GOAL/APPROACH

The fund seeks high total return through a combination of capital appreciation and current income. To pursue this goal, the fund invests in a diversified mix of stocks and fixed-income securities. The fund selects securities that, in the portfolio managers' judgment, will result in the highest total return consistent with preservation of principal. The fund will vary the mix of stocks and bonds from time to time, but normally the fund will allocate more than 50% of its assets to stocks and the remainder to bonds and other fixed-income securities. In allocating fund assets between stocks and bonds, the portfolio managers assess the relative return and risk of each asset class, analyzing several factors, including general economic conditions, anticipated future changes in interest rates and the outlook for stocks generally.

In choosing stocks for the fund to invest in, the portfolio managers look for companies that possess most of the following characteristics:

- leading market positions
- high barriers to market entry and other competitive or technological advantages
- high returns on equity and assets
- good growth prospects
- strong management
- relatively low debt burdens

In seeking to achieve a better risk-adjusted return on the fund's stock investments, the portfolio managers create a broadly diversified core equity portfolio for the fund that includes a blend of large company stocks, small company stocks, growth stocks and value stocks. The portfolio managers believe that holding a diverse group of stocks can provide competitive returns under different market environments. A flexible approach to equity investing should enable the fund to adapt to changing market trends and conditions and to invest wherever the portfolio managers believe opportunity exists.

The Fund

The fund normally invests at least 25% of its assets in fixed-income senior securities. The fixed-income senior securities in which the fund may invest include corporate bonds and other debt instruments, mortgage-related securities, asset-backed securities, debt securities issued or guaranteed by the U.S. government (including its agencies and instrumentalities), convertible debt securities and preferred stock that is convertible into common stock. The fund generally invests in investment grade fixed-income securities, although it may invest up to 5% of its total assets in securities rated below investment grade. The corporate debt securities in which the fund invests generally will be issued by established companies. The dollar-weighted average portfolio maturity of the fixed-income securities held by the fund normally will not exceed 10 years.

Concepts to understand

Investment grade fixed-income securities: independent rating organizations analyze and evaluate a bond issuer's credit history and ability to repay debts. Based on their assessment, rating organizations assign letter grades that reflect the issuer's creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

Dollar-weighted average maturity: an average of the stated maturities of the bonds held by the fund, based on their dollar-weighted proportions in the fund.

MAIN RISKS

The stock and bond markets can perform differently from each other at any given time (as well as over the long term), so the fund will be affected by its asset allocation. If the fund favors an asset class during a period when that class underperforms, performance may be hurt. The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The value of a security may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market sector risk.* The fund may overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.

The fund's investments in stocks and other equity securities also are subject to the following principal risks:

- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio man-

agers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.

- *Smaller company risk.* The fund may invest (typically less than one-third of its total assets) in stocks of smaller companies whose market capitalizations are less than \$1 billion. Small companies carry additional risks because their earning and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

The fund's investments in bonds and other fixed-income securities also are subject to the following principal risks:

- *Interest rate risk.* Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the bond portion of the fund, the more its share price is likely to react to interest rates.

- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a bond, can cause a bond's price to fall, potentially lowering the fund's share price. Although the fund's bond investments are primarily in investment grade bonds, it may invest to a limited extent (up to 5% of its total assets) in high yield ("junk") bonds which involve greater credit risk, including the risk of default, than investment grade bonds and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. The prices of high yield bonds can fall dramatically in response to bad news about the issuer or its industry, or the economy in general.
- *Call risk.* Some bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the portfolio might have to reinvest the proceeds in an investment offering a lower yield.
- *Liquidity risk.* When there is no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically.
- *Prepayment and extension risk.* When interest rates fall, the principal on mortgage-backed and certain asset-backed securities may be prepaid. The loss of higher yielding, underlying mortgages and the reinvestment of proceeds at lower interest rates can reduce the fund's potential price gain in response to falling interest rates, reduce the fund's yield, or cause the fund's share price to fall. When interest rates rise, the effective duration of the fund's mortgage-related and other asset-backed securities may lengthen due to a drop in prepayments of the underlying mortgages or other assets. This is known as extension risk and would increase the fund's sensitivity to rising rates and its potential for price declines.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and other money market securities. Although the fund would do this for temporary defensive purposes, it could have the effect of reducing the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of another investment company advised by the fund's sub-investment adviser, Thompson Plumb Balanced Fund (the "predecessor fund"), were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on January 30, 2004. The fund's Class J shares are not offered in this prospectus. The performance figures for the fund's Class A shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The performance figures for the fund's shares in the table represent the performance of the predecessor fund's shares and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks, and the Lehman Brothers Intermediate Government/Credit Bond Index, an index of all investment grade bonds with maturities of more than one year and less than 10 years. These returns have been adjusted to reflect the fund's applicable sales loads. Performance figures have not been adjusted to reflect the fund's estimated operating expenses; if these expenses had been reflected, such performance may have been lower. All returns assume reinvestment of dividends and distributions. Of course, past performance is no guarantee of future results. All of the fund's share classes invest in the same portfolio of securities. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares (based on the performance of the predecessor fund's shares, adjusted to reflect the sales load applicable to the fund's Class A shares). After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

* Represents the performance of the predecessor fund's shares.

Average annual total returns <i>as of 12/31/03*</i>			
	1 Year	5 Years	10 Years
Class A <i>returns before taxes</i>	14.97%	6.78%	11.54%
Class A <i>returns after taxes on distributions</i>	14.61%	5.09%	9.01%
Class A <i>returns after taxes on distributions and sale of fund shares</i>	9.90%	5.05%	8.69%
Class B <i>returns before taxes</i>	17.96%	7.76%	12.20%**
Class C <i>returns before taxes</i>	20.96%	8.05%	12.20%
Class R <i>returns before taxes</i>	21.96%	8.05%	12.20%
Class T <i>returns before taxes</i>	16.46%	7.06%	11.69%
S&P 500® Index <i>reflects no deduction for fees, expenses or taxes</i>	28.67%	-0.57%	11.06%
Lehman Brothers Intermediate Government/Credit Bond Index <i>reflects no deduction for fees, expenses or taxes</i>	4.31%	6.65%	6.63%

* Represents the performance of the predecessor fund's shares, as adjusted to reflect the fund's applicable sales loads.

** Assumes conversion of Class B to Class A at the end of the sixth year following the date of purchase.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

Fee table	Class A	Class B	Class C	Class R	Class T
Shareholder transaction fees <i>(fees paid from your account)</i>					
Maximum front-end sales charge on purchases <i>% of offering price</i>	5.75	none	none	none	4.50
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	none*	4.00	1.00	none	none*
Annual fund operating expenses <i>(expenses paid from fund assets)</i>					
<i>% of average daily net assets</i>					
Management fees	.80	.80	.80	.80	.80
Rule 12b-1 fee	none	.75	.75	none	.25
Shareholder services fee	.25	.25	.25	none	.25
Other expenses	.20	.20	.20	.20	.20
Total	1.25	2.00	2.00	1.00	1.50

* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

Expense example	1 Year	3 Years
Class A	\$695	\$949
Class B		
<i>with redemption</i>	\$603	\$927
<i>without redemption</i>	\$203	\$627
Class C		
<i>with redemption</i>	\$303	\$627
<i>without redemption</i>	\$203	\$627
Class R	\$102	\$318
Class T	\$596	\$903

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

Rule 12b-1 fee: the fee paid to the fund's distributor for financing the sale and distribution of Class B, Class C and Class T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

Shareholder services fee: the fee paid to the fund's distributor for providing shareholder services.

Other expenses: estimated fees to be paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. Actual expenses may be greater or less than the amounts listed in the fee table above.

MANAGEMENT

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$166 billion in approximately 200 mutual fund portfolios. The fund has agreed to pay Dreyfus a management fee at the annual rate of 0.80% of the fund's average daily net assets. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company with approximately \$3.5 trillion of assets under management, administration or custody, including approximately \$657 billion under management. Mellon Financial provides financial services for institutions, corporations and individuals, offering institutional asset management, mutual funds, private wealth management, asset servicing, human resources services and treasury services. Mellon Financial is headquartered in Pittsburgh, Pennsylvania.

On March 30, 2004, Mellon Bank, N.A., a wholly owned subsidiary of Mellon Financial and the then-current parent company of Dreyfus, transferred its entire interest in Dreyfus, including Dreyfus Service Corporation (the fund's distributor) and all of Dreyfus' other direct and indirect subsidiaries, to Mellon Financial. The reorganization does not result in a change in the control or management of Dreyfus under the Investment Advisers Act of 1940, as amended, or the Investment Company Act of 1940, as amended (the 1940 Act); Dreyfus merely became a direct, rather than indirect, wholly owned subsidiary of Mellon Financial. The reorganization is part of a larger reorganization of Mellon Financial that is expected to increase organizational synergies and create a more efficient capital structure throughout the organization.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged Wisconsin Capital Management, Inc. (Wisconsin Capital), formerly known as Thompson, Plumb & Associates, Inc., located at 1200 John Q. Hammons Drive, Madison, Wisconsin 53717, to serve as the fund's sub-investment adviser. Wisconsin Capital served as the predecessor fund's investment adviser and administrator. Since 1984, Wisconsin Capital has provided investment advice to individuals and institutional clients with substantial investment portfolios. As of December 31, 2003, Wisconsin Capital had approximately \$1.2 billion in assets under management. Wisconsin Capital, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

Thomas G. Plumb serves as primary portfolio manager for the fund. He managed or co-managed the predecessor fund since its inception in March 1987. Since the end of December 2003, Mr. Plumb has been president and sole owner of Wisconsin Capital; prior thereto, he had been vice president of Wisconsin Capital since co-founding it in June 1984. David B. Duchow and Timothy R. O'Brien serve as associate portfolio managers for the fund; they served as such for the predecessor fund since March 2002. Clint A. Oppermann also serves as an associate portfolio manager of the fund. Messrs. Duchow and O'Brien have each been a portfolio manager and investment analyst for Wisconsin Capital since 1992 and 1997, respectively. Mr. Oppermann has been vice president and director of research of Wisconsin Capital since November 2001 and, since August 1999, a portfolio manager for Wisconsin Capital. From November 1997 to August 1999, he was a portfolio manager for Firststar Investment Research & Management Company, LLC.

The fund, Dreyfus, Wisconsin Capital and Dreyfus Service Corporation (the fund's distributor) have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each of the Dreyfus and Wisconsin Capital code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the respective code's preclearance and disclosure procedures. The primary purpose of the respective code is to ensure that personal trading by employees of Dreyfus or Wisconsin Capital does not disadvantage any fund managed by Dreyfus or Wisconsin Capital, as the case may be.

Two class actions have been filed against Mellon Financial and Mellon Bank, N.A., and Dreyfus and Founders Asset Management LLC (the Investment Advisers), and the directors of all or substantially all of the Dreyfus funds, alleging that the Investment Advisers improperly used assets of the Dreyfus funds, in the form of directed brokerage commissions and 12b-1 fees, to pay brokers to promote sales of Dreyfus funds, and that the use of fund assets to make these payments was not properly disclosed to investors. The complaints further allege that the directors breached their fiduciary duties to fund shareholders under the 1940 Act and at common law. The complaints seek unspecified compensatory and punitive damages, rescission of the funds' contracts with the Investment Advisers, an accounting of all fees paid, and an award of attorneys' fees and litigation expenses. Dreyfus and the Dreyfus funds believe the allegations to be totally without merit and will defend the actions vigorously.

Additional lawsuits arising out of these circumstances and presenting similar allegations and requests for relief may be filed against the defendants in the future. Neither Dreyfus nor the Dreyfus funds believe that any of the pending actions will have a material adverse affect on the Dreyfus funds or Dreyfus' ability to perform its contract with the Dreyfus funds.

FINANCIAL HIGHLIGHTS

As new classes, financial highlights information is not available for the fund's Class A, B, C, R and T shares as of the date of this prospectus.

Your Investment

ACCOUNT POLICIES

The Dreyfus Premier funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described herein. In addition, such third parties may receive payments from Dreyfus in connection with their offering of fund shares to their customers, or for marketing, distribution or other services. The receipt of such payments could create an incentive for the third party to offer the fund instead of other mutual funds where such payments are not received. Consult a representative of your plan or financial institution for further information.

You will need to choose a share class before making your initial investment. The different classes of shares represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. In making your choice, you should consider how much you plan to invest and how long you plan to hold your investment, then weigh the impact of all potential costs over the length of your investment, including sales charges and annual fees. For example, in some cases, it can be more economical to pay an initial sales charge than to choose a class with no initial sales charge but higher annual fees and a contingent deferred sales charge (CDSC). Your financial representative can help you choose the share class that is appropriate for you.

- **Class A** shares may be appropriate for investors who prefer to pay the fund's sales charge up front rather than upon the sale of their shares, want to take advantage of the reduced sales charges available on larger investments and/or have a longer-term investment horizon. If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will be the most advantageous choice, no matter how long you intend to hold your shares.
- **Class B** shares may be appropriate for investors who wish to avoid paying a front-end sales charge, put 100% of their investment dollars to work immediately and/or have a longer-term investment horizon.
- **Class C** shares may be appropriate for investors who wish to avoid paying a front-end sales charge, put 100% of their investment dollars to work immediately and/or have a shorter-term investment horizon.
- **Class R** shares are designed for eligible institutions and their clients (individuals may not purchase these shares directly).
- **Class T** shares may be appropriate for investors who prefer to pay the fund's sales charge up front rather than upon the sale of their shares, want to take advantage of the reduced sales charges available on larger investments and/or have a shorter-term investment horizon. However, if you invest \$1 million or more in the fund, you should buy Class A shares, regardless of your investment horizon, because Class A has lower expenses than Class T.

Share class charges

Each share class has its own fee structure. In some cases, you may not have to pay a sales charge or may qualify for a reduced sales charge to buy or sell shares. Consult your financial representative or the SAI to see if this may apply to you.

Sales charges

Class A and Class T – charged when you buy shares

Your investment	Sales charge deducted as a % of offering price		Sales charge as a % of your net investment	
	Class A	Class T	Class A	Class T
Up to \$49,999	5.75%	4.50%	6.10%	4.70%
\$50,000 – \$99,999	4.50%	4.00%	4.70%	4.20%
\$100,000 – \$249,999	3.50%	3.00%	3.60%	3.10%
\$250,000 – \$499,999	2.50%	2.00%	2.60%	2.00%
\$500,000 – \$999,999	2.00%	1.50%	2.00%	1.50%
\$1 million or more*	0.00%	0.00%	0.00%	0.00%

* A 1.00% CDSC may be charged on any shares sold within one year of purchase (except shares bought through dividend reinvestment).

Class T shares also carry an annual Rule 12b-1 fee of 0.25% of the class’s average daily net assets.

Class B – charged when you sell shares

Years since purchase was made	CDSC as a % of your initial investment or your redemption (whichever is less)
Up to 2 years	4.00%
2 – 4 years	3.00%
4 – 5 years	2.00%
5 – 6 years	1.00%
More than 6 years	Shares will automatically convert to Class A

Class B shares also carry an annual Rule 12b-1 fee of 0.75% of the class’s average daily net assets.

Class C – charged when you sell shares

A 1.00% CDSC is imposed on redemptions made within the first year of purchase. Class C shares also carry an annual Rule 12b-1 fee of 0.75% of the class’s average daily net assets.

Class R – no sales load or Rule 12b-1 fees

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

Reduced Class A and Class T sales charge

Letter of intent: lets you purchase Class A and Class T shares over a 13-month period at the same sales charge as if all shares had been purchased at once.

Right of accumulation: when calculating the sales charge on Class A or Class T shares, you may take into account the value of any shares you own in this fund or in certain other Dreyfus Premier Funds or Dreyfus Founders Funds. For any such right of accumulation to be made available, at the time of purchase you must provide sufficient information to permit the confirmation of qualification.

Consult the Statement of Additional Information (SAI) or your financial representative for more details.

Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the exchange is open for regular business. Your order will be priced at the next NAV calculated after your order is accepted by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
Regular accounts	\$1,000	\$100; \$500 for Dreyfus TeleTransfer investments
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum after the first year

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is accepted by the fund’s transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. There are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or the SAI for details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online		
Proceeds sent by	Minimum phone/online	Maximum phone/online
Check*	no minimum	\$250,000 per day
Wire	\$1,000	\$500,000 for joint accounts every 30 days/ \$20,000 per day
Dreyfus TeleTransfer	\$500	\$500,000 for joint accounts every 30 days/ \$20,000 per day

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the transfer agent takes reasonable measures to confirm that instructions are genuine.

Excessive trading, short-term market timing or other abusive trading practices may disrupt portfolio management strategies and harm fund performance. Accordingly, the fund reserves the right to refuse any purchase or exchange request that could adversely affect the fund or its operations, including those from any individual or group who, in the fund's view, is likely to engage in excessive trading, short-term market timing or other abusive trading practices. Multiple accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive trading, short-term market timing or other abusive trading practices. Transactions placed by suspected excessive traders may not be deemed accepted by the fund and may be cancelled or revoked by the fund on the next business day following receipt by the fund or its transfer agent. While the fund will take reasonable steps to prevent trading practices deemed to be harmful to the fund, it may not be able to identify such trading conducted through certain financial intermediaries or omnibus accounts.

The fund also reserves the right to:

- refuse any purchase or exchange request
- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum investment amounts
- delay sending out proceeds for up to seven days (generally applies only in cases of very large redemptions, excessive trading or during unusual market conditions)
- "redeem in kind," or make payments in securities rather than cash, if the amount you are redeeming is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)

Small account policies

To offset the relatively higher costs of servicing smaller accounts, the fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; IRA accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your redemption of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive upon redemption.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

For investing

Dreyfus Automatic Asset Builder®	For making automatic investments from a designated bank account.
Dreyfus Payroll Savings Plan	For making automatic investments through a payroll deduction.
Dreyfus Government Direct Deposit Privilege	For making automatic investments from your federal employment, Social Security or other regular federal government check.
Dreyfus Dividend Sweep	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

For exchanging shares

Dreyfus Auto-Exchange Privilege	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

For selling shares

Dreyfus Automatic Withdrawal Plan	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call, or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

Reinvestment privilege

Upon written request, you can reinvest up to the number of Class A, Class B or Class T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

Account statements

Every fund investor automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

INSTRUCTIONS FOR **REGULAR ACCOUNTS**

TO OPEN AN ACCOUNT

In Writing

Complete the application.

Mail your application and a check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

By Telephone

Wire Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900480084
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.

Mail the slip and the check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

Wire Have your bank send your investment to The Bank of New York, with these instructions:

The Fund

GOAL/APPROACH

The fund seeks high total return through a combination of capital appreciation and current income. To pursue this goal, the fund invests in a diversified mix of stocks and fixed-income securities. The fund selects securities that, in the portfolio managers' judgment, will result in the highest total return consistent with preservation of principal. The fund will vary the mix of stocks and bonds from time to time, but normally the fund will allocate more than 50% of its assets to stocks and the remainder to bonds and other fixed-income securities. In allocating fund assets between stocks and bonds, the portfolio managers assess the relative return and risk of each asset class, analyzing several factors, including general economic conditions, anticipated future changes in interest rates and the outlook for stocks generally.

In choosing stocks for the fund to invest in, the portfolio managers look for companies that possess most of the following characteristics:

- leading market positions
- high barriers to market entry and other competitive or technological advantages
- high returns on equity and assets
- good growth prospects
- strong management
- relatively low debt burdens

In seeking to achieve a better risk-adjusted return on the fund's stock investments, the portfolio managers create a broadly diversified core equity portfolio for the fund that includes a blend of large company stocks, small company stocks, growth stocks and value stocks. The portfolio managers believe that holding a diverse group of stocks can provide competitive returns under different market environments. A flexible approach to equity investing should enable the fund to adapt to changing market trends and conditions and to invest wherever the portfolio managers believe opportunity exists.

The fund normally invests at least 25% of its assets in fixed-income senior securities. The fixed-income senior securities in which the fund may invest include corporate bonds and other debt instruments, mortgage-related securities, asset-backed securities, debt securities issued or guaranteed by the U.S. government (including its agencies and instrumentalities), convertible debt securities and preferred stock that is convertible into common stock. The fund generally invests in investment grade fixed-income securities, although it may invest up to 5% of its total assets in securities rated below investment grade. The corporate debt securities in which the fund invests generally will be issued by established companies. The dollar-weighted average portfolio maturity of the fixed-income securities held by the fund normally will not exceed 10 years.

