GOAL/APPROACH

The fund seeks high total return through a combination of capital appreciation and current income. To pursue this goal, the fund invests in a diversified mix of stocks and fixed-income securities. The fund selects securities that, in the portfolio managers' judgment, will result in the highest total return consistent with preservation of principal. The fund will vary the mix of stocks and bonds from time to time, but normally the fund will allocate between 25% and 50% of its assets to fixed-income securities. The fund has appointed an asset allocation manager who will allocate fund assets among the fund's equity portfolio managers and the fund's fixed income portfolio managers, based on his assessment of the relative return and risk of each asset class, analyzing several factors, including general economic conditions, anticipated future changes in interest rates and the outlook for stocks generally.

In seeking to achieve a high relative risk-adjusted return on the fund's equity investments, the equity managers create a broadly diversified equity portfolio for the fund that includes a blend of growth stocks and value stocks. Stock selection is made through extensive quantitative and fundamental research. In choosing stocks, the equity managers seek companies that possess some or all of the following characteristics:

- leading market positions
- high barriers to market entry and other competitive or technological advantages
- high returns on equity and assets
- good growth prospects
- value, or how a stock is priced relative to its perceived intrinsic worth
- strong management
- relative low debt burdens

The fixed income portion of the fund may include corporate bonds, debentures, notes, mortgage-related securities, including collateralized mortgage obligations (CMOs), asset-backed securities, convertible securities, municipal obligations, zero coupon bonds, and money market instruments. The fund will invest primarily in securities that, when purchased, are rated investment grade or are the

The Fund

unrated equivalent as determined by Dreyfus, and in securities that are issued or guaranteed by the U.S. government (including its agencies and instrumentalities), including Treasury inflation-protected securities (TIPS). The fund may invest up to 5% of its assets in securities rated below investment grade (but not lower than B) at the time of purchase, or the unrated equivalent as determined by Dreyfus. The fund may invest up to 10% of its assets in bonds issued by foreign issuers that are denominated in U.S. dollars or foreign currencies, but will limit its investment in bonds issued by foreign issuers that are denominated in foreign currencies to no more than 5% of the fund's assets. The fund has no limit with respect to its portfolio maturity or duration.

The fund may, but is not required to, use derivatives, such as futures, options and swap agreements, as a substitute for taking a position in an underlying asset, to increase returns, to manage interest rate risk, or as part of a hedging strategy. The fund may enter into swap agreements, such as credit default swaps, which can be used to transfer the credit risk of a security without actually transferring ownership of the security. To enhance current income, the fund also may engage in a series of purchase and sale contracts or forward roll transactions in which the fund sells a mortgage-related security, for example, to a financial institution and simultaneously agrees to purchase a similar security from the institution at a later date at an agreed-upon price. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

Concepts to understand

Investment grade fixed-income securities: independent rating organizations analyze and evaluate a bond issuer's credit history and ability to repay debts. Based on their assessment, rating organizations assign letter grades that reflect the issuer's creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

MAIN RISKS

The stock and bond markets can perform differently from each other at any given time (as well as over the long term), so the fund will be affected by its asset allocation. If the fund favors an asset class during a period when that class underperforms, performance may be hurt. The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to foreign currencies, indexes and interest rates), swaps and other credit derivatives, and invest in mortgage-related and asset-backed securities. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained

as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms. Additionally, credit default swaps could result in losses if the fund does not correctly evaluate the creditworthiness of the company on which the credit default swap is based.

The fund's investments in stocks and other equity securities also are subject to the following principal risks:

- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio managers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Smaller company risk.* The fund may invest (typically less than one-third of its total assets) in stocks of smaller companies whose market capitalizations are less than \$1 billion. Small companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.

- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

The fund's investments in bonds and other fixed-income securities also are subject to the following principal risks:

- *Interest rate risk.* Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the bond portion of the fund, the more the fund's share price is likely to react to interest rates.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a bond, can cause a bond's price to fall, potentially lowering the fund's share price. Although the fund's bond investments are primarily in investment grade bonds, the fund may invest to a limited extent (up to 5% of its total assets) in high yield ("junk") bonds which involve greater credit risk, including the risk of default, than investment grade bonds and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. The prices of high yield bonds can fall dramatically in response to bad news about the issuer or its industry, or the economy in general.
- *Call risk.* Some bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the fund might have to reinvest the proceeds in an investment offering a lower yield.

- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically.
- *Prepayment and extension risk.* When interest rates fall, the principal on mortgage-backed and certain asset-backed securities may be prepaid. The loss of higher yielding, underlying mortgages and the reinvestment of proceeds at lower interest rates can reduce the fund's potential price gain in response to falling interest rates, reduce the fund's yield, or cause the fund's share price to fall. When interest rates rise, the effective duration of the fund's mortgage-related and other asset-backed securities may lengthen due to a drop in prepayments of the underlying mortgages or other assets. This is known as extension risk and would increase the fund's sensitivity to rising rates and its potential for price declines.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of another investment company were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on January 30, 2004. The fund's Class J shares are not offered in this prospectus. The performance figures for the fund's Class A shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year for periods prior to January 31, 2004 and the performance of the fund's Class A shares thereafter. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The performance figures for the fund's Class A, B, C, R, T and Z shares in the table represent the performance of the predecessor fund's shares for periods prior to January 31, 2004 and the performance of the respective class of fund shares thereafter (except for Class Z, the performance for which reflects that of the fund's Class J shares for the period January 31, 2004 through December 17, 2004 and the performance of the fund's Class Z shares thereafter), and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks, and the Lehman Brothers Intermediate Government/Credit Bond Index, an index of all investment grade bonds with maturities of more than one year and less than ten years. These returns have been adjusted to reflect the fund's

applicable sales loads. Performance figures for periods prior to January 31, 2004 have not been adjusted to reflect the fund's operating expenses; if these expenses had been reflected, such performance may have been lower. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. All of the fund's share classes invest in the same portfolio of securities. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses. Class Z shares generally are not available for new accounts.

After-tax performance is shown only for Class A shares (based on the performance of the predecessor fund's shares for periods prior to January 31, 2004 and the performance of the fund's Class A shares thereafter, adjusted to reflect the sales load applicable to the fund's Class A shares). After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

Class A shares*

Best Quarter: Q4 '98 +19.41%

Worst Quarter: Q3 '02 -12.39%

* Represents the performance of the predecessor fund's shares for periods prior to January 31, 2004 and the performance of the fund's Class A shares thereafter.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Average annual total returns as of 12/31/06*

| Share class | 1 Year | 5 Years | 10 Years |
|--|---------------|--------------|----------------|
| Class A returns before taxes | 3.04% | 3.67% | 8.61% |
| Class A returns after taxes on distributions | 2.79% | 3.30% | 7.14% |
| Class A returns after taxes on distributions and sale of fund shares | 2.30% | 3.02% | 6.82% |
| Class B returns before taxes | 4.51% | 4.08% | 9.26%** |
| Class C returns before taxes | 7.55% | 4.47% | 9.03% |
| Class R returns before taxes | 9.55% | 4.99% | 9.30% |
| Class T returns before taxes | 4.15% | 3.78% | 8.67% |
| Class Z returns before taxes | 9.52% | 4.98% | 9.30% |
| S&P 500® Index reflects no deduction for fees, expenses or taxes | 15.78% | 6.18% | 8.42% |
| Lehman Brothers Intermediate Government/Credit Bond Index reflects no deduction for fees, expenses or taxes | 4.08% | 4.53% | 5.81% |

* Represents the performance of the predecessor fund's shares for periods prior to January 31, 2004, as adjusted to reflect the fund's applicable sales loads, and the performance of the respective class of fund shares thereafter (except for Class Z, the performance for which reflects that of the fund's Class J shares for the period January 31, 2004 through December 17, 2004 and the performance of the fund's Class Z shares thereafter).

** Assumes conversion of Class B to Class A at the end of the sixth year following the date of purchase.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

Fee table

| | Class A | Class B* | Class C | Class R | Class T | Class Z |
|---|-------------|-------------|-------------|-------------|-------------|-------------|
| Shareholder transaction fees (<i>fees paid from your account</i>) | | | | | | |
| Maximum front-end sales charge on purchases % of offering price | 5.75 | none | none | none | 4.50 | none |
| Maximum contingent deferred sales charge (CDSC) % of purchase or sale price, whichever is less | none** | 4.00 | 1.00 | none | none** | none |
| Annual fund operating expenses (<i>expenses paid from fund assets</i>) | | | | | | |
| % of average daily net assets | | | | | | |
| Management fees | .80 | .80 | .80 | .80 | .80 | .80 |
| Rule 12b-1 fee | none | .75 | .75 | none | .25 | none |
| Shareholder services fee | .25 | .25 | .25 | none | .25 | .10 |
| Other expenses | .16 | .21 | .15 | .27 | .21 | .25 |
| Total | 1.21 | 2.01 | 1.95 | 1.07 | 1.51 | 1.15 |

* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

** Class B shares of the fund are available only in connection with dividend reinvestment and permitted exchanges of Class B shares of certain other funds.

Expense example

| | 1 Year | 3 Years | 5 Years | 10 Years |
|--------------------|--------------|--------------|----------------|----------------|
| Class A | \$691 | \$937 | \$1,202 | \$1,957 |
| Class B | | | | |
| with redemption | \$604 | \$930 | \$1,283 | \$1,942*** |
| without redemption | \$204 | \$630 | \$1,083 | \$1,942*** |
| Class C | | | | |
| with redemption | \$298 | \$612 | \$1,052 | \$2,275 |
| without redemption | \$198 | \$612 | \$1,052 | \$2,275 |
| Class R | \$109 | \$340 | \$590 | \$1,306 |
| Class T | \$597 | \$906 | \$1,237 | \$2,170 |
| Class Z | \$117 | \$365 | \$633 | \$1,398 |

*** Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. Dreyfus has contractually agreed to waive receipt of its fees and/or assume the expenses of the fund's Class Z shares until at least November 30, 2007, so that the total annual operating expenses for Class Z (excluding taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) do not exceed 1.11%. For the last fiscal year, the total annual operating expenses of Class Z amounted to 1.07%.

Rule 12b-1 fee: the fee paid to the fund's distributor for financing the sale and distribution of Class B, Class C and Class T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

Shareholder services fee: a fee of 0.25% paid to the fund's distributor with respect to Class A, B, C and T shares and a fee of up to 0.25% used to reimburse the fund's distributor with respect to Class Z shares for providing shareholder services.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

MANAGEMENT

Investment advisers

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$194 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the effective annual rate of 0.79% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's semiannual report for the six months ended May 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.5 trillion in assets under management, administration or custody, including \$995 billion under management.

On December 4, 2006, Mellon Financial and The Bank of New York Company, Inc. (BNY) announced that they had entered into a definitive agreement to merge. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, Dreyfus would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals and the approval of BNY's and Mellon Financial's shareholders, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Keith Stransky has been the fund's asset allocation manager since March 2007. Mr. Stransky is the Chief Investment Officer (Traditional) and a Senior Portfolio Manager for EACM Advisors LLC, an affiliate of Dreyfus, where he has been employed since 1983.

