher by S&P, "Prime-1" or "Prime-2" by Moody's, or similarly rated by another nationally recognized statistical ratings organization ("NRSRO") or, if unrated, will be determined by the Adviser to be of comparable quality.

Corporate obligations include bonds and notes issued by corporations to finance longer-term credit needs than supported by commercial paper. While such obligations generally have maturities of ten years or more, the Fund may purchase corporate obligations which have remaining maturities of one year or less from the date of purchase and which are rated "A" or higher by S&P or "A" or higher by Moody's.

Borrowing

As a non-principal investment strategy, the Fund may borrow money for investment purposes, which is a form of leveraging, to the extent permitted by the 1940 Act. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk while increasing investment opportunity. Leverage will magnify changes in the Fund's net asset value and on the Fund's investments. Although the principal of such borrowings will be fixed, the Fund's assets may change in value during the time the borrowing is outstanding. Leverage also creates interest expenses for the Funds. To the extent the income derived from securities purchased with borrowed funds exceeds the interest the Fund will have to pay, the Fund's net income will be greater than it would be if leverage were not used. Conversely, if the income from the assets obtained with borrowed funds is not sufficient to cover the cost of leveraging, the net income of the Fund will be less than it would be if leverage were not used, and therefore the amount available for distribution to shareholders as dividends will be reduced. The use of derivatives in connection with leverage creates the potential for significant loss.

The Fund may also borrow funds to meet redemptions or for other emergency purposes. Such borrowings may be on a secured or unsecured basis at fixed or variable rates of interest. The 1940 Act requires the Fund to maintain continuous asset coverage of not less than 300% with respect to all borrowings. If such asset coverage should decline to less than 300% due to market fluctuations or other reasons, the Fund may be required to dispose of some of its portfolio holdings within three days in order to reduce the Fund's debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to dispose of assets at that time.

The Fund also may be required to maintain minimum average balances in connection with such borrowing or to pay a commitment or other fee to maintain a line of credit. Either of these requirements would increase the cost of borrowing over the stated interest rate.

Borrowing by the Fund creates an opportunity for increased net income, but at the same time, creates special risk considerations. For example, leveraging may exaggerate the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio.

Illiquid Securities

Historically, illiquid securities have included securities subject to contractual or legal restrictions on resale because they have not been registered under the Securities Act, securities which are otherwise not readily marketable, and securities such as repurchase agreements having a maturity of longer than seven days. Securities which have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. In recent years, however, a large institutional market has developed for certain securities that are not registered under the Securities Act including repurchase agreements, commercial paper, foreign securities, municipal securities and corporate bonds and notes. Institutional investors depend on an efficient institutional market in which the unregistered security can be readily resold or on an issuer's ability to honor a demand for repayment. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. The Board of Trustees may determine that such securities are not illiquid securities notwithstanding their legal or contractual restrictions on resale. In all other cases, however, securities subject to restrictions on resale will be deemed illiquid. The Fund will determine a security to be illiquid if it cannot be sold or disposed of in the ordinary course of business within seven days at the value at which the Fund has valued the security. Factors considered in determining whether a security is illiquid may include, but are not limited to: the frequency of trades and quotes for the security; the number of dealers willing to purchase and sell the security and the number of potential purchasers; the number of dealers who undertake to make a market in the security; the nature of the security, including whether it is registered or unregistered, and the market place; whether the security has been rated by a NRSRO; the period of time remaining until the maturity of a debt instrument or until the principal amount of a demand instrument can be recovered through demand; the nature of any restrictions on resale; and with respect to municipal lease obligations and certificates of participation, there is reasonable assurance that the obligation will remain liquid throughout the time the obligation is held and, if unrated, an analysis similar to that which would be performed by a NRSRO is performed. The Fund will not invest more than 15% of the value of its net assets, taken at the time of investment, in illiquid securities, including repurchase agreements providing for settlement in more than seven days after notice, non-negotiable fixed time deposits with maturities over seven days, over-the-counter options and certain restricted securities not determined by the Board of Trustees to be liquid.

Fundamental Investment Limitations

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a “majority of the outstanding voting securities” of the Fund, as defined in the 1940 Act. Under the 1940 Act, the vote of the holders of a “majority of the outstanding voting securities” means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund.

The Fund may not:

1. issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its total assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales in accordance with its objectives and strategies;
2. underwrite the securities of other issuers (except that the Fund may engage in transactions involving the acquisition, disposition or resale of its portfolio securities under circumstances where it may be considered to be an underwriter under the Securities Act);
3. purchase or sell real estate or interests in real estate, unless acquired as a result of ownership of securities (although the Fund may purchase and sell securities which are secured by real estate and securities of companies that invest or deal in real estate);
4. purchase or sell physical commodities or commodities contracts, unless acquired as a result of ownership of securities or other instruments and provided that this restriction does not prevent the Fund from engaging in transactions involving currencies and futures contracts and options thereon or investing in securities or other instruments that are secured by physical commodities;
5. make loans of money (except for the lending of its portfolio securities and purchases of debt securities consistent with the investment policies of the Fund);
6. with respect to 75% of its total assets, purchase the securities of any one issuer if, immediately after and as a result of such purchase, (a) the value of the Fund’s holdings in the securities of such issuer exceeds 5% of the value of the Fund’s total assets, or (b) the Fund owns more than 10% of the outstanding voting securities of the issuer (this restriction does not apply to investments in the securities of the U.S. Government, or its agencies or instrumentalities, or other investment companies);

[Table of Contents](#)

7. invest in the securities of any one industry if, as a result, 25% or more of the Fund's total assets would be invested in the securities of such industry, except that the foregoing does not apply to (a) the Fund's investments in mortgage-backed securities; or (b) securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities or securities of other investment companies.

The following lists the non-fundamental investment restrictions applicable to the Fund. These restrictions can be changed by the Board of Trustees, but the change will only be effective after notice is given to shareholders of the Fund.

The Fund may not:

1. Invest more than 15% of the value of its net assets, computed at the time of investment, in illiquid securities. Illiquid securities are those securities without readily available market quotations, including repurchase agreements having a maturity of more than seven days. Illiquid securities may include restricted securities not determined by the Board of Trustees to be liquid, non-negotiable time deposits, over-the-counter options, and repurchase agreements providing for settlement in more than seven days after notice;
2. Make any change in its investment policy of investing at least 80% of net assets in investments suggested by the Fund's name without first changing the Fund's name and providing shareholders with at least 60 days' prior written notice.

Except with respect to borrowing and investments in illiquid securities, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

Management of the Fund

Board of Trustees

The management and affairs of the Fund are supervised by the Board of Trustees. The Board of Trustees consists of four individuals. The Trustees are fiduciaries for the Fund's shareholders and are governed by the laws of the State of Delaware in this regard. The Board of Trustees establishes policies for the operation of the Fund and appoints the officers who conduct the daily business of the Fund.

Board Leadership Structure

The Trust is a multiple series trust comprised of individual series, or mutual funds, managed by unaffiliated investment advisers. The Board of Trustees is comprised of three Independent Trustees – Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel – and one Interested Trustee – Mr. Joseph C. Neuberger. The Trust's Chairman, Mr. Neuberger, is an interested person of the Trust by virtue of the fact that he is an interested person of Quasar Distributors, LLC, which acts as principal underwriter to many of the Trust's underlying funds. Mr. Neuberger also serves as the Trust's President and the Executive Vice President of the Trust's administrator. The Trust has not appointed a lead Independent Trustee.