Concepts to understand

Investment grade fixed-income securities: independent rating organizations analyze and evaluate a bond issuer's credit history and ability to repay debts. Based on their assessment, rating organizations assign letter grades that reflect the issuer's creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

Dollar-weighted average maturity: an average of the stated maturities of the bonds held by the fund, based on their dollar-weighted proportions in the fund.

MAIN RISKS

The stock and bond markets can perform differently from each other at any given time (as well as over the long term), so the fund will be affected by its asset allocation. If the fund favors an asset class during a period when that class underperforms, performance may be hurt. The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The value of a security may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market sector risk.* The fund may overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.

The fund's investments in stocks and other equity securities also are subject to the following principal risks:

- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio man-

agers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.

- *Smaller company risk.* The fund may invest (typically less than one-third of its total assets) in stocks of smaller companies whose market capitalizations are less than \$1 billion. Small companies carry additional risks because their earning and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

The fund's investments in bonds and other fixed-income securities also are subject to the following principal risks:

- *Interest rate risk.* Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the bond portion of the fund, the more its share price is likely to react to interest rates.

- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a bond, can cause a bond's price to fall, potentially lowering the fund's share price. Although the fund's bond investments are primarily in investment grade bonds, it may invest to a limited extent (up to 5% of its total assets) in high yield ("junk") bonds which involve greater credit risk, including the risk of default, than investment grade bonds and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. The prices of high yield bonds can fall dramatically in response to bad news about the issuer or its industry, or the economy in general.
- *Call risk.* Some bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the portfolio might have to reinvest the proceeds in an investment offering a lower yield.
- *Liquidity risk.* When there is no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

- *Prepayment and extension risk.* When interest rates fall, the principal on mortgage-backed and certain asset-backed securities may be prepaid. The loss of higher yielding, underlying mortgages and the reinvestment of proceeds at lower interest rates can reduce the fund's potential price gain in response to falling interest rates, reduce the fund's yield, or cause the fund's share price to fall. When interest rates rise, the effective duration of the fund's mortgage-related and other asset-backed securities may lengthen due to a drop in prepayments of the underlying mortgages or other assets. This is known as extension risk and would increase the fund's sensitivity to rising rates and its potential for price declines.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could have the effect of reducing the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of another investment company advised by the fund's sub-investment adviser, Thompson Plumb Balanced Fund (the "predecessor fund"), were transferred to the fund in a tax-free reorganization on January 30, 2004. The performance figures for the fund's Class J shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year. The performance figures for the fund's Class J shares in the table represent the performance of the predecessor fund's shares and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks, and the Lehman Brothers Intermediate Government/Credit Bond Index, an index of all investment grade bonds with maturities of more than one year and less than 10 years. All returns assume reinvestment of dividends and distributions. Of course, past performance is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns *as of 12/31 each year (%)*

Class J shares*

Best Quarter: Q4 '98 **+19.41%**

Worst Quarter: Q3 '02 **-12.39%**

Average annual total returns *as of 12/31/03**

	1 Year	5 Years	10 Years

Lehman Brothers Intermediate Government/Credit Bond Index <i>reflects no deduction for fees, expenses or taxes</i>	4.31%	6.65%	6.63%

* Represents the performance of the predecessor fund's shares.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described for Class J in the table below. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. You will be charged a fee (currently \$15.00) when you have redemption proceeds paid to you by wire transfer. The fund has no sales charge (load) or Rule 12b-1 distribution fees for Class J.

Fee table	
Annual fund operating expenses	
<i>% of average daily net assets</i>	
Management fees	0.80%
Other expenses	0.20%
Total	1.00%

Expense example			
1 Year	3 Years	5 Years	10 Years
\$102	\$318	\$552	\$1,225

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. The Dreyfus Corporation has contractually agreed to waive receipt of its fees and/or assume the expenses of the fund for the two-year period following the closing date of the reorganization of the predecessor fund, so that annual fund operating expenses for Class J (excluding taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) do not exceed 1.11%.

Other expenses: estimated fees to be paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. Actual expenses may be greater or less than the amount listed in the fee table above.

MANAGEMENT

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$166 billion in approximately 200 mutual fund portfolios. The fund has agreed to pay Dreyfus a management fee at the annual rate of 0.80% of the fund's average daily net assets. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company with approximately \$3.5 trillion of assets under management, administration or custody, including approximately \$657 billion under management. Mellon Financial provides financial services for institutions, corporations and individuals, offering institutional asset management, mutual funds, private wealth management, asset servicing, human resources services and treasury services. Mellon Financial is headquartered in Pittsburgh, Pennsylvania.

On March 30, 2004, Mellon Bank, N.A., a wholly owned subsidiary of Mellon Financial and the then-current parent company of Dreyfus, transferred its entire interest in Dreyfus, including Dreyfus Service Corporation (the fund's distributor) and all of Dreyfus' other direct and indirect subsidiaries, to Mellon Financial. The reorganization does not result in a change in the control or management of Dreyfus under the Investment Advisers Act of 1940, as amended, or the Investment Company Act of 1940, as amended (the 1940 Act); Dreyfus merely became a direct, rather than indirect, wholly owned subsidiary of Mellon Financial. The reorganization is part of a larger reorganization of Mellon Financial that is expected to increase organizational synergies and create a more efficient capital structure throughout the organization.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged Wisconsin Capital Management, Inc. (Wisconsin Capital), formerly known as Thompson, Plumb & Associates, Inc., located at 1200 John Q. Hammons Drive, Madison, Wisconsin 53717, to serve as the fund's sub-investment adviser. Wisconsin Capital served as the predecessor fund's investment adviser and administrator. Since 1984, Wisconsin Capital has provided investment advice to individuals and institutional clients with substantial investment portfolios. As of December 31, 2003, Wisconsin Capital had approximately \$1.2 billion in assets under management. Wisconsin Capital, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

Thomas G. Plumb serves as primary portfolio manager for the fund. He managed or co-managed the predecessor fund since its inception in March 1987. Since the end of December 2003, Mr. Plumb has been president and sole owner of Wisconsin Capital; prior thereto, he had been vice president of Wisconsin Capital since co-founding it in June 1984. David B. Duchow and Timothy R. O'Brien serve as associate portfolio managers for the fund; they served as such for the predecessor fund since March 2002. Clint A. Oppermann also serves as an associate portfolio manager of the fund. Messrs. Duchow and O'Brien have each been a portfolio manager and investment analyst for Wisconsin Capital since 1992 and 1997, respectively. Mr. Oppermann has been vice president and director of research of Wisconsin Capital since November 2001 and, since August 1999, a portfolio manager for Wisconsin Capital. From November 1997 to August 1999, he was a portfolio manager for Firststar Investment Research & Management Company, LLC.

The fund, Dreyfus, Wisconsin Capital and Dreyfus Service Corporation (the fund's distributor) have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each of the Dreyfus and Wisconsin Capital code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the respective code's preclearance and disclosure procedures. The primary purpose of the respective code is to ensure that personal trading by employees of Dreyfus or Wisconsin Capital does not disadvantage any fund managed by Dreyfus or Wisconsin Capital, as the case may be.

Two class actions have been filed against Mellon Financial and Mellon Bank, N.A., and Dreyfus and Founders Asset Management LLC (the Investment Advisers), and the directors of all or substantially all of the Dreyfus funds, alleging that the Investment Advisers improperly used assets of the Dreyfus funds, in the form of directed brokerage commissions and 12b-1 fees, to pay brokers to promote sales of Dreyfus funds, and that the use of fund assets to make these payments was not properly disclosed to investors. The complaints further allege that the directors breached their fiduciary duties to fund shareholders under the 1940 Act and at common law. The complaints seek unspecified compensatory and punitive damages, rescission of the funds' contracts with the Investment Advisers, an accounting of all fees paid, and an award of attorneys' fees and litigation expenses. Dreyfus and the Dreyfus funds believe the allegations to be totally without merit and will defend the actions vigorously.

Additional lawsuits arising out of these circumstances and presenting similar allegations and requests for relief may be filed against the defendants in the future. Neither Dreyfus nor the Dreyfus funds believe that any of the pending actions will have a material adverse affect on the Dreyfus funds or Dreyfus' ability to perform its contract with the Dreyfus funds.

FINANCIAL HIGHLIGHTS

The financial highlights information in the following table for the fund's Class J shares represents the financial highlights of the predecessor fund's shares for the fiscal periods indicated. The fund commenced operations after all of the assets of the predecessor fund were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on January 30, 2004. "Total return" shows how much an investment in the predecessor

fund's shares would have increased (or decreased) during each period, assuming all dividends and distributions were reinvested. These financial highlights have been audited by PricewaterhouseCoopers LLP, the independent auditors for the predecessor fund and fund, whose report, along with the predecessor fund's financial statements, is included in the predecessor fund's annual report, which is available upon request.

		Year Ended November 30,				
Class J		2003	2002	2001	2000	1999

Your Investment

ACCOUNT POLICIES

Buying shares

Class J shares are offered only to shareholders who received Class J shares in exchange for their shares of the predecessor fund as a result of the reorganization of the predecessor fund.

You pay no sales charges to invest in Class J shares of the fund. Your price for fund Class J shares is the net asset value per share of that class (NAV), which is generally calculated as of the close of trading on the New York Stock Exchange (usually 4:00 p.m. Eastern time) on days the exchange is open for regular business. Your order will be priced at the next NAV calculated after your order is accepted by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Minimum additional investments

Regular accounts	\$100
Traditional IRAs	\$100
Spousal IRAs	\$100
Roth IRAs	\$100
Education Savings Accounts	\$100
Automatic investment plans	\$50

Purchase procedures to add to an existing account:

You may buy Class J shares of the fund in the following ways:

<u>Method</u>	<u>Steps to Follow</u>
<p>By Personal Delivery/Express Mail:</p> <p>Dreyfus Premier Balanced Opportunity Fund – Class J</p>	<ol style="list-style-type: none"> 1. Complete the Additional Investment form included with your account statement (or write a note with your account number). c/o U.S. Bancorp Fund Services, LLC 615 East Michigan Street Milwaukee, WI 53202 2. Make your check payable to “Dreyfus Premier Balanced Opportunity Fund.” No third party checks, credit cards, credit card checks, cash or money orders will be accepted. 3. Send the Additional Investment form (or note) and check to the applicable address listed above (note: \$25 charge for checks returned for insufficient funds).
<p>By Wire or Electronic Funds Transfer:</p> <p>Wire To: U.S. Bank, National Association ABA# 042000013</p> <p>Credit: c/o U.S. Bancorp Fund Services, LLC Account 112-952-137</p> <p>Further Credit: (Name of Fund) (Account Number) (Your Name)</p>	<ol style="list-style-type: none"> 1. Call us at 1-800-999-0887 before making the wire transfer and provide your name, account number, address, social security or tax identification number, the amount being wired, the name of your bank and the name and phone number of your bank’s contact person. 2. Instruct your bank (which must be a member of, or have a correspondent relationship with a member of, the Federal Reserve System for wire transfers, or must be an Automated Clearing House member for electronic funds transfers) to wire the funds as shown to the left (note: \$25 charge for insufficient or unavailable funds or your negligence).

Note: Amounts sent by wire or electronic funds transfers must be received before 3:00 p.m. Central time in order to buy shares that day. Also, you are responsible for any charges that your bank may impose for effecting the wire or electronic funds transfer. Make sure you give us your correct account number.

Purchase procedures to add to an existing account (continued):

<u>Method</u>	<u>Steps to Follow</u>
Automatic Investment Plan: (Note: This plan may be suspended, modified or terminated at any time.)	<ol style="list-style-type: none">1. Complete the Automatic Investment Plan section on the regular Account Application to authorize the transfer of funds from your bank account, include a voided check with the application and indicate how often (monthly, bimonthly, quarterly or yearly) you wish to make automatic investments. Call 1-800-999-0887 to obtain a regular Account Application.2. Indicate the amount of the automatic investments (must be at least \$50 per investment).3. Your bank will deduct the automatic investment amount you have selected from your checking account on the business day of your choosing, and apply the amount to the purchase of fund shares. (Note: You will be charged \$25 for any automatic investments that do not clear due to insufficient funds or the closing of your account without notifying us.)
To Change or Stop an Automatic Investment Plan:	<ol style="list-style-type: none">1. Call 1-800-999-0887. We will take your request and give you a confirmation number; or2. Write a letter requesting your change to: Dreyfus Premier Balanced Opportunity Fund – Class J c/o U.S. Bancorp Fund Services, LLC P.O. Box 701 Milwaukee, WI 53201-0701
Through Broker-Dealers and Other Service Providers:	<p>You may purchase shares of the fund through a broker-dealer, institution or other service provider, who may charge a commission or other transaction fee. Certain features of the fund may not be available or may be modified in connection with the program offered by your service provider. The service provider, rather than you, may be the shareholder of record of fund shares, and may be responsible for delivering fund reports and other communications about the fund to you.</p>

Selling shares

You may sell (redeem) shares at any time. Your Class J shares will be sold at the next NAV calculated after your order is accepted by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week. Please call 1-800-999-0887, if you have any questions about redeeming shares of the fund.

Redemption procedures

You may redeem fund shares in the following ways:

<u>Method</u>	<u>Steps to Follow</u>
By Mail: Dreyfus Premier Balanced Opportunity Fund – Class J c/o U.S. Bancorp Fund Services, LLC P.O. Box 701 Milwaukee, WI 53201-0701	1. A written request for redemption (or the Redemption Request form) must be signed exactly as the account is registered and include the account number and the amount to be redeemed.
By Personal Delivery/Express Mail: Dreyfus Premier Balanced Opportunity Fund – Class J c/o U.S. Bancorp Fund Services, LLC 615 East Michigan Street Milwaukee, WI 53202	2. Send the written redemption request and any certificates for the shares being redeemed to the applicable address listed to the left. 3. Signatures may need to be guaranteed. See “Signature Guarantees.”

Systematic Withdrawal Plans:

You can elect to participate in our Systematic Withdrawal Plan by completing the Systematic Withdrawal Plan section on the regular Account Application. This plan allows you to arrange for automatic withdrawals from your fund account into a pre-authorized bank account. You select the schedule for systematic withdrawals, which may be on a monthly basis or in certain designated months. You also select the amount of each systematic withdrawal, subject to a \$50 minimum. To begin systematic withdrawals, you must have a fund account valued at \$10,000 or more. The Systematic Withdrawal Plan may be terminated or modified at any time.

Redemption procedures (continued):

<u>Method</u>	<u>Steps to Follow</u>
By Telephone:	<p>We will accept telephone redemptions unless you indicate otherwise on your account application.</p> <ol style="list-style-type: none">1. Call 1-800-999-0887.2. Provide your account number and the amount to be redeemed.3. Telephone redemptions are subject to a \$25,000 maximum.4. We will send the proceeds from a telephone redemption only to the shareholder of record at the address shown on its records. <p>By accepting the telephone redemption option, you authorize us to act upon the instruction of any person by telephone to redeem shares from your account, and you assume some risk for unauthorized transactions. We have procedures designated to reasonably assure that the telephone instructions are genuine, including recording telephone conversations, requesting personal information and providing written confirmation of transactions, and we will be liable to you if you suffer a loss from our failure to abide by these procedures.</p>
Through Broker-Dealers, Institutions and Other Service Providers:	<p>You may redeem fund shares through broker-dealers, institutions and other service providers, who may charge a commission or other transaction fee for processing the redemption for you.</p>

Receiving redemption proceeds

You may request to receive your redemption proceeds by mail or by wire or electronic funds transfer. No redemption will be effective until all necessary documents have been received in proper form by the fund's transfer agent. The fund will delay sending redemption proceeds for Class J shares for 15 days from the purchase date of such shares or until all payments for the shares being redeemed have cleared, whichever occurs first.

Method**Steps to Follow****By Mail:**

We mail checks for redemption proceeds within seven days after we receive the request and all necessary documents. The check will be mailed to the address on your account (unless you request that it be sent to a different address which would require a signature guarantee). There is no charge for mailing out redemption checks. Your redemption checks will be mailed unless you expressly request that it be sent by wire or electronic fund transfer.

By Wire/Electronic Funds Transfer:

At your written request and with a guaranteed signature on your redemption request, we will send you your redemption proceeds by wire or electronic funds transfer to your designated bank account. Redemption proceeds sent by wire transfer ordinarily will be made the business day immediately after we receive the request. Redemption proceeds by electronic fund transfer will be made within two or three days after we receive the request. You will be charged a fee (currently \$15) for each wire transfer. There is no charge for electronic fund transfers. You will be responsible for any charges that your bank may impose for receiving wire or electronic fund transfers.

Signature Guarantees. For your protection, your signature on a redemption request must be guaranteed by an institution eligible to provide them under federal and state law (such as a bank, savings and loan, or securities broker-dealer) under any of the following circumstances.

- The redemption is for \$25,000 or more.
- The proceeds are to be sent to someone other than the registered account holder of the shares being redeemed.
- The proceeds are to be sent to an address other than the registered address on the account.
- If you want to change ownership registration on your account.
- If you have requested a change of address within 30 days prior to the redemption request.
- If you request that the redemption proceeds be sent by wire or electronic fund transfer.

Exchange of fund shares

You may exchange Class J shares of the fund for shares of Thompson Plumb Growth Fund, Thompson Plumb Select Fund, Thompson Plumb Blue Chip Fund and Thompson Plumb Bond Fund (the “Thompson Plumb Funds”), each a series of Thompson Plumb Funds, Inc. advised by the fund’s sub-investment adviser, without a fee or sales charge. The exchange of shares can be made by mailing a letter of instruction to the fund or by telephone unless you have declined this option on your Account Application. If you have a joint account, only one joint tenant’s authorization is required for a telephone exchange. In making telephone exchanges, you assume the risk for unauthorized transactions. However, we have procedures designed to reasonably assure that the telephone instructions are genuine, and we will be liable to you if you suffer a loss from our failure to abide by these procedures. The exchange privilege may be modified or terminated at any time.

The basic rules for exchanges are as follows:

- You must own shares of the fund for at least 15 days before you can exchange them for shares of a Thompson Plumb Fund.
- Shares being exchanged must have a net asset value of at least \$1,000 (except for the Automatic Exchange Plan) but less than \$100,000.
- Immediately following the exchange, the value of your account in the Thompson Plumb Fund for which shares are exchanged must be at least \$2,500 (or \$2,000 for IRAs).
- We reserve the right to limit the number of times you may exchange fund shares.

Automatic Exchange Plan. You may also make regular monthly exchanges from the fund to a Thompson Plumb Fund through our Automatic Exchange Plan. You may participate by completing the Automatic Exchange Plan Application, which may be obtained from the fund. You must establish an account for each fund with at least \$2,500 (or \$2,000 for IRAs) before you can make automatic exchanges. You determine the amount that will be automatically exchanged (must be at least \$50) and the day of each month the exchange will be made.

Tax Treatment for Exchanges. An exchange of shares from one fund to another fund is treated as a sale of the shares being exchanged and any gain on the transaction may be subject to income tax.

Availability of money market fund

If you elect on the Account Application, you may withdraw some or all of your investment in the fund and reinvest the proceeds the same day in shares of the First American Prime Obligations Fund. You may also move that investment back into the fund. Your use of this privilege is subject to the purchase and redemption amounts set forth in the First American Prime Obligations Fund prospectus. There is no charge for this privilege. This privilege may be modified or terminated at any time.

General policies

Excessive trading, short-term market timing or other abusive trading practices may disrupt portfolio management strategies and harm fund performance. Accordingly, the fund reserves the right to refuse any purchase or exchange request that could adversely affect the fund or its operations, including those from any individual or group who, in the fund's view, is likely to engage in excessive trading, short-term market timing or other abusive trading practices. Multiple accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive trading, short-term market timing or other abusive trading practices. Transactions placed by suspected excessive traders may not be deemed accepted by the fund and may be cancelled or revoked by the fund on the next business day following receipt by the fund or its transfer agent. While the fund will take reasonable steps to prevent trading practices deemed to be harmful to the fund, it may not be able to identify such trading conducted through certain financial intermediaries or omnibus accounts.

