

NEW ENERGY  
SYSTEMS GROUP

# New Energy Systems Group

Investor Presentation  
July 2010

# Forward Looking Statements

---

*Except for the historical information, the matters discussed in this presentation may contain forward-looking statements, including, but not limited to, factors relating to future sales. These forward-looking statements may involve a number of risks and uncertainties. Actual results may differ materially based on a number of factors, including, but not limited to, uncertainties in product demand, risks related to doing business in China, the impact of competitive products and pricing, changing economic conditions around the world, release and sales of new products and other risk factors detailed in the Company's most recent annual report and other filings with the Securities and Exchange Commission.*

# Investment Highlights

---

- Leading provider of lithium ion batteries for portable electronic devices in China
- End market growing 20%+ annually
  - New Energy growing faster than the overall market
  - Beneficiary of increasing consumer spending in China and rapid new product introductions
  - Significant opportunities for growth in China and new, large and higher margin countries
- Revenue, margins and EPS increasing due to organic growth and improved product mix from recent acquisitions
- Excess capacity enables significant growth without meaningful capex
- Healthy balance sheet with no near-term need for equity
- Trading at 4.7x 2010 projected Adjusted EPS of at least \$1.23
  - Guidance is based on conservative assumptions
  - Generating significant free cash flow; no A/R issues
  - Insider ownership of 21% provides incentive to create shareholder value
  - Expect to uplist from OTCBB in very near future

# Company Overview

---

- 2009 acquisitions transformed NEWN from low margin, low tech company into a rapidly growing, high margin, integrated manufacturer with an established brand name
- Vertically integrated original design manufacturer and distributor of lithium ion batteries and backup power systems
  - Products support *iPhones*, *iPads*, *Blackberrys* and all major brand cell phones, laptops, digital cameras, MP3s, etc.
  - Strong reputation for high quality manufacturing and innovative products
  - Internally source components and sell excess production to third parties
- Supply end-user products direct to retail channels as well as major OEMs
- Currently, end consumers for most products are in China with opportunity to expand internationally
- Operating at only ~50% of manufacturing capacity

# Advantage of Lithium Ion Batteries

---

- High energy-to-weight ratio
- Wide variety of shapes and sizes
- High open circuit voltage; greater power can be transferred at a lower rate of current
- No memory effect
- Low self-discharge rate

# Company Timeline

---

- 2002 Begins operations
- 2004 Becomes public via reverse merger
- 2004 - 2008 Primary business producing battery shells and caps
- 2008 Begins finished battery distribution business
- Dec. 2009 Acquires Anytone
- Dec. 2009 Appoints Weihe Yu as Chairman of the Board
- Jan. 2010 Acquires NewPower
- May 2010 Appoints Nian Chen as CEO
- May-June '10 Appoints 3 new independent board members

# New Energy's Transition

---

Transformed into a higher margin, vertically integrated business

2009 Revenue

\$26.4M

2010E Revenue

\$88.0M

■ Battery Shells & Caps   ■ Battery Distribution   ■ Anytone   ■ Newpower

# Anytone

---

- Manufactures and sells lithium ion battery finished products
  - Established brand name
  - Support some of the best known electronics products in the world
  - Many products generate 4-7 times more power than the original OEM battery's capacity
  - Customer base includes end-user consumers, as well as OEMs and retailers
- Ability to rapidly innovate with quick-turn capabilities
  - Over 30 patents and deep R&D capabilities
  - Plan to launch 1-2 new products per month
- Acquired December 2009 for 5.0x 2010 projected net income
  - Broadens product offering and expands distribution channels
  - Allows New Energy to touch end-user customers
  - Platform to expand international focus
  - Expected to generate meaningful operating leverage and economies of scale

# Anytone Products

---

**Cell Phone Series**

**Digital Series**

**Solar Power Series**

**Laptop Series**

# NewPower

---

- China-based manufacturer of lithium ion batteries
  - Products used in portable electronics, such as cell phones, MP3 players, digital cameras, etc.
- Extensive manufacturing expertise and capabilities
  - Operating at 50% of production capacity
  - Can triple production with minimal additional capital expenditures
- NewPower acquired in January 2010
  - Strategically important to vertical integration
  - Increases profitability of existing battery distribution business
  - Captures added margin by internally sourcing lithium ion batteries

# Finished Battery Distribution

---

- Assemble battery components and distribute the finished batteries to leading Chinese battery companies
- First major customer in the second half of 2008
- Expanded sales efforts to add new OEM and distributor customers

# Battery Shells & Caps

---

- Sells broad line of shells and caps to lithium ion battery manufacturers
- Products used to encase the lithium ion battery for protection
- Internal manufacturing provides lower cost finished battery products
- Stable and growing source of cash flow

Battery Shells

Battery Caps

# Market Opportunity

---

- China is one of the largest consumers of lithium ion batteries
  - China estimates market will grow 20%+ annually from 2010 to 2018
  - Increased consumer spending, especially for portable electronics
- Lithium ion battery sales in China over \$4 billion in 2009
  - China estimates these sales will grow at a 20% 5-year CAGR
- Current trend of smaller, lighter and more advanced portable consumer products driving industry growth
  - Short product life and product innovation cycle creates rapid product turnover
  - According to IDC, the worldwide market for smartphones, is expected to grow at nearly 15% CAGR from 190 million units in 2010 to 288 million units in 2013