The Board of Trustees has established two standing committees – the Audit Committee and the Nominating Committee. All Independent Trustees are members of the Audit Committee and the Nominating Committee. Inclusion of all Independent Trustees as members of the Audit Committee and the Nominating Committee allows all such Trustees to participate in the full range of the Board of Trustees' oversight duties, including oversight of risk management processes.

In accordance with the fund governance standards prescribed by the SEC under the 1940 Act, the Independent Trustees on the Nominating Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board of Trustees because of his experience, qualifications, attributes and/or skills as set forth in the subsection "Director Qualifications," below. The Board of Trustees reviews its leadership structure regularly. The Board of Trustees believes that its leadership structure is appropriate given the characteristics and circumstances of the Trust, including: the unaffiliated nature of each investment adviser and the fund(s) managed by such adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent distribution arrangements of each of the Trust's underlying funds.

The Board of Trustees' role is one of oversight rather than day-to-day management of any of the Trust's underlying funds. The Trust's Audit Committee assists with this oversight function. The Board of Trustees' oversight extends to the Trust's risk management processes. Those processes are overseen by Trust officers, including the President, Treasurer, Secretary and Chief Compliance Officer ("CCO"), who regularly report to the Board of Trustees on a variety of matters at Board meetings.

Investment advisers managing the Trust's underlying funds report to the Board of Trustees, on a regular and as-needed basis, on actual and possible risks affecting the Trust's underlying funds. These investment advisers report to the Board of Trustees on various elements of risk, including investment, credit, liquidity, valuation, operational and compliance risks, as well as any overall business risks that could impact the Trust's underlying funds.

[Table of Contents](#)

The Board of Trustees has appointed the CCO who reports directly to the Board and who participates in the Board’s regular meetings. In addition, the CCO presents an annual report to the Board of Trustees in accordance with the Trust’s compliance policies and procedures. The CCO, together with the Trust’s Treasurer and Secretary, regularly discusses risk issues affecting the Trust and its underlying funds during Board of Trustee meetings. The CCO also provides updates to the Board of Trustees on the operation of the Trust’s compliance policies and procedures and on how these procedures are designed to mitigate risk. Finally, the CCO and/or other officers of the Trust report to the Board of Trustees in the event any material risk issues arise in between Board meetings.

Trustees and Officers

The Trustees and officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years.

Name, Address and Age	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in the Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee
<i>Independent Trustees</i>					
Dr. Michael D. Akers 615 E. Michigan St. Milwaukee, WI 53202 Age: 54	Trustee	Indefinite Term; Since August 22, 2001	25	Professor and Chair, Department of Accounting, Marquette University (2004- present); Associate Professor of Accounting, Marquette University (1996-2004).	Independent Trustee, USA MUTUALS (an open-end investment company with two portfolios).
Gary A. Drska 615 E. Michigan St. Milwaukee, WI 53202 Age: 53	Trustee	Indefinite Term; Since August 22, 2001	25	Captain, Midwest Airlines, Inc. (airline company) (2000-present); Director, Flight Standards & Training (July 1990-December 1999).	Independent Trustee, USA MUTUALS (an open-end investment company with two portfolios).
Jonas B. Siegel 615 E. Michigan St. Milwaukee, WI 53202 Age: 66	Trustee	Indefinite Term; Since October 23, 2009	25	Managing Director, Chief Administrative Officer ("CAO") and Chief Compliance Officer ("CCO"), Granite Capital International Group, L.P. (an investment management firm) (1994- Present); Vice President, Secretary, Treasurer and CCO of Granum Series Trust (an open- end investment company) (1997-2007); President, CAO and CCO, Granum Securities, LLC (a broker-dealer) (1997-2007).	None.

Name, Address and Age	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in the Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee

Jennifer A. Lima 615 E. Michigan St. Milwaukee, WI 53202 Age: 36	Assistant Treasurer	Indefinite Term; Since January 10, 2008	N/A	Mutual Fund Administrator, U.S. Bancorp Fund Services, LLC (2002-Present).	N/A

* Mr. Neuberger is an “interested person” of the Trust as defined by the 1940 Act. Mr. Neuberger is an interested person of the Trust by virtue of the fact that he is an interested person of Quas Distributors, LLC, the Fund’s distributor.

Trustee Qualifications

The following is a brief discussion of the experience, qualifications, attributes and/or skills that led to the Board of Trustees' conclusion that each individual identified below is qualified to serve as a Trustee of the Trust.

Dr. Michael D. Akers. Dr. Akers has served as a Trustee of the Trust since August 2001. Dr. Akers has also served as an independent trustee of USA Mutuals, an open-end investment company, since 2001. Dr. Akers has been a Professor and Chair of the Department of Accounting of Marquette University since 2004, and was Associate Professor of Accounting of Marquette University from 1996 to 2004. Through his experience as a trustee of mutual funds and his employment experience, Dr. Akers is experienced with financial, accounting, regulatory and investment matters.

Gary A. Drska. Mr. Drska has served as a Trustee of the Trust since August 2001. Mr. Drska has also served as an independent trustee of USA Mutuals since 2001. Mr. Drska has served as a Captain of Midwest Airlines, Inc., an airline company, since 2000. Through his experience as a trustee of mutual funds, Mr. Drska is experienced with financial, accounting, regulatory and investment matters.

Joseph C. Neuberger. Mr. Neuberger has served as a Trustee of the Trust since August 2001. Mr. Neuberger has also served as a trustee of USA Mutuals since 2001 and Buffalo Funds, an open-end investment company, since 2003. Mr. Neuberger has served as Executive Vice President of U.S. Bancorp Fund Services, a multi-service line service provider to mutual funds, since 1994. Through his experience as a trustee of mutual funds and his employment experience, Mr. Neuberger is experienced with financial, accounting, regulatory and investment matters.

Jonas B. Siegel. Mr. Siegel has served as a Trustee of the Trust since November 2009. Mr. Siegel has also served as the Managing Director, Chief Administrative Officer and Chief Compliance Officer of Granite Capital International Group, L.P., an investment management firm, since 1994, and previously served as Vice President, Secretary, Treasurer and Chief Compliance Officer of Granum Series Trust, an open-end investment company, from 1997 to 2007, and as President, Chief Administrative Officer and Chief Compliance Officer of Granum Securities, LLC, an investment banking firm, from 1997 to 2007. Through his experience as a trustee of mutual funds and his employment experience, Mr. Siegel is experienced with financial, accounting, regulatory and investment matters.

Trustee Ownership of Fund Shares

As of the date of this SAI, no Trustee or officer of the Trust beneficially owned shares of the Fund or any other series of the Trust.

Furthermore, neither the Trustees who are not "interested" persons of the Fund, nor members of their immediate family, own securities beneficially, or of record, in the Adviser, the Fund's distributor or any of its affiliates. Accordingly, neither the Trustees who are not "interested" persons of the Fund nor members of their immediate family, have a direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, the Fund's distributor or any of their affiliates.

Board Committees

Audit Committee. The Trust has an Audit Committee, which is comprised of the independent members of the Board of Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel. The Audit Committee reviews financial statements and other audit-related matters for the Fund. The Audit Committee also holds discussions with management and with the Fund's independent auditor concerning the scope of the audit and the auditor's independence.

