Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by regulation S-T Rule 101(b)(7); ☐

Indicate by check mark whether by furnishing the information contained on this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ☐ No ☒

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-_____.

On May 19, 2003, Telkom SA Limited (“Telkom”) issued a press release announcing that it had entered into a long-term collective agreement on substantive matters with Solidarity, a copy of which is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

On May 14, 2003, Telkom executives attended Merrill Lynch’s Global Emerging Markets Conference. A copy of the slide presentation prepared for the conference is attached hereto as Exhibit 99.2 and is incorporated herein by reference. The slide presentation contains forward-looking statements regarding Telkom and includes cautionary statements identifying important factors that could cause actual results to differ materially from those anticipated.

On May 22, 2003, Telkom issued a press release announcing that its executives would be presenting on Telkom’s prior years’ fixed-line capital expenditure and future network investment strategy at the Deutsche Bank technology workshop in South Africa on May 22 and 23, 2003. A copy of the press release is attached hereto as Exhibit 99.3 and is incorporated herein by reference. A copy of the slide presentation prepared for the workshop is attached hereto as Exhibit 99.4 and is incorporated herein by reference. The slide presentation contains forward-looking statements regarding Telkom and includes cautionary statements identifying important factors that could cause actual results to differ materially from those anticipated.

On May 23, 2003, Telkom issued a press release announcing that it had entered into a long-term collective agreement on substantive matters with the Alliance of Telkom Unions, a copy of which is attached hereto as Exhibit 99.5 and is incorporated herein by reference.

On June 18, 2003, Telkom announced the annual results of Vodacom Group (Proprietary) Limited (“Vodacom”) for the year ended March 31, 2003, a copy of which is attached hereto as Exhibit 99.6 and is incorporated herein by reference.

Attached hereto as Exhibit 99.7 and incorporated herein by reference, is a slide presentation prepared in connection with the release of Vodacom’s annual results for the year ended March 31, 2003.

On June 23, 2003, Telkom announced its preliminary annual results for the year ended March 31, 2003, a copy of which is attached hereto as Exhibit 99.8 and is incorporated herein by reference.

Attached hereto as Exhibit 99.9 and incorporated herein by reference, is a slide presentation prepared in connection with the release of Telkom’s preliminary annual results for the year ended March 31, 2003.

Media Release

19 May 2003

Telkom and Solidarity enter into long-term collective agreement on substantive matters

Telkom and Solidarity, a member of the Alliance of Telkom Unions (ATU), on Friday (16 May 2003) signed a long-term collective agreement on substantive matters that will see its members receiving a 9% salary increase this financial year. The salary increase and improvement to conditions of employment will be extended to non-union members as well.

Telkom Employee Relations Executive, George Nkadameng, said the agreement would be valid from 1 April 2003 through to 31 March 2006. Salary increases would be implemented retrospectively, and employees also stood to benefit from revised and more favourable Company contributions to medical aid schemes.

Salary increases would be scaled back year-on-year for the duration of the agreement, with Solidarity members receiving 8% and 7% in 2004/5 and 2005/6 respectively. Solidarity represents 13% of employees in Telkom's bargaining unit, while non-unionised employees and members of non-affiliated unions represent a further 21,5% of employees in the bargaining unit.

"Solidarity has demonstrated an understanding of Telkom's position, and we view this agreement as a tangible sign of our maturing harmonized relationship with organised labour," said Nkadameng.

Solidarity General Secretary: Telecommunication Industry, Danie de Wet, said: "The agreement which Solidarity has concluded with Telkom is in the best interests of Telkom and Solidarity members. This proactive approach adopted by Solidarity during these negotiations has yielded positive results for its members."

However, Nkadameng expressed his disappointment that neither the South African Communications Union (SACU), a member of ATU, nor the Communication Workers Union (CWU) had accepted Telkom's final offer, made to both unions on 9 and 12 May 2003 respectively. They had until 10:00 this morning to accept the offer.

"We have been completely open and even-handed with all our unions throughout the substantive negotiations, and we do not believe that SACU and CWU have acted in their members' best interests by rejecting Telkom's final offer."

"Telkom will now proceed to offer the very same final offer to CWU members in the bargaining unit. Should individual members of this union accept this offer by 10:00 on Friday 23 May 2003, Telkom will implement their salary increases retrospectively to 1 April 2003," he said.

"Union members who do not accept the offer by the stated deadline will have the improved salaries and working conditions implemented only from the date on which they, or their unions on their behalf, accept Telkom's final offer," said Nkadameng.

Forward-looking safe harbour

All statements contained herein, as well as oral statements that may be made by the Telkom SA Limited or by officers, director or employees acting on behalf of the Telkom Group that are not statements of historical fact constitute “forward-looking statements”. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause Telkom’s actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Among the factors that could cause our actual results or outcomes to differ materially are those discussed in the prospectus relating to the global offering, which is available from Telkom and filed with the U.S. Securities Exchange Commission, including, but not limited to: increased competition in the South African fixed-line and mobile communications markets; developments in the regulatory environment; Telkom’s ability to reduce expenditure; general economic, political, social and legal conditions in the Rand; and other matters not yet known to the Telkom or not currently considered material by the Telkom. You should not place undue reliance on these forward-looking statements. All written and oral forward-looking statements attributable to the Telkom or persons acting on its behalf are qualified in their entirety by these cautionary statements. Moreover, unless required by law to update these statements, Telkom SA Limited will not necessarily update any of these statements, either to confirm them to actual results or to changes in its expectations.

Group overview

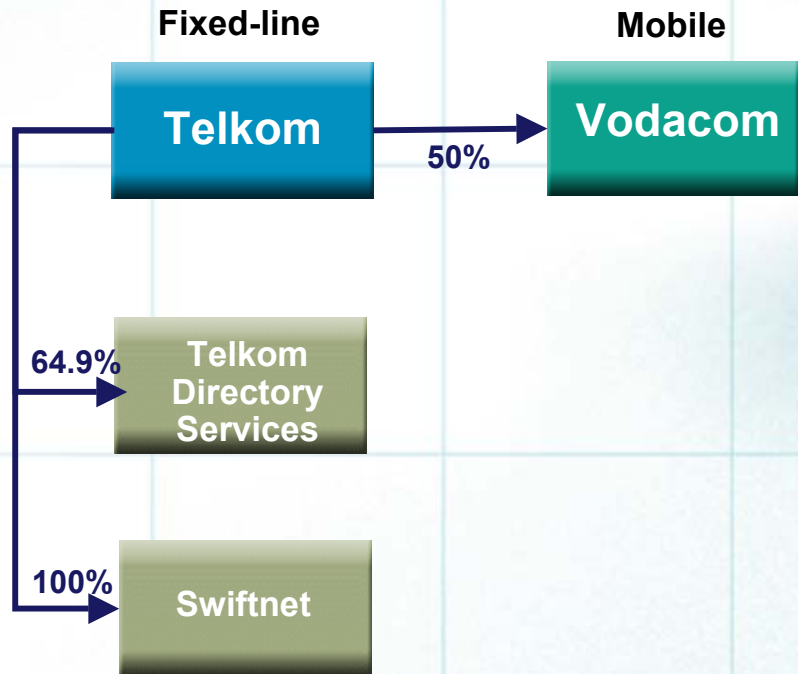

Telkom at a glance

Telkom SA Limited shareholding

Group structure

Group financial highlights

March 2002. In ZAR millions | % change since previous year

Revenue ● **34,197** | 9%

EBITDA ● **9,621** | (4%)

EBIT ● **4,213** | (15%)

Net income ● **1,221** | (25%)

Net debt ● **21,858** | 1.2%

Capex ● **9,004** | (9%)

Group operational highlights

September 2002 | % change since previous year

Fixed-line – Telkom SA Limited

Mobile – 100% Vodacom²

1. Exclude subsidiaries. 2. Telkom consolidates 50% of Vodacom for group financial results. 3. Include customers from Other African operations

Investment highlights

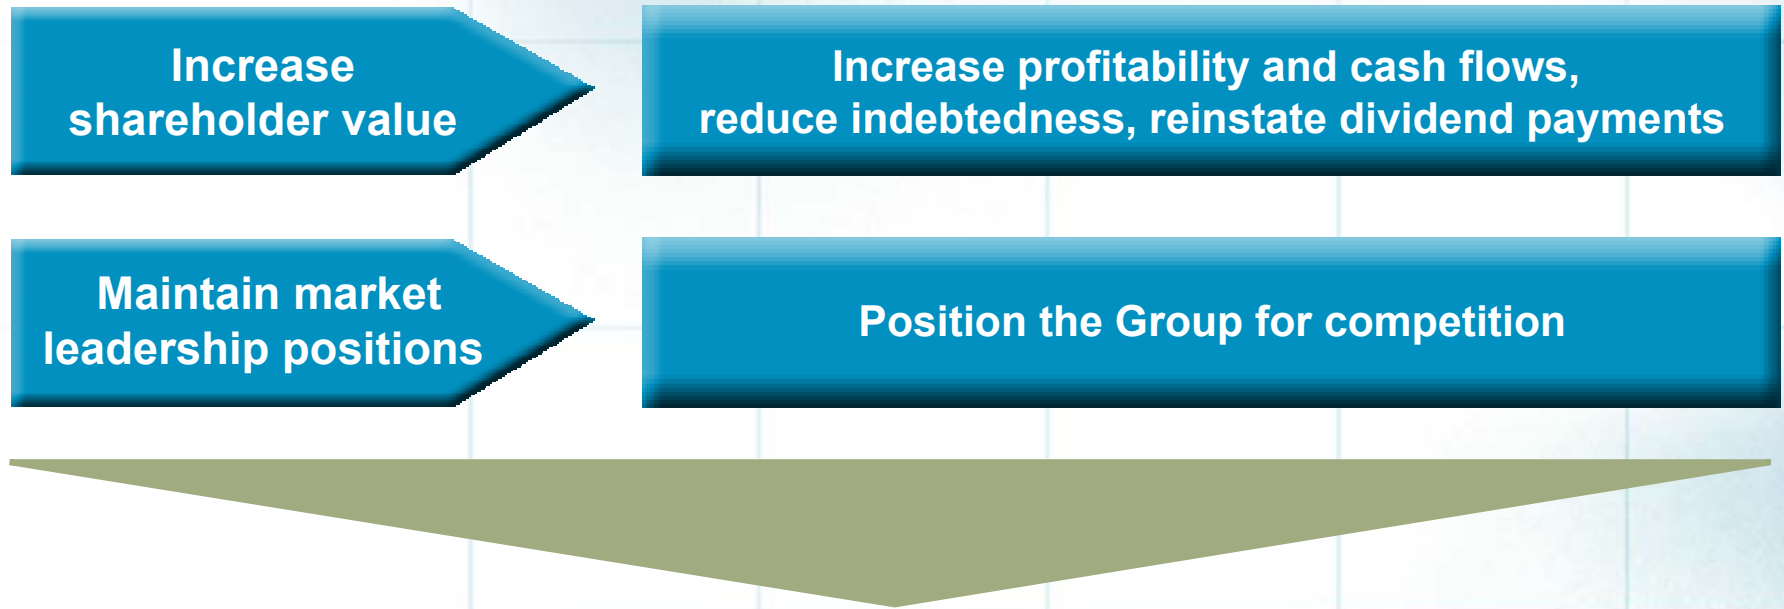

- The leading communications service provider in South Africa
- Well placed to increase efficiencies, profitability and cash flows, reduce capex, reduce indebtedness and reinstate dividend payments
- Strong growth in mobile business through Vodacom, the leading SA mobile operator
- Strong strategic investors
 - SBC/Telekom Malaysia in Telkom
 - Vodafone/Venfin in Vodacom

Group strategy

To be a world-class communications Group

- Compete effectively and grow selected markets
- Enhance operational and capital efficiencies
- Expand integrated service offerings
- Enhance employee performance
- Capitalise on growing mobile communications market

Maintaining and driving the top line

Compete

Compete effectively in our core markets and grow selected markets

- >> Improve customer service**
- >> Market new services to our existing clients**
- >> Promote increased network usage**
- >> Manage the regulatory environment**

Protecting our core revenues

Year ended March 31, 2002. Fixed-line revenues (ZARm), before inter-segmental eliminations with Vodacom. ILD – International Long Distance; DLD – Domestic Long Distance

Customer service remains top priority

Year ended March 31, 2000 and six months ended September 2002.

