

Deutsche Bank AG Trigger Autocallable Optimization Securities

\$4,000,000 Linked to the Common Stock of Aruba Networks, Inc. due April 10, 2013

\$4,000,000 Linked to the Common Stock of Riverbed Technology, Inc. due April 10, 2013

Investment Description

Trigger Autocallable Optimization Securities (the “**Securities**”) are unsubordinated and unsecured debt obligations of Deutsche Bank AG, London Branch (the “**Issuer**”) with returns linked to the performance of the common stock of a specific company described herein (each an “**Underlying Stock**”). The Securities are designed for investors who want to express a moderately bullish view on the Underlying Stock. If the Closing Price of the Underlying Stock on any Observation Date (including the Final Valuation Date) is greater than or equal to the Initial Stock Price, Deutsche Bank AG will automatically call the Securities and pay you a Call Price equal to your initial investment plus a Call Return based on the Call Return Rate specified below. The Call Return increases the longer the Securities are outstanding. If the Securities are not automatically called and the Final Stock Price is not less than the Trigger Price, at maturity Deutsche Bank AG will pay you an amount equal to your initial investment. However, if the Securities are not automatically called and the Final Stock Price is less than the Trigger Price, Deutsche Bank AG will pay you less than your initial investment resulting in a loss of 1.00% for every 1.00% decline in the Final Stock Price as compared to the Initial Stock Price. Under these circumstances you will lose a significant portion, and could lose all, of your initial investment. You will not receive interest payments during the term of the Securities. **Investing in the Securities is subject to significant risks, including the risk of losing your entire initial investment. The contingent repayment of your initial investment applies only if you hold the Securities to maturity. Any payment on the Securities, including any payment upon an automatic call and any payment of your initial investment at maturity, is subject to the creditworthiness of the Issuer. If the Issuer were to default on its payment obligations, you may not receive any amounts owed to you under the terms of the Securities and you could lose your entire investment.**

Features

- ❑ **Call Return** — If the Closing Price of the Underlying Stock on any Observation Date (including the Final Valuation Date) is greater than or equal to the Initial Stock Price, we will automatically call the Securities and pay you a Call Price equal to your initial investment plus a Call Return based on the Call Return Rate specified below. The Call Return increases the longer the Securities are outstanding. If the Securities are not called, investors may have downside market exposure to the Underlying Stock at maturity, subject to any contingent repayment of your initial investment.
- ❑ **Downside Exposure with Contingent Repayment of Your Initial Investment at Maturity** — If you hold the Securities to maturity and the Final Stock Price is not less than the Trigger Price, we will pay you your initial investment at maturity. If the Final Stock Price is less than the Trigger Price, however, Deutsche Bank AG will repay less than your initial investment, resulting in a loss that is proportionate to the decline in the Final Stock Price as compared to the Initial Stock Price. Under these circumstances, you will lose a significant portion, and could lose all, of your initial investment. The contingent repayment of your initial investment applies only if you hold the Securities to maturity. Any payment on the Securities, including any payment upon an automatic call and any payment of your initial investment at maturity, is subject to the creditworthiness of the Issuer.

Key Dates

Trade Date	March 30, 2012
Settlement Date	April 4, 2012
Observation Dates ¹	Monthly
Final Valuation Date ¹	April 4, 2013
Maturity Date ^{1,2}	April 10, 2013

¹ See page 3 for additional details.

² 371 days from the Settlement Date.

NOTICE TO INVESTORS: THE SECURITIES ARE SIGNIFICANTLY RISKIER THAN CONVENTIONAL DEBT INSTRUMENTS. THE ISSUER IS NOT NECESSARILY OBLIGATED TO REPAY YOUR INITIAL INVESTMENT AT MATURITY, AND THE SECURITIES CAN HAVE DOWNSIDE MARKET RISK SIMILAR TO THE UNDERLYING STOCK. THIS MARKET RISK IS IN ADDITION TO THE CREDIT RISK INHERENT IN PURCHASING A DEBT OBLIGATION OF DEUTSCHE BANK AG. YOU SHOULD NOT PURCHASE THE SECURITIES IF YOU DO NOT UNDERSTAND OR ARE NOT COMFORTABLE WITH THE SIGNIFICANT RISKS INVOLVED IN INVESTING IN THE SECURITIES. THE SECURITIES WILL NOT BE LISTED ON ANY SECURITIES EXCHANGE.

YOU SHOULD CAREFULLY CONSIDER THE RISKS DESCRIBED UNDER “KEY RISKS” BEGINNING ON PAGE 4 OF THIS PRICING SUPPLEMENT AND UNDER “RISK FACTORS” BEGINNING ON PAGE 6 OF THE ACCOMPANYING PRODUCT SUPPLEMENT BEFORE PURCHASING ANY SECURITIES. EVENTS RELATING TO ANY OF THOSE RISKS, OR OTHER RISKS AND UNCERTAINTIES, COULD ADVERSELY EFFECT THE MARKET VALUE OF, AND THE RETURN ON, YOUR SECURITIES. YOU MAY LOSE SOME OR ALL OF YOUR INITIAL INVESTMENT IN THE SECURITIES.