Nominating Committee. The Trust has a Nominating Committee, which is comprised of the independent members of the Board of Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel. The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary.

The Nominating Committee will consider nominees recommended by shareholders for vacancies on the Board of Trustees. Recommendations for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed nominee, and such recommendation must comply with the notice provisions set forth in the Trust's By-Laws. In general, to comply with such procedures, such nominations, together with all required information, must be delivered to and received by the Secretary of the Trust at the principal executive office of the Trust not later than 60 days prior to the shareholder meeting at which any such nominee would be voted on. Shareholder recommendations for nominations to the Board of Trustees will be accepted on an ongoing basis and such recommendations will be kept on file for consideration when there is a vacancy on the Board of Trustees. The Nominating Committee's procedures with respect to reviewing shareholder nominations will be disclosed as required by applicable securities laws.

Valuation Committee. The Trust has a Valuation Committee. The Valuation Committee is responsible for the following: (1) monitoring the valuation of Fund securities and other investments; and (2) as required, when the Board of Trustees is not in session, determining the fair value of illiquid securities and other holdings after consideration of all relevant factors, which determinations are reported to the Board. The Valuation Committee is currently comprised of Mr. Neuberger, Mr. John Buckel and Ms. Jennifer Lima, who each serve as an officer of the Trust. The Valuation Committee meets as necessary when a price for a portfolio security is not readily available.

As the Fund is new, none of the Trust's Committees have met with respect to the Fund.

Trustee Compensation

For their service as Trustees, the Independent Trustees receive a retainer fee of \$25,000 per year, \$1,500 for each in-person Board meeting and \$750 for each telephonic Board meeting of the Trust, as well as reimbursement for expenses incurred in connection with attendance at board meetings. Interested Trustees do not receive any compensation for their service as Trustee. Because the Fund has recently commenced operations, the following compensation figures represent estimates for the current fiscal year ending May 31, 2011:

Name of Person/Position	Aggregate Compensation From the Fund¹	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from Fund and the Trust² Paid to Trustees
Dr. Michael D. Akers, Independent Trustee	\$12,400	None	None	\$32,500
Gary A. Drska, Independent Trustee	\$12,400	None	None	\$32,500
Jonas B. Siegel Independent Trustee	\$12,400	None	None	\$32,500
Joseph C. Neuberger, Interested Trustee	None	None	None	None

- ¹ Trustees fees and expenses are allocated among the Fund and any other series comprising the Trust.
- ² There are currently twenty-four other portfolios comprising the Trust.

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for shareholder vote by the Fund. As of the date of this SAI, there were no principal shareholders or control persons of the Fund.

Investment Adviser

As stated in the Prospectus, investment advisory services are provided to the Fund by the Adviser, Performance Trust Investment Advisors, LLC, pursuant to an Investment Advisory Agreement (the "Advisory Agreement"). The Adviser is wholly-owned by PT Financial, LLC, an Illinois limited liability company.

After an initial two-year period, the Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board of Trustees or by vote of a majority of the Fund's outstanding voting securities and by a majority of the trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Fund upon 60 days' written notice when authorized either by a majority vote of the Fund's shareholders or by a vote of a majority of the Board of Trustees, or by the Adviser upon 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Adviser under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

In consideration of the services provided by the Adviser pursuant to the Advisory Agreement, the Adviser is entitled to receive from the Fund a management fee computed daily and paid monthly, based on a rate equal to 0.60% of the Fund's average daily net assets, as specified in the Prospectus. However, the Adviser may voluntarily agree to waive a portion of the management fees payable to it on a month-to-month basis, including additional fees above and beyond any contractual agreement the Adviser may have to waive management fees and/or reimburse Fund expenses.

Fund Expenses. The Fund is responsible for its own operating expenses. The Adviser has agreed to reduce management fees payable to it by the Fund and/or to pay Fund operating expenses to the extent necessary to limit the Fund's aggregate annual operating expenses (exclusive generally of interest, acquired fund fees and expenses, leverage and tax expenses, dividends and interest expenses on short positions, brokerage commissions, and extraordinary expenses) to the limit set forth in the Fees and Expenses table of the Prospectus. Any such reductions made by the Adviser in its management fees or payment of expenses which are the Fund's obligation are subject to reimbursement by the Fund to the Adviser, if so requested by the Adviser, in subsequent fiscal years if the aggregate amount actually paid by the Fund toward the operating expenses for such fiscal year (taking into account the reimbursement) does not exceed the applicable limitation on Fund expenses. The Adviser is permitted to be reimbursed only for fee reductions and expense payments made in the previous three fiscal years from the date the expense was incurred. Any such reimbursement is also contingent upon the Board of Trustees' subsequent review and ratification of the reimbursed amounts. Such reimbursement may not be paid prior to the Fund's payment of current ordinary operating expenses.

Portfolio Managers

As stated in the Prospectus, Messrs. Peter B. Cook, Bradley D. Bonga, G. Michael Plaiss and Anthony J. Harris (the “Portfolio Managers”) are primarily responsible for the day-to-day management of the Fund’s investment portfolio.

The following provides information regarding other accounts managed by the Portfolio Managers as of July 31, 2010:

<u>Name of Portfolio Manager</u>	<u>Registered Investment Companies (excluding the Fund)</u>		<u>Other Pooled Investment Vehicles</u>		<u>Other Accounts</u>	
	<u>Number of Accounts</u>	<u>Total Assets in the Accounts</u>	<u>Number of Accounts</u>	<u>Total Assets in the Accounts</u>	<u>Number of Accounts</u>	<u>Total Assets in the Accounts</u>
Peter B. Cook						
Bradley D. Bonga						
G. Michael Plaiss						
Anthony J. Harris						

The Portfolio Managers’ management of “other accounts” may give rise to potential conflicts of interest in connection with the management of the Fund’s investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the Portfolio Managers could favor one account over another. Another potential conflict could include the Portfolio Managers’ knowledge about the size, timing and possible market impact of Fund trades, whereby the Portfolio Managers could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

The Adviser compensates the Portfolio Managers for their management of the Fund. Portfolio Managers are compensated with a cash salary based on industry standards, and a discretionary bonus. The bonus incentives are tied primarily to investment performance and related goals.

As of the date of this SAI, the Portfolio Managers did not own any securities in the Fund.

Service Providers

Pursuant to an administration agreement (the “Administration Agreement”) between the Trust and U.S. Bancorp Fund Services, LLC (“USBFS”), 615 East Michigan Street, Milwaukee, Wisconsin, 53202 (the “Administrator”), the Administrator acts as the Fund’s administrator. The Administrator provides certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Fund, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, the Administrator does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. USBFS also acts as fund accountant (“Fund Accountant”), transfer agent (“Transfer Agent”) and dividend disbursing agent under separate agreements with the Trust. For its administration and fund accounting services, the Administrator receives from the Fund a combined fee computed daily and payable monthly based on the Fund’s average net assets at the rate of 0.10% of average net assets on the first \$75 million, 0.08% of average net assets on the next \$250 million, and 0.05% on the balance, all subject to an annual minimum fee of \$64,000.

