The accompanying notes are an integral part of these financial statements.

1. Basis of presentation

While the information presented in the accompanying interim financial statements is unaudited, it includes all adjustments which are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the interim periods presented. Except as disclosed below, these interim financial statements follow the same accounting policies and methods of their application as the Company's audited June 30, 2007 annual financial statements. It is suggested that these interim financial statements be read in conjunction with the Company's June 30, 2007 audited financial statements.

2. Nature of operations

a) Organization

The Company was incorporated in the State of Nevada, U.S.A., on May 1, 2002.

b) Development stage activities

The Company is a development stage company as defined in the Statements of Financial Accounting Standards No. 7. The Company is devoting substantially all of its present efforts to establish a new business and none of its planned principal operations have commenced. All losses accumulated since inception has been considered as part of the Company's development stage activities.

c) Going concern

The accompanying financial statements have been prepared assuming the Company will continue as a going concern.

As shown in the accompanying financial statements, the Company has incurred a net loss of \$1,496,069 for the period from inception, May 1, 2002 to December 31, 2007, and has no sales. The future of the Company is dependent upon its ability to obtain financing and upon future profitable operations. Management may seek additional financing through loans or offerings of its common stock to fund continued operations. There is no guarantee that these fund will be available or if so at favorable terms. The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts of and classification of liabilities that might be necessary in the event the Company cannot continue in existence.

3. Significant accounting policies

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States. The application of Canadian generally accepted accounting principles to these financial statements would not result in material measurement or disclosure differences. Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of financial statements for a period necessarily involves the use of estimates, which have been made using careful judgment.

The financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the frame work of the significant accounting policies summarized below:

a) Organizational and start-up costs

Costs of start-up activities, including organizational costs, are expensed as incurred.

b) Foreign currency translation

Transaction amounts denominated in foreign currencies are translated at exchange rates prevailing at transaction dates. Carrying values of monetary assets and liabilities are adjusted at each balance sheet date to reflect the exchange rate at that date. Non-monetary assets and liabilities are translated at the exchange rate on the original transaction date. Gains and losses from restatement of foreign currency monetary and non-monetary assets and liabilities are included in the statement of operations. Revenues and expenses are translated at the rates of exchange prevailing on the dates such items are recognized in the statement of operations.

c) Income taxes

The Company follows Statement of Financial Accounting Standards No. 109 – "Accounting for Income Taxes". This standard requires the use of an asset and liability approach for financial accounting and reporting on income taxes. If it is more likely than not that some portion or all of a deferred tax asset will not be realized, a valuation allowance is recognized.

STATED IN U.S. DOLLARS

d) Basic and diluted loss per share

In accordance with Statement of Financial Accounting Standards No. 128 "Earnings per share", basic loss per common share is computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding. Diluted loss per common share is computed similar to basic loss per common share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive.

Diluted earnings (loss) per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. In accordance with SFAS 128, any anti-dilutive effects on net earnings (loss) per share are excluded. If such shares were included in diluted EPS, they would have resulted in weighted-average common shares of approximately 50 million and 37.1 million for the three months ended December 31, 2007 and 2006, respectively. Such amounts include shares potentially issuable under outstanding options and warrants.

e) Issuances involving non-cash consideration

All issuances of the Company's stock for non-cash consideration have been assigned a dollar amount equaling either the market value of the shares issued or the value of consideration received, whichever is more readily determinable. The majority of the non-cash consideration received pertain to services rendered by consultants and others.

f) Cash and cash equivalents

For purposes of the statement of cash flows, the Company considers cash and cash equivalents to include all highly liquid investments with maturities of three months or less.

g) Website development costs

Under FASB Emerging Issues Task Force Statement 00-2, Accounting for Web Site Development Costs ("EITF 00-2"), costs and expenses incurred during the planning and operating stages of the Company's website development are expensed as incurred. Under EITF 00-2, costs incurred in the website application and infrastructure development stages are capitalized by the Company and amortized to expense over the website's estimated useful life or period of benefit.

h) Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

i) Fair value of financial instruments

Pursuant to SFAS No. 107, "Disclosures About Fair Value of Financial Instruments", the Company is required to estimate the fair value of all financial instruments included on its balance sheet as of September 30, 2007. The Company considers the carrying value of such amounts in the financial statements to approximate their fair value.

j) New accounting standard

In February 2007, the FASB issued SFAS No. 159, "*The Fair Value Option for Financial Assets and Financial Liabilities*", which permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS No. 159 also includes an amendment to SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" which applies to all entities with available-for-sale and trading securities. This statement is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company has evaluated the impact of SFAS No. 159 and does not believe the impact will be significant to the Company's overall results of operations or financial position.

4. Intangible assets

In December 2005, the Company signed a Letter of Intent with MD Technologies Inc., Costal Inc., and Redal Inc. to acquire the worldwide exclusive license to the microbiological process known as "Prolactis". The process provides for the bioconversion of lactose and other sugar into high proteins biomass, literally transforming waste and by-products into water and yeast to be used in animal feed.

The license was issued to the Company effective April 20, 2006. As compensation for the license, the Company issued two million one hundred thousand (2,100,000) shares at \$0.20 per share, that were issued as an exempted transaction under Section 4(2) of the Securities Act of 1933. In and subject to Rule 144 of the Securities Act of 1933 and in conjunction with the acquisition of the license, the Company paid a finder's fee of two hundred and ten thousand (210,000) shares also valued at \$0.20 per share. On October 3, 2006, the Company issued 1.5 million (1,500,000) shares at \$0.18 per share to the licensor to waive any and all conditions contained in the license agreement and obtain a clear title to Prolactis. The cost of the license of \$732,000 is being amortized over five years. Amortization expense for the three months ended December 31, 2007 and 2006 was \$36,600 and \$60,600 respectively. Amortization expense for the six months ended December 31, 2007 and 2006 was \$73,200 and \$83,700 respectively. The balance of the intangible asset as of December 31, 2007 was \$483,936. MD Technologies Inc., Costal Inc., and Redal Inc. are related parties.

Amortization expense for each of the next four years is as follows:

December 31,	
2008	\$ 146,400
2009	\$ 146,400
2010	\$ 146,400
2011	\$ 44,736

5. Website development

The cost of the website amounted to \$8,185 and is being amortized over three years. Amortization expense for the three months ended December 31, 2007 and 2006 were respectively \$682 and \$682. Amortization expense for the six months ended December 31, 2007 and 2006 were respectively \$1,364 and \$1,364. The balance of website development as of December 31, 2007 was \$4,775.

Amortization expense for each of the next two years is as follows:

December 31,	
2008	\$ 2,728
2009	\$ 2,047

6. Research and development

In April 2007, the Company entered into an agreement with MD Consultants (a related party) to provide services in connection with the development of a demonstration unit used in the production of yeast using the Company's licensed Prolactis process and related services. Under the terms of the agreement, the costs for the services valued at approximately \$155,000, of which \$141,105 was paid as of December 31, 2007. The remaining balance (approximately 10%) is payable on the submission of the final report. The Company is accounting for these services as research and development and is expensing the amounts due on the contract as the obligation is accrued. During the three months ended December 31, 2007, the Company has not incurred any research and development expenses. For the six-months ended December 31, 2007, the Company incurred \$81,361 in research and development.

7. Capital stock

a) Stock split

On August 19, 2004, the Company effected a 3:1 forward stock split. The issued and outstanding common stock after split became 10,050,000. On November 18, 2004, the Company effected a 3:1 forward stock split; the issued and outstanding common stock after the split became 30,150,000. The authorized capital stock remained at 75,000,000 shares.