Security Offering

We are offering two Trigger Autocallable Optimization Securities (each a “**Security**”). Each Security is linked to the performance of the common stock of a different company, and each has a different Call Return Rate, Initial Stock Price and Trigger Price. The Securities are our unsubordinated and unsecured debt obligations and are offered at a minimum investment of \$1,000 in denominations of \$10.00 and integral multiples thereof.

Offering	Underlying Stock	Call Return Rate	Initial Stock Price	Trigger Price	CUSIP/ISIN
Trigger Autocallable Optimization Securities	Common stock of Aruba Networks, Inc. (Ticker: ARUN)	39.00% per annum	\$22.28	\$14.48, equal to 65.00% of the Initial Stock Price	25154V 482 / US25154V4822
Trigger Autocallable Optimization Securities	Common stock of Riverbed Technology, Inc. (Ticker: RVBD)	35.00% per annum	\$28.08	\$18.25, equal to 65.00% of the Initial Stock Price	25154V 490 / US25154V4905

See “Additional Terms Specific to the Securities” in this pricing supplement. The Securities will have the terms specified in product supplement BI dated February 17, 2011, the prospectus supplement dated September 29, 2009 relating to our Series A global notes of which these Securities are a part, the prospectus dated September 29, 2009 and this pricing supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the Securities or passed upon the accuracy or the adequacy of this pricing supplement, the accompanying prospectus, the prospectus supplement and product supplement BI. Any representation to the contrary is a criminal offense. The Securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Offering of Securities	Price to Public		Discounts and Commissions ⁽¹⁾		Proceeds to Us

Deutsche Bank AG has filed a registration statement (including a prospectus) with the Securities and Exchange Commission for the offerings to which this pricing supplement relates. Before you invest in the Securities offered hereby, you should read these documents and any other documents relating to these offerings that Deutsche Bank AG has filed with the SEC for more complete information about Deutsche Bank AG and these offerings. You may obtain these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Our Central Index Key, or CIK, on the SEC website is 0001159508. Alternatively, Deutsche Bank AG, any agent or any dealer participating in these offerings will arrange to send you the prospectus, prospectus supplement, product supplement and this pricing supplement if you so request by calling toll-free 1-800-311-4409.

If the terms described in this pricing supplement are inconsistent with those described in the accompanying product supplement, prospectus supplement or prospectus, the terms described in this pricing supplement shall control.

References to “Deutsche Bank AG,” “we,” “our” and “us” refer to Deutsche Bank AG, including, as the context requires, acting through one of its branches. In this pricing supplement, “Securities” refers to the Trigger Autocallable Optimization Securities that are offered hereby, unless the context otherwise requires. This pricing supplement, together with the documents listed above, contains the terms of the Securities and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Key Risks” in this pricing supplement and “Risk Factors” in the accompanying product supplement, as the Securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before deciding to invest in the Securities.

Investor Suitability

The suitability considerations identified below are not exhaustive. Whether or not the Securities are a suitable investment for you will depend on your individual circumstances, and you should reach an investment decision only after you and your investment, legal, tax, accounting and other advisors have carefully considered the suitability of an investment in the Securities in light of your particular circumstances. You should also review “Key Risks” on page 4 of this pricing supplement and “Risk Factors” on page 7 of the accompanying product supplement.

The Securities may be suitable for you if, among other considerations:

- ◆ You fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.
- ◆ You can tolerate the loss of some or all of your investment and are willing to make an investment in which you could have the same downside market risk as the Underlying Stock.
- ◆ You believe the Closing Price of the Underlying Stock will be greater than or equal to the Initial Stock Price on any Observation Date, including the Final Valuation Date.
- ◆ You understand and accept that you will not participate in any appreciation in the price of the Underlying Stock and you are willing to make an investment the return of which is limited to the applicable Call Return.
- ◆ You can tolerate fluctuations in the price of the Securities prior to maturity that may be similar to or exceed the downside price fluctuations of the Underlying Stock.
- ◆ You are willing to invest in the Securities based on the applicable Call Return Rate set forth on the cover of this pricing supplement.
- ◆ You do not seek current income from this investment and are willing to forgo any dividends paid on the Underlying Stock.
- ◆ You are willing and able to hold Securities that will be called on the earliest Observation Date on which the Closing Price of the Underlying Stock is greater than or equal to the Initial Stock Price, and you are otherwise willing and able to hold the Securities to maturity for a term of 1 year, and are not seeking an investment for which there will be an active secondary market.
- ◆ You are willing to assume the credit risk associated with Deutsche Bank AG, as Issuer of the Securities, and understand that if Deutsche Bank AG defaults on its obligations you may not receive any amounts due to you including any payment of your initial investment at maturity or upon an earlier automatic call.

