CORPORATION

THIRD QUARTER REPORT
2004

Q3 INTERIM REPORT – 2004

For the Nine Months Ended September 30, 2004

IAMGOLD *Third Quarter Financial Results*

Highlights:

- On August 11, 2004 the Company announced an agreement with Gold Fields Limited to acquire all of Gold Fields' mining assets located outside of the Southern African Development Community (SADC) in return for the issuance of 352 million IAMGOLD common shares. On August 15, 2004, Golden Star's unsolicited offer for all the shares of IAMGOLD lapsed.
- Attributable production for the quarter amounted to 99,000 ounces (YTD 313,000 ounces) at a cash cost, as defined by the Gold Institute ("GI"), of US\$255/oz (YTD US\$246/oz).
- Operating cash flow increased 191% to US\$18.9 million or \$0.13 per share for the quarter compared to the third quarter 2003 as a result of distributions from the Tarkwa and Damang mines (YTD US\$18.4 million or \$0.13 per share).
- A net loss for the quarter of \$(0.9) million or \$(0.01) per share compared to net earnings of \$4.6 million or \$0.03 per share for the third quarter of 2003 primarily a result of \$3.3 million in corporate transaction costs and increased exploration activities expensed during the quarter.
- With a gold price of \$416 per ounce at September 30, 2004, the unrealized gain on the Company's gold bullion holdings increased to \$12.9 million (\$0.09 per share).
- A second drill rig was added to the Quimsacocha exploration project in Ecuador as a result of excellent drill results achieved in Q2 2004.

Consolidated Financial Results Summary (US\$000's):

	Three Months Ended		Nine Months Ended	
	Sept. 30, 2004	Sept. 30, 2003	Sept. 30, 2004	Sept. 30, 2003

* Restated to reflect a change in accounting estimates relating to future income taxes and a change in accounting policy related to asset retirement obligations.

MANAGEMENT'S DISCUSSION AND ANALYSIS

(All monetary amounts in this MD&A are expressed in US\$ unless otherwise indicated)

OVERVIEW

Operating cash flow for the third quarter of 2004 increased 191% to \$18.9 million or \$0.13 per share compared to \$6.5 million or \$0.04 per share for the third quarter of 2003. For the third quarter of 2004, operating cash flow was positively impacted by cash distributions of \$4.0 million from the Tarkwa mine and \$4.7 million from the Damang mine.

Net loss for the third quarter of 2004 was \$0.9 million or \$0.01 per share compared to net earnings of \$4.6 million or \$0.03 per share for the third quarter of 2003. Net earnings for the first nine months of 2004 were \$5.1 million or \$0.03 per share compared to \$10.1 million or \$0.07 per share for the first nine months of 2003. Earnings during the quarter and the first nine months of 2004 were impacted primarily by \$3.3 million (\$0.02 per share) and \$9.5 million (\$0.07 per share), respectively in corporate transaction costs. Corporate transaction costs for the quarter include due diligence activities, financial advisory fees and legal services primarily in respect of the unsolicited takeover offer by Golden Star Resources Ltd. and the Gold Fields merger proposal. Net earnings were further impacted by a \$1.1 million increase in exploration costs during the quarter on the Quimsacocha and Cañadon del Moro projects, compared to the third quarter 2003 and by non-cash charges of \$0.5 million and \$0.8 million respectively relating to expensing of the estimated costs of issuing stock options and foreign exchange losses on the Company's provision for future income taxes. These costs were somewhat offset by the higher realized price for gold of \$404 per ounce for the third quarter of 2004 and \$406 per ounce year-to-date as compared to \$362 per ounce and \$355 per ounce for the same periods in 2003.

At September 30, 2004 the Company held 146,129 ounces of gold bullion acquired at an average cost \$327 per ounce for a total cost of \$47.8 million. The market value of these bullion holdings using a September 30, 2004 gold price of \$416 per ounce was \$60.7 million, reflecting an unrealized gain of \$12.9 million (\$0.09 per share).

* Weighted average Gold Institute cash cost is a non-GAAP measure, calculated in accordance with the Gold Institute Standard wherein cash cost equals the sum of cash operating costs inclusive of production-based taxes and management fees and may include certain cash costs incurred in prior periods such as stockpiling and stripping costs and may exclude certain cash costs incurred in the current period that relate to future production. Refer to individual mining operating results sections for mine GI cash costs and reconciliations to GAAP.