Increasing customer loyalty

>> Increasing penetration of value-added services

Call answer

Forward call

Call waiting

MyRing

MyRing

>> Locking customers into long-term contracts

>> Introducing new products

Keeping prices competitive

>> Tariff rebalancing completed over last 5 years in preparation for competition. Ratio of local call prices to long distance now in line with best practice

Year ended March 31. Note: 3-minute local call to 3 minute long distance call (>200 km)

>> Local and long distance calls are the cheapest in the South African market

	Standard time	Callmore time
Local (0-50km) ¹	R0.37/min	R0.14/min
Long distance (>50km) ¹	R0.99/min	R0.50/min
Cellular	R1.88/min	R1.11/min

Rates as of 1 January 2003 and include VAT. 1. After 1st unit.

Increasing network usage

Telkom carries all mobile traffic, therefore the significant growth in SA mobile customers has seen excellent growth in Telkom's mobile lease facilities revenue

Year ended March 31, ZARm

Increasing network usage through a targeted deployment of fixed-line prepaid where we have existing unutilised capacity

Year ended March 31, prepaid customers 000s

Achieving operational excellence

Efficient

Reduce operating expenses and enhance capital investment efficiencies

>> Reduce employee expenses

>> Reduce bad debts and maintenance costs

>> Increase savings from outsourcing contracts

>> Implement disciplined capital investment

Streamlining the company

Fixed-line employee numbers¹

Year ended March 31.

1. Excludes employees of Telkom Directory Services and Swiftnet.

Employee losses over last 3.5 years

Three and a half years from 1 April 1999 to September 2002

1. Gross staff losses before appointments of 28,687

Managing outsourcing contracts

>> Reduce vehicle fleet by 21%
to 15,133

Year ended March 31, 2000 and six months ended September 2002.

>> Contained property
management costs

Six months ended September. ZAR million

Strict capital discipline

Fixed-line capex to sales

Year ended March 31.

Forecast OSS capex spend

A five to six year est R4bn project - focused on improving systems to ensure competitiveness and continued cost savings

Seizing new market opportunities

Integrate

Expanding our integrated service offerings and developing new fixed-mobile products

>> Increasing penetration of data services

>> Develop new innovative data products

>> Develop new fixed-mobile products

>> Increase operational synergies with Vodacom

Data growth providing support

Data revenue (Rm)

>> Strong growth driven by leased line volumes and increased penetration of value-added services

Number of managed network sites

Year ended March 31. Fixed-line data revenues before inter-segmental eliminations with Vodacom Year ended March 31.

Moving closer to mobile

Rationale for Vodacom synergies

- >> To leverage both companies strengths in the market**
- >> To ensure optimum geographic coverage of retail synergies**
- >> To eliminate channel conflict in business and corporate segments**
- >> To avoid duplication of resources**
- >> To benefit from converging fixed-mobile technologies**
- >> To share best of class practices**
- >> To create value for Telkom group shareholders**

Creating a culture of service and savings

Performance

Foster a highly competitive culture, driving employee performance

>> Implement training and skills retention programs

>> Develop long-term relationships with unions

>> Entrench a cost savings culture

>> Entrench a competitive culture

Creating a cost conscious mindset

Employee suggestions

- A R500m targeted savings cost initiative across the company
- Savings driven by employee suggestions
- A sense of ownership
- 250 suggestions received, 111 implemented

- ✓ Reduce staff telephone usage
- ✓ Reduce overtime
- ✓ Reduce contractors
- ✓ Reduce paper consumption
- ✓ Reduce email usage
- ✓ Optimise idle office asset use

Benefiting from mobile growth

Mobile

Capitalise on the growing mobile communications market through Vodacom

- >> Continue mobile subscriber growth in South Africa
- >> Expand mobile business outside of South Africa
- >> Expand mobile data revenue products
- >> Achieve sustainable growth in profits and cash flow

Grow South African customer base

Vodacom South African customers (000s)

>> Vodacom estimates the total SA mobile market at peak penetration at 19 million or 45% penetration, current market size estimate is 14 million.

Year ended March 31

Introduce new innovative voice products

Make every
second count

FreeChange

Now switch between three prepaid options once a month free of charge! Just dial 1181

Introduce new data products

Vodacom revenue – 6 months Sep 2002

➤ Data revenue largely from SMSs, Vodacom SMS's grew 80% in six months to September 2002 to 653 million compared to six months to September 2001

Expand mobile beyond South Africa

Other African revenue (ZARm)¹

Year ended March 31

1. 100% Vodacom

Tanzania

- Launched August 2000
- Market leader
- Population 36.0m¹
- Customers at 30 Sep 2002 – 305,953

Democratic Republic of Congo

- Official launch May 2002
- Network rollout started Dec 2001
- Population 52.5m¹
- Customers at 30 Sep 2002 – 142,477

Lesotho

- Launched May 1996
- Prepaid launched this year
- Market leader
- Customers at 30 Sep 2002 – 91,898

¹ Based on data for 2001 as listed in ITU 2002 (June 20, 2002).

Vodacom delivering solid shareholder returns

Cash generated from operating activities (Rm)

Year ended March 31. 100% of Vodacom

Return (EBIT) on net assets¹

Year ended March 31.

1. EBIT return on total assets less non-interest liabilities at year end

Conclusion

Focused on delivering shareholder value

Margin expansion

Capex reduction

Free cash flows

- Reduce debt
- Grow earnings
- Reinstate dividend

22 May 2003

Telkom to map out network investment plans at Deutsche Bank workshop

Telkom SA Limited (JSE and NYSE: TKG) executives will present on the Company's prior years fixed-line capital expenditure and future network investment strategy at the Deutsche Bank technology workshop that takes place in South Africa, today and tomorrow (22 and 23 May 2003).

The presentation to investors by Telkom's Chief Technical Officer, Reuben September, Access Networks Operations (ANO) Managing Executive, Theo Hess, and Operations Support Systems (OSS) Managing Executive, Johan Mare, will provide additional disclosure on prior years capital expenditure as the Company moves away from license obligation disclosure.

Capital expenditure will be disclosed and discussed under six new categories: baseline, network evolution, cost savings, revenue generating, regulatory and company support.

Prior years baseline capital expenditure was driven largely by Telkom's line rollout programme, mobile leased facilities, data leased lines and to a lesser extent, by business solutions growth. Current baseline capital expenditure is largely for data leased line growth, mobile leased lines, leased business systems and business solutions. Baseline capital expenditure is also focused on bandwidth provisioning in the access network (e.g. through ADSL and specialized radio local loop applications) and the expansion of the IP network for the provision of customer specific value-added IP solutions.

Telkom has also historically invested significantly in evolving its transmission, switching and access networks, and significant capital expenditure has been aimed at reducing costs, improving effectiveness and enabling better service. Current network evolution capital expenditure is focused on the deployment of Dense Wave Division Multiplexing (DWDM) in the transmission network and integrated access devices.

Cost-reduction and efficiency-improvement investments include those in operational support systems (OSS), network management, IT business systems, management systems and centralisation.

"Telkom has enhanced its capital management process to improve capital efficiency through strict capital project approval processes and the utilization of existing infrastructure and spare network capacity to drive down investment in new line growth. We also have enhanced benefit tracking and reporting processes for our capital programmes, and are benchmarking our network rollout costs against industry standards as we focus on reducing capital expenditure as a percentage of revenues," said Reuben September.

Telkom's previous network investment strategy had focused on meeting licence obligations including the rollout of lines to underserved areas and the modernization of the network.

"By contrast, our current network investment strategy focuses on increasing network efficiencies, lowering costs and exploiting market opportunities. Our overall objective is to achieve satisfactory rates of return on our network," said September.

For access to the Telkom presentation, please visit Telkom's Investor Relations portal at <http://www.telkom.co.za/IR/index.jsp>

Forward-looking statements

All statements contained herein, as well as oral statements that may be made by Telkom SA Limited or by officers, directors or employees acting on behalf of the Telkom Group, that are not statements of historical fact constitute “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, specifically Section 21E of the U.S. Securities Exchange Act of 1934, as amended. Such forward-looking statements involve a known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Among the factors that could cause our actual results or outcomes to differ materially from our expectations are those risks identified under the caption “Risk Factors” contained in the prospectus relating to Telkom’s initial public offering filed with the U.S. Securities Exchange Commission and available on Telkom’s website at www.telkom.co.za/ir, including, but not limited to, increased competition in the South African fixed-line and mobile communications markets; developments in the regulatory environment; Telkom’s ability to reduce expenditure; the outcome of arbitration or litigation proceedings with Telcordia Technologies Incorporated; general economic, political, social and legal conditions in South Africa and in other countries where Vodacom invests; fluctuations in the value of the Rand; and other matters not yet known to us or not currently considered material by us. You should not place undue reliance on these forward-looking statements. All written and oral forward-looking statements attributable to us or persons acting on our behalf are qualified in their entirety by these cautionary statements. Moreover, unless we are required by law to update these statements, we will not necessarily update any of these statements after the date of this press release, either to conform them to actual results or to changes in our expectations.

Five key focus areas

- Redefining capital expenditure
- Network strategy
- Building for selected growth
- Maintaining the network
- Investment in operational support systems

Redefining capex

A new view of fixed-line capex

Reporting for licence obligations

Year ended March 31, 2002. Fixed-line capex of R6,962 million

Management reporting

Year ended March 31, 2002. Fixed-line capex of R6,962 million

Building and maintaining the core

Baseline capital expenditure

In R millions | contribution %

Definition

- >> Capex required to meet voice and data service requirements
- >> Known demand and costs – can be modelled based on history and trends

Categories

- >> **Voice** – line build, ISDN, national core network, international network, business systems, payphones and CPE
- >> **Data** – data leased line growth, e-business
- >> **Mobile** – wholesale (COFLS)
- >> **Business solutions** – VPNs, CNC, IPVPN

Baseline investment

Baseline capital expenditure

In R millions

>> Significant capex driven by line rollout and related customer premise equipment (CPE), mobile leased facilities and data leased lines

>> Current capex largely for data leased line growth, mobile leased lines, leased business systems, business solutions

Year ended March 31.

Evolving the network

Network evolution capital expenditure

In R millions | contribution %

Definition

- >> Expenditure aimed at evolving the network and improving its resilience, redundancy and efficiency
- >> Upgrade, rehabilitate, modernise

Categories

- >> Access line evolution
- >> Transmission
- >> International and satellite
- >> Switching (circuit and packet)
- >> Power

Network evolution investment

Network evolution capital expenditure

In R millions

- >> Driven by significant investment in evolving the transmission network – (Local transport network, National Transport network & ATM), WDM
- >> Evolving our data network to a packet network for IP carrying capacity
- >> Evolving the access and public phone network

- >> Includes significant spend on evolving the switching network – replacing manual exchanges with digital exchanges
- >> Includes investment in international network – SAT-3/WASC/SAFE

- >> Continued investment in evolving transmission network with DWDM and evolving access and public phone network

Year ended March 31.

Increasing operational efficiencies

Cost savings capital expenditure

In R millions | contribution %

Cost savings: 1,743 | **25%**

Definition

- >> Expenditure aimed at reducing costs, improving effectiveness and allowing better service

Categories

- >> OSS (FlowThru and iCare)
- >> Network management
- >> IT business systems
- >> Management systems and process enhancements
- >> Centralisation

Cost savings investment

Cost savings capital expenditure

In R millions

Year ended March 31.