Pursuant to a custody agreement between the Trust and the Fund, U.S. Bank, N.A., an affiliate of USBFS, serves as the custodian of the Fund's assets (the "Custodian"), whereby the Custodian provides for fees on a transaction basis plus out-of-pocket expenses. The Custodian's address is 1555 North River Center Drive, Milwaukee, Wisconsin, 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Fund. U.S. Bank, N.A. and its affiliates may participate in revenue sharing arrangements with service providers of mutual funds in which the Fund may invest.

Legal Counsel

Godfrey & Kahn S.C., 780 North Water Street, Milwaukee, Wisconsin 53202, serves as counsel to the Fund.

Independent Registered Public Accounting Firm

_____ serves as the independent registered public accounting firm of the Fund.

Distribution of Fund Shares

The Trust has entered into a distribution agreement (the "Distribution Agreement") with Quasar Distributors, LLC (the "Distributor"), 615 East Michigan Street, Milwaukee, Wisconsin 53202, pursuant to which the Distributor acts as the Fund's principal underwriter, provides certain administration services and promotes and arranges for the sale of the Fund's shares. The offering of the Fund's shares is continuous. The Distributor, Administrator and Custodian are affiliated companies. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board of Trustees or by vote of a majority of the Fund's outstanding voting securities and, in either case, by a majority of the trustees who are not parties to the Distribution Agreement or "interested persons" (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on 60 days' written notice when authorized either by a majority vote of the Fund's shareholders or by vote of a majority of the Board of Trustees, including a majority of the trustees who are not "interested persons" (as defined in the 1940 Act) of the Trust, or by the Distributor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

Portfolio Transactions and Brokerage

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. Purchases and sales of securities in the over-the-counter market will generally be executed directly with a "market-maker" unless, in the opinion of the Adviser, a better price or execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Fund will be effected through broker-dealers (including banks) that specialize in the types of securities that the Fund will be holding, unless better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other brokerage services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Fund, to be useful in varying degrees, but of indeterminable value. Portfolio transactions may be placed with broker-dealers who sell shares of the Fund subject to rules adopted by FINRA and the SEC. Portfolio transactions may also be placed with broker-dealers in which the Adviser has invested on behalf of the Fund and/or client accounts.

While it is the Fund's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Adviser, even if the specific services are not directly useful to the Fund and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Fund.

Investment decisions for the Fund are made independently from those of other client accounts. Nevertheless, it is possible that at times identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund. Notwithstanding the above, the Adviser may execute buy and sell orders for accounts and take action in performance of its duties with respect to any of its accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practical, allocate investment opportunities to accounts, including the Fund, over a period of time on a fair and equitable basis and in accordance with applicable law.

Portfolio Turnover

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to above-average transaction costs and could generate capital gains that must be distributed to shareholders as short-term capital gains taxed at ordinary income rates (currently as high as 35%). To the extent that the Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund and may result in a greater number of taxable transactions.

Code of Ethics

The Fund, the Adviser and the Distributor have each adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, personnel of the Adviser and Distributor to invest in securities that may be purchased or held by the Fund.

Proxy Voting Procedures

The Board of Trustees has adopted proxy voting policies and procedures ("Proxy Policies") wherein the Trust has delegated to the Adviser the responsibility for voting proxies relating to portfolio securities held by the Fund as part of its investment advisory services, subject to the supervision and oversight of the Board. The Proxy Voting Policies of the Adviser are attached as Appendix B. Notwithstanding this delegation of responsibilities, however, the Fund retains the right to vote proxies relating to its portfolio securities. The fundamental purpose of the Proxy Policies is to ensure that each vote will be in a manner that reflects the best interest of the Fund and its shareholders, taking into account the value of the Fund's investments.

The actual voting records relating to portfolio securities during the most recent 12-month period ended June 30th will be available without charge, upon request, by calling toll-free, (800) SEC-0330 or by accessing the SEC's website at www.sec.gov.

Anti-Money Laundering Compliance Program

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. Ms. Kristin M. Cuene has been designated as the Trust's Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to: determining that the Distributor and the Transfer Agent have established proper anti-money laundering procedures; reporting suspicious and/or fraudulent activity; and a complete and thorough review of all new account applications. The Fund will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Fund may be required to “freeze” the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Fund may be required to transfer the account or proceeds of the account to a governmental agency.

Portfolio Holdings Information

The Trust on behalf of the Fund has adopted portfolio holdings disclosure policies (“Portfolio Holdings Policies”) that govern the timing and circumstances of disclosure of portfolio holdings of the Fund. The Adviser has also adopted the Portfolio Holdings Policies. Information about the Fund’s portfolio holdings will not be distributed to any third party except in accordance with these Portfolio Holdings Policies. The Adviser and the Board of Trustees considered the circumstances under which the Fund’s portfolio holdings may be disclosed under the Portfolio Holdings Policies. The Adviser and the Board of Trustees also considered actual and potential material conflicts that could arise in such circumstances between the interests of the Fund’s shareholders and the interests of the Adviser, Distributor or any other affiliated person of the Fund. After due consideration, the Adviser and the Board of Trustees determined that the Fund has a legitimate business purpose for disclosing portfolio holdings to persons described in the Portfolio Holdings Policies. The Board of Trustees also authorized the Adviser or appointed officers to consider and authorize dissemination of portfolio holdings information to additional parties, after considering the best interests of the shareholders and potential conflicts of interest in making such disclosures.

The Board of Trustees exercises continuing oversight of the disclosure of the Fund’s portfolio holdings by (1) overseeing the implementation and enforcement of the Portfolio Holdings Policies, codes of ethics and other relevant policies of the Fund and its service providers by the CCO, (2) by considering reports and recommendations by the CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) by considering whether to approve any amendment to these Portfolio Holdings Policies. The Board of Trustees reserves the right to amend the Portfolio Holdings Policies at any time without prior notice in its sole discretion.

Disclosure of the Fund’s complete holdings is required to be made quarterly within 60 days of the end of each fiscal quarter, in the annual and semi-annual reports to Fund shareholders, and in the quarterly holdings report on Form N-Q. These reports will be made available, free of charge, on the EDGAR database on the SEC’s website at www.sec.gov.

In the event of a conflict between the interests of the Fund and the interests of the Adviser or an affiliated person of the Adviser, the CCO of the Adviser, in consultation with the Trust’s CCO, shall make a determination in the best interests of the Fund, and shall report such determination to the Board of Trustees at the end of the quarter in which such determination was made. Any employee of the Adviser who suspects a breach of this obligation must report the matter immediately to the Adviser’s CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without lag as part of the normal investment activities of the Fund to each of the following entities which, by explicit agreement or by virtue of their respective duties to the Fund, are required to maintain the confidentiality of the information disclosed: the Administrator; the Fund’s accountant; the Custodian; the Transfer Agent; the Fund’s independent registered public accounting firm; counsel to the Fund or the trustees (current parties are identified in this SAI); broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities); and regulatory authorities. Portfolio holdings information not publicly available with the SEC may only be provided to additional third parties, in accordance with the Portfolio Holdings Policies, when the Fund has a legitimate business purpose, and the third party recipient is subject to a confidentiality agreement. Portfolio holdings information may be separately provided to any person, including rating and ranking organizations such as Lipper and Morningstar, at the same time that it is filed with the SEC or one day after it is first published on the Fund’s website. Portfolio holdings disclosure may be approved under the Portfolio Holdings Policies by the Trust’s CCO, Treasurer or President.