# Growth Strategy

---

- Continually introduce new products to meet changing market demand
- Expand Anytone's higher margin, branded product offering
- Leverage low cost production and R&D capability to expand market share
- Increase higher margin direct sales to OEM customers and retail partners
- Deepen penetration of existing distribution customers
- Increase international presence

# Experienced Management Team

---

- **Weihe Yu, Chairman**

- Appointed Chairman in December 2009 following acquisition of Anytone
- Co-founder of Anytone Technology Co., Ltd.,
- Served as general manager of Shenzhen Four Images Industrial Co., which manufactures protection circuits for lithium ion batteries

- **Nian Chen, CEO**

- Promoted to CEO in May 2010
- Previously a vice president of Anytone division and a co-founder of Anytone
- Responsibilities at Anytone included oversight of research and development, engineering, production and quality control
- Served for more than five years as vice president of Shenzhen Vogue Industries Co., Ltd., a manufacturer of portable electronics

- **Junfeng Chen, CFO**

- Appointed CFO in August 2009
- Joined New Energy Systems Group in 2005 and served as CFO of the Company's wholly-owned subsidiary Shenzhen E'Jenie Science and Technology Co., Ltd.
- Majored in Accounting and graduated from Wuhan University in China

# Improving Operating Results

| (\$ MM, except per share data)    | Three Months Ended 3/31 |               | Year Ended 12/31 |               |

# First Quarter Financial Highlights

---

- Revenue increased 753% to \$22.5 million
  - On a pro forma basis, revenue increased 55% assuming the 2 acquisitions closed on Jan. 1, 2009
- Adjusted EPS increased 297% to \$0.37 per diluted share\*
- GAAP EPS increased 235% to \$0.30 per diluted share
- Generated \$6.6 million of cash flow from operations

\*Excludes non-cash compensation and amortization expense

# Derivation of Adjusted Net Income

(\$ MM, except per share data)

|                               | Year Ended    | Three Months Ended |               |
|-------------------------------|---------------|--------------------|---------------|
|                               | Dec. 31, 2009 | Mar. 31, 2009      | Mar. 31, 2010 |
| Net income                    | \$5.8         | \$0.5              | \$3.8         |
| Amortization                  | 0.3           | 0.0                | 0.7           |

| Adjusted Net Income           | \$6.4         | \$0.5              | \$4.7         |
| Adjusted EPS (diluted shares) | <b>\$0.89</b> | <b>\$0.09</b>      | <b>\$0.37</b> |

# Valuation

(\$ MM, except per share data)

|  |              |
|--|--------------|
| Common shares outstanding (5/14/2010)          | 11.9         |
| Common shares convertible from preferred stock | <u>0.8</u>   |
| Total shares outstanding                       | 12.7         |
| Price (7/6/2010)                               | \$5.74       |
| Equity Market Capitalization                   | \$72.6       |
| Cash   | \$8.5        |
| Total Debt*                                    | <u>\$4.5</u> |
| Enterprise Value                               | \$68.6       |
| 2010E Adj. EPS**                               | \$1.23       |
| P/2010E Adjusted EPS                           | 4.7 x        |

\* Includes \$4.0 million due for Anytone acquisition

\*\* Excludes non-cash, stock-compensation and amortization expense

# Chinese Battery Company Comparison

---

- NEWN's products, end markets and growth characteristics differ substantially from its perceived peers
- NEWN is a high growth company benefiting from increasing Chinese consumer spending, favorable overall industry trends and potentially significant international expansion

---

| Company                       | Markets Served   |
|-------------------------------|--|
| <b>Advanced Battery Tech.</b> | Produces rechargeable polymer lithium-ion batteries for consumer electronics (6%), miner's lamps (20%), electric vehicles (32%) and other(42%) |
| <b>China BAK Battery</b>      | Produces lithium-based battery cells for consumer electronics (99.9%) and electric vehicles  |
| <b>China Ritar Power Corp</b> | Produces lead-acid batteries for telecom, UPS, LEV, and alt. energy applications   |
| <b>Hong Kong Highpower</b>    | Produces both Ni-MH and Li-ion batteries for consumer (79%) and industrial (20%) markets   |
| <b>Ultralife Corp</b>         | Produces batteries for portable and standby power to communications and electronics industries   |

---

# 2010 Objectives

---

- Uplist stock from OTC Bulletin Board
  - Currently meet all listing requirements
- Increase sales and profitability of all business lines
- Maximize cross selling opportunities/synergies of recent acquisitions
- Expand into large, higher-margin international markets
- Significantly increase awareness in investment community

# Investment Highlights

---

- Leading provider of lithium ion batteries for portable electronic devices in China
- End market growing 20%+ annually
  - New Energy growing faster than the overall market
  - Beneficiary of increasing consumer spending in China and rapid new product introductions
  - Significant opportunities for growth in China and new, large and higher margin countries
- Revenue and margins increasing due to organic growth and improved product mix from recent acquisitions
- Excess capacity enables significant growth without meaningful capex
- Healthy balance sheet with no near-term need for equity
- Trading at 4.7x 2010 projected Adjusted EPS of at least \$1.23
  - Guidance is based on conservative assumptions
  - Generating significant free cash flow; no A/R issues
  - Insider ownership of 21% provides incentive to create shareholder value
  - Expect to uplist from OTCBB in very near future