Capital management

Telkom has enhanced its capital management process to improve capital efficiency through

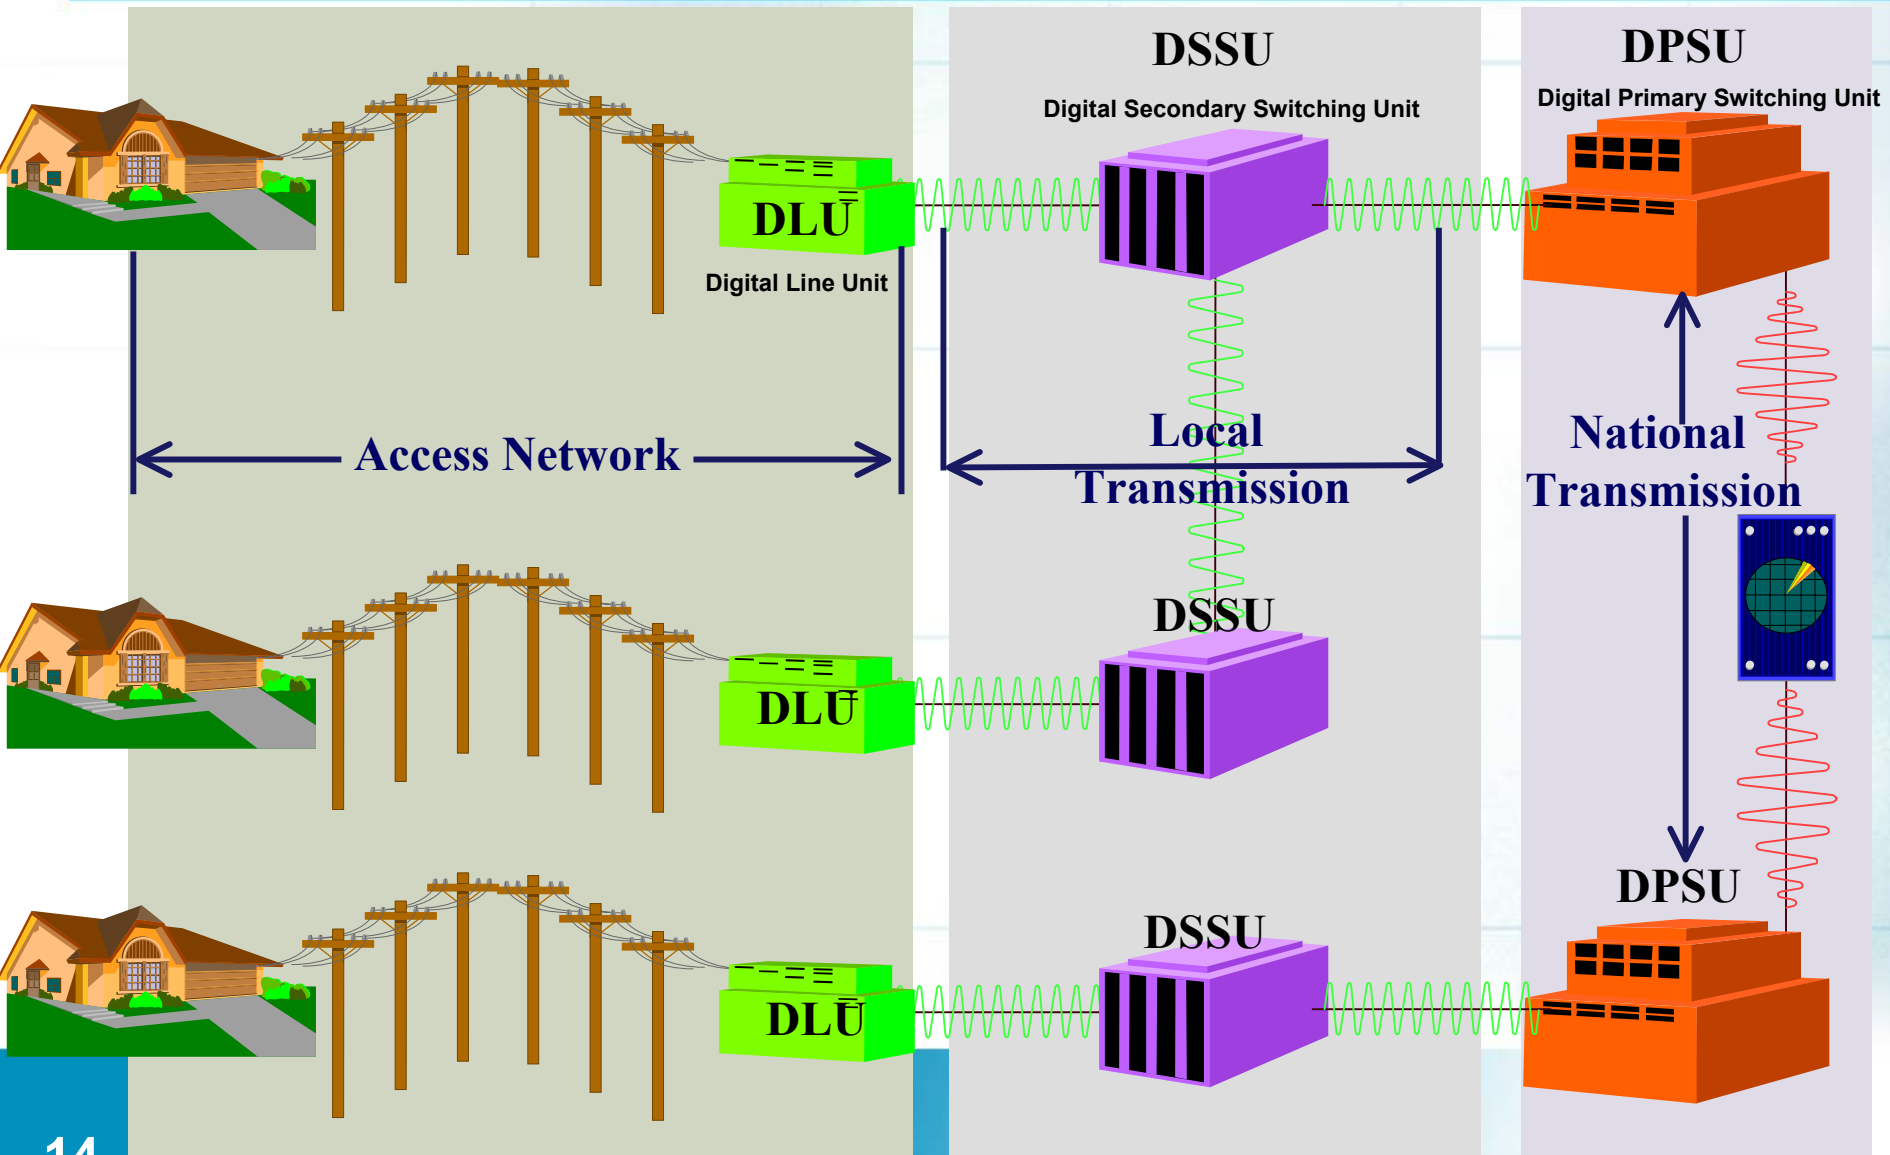

- Strict capital budget approval process to ensure optimal capex allocation
- Utilisation of existing infrastructure to drive down investment in new line growth
- Utilisation of spare capacity in lieu of line rollout
- Benefit tracking and reporting processes of capital programmes
- Benchmarking of network rollout costs against industry standards
- Reducing capital expenditure as a percentage of revenues

Network strategy

Basic network infrastructure

Previous network investment strategy

- Licence obligation
 - Rollout to under-serviced areas
 - Replace analogue lines with digital
 - Increase teledensity
- Modernise network
 - Deployment of Asynchronous Transfer Mode (ATM) and fibre technologies
 - Customer specific solutions
 - Replacement of analogue/manual exchanges with digital exchanges
 - Managed network (National Network Operations Centre-NNOC)
 - Transport rings in core, metro and access

Network modernisation programme

1997/1998

- Replaced 228 353 non-digital lines
- 71 000 km of fibre laid

1998/1999

- Replaced 518 105 non-digital lines
- ATM deployed
- NNOC started
- Afrolinque (SAT-3/WASC/SAFE) project launched

1999/2000

- Replaced 350 440 non-digital lines
- NNOC open

2000/2001

- DWDM deployed
- xDSL deployed

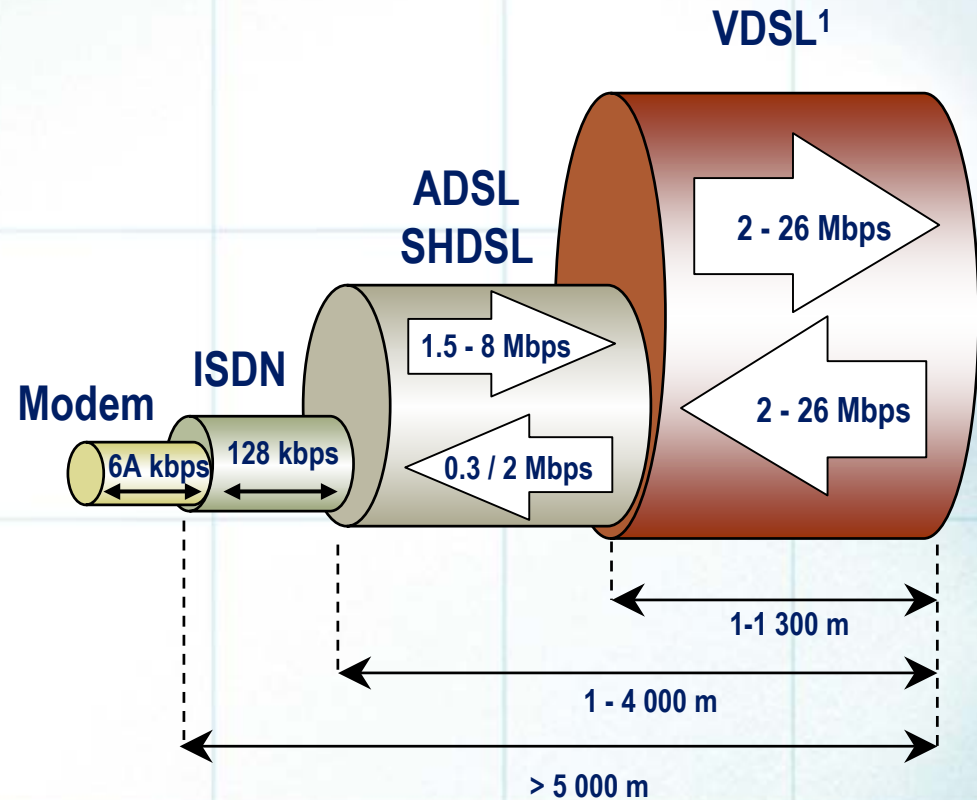

2001/2002

- IP clearing house
- IP network (VOIP)
- Afrolinque (SAT-3/WASC/SAFE) projects completed

Access network deployed

- Access network consists of
 - Mainly copper
 - Radio technologies deployed in rural areas
 - Fibre deployed in high-end of the market
 - Access network supports basic voice to broadband
- Cost efficiencies from embedded copper
- Improving bandwidth capability of copper

Future direction of access network

1. Video Digital Subscriber Line

Switching and transmission network

- Voice network
 - Two-tier switching network with SS# 7 (Signally System #7)
 - Deployed intelligent network platform
- Non-voice network
 - Constant-bit rate, variable bit rate platforms
 - End-to-end leased circuits
 - IP enabled
- Transmission network
 - Consists of fibre digital microwave, Synchronous Digital Hierarchy (SDH), Dense Wavelength Division Multiplexing (DWDM), ATM