** Average gold price as per the London pm fix.

Forecast 2004 production for IAMGOLD is 435,000 ounces, slightly below previous guidance of 440,000 ounces. The decline in production is primarily the result of equipment availability issues at the Yatela mine and movement of higher amounts of waste at the expense of ore at the Tarkwa mine. Gold Institute cash cost for 2004 is forecast at \$240 per ounce, compared to the previous estimate of \$235 per ounce. The higher cash costs are primarily a function of higher fuel costs.

Forecast 2005 production for IAMGOLD is 440,000 ounces at a Gold Institute cash cost of \$260 per ounce.

2003 figures have been restated to reflect a change in accounting policy related to asset retirement obligations.

Gold production at the Sadiola mine during the third quarter was 101,000 ounces, 14% lower than the second quarter 2004 production and 9% lower than the third quarter 2003 production. The primary cause for the decreased production was poor gold recovery from the sulphide ore which averaged only 63% for the quarter. Recovery suffered due to insufficient dissolved oxygen being delivered to the leach tanks and due to a higher level of refractory ore being delivered to the mill.

The oxygen plant at Sadiola was originally designed to produce enough oxygen for a mill feed almost entirely composed of oxide ores. However, as ore reserve additions have been made, a larger component of sulphide ores has emerged and additional oxygen for the process is required. Hydrogen peroxide is now being added to the leach tanks to increase the available oxygen and the possible investment in an expanded oxygen plant is being considered for the longer term. Recoveries from sulphide ores improved to 72% in October and further improvements to the 78% level are expected in future. In addition, a program to better categorize the sulphide ores as to their refractory or non-refractory nature has been initiated so as to optimize the blend of ores delivered to the mill.

Exploration at Sadiola has also been successful in identifying additional oxide resources in sufficient amounts to extend the mine life at Sadiola by on the order of two years. As a result, the level of oxides that will be fed to the plant in 2005 will be maximized and will increase to 68% from the current level of 48%. Recoveries from oxide material is 95%.

As a result of lower recoveries and higher fuel costs during the third quarter, cash costs increased to \$268 per ounce. One of the key cost drivers at Sadiola is the continuing elevated price of diesel fuel. A feasibility study will commence shortly on sourcing hydro-generated electric power rather than relying on the on-site diesel generators. A pre-feasibility study will also commence in the first quarter of 2005 on the development of the deep sulphides at Sadiola. As a result of the previously mentioned success in locating additional oxides, the deep sulphides are now not required as a source of feed for the plant until 2011.

Asset additions at Sadiola amounted to \$1.7 million for the third quarter of 2004 and \$4.8 million year-to-date. The above amounts were expended on a variety of smaller capital projects. Exploration expenditures were \$2.3 million for the third quarter and \$7.1 million year-to-date, of which \$1.4 million and \$3.9 million were spent in the respective periods on resource definition drilling for the deep sulphide project. The remaining amounts were spent on oxide and other exploration programs.

During the quarter, a profit distribution of \$13.0 million was paid to shareholders, resulting in a total of \$24.0 million paid year-to-date in 2004. IAMGOLD's share of these distributions was \$4.9 million for the quarter and \$9.1 million year-to-date. Subsequent to quarter end, an additional dividend of \$10.0 million was paid with IAMGOLD's share being \$3.8 million. Operating cash flow at Sadiola was \$11.7 million for the third quarter and \$58.5 million year-to-date.

Production for 2004 at Sadiola is forecast at 465,000 ounces at a Gold Institute cash cost of \$240 per ounce.

2003 figures have been restated to reflect a change in accounting policy related to asset retirement obligations.

Operations at Yatela progressed relatively smoothly through this year's rainy season. However, a thirteen day strike by the unionized employees of the mine contractor did negatively impact tonnages mined during the third quarter. Mining at the satellite Alamoutala pit is virtually complete and mining will now focus on the higher grade, lower levels of the main pit. Crushing rates were as planned despite the sticky nature of the wet ore. Gold Institute cash costs decreased to \$239 per ounce, their best level compared to the previous four quarters.