Small account policies

To offset the relatively higher costs of servicing smaller accounts, the fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for IRA accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

The fund also reserves the right to:

- refuse any purchase or exchange request
- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum investment amounts
- delay sending out proceeds for up to seven days (generally applies only in cases of very large redemptions, excessive trading or during unusual market conditions)
- “redeem in kind,” or make payments in securities rather than cash, if the amount you are redeeming is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)

Delivery of documents to shareholders

To control mailing and printing costs, the fund will deliver a single prospectus, annual or semi-annual report or other shareholder information (“shareholder documents”) to persons who have a common address and who have effectively consented to such delivery. This form of delivery is referred to as “householding.”

The fund will assume that you consent to householding of shareholder documents unless you checked the appropriate box on the Account Application indicating that you do not consent or by sending a note to that effect to Dreyfus Premier Balanced Opportunity Fund — Class J, c/o U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, Wisconsin 53202. You may revoke your consent to householding at any time by calling the fund at 1-800-999-0887 or by writing to the fund at the address provided above.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your redemption of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive upon redemption.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

STATEMENT OF ADDITIONAL INFORMATION
APRIL 1, 2004

This Statement of Additional Information ("SAI"), which is not a prospectus, supplements and should be read in conjunction with the current Prospectus of Dreyfus Premier Balanced Opportunity Fund, a separate series (the "Fund") of Dreyfus Premier Manager Funds II (the "Company"), as the Prospectus may be revised from time to time. To obtain a copy of the Fund's Prospectus dated April 1, 2004 for Class A, Class B, Class C, Class R and Class T shares (collectively, the "Dreyfus Premier Shares"), please call your financial adviser, or write to the Fund at 144 Glenn Curtiss Boulevard, Uniondale, New York 11556-0144, visit the Dreyfus.com website, or call 1-800-554-4611. To obtain a copy of the Fund's Prospectus dated April 1, 2004, for Class J shares, please write to the Fund c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, Wisconsin 53201-0701, or call 1-800-999-0887.

The Fund commenced operations upon the reorganization of Thompson Plumb Balanced Fund (the "Predecessor Fund") on January 30, 2004. The most recent Annual Report and Semi-Annual Report to Shareholders for the Predecessor Fund are separate documents supplied with this SAI, and the financial statements, accompanying notes and report of independent auditors appearing in the Annual Report are incorporated by reference into this SAI. Because the Fund had not commenced operations until January 30, 2004, it does not have its own performance record. The performance information provided for the Fund in this SAI represents the performance information of the Predecessor Fund.

DESCRIPTION OF THE COMPANY AND FUND

The Company is a Massachusetts business trust that commenced operations on January 30, 2004. The Fund is a separate series of the Company, an open-end management investment company, known as a mutual fund. The Fund is diversified, which means that, with respect to 75% of its total assets, the Fund will not invest more than 5% of its assets in the securities of any single issuer, nor hold more than 10% of the outstanding voting securities of any single issuer (other than, in each case, securities of other investment companies, and securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities).

The Dreyfus Corporation (the "Manager") serves as the Fund's investment adviser. The Manager has engaged Wisconsin Capital Management, Inc., formerly known as Thompson Plumb & Associates, Inc. (the "Sub-Adviser"), to serve as the Fund's sub-investment adviser and to provide day-to-day management of the Fund's investments, subject to the supervision of the Manager. The Manager and Sub-Adviser are referred to collectively as the "Advisers."

Dreyfus Service Corporation (the "Distributor") is the distributor of the Fund's shares.

Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Common and Preferred Stocks. Stocks represent shares of ownership in a company. Generally, preferred stock has a specified dividend and ranks after bonds and before common stocks in its claim on income for dividend payments and on assets should the company be liquidated. After other claims are satisfied, common stockholders participate in company profits on a pro-rata basis; profits may be paid out in dividends or reinvested in the company to help it grow. Increases and decrease in earnings are usually reflected in a company's stock price, so common stocks generally have the greatest appreciation and depreciation potential of all corporate securities. While most preferred stocks pay a dividend, the Fund may purchase preferred stock where the issuer has omitted, or is in danger of omitting, payment of its dividend. Such investments would be made primarily for their capital appreciation potential. The Fund may purchase trust preferred securities which are preferred stocks issued by a special purpose trust subsidiary backed by subordinated debt of the corporate parent. These securities typically bear a market rate coupon comparable to interest rates available on debt of a similarly rated company. Holders of the trust preferred securities have limited voting rights to control the activities of the trust and no voting rights with respect to the parent company.

Corporate Debt Securities. Corporate debt securities include corporate bonds, debentures, notes and other similar instruments, including certain convertible securities. Debt securities may be acquired with warrants attached. Corporate income-producing securities also may include forms of preferred or preference stock. The rate of interest on a corporate debt security may be fixed, floating or variable, and may vary inversely with respect to a reference rate. The rate of return or return of principal on some debt obligations may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Variable and Floating Rate Securities. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment

index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be event based, such as based on a change in the prime rate.

The Fund may invest in floating rate debt instruments ("floaters"). The interest rate on a floater is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. The interest rate on a floater resets periodically, typically every six months. Because of the interest rate reset feature, floaters provide the Fund with a certain degree of protection against rises in interest rates, although the Fund will participate in any declines in interest rates as well.

The Fund also may invest in inverse floating rate debt instruments ("inverse floaters"). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed or inversely to a multiple of the applicable index. An inverse floating rate security may exhibit greater price volatility than a fixed rate obligation of similar credit quality.

Convertible Securities. Convertible securities may be converted at either a stated price or stated rate into underlying shares of common stock. Convertible securities have characteristics similar to both fixed-income and equity securities. Convertible securities generally are subordinated to other similar but non-convertible securities of the same issuer, although convertible bonds, as corporate debt obligations, enjoy seniority in right of payment to all equity securities, and convertible preferred stock is senior to common stock, of the same issuer. Because of the subordination feature, however, convertible securities typically have lower ratings than similar non-convertible securities.

Although to a lesser extent than with fixed-income securities, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stock. A unique feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

Convertible securities provide for a stable stream of income with generally higher yields than common stocks, but there can be no assurance of current income because the issuers of the convertible securities may default on their obligations. A convertible security, in addition to providing fixed income, offers the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. There can be no assurance of capital appreciation, however, because securities prices fluctuate. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality because of the potential for capital appreciation.

The Fund may invest in so-called "synthetic convertible securities," which are comprised of two or more different securities, each with its own market value, whose investment characteristics, taken together, resemble those of convertible securities. For example, the Fund

may purchase a non-convertible debt security and a warrant or option. The "market value" of a synthetic convertible is the sum of the values of its fixed income component and its convertible component. For this reason, the values of a synthetic convertible and a true convertible security may respond differently to market fluctuations.

Warrants. A warrant is a form of derivative that gives the holder the right to subscribe to a specified amount of the issuing corporation's capital stock at a set price for a specified period of time. The Fund may invest up to 5% of its net assets in warrants, except that this limitation does not apply to warrants purchased by the Fund that are sold in units with, or attached to, other securities.

Zero Coupon, Pay-in-Kind and Step-up Securities. The Fund may invest in zero coupon U.S. Treasury securities, which are Treasury Notes and Bonds that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interests in such stripped debt obligations and coupons. Zero coupon securities also are issued by corporations and financial institutions which constitute a proportionate ownership of the issuer's pool of underlying U.S. Treasury securities. A zero coupon security pays no interest to its holders during its life and is sold at a discount to its face value at maturity. The Fund may invest in pay-in-kind bonds which are bonds which generally pay interest through the issuance of additional bonds. The Fund also may purchase step-up coupon bonds which are debt securities which typically do not pay interest for a specified period of time and then pay interest at a series of different rates. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of securities that pay interest periodically having similar maturities and credit qualities. In addition, unlike bonds that pay cash interest throughout the period to maturity, the Fund will realize no cash until the cash payment date unless a portion of such securities are sold and, if the issuer defaults, the Fund may obtain no return at all on its investment. Federal income tax law requires the holder of a zero coupon security or of certain pay-in-kind or step-up bonds to accrue income with respect to these securities prior to the receipt of cash payments. To maintain its qualification as a regulated investment company and avoid liability for Federal income taxes, the Fund may be required to distribute such income accrued with respect to these securities and may have to dispose of portfolio securities under disadvantageous circumstances in order to generate cash to satisfy these distribution requirements. See "Dividends, Distributions and Taxes."

Inflation-Indexed Bonds. The Fund may invest in inflation-indexed bonds, such as Treasury Inflation-Protection Securities ("TIPS"), which are fixed-income securities whose value is periodically adjusted according to the rate of inflation. Two structures are common. The U.S. Treasury and some other issuers utilize a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the Consumer Price Index ("CPI") accruals as part of a semiannual coupon.

Inflation-indexed securities issued by the U.S. Treasury have varying maturities and pay interest on a semi-annual basis equal to a fixed percentage of the inflation-adjusted principal amount. If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed and will fluctuate. The Fund also may invest in other inflation-related bonds which may or may not provide a similar guarantee. If a guarantee

of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rate of inflation rises at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds. Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the Consumer Price Index for Urban Consumers ("CPI-U"), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

U.S. Government Securities. The Fund may invest in U.S. Treasury securities which include Treasury Bills, Treasury Notes and Treasury Bonds that differ in their interest rates, maturities and times of issuance. Treasury Bills have initial maturities of one year or less; Treasury Notes have initial maturities of one to ten years; and Treasury Bonds generally have initial maturities of greater than ten years. In addition to U.S. Treasury securities, the Fund, may invest in securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities. Some obligations issued or guaranteed by U.S. Government agencies and instrumentalities are supported by the full faith and credit of the U.S. Treasury; others by the right of the issuer to borrow from the Treasury; others by discretionary authority of the U.S. Government to purchase certain obligations of the agency or instrumentality; and others only by the credit of the agency or instrumentality. These securities bear fixed, floating or variable rates of interest. While the U.S. Government currently provides financial support to such U.S. Government-sponsored agencies or instrumentalities, no assurance can be given that it will always do so, since it is not so obligated by law.

Mortgage-Related Securities. Mortgage-related securities are a form of derivative collateralized by pools of commercial or residential mortgages. Pools of mortgage loans are assembled as securities for sale to investors by various governmental, government-related and private organizations. These securities may include complex instruments such as collateralized mortgage obligations and stripped mortgage-backed securities, mortgage pass-through securities, interests in real estate mortgage investment conduits ("REMICs"), adjustable rate mortgages, real estate investment trusts ("REITs"), including debt and preferred stock issued by REITS, as well

as other real estate-related securities, including those with fixed, floating and variable interest rates, those with interest rates based on multiples of changes in a specified index of interest rates and those with interest rates that change inversely to changes in interest rates, as well as those that do not bear interest. The Fund may invest up to 10% of its total assets in REITs and currently intends to limit its investment in other mortgage-related securities to no more than 5% of its net assets.

Residential Mortgage-Related Securities—The Fund may invest in mortgage-related securities representing participation interests in pools of one- to four-family residential mortgage loans issued or guaranteed by governmental agencies or instrumentalities, such as the Government National Mortgage Association ("GNMA"), the Federal National Mortgage Association ("FNMA") and the Federal Home Loan Mortgage Corporation ("FHLMC"), or issued by private entities. Residential mortgage-related securities may be issued using a variety of structures, including multi-class structures featuring senior and subordinated classes.

Mortgage-related securities issued by GNMA include GNMA Mortgage Pass-Through Certificates (also known as "Ginnie Maes") which are guaranteed as to the timely payment of principal and interest by GNMA and such guarantee is backed by the full faith and credit of the United States. GNMA certificates also are supported by the authority of GNMA to borrow funds from the U.S. Treasury to make payments under its guarantee. Mortgage-related securities issued by FNMA include FNMA Guaranteed Mortgage Pass-Through Certificates (also known as "Fannie Maes") which are solely the obligations of FNMA and are not backed by or entitled to the full faith and credit of the United States. Fannie Maes are guaranteed as to timely payment of principal and interest by FNMA.

Mortgage-related securities issued by FHLMC include FHLMC Mortgage Participation Certificates (also known as "Freddie Macs" or "PCs"). Freddie Macs are not guaranteed by the United States or by any Federal Home Loan Bank and do not constitute a debt or obligation of the United States or of any Federal Home Loan Bank. Freddie Macs entitle the holder to timely payment of interest, which is guaranteed by FHLMC. FHLMC guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. When FHLMC does not guarantee timely payment of principal, FHLMC may remit the amount due on account of its guarantee of ultimate payment of principal at any time after default on an underlying mortgage, but in no event later than one year after it becomes payable.

Commercial Mortgage-Related Securities—Commercial mortgage-related securities generally are multi-class debt or pass-through certificates secured by mortgage loans on commercial properties. These mortgage-related securities generally are structured to provide protection to the holders of senior classes against potential losses on the underlying mortgage loans. This protection generally is provided by having the holders of subordinated classes of securities ("Subordinated Securities") take the first loss if there are defaults on the underlying commercial mortgage loans. Other protection, which may benefit all of the classes or particular classes, may include issuer guarantees, reserve funds, additional Subordinated Securities, cross-collateralization and over-collateralization.

Subordinated Securities—The Fund may invest in Subordinated Securities issued or sponsored by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other non-governmental issuers. Subordinated Securities have no governmental guarantee, and are subordinated in some manner as to the payment of principal and/or interest to the holders of more senior mortgage-related securities arising out of the same

pool of mortgages. The holders of Subordinated Securities typically are compensated with a higher stated yield than are the holders of more senior mortgage-related securities. On the other hand, Subordinated Securities typically subject the holder to greater risk than senior mortgage-related securities and tend to be rated in a lower rating category, and frequently a substantially lower rating category, than the senior mortgage-related securities issued in respect of the same pool of mortgage. Subordinated Securities generally are likely to be more sensitive to changes in prepayment and interest rates and the market for such securities may be less liquid than is the case for traditional fixed-income securities and senior mortgage-related securities.

Collateralized Mortgage Obligations ("CMOs") and Multi-Class Pass-Through-Securities—A CMO is a multiclass bond backed by a pool of mortgage pass-through certificates or mortgage loans. CMOs may be collateralized by (a) Ginnie Mae, Fannie Mae, or Freddie Mac pass-through certificates, (b) unsecuritized mortgage loans insured by the Federal Housing Administration or guaranteed by the Department of Veterans' Affairs, (c) unsecuritized conventional mortgages, (d) other mortgage-related securities, or (e) any combination thereof.

Each class of CMOs, often referred to as a "tranche," is issued at a specific coupon rate and has a stated maturity or final distribution date. Principal prepayments on collateral underlying a CMO may cause it to be retired substantially earlier than the stated maturities or final distribution dates. The principal and interest on the underlying mortgages may be allocated among the several classes of a series of a CMO in many ways. One or more tranches of a CMO may have coupon rates which reset periodically at a specified increment over an index, such as the London Interbank Offered Rate ("LIBOR") (or sometimes more than one index). These floating rate CMOs typically are issued with lifetime caps on the coupon rate thereon. The Fund also may invest in inverse floating rate CMOs. Inverse floating rate CMOs constitute a tranche of a CMO with a coupon rate that moves in the reverse direction to an applicable index such as LIBOR. Accordingly, the coupon rate thereon will increase as interest rates decrease. Inverse floating rate CMOs are typically more volatile than fixed or floating rate tranches of CMOs.

Many inverse floating rate CMOs have coupons that move inversely to a multiple of the applicable indexes. The effect of the coupon varying inversely to a multiple of an applicable index creates a leverage factor. Inverse floaters based on multiples of a stated index are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and loss of principal. The markets for inverse floating rate CMOs with highly leveraged characteristics at times may be very thin. The Fund's ability to dispose of its positions in such securities will depend on the degree of liquidity in the markets for such securities. It is impossible to predict the amount of trading interest that may exist in such securities, and therefore the future degree of liquidity.

Stripped Mortgage-Backed Securities—The Fund also may invest in stripped mortgage-backed securities which are created by segregating the cash flows from underlying mortgage loans or mortgage securities to create two or more new securities, each with a specified percentage of the underlying security's principal or interest payments. Mortgage securities may be partially stripped so that each investor class receives some interest and some principal. When securities are completely stripped, however, all of the interest is distributed to holders of one type of security, known as an interest-only security, or IO, and all of the principal is distributed to holders of another type of security known as a principal-only security, or PO. Strips can be created in a pass-through structure or as tranches of a CMO. The yields to maturity on IOs and POs are very sensitive to the rate of principal payments (including prepayments) on the related underlying mortgage assets. If the underlying mortgage assets experience greater than

anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IOs. Conversely, if the underlying mortgage assets experience less than anticipated prepayments of principal, the yield on POs could be materially and adversely affected.

Real Estate Investment Trusts—A REIT is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the "Code"). The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level Federal income tax and making the REIT a pass-through vehicle for Federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

REITs are characterized as equity REITs, mortgage REITs and hybrid REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depends upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs combine the characteristics of both equity and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate. The value of securities issued by REITs are affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for tax-free status under the Code or to maintain exemption from the Investment Company Act of 1940, as amended (the "1940 Act").

Adjustable-Rate Mortgage Loans ("ARMs")—ARMs eligible for inclusion in a mortgage pool will generally provide for a fixed initial mortgage interest rate for a specified period of time, generally for either the first three, six, twelve, thirteen, thirty-six, or sixty scheduled monthly payments. Thereafter, the interest rates are subject to periodic adjustment based on changes in an index. ARMs typically have minimum and maximum rates beyond which the mortgage interest rate may not vary over the lifetime of the loans. Certain ARMs provide for additional limitations on the maximum amount by which the mortgage interest rate may adjust for any single adjustment period. Negatively amortizing ARMs may provide limitations on changes in the required monthly payment. Limitations on monthly payments can result in monthly payments that are greater or less than the amount necessary to amortize a negatively amortizing ARM by its maturity at the interest rate in effect during any particular month.

Private Entity Securities—These mortgage-related securities are issued by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other non-governmental issuers. Timely payment of principal and interest on mortgage-related securities backed by pools created by non-governmental issuers often is supported partially by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance. The insurance and guarantees are issued by government entities, private insurers and the mortgage poolers. There can be no assurance that the private insurers or mortgage poolers can meet their obligations under the policies, so that if the issuers default on their obligations the

holders of the security could sustain a loss. No insurance or guarantee covers the Fund or the price of the Fund's shares. Mortgage-related securities issued by non-governmental issuers generally offer a higher rate of interest than government-agency and government-related securities because there are no direct or indirect government guarantees of payment.

Other Mortgage-Related Securities—Other mortgage-related securities include securities other than those described above that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property, including CMO residuals. Other mortgage-related securities may be equity or debt securities issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, homebuilders, mortgage banks, commercial banks, investment banks, partnerships, trusts and special purpose entities of the foregoing.

Asset-Backed Securities. Asset-backed securities are a form of derivative. The securitization techniques used for asset-backed securities are similar to those used for mortgage-related securities. These securities include debt securities and securities with debt-like characteristics. The collateral for these securities has included home equity loans, automobile and credit card receivables, boat loans, computer leases, airplane leases, mobile home loans, recreational vehicle loans and hospital account receivables. The Fund may invest in these and other types of asset-backed securities that may be developed in the future.

Asset-backed securities present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may provide the Fund with a less effective security interest in the related collateral than do mortgage-backed securities. Therefore, there is the possibility that recoveries on the underlying collateral may not, in some cases, be available to support payments on these securities.

Depository Receipts. The Fund may invest in the securities of foreign issuers in the form of American Depositary Receipts and American Depositary Shares (collectively, "ADRs") and Global Depositary Receipts and Global Depositary Shares (collectively, "GDRs") and other forms of depository receipts. These securities may not necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by a United States bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. GDRs are receipts issued outside the United States typically by non-United States banks and trust companies that evidence ownership of either foreign or domestic securities. Generally, ADRs in registered form are designed for use in the United States securities markets and GDRs in bearer form are designed for use outside the United States.

These securities may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities.

Investment Companies. The Fund may invest in securities issued by other investment companies. Under the 1940 Act, the Fund's investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund's total assets with respect to any one investment company and (iii)

10% of the Fund's total assets in the aggregate. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. The Fund also may invest its uninvested cash reserves or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund's securities lending program in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above, except that the Fund's aggregate investment of uninvested cash reserves in such money market funds may not exceed 25% of its total assets. See "Lending Portfolio Securities."