In no event shall the Adviser, its affiliates or employees, or the Fund receive any direct or indirect compensation in connection with the disclosure of information about the Fund’s portfolio holdings.

There can be no assurance that the Portfolio Holdings Policies and these procedures will protect the Fund from potential misuse of that information by individuals or entities to which it is disclosed.

Determination of Net Asset Value

The NAV of the Fund’s shares will fluctuate and is determined as of the close of trading on the New York Stock Exchange (the “NYSE”) (generally 4:00 p.m., Eastern time) each business day. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that it will not be open on the following days: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV per share is computed by dividing the value of the securities held by the Fund plus any cash or other assets (including interest and dividends accrued but not yet received) minus all liabilities (including accrued expenses) by the total number of shares in the Fund outstanding at such time.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{Net Asset Value Per Share}$$

Generally, the Fund’s investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Adviser and the Valuation Committee pursuant to procedures approved by or under the direction of the Board of Trustees.

The Fund’s securities, including depositary receipts, which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and asked price.

Securities that are traded on more than one exchange are valued on the exchange determined by the Adviser to be the primary market. Securities primarily traded on the NASDAQ Stock Market (“NASDAQ”) shall be valued using the NASDAQ Official Closing Price (“NOCP”). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the mean between the bid and asked prices. OTC securities that are not traded on NASDAQ shall be valued at the most recent trade price.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. Short-term debt obligations with 60 days or less remaining to maturity are, unless conditions indicate otherwise, amortized to maturity based on their cost to the Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, based on the value determined on the 61st day.

Exchange traded options are valued at the composite price, using the National Best Bid and Offer quotes (“NBBO”). NBBO consists of the highest bid price and lowest ask price across any of the exchanges on which an option is quoted, thus providing a view across the entire U.S. options marketplace. Specifically, composite pricing looks at the last trades on the exchanges where the options are traded. If there are no trades for the option on a given business day composite option pricing calculates the mean of the highest bid price and lowest ask price across the exchanges where the option is traded.

All other assets of the Fund are valued in such manner as the Board of Trustees in good faith deems appropriate to reflect their fair value.

Purchase and Redemption of Fund Shares

Purchase of Shares

Shares of the Fund are sold in a continuous offering and may be purchased on any business day through authorized intermediaries, as described in the Prospectus, or directly from the Fund. The Fund may authorize one or more brokers to accept purchase orders on a shareholder’s behalf. Brokers are authorized to designate intermediaries to accept orders on the Fund’s behalf. An order is deemed to be received when an authorized broker or agent accepts the order.

Orders received by dealers other than authorized brokers or agents by the close of trading on the NYSE (generally 4:00 p.m., Eastern time) on a business day that are transmitted to the Fund on that day will be effected at the NAV per share determined as of the close of trading on the NYSE on that day. Otherwise, the orders will be processed at the next determined NAV. It is the dealer’s responsibility to transmit orders so that they will be received by the Fund before the close of the NYSE.

Purchase Requests Must be Received in Good Order

Your share price will be based on the next NAV per share calculated after the Transfer Agent or your Authorized Intermediary receives your purchase request in good order. “Good order” means that your purchase request includes:

- the name of the Fund;
- the dollar amount of shares to be purchased;
- your account application or investment stub; and
- a check payable to “Performance Trust Total Return Bond Fund.”

All purchase requests received in good order before the close of the NYSE (generally 4:00 p.m., Eastern time) will be processed on that same day. Purchase requests received after the close of the NYSE (generally 4:00 p.m., Eastern time) will receive the next business day’s NAV per share.

Shares of the Fund have not been registered for sale outside of the United States. The Fund generally does not sell shares to investors residing outside the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses.

[Table of Contents](#)

Redemption of Shares

To redeem shares, shareholders may send a written request in “good order” to:

Regular Mail

Performance Trust Total Return Bond Fund
c/o U.S. Bancorp Fund Services, LLC
P.O. Box 701
Milwaukee, WI 53201-0701

Overnight or Express Mail

Performance Trust Total Return Bond Fund
c/o U.S. Bancorp Fund Services, LLC
615 East Michigan Street, 3rd Floor
Milwaukee, WI 53201-0701

A redemption request will be deemed in “good order” if it includes:

- the shareholder’s name;
- the name of the Fund;
- the account number;
- the share or dollar amount to be redeemed; and
- signatures by all shareholders on the account (with signature(s) guaranteed if applicable).

Redemption proceeds will be sent to the address of record. Signature guarantees can be obtained from banks and securities dealers, but not from a notary public. The Fund will not be responsible for interest lost on redemption amounts due to lost or misdirected mail.

A signature guarantee of each owner is required in the following situations:

- if ownership is changed on your account;
- when redemption proceeds are payable or sent to any person, address or bank account not on record;
- written requests to wire redemption proceeds (if not previously authorized on the account);
- if a change of address request was received by the Transfer Agent within the last 15 days;
- for all redemptions in excess of \$100,000 from any shareholder account.

The Fund does not accept signatures authenticated by a notary public.

The Fund and its transfer agent have adopted standards for accepting signature guarantees from the banks and securities dealers. The Fund may elect in the future to limit eligible signature guarantors to institutions that are members of a signature guarantee program. The Fund and the Transfer Agent reserve the right to amend these standards at any time without notice.

Non-financial transactions, including establishing or modifying certain services on an account, may require a signature verification from a Signature Validation Program member or other acceptable form of authentication from a financial institution source.

Redemption-in-Kind

The Fund does not intend to redeem shares in any form except cash. The Trust, however, has filed a notice of election under Rule 18f-1 of the 1940 Act that allows the Fund to redeem in-kind redemption requests of a certain amount. Specifically, if the amount you are redeeming during any 90-day period is in excess of the lesser of \$250,000 or 1% of the net assets of the applicable share class of the Fund, valued at the beginning of such period, the Fund has the right to redeem your shares by giving you the amount that exceeds \$250,000 or 1% of the net assets of the share class of the Fund in securities instead of cash. If the Fund pays your redemption proceeds by a distribution of securities, you could incur brokerage or other charges in converting the securities to cash, and will bear any market risks associated with such securities until they are converted into cash.

Tax Matters

Each series of the Trust is treated as a separate entity for federal income tax purposes. The Fund, as a series of the Trust, intends to qualify and elects to be treated as a regulated investment company under Subchapter M of the Code, provided it complies with all applicable requirements regarding the source of its income, diversification of its assets and timing of distributions. The Fund's policy is to distribute to its shareholders all of its net investment company taxable income and any net realized long-term capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes based on net income. However, the Fund can give no assurances that its anticipated distributions will be sufficient to eliminate all taxes. If the Fund does not qualify as a regulated investment company, it would be taxed as a corporation and, in such case, it would be more beneficial for a shareholder to directly own the Fund's underlying investments rather than indirectly owning the underlying investments through the Fund. If the Fund fails to distribute (or be deemed to have distributed) by December 31 of each calendar year (i) at least 98% of its ordinary income for such year, (ii) at least 98% of the excess of its realized capital gains over its realized capital losses for the 12-month period ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax, the Fund will be subject to a 4% excise tax.

Net investment income generally consists of interest, dividends and short-term capital gains, less expenses. Net realized capital gains for a fiscal period are computed by taking into account any capital loss carryforward of the Fund.