Capital expenditures at Yatela were \$1.2 million for the third quarter and \$5.5 million year-to-date. Of these amounts, leach pad expansion costs were \$0.3 million for the third quarter and \$3.6 million year-to-date. Operating cash flow at Yatela was \$16.0 million for the quarter and \$18.9 million year-to-date.

Gold production at Yatela for 2004 remains forecast at 250,000 ounces at a Gold Institute cash cost of \$245 per ounce.

Gold production at Tarkwa was less than anticipated at 125,000 ounces for the quarter while gold-in-process i.e. gold in the leach pads, increased by 13,000 ounces. The grade being delivered to the heap leach is decreasing as planned as the higher grade ores are being stockpiled to provide feed for the new CIL mill.

With the commissioning of the new fleet of owner-operated mining equipment, the mining department moved a record 20.8 million tonnes of waste and ore during the third quarter. Full demobilization of the mining contractor was completed at the end of September. As the Tarkwa operation does not capitalize excess stripping, the high level of mining activity resulted in unit costs remaining at \$261 per ounce of gold produced. Unit costs are expected to decline as mining activities return to more normal levels.

At the end of the quarter, the Company announced expanded gold reserves and resources at Tarkwa (see October 4, 2004 press release). Reserves increased by 4.9 million ounces to 14.7 million ounces as at June 30, 2004 using a \$350 per ounce gold price. The Tarkwa mine now has an estimated life of 24 years at currently forecast production rates.

Asset additions at Tarkwa amounted to \$29.8 million for the third quarter of 2004 and \$140.2 million year-to-date. The majority of the capital expenditures were for the construction of the new mill and the purchase of the fleet plus conversion from contract mining to owner-operated mining. The new mill and fleet purchase plus conversion costs amounted to \$13.3 million and \$12.7 million respectively for the third quarter, and \$62.3 million and \$66.2 million respectively year-to-date. Fleet purchase costs have now been completed. Progress on the mill remains ahead of schedule with the official opening having taken place in early November. Full commercial production is expected by year-end. Forecast final cost for the mill is \$98.4 million.

The construction of the mill and the fleet of new mine equipment are being funded by shareholder loans. Including an advance of \$19.2 million made in the third quarter offset by a cash distribution of \$4.0 million during the quarter, IAMGOLD has provided funding of \$30.9 million since mid 2003 for these two projects. The balance of the required funding, estimated at \$5.0 million, is expected to be provided during the fourth quarter. Cash balances at Tarkwa as at September 30, 2004 were \$49.5 million and are of a sufficient size to support a distribution to shareholders large enough to cover the fourth quarter funding requirements.

Forecast production at Tarkwa for 2004 has been lowered to 560,000 ounces compared to 585,000 ounces provided in previous guidance, as a result of lower than expected production in the second and third quarters. A significant increase in gold production is expected in the fourth quarter with the mill in the start-up phase. Gold Institute cash costs are forecast at \$240 per ounce versus the previously provided \$235 per ounce.

* Gold revenue is calculated as gold sales divided by ounces of gold sold.

** Canadian GAAP reconciling items are made up of stock movement, mine interest, mine depreciation, mine taxes and consolidation adjustments.

Good performance at the Damang mine continued throughout the third quarter. Expected lower ore grades however, reduced the production of gold and increased per ounce operating costs during the quarter as compared to the second quarter 2004.

As reported in the Company's October 4, 2004 press release, the gold reserves at Damang stood at 862,000 ounces as at June 30, 2004. These reserves are sufficient to extend the life of the operations to the 2008/2009 time frame. The feasibility of deepening the main pit, which would extend the mine life further, continues to be investigated.

Asset additions at Damang were minimal and amounted to \$1.6 million for the third quarter of 2004 and \$3.3 million year-to-date.

In August 2004, Abosso (the company which holds the rights to operate and develop the Damang mine) distributed \$25 million in dividends to shareholders, of which \$4.7 million was IAMGOLD's share. As of September 30, 2004 cash balances stood at \$25.8 million.

Forecast 2004 production at Damang has increased to 290,000 ounces at a Gold Institute cash cost of \$235 per ounce versus previous guidance of 280,000 ounces at \$235 per ounce.

EXPLORATION

Ecuador

Quimsacocha Project

The diamond drill program which commenced in May on the D1 zone is still in progress. Originally, it was planned that 7,500 metres would be drilled. However, to the end of October approximately 12,000 metres had been completed in 33 holes as a result of high gold grades encountered over extensive intersections early in the program. In September, a second drill commenced on the property and drilling is expected to continue until December 2004. A more complete review of the project was provided in a separate press release dated November 8, 2004.