International network

- Satellite investments
- Cable investments
 - New submarine cable investment – Afrolinque (SAT-3/WASC/SAFE)
 - 26 448 km Telkom-driven undersea cable between Portugal and Malaysia
 - Ultimate capacity for SAFE – 130 Gb/s (25 year expected life); SAT-3 – 120Gb/s
 - 12,1 million simultaneous telephone calls
 - 36 major global operators invested \$650M, Telkom investment \$85M as of 31 March 2002
 - Telkom is network administrator
 - Launch date 27 May 2002

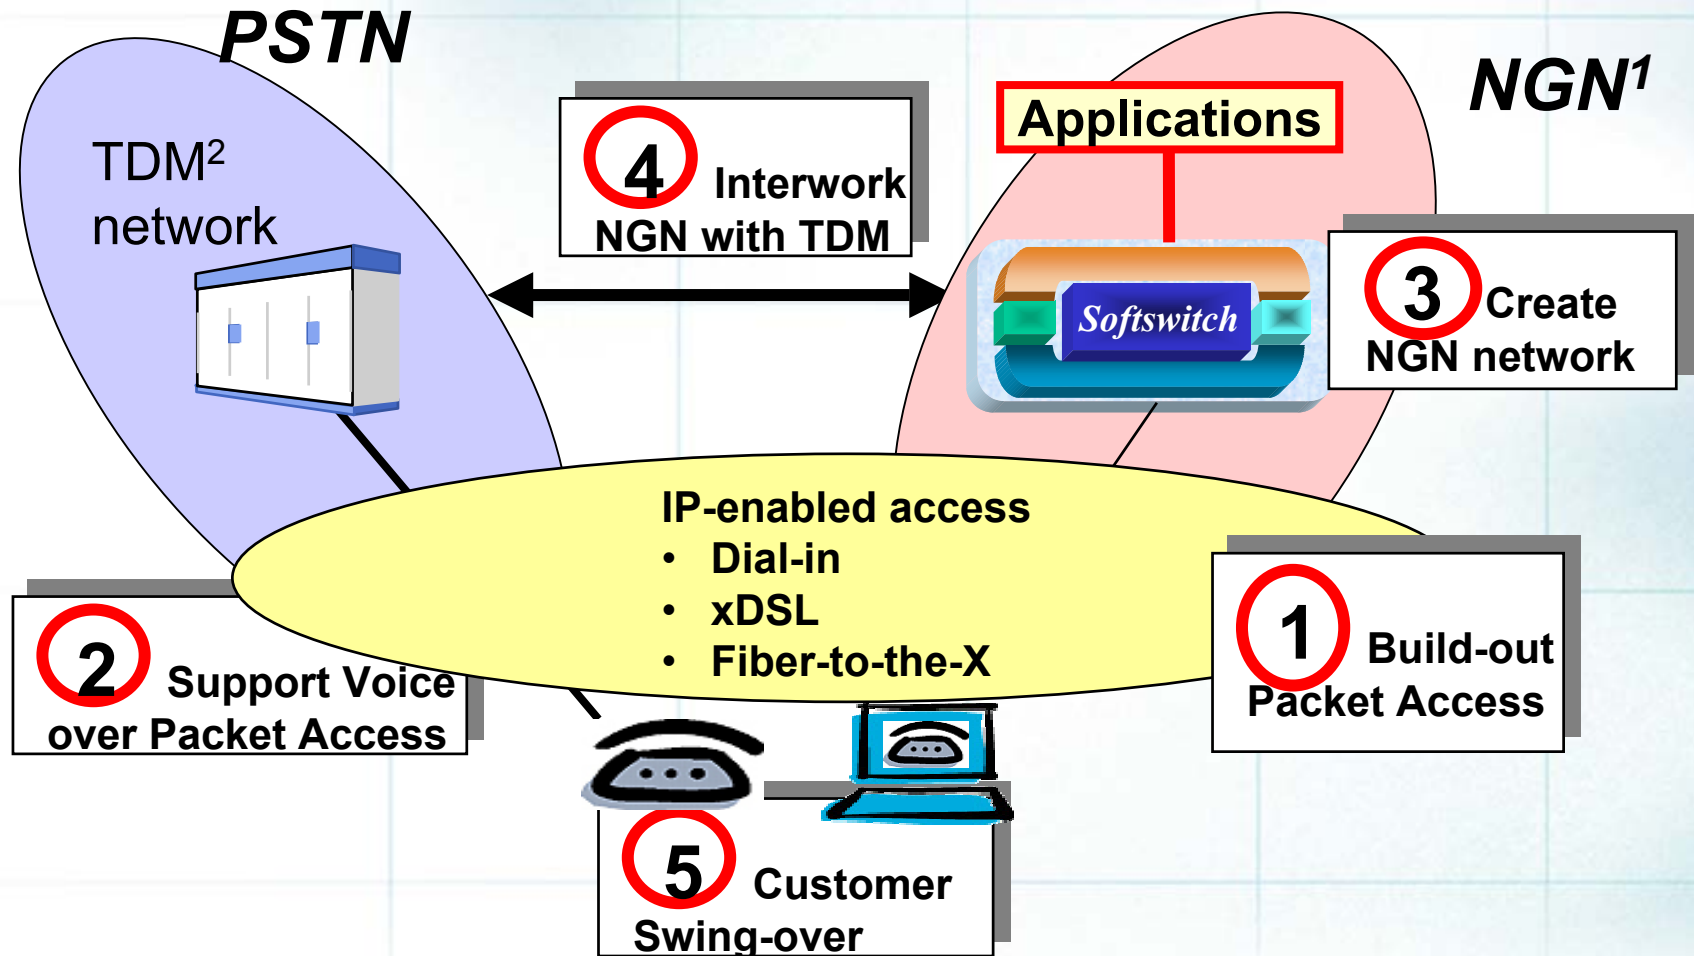

VOIP network deployed

- Established Voice Over Internet Protocol (VOIP) Point of Presence (PoP) in London
 - Attracting voice minutes destined for RSA and Africa from “emerging” carriers
 - Traffic outgoing from RSA on “Least cost Routing - LCR” basis
- Established Telkom as VOIP clearing house
- Deploying VOIP with African carriers
- More global VOIP PoPs to be deployed
- The VOIP leader in Africa

Current network strategy

- Increase network efficiency
 - Evolve to converge network using existing legacy technologies
 - From current to packet switching
 - Reinvestment to ensure reliability and efficiencies
- Lower costs
 - Investment in operational support systems (OSS) to drive greater efficiencies
 - Investment in managed networks
- Take advantage of market opportunities
 - Customer specific solutions
 - Build driven by demand
- Overall objective is to achieve satisfactory rates of return

Migrating the network

1. Next Generation Network 2. Time Division Multi-plexing

Investing for growth

Capex to maintain customer base

Fixed-line connections (000s)

Telkom continues the need to connect customers in profitable economic centres to maintain existing customer base. Customer migrations have resulted in high level of prepaid and ISDN connections.

Year ended March 31

Investing for mobile growth

South African mobile customers (000s)

Telkom's wholesale benefits from the continued strong growth in mobile customers and traffic

Year ended March 31, Rm

Mobile leased facilities revenue (Rm)

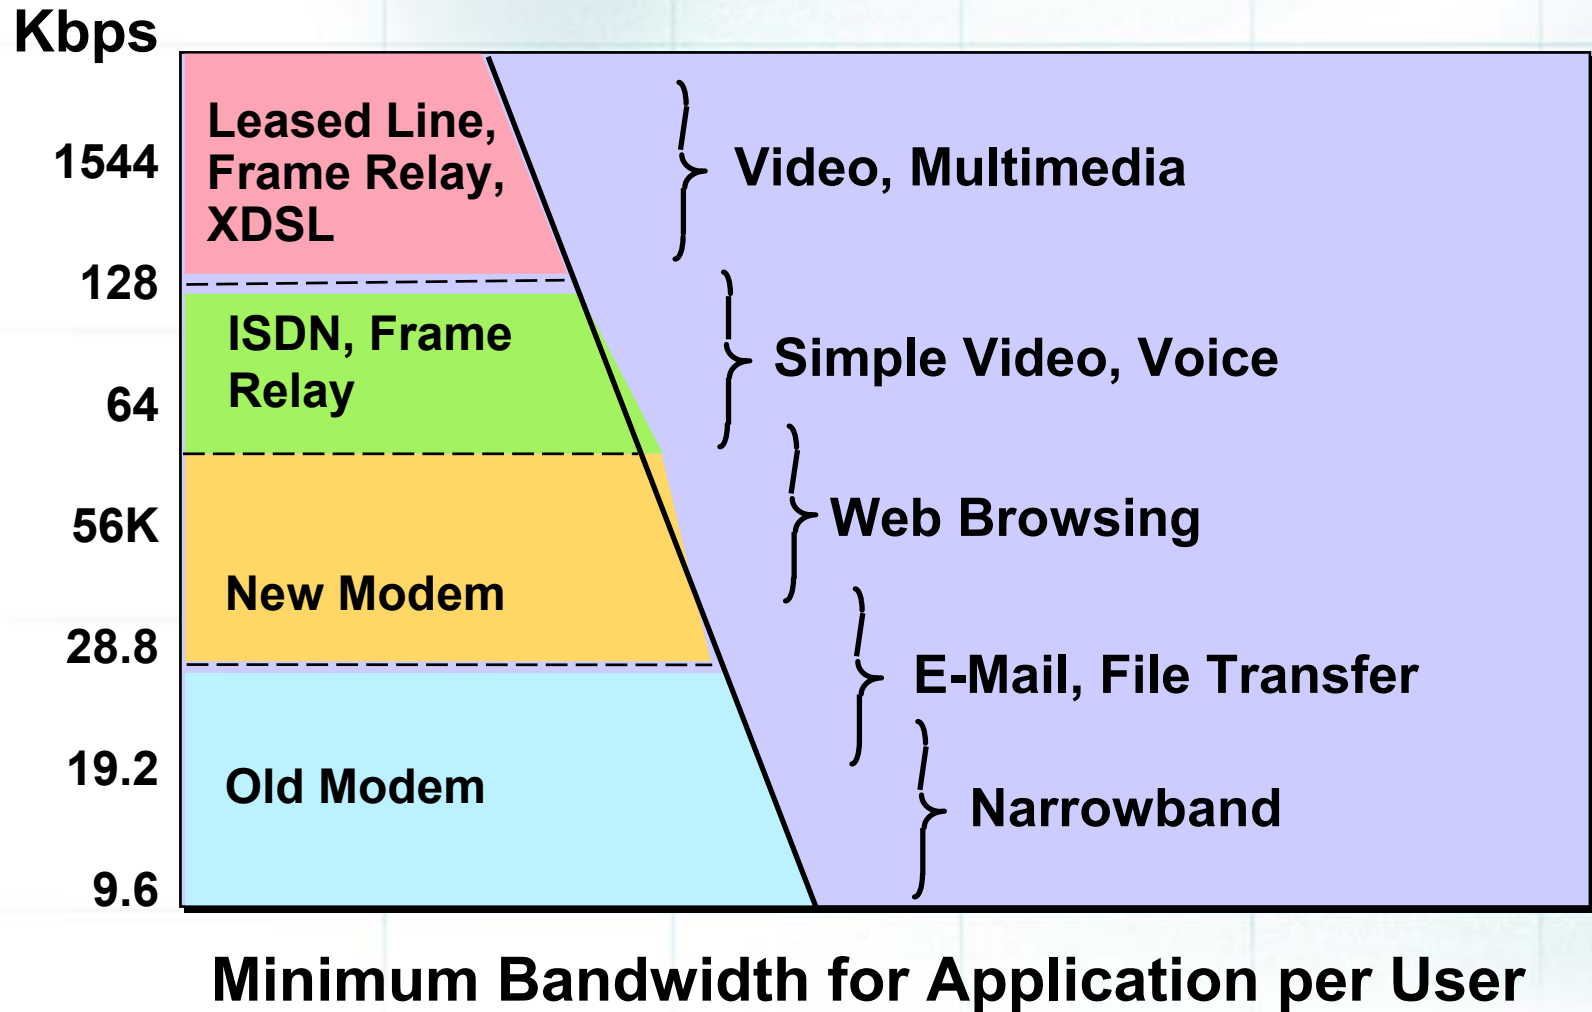

Telkom carries all mobile traffic and continues to build backbone for operators

Year ended March 31, Rm

Investing for growing bandwidth demands

Maintaining the network

What is maintenance capex?