The Securities may not be suitable for you if, among other considerations:

- ◆ You do not fully understand the risks inherent in an investment in the Securities, including the risk of loss of your entire initial investment.
- ◆ You cannot tolerate the loss of a substantial portion or all of your investment and you are not willing to make an investment in which you could have the same downside market risk as the Underlying Stock.
- ◆ You require an investment designed to provide a full return of your initial investment at maturity.
- ◆ You believe the Securities will not be called and the Final Stock Price will be less than the Trigger Price.
- ◆ You seek an investment that participates in the full appreciation in the price of the Underlying Stock or that has unlimited return potential.
- ◆ You cannot tolerate fluctuations in the price of the Securities prior to maturity that may be similar to or exceed the downside price fluctuations of the Underlying Stock.
- ◆ You are unwilling to invest in the Securities based on the applicable Call Return Rate set forth on the cover of this pricing supplement.
- ◆ You prefer the lower risk, and therefore accept the potentially lower returns, of fixed income investments with comparable maturities and credit ratings.
- ◆ You seek current income from this investment or you prefer to receive dividends paid on the Underlying Stock.
- ◆ You are unwilling or unable to hold Securities that will be called on any Observation Date on which the Closing Price of the Underlying Stock is greater than or equal to the Initial Stock Price, or you are otherwise unable or unwilling to hold the Securities to maturity for a term of approximately 5 years, and seek an investment for which there will be an active secondary market.
- ◆ You are unwilling or unable to assume the credit risk associated with Deutsche Bank AG, as Issuer of the Securities for all payments on the Securities, including any payment of your initial investment at maturity or upon an earlier automatic call.

Final Terms

Issuer	Deutsche Bank AG, London Branch
Issue Price	\$10.00 per Security (subject to a minimum purchase of 100 Securities, or \$1,000)
Term	Approximately 1 year, subject to an earlier automatic call
Trade Date	March 30, 2012
Settlement Date	April 4, 2012
Final Valuation Date ¹	April 4, 2013
Maturity Date ^{1, 2}	April 10, 2013
Underlying Stocks	Common stock of Aruba Networks, Inc. (Ticker: ARUN) Common stock of Riverbed Technology, Inc. (Ticker: RVBD)
Call Feature	The Securities will be automatically called if the Closing Price of the relevant Underlying Stock on any Observation Date is greater than or equal to the Initial Stock Price. If the Securities are called, Deutsche Bank AG will pay you on the applicable Call Settlement Date a cash payment per Security equal to the Call Price for the applicable Observation Date.
Observation Dates ¹	Monthly, on the dates set forth in the table below.
Call Settlement Dates ²	Two business days following the relevant Observation Date, except the Call Settlement Date for the Final Valuation Date will be the Maturity Date.
Call Return and Call Return Rate	The Call Return increases the longer the Securities are outstanding and is based upon the applicable Call Return Rate as listed in the table below.
Call Price	The Call Price equals your initial investment per Security plus the product of your initial investment per Security and the applicable Call Return. The tables below reflect a Call Return Rate of 39.00% per annum for the Securities linked to the common stock of Aruba Networks, Inc., and a Call Return Rate of 35.00% per annum for the Securities linked to the common stock of Riverbed Technology, Inc..

Securities linked to the common stock of Aruba Networks, Inc.

Observation Dates	Call Settlement Dates	Call Return*	Call Price* (per \$10.00 Security)
April 30, 2012	May 2, 2012	3.250%	\$10.3250

* The Call Return and Call Price have been rounded for ease of analysis.

Payment at Maturity (per \$10.00 Security)

If the Securities are not automatically called and the Final Stock Price is greater than or equal to the Trigger Price, Deutsche Bank AG will pay you a cash payment at maturity equal to \$10.00 per \$10.00 Security.

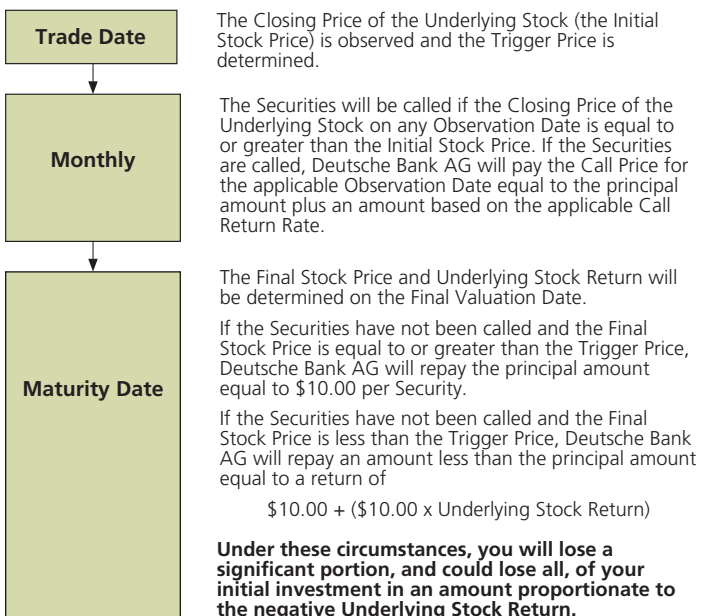

If the Securities are not automatically called and the Final Stock Price is less than the Trigger Price, Deutsche Bank AG will pay you a cash payment at maturity less than your initial investment equal to: \$10.00 + (\$10.00 x Underlying Stock Return);

Under these circumstances, you will lose a significant portion, and could lose all, of your initial investment in an amount proportionate to the negative Underlying Stock Return.