Distributions of net investment income are taxable to shareholders as ordinary income. For individual shareholders, a portion of the distributions paid by the Fund may consist of qualified dividends eligible for taxation at the rate applicable to long-term capital gains to the extent the Fund designates the amount distributed as a qualified dividend and the shareholder meets certain holding period requirements with respect to his or her Fund shares. The current federal tax provisions applicable to "qualified dividends" are scheduled to expire for tax years beginning after December 31, 2010. In the case of corporate shareholders, a portion of the distributions may qualify for the intercorporate dividends-received deduction to the extent the Fund designates the amount distributed as eligible for deduction and the shareholder meets certain holding period requirements with respect to its Fund shares. The aggregate amount so designated to either individuals or corporate shareholders cannot, however, exceed the aggregate amount of such dividends received by the Fund for its taxable year. In view of the Fund's investment policies, it is expected that part of the distributions by the Fund may be eligible for the qualified dividend income treatment for individual shareholders and the dividends-received deduction for corporate shareholders.

Any long-term capital gain distributions are taxable to shareholders as long-term capital gains regardless of the length of time shares have been held. Net capital gains distributions are not eligible for the qualified dividend income treatment or the dividends-received deduction referred to in the previous paragraph.

Distributions of any net investment income and net realized capital gains will be taxable as described above, whether received in shares or in cash. Shareholders who choose to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date. Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable as if received on December 31. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the alternative minimum tax.

A redemption or exchange of Fund shares may result in recognition of a taxable gain or loss. Any loss realized upon a redemption or exchange of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains received on those shares. Any loss realized upon a redemption or exchange may be disallowed under certain wash sale rules to the extent shares of the Fund are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption or exchange.

Except in the case of certain exempt shareholders, if a shareholder does not furnish the Fund with its correct Taxpayer Identification Number and certain certifications or the Fund receives notification from the Internal Revenue Service requiring back-up withholding, the Fund is required by federal law to withhold federal income tax from the shareholder's distributions and redemption proceeds currently at a rate of 28% for U.S. residents.

Foreign taxpayers (including nonresident aliens) are generally subject to a flat withholding rate, currently 30% on U.S. source income. This withholding rate may be lower under the terms of a tax convention. Certain distributions of short-term capital gains and qualified interest income of the Fund will not be subject to such withholding for tax years beginning prior to 2010.

This discussion and the related discussion in the Prospectus have been prepared by Fund management, and counsel to the Fund has expressed no opinion in respect thereof.

This section is not intended to be a full discussion of federal tax laws and the effect of such laws on you. There may be other federal, state, foreign or local tax considerations to a particular investor. You are urged to consult your own tax adviser.

Distributions

The Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund's net investment income, substantially all of which will be distributed to the Fund's shareholders.

The amount of the Fund's distributions is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board of Trustees. The Fund does not pay "interest" or guarantee any fixed rate of return on an investment in their shares.

The Fund also may derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain the Fund may realize from transactions involving investments held less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any carryover of capital losses from the eight previous taxable years), although a distribution from capital gains, will be distributed to shareholders with and as a part of the distributions of net investment income giving rise to ordinary income. If during any year the Fund realizes a net gain on transactions involving investments held for the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses carried over from the eight previous taxable years) will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax adviser.

Any distribution paid by the Fund reduces that Fund's NAV per share on the date paid by the amount of the distribution per share. Accordingly, a distribution paid shortly after a purchase of shares by a shareholder would represent, in substance, a partial return of capital (to the extent it is paid on the shares so purchased), even though it would be subject to income taxes.

Distributions will be made in the form of additional shares of the Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of distributions by notifying the Transfer Agent in writing. However, any such change will be effective only as to distributions for which the record date is five or more business days after the Transfer Agent has received the written request.

Financial Statements

As the Fund has recently commenced operations, there are no financial statements available at this time. Shareholders of the Fund will be informed of the Fund's progress through periodic reports when those reports become available. Financial statements certified by the independent registered public accounting firm will be submitted to shareholders at least annually.

APPENDIX A -- DESCRIPTION OF BOND RATINGS

SHORT-TERM RATINGS

Standard & Poor's Short-Term Issue Credit Ratings

A Standard & Poor's issue credit rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion evaluates the obligor's capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default. The issue credit rating is not a recommendation to purchase, sell or hold a financial obligation, inasmuch as it does not comment as to market price or suitability for a particular investor.

Issue credit ratings are based on current information furnished by the obligors or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any credit rating and may, on occasion, rely on unaudited financial information. Credit ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

Issue credit ratings can be either long term or short term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. The result is a dual rating, in which the short-term rating addresses the put feature, in addition to the usual long-term rating. Medium-term notes are assigned long-term ratings.

Short-Term Issue Credit Ratings

A-1

A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

[Table of Contents](#)

B

A short-term obligation rated 'B' is regarded as having significant speculative characteristics. Ratings of 'B-1', 'B-2', and 'B-3' may be assigned to indicate finer distinctions within the 'B' category. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B-1

A short-term obligation rated 'B-1' is regarded as having significant speculative characteristics, but the obligor has a relatively stronger capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-2

A short-term obligation rated 'B-2' is regarded as having significant speculative characteristics, and the obligor has an average speculative-grade capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

B-3

A short-term obligation rated 'B-3' is regarded as having significant speculative characteristics, and the obligor has a relatively weaker capacity to meet its financial commitments over the short-term compared to other speculative-grade obligors.

C

A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Dual Ratings

Standard & Poor's assigns "dual" ratings to all debt issues that have a put option or demand feature as part of their structure. The first rating addresses the likelihood of repayment of principal and interest as due, and the second rating addresses only the demand feature. The long-term rating symbols are used for bonds to denote the long-term maturity and the short-term rating symbols for the put option (for example, 'AAA/A-1+'). With U.S. municipal short-term demand debt, note rating symbols are used with the short-term issue credit rating symbols (for example, 'SP-1+/A-1+').

i

This subscript is used for issues in which the credit factors, terms, or both, that determine the likelihood of receipt of payment of interest are different from the credit factors, terms or both that determine the likelihood of receipt of principal on the obligation. The 'i' subscript indicates that the rating addresses the interest portion of the obligation only. The 'i' subscript will always be used in conjunction with the 'p' subscript, which addresses likelihood of receipt of principal. For example, a rated obligation could be assigned ratings of "AAAp NRi" indicating that the principal portion is rated "AAA" and the interest portion of the obligation is not rated.

L

Ratings qualified with 'L' apply only to amounts invested up to federal deposit insurance limits.

p

This subscript is used for issues in which the credit factors, the terms, or both, that determine the likelihood of receipt of payment of principal are different from the credit factors, terms or both that determine the likelihood of receipt of interest on the obligation. The 'p' subscript indicates that the rating addresses the principal portion of the obligation only. The 'p' subscript will always be used in conjunction with the 'i' subscript, which addresses likelihood of receipt of interest. For example, a rated obligation could be assigned ratings of "AAAp NRi" indicating that the principal portion is rated "AAA" and the interest portion of the obligation is not rated.

pi

Ratings with a 'pi' subscript are based on an analysis of an issuer's published financial information, as well as additional information in the public domain. They do not, however, reflect in-depth meetings with an issuer's management and are therefore based on less comprehensive information than ratings without a 'pi' subscript. Ratings with a 'pi' subscript are reviewed annually based on a new year's financial statements, but may be reviewed on an interim basis if a major event occurs that may affect the issuer's credit quality.

pr

The letters 'pr' indicate that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of or the risk of default upon failure of such completion. The investor should exercise his own judgment with respect to such likelihood and risk.

preliminary

Preliminary ratings are assigned to issues, including financial programs, in the following circumstances.