Illiquid Securities. The Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund's investment objective. These securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, repurchase agreements providing for settlement in more than seven days after notice and certain privately negotiated, non-exchange traded options and securities used to cover such options. As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

Money Market Instruments. When the Sub-Adviser determines that adverse market conditions exist, the Fund may adopt a temporary defensive position and invest up to 100% of its assets in money market instruments, including U.S. Government securities, repurchase agreements, bank obligations and commercial paper. The Fund also may purchase money market instruments when it has cash reserves or in anticipation of taking a market position.

Repurchase Agreements. For the purposes of maintaining liquidity and achieving income, the Fund may enter into repurchase agreements with domestic commercial banks or registered broker-dealers. A repurchase agreement is a contract under which the Fund would acquire a security for a relatively short period (usually not more than one week) subject to the obligation of the seller to repurchase and the Fund to resell such security at a fixed time and price (representing the Fund's cost plus interest). In the case of repurchase agreements with broker-dealers, the value of the underlying securities (or collateral) will be at least equal at all times to the total amount of the repurchase obligation, including the interest factor. The Fund bears a risk of loss if the other party to a repurchase agreement defaults on its obligations and the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities. This risk includes the risk of procedural costs or delays in addition to a loss on the securities if their value should fall below their repurchase price. The Fund currently intends to limit the entry into repurchase agreements (other than for temporary defensive purposes) to no more than 5% of the Fund's net assets.

Investment Techniques

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Foreign Currency Transactions. The Fund may enter into foreign currency transactions for a variety of purposes, including: to fix in U.S. dollars, between trade and settlement date, the value of a security the Fund has agreed to buy or sell; to hedge the U.S. dollar value of securities

the Fund already owns, particularly if it expects a decrease in the value of the currency in which the foreign security is denominated; or to gain exposure to the foreign currency in an attempt to realize gains.

Foreign currency transactions may involve, for example, the Fund's purchase of foreign currencies for U.S. dollars or the maintenance of short positions in foreign currencies. A short position would involve the Fund agreeing to exchange an amount of a currency it did not currently own for another currency at a future date in anticipation of a decline in the value of the currency sold relative to the currency the Fund contracted to receive. The Fund's success in these transactions will depend principally on the ability of the Sub-Adviser to predict accurately the future exchange rates between foreign currencies and the U.S. dollar.

Currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors, as seen from an international perspective. Currency exchange rates also can be affected unpredictably by intervention, or failure to intervene, by U.S. or foreign governments or central banks, or by currency controls or political developments in the United States or abroad.

Borrowing Money. The Fund is permitted to borrow to the extent permitted under the 1940 Act, which permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. The Fund, however, currently intends to borrow money only for temporary or emergency (not leveraging) purposes. While such borrowings exceed 5% of the Fund's total assets, the Fund will not make any additional investments.

Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements with banks, broker/dealers or other financial institutions. This form of borrowing involves the transfer by the Fund of an underlying debt instrument in return for cash proceeds based on a percentage of the value of the security. The Fund retains the right to receive interest and principal payments on the security. At an agreed upon future date, the Fund repurchases the security at principal plus accrued interest. As a result of these transactions, the Fund is exposed to greater potential fluctuations in the value of its assets and its net asset value per share. To the extent the Fund enters into a reverse repurchase agreement, the Fund will segregate permissible liquid assets at least equal to the aggregate amount of its reverse repurchase obligations, plus accrued interest, in certain cases, in accordance with releases promulgated by the Securities and Exchange Commission. The Securities and Exchange Commission views reverse repurchase transactions as collateralized borrowings by the Fund. Except for these transactions, the Fund's borrowings generally will be unsecured.

Lending Portfolio Securities. The Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund's investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund's total assets (including the value of all assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least

100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The Fund may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Derivatives. The Fund may invest in, or enter into, derivatives for a variety of reasons, including to hedge certain market or interest rate risks, to provide a substitute for purchasing or selling particular securities or to increase potential income gain. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, and related indexes. Examples of derivative instruments include options contracts, futures contracts, options on futures contracts, credit derivatives, mortgage-related securities and asset-backed securities. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to invest than "traditional" securities would. The Fund's portfolio managers may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by a Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance.

If the Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund's return or result in a loss. The Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. In contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default.

Accordingly, the Advisers will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as they would review the credit quality of a security to be purchased by the Fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Neither the Company nor the Fund will be a commodity pool. In addition, as a registered investment company, the Company has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility for an exclusion from the definition of commodity pool operator and, therefore, the Company is not subject to registration or regulation as a pool operator under the Commodity Exchange Act.

Futures Transactions—In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. Transaction costs also are included in these calculations.

The Fund may enter into futures contracts in U.S. domestic markets or on exchanges located outside the United States. Foreign markets may offer advantages such as trading opportunities or arbitrage possibilities not available in the United States. Foreign markets, however, may have greater risk potential than domestic markets. For example, some foreign exchanges are principal markets so that no common clearing facility exists and an investor may look only to the broker for performance of the contract. In addition, any profits that the Fund might realize in trading could be eliminated by adverse changes in the currency exchange rate, or the Fund could incur losses as a result of those changes. Transactions on foreign exchanges may include commodities which are traded on domestic exchanges or those which are not. Unlike trading on domestic commodity exchanges, trading on foreign commodity exchanges is not regulated by the Commodity Futures Trading Commission.

Engaging in these transactions involves risk of loss to the Fund which could adversely affect the value of the Fund's net assets. Although the Fund intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for

several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures by the Fund also is subject to the Sub-Adviser's ability to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Pursuant to regulations and/or published positions of the Securities and Exchange Commission, the Fund may be required to segregate permissible liquid assets to cover its obligations relating to its transactions in derivatives. To maintain this required cover, the Fund may have to sell portfolio securities at disadvantageous prices or times since it may not be possible to liquidate a derivative position at a reasonable price. In addition, the segregation of such assets will have the effect of limiting the Fund's ability otherwise to invest those assets.

Specific Futures Transactions. The Fund may purchase and sell stock index futures contracts. A stock index future obligates the Fund to pay or receive an amount of cash equal to a fixed dollar amount specified in the futures contract multiplied by the difference between the settlement price of the contract on the contract's last trading day and the value of the index based on the stock prices of the securities that comprise it at the opening of trading in such securities on the next business day.

The Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

The Fund may purchase and sell currency futures. A foreign currency future obligates the Fund to purchase or sell an amount of a specific currency at a future date at a specific price.

Credit Derivatives. The Fund may engage in credit derivative transactions, such as those involving default price risk derivatives and market spread derivatives. Default price risk derivatives are linked to the price of reference securities or loans after a default by the issuer or borrower, respectively. Market spread derivatives are based on the risk that changes in market factors, such as credit spreads, can cause a decline in the value of a security, loan or index. There are three basic transactional forms for credit derivatives: swaps, options and structured instruments. The use of credit derivatives is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If the Sub-Adviser is incorrect in its forecasts of default risks, market spreads or other applicable factors, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. Moreover, even if the Sub-Adviser is correct in its forecasts, there is a risk that a credit derivative position may correlate imperfectly with the price of the asset or liability being hedged. There is no limit on the amount of credit derivative transactions that may be entered into by the Fund. The Fund's risk of loss in a credit derivative transaction varies with the form of the transaction. For example, if the Fund purchases a default

option on a security, and if no default occurs with respect to the security, the Fund's loss is limited to the premium it paid for the default option. In contrast, if there is a default by the grantor of a default option, the Fund's loss will include both the premium it paid for the option and the decline in value of the underlying security that the default option hedged.

Options—In General. The Fund may purchase call and put options and write (i.e., sell) covered call and put option contracts. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by the Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction by segregating permissible liquid assets. A put option written by the Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. The Fund may purchase and sell call and put options in respect of specific securities (or groups or "baskets" of specific securities) or stock indices listed on national securities exchanges or traded in the over-the-counter market. An option on a stock index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the stock index upon which the option is based is greater than in the case of a call, or less than in the case of a put, the exercise price of the option. Thus, the effectiveness of purchasing or writing stock index options will depend upon price movements in the level of the index rather than the price of a particular stock.

The Fund may purchase and sell call and put options on foreign currency. These options convey the right to buy or sell the underlying currency at a price which is expected to be lower or higher than the spot price of the currency at the time the option is exercised or expires.

The Fund may purchase cash-settled options on interest rate swaps, interest rate swaps denominated in foreign currency and equity index swaps in pursuit of its investment objective. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (for example, an exchange of floating-rate payments for fixed-rate payments) denominated in U.S. dollars or foreign currency. Equity index swaps involve the exchange by the Fund with another party of cash flows based upon the performance of an index or a portion of an index of securities which usually includes dividends. A cash-settled option on a swap gives the purchaser the right, but not the obligation, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms.

Successful use by the Fund of options and options on futures will be subject to the Sub-Adviser's ability to predict correctly movements in the prices of individual stocks, the stock market generally, foreign currencies or interest rates. To the extent the Sub-Adviser's predictions are incorrect, the Fund may incur losses.

Future Developments. The Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in its Prospectus or this SAI.

Short-Selling. In these transactions, the Fund sells a security it does not own in anticipation of a decline in the market value of the security. To complete the transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is obligated to replace the security borrowed by purchasing it subsequently at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund, which would result in a loss or gain, respectively. The Fund also may make short sales "against the box," in which the Fund enters into a short sale of a security it owns.

Securities will not be sold short if, after effect is given to any such short sale, the total market value of all securities sold short would exceed 5% of the value of the Fund's net assets.

Until the Fund closes its short position or replaces the borrowed security, it will: (a) segregate permissible liquid assets in an amount that, together with the amount provided as collateral, always equals the current value of the security sold short; or (b) otherwise cover its short position.

Forward Roll Transactions. To enhance current income, the Fund may enter into forward roll transactions with respect to mortgage-related securities. The Fund will only enter into covered rolls. In a forward roll transaction, the Fund sells a mortgage-related security to a financial institution, such as a bank or broker-dealer, and simultaneously agrees to purchase a similar security from the institution at a later date at an agreed upon price. The securities that are purchased will bear the same interest rate as those sold, but generally will be collateralized by different pools of mortgages with different pre-payment histories than those sold. During the period between the sale and purchase, the Fund will not be entitled to receive interest and principal payments on the securities sold. Proceeds of the sale typically will be invested in short-term instruments, particularly repurchase agreements, and the income from these investments,

together with any additional fee income received on the sale will be expected to generate income for the Fund exceeding the yield on the securities sold. Forward roll transactions involve the risk that the market value of the securities sold by the Fund may decline below the purchase price of those securities. The Fund will segregate permissible liquid assets at least equal to the amount of the repurchase price (including accrued interest).

Forward Commitments. The Fund may purchase or sell securities on a forward commitment, when-issued or delayed-delivery basis, which means delivery and payment take place a number of days after the date of the commitment to purchase or sell the securities at a predetermined price and/or yield. Typically, no interest accrues to the purchaser until the security is delivered. When purchasing a security on a forward commitment basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its net asset value. Because the Fund is not required to pay for these securities until the delivery date, these risks are in addition to the risks associated with the Fund's other investments. If the Fund is fully or almost fully invested when forward commitment purchases are outstanding, such purchases may result in a form of leverage. The Fund intends to engage in forward commitments to increase its portfolio's financial exposure to the types of securities in which it invests. Leveraging the portfolio in this manner will increase the Fund's exposure to changes in interest rates and will increase the volatility of its returns. The Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Securities purchased on a forward commitment, when-issued or delayed-delivery basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities purchased on a forward commitment or when-issued or delayed-delivery basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a when-issued or delayed-delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed-delivery basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share. The Fund currently intends to limit its purchase of securities on a when-issued or delayed-delivery basis to no more than 5% of the Fund's net assets.

Certain Investment Considerations and Risks

Equity Securities. Equity securities, including common stocks, and certain preferred stocks, convertible securities and warrants, fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be pronounced. Changes in the value of the Fund's investments will result in changes in the value of its shares and thus the Fund's total return to investors.

The Fund may purchase equity securities of small capitalization companies. The stock prices of these companies may be subject to more abrupt or erratic market movements than the stocks of larger, more established companies, because these securities typically are traded in lower volume and the issuers typically are more subject to changes in earnings and prospects. The Fund, together with other investment companies advised by the Sub-Adviser or the Manager and its affiliates, may own significant positions in portfolio companies which, depending on

market conditions, may affect adversely the Fund's ability to dispose of some or all of its position should it desire to do so.

The Fund may purchase securities of companies that have no earnings or have experienced losses. The Fund generally will make these investments based on a belief that actual anticipated products or services will produce future earnings. If the anticipated event is delayed or does not occur, or if investor perception about the company changes, the company's stock price may decline sharply and its securities may become less liquid.

The Fund may purchase securities of companies in initial public offerings ("IPOs") or shortly thereafter. An IPO is a corporation's first offering of stock to the public. Shares are given a market value reflecting expectations for the corporation's future growth. Special rules of the National Association of Securities Dealers, Inc. ("NASD") apply to the distribution of IPOs. Corporations offering IPOs generally have limited operating histories and may involve greater investment risk. The prices of these companies' securities can be very volatile, rising and falling rapidly, sometimes based solely on investor perceptions rather than economic reasons.

The Fund may invest in securities issued by companies in the technology sector, which has been among the most volatile sectors of the stock market. Technology companies involve greater risk because their revenues and earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain technology companies may have limited product lines, markets or financial resources, or may depend on a limited management group. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of technology stocks than it does in other sectors. Fund investments made in anticipation of future products and services may decline dramatically in value if the anticipated products or services are delayed or canceled.

Fixed-Income Securities. The Fund will invest in fixed-income securities rated at the time of investment at least Baa by Moody's Investors Service, Inc. ("Moody's") or BBB by Standard & Poor's Ratings Services ("S&P") or Fitch Ratings ("Fitch" and together with Moody's and S&P, the "Rating Agencies") or, if unrated, deemed to be of comparable quality by the Sub-Adviser. Even though interest-bearing securities are investments which promise a stable stream of income, the prices of such securities are inversely affected by changes in interest rates and, therefore, are subject to the risk of market price fluctuations. The values of fixed-income securities also may be affected by changes in the credit rating or financial condition of the issuer. In addition, the Fund may invest up to 5% of its net assets in fixed-income securities rated below investment grade by the Rating Agencies, which may be subject to such risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated fixed-income securities. Certain securities that may be purchased by the Fund, such as those with interest rates that fluctuate directly or indirectly based on multiples of a stated index, are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and possibly loss of principal. The values of fixed-income securities also may be affected by changes in the credit rating or financial condition of the issuer. Once the rating of a portfolio security has been changed, the Fund will consider all circumstances deemed relevant in determining whether to continue to hold the security. See "Appendix" for a general description of the Rating Agencies' ratings.

High Yield-Lower Rated Securities. The Fund may invest up to 5% of its total assets in debt securities rated below Baa by Moody's and below BBB by S&P and Fitch, and as low as the lowest rating assigned by the Rating Agencies. Higher yielding (and, therefore, higher risk) securities may be subject to certain risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated securities. The retail secondary market for these securities may be less liquid than that of higher rated securities; adverse conditions could make it difficult at times for the Fund to sell certain securities or could result in lower prices than those used in calculating the Fund's net asset value.

Bond prices are inversely related to interest rate changes; however, bond price volatility also is inversely related to coupon. Accordingly, below investment grade securities may be relatively less sensitive to interest rate changes than higher quality securities of comparable maturity, because of their higher coupon. This higher coupon is what the investor receives in return for bearing greater credit risk. The higher credit risk associated with below investment grade securities potentially can have a greater effect on the value of such securities than may be the case with higher quality issues of comparable maturity, and will be a substantial factor in the Fund's relative share price volatility. Although ratings may be useful in evaluating the safety of interest and principal payments, they do not evaluate the market value risk of these securities. The Fund will rely on the Sub-Adviser's judgment, analysis and experience in evaluating the creditworthiness of an issuer.

Companies that issue certain of these securities often are highly leveraged and may not have available to them more traditional methods of financing. Therefore, the risk associated with acquiring the securities of such issuers generally is greater than is the case with the higher rated securities. For example, during an economic downturn or a sustained period of rising interest rates, highly leveraged issuers of these securities may not have sufficient revenues to meet their interest payment obligations. The issuer's ability to service its debt obligations also may be affected adversely by specific corporate developments, forecasts, or the unavailability of additional financing. The risk of loss because of default by the issuer is significantly greater for the holders of these securities because such securities generally are unsecured and often are subordinated to other obligations of the issuer.

Because there is no established retail secondary market for many of these securities, the Fund anticipates that such securities could be sold only to a limited number of dealers or institutional investors. To the extent a secondary trading market for these securities does exist, it generally is not as liquid as the secondary market for higher rated securities. The lack of a liquid secondary market may have an adverse impact on market price and yield and the Fund's ability to dispose of particular issues when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of a liquid secondary market for certain securities also may make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio and calculating its net asset value. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of these securities. In such cases, judgment may play a greater role in valuation because less reliable, objective data may be available.

These securities may be particularly susceptible to economic downturns. An economic recession could adversely affect the ability of the issuers of lower rated bonds to repay principal and pay interest thereon and increase the incidence of default for such securities. It is likely that

an economic recession also could disrupt severely the market for such securities and have an adverse impact on their value.

The Fund may acquire these securities during an initial offering. Such securities may involve special risks because they are new issues. The Sub-Adviser will review carefully the credit and other characteristics pertinent to such new issues.

The credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon bonds, pay-in-kind bonds and step-up bonds. In addition to the risks associated with the credit rating of the issuers, the market prices of these securities may be very volatile during the period no interest is paid.

Mortgage-Related Securities. Mortgage-related securities are subject to both credit and prepayment risk. Although they may provide opportunities for enhanced total return, you should be aware that the lower rated mortgage-related securities in which the Fund may invest are likely to be more volatile and less liquid, and more difficult to price accurately, than more traditional debt securities. These securities may be particularly susceptible to economic downturns. It is likely that an economic recession could disrupt severely the market for such securities and may have an adverse impact on the value of such securities.

Mortgage-related securities generally are subject to credit risks associated with the performance of the underlying mortgage properties and to prepayment risk. In certain instances, the credit risk associated with mortgage-related securities can be reduced by third party guarantees or other forms of credit support. Improved credit risk does not reduce prepayment risk that is unrelated to the rating assigned to the mortgage-related security. Prepayment risk can lead to fluctuations in value of the mortgage-related security that may be pronounced. If a mortgage-related security is purchased at a premium, all or part of the premium may be lost if there is a decline in the market value of the security, whether resulting from changes in interest rates or prepayments on the underlying mortgage collateral. Certain mortgage-related securities that may be purchased by the Fund, such as inverse floating rate collateralized mortgage obligations, have coupons that move inversely to a multiple of a specific index, which may result in a form of leverage. As with other interest-bearing securities, the prices of certain mortgage-related securities are inversely affected by changes in interest rates. However, although the value of a mortgage-related security may decline when interest rates rise, the converse is not necessarily true, since in periods of declining interest rates the mortgages underlying the security are more likely to be prepaid. For this and other reasons, a mortgage-related security's stated maturity may be shortened by unscheduled prepayments on the underlying mortgages, and, therefore, it is not possible to predict accurately the security's return to the Fund. Moreover, with respect to certain stripped mortgage-backed securities, if the underlying mortgage securities experience greater than anticipated prepayments of principal, the Fund may fail to fully recoup its initial investment even if the securities are rated in the highest rating category by a nationally recognized statistical rating organization. During periods of rapidly rising interest rates, prepayments of mortgage-related securities may occur at slower than expected rates. Slower prepayments effectively may lengthen a mortgage-related security's expected maturity which generally would cause the value of such security to fluctuate more widely in response to changes in interest rates. Were the prepayments on the Fund's mortgage-related securities to decrease broadly, the Fund's effective duration, and thus sensitivity to interest rate fluctuations, would increase. Commercial real property loans, however, often contain provisions that reduce the likelihood that such securities will be prepaid. The provisions generally impose significant

prepayment penalties on loans and in some cases there may be prohibitions on principal prepayments for several years following origination.