Underlying Stock Return	For each Security: $\frac{\text{Final Stock Price} - \text{Initial Stock Price}}{\text{Initial Stock Price}}$
Trigger Price	For the Securities linked to the common stock of Aruba Networks, Inc., \$14.48, equal to 65.00% of the Initial Stock Price. For the Securities linked to the common stock of Riverbed Technology, Inc., \$18.25, equal to 65.00% of the Initial Stock Price.
Closing Price	On any scheduled trading day, the last reported sale price of the relevant Underlying Stock on the relevant exchange multiplied by the then-current relevant Stock Adjustment Factor, as determined by the calculation agent.
Initial Stock Price	The Closing Price of one share of the relevant Underlying Stock on the Trade Date. For the Securities linked to the common stock of Aruba Networks, Inc., \$22.28. For the Securities linked to the common stock of Riverbed Technology, Inc., \$28.08.
Final Stock Price	The Closing Price of one share of the relevant Underlying Stock on the Final Valuation Date.
Stock Adjustment Factor	Initially 1.0 for each Underlying Stock, subject to adjustment for certain actions affecting each Underlying Stock. See "Description of Securities — Anti-dilution Adjustments" in the accompanying product supplement.

INVESTING IN THE SECURITIES INVOLVES SIGNIFICANT RISKS. YOU MAY LOSE SOME OR ALL OF YOUR INITIAL INVESTMENT. ANY PAYMENT ON THE SECURITIES, INCLUDING ANY PAYMENT UPON AN AUTOMATIC CALL AND ANY PAYMENT OF YOUR INITIAL INVESTMENT AT MATURITY, IS SUBJECT TO THE CREDITWORTHINESS OF THE ISSUER. IF DEUTSCHE BANK AG WERE TO DEFAULT ON ITS PAYMENT OBLIGATIONS, YOU MAY NOT RECEIVE ANY AMOUNTS OWED TO YOU UNDER THE SECURITIES AND YOU COULD LOSE YOUR ENTIRE INVESTMENT.

Investment Timeline

¹ Subject to postponement as described under "Description of Securities — Adjustments to Valuation Dates and Payment Dates" in the accompanying product supplement.

² Notwithstanding the provisions under "Description of Securities — Adjustments to Valuation Dates and Payment Dates" in the accompanying product supplement, in the event the Final Valuation Date is postponed, the Maturity Date will be the fourth business day after the Final Valuation Date as postponed and in the event that an Observation Date other than the Final Valuation Date is postponed, the relevant Call Settlement Date (other than the Maturity Date) will be the second business day after the Observation Date as postponed.

Key Risks

An investment in the Securities involves significant risks. Investing in the Securities is not equivalent to investing directly in the Underlying Stock. Some of the risks that apply to the Securities are summarized below, but we urge you to read the more detailed explanation of risks relating to the Securities generally in the “Risk Factors” section of the accompanying product supplement. We also urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the Securities.