Brian Ferguson and Sean Fitzgibbon have been the fund's primary equity portfolio managers since March, 2007. Mr. Ferguson is a Senior Vice President and the Director of the U.S. Large Cap Value Equity Team of The Boston Company Asset Management, LLC (TBCAM), an affiliate of Dreyfus, where he has been employed since June 1997. Mr. Ferguson became a dual employee of Dreyfus and TBCAM in April 2001. Mr. Fitzgibbon is a Senior Vice President, portfolio manager and a member of the U.S. Large Cap Core Equity Team of TBCAM where he has been employed since 1991. Mr. Fitzgibbon became a dual employee of Dreyfus and TBCAM in October, 2004.

Catherine Powers and Kent Wosepka have been the fund's primary fixed-income portfolio managers since March, 2007. Ms. Powers is a senior portfolio manager for active core strategies, responsible for high grade core and core plus fixed income strategies, with Standish Mellon Asset Management, LLC (Standish Mellon), where she has been employed since 1988. Ms. Powers became a dual employee of Dreyfus and Standish Mellon in September 2001. Mr. Wosepka is a Vice President and portfolio manager for Standish Mellon, where he has been employed since 1998. Mr. Wosepka has been a dual employee of Dreyfus and Standish Mellon since July 2002.

The fund's Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the respective code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by employees of Dreyfus does not disadvantage any fund managed by Dreyfus.

FINANCIAL HIGHLIGHTS

The following tables describe the performance of the fund's Class A, Class B, Class C, Class R, Class T and Class Z shares for the fiscal periods indicated. "Total return" shows how much your investment in the fund's Class A, Class B, Class C, Class R, Class T and Class Z shares would have increased (or decreased) during each period, assuming you had

reinvested all dividends and distributions. These figures have been independently audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm for the fund, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

Your Investment

SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

This prospectus offers Class A, B, C, T and R shares of the fund.

The fund's Class B shares are offered only in connection with dividend reinvestment and exchanges of Class B shares of certain other funds advised by Dreyfus or by Founders Asset Management, LLC (Founders), an indirect subsidiary of Dreyfus, or certain eligible shares of Dreyfus Worldwide Dollar Money Market Fund, Inc.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees have the same purpose as the front-end sales charge: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions in connection with the sale of fund shares. A CDSC is not charged on fund shares acquired through the reinvestment of fund dividends.

Deciding which class of shares to buy: Class A, C, T, R and Z shares

The fund offers Class A, C, T and R shares. Class Z shares generally are offered only to shareholders who received Class Z shares in exchange for their shares of Dreyfus Balanced Fund, Inc. as a result of the reorganization of such fund. Class Z shares generally are not available for new accounts. The different classes of the fund represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

When you invest in Class A or Class T shares you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees, and Class T shares have lower ongoing Rule 12b-1 fees than Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each of these classes follows. You should review these arrangements with your financial representative before determining which class to invest in.

| | Class A | Class C | Class T | Class R | Class Z* |
|---|---|--|---|---------|-------------|
| Initial sales charge | up to 5.75% | none | up to 4.50% | none | none |
| Ongoing distribution fee (Rule 12b-1 fee) | none | 0.75% | 0.25% | none | none |
| Ongoing shareholder service fee | 0.25% | 0.25% | 0.25% | none | up to 0.25% |
| Contingent deferred sales charge | 1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more | 1% on sale of shares held for one year or less | 1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more | none | none |
| Conversion feature | no | no | no | no | no |
| Recommended purchase maximum | none | \$1 million | \$1 million | none | none |

* Class Z shares generally are not available for new accounts.

Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the higher ongoing Rule 12b-1 fees on Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

Class A sales charges

| Purchase amount | Sales charge as a % of offering price | Sales charge as a % of NAV |
|------------------------|---------------------------------------|----------------------------|
| Less than \$50,000 | 5.75% | 6.10% |
| \$50,000 to \$99,999 | 4.50% | 4.70% |
| \$100,000 to \$249,999 | 3.50% | 3.60% |
| \$250,000 to \$499,999 | 2.50% | 2.60% |
| \$500,000 to \$999,999 | 2.00% | 2.00% |
| \$1 million or more * | none | none |

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class T shares may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fees

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

Class T sales charges

| Purchase amount | Sales charge as a % of offering price | Sales charge as a % of NAV |
|------------------------|---------------------------------------|----------------------------|
| Less than \$50,000 | 4.50% | 4.70% |
| \$50,000 to \$99,999 | 4.00% | 4.20% |
| \$100,000 to \$249,999 | 3.00% | 3.10% |
| \$250,000 to \$499,999 | 2.00% | 2.00% |
| \$500,000 to \$999,999 | 1.50% | 1.50% |
| \$1 million or more * | none | none |

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Dreyfus Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at www.dreyfus.com and in the SAI.

You can reduce your initial sales charge in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds that are subject to a sales charge. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Dreyfus Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain Dreyfus Premier Funds or Dreyfus Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See “How to Buy Shares” in the SAI.)

Class A shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund’s distributor
- “wrap” accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund’s distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- participants in Mellon Financial’s Health Savings Account program
- investors with an investment adviser-client relationship with Wisconsin Capital (it is the responsibility of Wisconsin Capital to notify the fund of the existence of such relationship at the time of initial and any subsequent purchase of fund shares including exchanges)
- qualified investors who (i) purchase Class A shares directly through the fund’s distributor, and (ii) have, or whose spouse or minor children have, beneficially owned shares and continuously maintained an open account directly through the distributor in a Dreyfus-managed fund, including the fund, or a Founders-managed fund since on or before February 28, 2006

- investors with the cash proceeds from the investor's exercise of employment-related stock options, whether invested in the fund directly or indirectly through an exchange from a Dreyfus-managed money market fund, provided that the proceeds are processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing stock options. Upon establishing the account in the fund or the Dreyfus-managed money market fund, the investor and the investor's spouse and minor children become eligible to purchase Class A shares of the fund at NAV, whether or not using the proceeds of the employment-related stock options
- members of qualified affinity groups who purchase Class A shares directly through the fund's distributor, provided that the qualified affinity group has entered into an affinity agreement with the distributor

Class A and Class T shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the distribution proceeds from qualified and non-qualified retirement plans or a Dreyfus-sponsored 403(b)(7) plan, provided that, in the case of a qualified or non-qualified retirement plan, the rollover is processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing rollovers. Upon establishing the Dreyfus-sponsored IRA rollover account in the fund, the shareholder becomes eligible to make subsequent purchases of Class A or Class T shares of the fund at NAV in such account

Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay higher ongoing Rule 12b-1 fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Because Class A shares will always be a more favorable investment than Class C shares for investments of \$1 million or more, the fund will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC.

Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on redemptions of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

Class Z shares are not available for new accounts

Class Z shares generally are offered only to shareholders who received Class Z shares in exchange for their shares of Dreyfus Balanced Fund, Inc. as a result of the reorganization of such fund.

Class B share considerations

Class B shares sold within six years of purchase are subject to the following CDSCs:

Class B sales charges

| For shares sold in the: | CDSC as a % of amount redeemed subject to the charge |
|-------------------------|--|
| First year | 4.00% |
| Second year | 4.00% |
| Third year | 3.00% |
| Fourth year | 3.00% |
| Fifth year | 2.00% |
| Sixth year | 1.00% |
| Thereafter | none |

Class B shares also are subject to an annual Rule 12b-1 fee. Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased.

CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and non-qualified employee benefit plans

Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on

which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Traditional IRA: an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

Spousal IRA: an IRA funded by a working spouse in the name of a nonworking spouse.

Roth IRA: an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

Education Savings Account: an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

For more complete IRA information, consult Dreyfus or your tax professional.

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its existing shares outstanding. The fund's shares are offered at NAV, but Class A and Class T shares are subject to a front-end sales charge and Class B and Class C shares generally are subject to higher annual operating expenses and a CDSC.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

| | Initial | Additional |
|-----------------------------------|----------------|--|
| Regular accounts | \$1,000 | \$100 |
| Traditional IRAs | \$750 | no minimum |
| Spousal IRAs | \$750 | no minimum |
| Roth IRAs | \$750 | no minimum |
| Education Savings Accounts | \$500 | no minimum <i>after the first year</i> |

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on fund shares you acquired by reinvesting your fund dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online

| Proceeds sent by | Minimum phone/online | Maximum phone/online |
|-----------------------------|----------------------|---|
| Check* | no minimum | \$250,000 per day |
| Wire | \$1,000 | \$500,000 for joint accounts every 30 days/ \$20,000 per day |
| Dreyfus TeleTransfer | \$500 | \$500,000 for joint accounts every 30 days/ \$20,000 per day |

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policies

To offset the relatively higher costs of servicing smaller accounts, the fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; IRA accounts; Education Savings Accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax adviser before investing.

SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611. Holders of Class Z shares should call 1-800-645-6561.

For investing

| | |
|--|---|
| Dreyfus Automatic Asset Builder® | For making automatic investments from a designated bank account. |
| Dreyfus Payroll Savings Plan | For making automatic investments through a payroll deduction. |
| Dreyfus Government Direct Deposit Privilege | For making automatic investments from your federal employment, Social Security or other regular federal government check. |
| Dreyfus Dividend Sweep | For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Dreyfus Founders funds (not available for IRAs). |

For exchanging shares

| | |
|--|---|
| Dreyfus Auto-Exchange Privilege | For making regular exchanges from the fund into another Dreyfus fund or certain Dreyfus Founders funds. |
|--|---|

For selling shares

| | |
|--|---|
| Dreyfus Automatic Withdrawal Plan | For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal. |
|--|---|

Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Dreyfus Founders fund. Class Z shares also may be exchanged for shares of certain other Dreyfus funds. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds and Class B shares into Class B shares of General Money Market Fund, Inc. You can request your exchange by contacting your financial representative. Class Z shareholders also may request an exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one. Clients of Wisconsin Capital may exchange Class A shares for Class A shares of Dreyfus Premier Blue Chip Fund or Dreyfus Premier Select Fund at NAV, provided the exchange is made through Wisconsin Capital; such shareholders will be charged a sales load when exchanging into any other fund that has one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call, or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

Dreyfus Express®

voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, purchase fund shares, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling 1-800-645-6561. Certain requests may require the services of a representative.

Reinvestment privilege

Upon written request, you can reinvest up to the number of Class A, Class B or Class T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

Account statements

Every fund investor automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

INSTRUCTIONS FOR **REGULAR ACCOUNTS**

TO OPEN AN ACCOUNT

In Writing

Complete the application.
Mail your application and a check to:
Name of Fund
P.O. Box 55268, Boston, MA 02205-8502
Attn: Institutional Processing

TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.
Mail the slip and the check to:
Name of Fund
P.O. Box 55268, Boston, MA 02205-8502
Attn: Institutional Processing

TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:
The Dreyfus Family of Funds
P.O. Box 55268, Boston, MA 02205-8502
Attn: Institutional Processing

By Telephone

Wire Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900480084
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

Wire Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900480084
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Electronic check Same as wire, but insert "666" before your 14-digit account number.