Foreign Securities. Foreign securities markets generally are not as developed or efficient as those in the United States. Securities of some foreign issuers are less liquid and more volatile than securities of comparable U.S. issuers. Similarly, volume and liquidity in most foreign securities markets are less than in the United States and, at times, volatility of price can be greater than in the United States.

Because evidences of ownership of foreign securities usually are held outside the United States, the Fund will be subject to additional risks, which include possible adverse political and economic developments, seizure or nationalization of foreign deposits and adoption of governmental restrictions that might adversely affect or restrict the payment of principal and interest on the foreign securities to investors located outside the country of the issuer, whether from currency blockage or otherwise. Foreign securities held by the Fund may trade on days when the Fund does not calculate its net asset value and thus may affect the Fund's net asset value or days when investors have no access to the Fund.

Developing countries have economic structures that are generally less diverse and mature, and political systems that are less stable, than those of developed countries. The markets of developing countries may be more volatile than the markets of more mature economies; however, such markets may provide higher rates of return to investors. Many developing countries providing investment opportunities for the Fund have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have adverse effects on the economies and securities markets of certain of these countries.

Since foreign securities often are purchased with and payable in currencies of foreign countries, the value of these assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in currency rates and exchange control regulations.

Simultaneous Investments. Investment decisions for the Fund are made independently from those of other investment companies advised by the Advisers. If, however, such other investment companies desire to invest in, or dispose of, the same securities as the Fund, the Advisers will ordinarily seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one investment company or account and available investments or opportunities for sales will be allocated equitably to each investment company. In some cases, this procedure may adversely affect the size of the position obtained for or disposed of by the Fund or the price paid or received by the Fund. The Fund, together with other investment companies advised by the Advisers and their affiliates, may own significant positions in portfolio companies that, depending on market conditions, may affect adversely the Fund's ability to dispose of some or all of its positions should it desire to do so.

Investment Restrictions

The Fund's investment objective is a fundamental policy, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. In addition, the Fund has adopted investment restrictions numbered 1 through 9 as fundamental policies, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. Investment

restrictions numbered 10 through 14 are not fundamental policies and may be changed by vote of a majority of the Company's Board members at any time. The Fund may not:

1. Invest more than 5% of its assets in the obligations of any single issuer, except that up to 25% of the value of the Fund's total assets may be invested, and securities issued or guaranteed by the U.S. Government, or its agencies or instrumentalities may be purchased, without regard to any such limitation.

2. Hold more than 10% of the outstanding voting securities of any single issuer. This Investment Restriction applies only with respect to 75% of the Fund's total assets.

3. Invest more than 25% of the value of its total assets in the securities of issuers in any single industry, provided that there shall be no limitation on the purchase of obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

4. Invest in physical commodities or commodities contracts, except that the Fund may purchase and sell options, forward contracts, futures contracts, including those related to indices, and options on futures contracts or indices and enter into swaps and other derivatives.

5. Purchase, hold or deal in real estate, or oil, gas or other mineral leases or exploration or development programs, but the Fund may purchase and sell securities that are secured by real estate or issued by companies that invest or deal in real estate or real estate investment trusts.

6. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowing to no more than 33-1/3% of the value of the Fund's total assets). For purposes of this Investment Restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.

7. Lend any securities or make loans to others, except to the extent permitted under the 1940 Act (which currently limits such loans to no more than 33-1/3% of the value of the Fund's total assets) or as otherwise permitted by the Securities and Exchange Commission. For purposes of this Investment Restriction, the purchase of debt obligations (including acquisitions of loans, loan participations or other forms of debt instruments) and the entry into repurchase agreements shall not constitute loans by the Fund. Any loans of portfolio securities will be made according to guidelines established by the Securities and Exchange Commission and the Company's Board.

8. Act as an underwriter of securities of other issuers, except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.

9. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except insofar as the Fund may be deemed to have issued a senior security by reason of borrowing money in accordance with the Fund's borrowing policies. For purposes of this Investment Restriction, collateral, escrow, or margin or other deposits with respect to the making of short sales, the purchase or sale of futures contracts or options, purchase or sale of forward foreign currency contracts, and the writing of options on securities are not deemed to be an issuance of senior security.

10. Purchase securities on margin, except for use of short-term credit necessary for clearance of purchases and sales of portfolio securities, but the Fund may make margin deposits in connection with transactions in options, forward contracts, futures contracts, and options on futures contracts, and except that effecting short sales will be deemed not to constitute a margin purchase for purposes of this Investment Restriction.

11. Invest in the securities of a company for the purpose of exercising management or control, but the Fund will vote the securities it owns in its portfolio as a shareholder in accordance with its views.

12. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities that are illiquid, if, in the aggregate, more than 15% of the value of the Fund's net assets would be so invested.

13. Purchase securities of other investment companies, except to the extent permitted under the 1940 Act.

14. Pledge, mortgage or hypothecate its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the purchase of securities on a when-issued, forward commitment or delayed-delivery basis and the deposit of assets in escrow in connection with writing covered put and call options and collateral and initial or variation margin arrangements with respect to permitted transactions.

If a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values or assets will not constitute a violation of such restriction. With respect to Investment Restriction No. 6, however, if borrowings exceed 33-1/3% of the value of the Fund's total assets as a result of changes in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

The Company and the Manager have received an exemptive order from the Securities and Exchange Commission, which, among other things, permits the Fund to use cash collateral received in connection with lending the Fund's securities and other uninvested cash to purchase shares of one or more registered money market funds advised by the Manager in excess of limitations imposed by the 1940 Act.

MANAGEMENT OF THE COMPANY

The Company's Board is responsible for the management and supervision of the Fund, and approves all significant agreements with those companies that furnish services to the Fund. These companies are as follows:

The Dreyfus Corporation	Investment Adviser
Wisconsin Capital Management, Inc.	Sub-Adviser
Dreyfus Service Corporation	Distributor
Dreyfus Transfer, Inc.	Transfer Agent for the Dreyfus Premier Shares
U.S. Bancorp Fund Services, LLC	Transfer Agent for Class J
Mellon Bank, N.A.	Custodian

Board Members of the Company¹

Board members of the Company, together with information as to their positions with the Company, principal occupations and other board memberships and affiliations, are shown below.

Name (Age) Position with Company (Since)	Principal Occupation During Past 5 Years	Other Board Memberships and Affiliations
Joseph S. DiMartino (60) Chairman of the Board (2003)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Levcor International, Inc., an apparel fabric processor, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i>
David P. Feldman (63) Board Member (2003)	Corporate Director and Trustee	BBH Mutual Funds Group (11 funds), <i>Director</i> The Jeffrey Company, a private investment company, <i>Director</i> QMED, a medical device company, <i>Director</i>
Ehud Houminer (63) Board Member (2003)	Executive-in-Residence at the Columbia Business School, Columbia University; Principal of Lear, Yavitz and Associates, a management consulting firm from 1996 to 2001	Avnet Inc., an electronics distributor, <i>Director</i> International Advisory Board to the MBA Program School of Management, Ben Gurion University, <i>Chairman</i> Explore Charter School, Brooklyn, NY <i>Chairman</i>
Gloria Messinger (73) Board Member (2003)	Arbitrator for American Arbitration Association and National Association of Securities Dealers, Inc.; Consultant in Intellectual Property	Yale Law School Fund, <i>Director</i> Theater for a New Audience, Inc., <i>Director</i> New York Women's Agenda Music Performance Trust Fund, <i>Director</i> Brooklyn Philharmonic, <i>Director</i>
T. John Szarkowski (77) Board Member (2003)	Consultant in Photography	Photography Department at The Museum of Modern Art, <i>Director Emeritus</i>

¹ None of the Board members are "interested persons" of the Company, as defined in the 1940 Act.

Name (Age) Position with Company (Since)	Principal Occupation During Past 5 Years	Other Board Memberships and Affiliations
Anne Wexler (73) Board Member (2003)	Chairman of the Wexler Group, consultants specializing in government relations and public affairs	Wilshire Mutual Funds (5 funds), <i>Director</i> Methanex Corporation, a methanol production company, <i>Director</i> Member of the Council of Foreign Relations Member of the National Park Foundation

Board members are elected to serve for an indefinite term. The Company has standing audit, nominating and compensation committees, each comprised of its Board members who are not "interested persons" of the Company, as defined in the 1940 Act. The function of the audit committee is to oversee the Company's financial and reporting policies and certain internal control matters; the function of the nominating committee is to select and nominate all candidates who are not "interested persons" of the Company for election to the Company's Board; and the function of the compensation committee is to establish the appropriate compensation for serving on the Board. The nominating committee does not normally consider nominees recommended by shareholders. The Company also has a standing pricing committee comprised of any one Board member. The function of the pricing committee is to assist in valuing the Fund's investments.

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2003.

	Joseph S. DiMartino	David P. Feldman	Ehud Houminer	Gloria Messinger	T. John Szarkowski	Anne Wexler
Dreyfus Premier Balanced Opportunity Fund	None	None	None	None	None	None
Aggregate Holdings of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member	Over \$100,000	\$50,001- \$100,000	Over \$100,000	\$50,001- \$100,000	\$10,001 - \$50,000	None

As of December 31, 2003, none of the Board members or their immediate family members owned securities of the Manager, the Sub-Adviser, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager, the Sub-Adviser or the Distributor.

The Company currently pays its Board members its allocated portion of an annual retainer of \$25,000 and a per meeting fee of \$4,000 (with a minimum of \$500 per meeting and per telephone meeting) attended for the Company and four other funds (comprised of twenty portfolios) in the Dreyfus Family of Funds, and reimburses them for their expenses. The Chairman of the Board receives an additional 25% of such compensation. Emeritus Board members, if any, are entitled to receive an annual retainer and a per meeting attended fee of one-half the amount paid to them as Board members. The aggregate amount of compensation

estimated to be paid to each Board member for the fiscal year ending September 30, 2004, and paid by all funds in the Dreyfus Family of Funds for which such person is a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) for the year ended December 31, 2003, was as follows:

Name of Board Member	Aggregate Estimated Compensation From the Company*	Total Compensation From the Company and Fund Complex Paid to Board Member(**)
Joseph S. DiMartino	\$675	\$800,306 (191)
David P. Feldman	\$540	\$166,000 (53)
Ehud Houminer	\$540	\$94,494 (25)
Gloria Messinger	\$540	\$45,500 (18)
T. John Szarkowski	\$540	\$45,500 (18)
Anne Wexler	\$540	\$80,000 (29)

* Amount does not include reimbursed expenses for attending Board meetings, which are estimated to amount to \$510 for all Board members as a group.

** Represents the number of separate portfolios comprising the investment companies in the Fund Complex, including the Fund, for which the Board member serves.

Officers of the Company

STEPHEN E. CANTER, President since September, 2003. Chairman of the Board, Chief Executive Officer, and Chief Operating Officer of the Manager, and an officer of 96 investment companies (comprised of 186 portfolios) managed by the Manager. Mr. Canter also is a Board member and, where applicable, an Executive Committee Member of the other investment management subsidiaries of Mellon Financial Corporation, each of which is an affiliate of the Manager. He is 58 years old and has been an employee of the Manager since May 1995.

STEPHEN R. BYERS, Executive Vice President since September, 2003. Chief Investment Officer, Vice Chairman and a director of the Manager, and an officer of 96 investment companies (comprised of 186 portfolios) managed by the Manager. Mr. Byers also is an officer, director or an Executive Committee Member of certain other investment management subsidiaries of Mellon Financial Corporation, each of which is an affiliate of the Manager. He is 50 years old and has been an employee of the Manager since January 2000. Prior to joining the Manager, he served as an Executive Vice President – Capital Markets, Chief Financial Officer and Treasurer at Gruntal & Co., L.L.C.

MARK N. JACOBS, Vice President since September, 2003. Executive Vice President, Secretary and General Counsel of the Manager, and an officer of 97 investment companies (comprised of 202 portfolios) managed by the Manager. He is 57 years old and has been an employee of the Manager since June 1977.

JEFF PRUSNOFSKY, Secretary since September, 2003. Associate General Counsel of the Manager, and an officer of 25 investment companies (comprised of 82 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Manager since October 1990.

MICHAEL A. ROSENBERG, Assistant Secretary since September, 2003. Associate General Counsel of the Manager, and an officer of 94 investment companies (comprised of 195 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since October 1991.

STEVEN F. NEWMAN, Assistant Secretary since September, 2003. Assistant Secretary and Associate General Counsel of the Manager, and an officer of 97 investment companies (comprised of 202 portfolios) managed by the Manager. He is 54 years old and has been an employee of the Manager since July 1980.

JAMES WINDELS, Treasurer since September, 2003. Director Mutual Fund Accounting of the Manager, and an officer of 97 investment companies (comprised of 202 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since April 1985.

KENNETH J. SANDGREN, Assistant Treasurer since September, 2003. Mutual Fund Tax Director of the Manager, and an officer of 97 investment companies (comprised of 202 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since June 1993.

RICHARD CASSARO, Assistant Treasurer since September, 2003. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 26 investment companies (comprised of 102 portfolios) managed by the Manager. He is 44 years old and has been an employee of the Manager since September 1982.

ROBERT SVAGNA, Assistant Treasurer since September, 2003. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 26 investment companies (comprised of 102 portfolios) managed by the Manager. He is 36 years old and has been an employee of the Manager since November 1990.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since September, 2003. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 92 investment companies (comprised of 197 portfolios) managed by the Manager. He is 33 years old and has been an employee of the Distributor since October 1998.

The address of each Board member and officer of the Company is 200 Park Avenue, New York, New York 10166.

The Company's Board members and officers, as a group, owned less than 1% of the Fund's shares outstanding on March 5, 2004.

MANAGEMENT ARRANGEMENTS

Investment Adviser. The Manager is a wholly-owned subsidiary of Mellon Financial Corporation ("Mellon"). Mellon is a global financial holding company incorporated under Pennsylvania law in 1971 and registered under the Federal Bank Holding Company Act of 1956, as amended. Mellon provides a comprehensive range of financial products and services in domestic and selected international markets.

The Manager supervises investment management of the Fund pursuant to a Management Agreement (the "Agreement") between the Company and the Manager. As to the Fund, the Agreement continues until January 30, 2006 and thereafter is subject to annual approval by (i) the Company's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Company's Board members who are not "interested persons" (as defined in the 1940 Act) of the Company or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. As to the Fund, the Agreement is terminable without penalty, on 60 days' notice, by the Company's Board or by vote of the holders of a majority of the Fund's shares, or, on not less than 90 days' notice, by the Manager. The Agreement will terminate automatically, as to the Fund, in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of the Manager: Stephen E. Canter, Chairman of the Board, Chief Executive Officer, and Chief Operating Officer; Michael G. Millard, President and a director; Stephen R. Byers, Chief Investment Officer, Vice Chairman and a director; J. Charles Cardona, Vice Chairman and a director; Lawrence S. Kash, Vice Chairman; J. David Officer, Vice Chairman and a director; Ronald P. O'Hanley III, Vice Chairman and a director; Diane P. Durnin, Executive Vice President; Mark N. Jacobs, Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President—Corporate Communications; Mary Beth Leibig, Vice President—Human Resources; Theodore A. Schachar, Vice President—Tax; Angela E. Price, Vice President; Wendy H. Strutt, Vice President; Ray Van Cott, Vice President—Information Systems; William H. Maresca, Controller; James Bitetto, Assistant Secretary; Steven F. Newman, Assistant Secretary; and Steven G. Elliott, David F. Lamere, Martin G. McGuinn and Richard W. Sabo, directors.

The Manager maintains office facilities on behalf of the Fund, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Company. The Manager may pay the Distributor for shareholder services from the Manager's own assets, including past profits but not including the management fee paid by the Fund. The Distributor may use part or all of such payments to pay Service Agents (as defined below) in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

Sub-Investment Adviser. The Sub-Adviser provides investment advisory assistance and day-to-day management of the Fund's investments pursuant to the Sub-Investment Advisory Agreement (the "Sub-Advisory Agreement") between the Sub-Adviser and the Manager. As to the Fund, the Sub-Advisory Agreement is subject to annual approval by (i) the Company's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Company's Board members who are not "interested persons" (as defined in the 1940 Act) of the Company or the Advisers, by vote cast in person at a meeting called for the purpose of voting on such approval. As to the Fund, the Sub-Advisory Agreement is terminable without penalty (i) by the Manager on 60 days' notice, (ii) by the Company's Board or by vote of the holders of a majority of the Fund's shares on 60 days' notice, or (iii) by the Sub-Adviser on not less than 90 days' notice. The Sub-Advisory Agreement will terminate automatically, as to the Fund, in the event of its assignment (as defined in the 1940 Act) or upon the termination of the Management Agreement for any reason.

Thomas G. Plumb owns all of the outstanding shares of the Sub-Adviser and serves as its President.

Portfolio Management. The Sub-Adviser provides day-to-day management of the Fund's investments in accordance with the stated policies of the Fund, subject to the supervision of the Manager and the approval of the Company's Board. The Manager and the Sub-Adviser provide the Fund with portfolio managers who are authorized by the Company's Board to execute purchases and sales of securities. The primary portfolio manager for the Fund is Thomas G. Plumb, with David B. Duchow, Timothy R. O'Brien and Clint A. Oppermann serving as associate portfolio managers. The Manager and the Sub-Adviser also maintain research departments with professional staffs of portfolio managers and securities analysts who provide research services for the Fund and other funds advised by the Manager and the Sub-Adviser.

Mellon and its affiliates may have deposit, loan and commercial banking or other relationships with the issuers of securities purchased by the Fund. The Manager has informed the Company that in making its investment decisions it does not obtain or use material inside information that Mellon or its affiliates may possess with respect to such issuers.

The Company, the Manager, the Sub-Adviser and the Distributor each have adopted a Code of Ethics that permits its personnel, subject to such respective Code of Ethics, to invest in securities, including securities that may be purchased or held by the Fund. The Manager's Code of Ethics subjects its employees' personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics and are also subject to the oversight of Mellon's Investment Ethics Committee. Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

In approving the Management Agreement and Sub-Advisory Agreement, the Board considered a number of factors, including the nature and quality of the services to be provided by the Manager and the Sub-Adviser; the investment philosophy and investment approach to be applied to the Fund by the Manager and the Sub-Adviser; the investment management expertise of the Manager and the Sub-Adviser in respect of the Fund's investment strategies; the personnel, resources and experience of the Manager and the Sub-Adviser; the Manager's and Sub-Adviser's expected costs of providing services under the Agreement and Sub-Advisory Agreement, respectively; the relationship between the fees paid to the Manager and Sub-Adviser under the Management Agreement and Sub-Advisory Agreement and the Company's Distribution Plan; and ancillary benefits the Manager and the Sub-Adviser may receive from their respective relationship with the Company.

Expenses. All expenses incurred in the operation of the Company are borne by the Company, except to the extent specifically assumed by the Manager or Sub-Adviser. The expenses borne by the Company include, without limitation: taxes, interest, loan commitment fees, interest and distributions paid on securities sold short, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager or Sub-Adviser or their affiliates, Securities and Exchange Commission fees and state Blue Sky qualification fees, advisory fees, charges of

custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of independent pricing services, costs of maintaining the Company's existence, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders, costs of shareholders' reports and meetings, and any extraordinary expenses. In addition, each class of shares bears any class specific expenses allocated to such class, such as expenses related to the distribution and/or shareholder servicing of such class. Class A, Class B, Class C and Class T shares of the Fund are subject to an annual shareholder services fee, and Class B, Class C and Class T shares of the Fund are subject to an annual distribution fee. See "Distribution Plan and Shareholder Service Plan."

As compensation for the Manager's services, the Fund has agreed to pay the Manager a monthly management fee at the annual rate of 0.80% of the value of the Fund's average daily net assets.

Under the Sub-Advisory Agreement, the Manager has agreed to pay the Sub-Adviser a monthly fee in the amount of 100% of the management fee paid by the Fund to the Manager for such month, less certain fees waived or expenses paid or reimbursed by the Manager, on the Fund's assets attributable to accounts of shareholders who have an adviser-client relationship with the Sub-Adviser (including the accounts of all shareholders of the Predecessor Fund as of the reorganization date who continue as shareholders of the Fund following the reorganization of the Predecessor Fund), plus, with respect to all other assets of the Fund, a monthly fee at the annual rate of 0.30% of the average daily net asset value of such assets up to \$300 million and 0.25% of the average daily net asset value of such assets in excess of \$300 million.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of the Fund's net assets increases.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager, located at 200 Park Avenue, New York, New York 10166, serves as the Fund's distributor on a best efforts basis pursuant to an agreement with the Company, which is renewable annually.