Maintenance operating expenditure

- Expenditure to maintain an asset that has not reached the end of its life AND if expenditure is a one for one replacement then it is opex
- Expenditure less than R2000 is opex

1:1

Capital expenditure

- Expenditure to enhance or rehabilitate
- Expenditure that increases capacity or new technology
- Replacement of equipment at the end of its useful life with new equipment

1:>1

Challenges in maintaining the network

>> Balancing service and cost objectives

>> Prioritisation of fault repairs

>> Customer segmentation

>> Fault repeat rates

>> Reskilling and restaffing the network

Why reinvest in the network?

-  **Reduce long-term maintenance costs**
-  **Improve customer service**
-  **Increase network resilience and efficiencies**
-  **Eliminate duplication and surplus resources**

Containing maintenance costs

Materials and maintenance (Rm)

Telkom's investment in the network together with its continued effort to improve the access network operations contributes to the containment of materials and maintenance costs

Telkom continues to focus on alarming the network and controlling the theft incidents to ensure network maintenance costs decrease

Year ended March 31

Improving customer service

Year ended March 31, 2000 and six months ended September 2002.

Reducing fault rates

Faults per thousand business lines

Focused improvement on reducing repeat fault rates in business segment

Year ended March 31

Number of fault rates per 1000 2Mb

Improving the fault rates in our data network

Year ended March 31

The multi-skilled technical officer

OSS investment

Company strategic objectives

**Increase
shareholder value**

**Increase profitability and cash flows,
reduce indebtedness, reinstate dividend payments**

- **Increase revenue**
- **Minimise revenue loss**
- **Reduce costs**
- **Increase profits**

**Maintain market
leadership positions**

Position the Group for competition

- **Improved service quality**
- **Improve service delivery time**
- **Service and maintain network cheaper**

OSS strategic direction

Organisation

- Focused on servicing Telkom to improve productivity, improve efficiencies, and empower customer facing staff

Activity

- Develop and enhance current operational, business and support systems

Objective

- Address critical business needs by providing solutions that will enable end-to-end integration, mechanisation and automation

Strategy

- Phased approach, focus on sales and marketing, billing, service activation, service assurance and eventually extend to integrating systems into back-end systems

Sustainable Competitive Advantage (SCA)

- Key enablers for sustainable competitive advantage in the service industry are
 - Product bundling
 - Customer care
 - Cost structures
 - People
 - Speed and flexibility
- OSS to develop solutions to ensure Telkom remains competitive, differentiates itself and becomes the lowest cost provider of service

OSS Programme

Core OSS Projects

OSS Five year project spend – estimate spend R4bn

Customer Care

The Customer Care Functional Area includes all customer-oriented functions and data. Its scope encompasses handling all types of contact with the customer, the management of the relationship, and the administration of customer data, including information related to Telkom owned CPEs sold as part of the product to the customer.

Rationale

- Current legacy Customer Relationship Management systems are duplicate and non-integrated.
- We do not have a holistic view of the customer and his/her related products/services

Benefits

- Customer retention and revenue protection
- Cost reduction
- Service level improvement
- Targeted marketing & services

Assurance

A complete OSS assurance solution can support revenue protection, reduce costs, and increase productivity of staff and resources. The functional capabilities established in this domain will afford Telkom SA an opportunity to develop and standardise processes for resolving troubles.

Rationale

- >> Current legacy assurance systems are duplicate and non-integrated
 - We do not have a holistic view of the customer and his/her related troubles/problems and cannot therefore effectively sell or manage SLA's

Benefits

- >> Accurate tracking of the complete end-to-end trouble resolution process
- >> Appropriate escalation & fallout management
- >> Improvements in ATTR
- >> Improvement in adherence to SLA requirements

Provisioning/Fulfilment

An effective and efficient asset management is prerequisite. The projects in this domain establish the the Network Inventory data base (physical, logical & service) for Telkom and the maintenance capability on the data.

Rationale

- >> Current legacy network inventory systems are duplicate, non-integrated and in certain instances non-existent
- >> We do not have a holistic view of the network data and therefore cannot do effective network asset management

Benefits

- >> Identification of lost assets (physical and logical)
- >> Efficient management of known assets (sweating the assets)
- >> Improvement in adherence to SLA requirements

Workforce management

This initiative is aimed at providing an automated mechanism to manage and optimise the workforce.

Rationale

- Telkom did not have an integrated workforce management system prior to the award of the contract to MDSI

Benefits

- Effective and efficient management of the workforce with the resulting ability to reduce staff (Cost Cutting)
- Customer satisfaction

OSS benefits

Setting

- Business and OSS do a high level benefits setting prior to launch
- Re-evaluate at Launch / Scope
- Re-evaluate after design
- Final evaluation and baseline setting during Class Room Pilot

Objective

- From Class Room Pilot 3 to 6 months stabilising period
- Track monthly in detail for total payback period

Strategy

- Cost reduction and cost avoidance
- Revenue generation
- Revenue protection

Telkom and the Alliance of Telkom Unions enter into long-term collective agreement on substantive matters

Telkom and the Alliance of Telkom Unions (ATU) today signed a long-term collective agreement on substantive matters that will see its members receiving a 9% salary increase this financial year. The agreement is valid for three years from 1 April 2003 through to 31 March 2006.

The Alliance, which includes the South African Communications Union (SACU) and the Solidarity Union, plus non-union members and non-allied unions represent about 60% of the Telkom bargaining unit.

Telkom Group Executive for Human Resources, Oupa Magashula, congratulated the negotiation teams from the union and management for "finding common ground and concluding another landmark 3-year long-term agreement." SACU President, Colin Smith said the union "is duty bound at all times to act in the best interests of our members and we believe that in the end we upheld that duty."

Solidarity General Secretary: Telecommunications Industry, Danie de Wet, said, their members had given Solidarity a mandate to negotiate an agreement that benefited its members. "This agreement benefits our members and at the same time creates the basis for a constructive relation between the union and the Company for the next three years," he said.

Salary increases will be implemented retrospectively, and employees also stand to benefit from revised and more favourable Company contributions to medical aid schemes. A brand new plan to reward performance, the Individual Gainsharing Pool, will also be introduced for employees who exceed their individual performance targets.

Magashula said the salary increase and improvement to conditions of employment had been extended to all employees in the bargaining unit. "Union members who have not accepted the offer by the stated deadline will have the improved salaries and working conditions implemented only from the date on which they accept the offer," he said.

Vodacom annual results for the year ended March 31, 2003

Vodacom Group (Proprietary) Limited ("Vodacom") (not listed) in which Telkom has a 50.0% holding, has today issued its annual results for the year ended 31 March 2003.

Vodacom announced consolidated operating revenues of R19,779 million (US\$ 2,504 million) for the year ended March 31, 2003, an increase of 22.5% over the year ended March 31, 2002. Operating profit increased 19.6% to R4,330 million (US\$ 548 million) for the year ended March 31, 2003. Vodacom delivered strong operational performance, maintained its leadership position in the South African market and further grew its other African businesses.

Highlights

- * Total customers increased 26.0% to 8.6 million
- * Record number of South African gross connections of 3.5 million
- * South African contract annual churn reduced to 11.9%, compared to 14.5% in 2002
- * South African ARPU's beginning to stabilise at R183 (US\$23) compared to R182 in 2002
- * Launch of Vodacom Congo in May 2002
- * SMS growth of 64.7% to 1.5 billion SMSs compared to 911 million in 2002
- * Introduction of "MyLife", Vodacom's GPRS and MMS service offering in October 2002.

Financial performance

Vodacom again posted record results in the 2003 financial year. Despite changing local conditions and the rapid growth of start-up operations in Tanzania and the Democratic Republic of Congo (DRC), profit margins only decreased marginally as Vodacom increased efficiencies.

Revenue

Revenue increased 22.5% (2002: 21.7%) to R19,779 million (2002: R16,151 million). The increase in revenue was primarily driven by customer growth and to a lesser extent by standard tariff increases and an increase in equipment sales into the DRC and Tanzania, as well as an uptake of 2.5G handsets in South Africa. Vodacom's revenue from other African operations increased 66.7% (2002: 302.7%) to R1,235 million (2002: R741 million).

Operating profit

Profit from operations increased 19.6% (2002: 41.8%) to R4,330 million (2002: R3,621 million) and operating profit margin decreased marginally to 21.9% (2002: 22.4%). Operating profit margins decreased largely as a result of the increase in marketing and incentive costs and the change in the traffic mix and the resultant increase in interconnect costs. Operating profit was also impacted by the increased interconnection tariffs under amended interconnection agreements.

EBITDA

EBITDA increased 17.8% (2002: 35.9%) to R6,704 million (2002: R5,691 million). EBITDA margin decreased to 33.9% (2002: 35.3%). Excluding the impact of low margin cellular phone and equipment sales, the EBITDA margin was 38.3% in 2003, down from 39.2% in 2002.

Net income

The past three years' net income has been significantly distorted by two main factors. Firstly, the disposal of non-core businesses and integration costs, principally relating to the consolidation of previously independent service providers, resulted in an abnormal profit of R56 million in 2002 and an abnormal loss of R213 million in 2001. Secondly, the adoption of IAS 39, "Financial Instruments: Recognition and Measurement", resulted in a before tax loss of R486 million in the year ended March 31, 2003 and profit before tax of R352 million in the year ended

March 31, 2002. Although it is Vodacom's policy to hedge all foreign denominated commitments from South Africa, it does not qualify for hedge accounting in terms of IAS 39 and the impact of fluctuations in exchange rates on the market value of the financial instruments are required to be reflected through the income statement.

Capital expenditure

Despite African expansion, Cell C roaming, GPRS launch and the installation of 1800 MHz equipment, capital expenditure decreased 20.6% to R3,399 million, or 17.2% of revenue in 2003 (2002: R4,279 million; 26.5% of revenue). Capital expenditure decreased 24.4% and 7.8% to R2,488 million (2002: R3,291 million) and R911 million (2002: R988 million) in South Africa and other African countries respectively.

Financial structure and funding

Vodacom's balance sheet continued to strengthen, with a net debt/EBITDA ratio of 34.2%, almost half of the prior year ratio of 62.9% and well within terms of borrowing covenants. Total interest and non-interest bearing debt decreased 18.5% to R3,501 million (2002: R4,297 million) as a result of the 37.2% decrease in South Africa's total debt to R2,327 million (2002: R3,706 million). The increase in other African total debt of 98.6% to R1,174 million (2002: R591 million) was primarily as a result of R336 million utilisation of an extended credit facility for Vodacom Congo, R502 million draw down of a project financing facility in Tanzania and the repayment of R400 million of funding loans in Vodacom Group.

Shareholder distributions

Distributions to shareholders increased 3.2% to R768 million in 2003, comprising of interest of R168 million (2002: R144 million) and dividends of R600 million (2002: R600 million). The low growth in shareholder distributions despite strong cash flow growth is due to Vodacom's intention to repay shareholder loans of R920 million on 30 June 2003.