For More Information

Dreyfus Premier Balanced Opportunity Fund
A series of Dreyfus Premier Manager Funds II
SEC file number: 811-21327

More information on this fund is available free upon request, including the following:

Annual/Semiannual Report

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's managers discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at www.dreyfus.com.

Statement of Additional Information (SAI)

Provides more details about the fund and its policies. A current SAI is available at www.dreyfus.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, on its website at www.dreyfus.com, under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at www.dreyfus.com its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

Note to Investors

At a meeting of the Board of Trustees of Dreyfus Premier Manager Funds II, held on March 8, 2007, the Board approved the liquidation of Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund ("the Funds") effective on or about May 25, 2007 (the "Liquidation Date"). Accordingly, effective on or about April 9, 2007, no new or subsequent investments in the Funds will be permitted.

In addition, effective immediately, the contingent deferred sales charge applicable to redemptions of Class B and Class C shares and certain Class A and Class T shares of the Funds will be waived on any redemption of such Fund shares.

Fund shares held on the Liquidation Date in Dreyfus sponsored Individual Retirement Accounts ("IRAs") will be exchanged for shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. (the "Money Market Fund") to avoid penalties that may be imposed on holders of IRAs under the Internal Revenue Code if their Fund shares were redeemed in cash. Investors may obtain a copy of the Prospectus of the Money Market Fund by calling 1-800-645-6561.

Dreyfus Premier Blue Chip Fund

Ticker Symbols **Class A: DBCAX**
Class B: DBCBX
Class C: DBUCX
Class R: DBCRX
Class T: DBCTX

GOAL/APPROACH

The fund seeks long-term growth of capital and income. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of “blue chip” companies. The fund considers well-established companies with market capitalizations of at least \$1 billion if the company’s stock is included in the S&P 500 Index or the Dow Jones Industrial Average, or \$2 billion if not so included, to be “blue chip” companies.

The fund normally invests 10% to 20% of its assets in income-producing securities. These income-producing securities consist primarily of dividend-paying blue chip and other common stocks, preferred stocks, securities that are convertible into common stocks and investment grade fixed-income securities. The fund may invest up to 20% of its assets in fixed-income securities (up to 5% of which may be invested in fixed-income securities rated below investment grade), including corporate and other debt securities.

In selecting securities for the fund, the portfolio managers analyze a company’s intrinsic value (the present value of the cash that can be taken out of a company in the future) and attempt to determine the price that a knowledgeable investor would be willing to pay for the entire company, given its financial characteristics, management, industry position and growth potential. Then, the portfolio managers compare the company’s market valuation relative to its intrinsic business value.

The fund generally invests in higher quality companies that are trading at significant discounts to the portfolio managers’ estimates of their intrinsic value. These companies may include, to a limited extent, medium- and smaller-sized companies. The portfolio managers typically look for companies that possess the following characteristics:

- leading market positions
- high barriers to market entry and other competitive or technological advantages
- high returns on equity and invested capital
- consistent operating history
- capable management

The Fund

- solid balance sheets
- good growth prospects

The fund’s portfolio managers employ a blended investment style, which they generally characterize as “growth at a reasonable price.” However, the portfolio managers may prefer a certain investment style and look for growth stocks or value stocks when warranted by market conditions and other factors.

The fund seeks to provide investors with competitive after-tax investment returns by holding quality securities for the long term, which is designed to give the fund greater tax-efficiency. The fund anticipates that capital growth will be accompanied by dividend income and growth of dividend income over time.

The fund typically sells securities in companies when their market valuations rise significantly above the portfolio managers’ estimates of intrinsic business values, long-term economic fundamentals significantly deteriorate, or better opportunities are presented in the marketplace.

Concepts to understand

Growth companies: companies whose earnings are expected to grow faster than the overall market. Often, growth stocks have relatively higher price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

Value companies: companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

Investment grade fixed-income securities: independent rating organizations analyze and evaluate a bond issuer’s credit history and ability to repay debts. Based on their assessment, rating organizations assign letter grades that reflect the issuer’s creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio managers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.

- *Interest rate and credit risk.* The fund's investments in income-producing securities are affected by changes in interest rates and the credit quality of the securities. Typically, a rise in interest rates will adversely affect the prices of such securities and, accordingly, the fund's share price. The longer the effective maturity and duration of such securities held by the fund, the more its share price is likely to react to interest rates. Credit risk is the risk that the issuer of the security will fail to make timely interest or principal payments, or to otherwise honor its obligations. Credit risk includes the possibility that such securities held by the fund will have their credit rating downgraded or will default, potentially lowering the fund's share price.
- *Smaller company risk.* To the extent the fund invests in small and midsize companies, it will be subject to additional risks because the earnings and revenues of such companies tend to be less predictable and their share prices more volatile than those of larger, more established companies. In addition, the shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities, or hold cash. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

Although the fund invests principally in the securities of U.S. issuers, it may invest in foreign securities. To the extent the fund invests in foreign securities, such investments will be subject to special risks including exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of another investment company advised by the fund's sub-investment adviser, Thompson Plumb Blue Chip Fund (the predecessor fund), were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on February 25, 2005. The fund's Class J shares are not offered in this prospectus. The performance figures for the fund's Class A shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year for periods prior to February 25, 2005 and the performance of the fund's Class A shares thereafter. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The performance figures for the fund's Class A, Class B, Class C, Class R and Class T shares in the table represent the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the respective class of fund shares thereafter, and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks. These returns have been adjusted to reflect the fund's applicable sales loads. Performance figures have not been adjusted to reflect the fund's estimated operating expenses; if these expenses had been reflected,

such performance may have been lower. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. All of the fund's share classes invest in the same portfolio of securities. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares (based on the performance of the predecessor fund's shares for periods prior to February 25, 2005, adjusted to reflect the sales load applicable to the fund's Class A shares). After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

Class A shares*

Best Quarter: Q2 '03 +24.86%

Worst Quarter: Q1 '03 -8.35%

* Represents the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the fund's Class A shares thereafter.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Average annual total returns as of 12/31/06*

| Share class | 1 Year | Since inception (8/1/02) |
|--|---------------|--------------------------|
| Class A returns before taxes | 4.16% | 7.38% |
| Class A returns after taxes on distributions | 3.66% | 7.11% |
| Class A returns after taxes on distributions and sale of fund shares | 3.38% | 6.52% |
| Class B returns before taxes | 5.77% | 8.10% |
| Class C returns before taxes | 9.06% | 8.86% |
| Class R returns before taxes | 10.69% | 8.89% |
| Class T returns before taxes | 5.40% | 7.57% |
| S&P 500® Index reflects no deduction for fees, expenses or taxes | 15.78% | 12.55% |

* Represents the performance of the predecessor fund's shares for periods prior to February 25, 2005, as adjusted to reflect the fund's applicable sales loads, and the performance of the respective class of fund shares thereafter.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

Fee table

| | Class A | Class B* | Class C | Class R | Class T |
|--|-------------|-------------|-------------|-------------|-------------|
| Shareholder transaction fees (<i>fees paid from your account</i>) | | | | | |
| Maximum front-end sales charge on purchases <i>% of offering price</i> | 5.75 | none | none | none | 4.50 |
| Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i> | none** | 4.00 | 1.00 | none | none** |
| Annual fund operating expenses (<i>expenses paid from fund assets</i>) | | | | | |
| <i>% of average daily net assets</i> | | | | | |
| Management fees | .75 | .75 | .75 | .75 | .75 |
| Rule 12b-1 fee | none | .75 | .75 | none | .25 |
| Shareholder services fee | .25 | .25 | .25 | none | .25 |
| Other expenses | .71 | 1.05 | .87 | 1.44 | 2.06 |
| Total | 1.71 | 2.80 | 2.62 | 2.19 | 3.31 |

* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

** Class B shares of the fund are available only in connection with dividend reinvestment and permitted exchanges of Class B shares of certain other funds.

Expense example

| | 1 Year | 3 Years | 5 Years | 10 Years |
|---------------------------|--------------|----------------|----------------|-------------------|
| Class A | \$739 | \$1,083 | \$1,450 | \$2,478 |

| <i>without redemption</i> | \$283 | \$868 | \$1,479 | \$2,627*** |
| Class C | | | | |
| <i>with redemption</i> | \$365 | \$814 | \$1,390 | \$2,954 |
| <i>without redemption</i> | \$265 | \$814 | \$1,390 | \$2,954 |
| Class R | \$222 | \$685 | \$1,175 | \$2,524 |
| Class T | \$769 | \$1,423 | \$2,099 | \$3,891 |

*** Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. During the past fiscal year, Dreyfus voluntarily waived a portion of its fee, reducing total expenses from 1.71% to 1.37% for Class A, 2.80% to 2.13% for Class B, 2.62% to 2.21% for Class C, 2.19% to 1.20% for Class R and 3.31% to 1.59% for Class T.

Rule 12b-1 fee: the fee paid to the fund's distributor for financing the sale and distribution of Class B, Class C and Class T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

Shareholder services fee: the fee paid to the fund's distributor for providing shareholder services.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

MANAGEMENT

Investment advisers

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$194 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the effective annual rate of 0.51% of the fund's average daily net assets. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.5 trillion in assets under management, administration or custody, including \$995 billion under management.

On December 4, 2006, Mellon Financial and The Bank of New York Company, Inc. (BNY) announced that they had entered into a definitive agreement to merge. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, Dreyfus would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals and the approval of BNY's and Mellon Financial's shareholders, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged Wisconsin Capital Management, LLC (Wisconsin Capital), formerly known as Thompson, Plumb & Associates, Inc., located at 1200 John Q. Hammons Drive, Madison, Wisconsin 53717, to serve as the fund's sub-investment adviser. Wisconsin Capital served as the predecessor fund's investment adviser and administrator. Since 1984, Wisconsin Capital has provided investment advice to individuals and institutional clients with substantial investment portfolios. As of December 31, 2006, Wisconsin Capital had approximately \$1.5 billion in assets under management. Wisconsin Capital, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

David B. Duchow and Timothy R. O'Brien serve as co-primary portfolio managers for the fund. They managed the predecessor fund since its inception in August 2002. Messrs. Duchow and O'Brien have each been a portfolio manager and investment analyst for Wisconsin Capital since 1992 and 1997, respectively. Thomas G. Plumb and Clint A. Oppermann serve as associate portfolio managers for the fund and assist Messrs. Duchow and O'Brien with investment research and analysis. Since the end of December 2003, Mr. Plumb has been president of Wisconsin Capital. He also is the sole owner of WCM, Inc., the manager of Wisconsin Capital. Prior to December 2003, Mr. Plumb had been vice president of Wisconsin Capital since co-founding it in June 1984. Mr. Oppermann has been vice president and director of research of Wisconsin Capital since November 2001. Since August 1999, Mr. Oppermann has been a portfolio manager for Wisconsin Capital.