The Distributor compensates certain financial institutions (which may include banks), securities dealers ("Selected Dealers") and other industry professionals (collectively, "Service Agents") for selling Class A shares and Class T shares subject to a contingent deferred sales charge ("CDSC"), and Class B shares and Class C shares at the time of purchase from its own assets. The proceeds of the CDSC and fees pursuant to the Company's Distribution Plan (described below), in part, are used to defray these expenses. For purchases of Class A shares and Class T shares subject to a CDSC, the Distributor generally will pay Service Agents on new investments made through such Service Agents a commission of up to 1% of the amount invested. For purchases of Class B shares and Class C shares, the Distributor generally will pay Service Agents on new investments made through such Service Agents 4% and 1%, respectively, of the net asset value of such shares purchased by their clients.

The Distributor may pay Service Agents that have entered into agreements with the Distributor a fee based on the amount invested through such Service Agents in Fund shares by employees participating in qualified or non-qualified employee benefit plans, including pension, profit-sharing and other deferred compensation plans, whether established by corporations, partnerships, non-profit entities or state and local governments ("Retirement Plans"), or other

programs. The term "Retirement Plans" does not include IRAs, IRA "Rollover Accounts" or IRAs set up under Simplified Employee Pension Plan ("SEP-IRAs"). Generally, the Distributor may pay such Service Agents a fee of up to 1% of the amount invested through the Service Agents. The Distributor, however, may pay Service Agents a higher fee and reserves the right to cease paying these fees at any time. The Distributor will pay such fees from its own funds, other than amounts received from the Fund, including past profits or any other source available to it. Sponsors of such Retirement Plans or the participants therein should consult their Service Agent for more information regarding any such fee payable to the Service Agent.

The Distributor, at its expense, may provide promotional incentives to Service Agents that sell shares of funds advised by the Manager that are sold with a sales load, such as Class A and Class T shares of the Fund. In some instances, these incentives may be offered only to certain Service Agents who have sold or may sell significant amounts of shares.

Transfer and Dividend Disbursing Agents and Custodian. Dreyfus Transfer, Inc., a wholly-owned subsidiary of the Manager, 200 Park Avenue, New York, New York 10166, is the Company's transfer and dividend disbursing agent for the Dreyfus Premier Shares. U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Third Floor, Milwaukee, Wisconsin 53202, is the Company's transfer and dividend disbursing agent for Class J shares. Under separate transfer agency agreements with the Company, each Transfer Agent arranges for the maintenance of the relevant shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by the Fund. For these services, each Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses. The Transfer Agent for Class J shares receives a minimum annual payment of \$24,000.

Mellon Bank, N.A. (the "Custodian"), an affiliate of the Manager, One Mellon Bank Center, Pittsburgh, Pennsylvania 15258, acts as custodian for the investments of the Fund. The Custodian has no part in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund. Under a custody agreement with the Company, the Custodian holds the Fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of the Fund's assets held in custody and receives certain securities transaction charges.

HOW TO BUY SHARES

Dreyfus Premier Shares--General. Class A shares, Class B shares, Class C shares and Class T shares of the Fund may be purchased only by clients of certain Service Agents, except that full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Company's Board, or the spouse or minor child of any of the foregoing may purchase Class A shares directly through the Distributor. Subsequent purchases may be sent directly to the Transfer Agent or your Service Agent. Share certificates are issued only upon your written request. No certificates are issued for fractional shares. The Company reserves the right to reject any purchase order.

Class R shares are offered only to (i) bank trust departments and other financial service providers (including Mellon Bank, N.A. and its affiliates) acting on behalf of their customers having a qualified trust or investment account or relationship at such institution, or to customers

who have received and hold Class R shares of a Fund distributed to them by virtue of such an account or relationship, and (ii) institutional investors acting for themselves or in a fiduciary, advisory, agency, custodial or similar capacity for Retirement Plans and SEP-IRAs. Class R shares may be purchased for a Retirement Plan or SEP-IRA only by a custodian, trustee, investment manager or other entity authorized to act on behalf of such Retirement Plan or SEP-IRA. Institutions effecting transactions in Class R shares for the accounts of their clients may charge their clients direct fees in connection with such transactions.

When purchasing shares of the Fund, you must specify which Class is being purchased. Your Service Agent can help you choose the share class that is appropriate for your investment. The decision as to which Class of shares is most beneficial to you depends on a number of factors, including the amount and the intended length of your investment in the Fund. You should consider whether, during the anticipated life of your investment in the Fund, the accumulated Distribution Plan fee, Shareholder Services Plan fee and CDSC, if any, on Class B shares or Class C shares would be less than the accumulated Shareholder Services Plan fee and initial sales charge on Class A shares or the accumulated Distribution Plan fee, Shareholder Services Plan fee and initial sales charge on Class T shares, purchased at the same time, and to what extent, if any, such differential could be offset by the return on Class A shares and Class T shares, respectively. You may also want to consider whether, during the anticipated life of your investment in the Fund, the accumulated Distribution Plan fee, Shareholder Services Plan fee, and initial sales charge on Class T shares would be less than the accumulated Shareholder Services Plan fee and higher initial sales charge on Class A shares purchased at the same time, and to what extent, if any, such differential could be offset by the return of Class A. Additionally, investors qualifying for reduced initial sales charges who expect to maintain their investment for an extended period of time should consider purchasing Class A shares because the accumulated continuing Distribution Plan and Shareholder Services Plan fees on Class B shares or Class C shares and the accumulated Distribution Plan fee, Shareholder Services Plan fee and initial sales charge on Class T shares may exceed the accumulated Shareholder Services Plan fee and initial sales charge on Class A shares during the life of the investment. Finally, you should consider the effect of the CDSC period and any conversion rights of the Classes in the context of your own investment time frame. For example, while Class C shares have a shorter CDSC period than Class B shares, Class C shares do not have a conversion feature and, therefore, are subject to ongoing Distribution Plan and Shareholder Services Plan fees.

In many cases, neither the Distributor nor the Transfer Agent will have the information necessary to determine whether a quantity discount or reduced sales charge is applicable to a purchase. You or your Service Agent must notify the Distributor whenever a quantity discount or reduced sales charge is applicable to a purchase and must provide the Distributor with sufficient information at the time of purchase to verify that each purchase qualifies for the privilege or discount.

Service Agents may receive different levels of compensation for selling different Classes of shares. Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this SAI, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. Third parties may receive payments from the Manager in connection with their offering of Fund shares to their customers, or for marketing, distribution or other services. The receipt of such payments could create an incentive for the third party to offer the Fund instead of other mutual

funds where such payments are not received. You should consult your Service Agent in this regard.

The minimum initial investment in Dreyfus Premier Shares is \$1,000. Subsequent investments must be at least \$100. However, the minimum initial investment is \$750 for Dreyfus-sponsored Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs and rollover IRAs) and 403(b)(7) Plans with only one participant and \$500 for Dreyfus-sponsored Education Savings Accounts, with no minimum for subsequent purchases. The initial investment must be accompanied by the Account Application. The Company reserves the right to offer shares without regard to minimum purchase requirements to employees participating in certain Retirement Plans or other programs where contributions or account information can be transmitted in a manner and form acceptable to the Company. The Company reserves the right to vary further the initial and subsequent investment minimum requirements at any time.

The Code imposes various limitations on the amount that may be contributed to certain Retirement Plans. These limitations apply with respect to participants at the plan level and, therefore, do not directly affect the amount that may be invested in the Fund by a Retirement Plan. Participants and plan sponsors should consult their tax advisers for details.

Dreyfus Premier Shares also may be purchased through Dreyfus-Automatic Asset Builder[®], Dreyfus Payroll Savings Plan and Dreyfus Government Direct Deposit Privilege as described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

Fund shares are sold on a continuous basis. Net asset value per share of each Class is determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time), on each day the New York Stock Exchange is open for regular business. For purposes of determining net asset value, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share of each Class is computed by dividing the value of the Fund's net assets represented by such Class (i.e., the value of its assets less liabilities) by the total number of shares of such Class outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

If an order is received in proper form by the Transfer Agent for Dreyfus Premier Shares or other entity authorized to receive orders on behalf of the Fund by the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time) on a regular business day, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange on the next regular business day, except where shares are purchased through a dealer as provided below.

Orders for the purchase of Fund shares received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee by the close of such business day (usually 5:15 p.m., Eastern time) will be based on the public offering price per share determined as of the close of trading on the floor of the New

York Stock Exchange on that day. Otherwise, the orders will be based on the next determined public offering price. It is the dealer's responsibility to transmit orders so that they will be received by the Distributor or its designee before the close of its business day. For certain institutions that have entered into agreements with the Distributor, payment for the purchase of Fund shares may be transmitted, and must be received by the Transfer Agent, within three business days after the order is placed. If such payment is not received within three business days after the order is placed, the order may be canceled and the institution could be held liable for resulting fees and/or losses.

Dreyfus Premier Shares--Class A Shares. The public offering price for Class A shares of the Fund is the net asset value per share of that Class plus a sales load as shown below:

<u>Total Sales Load—Class A Shares</u>			
<u>Amount of Transaction</u>	<u>As a % of offering price per share</u>	<u>As a % of net asset value per share</u>	<u>Dealers' reallowance as a % of offering price</u>
Less than \$50,000	5.75	6.10	5.00
\$50,000 to less than \$100,000	4.50	4.70	3.75
\$100,000 to less than \$250,000	3.50	3.60	2.75
\$250,000 to less than \$500,000	2.50	2.60	2.25
\$500,000 to less than \$1,000,000	2.00	2.00	1.75
\$1,000,000 or more	-0-	-0-	-0-

A CDSC of 1% will be assessed at the time of redemption of Class A shares purchased without an initial sales charge as part of an investment of at least \$1,000,000 and redeemed within one year of purchase. The Distributor may pay Service Agents an amount up to 1% of the net asset value of Class A shares purchased by their clients that are subject to a CDSC.

The scale of sales loads applies to purchases of Class shares made by any "purchaser," which term includes an individual and/or spouse purchasing securities for his, her or their own account or for the account of any minor children, or a trustee or other fiduciary purchasing securities for a single trust estate or a single fiduciary account (including a pension, profit-sharing or other employee benefit trust created pursuant to a plan qualified under Section 401 of the Code) although more than one beneficiary is involved; or a group of accounts established by or on behalf of the employees of an employer or affiliated employers pursuant to an employee benefit plan or other program (including accounts established pursuant to Sections 403(b), 408(k), and 457 of the Code); or an organized group that has been in existence for more than six months, provided that it is not organized for the purpose of buying redeemable securities of a registered investment company and provided that the purchases are made through a central administration or a single dealer, or by other means that result in economy of sales effort or expense.

The dealer reallocation provided with respect to Class A shares may be changed from time to time but will remain the same for all dealers.

Set forth below is an example of the method of computing the offering price of the Fund's Class A shares. The example assumes a purchase of Class A shares of the Fund aggregating less than \$50,000, subject to the schedule of sales charges set forth above, at a price based on the Predecessor Fund's net asset value as of November 30, 2003:

	Dreyfus Premier Shares— <u>Class A</u>
Net Asset Value Per Share	\$18.05
Per Share Sales Charge	
Class A - 5.75% of offering price	
(6.10% of net asset value per share)	<u>1.10</u>
Per Share Offering Price to the Public	<u>\$19.15</u>

Dreyfus Premier Shares--Class B Shares. The public offering price for Class B shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of purchase. A CDSC is imposed, however, on certain redemptions of Class B shares as described in the Fund's Prospectus and in this SAI under "How to Redeem Shares—Dreyfus Premier Shares—Contingent Deferred Sales Charge—Class B Shares."

Approximately six years after the date of purchase, Class B shares automatically will convert to Class A shares, based on the relative net asset values for shares of each such Class. Class B shares that have been acquired through the reinvestment of dividends and distributions will be converted on a pro rata basis together with other Class B shares, in the proportion that a shareholder's Class B shares converting to Class A shares bears to the total Class B shares not acquired through the reinvestment of dividends and distributions.

Dreyfus Premier Shares--Class C Shares. The public offering price for Class C shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of purchase. A CDSC is imposed, however, on redemptions of Class C shares made within the first year of purchase. See "How to Redeem Shares—Dreyfus Premier Shares—Contingent Deferred Sales Charge—Class C Shares."

Dreyfus Premier Shares--Class R Shares. The public offering price for Class R shares is the net asset value per share of that Class.

Dreyfus Premier Shares--Class T Shares. The public offering price for Class T shares of the Fund is the net asset value per share of that Class plus a sales load as shown below:

Total Sales Load—Class T Shares

<u>Amount of Transaction</u>	<u>As a % of offering price per share</u>	<u>As a % of net asset value per share</u>	<u>Dealers' reallowance as a % of offering price</u>
Less than \$50,000	4.50	4.70	4.00
\$50,000 to less than \$100,000	4.00	4.20	3.50
\$100,000 to less than \$250,000	3.00	3.10	2.50

\$1,000,000 or more	-0-	-0-	-0-

A CDSC of 1% will be assessed at the time of redemption of Class T shares purchased without an initial sales charge as part of an investment of at least \$1,000,000 and redeemed within one year of purchase. The Distributor may pay Service Agents an amount up to 1% of the net asset value of Class T shares purchased by their clients that are subject to a CDSC. Because the expenses associated with Class A shares will be lower than those associated with Class T shares, purchasers investing \$1,000,000 or more in the Fund generally will find it beneficial to purchase Class A shares rather than Class T shares.

The scale of sales loads applies to purchases of Class T shares made by any "purchaser," as defined above for Class A shares.

Set forth below is an example of the method of computing the offering price of the Fund's Class T shares. The example assumes a purchase of Class T shares of the Fund aggregating less than \$50,000, subject to the schedule of sales charges set forth above, at a price based on the Predecessor Fund's net asset value as of November 30, 2003:

<u>Dreyfus Premier Shares—Class T</u>	
Net Asset Value Per Share.....	\$18.05
Per Share Sales Charge	
Class T - 4.50% of offering price (4.70% of net asset value per share).....	<u>0.85</u>
Per Share Offering Price to the Public...	<u>\$18.90</u>

Class A or Class T Shares Offered at Net Asset Value. Full-time employees of NASD member firms and full-time employees of other financial institutions that have entered into an agreement with the Distributor pertaining to the sale of Fund shares (or which otherwise have a brokerage related or clearing arrangement with an NASD member firm or financial institution with respect to the sale of such shares) may purchase Class A shares for themselves directly or

pursuant to an employee benefit plan or other program, or for their spouses or minor children, at net asset value, provided they have furnished the Distributor such information as it may request from time to time in order to verify eligibility for this privilege. This privilege also applies to full-time employees of financial institutions affiliated with NASD member firms whose full-time employees are eligible to purchase Class A shares at net asset value. In addition, Class A shares are offered at net asset value to full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Company's Board, or the spouse or minor child of any of the foregoing.

Class A shares may be purchased at net asset value through an account in the name of or for the benefit of a client of the Sub-Adviser or its affiliates resulting from the investment adviser-client relationship between the Sub-Adviser or its affiliates and such client.

Class A shares may be purchased at net asset value through certain broker-dealers and other financial institutions that have entered into an agreement with the Distributor, which includes a requirement that such shares be sold for the benefit of clients participating in a "wrap account" or a similar program under which such clients pay a fee to such broker-dealer or other financial institution.

Class A shares also may be purchased at net asset value, subject to appropriate documentation, by (i) qualified separate accounts maintained by an insurance company pursuant to the laws of any State or territory of the United States, (ii) a State, county or city or instrumentality thereof, (iii) a charitable organization (as defined in Section 501(c)(3) of the Code) investing \$50,000 or more in Fund shares, and (iv) a charitable remainder trust (as defined in Section 501(c)(3) of the Code).

Class A and Class T shares are offered at net asset value without a sales load to employees participating in Retirement Plans. Class A and Class T shares also may be purchased (including by exchange) at net asset value without a sales load for Dreyfus-sponsored IRA "Rollover Accounts" with the distribution proceeds from a qualified retirement plan or a Dreyfus-sponsored 403(b)(7) plan, provided, at the time of such distribution, such qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan invested all or a portion of its assets in funds in the Dreyfus Premier Family of Funds or the Dreyfus Family of Funds, or certain funds advised by Founders Asset Management LLC ("Founders"), an indirect subsidiary of the Manager, or certain other products made available by the Distributor to such plans.

Class T shares also may be purchased at net asset value, subject to appropriate documentation, through a broker-dealer or other financial institution with the proceeds from the redemption of shares of a registered open-end management investment company not managed by the Manager or its affiliates. The purchase of Class T shares of the Fund must be made within 60 days of such redemption and the shares redeemed must have been subject to an initial sales charge or a contingent deferred sales charge.

Dreyfus Premier Shares--Right of Accumulation--Class A and Class T Shares. Reduced sales loads apply to any purchase of Class A and Class T shares by you and any related "purchaser" as defined above, where the aggregate investment, including such purchase, is \$50,000 or more. If, for example, you previously purchased and still hold Class A or Class T shares of the Fund, or shares of certain other funds advised by the Manager or Founders that are subject to a sales load or shares acquired by a previous exchange of such shares (hereinafter

referred to as "Eligible Funds"), or combination thereof, with an aggregate current market value of \$40,000 and subsequently purchase Class A or Class T shares or shares of an Eligible Fund having a current value of \$20,000, the sales load applicable to the subsequent purchase would be reduced to 4.5% of the offering price in the case of Class A or 4.0% of the offering price in the case of Class T shares. All present holdings of Eligible Funds may be combined to determine the current offering price of the aggregate investment in ascertaining the sales load applicable to each subsequent purchase.

To qualify for reduced sales loads, at the time of purchase you or your Service Agent must notify the Distributor if orders are made by wire, or the Transfer Agent if orders are made by mail. The reduced sales load is subject to confirmation of your holdings through a check of appropriate records.

Dreyfus Premier Shares--Dreyfus TeleTransfer Privilege. You may purchase shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account, which will subject the purchase order to a processing delay. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the public offering price determined on the next bank business day following such purchase order. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or made on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the public offering price determined on the second bank business day following such purchase order. To qualify to use the Dreyfus TeleTransfer Privilege, the initial payment for purchase of shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares—Dreyfus Premier Shares--Dreyfus TeleTransfer Privilege."

Dreyfus Premier Shares--Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

Class J Shares – General. Class J shares are offered only to shareholders who received to Class J shares in exchange for shares of the Predecessor Fund as a result of the reorganization of the Predecessor Fund. The public offering price of Class J shares is the net asset value per share of that class. Class J shareholders may purchase additional Class J shares without a sales charge through their Service Agents or the Distributor.

Fund Class J shares are sold on a continuous basis at the net asset value per share next determined after an order in proper form is received by the Transfer Agent for Class J shares or other entity authorized to receive orders on behalf of the Fund. Net asset value per share is

determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time) on days the New York Stock Exchange is open for regular business. For purposes of determining net asset value per share, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share of Class J is computed by dividing the value of the Fund's net assets represented by such Class (i.e., the value of its assets less liabilities) by the total number of shares of such Class outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

Class J shares of the Fund also may be purchased through the Automatic Investment Plan described in the Fund's prospectus for Class J. This service enables you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

Orders for the purchase of Class J shares received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee by the close of its business day (usually 5:15 p.m., Eastern time) will be based on the net asset value per share determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the orders will be based on the next determined net asset value. It is the dealer's responsibility to transmit orders so that they will be received by the Distributor or its designee before the close of its business day. For certain institutions that have entered into agreements with the Distributor, payment for the purchase of Class J shares may be transmitted, and must be received by the Transfer Agent, within three business days after the order is placed. If such payment is not received within three business days after the order is placed, the order may be canceled and the institution could be held liable for resulting fees and/or losses.

DISTRIBUTION PLAN AND SHAREHOLDER SERVICES PLAN

Class B, Class C and Class T shares are subject to a Distribution Plan, and Class A, Class B, Class C, Class T shares are subject to a Shareholder Services Plan. Class J and Class R shares are not subject to any Distribution Plan or Shareholder Services Plan.