- ♦ **YOUR INVESTMENT IN THE SECURITIES MAY RESULT IN A LOSS OF YOUR INITIAL INVESTMENT** — The Securities differ from ordinary debt securities in that Deutsche Bank AG will not necessarily pay your initial investment in the Securities at maturity. If the Securities are not automatically called, the return on the Securities at maturity will depend on whether the Final Stock Price is greater than or equal to the Trigger Price. If the Securities are not automatically called and the Final Stock Price is greater than or equal to the Trigger Price, Deutsche Bank AG will pay you your initial investment. However, if the Securities are not automatically called on any Observation Date and the Final Stock Price is less than the Trigger Price, you will be fully exposed to any negative Underlying Stock Return, resulting in a loss of your initial investment that is proportionate to the decline in the Final Stock Price as compared to the Initial Stock Price. **Accordingly, you could lose your entire initial investment.**
- ♦ **RETURN POTENTIAL IS LIMITED TO THE CALL RETURN** — If the Securities are called, the return of the Securities is limited to the applicable Call Return which is based on the relevant Call Return Rate as specified on the cover hereof, regardless of the performance of the Underlying Stock. In addition, since the Call Return increases the longer the Securities are outstanding and the Securities could be called as early as the first Observation Date, the term of your investment could be cut short, and your return on the Securities would then be less than if the Securities were called at a later date. Further, despite not participating in any appreciation of the Underlying Stock, if the Securities are not called you may be exposed to the Underlying Stock’s full downside performance at maturity. As a result, an investment directly in the Underlying Stock could provide a better return than an investment in the Securities.
- ♦ **CONTINGENT REPAYMENT OF YOUR INITIAL INVESTMENT APPLIES ONLY IF YOU HOLD THE SECURITIES TO MATURITY** — If your Securities are not automatically called, you should be willing to hold your Securities to maturity. If you are able to sell your Securities prior to maturity in the secondary market, you may have to sell them at a loss relative to your initial investment even if the Closing Price of the Underlying Stock is above the Trigger Price.
- ♦ **HIGHER CALL RETURN RATES ARE GENERALLY ASSOCIATED WITH A GREATER RISK OF LOSS** — Greater expected volatility with respect to the Underlying Stock reflects a higher expectation as of the Trade Date that the Closing Price of the Underlying Stock could close below the Trigger Price on the Final Valuation Date of the Securities. This greater expected risk will generally be reflected in a higher Call Return Rate for the Securities. However, while the Call Return Rate is set on the Trade Date, the Underlying Stock’s volatility can change significantly over the term of the Securities. The price of the Underlying Stock could fall sharply, which could result in a significant loss of your initial investment.
- ♦ **REINVESTMENT RISK** — If your Securities are called early, the holding period over which you would receive the applicable Call Return, which is based on the relevant Call Return Rate as specified on the cover hereof, could be as little as one month. There is no guarantee that you would be able to reinvest the proceeds from an investment in the Securities at a comparable return and/or with a comparable interest rate for a similar level of risk in the event the Securities are called prior to the Maturity Date.
- ♦ **NO COUPON PAYMENTS** — Deutsche Bank AG will not pay any interest or coupon payments with respect to the Securities.
- ♦ **RISKS RELATING TO THE CREDIT OF THE ISSUER** — The Securities are unsubordinated and unsecured debt obligations of the Issuer, Deutsche Bank AG, and are not, either directly or indirectly, an obligation of any third party. Any payment to be made on the Securities, including any payment upon an automatic call and any payment of your initial investment at maturity, depends on the ability of Deutsche Bank AG to satisfy its obligations as they come due. As a result, the actual and perceived creditworthiness of Deutsche Bank AG will affect the value of the Securities, and in the event Deutsche Bank AG were to default on its obligations, you may not receive any amount owed to you under the terms of the Securities and you could lose your entire investment.
- ♦ **NO DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the Securities, you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the Underlying Stock would have.
- ♦ **INVESTING IN THE SECURITIES IS NOT THE SAME AS INVESTING IN THE UNDERLYING STOCK** — The return on your Securities may not reflect the return you would realize if you directly invested in the Underlying Stock. For instance, you will not receive or be entitled to receive any dividend payments or other distributions or other rights that holders of the Underlying Stock would have. Further, you will not participate in any potential appreciation of the Underlying Stock, which could be significant.
- ♦ **SINGLE STOCK RISK** — The price of the Underlying Stock can rise or fall sharply due to factors specific to the Underlying Stock and its issuer, such as stock price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general stock market volatility and levels, interest rates and economic and political conditions. For additional information about each Underlying Stock and its issuer, please see “The Underlying Stocks” in this pricing supplement and each issuer’s SEC filings referred to in those sections.
- ♦ **IF THE PRICE OF THE UNDERLYING STOCK CHANGES, THE VALUE OF YOUR SECURITIES MAY NOT CHANGE IN THE SAME MANNER** — Your Securities may trade quite differently from the Underlying Stock. Changes in the market price of the Underlying Stock may not result in a comparable change in the value of your Securities.
- ♦ **THE ANTI-DILUTION PROTECTION IS LIMITED** — The calculation agent will make adjustments to the relevant Share Adjustment Factor, which will initially be set at 1.0, for certain events affecting the relevant Underlying Stock. See “Description of Securities — Anti-Dilution Adjustments” in the accompanying product supplement. The calculation agent is not required, however, to make such adjustments in response to all events that could affect the relevant Underlying Stock. If an event occurs that does not require the calculation agent to make an adjustment, the value of the Securities may be materially and adversely affected.
- ♦ **THERE IS NO AFFILIATION BETWEEN THE ISSUERS OF THE UNDERLYING STOCKS AND US, AND WE ARE NOT RESPONSIBLE FOR ANY DISCLOSURE BY SUCH ISSUERS** — We are not affiliated with the issuers of the Underlying Stocks (each, an “Underlying Stock Issuer”). However, we and our affiliates may currently or from time to time in the future engage in business with the Underlying Stock Issuers. Nevertheless, neither we nor our affiliates assume any responsibility for the accuracy or the completeness of

any information about the Underlying Stocks and the Underlying Stock Issuers. You, as an investor in the Securities, should make your own investigation into the Underlying Stocks and the Underlying Stock Issuers. The Underlying Stock Issuers are not involved in the Securities offered hereby in any way and have no obligations of any sort with respect to your Securities. None of the Underlying Stock Issuers have any obligation to take your interests into consideration for any reason, including when taking any corporate actions that might affect the value of your Securities.