The fund's Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, Dreyfus, Wisconsin Capital and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each of the Dreyfus and Wisconsin Capital code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the respective code's pre-clearance and disclosure procedures. The primary purpose of the respective code is to ensure that personal trading by employees of Dreyfus or Wisconsin Capital does not disadvantage any fund managed by Dreyfus or Wisconsin Capital, as the case may be.

FINANCIAL HIGHLIGHTS

The financial highlights information in the following table describes the performance of the fund's Class A, Class B, Class C, Class R and Class T shares. "Total return" shows how much your investment in the fund's Class A, Class B, Class C, Class R and Class T shares would have increased (or decreased) during the period, assuming you had reinvested all dividends

and distributions. These figures have been independently audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm for the fund, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

Your Investment

SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

This prospectus offers Class A, B, C, T and R shares of the fund.

The fund's Class B shares are offered only in connection with dividend reinvestment and exchanges of Class B shares of certain other funds advised by Dreyfus or by Founders Asset Management, LLC (Founders), an indirect subsidiary of Dreyfus, or certain eligible shares of Dreyfus Worldwide Dollar Money Market Fund, Inc.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees have the same purpose as the front-end sales charge: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions in connection with the sale of fund shares. A CDSC is not charged on fund shares acquired through the reinvestment of fund dividends.

Deciding which class of shares to buy: Class A, C, R and T shares

The different classes of the fund represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

When you invest in Class A or Class T shares you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees, and Class T shares have lower ongoing Rule 12b-1 fees than Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each of these classes follows. You should review these arrangements with your financial representative before determining which class to invest in.

| | Class A | Class C | Class T | Class R |
|--|---|--|---|---------|
| Initial sales charge | up to 5.75% | none | up to 4.50% | none |
| Ongoing distribution fee (Rule 12b-1 fee) | none | 0.75% | 0.25% | none |
| Ongoing shareholder service fee | 0.25% | 0.25% | 0.25% | none |
| Contingent deferred sales charge | 1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more | 1% on sale of shares held for one year or less | 1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more | none |
| Conversion feature | no | no | no | no |
| Recommended purchase maximum | none | \$1 million | \$1 million | none |

Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

Class A sales charges

| Purchase amount | Sales charge as a % of offering price | Sales charge as a % of NAV |
|------------------------|---------------------------------------|----------------------------|
| Less than \$50,000 | 5.75% | 6.10% |
| \$50,000 to \$99,999 | 4.50% | 4.70% |
| \$100,000 to \$249,999 | 3.50% | 3.60% |
| \$250,000 to \$499,999 | 2.50% | 2.60% |
| \$500,000 to \$999,999 | 2.00% | 2.00% |
| \$1 million or more * | none | none |

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class T shares may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fees

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

Class T sales charges

| Purchase amount | Sales charge as a % of offering price | Sales charge as a % of NAV |
|------------------------|---------------------------------------|----------------------------|
| Less than \$50,000 | 4.50% | 4.70% |
| \$50,000 to \$99,999 | 4.00% | 4.20% |
| \$100,000 to \$249,999 | 3.00% | 3.10% |
| \$250,000 to \$499,999 | 2.00% | 2.00% |
| \$500,000 to \$999,999 | 1.50% | 1.50% |
| \$1 million or more * | none | none |

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Dreyfus Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at www.dreyfus.com and in the SAI.

You can reduce your initial sales charge in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds that are subject to a sales charge. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Dreyfus Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain Dreyfus Premier Funds or Dreyfus Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See “How to Buy Shares” in the SAI.)

Class A shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund’s distributor
- “wrap” accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund’s distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors with an investment adviser-client relationship with Wisconsin Capital (it is the responsibility of Wisconsin Capital to notify the fund of the existence of such relationship at the time of initial and any subsequent purchase of fund shares including exchanges)

- qualified investors who (i) purchase Class A shares directly through the fund's distributor, and (ii) have, or whose spouse or minor children have, beneficially owned shares and continuously maintained an open account directly through the distributor in a Dreyfus-managed fund, including the fund, or a Founders-managed fund since on or before February 28, 2006
- investors with the cash proceeds from the investor's exercise of employment-related stock options, whether invested in the fund directly or indirectly through an exchange from a Dreyfus-managed money market fund, provided that the proceeds are processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing stock options. Upon establishing the account in the fund or the Dreyfus-managed money market fund, the investor and the investor's spouse and minor children become eligible to purchase Class A shares of the fund at NAV, whether or not using the proceeds of the employment-related stock options
- members of qualified affinity groups who purchase Class A shares directly through the fund's distributor, provided that the qualified affinity group has entered into an affinity agreement with the distributor

Class A and Class T shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the distribution proceeds from qualified and non-qualified retirement plans or a Dreyfus-sponsored 403(b)(7) plan, provided that, in the case of a qualified or non-qualified retirement plan, the rollover is processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing rollovers. Upon establishing the Dreyfus-sponsored IRA rollover account in the fund, the shareholder becomes eligible to make subsequent purchases of Class A or Class T shares of the fund at NAV in such account

Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay higher ongoing Rule 12b-1 fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Because Class A shares will always be a more favorable investment than Class C shares for investments of \$1 million or more, the fund will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC.

Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on redemptions of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

Class B share considerations

Class B shares sold within six years of purchase are subject to the following CDSCs:

Class B sales charges

| For shares sold in the: | CDSC as a % of amount redeemed subject to the charge |
|-------------------------|--|
| First year | 4.00% |
| Second year | 4.00% |
| Third year | 3.00% |
| Fourth year | 3.00% |
| Fifth year | 2.00% |
| Sixth year | 1.00% |
| Thereafter | none |

Class B shares also are subject to an annual Rule 12b-1 fee. Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased.

CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and non-qualified employee benefit plans

Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its existing shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

| | Initial | Additional |
|----------------------------|---------|------------------------------------|
| Regular accounts | \$1,000 | \$100 |
| Traditional IRAs | \$750 | no minimum |
| Spousal IRAs | \$750 | no minimum |
| Roth IRAs | \$750 | no minimum |
| Education Savings Accounts | \$500 | no minimum after the first year |

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

- Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

Spousal IRA: an IRA funded by a working spouse in the name of a nonworking spouse.

Roth IRA: an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

Education Savings Account: an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

For more complete IRA information, consult Dreyfus or our tax professional.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on fund shares you acquired by reinvesting your fund dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online

| Proceeds sent by | Minimum phone/online | Maximum phone/online |
|-----------------------------|----------------------|---|
| Check* | no minimum | \$250,000 per day |
| Wire | \$1,000 | \$500,000 for joint accounts every 30 days / \$20,000 per day |
| Dreyfus TeleTransfer | \$500 | \$500,000 for joint accounts every 30 days / \$20,000 per day |

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than our roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policies

To offset the relatively higher costs of servicing smaller accounts, the fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; IRA accounts; Education Savings Accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax adviser before investing.

SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

For investing

| | |
|--|---|
| Dreyfus Automatic Asset Builder® | For making automatic investments from a designated bank account. |
| Dreyfus Payroll Savings Plan | For making automatic investments through a payroll deduction. |
| Dreyfus Government Direct Deposit Privilege | For making automatic investments from your federal employment, Social Security or other regular federal government check. |
| Dreyfus Dividend Sweep | For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Dreyfus Founders funds (not available for IRAs). |

For exchanging shares

| | |
|--|---|
| Dreyfus Auto-Exchange Privilege | For making regular exchanges from the fund into another Dreyfus fund or certain Dreyfus Founders funds. |
|--|---|

For selling shares

| | |
|--|---|
| Dreyfus Automatic Withdrawal Plan | For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal. |
|--|---|

Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Dreyfus Founders fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds and Class B shares into Class B shares of General Money Market Fund, Inc. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one. Clients of Wisconsin Capital may exchange Class A shares for Class A shares of Dreyfus Premier Balanced Opportunity Fund or Dreyfus Premier Select Fund at NAV, provided the exchange is made through Wisconsin Capital; such shareholders will be charged a sales load when exchanging into any other fund that has one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call, or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

Reinvestment privilege

Upon written request, you can reinvest up to the number of Class A or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

Account statements

Every fund investor automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

For More Information

Dreyfus Premier Blue Chip Fund

A series of Dreyfus Premier Manager Funds II

SEC file number: 811-21327

More information on this fund is available free upon request, including the following:

Annual/Semiannual Report

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's managers discussing recent market conditions, economic trends and investment strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at www.dreyfus.com.

Statement of Additional Information (SAI)

Provides more details about the fund and its policies. A current SAI is available at www.dreyfus.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at www.dreyfus.com its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

Note to Investors

At a meeting of the Board of Trustees of Dreyfus Premier Manager Funds II, held on March 8, 2007, the Board approved the liquidation of Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund ("the Funds") effective on or about May 25, 2007 (the "Liquidation Date"). Accordingly, effective on or about April 9, 2007, no new or subsequent investments in the Funds will be permitted.

In addition, effective immediately, the contingent deferred sales charge applicable to redemptions of Class B and Class C shares and certain Class A and Class T shares of the Funds will be waived on any redemption of such Fund shares.

Fund shares held on the Liquidation Date in Dreyfus sponsored Individual Retirement Accounts ("IRAs") will be exchanged for shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. (the "Money Market Fund") to avoid penalties that may be imposed on holders of IRAs under the Internal Revenue Code if their Fund shares were redeemed in cash. Investors may obtain a copy of the Prospectus of the Money Market Fund by calling 1-800-645-6561.

Class T: DSLTX

GOAL/APPROACH

The fund seeks a high level of long-term capital appreciation. To pursue this goal, the fund invests in a select portfolio of companies that the portfolio managers believe are undervalued and have the potential for growth. The fund invests primarily in common stocks and, under normal circumstances, will maintain positions in approximately 20 to 40 companies.

In selecting investments for the fund, the portfolio managers analyze both the quality of the company and its business and the company's market valuation relative to its intrinsic business value. The fund typically invests in average or higher quality companies when their shares are trading at significant discounts to the portfolio managers' estimates of intrinsic values.

In choosing stocks for the fund to invest in, the portfolio managers look for companies that possess most of the following characteristics:

- good growth prospects
- leading market positions
- consistent operating history
- capable management
- high barriers to market entry and other competitive or technological advantages
- attractive returns on equity and assets
- relatively low debt burdens

The intrinsic value of a business is the present value of the cash that can be taken out of it in the future. The portfolio managers estimate a company's intrinsic value through the use of proprietary models based on discounted free cash flow methodologies and "cross-checked" with historical absolute and relative valuation measures.

The fund generally invests in larger companies, but may invest in companies of any market-capitalization range and may occasionally emphasize companies in certain size ranges that are then generally regarded as undervalued. Some of the stocks in

The Fund

which the fund invests may be those of smaller companies whose market capitalizations are less than \$1 billion.

The fund's stock investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings (IPOs). The fund also may invest in other securities, including fixed-income securities such as bonds and short-term debt instruments (up to 5% of the fund's total assets may be invested in fixed-income securities rated below investment grade). The fund may hold a significant portion of its assets in cash, fixed-income securities and short-term instruments when the portfolio managers believe stocks of companies that meet the fund's criteria are in short supply or when the portfolio managers are otherwise unable to locate an adequate number of such stocks. The fund will generally reduce its holdings of cash and such other securities as more attractive equity investments become available.