- Preliminary ratings may be assigned to obligations, most commonly structured and project finance issues, pending receipt of final documentation and legal opinions. Assignment of a final rating is conditional on the receipt and approval by Standard & Poor's of appropriate documentation. Changes in the information provided to Standard & Poor's could result in the assignment of a different rating. In addition, Standard & Poor's reserves the right not to issue a final rating.
- Preliminary ratings are assigned to Rule 415 Shelf Registrations. As specific issues, with defined terms, are offered from the master registration, a final rating may be assigned to them in accordance with Standard & Poor's policies. The final rating may differ from the preliminary rating.

t

This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.

Unsolicited

Unsolicited ratings are those credit ratings assigned at the initiative of Standard & Poor's and not at the request of the issuer or its agents.

Inactive Qualifiers (No longer applied or outstanding)

This symbol indicated continuance of the ratings is contingent upon Standard & Poor's receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

c

This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer is below an investment-grade level and/or the issuer's bonds are deemed taxable. Discontinued use in January 2001.

q

A 'q' subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.

r

The 'r' modifier was assigned to securities containing extraordinary risks, particularly market risks that are not covered in the credit rating. The absence of an 'r' modifier should not be taken as an indication that an obligation will not exhibit extraordinary non-credit related risks. Standard & Poor's discontinued the use of the 'r' modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Local Currency and Foreign Currency Risks

Country risk considerations are a standard part of Standard & Poor’s analysis for credit ratings on any issuer or issue. Currency of repayment is a key factor in this analysis. An obligor’s capacity to repay foreign currency obligations may be lower than its capacity to repay obligations in its local currency due to the sovereign government’s own relatively lower capacity to repay external versus domestic debt. These sovereign risk considerations are incorporated in the debt ratings assigned to specific issues. Foreign currency issuer ratings are also distinguished from local currency issuer ratings to identify those instances where sovereign risks make them different for the same issuer.

Moody’s Short-Term Debt Ratings

Short-Term Ratings

Moody’s short-term ratings are opinions of the ability of issuers to honor short-term financial obligations. Ratings may be assigned to issuers, short-term programs or to individual short-term debt instruments. Such obligations generally have an original maturity not exceeding thirteen months, unless explicitly noted.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

P-1

Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP

Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Note: Canadian issuers rated P-1 or P-2 have their short-term ratings enhanced by the senior-most long-term rating of the issuer, its guarantor or support-provider.

LONG-TERM RATINGS

Standard & Poor's Long-Term Issue Credit Ratings

Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on the following considerations:

- Likelihood of payment capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation;
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A 'C' rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the 'C' rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized. An obligation's rating is lowered to "D" upon completion of a distressed exchanged offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

Plus (+) or minus (-)

The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR

This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

Active Qualifiers (Currently applied and/or outstanding)

i

This subscript is used for issues in which the credit factors, terms, or both, that determine the likelihood of receipt of payment of interest are different from the credit factors, terms or both that determine the likelihood of receipt of principal on the obligation. The 'i' subscript indicates that the rating addresses the interest portion of the obligation only. The 'i' subscript will always be used in conjunction with the 'p' subscript, which addresses likelihood of receipt of principal. For example, a rated obligation could be assigned ratings of "AAAp NRi" indicating that the principal portion is rated "AAA" and the interest portion of the obligation is not rated.

L

Ratings qualified with 'L' apply only to amounts invested up to federal deposit insurance limits.

P

This subscript is used for issues in which the credit factors, the terms, or both, that determine the likelihood of receipt of payment of principal are different from the credit factors, terms or both that determine the likelihood of receipt of interest on the obligation. The 'p' subscript indicates that the rating addresses the principal portion of the obligation only. The 'p' subscript will always be used in conjunction with the 'i' subscript, which addresses likelihood of receipt of interest. For example, a rated obligation could be assigned ratings of "AAAp NRI" indicating that the principal portion is rated "AAA" and the interest portion of the obligation is not rated.

pi

Ratings with a 'pi' subscript are based on an analysis of an issuer's published financial information, as well as additional information in the public domain. They do not, however, reflect in-depth meetings with an issuer's management and are therefore based on less comprehensive information than ratings without a 'pi' subscript. Ratings with a 'pi' subscript are reviewed annually based on a new year's financial statements, but may be reviewed on an interim basis if a major event occurs that may affect the issuer's credit quality.

pr

The letters 'pr' indicate that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of or the risk of default upon failure of such completion. The investor should exercise his own judgment with respect to such likelihood and risk.

preliminary

Preliminary ratings are assigned to issues, including financial programs, in the following circumstances.

- Preliminary ratings may be assigned to obligations, most commonly structured and project finance issues, pending receipt of final documentation and legal opinions. Assignment of a final rating is conditional on the receipt and approval by Standard & Poor's of appropriate documentation. Changes in the information provided to Standard & Poor's could result in the assignment of a different rating. In addition, Standard & Poor's reserves the right not to issue a final rating.
- Preliminary ratings are assigned to Rule 415 Shelf Registrations. As specific issues, with defined terms, are offered from the master registration, a final rating may be assigned to them in accordance with Standard & Poor's policies. The final rating may differ from the preliminary rating.

t

This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.

unsolicited

[Table of Contents](#)

Unsolicited ratings are those credit ratings assigned at the initiative of Standard & Poor' and not at the request of the issuer or its agents.

Inactive Qualifiers (No longer applied or outstanding)

*

This symbol indicated continuance of the ratings is contingent upon Standard & Poor's receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

c

This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer is below an investment-grade level and/or the issuer' bonds are deemed taxable. Discontinued use in January 2001.

q

A 'q' subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.

r

The 'r' modifier was assigned to securities containing extraordinary risks, particularly market risks, that are not covered in the credit rating. The absence of an 'r' modifier should not be taken as an indication that an obligation will not exhibit extraordinary non-credit related risks. Standard & Poor's discontinued the use of the 'r' modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Local Currency and Foreign Currency Risks

Country risk considerations are a standard part of Standard & Poor's analysis for credit ratings on any issuer or issue. Currency of repayment is a key factor in this analysis. An obligor's capacity to repay foreign currency obligations may be lower than its capacity to repay obligations in its local currency due to the sovereign government's own relatively lower capacity to repay external versus domestic debt. These sovereign risk considerations are incorporated in the debt ratings assigned to specific issues. Foreign currency issuer ratings are also distinguished from local currency issuer ratings to identify those instances where sovereign risks make them different for the same issuer.

Moody's Long-Term Debt Ratings

Long-Term Obligation Ratings

Moody's long-term obligation ratings are opinions of the relative credit risk of debt obligations with an original maturity of one year or more. They address the possibility that a financial obligation will not be honored as promised. Such ratings reflect both the likelihood of default and any financial loss suffered in the event of default.