- ◆ **PAST PERFORMANCE OF THE UNDERLYING STOCK IS NO GUIDE TO FUTURE PERFORMANCE** — The actual performance of the relevant Underlying Stock may bear little relation to the historical prices of the Underlying Stock, and may bear little relation to the hypothetical return examples set forth elsewhere in this pricing supplement. We cannot predict the future performance of the Underlying Stock.
- ◆ **THE SECURITIES HAVE CERTAIN BUILT-IN COSTS** — While the Payment at Maturity or Call Price due upon an automatic call described in this pricing supplement is based on your entire initial investment, the original Issue Price of the Securities includes the agents' commission and the estimated cost of hedging our obligations under the Securities through one or more of our affiliates. Such cost includes our or our affiliates' expected cost of providing such hedge, as well as the profit we or our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge. As a result, the price, if any, at which Deutsche Bank AG or its affiliates would be willing to purchase Securities from you prior to maturity in secondary market transactions, if at all, will likely be lower than the original Issue Price, and any sale prior to the Maturity Date could result in a substantial loss to you. The Securities are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Securities to maturity.
- ◆ **THERE MAY BE LITTLE OR NO SECONDARY MARKET FOR THE SECURITIES** — The Securities will not be listed on any securities exchange. Deutsche Bank AG or its affiliates may offer to purchase the Securities in the secondary market but are not required to do so and may cease such market making activities at any time. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell your Securities easily. Because other dealers are not likely to make a secondary market for the Securities, the price at which you may be able to trade your Securities is likely to depend on the price, if any, at which Deutsche Bank AG or its affiliates may be willing to buy the Securities.
- ◆ **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE SECURITIES** — While we expect that, generally, the price of the Underlying Stock will affect the value of the Securities more than any other single factor, the value of the Securities will also be affected by a number of complex and interrelated economic and market factors that may either offset or magnify each other, including:
 - ◆ the time remaining to maturity of the Securities;
 - ◆ the market price and dividend rates of the Underlying Stock and the stock market generally;
 - ◆ interest rates and yields in the market generally and in the markets of the Underlying Stock;
 - ◆ geopolitical conditions and a variety of economic, financial, political, regulatory or judicial events;
 - ◆ supply and demand for the Securities; and
 - ◆ our creditworthiness, including actual or anticipated downgrades in our credit ratings.
- ◆ **TRADING AND OTHER TRANSACTIONS BY US OR OUR AFFILIATES, OR UBS OR ITS AFFILIATES, IN THE EQUITY AND EQUITY DERIVATIVE MARKETS MAY IMPAIR THE VALUE OF THE SECURITIES** — We or one or more of our affiliates expect to hedge our exposure from the Securities by entering into equity and equity derivative transactions, such as over-the-counter options or exchange-traded instruments. Such trading and hedging activities may affect the Underlying Stock and make it less likely that you will receive a return on your investment in the Securities. It is possible that we or our affiliates could receive substantial returns from these hedging activities while the value of the Securities declines. We or our affiliates, or UBS or its affiliates, may also engage in trading in instruments linked to the Underlying Stock on a regular basis as part of our general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for customers, including block transactions. We or our affiliates, or UBS or its affiliates, may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to the Underlying Stock. By introducing competing products into the marketplace in this manner, we or our affiliates, or UBS or its affiliates, could adversely affect the value of the Securities. Any of the foregoing activities described in this paragraph may reflect trading strategies that differ from, or are in direct opposition to, the trading strategy of investing in the Securities.
- ◆ **WE AND OUR AFFILIATES, OR UBS AG AND ITS AFFILIATES, MAY PUBLISH RESEARCH, EXPRESS OPINIONS OR PROVIDE RECOMMENDATIONS THAT ARE INCONSISTENT WITH INVESTING IN OR HOLDING THE SECURITIES. ANY SUCH RESEARCH, OPINIONS OR RECOMMENDATIONS COULD AFFECT THE FINAL STOCK PRICE AND THE VALUE OF SECURITIES** — We, our affiliates and agents, and UBS AG and its affiliates, publish research from time to time on financial markets and other matters that may influence the value of the Securities, or express opinions or provide recommendations that may be inconsistent with purchasing or holding the Securities. Any research, opinions or recommendations expressed by us, our affiliates or agents, or UBS AG or its affiliates, may not be consistent with each other and may be modified from time to time without notice. Investors should make their own independent investigation of the merits of investing in the Securities and the Underlying Stock to which the Securities are linked.
- ◆ **POTENTIAL DEUTSCHE BANK AG IMPACT ON PRICE** — Trading or transactions by Deutsche Bank AG or its affiliates in the Underlying Stock and/or over-the-counter options, futures or other instruments with returns linked to the performance of the Underlying Stock, may adversely affect the market price of the Underlying Stock and therefore, the value of the Securities.
- ◆ **POTENTIAL CONFLICT OF INTEREST** — Deutsche Bank AG and its affiliates may engage in business with the issuer of the Underlying Stock, which may present a conflict between the obligations of Deutsche Bank AG and you, as a holder of the Securities. Deutsche Bank AG, as the calculation agent, will determine the Final Stock Price of the Underlying Stock and Payment at Maturity or Call Price due upon an automatic call based on the Closing Price of the Underlying Stock in the market. The calculation agent can postpone the determination of the Closing Price of the Underlying Stock if a market disruption event occurs on any of the Observation Dates.