Accounting policies

The consolidated annual financial statements have been prepared in accordance with International Financial Reporting Standards and South African Statements of Generally Accepted Accounting Practice and have been prepared on the historical cost basis, unless otherwise indicated. The consolidated annual financial statements have been presented in South African Rands, as this is the currency in which the majority of the Group's transactions are denominated. Accounting policies have remained consistent, in all material respects, with those of the prior year.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

All statements contained herein, as well as oral statements that may be made by Telkom SA Limited or by officers, directors or employees acting on behalf of the Telkom Group, that are not statements of historical fact constitute "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, specifically Section 21E of the U.S. Securities Exchange Act of 1934, as amended. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Among the factors that could cause our actual results or outcomes to differ materially from our expectations are those risks identified under the caption "Risk Factors" contained in the prospectus relating to Telkom's initial public offering filed with the U.S. Securities Exchange Commission and available on Telkom's website at www.telkom.co.za/ir, including, but not limited to, increased competition in the South African mobile communications markets; developments in the regulatory environment; general economic, political, social and legal conditions in South Africa and in other countries where Vodacom invests; fluctuations in the value of the Rand; and other matters not yet known to us or not currently considered material by us. You should not place undue reliance on these forward-looking statements. All written and oral forward-looking statements attributable to us or persons acting on our behalf are qualified in their entirety by these cautionary statements. Moreover, unless we are required by law to update these statements, we will not necessarily update any of these statements after the date of this press release, either to conform them to actual results or to changes in our expectations.

Group Annual Results

18th June 2003

Outline

- Strategic Highlights
- Group Financial Review

This presentation has been prepared and published by Vodacom Group (Proprietary) Limited.

Vodacom Group (Proprietary) Limited is a private company and as such is not required by the Companies Act of 61 of 1973, as amended, to publish its results.

Vodacom Group (Proprietary) Limited makes no guarantee, assurance, representation and/or warranty as to the accuracy of the information contained in this presentation and will not be held liable for any reliance placed on the information contained in this presentation.

The information contained in this presentation is subject to change without notice and may be incomplete or condensed. In addition, this presentation may not contain all material information pertaining to Vodacom Group (Proprietary) Limited and its subsidiaries.

Without in anyway derogating from the generality of the foregoing, it should be noted that:

- Many of the statements included in this presentation are forward-looking statements that involve risks and/or uncertainties and caution must be exercised in placing any reliance on these statements. Moreover, Vodacom Group (Proprietary) Limited will not necessarily update any of these statements after the date of this presentation either to conform them to actual results or to changes in our expectations.
- Insofar as the shareholder's of Vodacom Group (Proprietary) Ltd are listed and offer their shares publicly for sale on recognised Stock Exchanges locally and/or internationally, potential investors in the shares of Vodacom Group (Proprietary) Limited's shareholders are cautioned not to place undue reliance on this presentation.

Strategic Highlights

Alan Knott-Craig
Group Chief Executive Officer

Delivering on our strategy for growth

**Short to
medium term**

Continued South African growth potential

- Leveraging SA position supported by carefully managed expansion for long term growth

**Medium to
long term**

Potential returns from other African operations

Underpinned by

- **Strong and experienced management team**
- **Simple, focused organisational structure**
- **Powerful brand and extensive distribution**
- **Innovative culture and strong work ethic**
- **Strict financial discipline**

Group highlights

Current year change since previous year

At year end there were 7,756 active GPRS subscribers

Vodacom South Africa (Market share 57%)

- Potential for further growth
 - 1800 Mhz spectrum issued
 - 4 Million free SIMs to be supplied over next 5 years
 - Estimate the SA market at 19 million
- Cell C expected to erode market share of both MTN and Vodacom
 - Vodacom benefits indirectly through the Cell C roaming agreement
- Vodacom is strategically placed for continued dominance
 - Lowest-cost operator
 - Extensive distribution

Total South African mobile market
(thousands of customers)

Strong SA operational indicators

- Gross connections up 15.0% to a new high of 3.5 million
 - 84.6% of closing base is prepaid
 - 18.2% of closing base is inactive
- Churn trends
 - Contract churn at all-time low of 11.9%
 - Prepaid churn increased to 34.0%
- Total traffic¹ increased by 18% to 10.5 billion minutes
- 2003 average of 15 SMS's per customer, March 2003 18.3
- Total SA ARPU begins stabilising

1. Total traffic excluding national roaming and incoming international

Vodacom Tanzania (Market share 53%)

- Customer growth of 96.1%
 - 98.4% prepaid
 - 2,055 public phones
- ARPU decline of 18.5% to \$22
- Market overview
 - Market leader with 53% market share, Celtel recently aggressive
 - Estimated penetration of 2.2%
 - Substantial opportunity as economy and infrastructure has shown visible improvement
 - Built a strong and respected brand
 - Substantial distribution through super dealer structure including local partners

Vodacom Congo (Market share 44%)

- Official launch May 2002
- Strong customer growth
 - 95.7% prepaid
 - 6,828 public phones
- ARPU of \$20
- Market overview
 - We have more than doubled the market size in 11 months since launch
 - Estimated penetration of 1.0%
 - Brand is associated with quality, but market is extremely price sensitive
 - Although numerous operators, most are niche and/or regionally based and not national

Vodacom Lesotho (Market share 80%)

- Customer growth of 35%
 - 93.8% prepaid
 - True prepaid service was installed in 2002
- ARPU decline of 28% to R104
- Market overview
 - Launch of a second operator during the year has stimulated the market
 - Reduced market share but strong subscriber growth
 - Estimated penetration of 4.3%

Customers (thousands) and ARPU (R)

Market analysis

Slowing capital expenditure

- South Africa

- Quality network with national GPRS coverage
- Limited 1800 network installed in Gauteng and Western Cape
- Cumulative capex R16.6 bn

- Tanzania

- 6% of land area and 25% of population
- Cumulative capex \$132 million

- Congo

- CWN network switched off and redeployed
- Cumulative capex \$119 million
- Coverage of 7 out of 9 provinces and remaining 2 planned within 6 months

- Lesotho

- Cumulative capex R185 million

Other African operations contribution

2002	2003
3.6%	3.5%

Other African operations includes offshore holding companies

Factors that affect the trends

- More conservative accounting policies than our peers
- Change in traffic mix negatively affected operating profit
- Fluctuating, low margin handset sales affect revenue and margins
- More competition demanded higher direct costs & incentives

Results impacted by currency fluctuations

- Non-recurring sale of non-core assets
- A more rule based approach to accounting has been adopted
 - IAS39
 - Effect of currency revaluation
 - Effect of FEC book revaluation
- Adjusted profit after tax shows the real trend

Excluding after tax effects of gains/(losses) on FEC and liability revaluation and integration costs, disposals of operations and impairment.

	2000	2001	2002	2003
Profit after tax	1,315	1,309	2,403	2,327
Integration costs	(129)	213	(56)	-
After tax (@ 30%) effects of all FEC and IAS 39 adjustments	94	39	(246)	340

Net debt profile

- We aim to secure non-recourse financing for all other African operations
- In South Africa our net debt comprises almost entirely of finance lease liabilities and shareholders loans
- As we only proportionately consolidate Vodacom Congo, 49% of the debt is off balance sheet. This funding is not ring fenced.

Net debt profile

Shareholder distributions

- Repaying R920m shareholder loans at June 30, 2003
- Paying an interim dividend in September 2003
- Principle of approximately 3 times cover to decrease in the future

Commentary

Johannesburg, South Africa – June 23, 2003, Telkom SA Limited

(JSE and NYSE: TKG), South Africa's largest communications group announces preliminary audited annual results for the year ended March 31, 2003. Consolidated operating revenue increased by 10.0% to R37,600 million (US\$4,759 million), operating profit increased 55.4% to R6,514 million (US\$825 million) and basic earnings per share increased 33.5% to 292.6 cents (US\$37.0) for the year ended March 31, 2003.

Group financial highlights:

- **Group operating margin increased from 12.3% to 17.3%**
- **Group EBITDA growth of 33.4% to R12,807 million**
- **Group EBITDA margin increased from 28.1% to 34.1%**
- **Group capital expenditure reduced 36.6% to R5,712 million**
- **Reduced net debt to equity ratio from 129.9% to 109.5%.**

Group operational highlights

In 2003 the group delivered a strong operational performance. The fixed-line business improved its competitive positioning with enhanced levels of service and innovative product offerings. Cost savings were achieved across the group and customer growth in the mobile business continued to be strong. The year under review saw the following key achievements:

- The listing of Telkom on the JSE Securities Exchange South Africa and the New York Stock Exchange on March 4, 2003
- Strong growth in mobile customers of 26.0% and 20.6% growth in ISDN channels
- Solid growth in fixed-line data revenue of 15.2%
- 15.4% growth in fixed-line prepaid customers
- The launch of ADSL in August 2002
- The launch of the intercontinental submarine cable, Afrolinque in May 2002
- The official launch of Vodacom Congo in the DRC in May 2002
- Telkom and Vodacom synergies framework
- The launch of the Telkom Agency for Career Opportunities, an innovative programme specifically focused on the responsible redeployment and re-skilling of redundant employees.

Subsequent to year-end, Telkom successfully concluded a three-year agreement with all its unions effective April 1, 2003. The agreement provides for a 9% wage increase in the year ending March 31, 2004, an 8% in the year ending March 31, 2005 and a 7% in the year ending March 31, 2006. In addition,

the increase in Telkom's contributions to medical aid schemes will be limited to wage increases.

During the year the Minister of Communications and ICASA made further progress in the liberalisation of the telecommunications sector. A process has commenced to issue an additional license to provide public switched telecommunications services to a second national operator. An evaluation committee appointed by the Minister of Communications has recommended that two of the four bidders for this license be prequalified. The Minister has indicated that she expects to grant this license in the second half of 2003.

In May 2003, the Minister of Communications announced the fees that would be required to obtain the 1800MHz radio frequency spectrum. However, the licences have not yet been issued.

Financial review

Telkom's strong group results in 2003 are supported by solid revenue growth, improvements in operational efficiencies, reduced capital expenditures and reduced interest expense on lowered outstanding debt. However, the results are impacted by two factors, namely: large non-core or one-off items in 2002 and 2003 and the fluctuations arising from measuring derivatives at fair value and due to the volatility of the exchange rate during the year.

Group operating profit before interest and taxation increased 55.4% to R6,514 million in 2003 and, excluding the following significant one-off or non-core items, group operating profit before interest and taxation increased 29.8% in 2003:

- Net profit on sale of investments, property, plant and equipment of R104 million (2002: R30 million)
- Asset write-offs of R189 million (2002: R445 million)
- Goodwill amortisation and impairment of R89 million (2002: R66 million)
- The provision for the supplier dispute with Telcordia, excluding interest, of R58 million (2002: R325 million)
- IPO expenditure of R213 million (2002: Nil)
- Reduction of the fixed-line bad debt provision of R276 million (2002: R153 million increase).

The group utilises derivative instruments to hedge its foreign currency denominated debt, floating interest rate exposure and foreign operational and capital expenditure. In terms of IAS 39, "Financial instruments: Recognition and Measurement" the significant fluctuations in the currency resulted in a net fair value and foreign exchange loss of R1,285 million (2002: R635 million gain). The value of the Rand measured against the US Dollar increased 30.0% from R11.44 per \$1.00 at March 31, 2002 to R8.01 at March 31, 2003. The value of Rand as measured against the US Dollar decreased 42.9% in the year ended March 31, 2002.

Group operating revenue

Operating revenue increased in both the fixed-line and mobile segments, resulting in an overall increase of 10.0% (2002: 9.1%) to R37,600 million (2002: R34,197 million). Fixed-line operating revenue, after inter-segmental eliminations, increased 5.8% (2002: 5.8%) primarily due to increased average tariffs and solid growth in data services. Mobile operating revenue, after inter-segmental eliminations, increased 27.5% (2002: 25.5%) primarily due to customer growth.