Argentina

Los Menucos Joint Venture

Following small diamond drill programs on two prospects earlier in the year, Barrick Gold, which is earning in to the project, is considering starting a further drill program before the end of the year.

Cañadon del Moro

The first drill program carried out on this prospect returned some high silver values (highest value 726 grams per tonne over 2 metres), accompanied by lower gold values (see press release of August 10, 2004). A second drill campaign will be carried out on the property in early 2005 in conjunction with the drill testing of other near-by prospects held by the Company.

Brazil

Tocantins Joint Venture (50/50 JV with AngloGold)

A 3,000 metre diamond drill program began in September to test the potential for high-grade ore shoots at depth below the Chapada garimpo (local mining operation) workings. By the end of October, 750 metres had been completed in three holes. Assay results have yet to be received.

Gandarela Joint Venture

The Company's JV partner, AngloGold, continues to experience technical difficulties with its 6,000 metre diamond drill program that is testing the economic potential of gold-bearing conglomerates. Three drill rigs are working on the property but none have reached targeted depths.

Senegal

Bambadji Project

In July, prior to the rainy season, 1,100 metres (in seven holes) of a 3,000 metre diamond drill program were completed on the BA target. All but one of the holes intersected gold mineralization, the best values being 6 metres averaging 11.5 grams/tonne gold and 10 metres averaging 5.6 grams/tonne. The BA prospect lies along the structural corridor that lies to the east of the Senegal-Mali Fault Zone, a major structure that is spacially related to the mineralization of the Loulo/Yalea deposits and the Sadiola gold mine to the north.

The remainder of the drill program will be completed in 2005. Mapping of the complex folding and thrust faulting of the BA area has been completed by a structural geologist and this is expected to assist in locating drill holes in the 2005 program.

Canada

Avalon Joint Venture

A 2,000 metre diamond drill program commenced in September on the Steep Nap prospect in Newfoundland. This work is part of IAMGOLD's earn-in agreement with Rubicon Minerals. The drill program is expected to be completed in November, following which an assessment will be made of the results.

CORPORATE RESULTS

Mining Interests

(\$ 000's)	Three Months Ended		Nine Months Ended	
	Sept. 30, 2004	Sept. 30, 2003 (Restated)	Sept. 30, 2004	Sept. 30, 2003 (Restated)
Gold sales	\$ 25,637	\$ 22,117	\$ 81,070	\$ 69,160
Mining expense	15,918	12,555	49,906	39,717
Depreciation and depletion	6,889	6,277	19,870	17,516
Earnings from mining interests	\$ 2,830	\$ 3,285	\$ 11,294	\$ 11,927

The Company records its proportionate share of assets, liabilities and results of operations from its joint venture interests in the Sadiola and Yatela mines.

The average gold revenue at Sadiola and Yatela was US\$407 per ounce in the third quarter of 2004 and US\$408 per ounce year-to-date compared to US\$363 per ounce and US\$360 per ounce for the same periods in 2003. Revenue was increased by \$0.5 million for the third quarter of 2004 and \$1.7 million year-to-date to reflect IAMGOLD's share of the change in the mark-to-market loss on Sadiola call options and the amortization for the deferred hedge revenue.

Working Interests

(\$ 000's)	Three Months Ended		Nine Months Ended	
	Sept. 30, 2004	Sept. 30, 2003	Sept. 30, 2004	Sept. 30, 2003
Tarkwa	\$ 1,304	\$ 2,031	\$ 4,997	\$ 4,609
Damang	927	446	4,298	1,419
Earnings from working interests	\$ 2,231	\$ 2,477	\$ 9,295	\$ 6,028

The Company records on its consolidated statement of earnings, the proportionate share of the profits from its working interests in the Tarkwa mine and the Damang mine. The amount of depreciation and amortization included in the above earnings are \$1.8 million for the third quarter of 2004 and \$4.6 million year-to-date, in comparison to \$1.4 million and \$4.3 million for the same periods in 2003.