- ♦ **THE U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN THE SECURITIES ARE UNCERTAIN** — There is no direct legal authority regarding the proper U.S. federal income tax treatment of the Securities, and we do not plan to request a ruling from the Internal Revenue Service (the “IRS”). Consequently, significant aspects of the tax treatment of the Securities are uncertain, and the IRS or a court might not agree with the treatment of the Securities as prepaid financial contracts that are not debt. If the IRS were successful in asserting an alternative treatment for the Securities, the tax consequences of ownership and disposition of the Securities could be materially and adversely affected. In addition, as described below under “What Are the Tax Consequences of an Investment in the Securities?”, in 2007 Treasury and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments, which may include the Securities. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect. You should review carefully the section of the accompanying product supplement entitled “U.S. Federal Income Tax Consequences,” and consult your tax adviser regarding the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Scenario Analysis and Hypothetical Examples of Payment upon an Automatic Call or at Maturity

The following table and hypothetical examples below illustrate the Payment at Maturity or Call Price due upon an automatic call for a hypothetical range of performance for the Underlying Stock. The following examples and table are hypothetical and provided for illustrative purposes only. They do not purport to be representative of every possible scenario concerning increases or decreases in the price of either Underlying Stock relative to its Initial Stock Price. We cannot predict the Final Stock Price or the Closing Price of either Underlying Stock on any of the Observation Dates (including the Final Valuation Date). You should not take these examples as an indication or assurance of the expected performance of either Underlying Stock. You should consider carefully whether the Securities are suitable to your investment goals. The numbers in the examples and table below have been rounded for ease of analysis.

The following examples and table illustrate the Payment at Maturity or Call Price due upon an automatic call per Security on a hypothetical offering of Securities based on the following assumptions*:

Term:	Approximately 1 year, subject to an automatic call
Hypothetical Initial Stock Price*:	\$25.00
Hypothetical Trigger Price*:	\$16.25 (65.00% of the Hypothetical Initial Stock Price)
Hypothetical Call Return and Call Prices*:	

Observation Dates	Call Settlement Dates	Call Return*	Call Price*
April 30, 2012	May 2, 2012	3.083%	\$10.3083
May 30, 2012	June 1, 2012	6.167%	\$10.6167
July 2, 2012	July 5, 2012	9.250%	\$10.9250
July 30, 2012	August 1, 2012	12.333%	\$11.2333
August 30, 2012	September 4, 2012	15.417%	\$11.5417
October 1, 2012	October 3, 2012	18.500%	\$11.8500
October 30, 2012	November 1, 2012	21.583%	\$12.1583
November 30, 2012	December 4, 2012	24.667%	\$12.4667
December 31, 2012	January 3, 2013	27.750%	\$12.7750
January 30, 2013	February 1, 2013	30.833%	\$13.0833
March 1, 2013	March 5, 2013	33.917%	\$13.3917
April 4, 2013 (Final Valuation Date)	April 10, 2013 (Maturity Date)	37.000%	\$13.7000

* Based on a hypothetical Call Return Rate of 37.00% per annum. The actual Call Return Rate, Initial Stock Price and Trigger Price for each security are set forth in “Final Terms” and on the cover of this pricing supplement.

Example 1 — The Closing Price of the Underlying Stock on the first Observation Date is \$30.00, which is greater than the Hypothetical Initial Stock Price of \$25.00 — the Securities are called.

Because the Closing Price of the Underlying Stock on the first Observation Date is greater than or equal to the Hypothetical Initial Stock Price, the Securities are automatically called and Deutsche Bank AG will pay you on the applicable Call Settlement Date the Call Price of \$10.3083 per Security, representing a 3.083% return on the Securities.

Example 2 — The Securities have not been automatically called prior to the Final Valuation Date and the Final Stock Price of \$30.00 is greater than the Hypothetical Initial Stock Price of \$25.00 — the Securities are called.

Because the Securities were not previously called and the Final Stock Price is greater than or equal to the Hypothetical Initial Stock Price, the Securities are automatically called and Deutsche Bank AG will pay you on the applicable Call Settlement Date (which coincides with the Maturity Date) the Call Price of \$13.7000 per Security, representing a 37.000% return on the Securities.

Example 3 — The Closing Price of the Underlying Stock is not equal to or greater than the Hypothetical Initial Stock Price on any of the Observation Dates and the Final Stock Price of \$20.00 is greater than the Hypothetical Trigger Price of \$16.25 — the Securities are NOT called.

Because the Closing Price of the Underlying Stock on all of the Observation Dates is not equal to or greater than the Hypothetical Initial Stock Price, the Securities are not automatically called. Because the Final Stock Price is not less than the Hypothetical Trigger Price, Deutsche Bank AG will pay you a Payment at Maturity equal to \$10.00 per \$10.00 Security, representing a 0.000% return on the Securities.

Example 4 — The Securities have not been automatically called prior to the Final Valuation Date and the Final Stock Price of \$10.00 is less than the Hypothetical Trigger Price of \$16.25 — the Securities are NOT called.

Because the Securities are not called and the Final Stock Price is less than the Hypothetical Trigger Price, your initial investment will be fully exposed to any decline in the Final Stock Price as compared to the Hypothetical Initial Stock Price. Accordingly, Deutsche Bank AG will pay you a Payment at Maturity calculated as follows:

$$\begin{aligned} \$10.00 + (\$10.00 \times \text{Underlying Stock Return}) = \\ \$10.00 + (\$10.00 \times -60.000\%) = \$4.00 \end{aligned}$$

If the Securities are not automatically called and the Final Stock Price is less than the Trigger Price, your initial investment will be fully exposed to any negative Underlying Stock Return, resulting in a loss that is proportionate to the decline in the Final Stock Price as compared to the Initial Stock Price. Under these circumstances, you will lose a significant portion, and could lose all, of your initial investment. Any payment on the Securities, including any payment upon an automatic call and any payment of your initial investment at maturity, is subject to the creditworthiness of the Issuer.