Group operating expenses

Operating expenses increased 3.6% (2002: 13.8%) to R31,086 million (2002: R30,006 million) due to increased operating expenses in the mobile segment. These were partially offset by a 1.0% decrease (2002: 13.0% increase) in the fixed-line operating expenses primarily due to reduced selling, general and administrative expenses. The increase in mobile operating expenses of 23.4% (2002: 16.8%) was primarily due to increased competition resulting in increased incentive costs. Mobile payments to other operators also increased as a result of the increased outgoing traffic and the higher volume growth of outgoing traffic terminating on other mobile networks relative to traffic terminating on the fixed-line network.

Investment income

Investment income consists of interest received on trade receivables, short-term investments and bank accounts. Investment income decreased 17.2% (2002: 8.2% decrease) to R424 million (2002: R512 million) largely as a result of the following factors: a more rapid collection of trade debtors; lower interest received due to lower average balances in investments and bank accounts and reduced interest on the receivable owing from the South African Revenue Services as they repaid R844 million on September 3, 2002 of their balance outstanding of R1,081 million at March 31, 2002.

Finance charges

Finance charges include interest paid on local and foreign borrowings, amortised discounts on bonds and commercial paper bills, fair value gains and losses on financial instruments and foreign exchange gains and losses. Finance charges increased 62.9% (2002: 18.7% decrease) to R4,154 million (2002: R2,550 million) due to a significant increase in group net fair value and exchange losses on financial instruments from a net gain of R635 million in 2002 to a net loss of R1,285 million in 2003, partially offset by a 9.9% decrease (2002: 23.8% increase) in interest expense to R2,869 million (2002: R3,185 million). The decrease in interest expense was primarily due to lower balances on foreign loans. The net fair value losses on financial instruments of R1,285 million was primarily due to the fair value of derivative instruments for foreign loans and purchases of foreign goods and services.

Taxation

Consolidated tax expense increased 20.2% (2002: 22.1%) to R1,049 million (2002: R873 million). The consolidated effective tax rate was 37.7% in the 2003 financial year and 40.5% in the 2002 financial year. The high effective tax rate in the year ended March 31, 2002 was primarily due to non-deductible expenses at Telkom.

Net profit and earnings per share

Net profit increased 33.5% to R1,630 million in the year ended March 31, 2003 primarily due to increased operating profit in both the fixed-line and mobile segments. These increases were partially offset by increases in finance charges due to the net loss on the revaluation of derivative instruments.

Group basic earnings per share increased 33.5% (2002: 24.7% decrease) to 292.6 cents (2002: 219.2 cents) and group headline earnings per share increased 4.9% (2002: 12.4% decrease) to 314.0 cents (2002: 299.3 cents).

Group capital expenditure

Group capital expenditure decreased 36.6% (2002: 8.9% decrease) to R5,712 million (2002: R9,004 million). Fixed-line capital expenditure decreased 42.4% to R4,013 million (2002: R6,962 million) and was 13.5% (2002: 24.9%) of fixed line revenue. Fixed line capital expenditure was lower than the budgeted amount of R4,932 million as a result more stringent investment criteria for capital investment, savings resulting from the relative strength of the Rand against the US Dollar and Euro and projects carried forward to the 2004 financial year. The group's capital expenditure strategy has shifted to selective investment in the fixed-line segment on a smaller scale based on customer demand and economic viability. Capital investments will continue in growing business areas such as data services and in network evolution, business improvements and business operational support systems.

Despite African expansion, Cell C roaming investment, GPRS launch and the installation of 1800MHz equipment, mobile capital expenditure decreased

16.8% to R1,699 million (2002: R2,042 million) and was 17.2% (2002: 25.3%) of mobile revenue. Capital expenditure for the South African mobile operations was 13.4% (2002: 20.1%) of South African mobile revenue.

Consolidated capital expenditures in property, plant and equipment for the 2004 financial year is budgeted to be R6,429 million, of which approximately R4,977 million is budgeted to be spent in the fixed-line segment and R1,452 million in the mobile segment, which is the group's 50% share of Vodacom's total budgeted capital expenditure of R2,903 million. The increase in the fixed-line capital budget compared to the actual investment in 2003 is as a result of projects carried forward to the 2004 financial year and the increase in operational support systems investment as well as the provision for regulatory capital expenditure.

Group cash flow

Cash flows from operating activities increased 19.3% (2002: 32.5%) to R9,748 million (2002: R8,171 million) primarily due to increased operational cash flows, tax refunds and decreased interest expenses. Cash flows utilised in investing activities decreased 38.0% (2002: 7.2%) to R5,731 million (2002: R9,250 million) primarily due to the reduction in group capital expenditure.

In the 2003 financial year, loans repaid and the increase in net financial assets exceeded loans raised by R2,872 million. The group's repayments in 2003 include a net repayment of R1,371 million of commercial paper bills, a repurchase of R689 million of the TL03 local bond, a repayment of the R359 million loan from European Investment Bank and the repayment of a R200 million 12.5% coupon unsecured loan. Vodacom repaid R426 million of its debt, Telkom's 50% share of R213 million is included in loans repaid. Vodacom's foreign debt increased R583 million as they utilised their extended credit facility for Vodacom Congo, and drew down on a project financing facility; Telkom's 50% share of R291 million is included in loans raised.

Funding sources

The group remains committed to the repayment of its debt and maintained its investment grade credit ratings with Moody's (Baa3) and Standard & Poors (BBB-). Net debt after financial assets and liabilities decreased 8.1% to R20,096 million (2002: R21,858 million). The balance sheet at March 31, 2003 strengthened, with a net debt to equity ratio of 109.5% from 129.9% at March 31, 2002. Total debt decreased 11.7% to R22,417 million (2002: R25,401 million).

As of March 31, 2003, 90.4% (2002: 86.2%) of the group debt was fixed rate debt and 9.6% (2002: 13.8%) was floating rate debt. In September 2003, a 10.75% unsecured local bond (TL03) with a weighted average yield to maturity of 10.9% matures. In May 2004 a 13% unsecured local bond (TL08) with a weighted average yield to maturity of 16.5% matures. The group intends to refinance its debt using operational free cash flows and new debt raised in the market.

Segment commentary

The operating structure comprises two segments, fixed-line and mobile. The fixed-line segment provides fixed-line voice and data communications services through Telkom; directory services through our 64.9% owned subsidiary, Telkom Directory Services; and wireless data services through our wholly-owned subsidiary, Swiftnet. The mobile segment consists of a 50% interest in Vodacom.

Fixed-line

The fixed-line segment accounted for 77.7% (2002: 80.7%) of group operating revenues (after inter-segmental eliminations) and 66.7% (2002: 56.7%) of group operating profit at March 31, 2003.

Fixed-line operating revenue

In ZAR millions

	Year ended March 31		
	2002	2003	% change
Subscriptions and connections	4,410	4,595	4.2
Traffic	17,168	18,001	4.9
Local	4,876	5,616	15.2
Long distance	3,794	3,562	(6.1)
Fixed-to-mobile	7,323	7,539	2.9
International outgoing	1,175	1,284	9.3
Interconnection	1,798	1,773	(1.4)
Data	3,913	4,507	15.2
Directories and other	687	759	10.5
Total fixed-line operating revenues	27,976	29,635	5.9

Operating revenue from our fixed-line segment, before inter-segmental eliminations, increased 5.9% (2002: 5.8%) primarily due to increased traffic revenue, as a result of average tariff increases and growth in data services revenue. Traffic was adversely affected in both the 2003 and 2002 financial years by the increasing substitution of calls placed using mobile services rather

than fixed-line services. Traffic declined 0.7% (2002: 0.3% decrease), however, revenue per fixed access line continued to improve, increasing 5.5% (2002: 10.1%) to R4,989 (2002: R4,729). This was due to increased average tariffs, higher penetration of value-added voice services and increased penetration of higher revenue generating access services. Data revenue increased 15.2% (2002: 17.6%) mainly due to higher demand for data services.

Fixed-line operating expenses

In ZAR millions

	Year ended March 31		
	2002	2003	% change
Employee expenses	6,611	6,698	1.3
Payments to other network operators	6,759	6,726	(0.5)
SG&A	4,650	3,312	(28.8)
Services rendered	2,138	2,489	16.4
Operating leases	1,148	1,155	0.6
Depreciation and amortisation	4,363	5,105	17.0
Other income	(118)	(198)	67.8
Total fixed-line operating expenses	25,551	25,287	(1.0)

Fixed-line operating expenses, before inter-segmental eliminations, were relatively flat in the 2003 financial year, decreasing 1.0% (2002: 13.0% increase) to R25,287 million (2002: R25,551 million) primarily due to reduced selling, general and administrative expenses. Selling, general and administrative expenses were impacted in the 2002 financial year by the inclusion of a R346 million write-off of Telcordia-related assets and the inclusion of a R325 million provision, before interest and legal costs, related to the Telcordia dispute. Excluding these items, selling, general and administrative expenses decreased primarily due to a R276 million reduction in the bad debt provision on our balance sheet, as well as lower materials and maintenance expenses due to reduced losses in respect of cable theft and lower fault rates. Bad debts written-off against the provision decreased by 39.5% (2002: 1.8% increase) to R491 million (2002: R812 million). The decrease in fixed-line operating expenses was partially offset by increased depreciation and amortisation and services rendered, while operating leases, payments to other network operators and employee expenses remained relatively constant.

Fixed-line operating profits increased 79.3% (2002: 36.5% decrease) to R4,348 million (2002: R2,425 million) with operating margins increasing to 14.7% (2002: 8.7%). Fixed-line EBITDA increased 39.3% (2002: 15.7% decrease) to R9,453 million with EBITDA margins increasing to 31.9% (2002: 24.3%).

Mobile

The mobile segment accounted for 22.3% of group operating revenues (2002: 19.3%) (after inter-segmental eliminations) and 33.3% of group operating profits (2002: 43.3%). Vodacom is the largest mobile communications network operator in South Africa with an estimated 57% share of mobile customers as of March 31, 2003 based on total estimated customers. Vodacom also has investments in mobile operators in Lesotho, Tanzania and the Democratic Republic of the Congo. Vodacom's operational statistics are presented below at 100%, but all financial figures are the 50% proportionately consolidated into the group.

Mobile operating revenue

In ZAR millions

	Year ended March 31		
	2002	2003	% change
Airtime	4,743	5,650	19.1
Interconnection	2,150	2,655	23.5
Equipment sales	814	1,132	39.1
International services	151	270	78.8
Other sales and services	217	183	(15.7)
Total mobile operating revenue	8,075	9,890	22.5

During the year, the mobile segment delivered strong revenue growth of 22.5%, before inter-segmental eliminations, to R9,890 million (2002: R8,075 million), primarily driven by customer growth and an increase in equipment sales. Revenue from Vodacom's operations outside of South Africa as a percentage of Vodacom's total mobile operating revenue increased to 6.2% (2002: 4.6%).

The growth in revenue can largely be attributed to a 26.0% increase in Vodacom's total customers to 8.6 million as of March 31, 2003 (2002: 6.9 million) resulting from strong growth in prepaid customers in South Africa and significant growth in customers outside of South Africa. In South Africa, total average monthly revenue per user (ARPU) increased marginally to R183 (2002: R182). Contract ARPU increased by 12.3% to R629 (2002: R560). During the year, South African contract churn decreased to 11.9% in 2003 (2002: 14.5%). Prepaid churn, however, remained relatively high at 34.0%

(2002: 30.1%) due to greater competition, lower barriers to entry for prepaid customers and the volatile nature of the prepaid customer base.

Mobile operating expenses

In ZAR millions

	Year ended March 31		
	2002	2003	% change
Employee expenses	568	509	(10.4)
Payments to other network operators	689	1,109	61.0
SG&A	3,688	4,614	25.1
Services rendered	57	65	14.0
Operating leases	237	273	15.2
Depreciation and amortisation	1,035	1,188	14.8
Other operating income	(15)	(34)	126.7
Total mobile operating expenses	6,259	7,724	23.4

Mobile operating expenses, before inter-segmental eliminations, increased by 23.4%, largely in line with the growth in revenue of 22.5%. Mobile selling, general and administrative expenses increased 25.1% in the year ended March 31, 2003 primarily due to an increase in selling and distribution expenses to support the growth in South African and other African operations and the increased competitiveness in the South African market.

