initial disclosure and that after considering the answer in Question 131.03 in the C&DIs, you have concluded that continuing to recognize these locations is appropriate.

We are not in a position to agree with your conclusion regarding an exception to the requirements under Rule 4-10(a)(31)(ii) of Regulation S-K based on the facts and circumstances provided in your response related to your Eagle Ford proved undeveloped locations. In this regard, we note your response to prior comment 2 states “by exercising capital flexibility we have slowed the pace of certain investments including our drilling program in the Eagle Ford area” and “this decision did not materially impact our reserves estimates for the Eagle Ford at fiscal year-end 2015, but did impact the conversion timing of undeveloped reserves.” The last bullet in the answer to Question 131.03 indicates delays in development caused by internal factors such as your decision to slow the pace of investments relating to your drilling program in the Eagle Ford area would not warrant an exception for a time period longer than five years to begin development of those reserves. Please remove any previously disclosed proved undeveloped reserves attributable to Eagle Ford locations which are not planned to be drilled within five years of initial disclosure.