All references in the accompanying financial statements to the number of common shares and per-share amounts have been restated to reflect the forward stock split.

b) Common stock issuances

8. Contingencies

The Company acquired the rights to enter into a merger agreement with Deltacrypt Technologies Inc. ("Delta"), a Canadian-based technology developer and provider of versatile encryption technology. Anticus acquired the rights to merge with Delta from 610051 N.B. Inc. (a private Canadian Corporation) which entered into an agreement with Delta regarding the merger of Delta into a public company (the "Agreement"). The rights were acquired through the issuance of 300,000 shares of the Company's common stock valued at \$76,000.

The agreement was contingent upon Anticus providing a minimum of \$750,000 of additional capital.

The Company's agreement to acquire Deltacrypt was modified on September 8, 2005, and under the modified terms, the Company agreed to make advances to Deltacrypt estimated at CDN\$27,000 (or approximately \$23,000 in US dollars) per month from August 1, 2005 to fund Deltacrypt operations until full completion of the merger. All funds advanced are to be applied to the condition requiring Anticus to provide a minimum of \$750,000 of available capital to Deltacrypt at the close of the merger. The Company terminated this agreement with Deltacrypt and has only paid \$10,000 towards this obligation. The Company has not established any reserve for any amounts which may be due to Deltacrypt under the agreement.

Management Plan of Operations

The Company continues to pursue its goals of commercializing the Prolactis™ microbiological process.

In April 2007, the Company entered into an agreement with MD Consultants (a related party) to build and operate a demonstration unit plus a laboratory in Quebec City (Canada). They will also test new raw materials for yeast production with the Prolactis process.

Under the terms of the agreement, the costs for the services valued at approximately \$155,000, of which \$141,105 was paid as of December 31, 2007. The remaining balance (approximately 10%) is payable on the submission of the final report. The Company is accounting for these services as research and development and is expensing the amounts due on the contract as the obligation is accrued. During the three months ended December 31, 2007, the Company has not incurred any research and development expenses. For the six-months ended December 31, 2007, the Company incurred \$81,361 in research and development.

This demonstration unit and materials testing will also support the company's marketing efforts to produce and supply from selected new raw materials, very high quality yeast samples.

Construction of the demonstration unit and the laboratory in Quebec City is on target. Bioreactor inoculation was done in July 2007.

On Oct 16, 2007, the company announced that the demonstration and operating unit of the Quebec science complex has started production of lactic yeast (*Kluyveromyces marxianus*) samples. Green Yeast began distributing these yeast samples to its potential customers and partners, so that they can analyze this yeast themselves, suggest adjustments specific to their needs (e.g., live or inactive yeast, dried or not, according to different drying methods (spray, drum, fluidized bed), suggest adjustments to the nutrient content, etc.), and recognize the product's quality. The objective of this sampling campaign was to show with certainty our ability to produce a quality yeast strain that meets the market's expectations. This phase also had the aim of refining the process to achieve production efficiency.

The demonstration stage has indicated that potential customers being satisfied with the analysis of the small samples provided; require larger samples of up to 500 kilograms to further evaluate the product. The demonstration unit currently lacks this production capacity.

Anticus will expand this production capacity by building an expandable production line which will have a bioreactor capable of producing the small 500 kilogram evaluation orders. This line will have all the supporting separators and drying systems and can be expanded by adding additional bioreactors as order levels increase.

The company believes that this facility can be brought into operation with an additional \$600,000 of funding. We are currently preparing for this financing through a debt or equity financing.

Green Yeast continues its discussions with cheese companies, which generate large quantities of whey in their activities. Whey and its derivatives are choice raw materials in the production of *Kluyveromyces marxianus* yeast.

Green Yeast was present at Pollutec 2007 (annual trade show of environment-related industries), which was held in Paris Villepinte from November 27 to 30, 2007. Industry reaction was positive to our product and process. We are following up on leads generated from the show and believe there are some promising prospects in France.

Contingent upon our financing requirements, we look forward to starting the construction of our pilot plant in spring 2008 and plan to have it in operation sometime in September 2008.

Item 3. Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on this evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective as the end of the period covered by this report. There were no changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.