[Table of Contents](#)

Moody's Long-Term Rating Definitions:

- Aaa**

Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.
- Aa**

Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
- A**

Obligations rated A are considered upper-medium grade and are subject to low credit risk.
- Baa**

Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics.
- Ba**

Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.
- B**

Obligations rated B are considered speculative and are subject to high credit risk.
- Caa**

Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.
- Ca**

Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
- C**

Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.
- Note:** Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

MUNICIPAL NOTE RATINGS

Standard & Poor's Note Ratings

Short-Term Notes

A Standard & Poor's U.S. municipal note rating reflects the liquidity factors and market access risks unique to notes. Notes due in three years or less will likely receive a note rating. Notes maturing beyond three years will most likely receive a long-term debt rating. The following criteria will be used in making that assessment:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

Moody's MIG/VMIG Ratings U.S. Short-Term Ratings

US Municipal Short-Term Debt and Demand Obligation Ratings

Short-Term Debt Ratings

There are three rating categories for short-term municipal obligations that are considered investment grade. These ratings are designated as Municipal Investment Grade (MIG) and are divided into three levels -- MIG 1 through MIG 3. In addition, those short-term obligations that are of speculative quality are designated SG, or speculative grade. MIG ratings expire at the maturity of the obligation.

MIG 1

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings

In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned; a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of the degree of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of the degree of risk associated with the ability to receive purchase price upon demand ("demand feature"), using a variation of the MIG rating scale, the Variable Municipal Investment Grade or VMIG rating.

When either the long- or short-term aspect of a VRDO is not rated, that piece is designated NR, e.g., Aaa/NR or NR/VMIG 1.

VMIG rating expirations are a function of each issue's specific structural or credit features.

VMIG 1

This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2

This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3

This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG

This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

 - (3) Code of Ethics for Principal Underwriter was previously filed with Registrant's Post-Effective Amendment No. 38 to its Registration Statement on Form N-1A with the SEC on December 14, 2006, and is incorporated by reference.

Item 29. Persons Controlled by or Under Common Control with Registrant

No person is directly or indirectly controlled by or under common control with the Registrant.

Item 30. Indemnification

Reference is made to Article X of the Registrant's Declaration of Trust.

Pursuant to Rule 484 under the Securities Act of 1933, as amended, the Registrant furnishes the following undertaking: "Insofar as indemnification for liability arising under the Securities Act of 1933 (the "Act") may be permitted to trustees, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that, in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue."

Item 31. Business and Other Connections of Investment Adviser

Performance Trust Investment Advisors, LLC (the "Adviser") serves as the investment adviser for the Performance Trust Total Return Bond Fund (the "Fund"). The principal business address of the Adviser is 500 West Madison, Suite 350, Chicago, Illinois 60661. With respect to the Adviser, the response to this Item is incorporated by reference to the Adviser's Uniform Application for Investment Adviser Registration (Form ADV) on file with the Securities and Exchange Commission ("SEC"), and dated April 8, 2010. The Adviser's Form ADV may be obtained, free of charge, at the SEC's website at www.adviserinfo.sec.gov.

Item 32. Principal Underwriter.

- (a) Quasar Distributors, LLC, the Registrant's principal underwriter, acts as principal underwriter for the following investment companies:

Academy Funds Trust	Jensen Portfolio, Inc.
Advisors Series Trust	Keystone Mutual Funds
Allied Asset Advisors Funds	Kiewit Investment Fund, LLLP
Alpine Equity Trust	Kirr Marbach Partners Funds, Inc.
Alpine Income Trust	LKCM Funds
Alpine Series Trust	Masters' Select Funds Trust
Artio Global Funds	Matrix Advisors Value Fund, Inc.
Brandes Investment Trust	Monetta Fund, Inc.
Brandywine Blue Funds, Inc.	Monetta Trust
Bridges Investment Fund, Inc.	MP63 Fund, Inc.
Buffalo Funds	Nicholas Family of Funds, Inc.
Country Mutual Funds Trust	Permanent Portfolio Family of Funds, Inc.
DoubleLine Funds Trust	Perritt Funds, Inc.
Empiric Funds, Inc.	Perritt Microcap Opportunities Fund, Inc.
Evermore Funds Trust	PineBridge Mutual Funds
First American Funds, Inc.	PRIMECAP Odyssey Funds
First American Investment Funds, Inc.	Professionally Managed Portfolios
First American Strategy Funds, Inc.	Prospector Funds, Inc.
Fort Pitt Capital Funds	Purisma Funds
Glenmede Fund, Inc.	Quaker Investment Trust
Glenmede Portfolios	Rainier Investment Management Mutual Funds
Greenspring Fund, Inc.	RBC Funds Trust
Guinness Atkinson Funds	Thompson Plumb Funds, Inc.
Harding Loevner Funds, Inc.	TIFF Investment Program, Inc.
Hennessy Funds Trust	Trust for Professional Managers
Hennessy Funds, Inc.	USA Mutuals Funds
Hennessy Mutual Funds, Inc.	Wall Street Fund
Hennessy SPARX Funds Trust	Wexford Trust
Hotchkis and Wiley Funds	Wisconsin Capital Funds, Inc.
Intrepid Capital Management Funds Trust	WY Funds
Jacob Funds, Inc.	

(b) To the best of Registrant's knowledge, the directors and executive officers of Quasar Distributors, LLC are as follows:

Name and Principal Business Address	Position and Offices with Quasar Distributors, LLC	Positions and Offices with Registrant
James R. Schoenike ⁽¹⁾	President, Board Member	None
Andrew M. Strnad ⁽²⁾	Secretary	None
Joe D. Redwine ⁽¹⁾	Board Member	None
Robert Kern ⁽¹⁾	Board Member	None
Eric W. Falkeis ⁽¹⁾	Board Member	None
Susan LaFond ⁽¹⁾	Treasurer	None
Teresa Cowan ⁽¹⁾	Assistant Secretary	None
⁽¹⁾ This individual is located at 615 East Michigan Street, Milwaukee, Wisconsin, 53202.		
⁽²⁾ This individual is located at 6602 East 75th Street, Indianapolis, Indiana, 46250.		

(c) Not Applicable.

Item 33. Location of Accounts and Records.

The books and records required to be maintained by Section 31(a) of the Investment Company Act of 1940, as amended, are maintained at the following locations:

Records Relating to:	Are located at:
Registrant's Fund Administrator, Fund Accountant, and Transfer Agent	U.S. Bancorp Fund Services, LLC 615 East Michigan Street Milwaukee, WI 53202
Registrant's Investment Adviser	Performance Trust Investment Advisors, LLC 500 West Madison, Suite 350 Chicago, IL 60661
Registrant's Custodian	U.S. Bank, National Association 1555 N. River Center Drive, Suite 302 Milwaukee, WI 53212
Registrant's Distributor	Quasar Distributors, LLC 615 East Michigan Street Milwaukee, WI 53202

Item 34. Management Services

All management-related service contracts entered into by Registrant are discussed in Parts A and B of this Registration Statement.

Item 35. Undertakings

The Registrant hereby undertakes to furnish each person to whom a Prospectus for one or more of the series of the Registrant is delivered with a copy of the relevant latest annual report to shareholders, upon request and without charge.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933 and the Investment Company Act of 1940, the Registrant has duly caused this Registration Statement to be signed below on its behalf by the undersigned, thereunto duly authorized, in the City of Milwaukee and State of Wisconsin, on the 17th day of June, 2010.