The Underlying Stocks

All disclosures contained in this pricing supplement regarding each Underlying Stock are derived from publicly available information. Neither Deutsche Bank AG nor any of its affiliates assumes any responsibilities for the adequacy or accuracy of information about any Underlying Stock contained in this pricing supplement. You should make your own investigation into each Underlying Stock.

Included on the following pages is a brief description of each Underlying Stock Issuer. We obtained the closing price information set forth below from Bloomberg, and we have not participated in the preparation of, or verified, such information. You should not take the historical prices of each Underlying Stock as an indication of future performance. Each Underlying Stock is registered under the Securities Exchange Act of 1934, as amended (the “**Exchange Act**”). Companies with securities registered under the Exchange Act are required to file certain financial and other information specified by the SEC periodically. Information filed by each Underlying Stock Issuer with the SEC can be reviewed electronically through a web site maintained by the SEC. The address of the SEC’s web site is <http://www.sec.gov>. Information filed with the SEC by each Underlying Stock Issuer under the Exchange Act can be located by reference to its SEC file number provided below.

In addition, information filed with the SEC can be inspected and copied at the Public Reference Section of the SEC, 100 F Street, N.E., Room 1580, Washington, D.C. 20549. Copies of this material can also be obtained from the Public Reference Section, at prescribed rates.

Aruba Networks, Inc.

According to publicly available information, Aruba Networks, Inc. is a provider of next-generation network access solutions for the mobile enterprise. Information filed by Aruba Networks, Inc. with the SEC under the Exchange Act can be located by reference to its SEC file number: 001-33347, or its CIK Code: 0001173752. The common stock of Aruba Networks, Inc. is traded on the NASDAQ Global Select Market under the symbol "ARUN."

Historical Information

The following table sets forth the quarterly high and low closing prices for the common stock of Aruba Networks, Inc., based on daily closing prices on the primary exchange for Aruba Networks, Inc., as reported by Bloomberg. Aruba Networks, Inc.'s closing price on March 30, 2012 was \$22.28.

<u>Quarter Begin</u>	<u>Quarter End</u>	<u>Quarterly High</u>	<u>Quarterly Low</u>	<u>Quarterly Close</u>
1/1/2007	3/31/2007	\$14.67	\$11.00	\$14.67
4/1/2007	6/30/2007	\$20.60	\$13.47	\$20.10
7/1/2007	9/30/2007	\$23.78	\$15.67	\$20.00
10/1/2007	12/31/2007	\$21.05	\$12.92	\$14.91
1/1/2008	3/31/2008	\$14.64	\$4.69	\$5.21
4/1/2008	6/30/2008	\$7.00	\$4.69	\$5.23
7/1/2008	9/30/2008	\$6.55	\$4.29	\$5.13
10/1/2008	12/31/2008	\$4.05	\$1.95	\$2.55

What Are the Tax Consequences of an Investment in the Securities?

In the opinion of our special tax counsel, Davis Polk & Wardwell LLP, which is based on prevailing market conditions, the Securities should be treated as prepaid financial contracts that are not debt for U.S. federal income tax purposes. If this treatment is respected, (i) you should not recognize taxable income or loss prior to the maturity of your Securities, other than pursuant to a sale or exchange (including pursuant to a call), and (ii) your gain or loss on the Securities should be capital gain or loss and should be long-term capital gain or loss if you have held the Securities for more than one year. The IRS or a court may not agree with this treatment, however, in which case the timing and character of income or loss on your Securities could be materially and adversely affected.

In 2007, Treasury and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments, which may include the Securities. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. persons should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect.

You should review carefully the section of the accompanying product supplement entitled “U.S. Federal Income Tax Consequences.” The preceding discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel regarding the material U.S. federal income tax consequences of owning and disposing of the Securities.

Under current law, the United Kingdom will not impose withholding tax on payments made with respect to the Securities.

For a discussion of certain German tax considerations relating to the Securities, you should refer to the section in the accompanying prospectus supplement entitled “Taxation by Germany of Non-Resident Holders.”

You should consult your tax adviser regarding the U.S. federal tax consequences of an investment in the Securities (including possible alternative treatments and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Supplemental Plan of Distribution (Conflicts of Interest)

UBS Financial Services Inc. and its affiliates, and Deutsche Bank Securities Inc., acting as agents for Deutsche Bank AG, will receive or allow as a concession or allowance to other dealers discounts and commissions of \$0.125 per \$10.00 Security. We have agreed that UBS Financial Services Inc. may sell all or part of the Securities that it purchases from us to its affiliates at the price to the public indicated on the cover of this pricing supplement, minus a concession not to exceed the discounts and commissions indicated on the cover. DBSI, one of the agents for this offering, is our affiliate. In accordance with Rule 5121 of the Financial Industry Regulatory Authority (FINRA), DBSI may not make sales in this offering to any discretionary account without the prior written approval of the customer. See “Underwriting (Conflicts of Interest)” in the accompanying product supplement.