The fund typically sells securities in companies when their market valuations rise significantly above the portfolio managers' estimates of intrinsic business values, long-term economic fundamentals significantly deteriorate, or better opportunities are presented in the marketplace.

Concepts to understand

Value companies: companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

Large companies: established companies that tend to have long histories of operation, well-established business relationships, substantial resources and the ability to weather change and economic downturn.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Selection risk.* The particular securities that are selected for the fund may not perform as well as the fund's portfolio managers expected when the fund bought them, and the fund may underperform the securities markets generally and other funds with similar objectives.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Value stock risk.* Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing growth stocks). Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio managers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Smaller company risk.* Small and midsize companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *IPO risk.* The fund may purchase securities of companies in IPOs. The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

- *Non-diversification risk.* The fund is non-diversified, which means that a relatively high percentage of the fund's assets may be invested in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities, or hold cash. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

Any investment in fixed-income securities will be subject primarily to interest rate and credit risks. Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, to the extent the fund invests in bonds, the fund's share price. The longer the effective maturity and duration of these investments, the more likely the fund's share price will react to interest rates. Credit risk is the risk that the issuer of the security will fail to make timely interest or principal payments, and includes the possibility that any of the fund's fixed-income investments will have its credit rating downgraded. The fund may hold a significant portion of its assets in cash, fixed-income securities and short-term instruments until more attractive equity investments become available. The fund's holdings of cash and such securities will make it more difficult for the fund to achieve its objective and limit its ability to participate in market advances.

Although the fund invests principally in the securities of U.S. issuers, it may invest in foreign securities. To the extent the fund invests in foreign securities, such investments will be subject to special risks including exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of another investment company advised by the fund's sub-investment adviser, Thompson Plumb Select Fund (the predecessor fund), were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on February 25, 2005. The fund's Class J shares are not offered in this prospectus. The performance figures for the fund's Class A shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year for periods prior to February 25, 2005 and the performance of the fund's Class A shares thereafter. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The performance figures for the fund's Class A, Class B, Class C, Class R and Class T shares in the table represent the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the respective class of fund shares thereafter, and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks. These returns have been adjusted to reflect the fund's applicable sales loads. Performance figures have not been adjusted to reflect the fund's estimated operating expenses; if these expenses had been reflected, such performance may have been lower. All returns assume reinvestment of dividends and distributions.

Of course, past performance (before and after taxes) is no guarantee of future results. All of the fund's share classes invest in the same portfolio of securities. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares (based on the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the fund's Class A shares thereafter, adjusted to reflect the sales load applicable to the fund's Class A shares). After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

Class A shares*

Best Quarter: Q2 '03 +32.83%

Worst Quarter: Q2 '02 -20.04%

* Represents the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the fund's Class A shares thereafter.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Average annual total returns as of 12/31/06*

| Share class | 1 Year | 5 Years | Since inception (12/3/01) |
|--|---------------|--------------|---------------------------|
| Class A returns before taxes | 3.76% | 4.68% | 5.37% |
| Class A returns after taxes on distributions | 3.12% | 4.26% | 4.96% |
| Class A returns after taxes on distributions and sale of fund shares | 3.29% | 3.99% | 4.60% |
| Class B returns before taxes | 5.27% | 5.30% | 6.16% |
| Class C returns before taxes | 8.18% | 5.62% | 6.30% |
| Class R returns before taxes | 10.15% | 5.99% | 6.67% |
| Class T returns before taxes | 4.90% | 4.85% | 5.55% |
| S&P 500® Index reflects no deduction for fees, expenses or taxes | 15.78% | 6.18% | 6.26% |

* Represents the performance of the predecessor fund's shares for periods prior to February 25, 2005, as adjusted to reflect the fund's applicable sales loads, and the performance of the respective class of fund shares thereafter.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

Fee table

| | Class A | Class B* | Class C | Class R | Class T |
|---|---------------|-------------|-------------|-------------|---------------|
| Shareholder transaction fees (<i>fees paid from your account</i>) | | | | | |
| Maximum front-end sales charge on purchases <i>% of offering price</i> | 5.75 | none | none | none | 4.50 |
| Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i> | none** | 4.00 | 1.00 | none | none** |
| Annual fund operating expenses (<i>expenses paid from fund assets</i>) <i>% of average daily net assets</i> | | | | | |
| Management fees | .80 | .80 | .80 | .80 | .80 |
| Rule 12b-1 fee | none | .75 | .75 | none | .25 |
| Shareholder services fee | .25 | .25 | .25 | none | .25 |
| Other expenses | .68 | .93 | 2.32 | 1.84 | 1.35 |
| Total | 1.73 | 2.73 | 4.12 | 2.64 | 2.65 |

* Class B shares of the fund are available only in connection with dividend reinvestment and permitted exchanges of Class B shares of certain other funds.

** Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

Expense example

| | 1 Year | 3 Years | 5 Years | 10 Years |
|---------------------------|--------------|----------------|----------------|-------------------|
| Class A | \$741 | \$1,089 | \$1,460 | \$2,499 |
| Class B | | | | |
| <i>with redemption</i> | \$676 | \$1,147 | \$1,645 | \$2,599*** |
| <i>without redemption</i> | \$276 | \$847 | \$1,445 | \$2,599*** |
| Class C | | | | |
| <i>with redemption</i> | \$514 | \$1,252 | \$2,106 | \$4,306 |
| <i>without redemption</i> | \$414 | \$1,252 | \$2,106 | \$4,306 |
| Class R | \$267 | \$820 | \$1,400 | \$2,973 |
| Class T | \$706 | \$1,236 | \$1,792 | \$3,299 |

*** Assumes conversion of Class B to Class A at the end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. During the past fiscal year, Dreyfus voluntarily waived a portion of its fee, reducing total expenses from 1.73% to 1.54% for Class A, 2.73% to 2.30% for Class B, 4.12% to 2.30% for Class C, 2.64% to 1.30% for Class R and 2.65% to 1.81% for Class T.

Rule 12b-1 fee: the fee paid to the fund's distributor for financing the sale and distribution of Class B, Class C and Class T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

Shareholder services fee: the fee paid to the fund's distributor for providing shareholder services.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

MANAGEMENT

Investment advisers

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$194 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the effective annual rate of 0.64% of the fund's average daily net assets. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.5 trillion in assets under management, administration or custody, including \$995 billion under management.

On December 4, 2006, Mellon Financial and The Bank of New York Company, Inc. (BNY) announced that they had entered into a definitive agreement to merge. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, Dreyfus would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals and the approval of BNY's and Mellon Financial's shareholders, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged Wisconsin Capital Management, LLC (Wisconsin Capital), formerly known as Thompson, Plumb & Associates, Inc., located at 1200 John Q. Hammons Drive, Madison, Wisconsin 53717, to serve as the fund's sub-investment adviser. Wisconsin Capital served as the predecessor fund's investment adviser and administrator. Since 1984, Wisconsin Capital has provided investment advice to individuals and institutional clients with substantial investment portfolios. As of December 31, 2006, Wisconsin Capital had approximately \$1.5 billion in assets under management. Wisconsin Capital, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

Clint A. Oppermann serves as primary portfolio manager for the fund. He managed the predecessor fund since its inception in December 2001. Mr. Oppermann has been vice president and director of research of Wisconsin Capital since November 2001. Since August 1999, Mr. Oppermann has been a portfolio manager for Wisconsin Capital. Thomas G. Plumb, David B. Duchow, and Timothy R. O'Brien serve as associate portfolio managers for the fund and assist Mr. Oppermann with investment research and analysis. Since the end of December 2003, Mr. Plumb has been president of Wisconsin Capital. He also is the sole owner of WCM, Inc., the manager of Wisconsin Capital. Prior to December 2003, Mr. Plumb had been vice president of Wisconsin Capital since co-founding it in June 1984. Messrs. Duchow and O'Brien have each been a portfolio manager and investment analyst for Wisconsin Capital since 1992 and 1997, respectively.

The fund's Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of fund shares.

Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, Dreyfus, Wisconsin Capital and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each of the Dreyfus and Wisconsin Capital code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the respective code's pre-clearance and disclosure procedures. The primary purpose of the respective code is to ensure that personal trading by employees of Dreyfus or Wisconsin Capital does not disadvantage any fund managed by Dreyfus or Wisconsin Capital, as the case may be.

FINANCIAL HIGHLIGHTS

The financial highlights information in the following table describes the performance of the fund's Class A, Class B, Class C, Class R and Class T shares. "Total return" shows how much your investment in the fund's Class A, Class B, Class C, Class R and Class T shares would have increased (or decreased) during the period, assuming you had reinvested all

dividends and distributions. These figures have been independently audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm for the fund, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

Your Investment

SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

This prospectus offers Class A, B, C, T and R shares of the fund.

The fund's Class B shares are offered only in connection with dividend reinvestment and exchanges of Class B shares of certain other funds advised by Dreyfus or by Founders Asset Management, LLC (Founders), an indirect subsidiary of Dreyfus, or certain eligible shares of Dreyfus Worldwide Dollar Money Market Fund, Inc.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees have the same purpose as the front-end sales charge: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions in connection with the sale of fund shares. A CDSC is not charged on fund shares acquired through the reinvestment of fund dividends.

Deciding which class of shares to buy: Class A, C, R and T shares

The different classes of the fund represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

When you invest in Class A or Class T shares you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees, and Class T shares have lower ongoing Rule 12b-1 fees than Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each of these classes follows. You should review these arrangements with your financial representative before determining which class to invest in.

| | Class A | Class C | Class T | Class R |
|---|---|--|---|---------|
| Initial sales charge | up to 5.75% | none | up to 4.50% | none |
| Ongoing distribution fee (Rule 12b-1 fee) | none | 0.75% | 0.25% | none |
| Ongoing shareholder service fee | 0.25% | 0.25% | 0.25% | none |
| Contingent deferred sales charge | 1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more | 1% on sale of shares held for one year or less | 1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more | none |
| Conversion feature | no | no | no | no |
| Recommended purchase maximum | none | \$1 million | \$1 million | none |

Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

Class A sales charges

| Purchase amount | Sales charge as a % of offering price | Sales charge as a % of NAV |
|------------------------|---------------------------------------|----------------------------|
| Less than \$50,000 | 5.75% | 6.10% |
| \$50,000 to \$99,999 | 4.50% | 4.70% |
| \$100,000 to \$249,999 | 3.50% | 3.60% |
| \$250,000 to \$499,999 | 2.50% | 2.60% |
| \$500,000 to \$999,999 | 2.00% | 2.00% |
| \$1 million or more * | none | none |

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class T shares may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fees

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

Class T sales charges

| Purchase amount | Sales charge as a % of offering price | Sales charge as a % of NAV |
|------------------------|---------------------------------------|----------------------------|
| Less than \$50,000 | 4.50% | 4.70% |
| \$50,000 to \$99,999 | 4.00% | 4.20% |
| \$100,000 to \$249,999 | 3.00% | 3.10% |
| \$250,000 to \$499,999 | 2.00% | 2.00% |
| \$500,000 to \$999,999 | 1.50% | 1.50% |
| \$1 million or more * | none | none |

* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Dreyfus Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at www.dreyfus.com and in the SAI.