Royalty Interests

(\$ 000's)	Three Months Ended		Nine Months Ended	
	Sept. 30, 2004	Sept. 30, 2003	Sept. 30, 2004	Sept. 30, 2003
Gold Royalties				
Revenue	\$ 651	\$ 632	\$ 1,852	\$ 1,610
Amortization	449	441	1,199	1,099
Diamond Royalties				
Revenue	1,788	1,014	4,296	1,014
Amortization	944	568	2,270	568
Earnings from royalty interests	\$ 1,046	\$ 637	\$ 2,679	\$ 957

Earnings from royalty interests increased 64% in the third quarter and 180% year-to-date compared to the same periods in 2003 due to the addition of earnings from the Diavik diamond royalty. Royalty revenues from the Diavik project of \$1.8 million during the third quarter of 2004 and \$4.3 million year-to-date is based on the value of diamond sales by the owners during the respective periods. In 2003, the Diavik operations were in the start-up phase and, as a result, no royalty revenues were received until the third quarter of 2003. Revenue was also recorded from the following gold royalty interests for the third quarter of 2004: the Williams mine in northern Ontario; the Limon mine in Nicaragua; the Joe Mann mine in Quebec; the Vueltas del Rio mine in Honduras, the Don Mario mine in Bolivia; and the Magistral mine in Mexico.

Corporate Administration and Other

Corporate administration totaled \$1.8 million for the third quarter of 2004 and \$5.9 million year-to-date compared to \$1.5 million and \$5.1 million for the same periods in 2003. 2003 costs include \$1.0 million resulting from the combination of IAMGOLD's and Repadre's corporate functions, including one-time charges for severance and office relocation expenses. 2004 costs include non-cash charges of \$0.5 million for the quarter and \$1.3 million year-to-date relating to new accounting rules that require expensing the estimated costs of share options granted to employees.

The foreign exchange loss of \$0.8 million in the third quarter is primarily attributable to an unrealized, non-cash expense resulting from the translation of the Company's Canadian based future tax liability into US dollars.

2004 investment income includes a \$1.1 million gain relating to sale of a loan in the first quarter of 2004.

Corporate Transactions

On March 30, 2004, the Company announced an agreement to enter into a business combination with Wheaton River Minerals Ltd. ("Wheaton"). The combination was to be completed by way of a plan of arrangement whereby each Wheaton share would be exchanged for 0.55 of a share of the Company. If all Wheaton warrants and options were exercised on

closing of the transaction, the combined company would be held 68% by existing Wheaton shareholders and 32% by the Company's existing shareholders. The combination required approval by at least two-thirds of the votes cast by the shareholders of Wheaton and by a majority of the votes cast by the Company's shareholders. The IAMGold shareholder meeting initially scheduled to be held on June 8, 2004 was deferred and ultimately held on July 6, 2004 at which time a majority of the shareholders of IAMGold voted against the transaction and, as a result, the arrangement agreement has been terminated. A total of \$3.6 million has been charged against earnings in respect of financial advisory, legal and due diligence expenses incurred in connection with this transaction.

On May 27, 2004 Golden Star Resources Ltd. ("GSR") announced an unsolicited take-over bid for IAMGold offering 1.15 shares of GSR for each share of IAMGold. A Special Committee of the Board of Directors for IAMGold was constituted to review the bid and the Board accepted the Special Committee's recommendations to reject the GSR offer. The GSR offer was subsequently raised to 1.25 shares of GSR for each IAMGold share and the Board's recommendation to shareholders was again to reject the revised offer. On July 8, 2004, the Special Committee's mandate was expanded to include actively pursuing alternatives to maximize value for IAMGold shareholders. On August 15, 2004, Golden Star's unsolicited takeover bid lapsed. A total of \$4.6 million has been charged against earnings in respect of financial advisory, legal and due diligence expenses in connection with the GSR unsolicited offer and the value maximization exercise.

As a result of the value maximizing exercise, on August 11, 2004, the Company announced that it had reached an agreement with Gold Fields Limited to acquire all of Gold Fields' mining assets located outside of the Southern African Development Community in return for the issuance of 352 million common shares of IAMGold. Due diligence investigations in respect of this transaction and the negotiation of a definitive agreement took place during the remainder of the third quarter, resulting in the announcement of the signing of the Definitive Agreement on September 30, 2004. A total of \$1.3 million has been charged against earnings to September 30, 2004 in connection with this transaction. Additional expenses continue to be incurred during the fourth quarter.