Distribution Plan. Rule 12b-1 (the "Rule") adopted by the Securities and Exchange Commission under the 1940 Act provides, among other things, that an investment company may bear expenses of distributing its shares only pursuant to a plan adopted in accordance with the Rule. The Company's Board has adopted such a plan (the "Distribution Plan") with respect to the Fund's Class B, Class C and Class T shares pursuant to which the Fund pays the Distributor for distributing such shares at an annual rate of 0.75% of the value of the average daily net assets of Class B and Class C shares and 0.25% of the value of the average daily net assets of Class T shares. The Distributor may pay one or more Service Agents in respect of advertising, marketing and other distribution services, and determines the amounts, if any, to be paid to Service Agents and the basis on which such payments are made. The Company's Board believes that there is a reasonable likelihood that the Distribution Plan will benefit the Fund and the holders of its Class B, Class C and Class T shares.

A quarterly report of the amounts expended under the Distribution Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, the Distribution Plan provides that it may not be amended to increase materially the

costs that holders of the Fund's Class B, Class C or Class T shares may bear pursuant to the Distribution Plan without the approval of the holders of such shares and that other material amendments of the Distribution Plan must be approved by the Company's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Company and have no direct or indirect financial interest in the operation of the Distribution Plan or in any agreements entered into in connection with the Distribution Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The Distribution Plan is subject to annual approval by such vote cast in person at a meeting called for the purpose of voting on the Distribution Plan. As to the relevant Class of shares, the Distribution Plan may be terminated at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Distribution Plan or in any agreements entered into in connection with the Distribution Plan or by vote of the holders of a majority of such Class of shares.

Shareholder Services Plan. The Company has adopted a Shareholder Services Plan with respect to the Fund, pursuant to which the Fund pays the Distributor for the provision of certain services to the holders of the Fund's Class A, Class B, Class C, Class T shares at an annual rate of 0.25% of the value of the average daily net assets of such shares. The services provided may include personal services relating to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of such shareholder accounts. Under the Shareholder Services Plan, the Distributor may make payments to certain Service Agents in respect of these services.

A quarterly report of the amounts expended under the Shareholder Services Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, the Shareholder Services Plan provides that material amendments must be approved by the Company's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The Shareholder Services Plan is subject to annual approval by such vote cast in person at a meeting called for the purpose of voting on the Shareholder Services Plan. As to the relevant Class of shares, the Shareholder Services Plan is terminable at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan.

HOW TO REDEEM SHARES

Dreyfus Premier Shares--General. The Fund ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent for Dreyfus Premier Shares of a redemption request in proper form, except as provided by the rules of the Securities and Exchange Commission. However, if you have purchased Fund shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder[®] and subsequently submit a written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Fund will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder order against which such redemption is requested. These procedures will not apply if

your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares may not be redeemed until the Transfer Agent for Dreyfus Premier Shares has received your Account Application.

If you hold shares of more than one Class of the Fund, any request for redemption must specify the Class of shares being redeemed. If you fail to specify the Class of shares redeemed or if you own fewer shares of the Class than specified to be redeemed, the redemption request may be delayed until the Transfer Agent for Dreyfus Premier Shares receives further instructions from you or your Service Agent.

Dreyfus Premier Shares--Contingent Deferred Sales Charge--Class B Shares. A CDSC payable to the Distributor is imposed on any redemption of Class B shares which reduces the current net asset value of your Class B shares to an amount which is lower than the dollar amount of all payments by you for the purchase of Class B shares of the Fund held by you at the time of redemption. No CDSC will be imposed to the extent that the net asset value of the Class B shares redeemed does not exceed (i) the current net asset value of Class B shares acquired through reinvestment of dividends or capital gain distributions, plus (ii) increases in the net asset value of your Class B shares above the dollar amount of all your payments for the purchase of Class B shares held by you at the time of redemption.

If the aggregate value of Class B shares redeemed has declined below their original cost as a result of the Fund's performance, a CDSC may be applied to the then-current net asset value rather than the purchase price.

In circumstances where the CDSC is imposed, the amount of the charge will depend on the number of years for the time you purchased the Class B shares until the time of redemption of such shares. Solely for purposes of determining the number of years from the time of any payment for the purchase of Class B shares, all payments during a month will be aggregated and deemed to have been made on the first day of the month.

The following table sets forth the rates of the CDSC for Class B shares:

<u>Year Since Purchase Payment Was Made</u>	<u>CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less)</u>
First	4.00
Second	4.00
Third	3.00
Fourth	3.00
Fifth	2.00
Sixth	1.00

In determining whether a CDSC is applicable to a redemption, the calculation will be made in a manner that results in the lowest possible rate. It will be assumed that the redemption is made first of amounts representing shares acquired pursuant to the reinvestment of dividends and distributions; then of amounts representing the increase in net asset value of Class B shares above the total amount of payments for the purchase of Class B shares made during the

preceding six years; and finally, of amounts representing the cost of shares held for the longest period.

For example, assume an investor purchased 100 shares at \$10 per share for a cost of \$1,000. Subsequently, the shareholder acquired five additional shares through dividend reinvestment. During the second year after the purchase the investor decided to redeem \$500 of the investment. Assuming at the time of the redemption the net asset value had appreciated to \$12 per share, the value of the investor's shares would be \$1,260 (105 shares at \$12 per share). The CDSC would not be applied to the value of the reinvested dividend shares and the amount that represents appreciation (\$260). Therefore, \$240 of the \$500 redemption proceeds (\$500 minus \$260) would be charged at a rate of 4% (the applicable rate in the second year after purchase) for a total CDSC of \$9.60.

Dreyfus Premier Shares--Contingent Deferred Sales Charge--Class C Shares. A CDSC of 1% payable to the Distributor is imposed on any redemption of Class C shares within one year of the date of purchase. The basis for calculating the payment of any such CDSC will be the method used in calculating the CDSC for Class B shares. See "Dreyfus Premier Shares--Contingent Deferred Sales Charge--Class B Shares" above.

Dreyfus Premier Shares--Waiver of CDSC. The CDSC may be waived in connection with (a) redemptions made within one year after the death or disability, as defined in Section 72(m)(7) of the Code, of the shareholder, (b) redemptions by employees participating in Retirement Plans, (c) redemptions as a result of a combination of any investment company with the Fund by merger, acquisition of assets or otherwise, (d) a distribution following retirement under a tax-deferred retirement plan or upon attaining age 70½ in the case of an IRA or Keogh plan or custodial account pursuant to Section 403(b) of the Code, and (e) redemptions pursuant to the Automatic Withdrawal Plan, as described below. If the Company's Board determines to discontinue the waiver of the CDSC, the disclosure herein will be revised appropriately. Any Fund shares subject to a CDSC which were purchased prior to the termination of such waiver will have the CDSC waived, as provided in the Fund's Prospectus or this SAI at the time of the purchase of such shares.

To qualify for a waiver of the CDSC, at the time of redemption you must notify the Transfer Agent or your Service Agent must notify the Distributor. Any such qualification is subject to confirmation of your entitlement.

Dreyfus Premier Shares--Reinvestment Privilege. Upon written request, you may reinvest up to the number of Class A, Class B or Class T shares you have redeemed, within 45 days of redemption, at the then-prevailing net asset value without a sales load, or reinstate your account for the purpose of exercising Fund Exchanges. Upon reinstatement, with respect to Class B shares, or Class A or Class T shares if such shares were subject to a CDSC, your account will be credited with an amount equal to the CDSC previously paid upon redemption of the shares reinvested. The Reinvestment Privilege may be exercised only once.

Dreyfus Premier Shares--Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you or a representative of your Service Agent and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Company will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt by the Transfer Agent of the redemption request in proper form. Redemption proceeds

(\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Share Certificates; Signatures."

Dreyfus Premier Shares--Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. See "How to Buy Shares—Dreyfus Premier Shares--Dreyfus TeleTransfer Privilege."

Class J Shares--General. The Fund ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent for Class J shares of a redemption request in proper form, except as provided by the rules of the Securities and Exchange Commission. The Fund will delay sending redemption proceeds for Class J shares for 15 days from the purchase date of such shares or until all payments for the shares being redeemed have cleared, whichever occurs first.

Redemption Through a Selected Dealer. If you are a customer of a Selected Dealer, you may make redemption requests to your Selected Dealer. If the Selected Dealer transmits the redemption request so that it is received by the Transfer Agent prior to the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time), the redemption request will be effective on that day. If a redemption request is received by the Transfer Agent after the close of trading on the floor of the New York Stock Exchange, the redemption request will be effective on the next business day. It is the responsibility of the Selected Dealer to transmit a request so that it is received in a timely manner. The proceeds of the redemption are credited to your account with the Selected Dealer. See "How to Buy Shares" for a discussion of additional conditions or fees that may be imposed upon redemption.

In addition, the Distributor or its designee will accept orders from Selected Dealers with which the Distributor has sales agreements for the repurchase of shares held by shareholders. Repurchase orders received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee prior to the close of its business day (usually 5:15 p.m., Eastern time), are effected at the price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the shares will be redeemed at the next determined net asset value. It is the responsibility of the Selected Dealer to transmit orders on a timely basis. The Selected Dealer may charge the shareholder a fee for executing the order. This repurchase arrangement is discretionary and may be withdrawn at any time.

Share Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program ("STAMP") and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and "Signature-Guaranteed" must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians, and may accept other suitable verification arrangements from foreign investors, such as consular verification.

Redemption Commitment. The Company has committed itself to pay in cash all redemption requests by any shareholder of record, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of the Fund's net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the Securities and Exchange Commission. In the case of requests for redemption in excess of such amount, the Board reserves the right to make payments in whole or part in securities or other assets in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Fund's portfolio is valued. If the recipient sells such securities, brokerage charges would be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when the Securities and Exchange Commission determines that trading in the markets the Fund ordinarily utilizes is restricted, or that an emergency exists so that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods as the Securities and Exchange Commission by order may permit to protect the Fund's shareholders.

SHAREHOLDER SERVICES

Dreyfus Premier Shares--Fund Exchanges. Clients of certain Service Agents may purchase, in exchange for Dreyfus Premier Shares of the Fund, shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of certain other funds in the Dreyfus Family of Funds, to the extent such shares are offered for sale in your state of residence. Shares of the same Class of such funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.

- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.
- E. Shares of funds subject to a CDSC that are exchanged for shares of another fund will be subject to the higher applicable CDSC of the two funds, and, for purposes of calculating CDSC rates and conversion periods, if any, will be deemed to have been held since the date the shares being exchanged were initially purchased.

To accomplish an exchange under item D above, your Service Agent acting on your behalf, must notify the Transfer Agent of your prior ownership of Fund shares and your account number.

You also may exchange your Fund shares that are subject to a CDSC for shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. The shares so purchased will be held in a special account created solely for this purpose ("Exchange Account"). Exchanges of shares for an Exchange Account only can be made into certain other funds managed or administered by the Manager. No CDSC is charged when an investor exchanges into an Exchange Account; however, the applicable CDSC will be imposed when shares are redeemed from an Exchange Account or other applicable Fund account. Upon redemption, the applicable CDSC will be calculated without regard to the time such shares were held in an Exchange Account. See "How to Redeem Shares." Redemption proceeds for Exchange Account shares are paid by Federal wire or check only. Exchange Account shares also are eligible for the Dreyfus Auto-Exchange Privilege, Dreyfus Dividend Sweep and the Automatic Withdrawal Plan.

To request an exchange, you, or your Service Agent acting on your behalf, must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone or online is given to all Fund shareholders automatically, unless you check the applicable "No" box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic and online instructions (including over the Dreyfus Express® voice response telephone system) from any person representing himself or herself to be you or a representative of your Service Agent and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form are not eligible for telephone or online exchange. No fees currently are charged shareholders directly in connection with exchanges, although the Company reserves the right, upon not less than 60 days' written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the Securities and Exchange Commission.

Exchanges of Class R shares held by a Retirement Plan may be made only between the investor's Retirement Plan account in one fund and such investor's Retirement Plan account in another fund.

To establish a personal retirement plan by exchange, shares of the fund being exchanged must have a value of at least the minimum initial investment being required for shares of the same Class of the fund into which the exchange is being made.

During times of drastic economic or market conditions, the Company may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate components -- redemption orders with a simultaneous request to purchase the other fund's shares. In such a case, the redemption request would be processed at the Fund's next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Class J Shares--Exchange Privilege. For a description of the exchange privileges offered to Class J shareholders, please refer to the prospectus for Class J. Class J shares may not be exchanged for shares of other funds in the Dreyfus Family of Funds.

Dreyfus Premier Shares--Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for Dreyfus Premier Shares of the Fund, shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of certain other funds in the Dreyfus Family of Funds of which you are a shareholder. This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under "Fund Exchanges." Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by you. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction. Shares held under IRA and other retirement plans are eligible for this Privilege. Exchanges of IRA shares may be made between IRA accounts and from regular accounts to IRA accounts, but not from IRA accounts to regular accounts. With respect to all other retirement accounts, exchanges may be made only among those accounts.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-645-6561, or visiting the Dreyfus.com website. The Company reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus Premier Shares--Dreyfus-Automatic Asset Builder[®]. Dreyfus-Automatic Asset Builder permits you to purchase Fund shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Premier Shares--Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Fund shares (minimum of \$100

and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the U.S. Government automatically deposited into your Fund account. You may deposit as much of such payments as you elect.

Dreyfus Premier Shares--Dreyfus Payroll Savings Plan. Dreyfus Payroll Savings Plan permits you to purchase the Fund's shares (minimum of \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer's payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Premier Shares--Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from the Fund in shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of certain other funds in the Dreyfus Family of Funds of which you are a shareholder. Shares of the same Class of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund that does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that imposed a CDSC and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from the Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Dreyfus Premier Shares--Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. Automatic Withdrawal may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which share certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

No CDSC with respect to Class B or Class C shares will be imposed on withdrawals made under the Automatic Withdrawal Plan, provided that any amount withdrawn under the plan does not exceed on an annual basis 12% of the greater of (1) the account value at the time of the first withdrawal under the Automatic Withdrawal Plan, or (2) the account value at the time of the subsequent withdrawal. Withdrawals with respect to Class B or Class C shares under the Automatic Withdrawal Plan that exceed such amounts will be subject to a CDSC. Withdrawals of Class A and Class T shares subject to a CDSC under the Automatic Withdrawal Plan will be subject to any applicable CDSC. Purchases of additional Class A and Class T shares where the sales load is imposed concurrently with withdrawals of Class A and Class T shares generally are undesirable.

Certain Retirement Plans, including Dreyfus-sponsored retirement plans, may permit certain participants to establish an automatic withdrawal plan from such Retirement Plans. Participants should consult their Retirement Plan sponsor and tax adviser for details. Such a withdrawal plan is different than the Automatic Withdrawal Plan.

Dreyfus Premier Shares--Letter of Intent--Class A and Class T Shares. By signing a Letter of Intent form, you become eligible for the reduced sales load on purchases of Class A and Class T shares based on the total number of shares of Eligible Funds (as defined under "Right of Accumulation" above) purchased by you and any related "purchaser" (as defined above) in a 13 month period pursuant to the terms and conditions set forth in the Letter of Intent. Shares of any Eligible Fund purchased within 90 days prior to the submission of the Letter of Intent may be used to equal or exceed the amount specified in the Letter of Intent. A minimum initial purchase of \$5,000 is required. You can obtain a Letter of Intent form by calling 1-800-554-4611.

Each purchase you make during the 13-month period (which begins on the date you submit the Letter of Intent) will be at the public offering price applicable to a single transaction of the aggregate dollar amount you select in the Letter of Intent. The Transfer Agent will hold in escrow 5% of the amount indicated in the Letter of Intent, which may be used for payment of a higher sales load if you do not purchase the full amount indicated in the Letter of Intent. When you fulfill the terms of the Letter of Intent by purchasing the specified amount the escrowed amount will be released and additional shares representing such amount credited to your account. If your purchases meet the total minimum investment amount specified in the Letter of Intent within the 13-month period, an adjustment will be made at the conclusion of the 13-month period to reflect any reduced sales load applicable to shares purchased during the 90-day period prior to submission of the Letter of Intent. If your purchases qualify for a further sales load reduction, the sales load will be adjusted to reflect your total purchase at the end of 13 months. If total purchases are less than the amount specified, the offering price of the shares you purchased (including shares representing the escrowed amount) during the 13-month period will be adjusted to reflect the sales load applicable to the aggregate purchases you actually made (which will reduce the number of shares in your account), unless you have redeemed the shares in your account, in which case the Transfer Agent, as attorney-in-fact pursuant to the terms of the Letter of Intent, will redeem an appropriate number of Class A or Class T shares of the Fund held in escrow to realize the difference between the sales load actually paid and the sales load applicable to the aggregate purchases actually made and any remaining shares will be credited to your account. Signing a Letter of Intent does not bind you to purchase, or the Fund to sell, the full amount indicated at the sales load in effect at the time of signing, but you must complete the intended purchase to obtain the reduced sales load. At the time you purchase Class A or Class T shares, you must indicate your intention to do so under a Letter of Intent. Purchases pursuant to

a Letter of Intent will be made at the then-current net asset value plus the applicable sales load in effect at the time such Letter of Intent was submitted.

Corporate Pension/Profit-Sharing and Retirement Plans. The Company makes available to corporations a variety of prototype pension and profit-sharing plans, including a 401(k) Salary Reduction Plan. In addition, the Company makes available Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs, and rollover IRAs), Education Savings Accounts, 401(k) Salary Reduction Plans and 403(b)(7) Plans. Plan support services also are available.

If you wish to purchase Fund shares in conjunction with a Keogh Plan, a 403(b)(7) Plan or an IRA, including a SEP-IRA, you may request from the Distributor forms for adoption of such plans.

The entity acting as custodian for Keogh Plans, 403(b)(7) Plans or IRAs may charge a fee, payment of which could require the liquidation of shares. All fees charged are described in the appropriate form.

Shares may be purchased in connection with these plans only by direct remittance to the entity acting as custodian. Purchases for these plans may not be made in advance of receipt of funds.

You should read the prototype retirement plan and the appropriate form of custodial agreement for further details on eligibility, service fees and tax implications, and should consult a tax adviser.

DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. The Fund's portfolio securities, including covered call options written by the Fund, are valued at the last sale price on the securities exchange or national securities market on which such securities primarily are traded. Securities traded on Nasdaq generally will be valued at the Nasdaq Official Closing Price. Equity securities not listed on an exchange or national securities market, or securities in which there were no transactions, are valued at the average of the most recent bid and asked prices, except in the case of open short positions where the asked price is used for valuation purposes. Bid price is used when no asked price is available. Substantially all of the Fund's fixed-income investments (excluding short-term investments) are valued by one or more independent pricing services (the "Service") approved by the Board. Securities valued by the Service for which quoted bid prices in the judgment of the Service are readily available and are representative of the bid side of the market are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other fixed-income investments is determined by the Service based on methods which include consideration of: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. Market quotations of foreign securities in foreign currencies are translated into U.S. dollars at the prevailing rates of exchange. Any securities or other assets for which recent market quotations are not readily available are valued at fair value as determined in good faith by the Board. Short-term investments may be carried at amortized cost, which approximates value. Expenses and fees, including the management fee and fees pursuant to the Distribution Plan, and the Shareholder Services Plan, if applicable, are accrued daily and taken into account for the purpose

of determining the net asset value of the Fund's shares. Because of the differences in operating expenses incurred by each Class of shares of the Fund, the per share net asset value of each Class of shares of the Fund will differ.

