Re: TransAlta Corporation
Form 40-F for the Fiscal Year Ended December 31, 2015
Filed February 18, 2016
File No. 1-15214

Dear Mr. Tremblay:

We have limited our review of your filing to the financial statements and related disclosures and have the following comments. In some of our comments, we may ask you to provide us with information so we may better understand your disclosure.

Please respond to these comments within ten business days by providing the requested information or advise us as soon as possible when you will respond. If you do not believe our comments apply to your facts and circumstances, please tell us why in your response.

After reviewing your response to these comments, we may have additional comments

Notes to Consolidated Financial Statements

Sale of Economic Interest in Australian Assets to TransAlta Renewables Inc, page F29

1. We note TransAlta Renewables' investment in the Australian assets consisted of the acquisition of securities that, in aggregate, provide an economic interest based on cash flows of the Australian assets broadly equal to the underlying net distributable profits. Please explain the securities TransAlta Renewables invested in, and how you accounted for the acquisition of the economic interest in the Australian assets and the related securities.

Investment in Sarnia Cogeneration Plant, Le Nordais Wind Farm, and Ragged Chute Hydro Facility, page F-29

2. We note your majority owned subsidiary, TransAlta Renewables acquired tracking preferred shares of one of your subsidiaries with the closing of the investment occurring after year end. Please explain to us how the rights of your common shareholders have been and could be impacted by the operation of the tracking stock. Also, please tell us what consideration was given to disclosing earnings allocable to the tracking stock issued and that portion of the earnings attributable to the non-controlling interest.

Asset Impairment Charges and Reversals, page F32

3. We note Alberta Merchant CGU consists of all the Alberta plants that have significant merchant capacity including your renewable fleet. Please explain how your accounting treatment is consistent with the definition of a cash generating unit in paragraph 6 of IAS 36 and the guidance for identifying a cash generating unit in paragraph 66 of IAS 36. In doing so explain why the recoverable amount of each individual plant cannot be determined and how including the renewable fleet is appropriate.

We urge all persons who are responsible for the accuracy and adequacy of the disclosure in the filing to be certain that the filing includes the information the Securities Exchange Act of 1934 and all applicable Exchange Act rules require. Since the company and its management are in possession of all facts relating to a company's disclosure, they are responsible for the accuracy and adequacy of the disclosures they have made.

In responding to our comments, please provide a written statement from the company acknowledging that:

- the company is responsible for the adequacy and accuracy of the disclosure in the filing;
- staff comments or changes to disclosure in response to staff comments do not foreclose the Commission from taking any action with respect to the filing; and
- the company may not assert staff comments as a defense in any proceeding initiated by the Commission or any person under the federal securities laws of the United States.