Cash Flow

Operating cash flow was \$18.9 million for the third quarter of 2004 (\$18.4 million year-to-date) compared to \$6.5 million (\$26.6 million year-to-date for the same period in 2003). The increase for the quarter is a result of \$4.0 million and \$4.7 million in distributions received from Tarkwa and Damang mines, respectively, a decrease in current working capital in Sadiola and Yatela, and an increase in royalty revenue from Diavik. The increase was partly offset by the corporate transaction costs of \$3.3 million for the quarter.

In respect of investing activities, \$1.9 million was invested in the Sadiola and Yatela operations for the third quarter of 2004 and \$6.5 million year-to-date. An advance of \$19.2 million was made to the Tarkwa operations during the quarter.

The corporate cash position was reduced from \$53.2 million at December 31, 2003 to \$26.1 million as at September 30, 2004 primarily from the funding of capital projects at Tarkwa, corporate transaction costs and the payment of dividends.

LIQUIDITY AND CAPITAL RESOURCES

The Company maintains a strong balance sheet and has sufficient liquidity and capital resources to fund its known commitments.

Working Capital

The Company's consolidated working capital position is set out below (in \$ millions):

	Sept. 30, 2004	December 31, 2003
Working Capital	\$ 105.4	\$ 118.5
Current Ratio	7.0	5.3

Cash

Consolidated cash balances totaled \$45.2 million at September 30, 2004 compared to \$66.7 million at year-end 2003, and can be segmented as follows (in \$ millions):

	Sept. 30, 2004	December 31, 2003
Joint venture cash	\$ 19.1	\$ 13.5
Corporate cash	26.1	53.2
Total	\$ 45.2	\$ 66.7

Joint venture cash represents the Company's proportionate share of cash at the Sadiola and Yatela mines and forms part of the working capital at those operations.

Components of the Company's corporate cash flow for the second quarter and year-to-date are as follows:

	Three Months Ended		Nine Months Ended	
	Sept. 30, 2004	Sept. 30, 2003	Sept. 30, 2004	Sept. 30, 2003
Inflows				
Sadiola cash receipts	\$ 4.9	\$ 3.0	\$ 9.1	\$ 11.4
Royalties received, net of withholding taxes and gold bullion receipts	2.2	1.4	5.5	2.1

Tarkwa cash receipts	4.0	-	4.0	4.0
Proceeds from sale of marketable securities and loans receivable	-	0.5	1.8	0.5
Share issuances, net of share issue costs	0.4	3.6	0.9	6.6
Interest income	0.1	0.2	0.7	0.7
Yatela cash receipts	-	3.5	-	3.5
Net cash acquired from Repadre	-	-	-	34.2
Foreign exchange gain on cash balances	0.2	-	-	1.9
Share purchase loan repayments	-	0.8	-	0.8
	\$ 16.5	\$ 14.0	\$ 26.7	\$ 70.6

	Three Months Ended		Nine Months Ended	
	Sept. 30, 2004	Sept. 30, 2003	Sept. 30, 2004	Sept. 30, 2003
Outflows				
Investment in Tarkwa	\$ 19.2	\$ 2.7	\$ 28.2	\$ 2.7
Corporate transaction costs	3.9	-	7.2	-
Dividends	-	-	6.7	2.5
Corporate administration	1.9	2.2	5.8	7.9
Exploration and exploration administration	2.3	1.2	5.4	4.4
Foreign exchange loss on cash balances	-	0.1	0.3	-
Other	-	0.4	0.2	0.1
Gold bullion purchases	-	1.5	-	15.5
	\$ 27.3	\$ 8.1	\$ 53.8	\$ 33.1
Net inflow (outflow)	\$ (10.8)	\$ 5.9	\$ (27.1)	\$ 37.5

Gold Bullion

At September 30, 2004, bullion balances were slightly changed from year-end 2003 at 146,129 ounces at an average cost of \$327 per ounce. The market value of the bullion was \$60.7 million using a September 30, 2004 gold price of \$416 per ounce, reflecting an unrealized gain of \$12.9 million on bullion balances.