Restricted securities, as well as securities or other assets for which recent market quotations are not readily available or are determined by the Company not to reflect accurately fair value (such as when an event occurs after the close of the exchange on which the security is principally traded and that is determined by the Company to have changed the value of the security), or which are not valued by the Service, are valued at fair value as determined in good faith based on procedures approved by the Company's Board. The valuation of a security based on fair value procedures may differ from the security's most recent closing price, and from the prices used by other mutual funds to calculate their net asset values. Restricted securities that are, or are convertible into, securities of the same class of other securities for which a public market exists usually will be valued at such market value less the same percentage discount at which the restricted securities were purchased. This discount will be revised periodically by the Board if the Board members believe that it no longer reflects the value of the restricted securities. Restricted securities not of the same class as securities for which a public market exists usually will be valued initially at cost. Any subsequent adjustment from cost will be based upon considerations deemed relevant by the Board.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

DIVIDENDS, DISTRIBUTIONS AND TAXES

The Fund intends to qualify and elect to be treated as a "regulated investment company" under the Code. As a regulated investment company, the Fund will pay no Federal income tax on net investment income and net realized securities gains to the extent that such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment company, the Fund must distribute at least 90% of its net income (consisting of net investment income and net short-term capital gain) to its shareholders and meet certain asset diversification and other requirements. If the Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

If you elect to receive dividends and distributions in cash, and your dividend or distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividends or distributions and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Any dividend or distribution paid shortly after an investor's purchase may have the effect of reducing the aggregate net asset value of the shares below the cost of the investment. Such a dividend or distribution would be a return of investment in an economic sense, although taxable as stated above. In addition, the Code provides that if a shareholder holds shares of the Fund for six months or less and has received a capital gain distribution with respect to such shares, any

loss incurred on the sale of such shares will be treated as long-term capital loss to the extent of the capital gain distribution received.

In general, dividends (other than capital gain dividends) paid by the Fund to U.S. individual shareholders may be eligible for the 15% preferential maximum tax rate to the extent that the Fund's income consists of dividends paid by U.S. corporations and certain foreign corporations on shares that have been held by the Fund for at least 61 days during the 121-day period commencing 60 days before the shares become ex-dividend. In order to be eligible for the preferential rate, the investor in the Fund must have held his or her shares in the Fund for at least 61 days during the 121-day period commencing 60 days before the Fund shares become ex-dividend. Additional restrictions on an investor's qualification for the preferential rate may apply.

In general, dividends (other than capital gain dividends) paid by the Fund to U.S. corporate shareholders may be eligible for the dividends received deduction to the extent that the Fund's income consists of dividends paid by U.S. corporations on shares that have been held by the Fund for at least 46 days during the 90-day period commencing 45 days before the shares become ex-dividend. In order to claim the dividends received deduction, the investor in the Fund must have held its shares in the Fund for at least 46 days during the 90-day period commencing 45 days before the Fund shares become ex-dividend. Additional restrictions on an investor's ability to claim the dividends received deduction may apply.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gains and losses. However, a portion of the gain or loss realized from the disposition of foreign currencies (including foreign currency denominated bank deposits) and non-U.S. dollar denominated securities (including debt instruments and certain forward contracts and options) may be treated as ordinary income or loss. In addition, all or a portion of any gains realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. Finally, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by the Fund from certain forward contracts and options transactions ("Section 1256 contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing transactions. In addition, any Section 1256 contracts remaining unexercised at the end of the Fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund characterized in the manner described above.

Offsetting positions held by the Fund involving certain financial futures or forward contracts or options transactions with respect to actively traded personal property may be considered, for tax purposes, to constitute "straddles." To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by the Fund may constitute "mixed straddles." The Fund may make one or more elections with respect to the treatment of "mixed straddles," resulting in different tax

consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If the Fund enters into certain derivatives (including forward contracts, long positions under notional principal contracts, and related puts and calls) with respect to equity interests in certain pass-through entities (including other regulated investment companies, real estate investment trusts, partnerships, real estate mortgage investment conduits and certain trusts and foreign corporations), long-term capital gain with respect to the derivative may be recharacterized as ordinary income to the extent it exceeds the long-term capital gain that would have been realized had the interest in the pass-through entity been held directly by the Fund during the term of the derivative contract. Any gain recharacterized as ordinary income will be treated as accruing at a constant rate over the term of the derivative contract and may be subject to an interest charge. The Treasury has authority to issue regulations expanding the application of these rules to derivatives with respect to debt instruments and/or stock in corporations that are not pass-through entities.

If the Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial position") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") with respect to the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Fund generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively.

If the Fund invests in an entity that is classified as a "passive foreign investment company" ("PFIC") for Federal income tax purposes, the operation of certain provisions of the Code applying to PFICs could result in the imposition of certain Federal income taxes on the Fund. In addition, gain realized from the sale or other disposition of PFIC securities may be treated as ordinary income.

Investment by the Fund in securities issued or acquired at a discount, or providing for deferred interest or for payment of interest in the form of additional obligations could under special tax rules affect the amount, timing and character of distributions to shareholders by causing the Fund to recognize income prior to the receipt of cash payments. For example, the Fund could be required to accrue a portion of the discount (or deemed discount) at which the securities were issued each year and to distribute such income in order to maintain its qualification as a regulated investment company. In such case, the Fund may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy these distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Company could subject you to a \$50 penalty imposed by the Internal Revenue Service.

PORTFOLIO TRANSACTIONS

General. The Sub-Adviser is responsible for decisions to buy and sell securities for the Fund, the selection of brokers and dealers to effect the transactions and the negotiation of brokerage commissions, where applicable. Purchases and sales of securities on a national securities exchange are effected through brokers who charge a negotiated commission for their services. In the over-the-counter market, securities are generally traded on a "net" basis with dealers acting as principal for their own accounts without a stated commission, although the price of the security usually includes a profit to the dealer. In underwritten offerings, securities are purchased at a fixed price which includes an amount of compensation to the underwriter, generally referred to as the underwriter's concession or discount. On occasion, certain money market instruments may be purchased directly from an issuer, in which case no commissions or discounts are paid.

In placing purchase and sale orders for portfolio securities for the Fund, it is the policy of the Sub-Adviser to seek the best net price and the most favorable execution in light of the overall quality of brokerage and research services provided. In selecting brokers to effect portfolio transactions, the determination of what is expected to result in best net price and the most favorable execution involves a number of largely judgmental considerations. Among these are the Sub-Adviser's evaluation of the brokers efficiency in executing and clearing transactions and the broker's financial strength and stability. The best net price takes into account the brokerage commission or dealer spread involved in purchasing the securities. Transactions in the securities of small companies may involve specialized services on the part of the broker and thereby entail higher commissions or spreads than would be paid in transactions involving more widely traded securities.

In selecting brokers to effect portfolio transactions for the Fund, the Sub-Adviser also takes into consideration the research, analytical, statistical and other information and services provided by the broker, such as general economic reports and information, reports or analyses of particular companies or industry groups, market timing and technical information, access to computerized data bases and the software for analyzing such data bases, and the availability of the brokerage firm's analysts for consultation. Where computer software serves functions other than assisting the Sub-Adviser in the investment decision-making process (e.g., recordkeeping), the Sub-Adviser makes a reasonable allocation of the cost of the software to such other functions and bears such part of the cost itself. While the Sub-Adviser believes such information and services have substantial value, the Sub-Adviser considers them supplemental to its own efforts in the performance of its duties under the Sub-Advisory Agreement. Other clients of the Sub-Adviser may benefit from the availability of these services to the Sub-Adviser, and the Fund may benefit from services available to the Sub-Adviser as a result of transactions for other clients.

The Advisers may deem it appropriate for one of their accounts to sell a security while another of their accounts is purchasing the same security. Under such circumstances, the Advisers may arrange to have the purchase and sale transaction effected directly between their respective accounts ("cross transactions"). Cross transactions will be effected pursuant to procedures adopted under Rule 17a-7 under the 1940 Act.

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the Advisers will not be deterred from changing the Fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of

brokerage commissions paid is evaluated by the Advisers based upon their knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

The Company contemplates that, consistent with the policy of obtaining prompt execution of orders at the most favorable net price, brokerage transactions may be conducted through the Manager or its affiliates. The Company's Board has adopted procedures in conformity with Rule 17e-1 under the 1940 Act to ensure that all brokerage commissions paid to the Manager or its affiliates are reasonable and fair.

Soft Dollars. Subject to the policy of seeking the best combination of price and execution, the Fund may execute transactions with brokerage firms that provide, along with brokerage services, research services and products, as defined in Section 28(e) of the Securities Exchange Act of 1934. Section 28(e) provides a "safe harbor" to investment managers who use commission dollars of their advised accounts to obtain investment research and brokerage services and products. These arrangements are often called soft dollar arrangements. Research and brokerage services and products that provide lawful and appropriate assistance to the manager in performing investment decision-making responsibilities fall within the safe harbor.

The Sub-Adviser, in placing orders for portfolio securities, may rely upon Section 28(e). Such section generally permits the Sub-Adviser to cause the Fund to pay a broker or dealer, who provides brokerage and research services to the Sub-Adviser, an amount of commission for effecting a securities transaction in excess of the amount another broker or dealer would have charged for effecting a securities transaction in excess of the amount another broker or dealer would have charged for effecting the transaction; provided the Sub-Adviser determines in good faith that such amount of commission is reasonable in relation to the value of brokerage and research services provided by the executing broker or dealer viewed in terms of either the particular transaction or the Sub-Adviser's overall responsibilities with respect to the Fund and the other accounts as to which the Sub-Adviser exercises investment discretion.

The services and products provided under these arrangements permit the Advisers to supplement their own research and analysis activities, and provide them with information from individuals and research staffs of many securities firms.

Some of the research products or services received by the Advisers may have both a research function and a non-research administrative function (a "mixed use"). If the Advisers determine that any research product or service has a mixed use, they will allocate in good faith the cost of such service or product accordingly. The portion of the product or service that the Advisers determine will assist them in the investment decision-making process may be paid for in soft dollars. The non-research portion is paid for by the Advisers in hard dollars. Any such allocation may create a conflict of interest for the Manager or the Sub-Adviser.

The Advisers may receive a benefit from the research services and products that is not passed on to the Fund in the form of a direct monetary benefit. Further, information made available to the Advisers from brokerage firms effecting securities transactions for the Fund may be utilized on behalf of another fund or client. Thus, there may be no correlation between the amount of brokerage commissions generated by the Fund or client and the indirect benefits received by the Fund or client.

SUMMARY OF THE PROXY VOTING POLICY, PROCEDURES AND GUIDELINES OF THE DREYFUS FAMILY OF FUNDS

The Board of each fund in the Dreyfus Family of Funds has delegated to the Manager the authority to vote proxies of companies held in the fund's portfolio. The Manager, through its participation on the Mellon Proxy Policy Committee (the "MPPC"), applies Mellon's Proxy Voting Policy, related procedures, and voting guidelines when voting proxies on behalf of the funds.

The Manager recognizes that an investment adviser is a fiduciary that owes its clients, including funds it manages, a duty of utmost good faith and full and fair disclosure of all material facts. An investment adviser's duty of loyalty requires an adviser to vote proxies in a manner consistent with the best interest of its clients and precludes the adviser from subrogating the clients' interests to its own. In addition, an investment adviser voting proxies on behalf of a fund must do so in a manner consistent with the best interests of the fund and its shareholders. The Manager seeks to avoid material conflicts of interest by participating in the MPPC, which applies detailed, pre-determined written proxy voting guidelines (the "Voting Guidelines") in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, the MPPC engages a third party as an independent fiduciary to vote all proxies of funds managed by Mellon or its affiliates (including the Dreyfus Family of Funds), and may engage an independent fiduciary to vote proxies of other issuers at its discretion.

All proxies received by the funds are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. The guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in Mellon's or the Manager's policies on specific issues. Items that can be categorized under the Voting Guidelines are voted in accordance with any applicable guidelines or referred to the MPPC, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines are referred to the MPPC for discussion and vote. Additionally, the MPPC reviews proposals where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, the MPPC weighs the cost of voting and potential inability to sell the securities (which may occur during the voting process) against the benefit of voting the proxies to determine whether or not to vote. With respect to securities lending transactions, the MPPC seeks to balance the economic benefits of continuing to participate in an open securities lending transaction against the inability to vote proxies.

When evaluating proposals, the MPPC recognizes that the management of a publicly-held company may need protection from the market's frequent focus on short-term considerations, so as to be able to concentrate on such long-term goals as productivity and development of competitive products and services. In addition, the MPPC generally supports proposals designed to provide management with short-term insulation from outside influences so as to enable them

to bargain effectively with potential suitors to the extent such proposals are discrete and not bundled with other proposals. The MPPC believes that a shareholder's role in the governance of a publicly-held company is generally limited to monitoring the performance of the company and its management and voting on matters which properly come to a shareholder vote. However, the MPPC generally opposes proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. Accordingly, the MPPC generally votes in accordance with management on issues that the MPPC believes neither unduly limit the rights and privileges of shareholders nor adversely affect the value of the investment.

On questions of social responsibility where economic performance does not appear to be an issue, the MPPC attempts to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the particular social issue including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The MPPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take actions on issues.

In evaluating proposals regarding incentive plans and restricted stock plans, the MPPC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the MPPC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The MPPC generally votes against proposals that permit or are silent on the repricing or replacement of stock options without shareholder approval.

PERFORMANCE INFORMATION

Before the Fund commenced operations, substantially all of the assets of the Predecessor Fund were transferred to the Fund in a tax-free reorganization. Because the Fund had not commenced operations until January 30, 2004, the Fund does not have its own performance record. All performance information presented for the Fund represents the performance of the Predecessor Fund.

Total Return. Average annual total return is calculated by determining the ending redeemable value of an investment purchased at net asset value (maximum offering price in the case of Class A or Class T) per share with a hypothetical \$1,000 payment made at the beginning of the period (assuming the reinvestment of dividends and distributions), dividing by the amount of the initial investment, taking the "n"th root of the quotient (where "n" is the number of years in the period) and subtracting 1 from the result. The average annual total return figures calculated in accordance with such formula assume that for Class A or Class T the maximum sales load has been deducted from the hypothetical initial investment at the time of purchase, or for Class B or Class C the maximum applicable CDSC has been paid upon redemption at the end of the period.

Aggregate total return is calculated by subtracting the amount of the Fund's net asset value (maximum offering price in the case of Class A or Class T) per share at the beginning of a stated period from the net asset value per share at the end of the period (after giving effect to the reinvestment of dividends and distributions during the period and any applicable CDSC), and dividing the result by the net asset value (maximum offering price in the case of Class A or Class T) per share at the beginning of the period. Aggregate total return also may be calculated based on the net asset value per share at the beginning of the period instead of the maximum offering

price per share at the beginning of the period for Class A or Class T shares or without giving effect to any applicable CDSC at the end of the period for Class B or Class C shares. In such cases, the calculation would not reflect the deduction of the sales load with respect to Class A or Class T shares or any applicable CDSC with respect to Class B or Class C shares, which, if reflected, would reduce the performance quoted.

For the indicated period ended November 30, 2003, the average annual total returns for the Predecessor Fund's Class J shares were as follows:

Name of Class	Average Annual Total Return One Year	Average Annual Total Return Five Years	Average Annual Total Return Ten Years
Class J	12.05%	8.11%	12.02%

From time to time, the after-tax returns of the Fund may be advertised or otherwise reported. The formula for computing after-tax returns assumes an initial one-time investment of \$1,000 and the deduction of the maximum sales load, if any, and other charges from this initial investment. After-tax returns (including those reflecting Fund distributions and/or redemption of Fund shares) are calculated using the then-current highest individual Federal marginal income tax rates, and do not reflect the impact of state and local taxes. After-tax returns on distributions and redemptions are computed assuming a complete sale of Fund shares at the end of the period and reflect reinvested amounts. The formula assumes that the taxable amount and tax character of each distribution are as specified by the Fund on the dividend declaration date, adjusted to reflect subsequent recharacterizations, and ignores the effect of either the alternative minimum tax or phaseouts of certain tax credits, exemptions, and deductions for taxpayers whose adjusted gross income is above a specified amount.

INFORMATION ABOUT THE COMPANY AND FUND

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and non-assessable. Shares have no preemptive or subscription rights and are freely transferable.

The Company is organized as an unincorporated business trust under the laws of the Commonwealth of Massachusetts. Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of a Massachusetts business trust. However, the Company's Agreement and Declaration of Trust disclaims shareholder liability for acts or obligations of the Company and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the Fund or a Trustee. The Agreement and Declaration of Trust provides for indemnification from the Fund's property for all losses and expenses of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund itself would be unable to meet its obligations, a possibility which management believes is remote. Upon payment of any liability incurred by the Fund, the shareholder paying such liability will be entitled to reimbursement from the general assets of the Fund. The Company intends to conduct its operations in such a way so as to avoid, as far as possible, ultimate liability of the shareholders for liabilities of the Fund.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Company to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Company to hold a special meeting of shareholders for purposes of removing a Board member from office. Fund shareholders may remove a Board member by the affirmative vote of a majority of the Company's outstanding voting shares. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Company is a "series fund," which is a mutual fund divided into separate portfolios, each of which is treated as a separate entity for certain matters under the 1940 Act and for other purposes. A shareholder of one portfolio is not deemed to be a shareholder of any other portfolio. For certain matters shareholders vote together as a group; as to others they vote separately by portfolio.

To date, the Board has authorized the creation of one series of shares. All consideration received by the Company for shares of a series, and all assets in which such consideration is invested, will belong to that series (subject only to the rights of creditors of the Company) and will be subject to the liabilities related thereto. The income attributable to, and the expenses of, a series will be treated separately from those of the other series. The Company has the ability to create, from time to time, new series without shareholder approval.

Rule 18f-2 under the 1940 Act provides that any matter required to be submitted under the provisions of the 1940 Act or applicable state law or otherwise to the holders of the outstanding voting securities of an investment company, such as the Company, will not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each series affected by such matter. Rule 18f-2 further provides that a series shall be deemed to be affected by a matter unless it is clear that the interests of each series in the matter are identical or that the matter does not affect any interest of such series. The Rule exempts the selection of independent accountants and the election of Board members from the separate voting requirements of the Rule.

The Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing other funds in the Dreyfus Family of Funds. Accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive or abusive trading. In addition, the Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Fund will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Fund will take reasonable steps to prevent excessive short term trading deemed to be harmful to the Fund, it

may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

The Company will send annual and semi-annual financial statements to all its shareholders.

The following persons are known by the Fund to own of record 5% or more of the indicated Fund's outstanding voting securities on March 5, 2004. A shareholder who beneficially owns, directly or indirectly, more than 25% of a Fund's voting securities may be deemed a "control person" (as defined in the 1940 Act) of the Fund.

COUNSEL AND INDEPENDENT AUDITORS

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Company, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Fund's Prospectus.

PricewaterhouseCoopers LLP, 1177 Avenue of the Americas, New York, New York 10036-2798, independent auditors, have been selected as independent auditors of the Company.

APPENDIX

Rating Categories

Description of certain ratings assigned by Standard & Poor's Ratings Services ("S&P"), Moody's Investors Service ("Moody's"), and Fitch Ratings ("Fitch"):

S&P

Long-term

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A subordinated debt or preferred stock obligation rated 'C' is currently highly vulnerable to nonpayment. The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action taken, but payments on this obligation are being continued. A 'C' also will be assigned to a preferred stock issue in arrears on dividends or sinking fund payments, but that is currently paying.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

r

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

N.R.

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.

Short-term

A-1

A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are given a plus sign (+) designation. This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B

A short-term obligation rated 'B' is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C

A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Moody's

Long-term

Aaa

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

A

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B

Bonds rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa

Bonds rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca

Bonds rated 'Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C

Bonds rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated **Prime-3** (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Fitch

Long-term investment grade

AAA

Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA

Very high credit quality. 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. 'BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Long-term speculative grade

BB

Speculative. 'BB' ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B

Highly speculative. 'B' ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. 'CC' ratings indicate that default of some kind appears probable. 'C' ratings signal imminent default.

DDD, DD, D

Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. 'DDD' obligations have the highest potential for recovery, around 90% - 100% of outstanding amounts and accrued interest. 'DD' ratings indicate potential recoveries in the range of 50% - 90% and 'D' the lowest recovery potential, i.e., below 50%.

Entities rated in this category have defaulted on some or all of their obligations. Entities rated 'DDD' have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated 'DD' and 'D' are generally undergoing a formal reorganization or liquidation process; those rated 'DD' are likely to satisfy a higher portion of their outstanding obligations, while entities rated 'D' have a poor prospect of repaying all obligations.

Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2

Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

F3

Fair credit quality. The capacity for timely payment of financial commitment is adequate; however, near-term adverse changes could result in a reduction non-investment grade.

B

Speculative. Minimal capacity for timely payment of financial commitments plus vulnerability to near-term adverse changes in financial and economic conditions.

C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D

Default. Denotes actual or imminent payment default.

'NR' indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' long-term rating category, to categories below 'CCC', or to short-term ratings other than 'F1.'