Mobile payments to other network operators increased 61.0% in the year ended March 31, 2003 as a result of increased outgoing traffic and a higher volume growth of outgoing traffic terminating on the other mobile networks relative to traffic terminating on the fixed-line network. The cost of terminating calls on other mobile networks is higher than calls terminating on Telkom's fixed-line network.

Profit from operations increased 19.3% (2002: 42.2%) to R2,166 million (2002: R1,816 million) and operating profit margin decreased marginally to 21.9% (2002: 22.5%). Mobile EBITDA increased 17.6% (2002: 36.1%) to R3,354 million with EBITDA margins decreasing to 33.9% (2002: 35.3%).

Dividends

The board of directors has decided not to declare a dividend at this time, as it believes it would be prudent to continue to focus on debt reduction in line with the group strategy.

Audit report

The comprehensive financial statements, from which the preliminary results have been derived, have been audited by the joint auditors Ernst & Young and KPMG. Their unqualified opinion is available for inspection at the company's registered office.

Outlook

Increased competition and emerging technologies place greater importance on the need to further develop our group strategy to maintain our leadership position and deliver value for shareholders.

We will continue to improve the competitiveness of our fixed line business by improved customer service, innovative products and competitive pricing. We have also started to work more closely with Vodacom on potential synergies in areas such as marketing, procurement and products, that will build value for both operators. Our performance will be further enhanced by our commitment and ability to drive operational efficiencies, increase cash flows and reduce debt.

Notes to the summary group financial statements

1. Basis of preparation and accounting policies

The group has prepared financial statements as required by the South African Companies' Act, 1973 and in accordance with International Financial Reporting Standards for all periods presented. The accounting policies of the group applied in the presentation of the group preliminary annual results for the year ended March 31, 2003 are consistent with those applied in the financial statements for the year ended March 31, 2002.

In ZAR millions

	Year ended March 31	
	2002	2003
2. Impairment losses	445	205
The group impaired R16 million of the goodwill arising on the acquisition of 40% of Swiftnet (Proprietary) Limited in 2003 as a result of the current performance of that company. Additionally the group incurred further property, plant and equipment write-offs and impairments.		
3. Restructuring costs	373	244
Telkom has continued to incur restructuring costs, as a result of a plan to reduce the workforce. 2,124 employees were affected (2002: 2,960).		
4. Number of shares in issue		
557 031 819 ordinary shares of R10 each.		
5. Net asset value per share (cents)	3,021.7	3,293.7
The calculation of net asset value per share is based on net assets of R18,348 million at March 31, 2003 (2002: R16,832 million) and 557 031 819 (2002: 557 031 819) issued shares.		
6. Basic and diluted earnings per share (cents)	219.2	292.6
The calculation of basic and diluted earnings per share is		

based on net profit of R1,630 million (2002: R1,221 million) and 557 031 819 (2002: 557 031 819) issued shares.

There are no dilution factors at present; as a result basic and diluted earnings per share are equal.

7. Headline earnings reconciliation

Earnings as reported	1,221	1,630
Adjustments:		
Net profit on disposal of investments, property, plant and equipment	(30)	(104)
Property, plant and equipment impairment and write-offs	445	189
Goodwill amortisation	66	73
Goodwill impairment	–	16
Tax and outside shareholder effects	(35)	(55)
Headline earnings	1,667	1,749
Headline earnings per share (cents)	299.3	314.0

The calculation of headline earnings per share is based on headline earnings of R1,749 million (2002: R1,667 million) and 557 031 819 (2002: 557 031 819) ordinary shares in issue.

8. Net cash and cash equivalents

Cash	(98)	837
Credit facilities utilised	724	1,117
Unutilised banking facilities (Rbn)	(822)	(280)
	2.2	3.0

The general banking facilities have no specific maturity date, but are subject to annual review. The facilities are in place to ensure continuing liquidity.

9. Additions to property, plant and equipment

Land and buildings	9,004	5,712
Network equipment	48	60
Furniture and office equipment	1,719	2,479
Support equipment	67	22
Data-processing equipment	–	341
Under construction	337	354
Other	6,727	2,416
	106	40

10. Interest bearing debt

Current portion of interest bearing debt	2,041	4,677
Local debt	1,982	4,527
Foreign debt	59	150
Long-term portion of interest bearing debt	21,505	16,346
Local debt	16,009	11,473
Foreign debt	5,496	4,873
Total long-term portion of interest bearing debt	21,505	16,346

In ZAR millions

Year ended March 31
2002 2003

11. Contingencies

Third parties	65	161
Guarantee of employee housing loans	208	192

Third parties

These amounts represent sundry disputes against third parties that are not individually significant and that the company does not envisage settling.

Guarantee of employee housing loans

Telkom guarantees to settle a certain portion of employees' housing loans. The amount guaranteed differs depending on factors such as employment period and salary rates. When an employee leaves the employment of Telkom, any housing debt guaranteed by the company is settled before any payment can be made over to the employee. The maximum amount of the guarantee in the event of default is disclosed above.

Supplier dispute

Expenditure of R594 million was incurred up to March 31, 2002 for the development and the installation of an integrated end-to-end customer assurance and activation system to be supplied by Telcordia. In the 2001 financial year, the agreement with Telcordia was terminated and the company wrote-off R119 million of this investment in the fixed-line business. Following an assessment of the viability of the assets relating to the Telcordia initiative, the balance of the assets was written-off in the 2002 financial year. During March 2001, the dispute was taken to arbitration, where Telcordia was seeking approximately US\$130 million plus interest at a rate of 15.5% per year for money outstanding and damages. In September 2002, a partial ruling was issued by the arbitrator in favour of Telcordia. Telkom has since brought an application to the High Court in August 2003. Telcordia also petitioned the United States District Court to confirm the partial finding, which petition Telkom has resisted. A hearing date for this petition has been scheduled for June 25, 2003. The arbitration proceedings and the amounts of Telkom's liability are not expected to be finalised until late 2003 or early 2004. Telkom's provision of US\$44 million for its estimate of probable liabilities, including interest, was recognized as at March 31, 2003.

Site restoration costs

The group has a constructive, but not legal, obligation to incur site restoration costs. No sites have been identified that would require material restoration to be performed in the foreseeable future.

Vodacom Congo (R.D.C.) S.P.R.L.

The group has a 51% equity interest through Vodacom in Vodacom Congo (R.D.C.) S.P.R.L. ("Vodacom Congo"), which commenced business on December 11, 2001. Vodacom, in terms of the shareholders' agreement, is ultimately responsible for the funding of the operations of Vodacom Congo for the first three years. The 49% portion attributable to the joint venture partner of the liabilities and losses were as follows:

<i>In ZAR millions</i>	Year ended March 31	
	2002	2003
Net loss	(19)	(186)
Total liabilities	(30)	(522)
Total assets	440	658

Preference shares	(368)	(368)
-------------------	-------	--------------

Accordingly, the group exposure is 50% of the above amounts.

12. Capital commitments

Capital commitments authorised not committed	5,272	5,494
Fixed-line	4,847	4,873
Mobile	425	621
Capital commitments authorised and committed	810	435
Fixed-line	85	104
Mobile	725	331

These commitments are expected to be financed mainly from internally generated cash and other borrowings.

March 31, 2003

Mr Eric Molobi resigned as a director of Telkom on July 31, 2002 and was no longer the Chairman of the board of Directors at March 31, 2003.

Ms Nomazizi Mtshothisa, Chairman of the board of directors at March 31, 2003, is a director of Beslyn Investments, a company that has a contract to supply Telkom with protective clothing.

Mr Tlhalafang Sekano is Chairman of Letlapa Security and a director of Telesafe Security. Letlapa Security owns an interest in Telesafe Security, a security company that provides physical security services at Telkom.

March 31, 2002

Mr Eric Molobi, the Chairman of the board of directors on March 30, 2002, had the following interests as Chief Executive Officer of Kagiso Trust Investments (Proprietary) Limited:

- A 25% holding by Kagiso Trust Investments (Proprietary) Limited in BUA Telecoms, a company that is a vendor to the group.
- A 25% holding by Kagiso Trust Investments (Proprietary) Limited in debis Fleet Management (Proprietary) Limited, a fleet management company to which the group has outsourced its vehicle fleet.
- A 50,1% holding by Kagiso Trust Investments (Proprietary) Limited in Kagiso Treasury Services (Proprietary) Limited who manages Telkom's treasury function.

14. Subsequent events

On September 1, 2002, Telkom issued an information memorandum inviting potential investors to provide preliminary submissions to purchase a substantial portion of the fixed-line property portfolio and lease that property back to us. On May 23, 2003, Telkom announced that it had terminated its information memorandum relating to the proposed sale and lease-back transaction. The directors are not aware of any other matter or circumstance since the financial year-end, not otherwise dealt with in the financial statements, which significantly affects the financial position of the group and the results of operation.

15. Negative working capital

For the financial years ended March 31, 2003 and 2002, the group's current liabilities are greater than the current assets. Current liabilities will be financed from operating cash flows, new borrowings and existing credit facilities.

16. Comparisons

Certain comparatives have been reclassified in accordance with current period classifications and presentations.

Special note regarding forward-looking statements

All statements contained herein, as well as oral statements that may be made by Telkom or by officers, directors or employees acting on behalf of the Telkom group, that are not statements of historical fact constitute "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, specifically Section 21E of the U.S. Securities Exchange Act of 1934, as amended. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Among the factors that could cause our actual results or outcomes to differ materially from our expectations are those risks identified under the caption "Risk Factors" contained in the prospectus relating to Telkom's initial public offering filed with the U.S. Securities Exchange Commission and available on Telkom's website at www.telkom.co.za, including, but not limited to, increased competition in the South African fixed-line and mobile communications markets; developments in the regulatory environment; Telkom's ability to reduce expenditure; the outcome of arbitration or litigation proceedings with Telcordia Technologies Incorporated; general economic, political, social and legal conditions in South Africa and in other countries where Vodacom invests; fluctuations in the value of the Rand; and other matters not yet known to us or not currently considered material by us. You should not place undue reliance on these forward-looking statements. All written and oral forward-looking statements attributable to us or persons acting on our behalf are qualified in their entirety by these cautionary statements. Moreover, unless we are required by law to update these statements, we will not necessarily update any of these statements after the date of this press release, either to conform them to actual results or to changes in our expectations.

Forward-looking safe harbour

All statements contained herein, as well as oral statements that may be made by Telkom SA Limited or by officers, directors or employees acting on behalf of the Telkom Group, that are not statements of historical fact constitute “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, specifically Section 21E of the U.S. Securities Exchange Act of 1934, as amended. Such forward-looking statements involve a known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. Among the factors that could cause our actual results or outcomes to differ materially from our expectations are those risks identified under the caption “Risk Factors” contained in the prospectus relating to Telkom’s initial public offering filed with the U.S. Securities Exchange Commission and available on Telkom’s website at www.telkom.co.za/ir, including, but not limited to, increased competition in the South African fixed-line and mobile communications markets; developments in the regulatory environment; Telkom’s ability to reduce expenditure; the outcome of arbitration or litigation proceedings, including with Telcordia Technologies Incorporated; general economic, political, social and legal conditions in South Africa and in other countries where Vodacom invests; fluctuations in the value of the Rand; and other matters not yet known to us or not currently considered material by us. You should not place undue reliance on these forward-looking statements. All written and oral forward-looking statements attributable to us or persons acting on our behalf are qualified in their entirety by these cautionary statements. Moreover, unless we are required by law to update these statements, we will not necessarily update any of these statements after the date of this press release, either to conform them to actual results or to changes in our expectations.