CHANGES IN ACCOUNTING POLICY

Stock-based compensation:

On January 1, 2004, the Company adopted the Canadian Institute of Chartered Accountants ("CICA") Handbook Section 3870 ("Section 3870"). Section 3870 requires all stock-based compensation be accounted for under the fair value based method. Transitional rules allow for an adjustment to opening retained earnings with no restatement to prior periods. As a result, the Company has reduced opening retained earnings as at January 1, 2004 by \$2.6 million.

Asset retirement obligations:

On January 1, 2004, the Company adopted the CICA Handbook Section 3110, "Asset Retirement Obligations" (Section 3110). Section 3110 requires that the fair value of liabilities for asset retirement obligations be recognized where incurred and that a corresponding asset be set up and be depreciated over the life of the asset. The Company has adopted Section 3110 retroactively, with prior periods being restated. Accordingly, opening retained earnings as at January 1, 2004 have been increased by \$ 0.6 million.

As at November 9, 2004, the number of shares issued and outstanding of the Corporation was 145.7 million.

See accompanying notes to the consolidated financial statements.

(Tabular amounts in thousands of United States Dollars except per share data)

The interim consolidated financial statements of IAMGOLD Corporation ("the Company") have been prepared by management in accordance with accounting principles generally accepted in Canada. The interim consolidated financial statements have been prepared following the same accounting policies and methods of computation as the consolidated financial statements for the fiscal year ended December 31, 2003 except as noted. The interim consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto in the Company's annual report for the year ended December 31, 2003. The results of operations for the three-month period are not necessarily indicative of the results to be expected for the full year.

On January 1, 2004 the Company adopted CICA Handbook Section 3110: “Asset Retirement Obligations”, which requires that the fair value of liabilities for asset retirement obligations be recognized in the period in which they are incurred. A corresponding increase to the carrying amount of the related assets is generally recorded and depreciated over the life of the asset. The amount of the liability is subject to re-measurement at each reporting period. The prior policy involved accruing for the estimated reclamation and closure liability through charges to earnings basis over the estimated life of the mine. This change has been applied retroactively with prior periods being restated. The effect of the changes to opening retained earnings is summarized as follows:

The adjustment to opening retained earnings at January 1, 2004 is further summarized as follows:

Increase in mining assets, January 1, 2004	\$	3,028
Increase in asset retirement obligation, January 1, 2004		2,443
Increase in opening retained earnings, January 1, 2004	\$	585

2. CASH AND CASH EQUIVALENTS:

	Sept. 30, 2004	Dec. 31, 2003
Corporate	\$ 26,042	\$ 53,171
Joint ventures	19,140	13,504
	\$ 45,182	\$ 66,675

3. GOLD BULLION:

As at September 30, 2004, the Company held 146,129 ounces of gold bullion at an average cost of US\$327 per ounce. The market value of this gold bullion, based on the market close price of \$416 per ounce was \$60,738,000.

4. NON-RECOURSE LOANS PAYABLE:

	Sept. 30, 2004	Dec. 31, 2003
Yatela loans	\$ 10,947	\$ 11,342
Note receivable from the Government of Mali, included in long-term receivables	6,667	6,635
Net Yatela obligation	\$ 4,280	\$ 4,707

5. SHARE CAPITAL:

Authorized:
Unlimited first preference of shares, issuable in series
Unlimited second preference shares, issuable in series
Unlimited common shares
Issued and outstanding common shares are as follows:

	Number of shares	Amount
Issued and outstanding, December 31, 2003	145,333,845	\$ 342,208
Restatement of opening share capital (note 1(a))		172
Exercise of options	333,635	1,293
Issued and outstanding, September 30, 2004	145,667,480	\$ 343,673

(a) Share Option Plan:

The Company has a comprehensive share option plan for its full-time employees, directors and officers and self-employed consultants. The options vest over three years and expire no longer than 10 years from the date of grant.

A summary of the status of the Company's share option plan as of September 30, 2004 and changes during the nine months then ended is presented below. All exercise prices are denominated in Canadian dollars.

	Options		Weighted Average Exercise Price
Outstanding, beginning of period	5,414,535	\$	5.13
Granted	805,000		9.02
Exercised	(333,635)		3.39
Forfeited	(24,001)		5.33
Outstanding, September 30, 2004	5,861,899	\$	5.77
Options exercisable, September 30, 2004	4,000,234	\$	4.84

(b) Stock-based compensation:

The Company accounts for all stock-based compensation granted on or after January 1, 2002, using the fair value based method.

