## Absolute Return Barrier M-Notes Product Snapshot

### Structure:

- **Underlying:** S&P 500® Index
- **Maturity:** June 22, 2009 (18 months)
- **Protection:** 100%
- **Absolute Return Barrier:** 22.00% – 24.00%
- **Upper Index Barrier:** Index Starting Level x (1 + Absolute Return Barrier)
- **Lower Index Barrier:** Index Starting Level x (1 – Absolute Return Barrier)
- **Absolute Index Return:** Absolute value of:  $\left( \frac{\text{Index Ending Level} - \text{Index Starting Level}}{\text{Index Starting Level}} \right)$

### Positioning:

- Offers 100% principal protection. If the Underlying never closes above the Upper Index Barrier or below the Lower Index Barrier on any trading day during the Observation Period, at the Maturity Date investors will receive 100% of their principal amount plus a return equal to the Absolute Index Return up to a maximum return of 22.00% to 24.00% (to be determined on the Trade Date).

### Best Case Scenario:

- Investors will receive their principal *plus* an amount equal to their principal *multiplied* by the Absolute Index Return, subject to the maximum return of 22.00% to 24.00%, paid at maturity.

### Worst Case Scenario:

- Investors will receive the return of their principal only at maturity.

### Risk Considerations:

- If the Underlying closes above the Upper Index Barrier or below the Lower Index Barrier on any trading day during the Observation Period, the Notes will return only your principal at maturity.
- You should be willing and able to hold your Notes to maturity. Principal protection is valid only at maturity.
- Return on the Notes is linked to the value of the Underlying Index.
- An investment in the Notes is subject to the credit of the issuer.

Investing in the Notes involves a number of risks. See "Selected Risk Factors" in this Product Snapshot, "Selected Risk Considerations" in the accompanying term sheet and "Risk Factors" in the accompanying product supplement.

### Hypothetical Scenario Analysis at Maturity:

- Hypothetical scenario analysis contained herein is not reflective of the reinvestment of dividends and does not reflect advisory fees, brokerage or other commissions, or any other expenses that an investor may incur in connection with the Notes.
- No representation is made that any trading strategy or account will, or is likely to, achieve similar returns to those shown below. Hypothetical results are neither an indicator nor guarantee of future returns. Actual results will vary, perhaps materially, from the analysis.

## Selected Risk Factors

- **MARKET RISK** — The return on the Notes at maturity, if any, is linked to the performance of the Index and will depend on whether the Index closing level ever exceeds the Upper Index Barrier or falls below the Lower Index Barrier during the Observation Period and the magnitude of the Absolute Index Return.
- **THE NOTES MAY NOT PAY MORE THAN THE PRINCIPAL AMOUNT** — You may receive a lower payment at maturity than you would have received if you had invested in the Index, the component stocks underlying the Index or contracts related to the Index. If the Index closing level exceeds the Upper Index Barrier or falls below the Lower Index Barrier on any single day during the Observation Period, the Additional Amount will be zero, and you will receive only your principal amount at maturity.
- **THE ABSOLUTE RETURN BARRIER FEATURE WILL LIMIT YOUR RETURN ON THE NOTES AND MAY AFFECT YOUR PAYMENT AT MATURITY** — Your investment in the Notes may not perform as well as an investment in a security with a return based solely on the performance of the Index.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the Notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the component stocks underlying the Index would have.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity described in this term sheet is based on the full principal amount of your Notes, the original issue price of the Notes includes the agent's commission and the cost of hedging our obligations under the Notes through one or more of our affiliates.
- **LACK OF LIQUIDITY** — The Notes will not be listed on any securities exchange.
- **WE AND OUR AFFILIATES AND AGENTS MAY PUBLISH RESEARCH, EXPRESS OPINIONS OR PROVIDE RECOMMENDATIONS THAT ARE INCONSISTENT WITH INVESTING IN OR HOLDING THE NOTES. ANY SUCH RESEARCH, OPINIONS OR RECOMMENDATIONS COULD AFFECT THE LEVEL OF THE INDEX TO WHICH THE NOTES ARE LINKED OR THE MARKET VALUE OF THE NOTES**
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the Notes, including acting as calculation agent and hedging our obligations under the Notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the Notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the level of the Index on any day, the value of the Notes will be affected by a number of complex and interrelated economic and market factors that may either offset or magnify each other.

See "Selected Risk Considerations" in the accompanying term sheet and "Risk Factors" in the accompanying product supplement.

## Tax Treatment

- The Notes will be treated as contingent payment debt instruments for U.S. federal income tax purposes. For more detail, see "Selected Purchase Considerations—Taxed as Contingent Payment Debt Instruments" in the accompanying term sheet.