You can reduce your initial sales charge in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds that are subject to a sales charge. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Dreyfus Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Dreyfus Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or Dreyfus Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See “How to Buy Shares” in the SAI.)

Class A shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund’s distributor
- “wrap” accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund’s distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors with an investment adviser-client relationship with Wisconsin Capital (it is the responsibility of Wisconsin Capital to notify the fund of the existence of such relationship at the time of initial and any subsequent purchase of fund shares including exchanges)

- qualified investors who (i) purchase Class A shares directly through the fund's distributor, and (ii) have, or whose spouse or minor children have, beneficially owned shares and continuously maintained an open account directly through the distributor in a Dreyfus-managed fund, including the fund, or a Founders-managed fund since on or before February 28, 2006
- investors with the cash proceeds from the investor's exercise of employment-related stock options, whether invested in the fund directly or indirectly through an exchange from a Dreyfus-managed money market fund, provided that the proceeds are processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing stock options. Upon establishing the account in the fund or the Dreyfus-managed money market fund, the investor and the investor's spouse and minor children become eligible to purchase Class A shares of the fund at NAV, whether or not using the proceeds of the employment-related stock options
- members of qualified affinity groups who purchase Class A shares directly through the fund's distributor, provided that the qualified affinity group has entered into an affinity agreement with the distributor

Class A and Class T shares may be purchased at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in certain qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the distribution proceeds from qualified and non-qualified retirement plans or a Dreyfus-sponsored 403(b)(7) plan, provided that, in the case of a qualified or non-qualified retirement plan, the rollover is processed through an entity that has entered into an agreement with the fund's distributor specifically relating to processing rollovers. Upon establishing the Dreyfus-sponsored IRA rollover account in the fund, the shareholder becomes eligible to make subsequent purchases of Class A or Class T shares of the fund at NAV in such account

Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay higher ongoing Rule 12b-1 fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Because Class A shares will always be a more favorable investment than Class C shares for investments of \$1 million or more, the fund will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC.

Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on redemptions of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

Class B share considerations

Class B shares sold within six years of purchase are subject to the following CDSCs:

Class B sales charges

| For shares sold in the: | CDSC as a % of amount redeemed subject to the charge |
|-------------------------|--|
| First year | 4.00% |
| Second year | 4.00% |
| Third year | 3.00% |
| Fourth year | 3.00% |
| Fifth year | 2.00% |
| Sixth year | 1.00% |
| Thereafter | none |

Class B shares also are subject to an annual Rule 12b-1 fee. Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased.

CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and non-qualified employee benefit plans

Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Net asset value (NAV): the market value of one share, computed by dividing the total net assets of a fund or class by its existing shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

| | Initial | Additional |
|----------------------------|---------|------------------------------------|
| Regular accounts | \$1,000 | \$100 |
| Traditional IRAs | \$750 | no minimum |
| Spousal IRAs | \$750 | no minimum |
| Roth IRAs | \$750 | no minimum |
| Education Savings Accounts | \$500 | no minimum after the first year |

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

- Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.
- Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.
- Roth IRA:** an IRA with nondeductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.
- Education Savings Account:** an IRA with nondeductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

For more complete IRA information, consult Dreyfus or your tax professional.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on fund shares you acquired by reinvesting your fund dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online

| Proceeds sent by | Minimum phone/online | Maximum phone/online |
|-----------------------------|----------------------|---|
| Check* | no minimum | \$250,000 per day |
| Wire | \$1,000 | \$500,000 for joint accounts every 30 days/ \$20,000 per day |
| Dreyfus TeleTransfer | \$500 | \$500,000 for joint accounts every 30 days/ \$20,000 per day |

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policies

To offset the relatively higher costs of servicing smaller accounts, the fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; IRA accounts; Education Savings Accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax adviser before investing.

SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

For investing

| | |
|--|---|
| Dreyfus Automatic Asset Builder® | For making automatic investments from a designated bank account. |
| Dreyfus Payroll Savings Plan | For making automatic investments through a payroll deduction. |
| Dreyfus Government Direct Deposit Privilege | For making automatic investments from your federal employment, Social Security or other regular federal government check. |
| Dreyfus Dividend Sweep | For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Dreyfus Founders funds (not available for IRAs). |

For exchanging shares

| | |
|--|---|
| Dreyfus Auto-Exchange Privilege | For making regular exchanges from the fund into another Dreyfus fund or certain Dreyfus Founders funds. |
|--|---|

For selling shares

| | |
|--|---|
| Dreyfus Automatic Withdrawal Plan | For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal. |
|--|---|

Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Dreyfus Founders fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds and Class B shares into Class B shares of General Money Market Fund, Inc. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one. Clients of Wisconsin Capital may exchange Class A shares for Class A shares of Dreyfus Premier Balanced Opportunity Fund or Dreyfus Premier Blue Chip Fund at NAV, provided the exchange is made through Wisconsin Capital; such shareholders will be charged a sales load when exchanging into any other fund that has one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call, or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

Reinvestment privilege

Upon written request, you can reinvest up to the number of Class A or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

Account statements

Every fund investor automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

INSTRUCTIONS FOR **REGULAR ACCOUNTS**

TO OPEN AN ACCOUNT

In Writing

Complete the application.
Mail your application and a check to:
Name of Fund
P.O. Box 55268, Boston, MA 02205-8502
Attn: Institutional Processing

TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.
Mail the slip and the check to:
Name of Fund
P.O. Box 55268, Boston, MA 02205-8502
Attn: Institutional Processing

TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:
The Dreyfus Family of Funds
P.O. Box 55268, Boston, MA 02205-8502
Attn: Institutional Processing

By Telephone

Wire Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479124
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

Wire Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479124
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Electronic check Same as wire, but insert "666" before your 14-digit account number.

Dreyfus TeleTransfer Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

Wire Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

Dreyfus TeleTransfer Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

Check Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.

Make checks payable to: **The Dreyfus Family of Funds**.

Concepts to understand

Wire transfer: for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

Electronic check: for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

- your account number
- name of investor
- the contribution year
- dealer number if applicable

Electronic check Same as wire, but insert "666" before your 14-digit account number.

Automatically

All services Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

Systematic Withdrawal Plan Call us to request instructions to establish the plan.

For information and assistance, contact your financial representative or call toll free in the U.S. **1-800-554-4611.**

Make checks payable to: **The Dreyfus Trust Company, Custodian.**

For More Information

Dreyfus Premier Select Fund

A series of Dreyfus Premier Manager Funds II

SEC file number: 811-21327

More information on this fund is available free upon request, including the following:

Annual/Semiannual Report

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's managers discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at www.dreyfus.com.

Statement of Additional Information (SAI)

Provides more details about the fund and its policies. A current SAI is available at www.dreyfus.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at www.dreyfus.com its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

Note to Investors

At a meeting of the Board of Trustees of Dreyfus Premier Manager Funds II, held on March 8, 2007, the Board approved the liquidation of Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund ("the Funds") effective on or about May 25, 2007 (the "Liquidation Date"). Accordingly, effective on or about April 9, 2007, no new or subsequent investments in the Funds will be permitted.

In addition, effective immediately, the contingent deferred sales charge applicable to redemptions of Class B and Class C shares and certain Class A and Class T shares of the Funds will be waived on any redemption of such Fund shares.

Fund shares held on the Liquidation Date in Dreyfus sponsored Individual Retirement Accounts ("IRAs") will be exchanged for shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. (the "Money Market Fund") to avoid penalties that may be imposed on holders of IRAs under the Internal Revenue Code if their Fund shares were redeemed in cash. Investors may obtain a copy of the Prospectus of the Money Market Fund by calling 1-800-645-6561.

**Dreyfus Premier
Balanced Opportunity Fund**

**Dreyfus Premier
Blue Chip Fund**

**Dreyfus Premier
Select Fund**

INTRODUCTION

Each fund is a mutual fund with a separate investment portfolio. The operations and results of a fund are unrelated to those of each other fund.

Each fund commenced operations after all of the assets of another investment company (predecessor fund) advised by the funds' sub-investment adviser were transferred to the respective fund in exchange for Class J shares of such fund in a tax-free reorganization of the predecessor fund.

Class J shares of each fund are offered only to shareholders who received Class J shares of the respective fund in exchange for their shares of a predecessor fund as a result of the reorganization of such predecessor fund. You may not purchase Class J shares of a fund, unless you were a shareholder of such fund's predecessor fund and received Class J shares as a result of the reorganization of such predecessor fund. You may exchange Class J shares of one fund for Class J shares of another fund as described in this prospectus.

GOAL/APPROACH

The fund seeks high total return through a combination of capital appreciation and current income. To pursue this goal, the fund invests in a diversified mix of stocks and fixed-income securities. The fund selects securities that, in the portfolio managers' judgment, will result in the highest total return consistent with preservation of principal. The fund will vary the mix of stocks and bonds from time to time, but normally the fund will allocate between 25% and 50% of its assets to fixed-income securities. The fund has appointed an asset allocation manager who will allocate fund assets among the fund's equity portfolio managers and the fund's fixed income portfolio managers, based on his assessment of the relative return and risk of each asset class, analyzing several factors, including general economic conditions, anticipated future changes in interest rates and the outlook for stocks generally.

In seeking to achieve a high relative risk-adjusted return on the fund's equity investments, the equity managers create a broadly diversified equity portfolio for the fund that includes a blend of growth stocks and value stocks. Stock selection is made through extensive quantitative and fundamental research. In choosing stocks, the equity managers seek companies that possess some or all of the following characteristics:

- leading market positions
- high barriers to market entry and other competitive or technological advantages
- high returns on equity and assets
- good growth prospects
- value, or how a stock is priced relative to its perceived intrinsic worth
- strong management
- relative low debt burdens

The fixed income portion of the fund may include corporate bonds, debentures, notes, mortgage-related securities, including collateralized mortgage obligations (CMOs), asset-backed securities, convertible securities, municipal obligations, zero coupon bonds, and money market instruments. The fund will invest primarily in securities that, when purchased, are rated investment grade or are the unrated equivalent as determined by Dreyfus, and in securities that are issued or guaranteed by the

U.S. government (including its agencies and instrumentalities), including Treasury inflation-protected securities (TIPS). The fund may invest up to 5% of its assets in securities rated below investment grade (but not lower than B) at the time of purchase, or the unrated equivalent as determined by Dreyfus. The fund may invest up to 10% of its assets in bonds issued by foreign issuers that are denominated in U.S. dollars or foreign currencies, but will limit its investment in bonds issued by foreign issuers that are denominated in foreign currencies to no more than 5% of the fund's assets. The fund has no limit with respect to its portfolio maturity or duration.