The fair value of the options granted subsequent to January 1, 2002 has been estimated at the date of grant using a Black-Scholes option pricing model with the following assumptions: risk-free interest rate of 5%, dividend yield of 1%, volatility factor of the expected market price of the Company's common stock of 37%; and a weighted average expected life of these options of 8 years. The estimated fair value of the options is expensed over the options' vesting period of 3 years.

For the nine months ended September 30, 2004, \$1,288,000 was recorded as compensation expense relating to the following options:

Year of Grant/ Modification	# of Options	Weighted Average Exercise (Cdn\$) Price	Total Weighted Average Fair Value	Nine Months Ended Sept. 30, 2004 Expense
2002	432,667	\$ 7.27	\$ 2.88	\$ 322
2003	910,000	7.61	1.56	339
2004	805,000	9.02	2.26	627
	2,147,667	\$ 8.07	\$ 1.92	\$ 1,288

In 2004, the Company awarded 22,172 restricted common shares to certain executives of the Company under the Company's share option plan. These restricted shares have a value of Cdn\$200,000 and will be issued and expensed over their three-year vesting period. For the nine months ended September 30, 2004, \$52,000 was recorded as compensation expense relating to the restricted share awards.

6. SEGMENTED INFORMATION:

- (a) The Company's assets, liabilities, revenue and expenses, and cash flows allocated to the appropriate reporting segments identified by the Company are as follows:

- (b) The Company's share of joint venture cash flows for the nine months ended September 30, 2004 is as follows:

	Sept. 30, 2004
Cash flows from (used in) operations	\$ 21,875
Cash flows from (used in) financing	(606)
Cash flows from (used in) investments	(6,513)

7. CONTINGENCIES AND COMMITMENTS:

- (a) The Company was a defendant in an action commenced in the Ontario Court of Justice (General Division) by Kinbauri Gold Corporation ("Kinbauri").

On December 10, 2002, the trial judge released reasons for judgment awarding damages to the Plaintiff in the amount of Cdn \$1.7 million. The trial judge awarded pre-judgment interest at the rate of 10% and costs to be determined by assessment. The Company recorded an expense of \$2,900,000 in Q4 2002 in relation to this judgment.

The Plaintiff filed a Notice of Appeal, dated January 20, 2003, appealing the damage award. The Company filed a Notice of Cross-Appeal, dated January 31, 2003, also appealing the damage award and the pre-judgment interest rate. The appeals were argued before the Ontario Court of Appeal on April 15th, 2004. Judgment was reserved. A decision has not yet been released.

- (b) In December 2003, the Department of Taxation in Mali performed an audit of the mining operations at the Yatela and Sadiola mines in Mali for the years 2000, 2001 and 2002. The audit report claimed taxes and penalties payable of approximately \$15.6 million of which the Company's share is \$5.9 million. Sadiola and Yatela management have reviewed the claims with legal and tax advisors and are of the opinion that all taxes were properly paid and that the audit report is without merit.

The Company continues to work with the other partners in the Yatela and Sadiola mines to negotiate a settlement of the audit claims. Discussions with the Ministry of Finance in Mali are continuing, failing which the mines may elect to commence arbitration to enforce their rights under their original Convention Agreements with the Government of Mali.

8. CORPORATE TRANSACTIONS:

On August 11, 2004, IAMGOLD and Gold Fields Limited ("GFL") announced a proposed transaction whereby IAMGOLD would acquire all of the international assets of GFL located outside the Southern African Development Community ("SADC") in exchange for approximately 350 million shares of IAMGOLD. The new company is to be called Gold Fields International Limited ("GFI"). As a result of the transaction, GFL will own approximately 70% of GFI while existing IAMGOLD shareholders will own the remaining 30% of GFI.

A definitive agreement amongst the parties was signed on September 30, 2004. The combination is subject to regulatory approval and third party consents customary in a transaction of this nature. The transaction is subject to the approval of a majority of the votes cast by the shareholders of both IAMGOLD and Gold Fields at meetings of shareholders scheduled to be held in early December. The transaction is expected to close by the end of the year.

If the transaction does not occur as a result of one of the parties accepting a superior proposal, then the party that accepted the superior proposal will be required to pay a fee of US\$20 million to the other party.