The fund may, but is not required to, use derivatives, such as futures, options and swap agreements, as a substitute for taking a position in an underlying asset, to increase returns, to manage interest rate risk, or as part of a hedging strategy. The fund may enter into swap agreements, such as credit default swaps, which can be used to transfer the credit risk of a security without actually transferring ownership of the security. To enhance current income, the fund also may engage in a series of purchase and sale contracts or forward roll transactions in which the fund sells a mortgage-related security, for example, to a financial institution and simultaneously agrees to purchase a similar security from the institution at a later date at an agreed-upon price. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

Concepts to understand

Investment grade fixed-income securities: independent rating organizations analyze and evaluate a bond issuer's credit history and ability to repay debts. Based on their assessment, rating organizations assign letter grades that reflect the issuer's creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

MAIN RISKS

The stock and bond markets can perform differently from each other at any given time (as well as over the long term), so the fund will be affected by its asset allocation. If the fund favors an asset class during a period when that class underperforms, performance may be hurt. The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to foreign currencies, indexes and interest rates), swaps and other credit derivatives, and invest in mortgage-related and asset-backed securities. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the

counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms. Additionally, credit default swaps could result in losses if the fund does not correctly evaluate the creditworthiness of the company on which the credit default swap is based.

The fund's investments in stocks and other equity securities also are subject to the following principal risks:

- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio managers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Smaller company risk.* The fund may invest (typically less than one-third of its total assets) in stocks of smaller companies whose market capitalizations are less than \$1 billion. Small companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.

- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

The fund's investments in bonds and other fixed-income securities also are subject to the following principal risks:

- *Interest rate risk.* Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the bond portion of the fund, the more the fund's share price is likely to react to interest rates.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a bond, can cause a bond's price to fall, potentially lowering the fund's share price. Although the fund's bond investments are primarily in investment grade bonds, the fund may invest to a limited extent (up to 5% of its total assets) in high yield ("junk") bonds which involve greater credit risk, including the risk of default, than investment grade bonds and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. The prices of high yield bonds can fall dramatically in response to bad news about the issuer or its industry, or the economy in general.
- *Call risk.* Some bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the fund might have to reinvest the proceeds in an investment offering a lower yield.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically.
- *Prepayment and extension risk.* When interest rates fall, the principal on mortgage-backed and certain asset-backed securities may be prepaid. The loss of higher yielding, underlying mortgages and the reinvestment of proceeds at lower interest rates can reduce the fund's potential price gain in response to falling interest rates, reduce the fund's yield, or cause the fund's share price to fall. When interest rates rise, the effective duration of the fund's mortgage-related and other asset-backed securities may lengthen due to a drop in prepayments of the underlying mortgages or other assets. This is known as extension risk and would increase the fund's sensitivity to rising rates and its potential for price declines.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of a predecessor fund were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on January 30, 2004. The performance figures for the fund's Class J shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year for periods prior to January 31, 2004 and the performance of the fund's Class J shares thereafter. The performance figures for the fund's Class J shares in the table represent the performance of the predecessor fund's shares for periods prior to January 31, 2004 and the performance of the fund's Class J shares thereafter, and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks, and the Lehman Brothers Intermediate Government/ Credit Bond Index, an index of all investment grade bonds with maturities of more than one year and less than ten years. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

Year-by-year total returns as of 12/31 each year (%)

| S&P 500® Index reflects no deduction for fees, expenses or taxes | 15.78% | 6.18% | 8.42% |
| Lehman Brothers Intermediate Government/Credit Bond Index reflects no deduction for fees, expenses or taxes | 4.08% | 4.53% | 5.81% |

* Represents the performance of the predecessor fund's shares for periods prior to January 31, 2004 and the performance of the fund's Class J shares thereafter.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described for Class J in the table below. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees for Class J.

Fee table

| Annual fund operating expenses | |
|--------------------------------------|--------------|
| <i>% of average daily net assets</i> | |
| Management fees | 0.80% |
| Other expenses | 0.16% |
| Total | 0.96% |

Expense example

| 1 Year | 3 Years | 5 Years | 10 Years |
|-------------|--------------|--------------|----------------|
| \$98 | \$306 | \$531 | \$1,178 |

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

- Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

GOAL/APPROACH

The fund seeks long-term growth of capital and income. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of “blue chip” companies. The fund considers well-established companies with market capitalizations of at least \$1 billion if the company’s stock is included in the S&P 500 Index or the Dow Jones Industrial Average, or \$2 billion if not so included, to be “blue chip” companies.

The fund normally invests 10% to 20% of its assets in income-producing securities. These income-producing securities consist primarily of dividend-paying blue chip and other common stocks, preferred stocks, securities that are convertible into common stocks and investment grade fixed-income securities. The fund may invest up to 20% of its assets in fixed-income securities (up to 5% of which may be invested in fixed-income securities rated below investment grade), including corporate and other debt securities.

In selecting securities for the fund, the portfolio managers analyze a company’s intrinsic value (the present value of the cash that can be taken out of a company in the future) and attempt to determine the price that a knowledgeable investor would be willing to pay for the entire company, given its financial characteristics, management, industry position and growth potential. Then, the portfolio managers compare the company’s market valuation relative to its intrinsic business value.

The fund generally invests in higher quality companies that are trading at significant discounts to the portfolio managers’ estimates of their intrinsic value. These companies may include, to a limited extent, medium- and smaller-sized companies. The portfolio managers typically look for companies that possess the following characteristics:

- leading market positions
- high barriers to market entry and other competitive or technological advantages
- high returns on equity and invested capital
- consistent operating history
- capable management

- solid balance sheets
- good growth prospects

The fund’s portfolio managers employ a blended investment style, which they generally characterize as “growth at a reasonable price.” However, the portfolio managers may prefer a certain investment style and look for growth stocks or value stocks when warranted by market conditions and other factors.

The fund seeks to provide investors with competitive after-tax investment returns by holding quality securities for the long term, which is designed to give the fund greater tax-efficiency. The fund anticipates that capital growth will be accompanied by dividend income and growth of dividend income over time.

The fund typically sells securities in companies when their market valuations rise significantly above the portfolio managers’ estimates of intrinsic business values, long-term economic fundamentals significantly deteriorate, or better opportunities are presented in the marketplace.

Concepts to understand

Growth companies: companies whose earnings are expected to grow faster than the overall market. Often, growth stocks have relatively higher price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

Value companies: companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

Investment grade fixed-income securities: independent rating organizations analyze and evaluate a bond issuer’s credit history and ability to repay debts. Based on their assessment, rating organizations assign letter grades that reflect the issuer’s creditworthiness. AAA or Aaa represents the highest credit rating, AA/Aa the second highest, and so on down to D, for defaulted debt. Bonds rated BBB or Baa and above are considered investment grade.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio managers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Interest rate and credit risk.* The fund's investments in income-producing securities are affected by changes in interest rates and the credit quality of the securities. Typically, a rise in interest rates will adversely affect the prices of such securities and, accordingly, the fund's share price. The longer the

effective maturity and duration of such securities held by the fund, the more the fund's share price is likely to react to interest rates. Credit risk is the risk that the issuer of the security will fail to make timely interest or principal payments, or to otherwise honor its obligations. Credit risk includes the possibility that such securities held by the fund will have their credit rating downgraded or will default, potentially lowering the fund's share price.

- *Smaller company risk.* To the extent the fund invests in small and midsize companies, it will be subject to additional risks because the earnings and revenues of such companies tend to be less predictable and their share prices more volatile than those of larger, more established companies. In addition, the shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities, or hold cash. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

Although the fund invests principally in the securities of U.S. issuers, it may invest in foreign securities. To the extent the fund invests in foreign securities, such investments will be subject to special risks including exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of a predecessor fund, Thompson Plumb Blue Chip Fund, were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on February 25, 2005. The performance figures for the fund's Class J shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year for periods prior to February 25, 2005 and the performance of the fund's Class J shares thereafter. The performance figures for the fund's Class J shares in the table represent the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the fund's Class J shares thereafter, and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described for Class J in the table below. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees for Class J.

Fee table

Annual fund operating expenses

% of average daily net assets

| | |
|---|--------------|
| Management fees | 0.75% |
| Other expenses | 0.72% |
| Total annual fund operating expenses | 1.44% |
| Fee waiver and/or expense reimbursement | (0.24%) |
| Net operating expenses* | 1.20% |

* Dreyfus has contractually agreed to waive receipt of its fees and/or assume the expenses of the fund's Class J shares until February 25, 2007, so that annual fund operating expenses for Class J (excluding taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) do not exceed 1.20%.

Expense example

| 1 Year | 3 Years | 5 Years | 10 Years |
|--------------|--------------|--------------|----------------|
| \$122 | \$381 | \$660 | \$1,455 |

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five- and ten years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

GOAL/APPROACH

The fund seeks a high level of long-term capital appreciation. To pursue this goal, the fund invests in a select portfolio of companies that the portfolio managers believe are undervalued and have the potential for growth. The fund invests primarily in common stocks and, under normal circumstances, will maintain positions in approximately 20 to 40 companies.

In selecting investments for the fund, the portfolio managers analyze both the quality of the company and its business and the company's market valuation relative to its intrinsic business value. The fund typically invests in average or higher quality companies when their shares are trading at significant discounts to the portfolio managers' estimates of intrinsic values.

In choosing stocks for the fund to invest in, the portfolio managers look for companies that possess most of the following characteristics:

- good growth prospects
- leading market positions
- consistent operating history
- capable management
- high barriers to market entry and other competitive or technological advantages
- attractive returns on equity and assets
- relatively low debt burdens

The intrinsic value of a business is the present value of the cash that can be taken out of it in the future. The portfolio managers estimate a company's intrinsic value through the use of proprietary models based on discounted free cash flow methodologies and "cross-checked" with historical absolute and relative valuation measures.

The fund generally invests in larger companies, but may invest in companies of any market-capitalization range and may occasionally emphasize companies in certain size ranges that are then generally regarded as undervalued. Some of the stocks in

which the fund invests may be those of smaller companies whose market capitalizations are less than \$1 billion.

The fund's stock investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings (IPOs). The fund also may invest in other securities, including fixed-income securities such as bonds and short-term debt instruments (up to 5% of the fund's total assets may be invested in fixed-income securities rated below investment grade). The fund may hold a significant portion of its assets in cash, fixed-income securities and short-term instruments when the portfolio managers believe stocks of companies that meet the fund's criteria are in short supply or when the portfolio managers are otherwise unable to locate an adequate number of such stocks. The fund will generally reduce its holdings of cash and such other securities as more attractive equity investments become available.

The fund typically sells securities in companies when their market valuations rise significantly above the portfolio managers' estimates of intrinsic business values, long-term economic fundamentals significantly deteriorate, or better opportunities are presented in the marketplace.

Concepts to understand

Value companies: companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

Large companies: established companies that tend to have long histories of operation, well-established business relationships, substantial resources and the ability to weather change and economic downturn.

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Selection risk.* The particular securities that are selected for the fund may not perform as well as the fund's portfolio managers expected when the fund bought them, and the fund may underperform the securities markets generally and other funds with similar objectives.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Value stock risk.* Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing growth stocks). Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio managers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Smaller company risk.* Small and midsize companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *IPO risk.* The fund may purchase securities of companies in IPOs. The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

- *Non-diversification risk.* The fund is non-diversified, which means that a relatively high percentage of the fund's assets may be invested in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.

Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities, or hold cash. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

Any investment in fixed-income securities will be subject primarily to interest rate and credit risks. Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, to the extent the fund invests in bonds, the fund's share price. The longer the effective maturity and duration of these investments, the more likely the fund's share price will react to interest rates. Credit risk is the risk that the issuer of the security will fail to make timely interest or principal payments, and includes the possibility that any of the fund's fixed-income investments will have its credit rating downgraded. The fund may hold a significant portion of its assets in cash, fixed-income securities and short-term instruments until more attractive equity investments become available. The fund's holdings of cash and such securities will make it more difficult for the fund to achieve its objective and limit its ability to participate in market advances.

Although the fund invests principally in the securities of U.S. issuers, it may invest in foreign securities. To the extent the fund invests in foreign securities, such investments will be subject to special risks including exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The fund commenced operations after all of the assets of a predecessor fund, Thompson Plumb Select Fund, were transferred to the fund in exchange for Class J shares of the fund in a tax-free reorganization on February 25, 2005. The performance figures for the fund's Class J shares in the bar chart represent the changes in the performance of the predecessor fund's shares from year to year for periods prior to February 25, 2005 and the performance of the fund's Class J shares thereafter. The performance figures for the fund's Class J shares in the table represent the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the fund's Class J shares thereafter, and are compared to the average annual total returns of the S&P 500 Index, a broad-based, unmanaged total return performance benchmark of domestically traded common stocks. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

Class J shares*

* Represents the performance of the predecessor fund's shares for periods prior to February 25, 2005 and the performance of the fund's Class J shares thereafter.

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described for Class J in the table below. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees for Class J.

Fee table

Annual fund operating expenses

% of average daily net assets

| | |
|---|--------------|
| Management fees | 0.80% |
| Other expenses | 0.65% |
| Total annual fund operating expenses | 1.45% |
| Fee waiver and/or expense reimbursement | (0.16%) |
| Net operating expenses* | 1.29% |

* Dreyfus has contractually agreed to waive receipt of its fees and/or assume the expenses of the fund's Class J shares until February 25, 2007, so that annual fund operating expenses for Class J (excluding taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses) do not exceed 1.30%.

Expense example

| 1 Year | 3 Years | 5 Years | 10 Years |
|--------------|--------------|--------------|----------------|
| \$148 | \$459 | \$792 | \$1,735 |

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five- and ten-years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

MANAGEMENT

Investment advisers

The investment adviser for each fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$194 billion in approximately 200 mutual fund portfolios. For the past fiscal year, Dreyfus Premier Balanced Opportunity Fund, Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund paid Dreyfus a management fee at the effective annual rate of 0.79%, 0.51% and 0.64%, respectively, of the relevant fund's average daily net assets. A discussion regarding the basis for the board's approving the Dreyfus Premier Balanced Opportunity Fund's management agreement with Dreyfus is available in the fund's semiannual report for the period ended May 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$5.5 trillion in assets under management, administration or custody, including \$995 billion under management.

On December 4, 2006, Mellon Financial and The Bank of New York Company, Inc. (BNY) announced that they had entered into a definitive agreement to merge. The new company will be called The Bank of New York Mellon Corporation. As part of this transaction, Dreyfus would become a wholly-owned subsidiary of The Bank of New York Mellon Corporation. The transaction is subject to certain regulatory approvals and the approval of BNY's and Mellon Financial's shareholders, as well as other customary conditions to closing. Subject to such approvals and the satisfaction of the other conditions, Mellon Financial and BNY expect the transaction to be completed in the third quarter of 2007.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Keith Stransky has been Dreyfus Premier Balanced Opportunity Fund's asset allocation manager since March 2007. Mr. Stransky is the Chief Investment Officer (Traditional) and a Senior Portfolio Manager for EACM Advisors LLC, an affiliate of Dreyfus, where he has been employed since 1983.

Brian Ferguson and Sean Fitzgibbon have been Dreyfus Premier Balanced Opportunity Fund's primary equity portfolio managers since March, 2007. Mr. Ferguson is a Senior Vice President and the Director of the U.S. Large Cap Value Equity Team of The Boston Company Asset Management, LLC (TBCAM), an affiliate of Dreyfus, where he has been employed since June 1997. Mr. Ferguson became a dual employee of Dreyfus and TBCAM in April 2001. Mr. Fitzgibbon is a Senior Vice President, portfolio manager and a member of the U.S. Large Cap Core Equity Team of TBCAM where he has been employed since 1991. Mr. Fitzgibbon became a dual employee of Dreyfus and TBCAM in October, 2004.

Catherine Powers and Kent Wosepka have been Dreyfus Premier Balanced Opportunity Fund's primary fixed-income portfolio managers since March, 2007. Ms. Powers is a senior portfolio manager for active core strategies, responsible for high grade core and core plus fixed income strategies, with Standish Mellon Asset Management, LLC (Standish Mellon), where she has been employed since 1988. Ms. Powers became a dual employee of Dreyfus and Standish Mellon in September 2001. Mr. Wosepka is a Vice President and portfolio manager for Standish Mellon, where he has been employed since 1998. Mr. Wosepka has been a dual employee of Dreyfus and Standish Mellon since July 2002.

Dreyfus has engaged Wisconsin Capital Management, LLC (Wisconsin Capital), formerly known as Thompson, Plumb & Associates, Inc., located at 1200 John Q. Hammons Drive, Madison, Wisconsin 53717, to serve as the sub-investment adviser to Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund. Wisconsin Capital served as each predecessor fund's investment adviser and administrator. Since 1984, Wisconsin Capital has provided investment advice to individuals and institutional clients with substantial investment portfolios. As of December 31, 2006, Wisconsin Capital had approximately \$1.5 billion in assets under management. Wisconsin Capital, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of each fund's investments.

David B. Duchow and Timothy R. O'Brien serve as co-primary portfolio managers for Dreyfus Premier Blue Chip Fund; they served as such for the predecessor fund since August 2002. Clint A. Oppermann serves as primary portfolio manager of Dreyfus Premier Select Fund. Messrs. Duchow and O'Brien have each been a portfolio manager and investment analyst for Wisconsin Capital since 1992 and 1997, respectively. Mr. Oppermann has been vice president and director of research of Wisconsin Capital since November 2001. Since August 1999, Mr. Oppermann has been a portfolio manager for Wisconsin Capital.

The Statement of Additional Information (SAI) provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

Distributor

The funds' distributor is Dreyfus Service Corporation (DSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of a fund or provide other services. Such payments are separate from any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund to those intermediaries. Because those payments are not made by you or the fund, the fund's total expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or DSC's own resources to intermediaries for inclusion of the funds on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of a fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the funds.

Code of ethics

The funds, Dreyfus, Wisconsin Capital and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each of the Dreyfus and Wisconsin Capital code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the respective code's pre-clearance and disclosure procedures. The primary purpose of the respective code is to ensure that personal trading by employees of Dreyfus or Wisconsin Capital does not disadvantage any fund managed by Dreyfus or Wisconsin Capital, as the case may be.

FINANCIAL HIGHLIGHTS

Dreyfus Premier Balanced Opportunity Fund

The financial highlights information in the following table for the fund's Class J shares represents the financial highlights of the predecessor fund's shares before the fund commenced operations as of the close of business on January 30, 2004, and represents the performance of the fund's Class J shares thereafter. Before the fund commenced operations, all of the assets of the predecessor fund, Thompson Plumb Balanced Fund, were transferred to the fund in a tax-free reorganization. "Total return" shows how much your investment in the fund's Class J

shares or, for periods before the fund commenced operations, shows how much an investment in the predecessor fund's shares, would have increased (or decreased) during each period, assuming all dividends and distributions were reinvested. These financial highlights have been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm for the predecessor fund and fund, whose report, along with the fund's financial statements, is included in the fund's annual report, which is available upon request.

| Class J | Year Ended November 30, | | | | |

Your Investment

ACCOUNT POLICIES

Buying shares

Class J shares of each fund are offered only to shareholders who received Class J shares of the respective fund in exchange for their shares of a predecessor fund as a result of the reorganization of such predecessor fund. You may not purchase Class J shares of a fund, unless you were a shareholder of such fund's predecessor fund and received Class J shares as a result of the reorganization of such predecessor fund.

You pay no sales charges to invest in Class J shares of the funds. Your price for Class J shares is the fund's net asset value per share (NAV) for Class J, which is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the funds' transfer agent or other authorized entity. The funds' investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), a fund may value those investments at fair value as determined in accordance with procedures approved by the funds' board. Fair value of investments may be determined by the funds' board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to

calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Traditional IRA: an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

Spousal IRA: an IRA funded by a working spouse in the name of a nonworking spouse.

Roth IRA: an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

Education Savings Account: an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

For more complete IRA information, consult Dreyfus or your tax professional.

Minimum additional investments

| | |
|---|--|
| Regular accounts | \$100 |
| Traditional IRAs | no minimum |
| Spousal IRAs | no minimum |
| Roth IRAs | no minimum |
| Education Savings Accounts | no minimum <i>after the first year</i> |
| Dreyfus automatic investment plans | \$25 |

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online through www.dreyfus.com

| Proceeds sent by | Minimum phone/online | Maximum phone/online |
|-----------------------------|----------------------|---|
| Check* | no minimum | \$250,000 per day |
| Wire | \$1,000 | \$500,000 for joint accounts every 30 days/ \$20,000 per day |
| Dreyfus TeleTransfer | \$500 | \$500,000 for joint accounts every 30 days/ \$20,000 per day |

* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

General policies

If you have teleservice privileges, the funds' transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

Each fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing, and other abusive trading practices (frequent trading) that could adversely affect a fund or its operations. Dreyfus and the funds will not enter into arrangements with any person or group to permit frequent trading.

Each fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into a fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that a fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. Each fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that a fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the funds' frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Small account policies

To offset the relatively higher costs of servicing smaller accounts, each fund charges regular accounts with balances below \$2,000 an annual fee of \$12. The fee will be imposed during the fourth quarter of each calendar year.

The fee will be waived for: any investor whose aggregate Dreyfus mutual fund investments total at least \$25,000; IRA accounts; Education Savings Accounts; accounts participating in automatic investment programs; and accounts opened through a financial institution.

If your account falls below \$500 in a fund, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

DISTRIBUTIONS AND TAXES

Each fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. Each fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. Each fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by a fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax adviser before investing.

SERVICES FOR FUND INVESTORS

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services by calling 1-800-645-6561.

For investing

| | |
|--|---|
| Dreyfus Automatic Asset Builder® | For making automatic investments from a designated bank account. |
| Dreyfus Payroll Savings Plan | For making automatic investments through a payroll deduction. |
| Dreyfus Government Direct Deposit Privilege | For making automatic investments from your federal employment, Social Security or other regular federal government check. |
| Dreyfus Dividend Sweep | For automatically reinvesting the dividends and distributions from one fund into Class J shares of another fund (not available for IRAs). |

For exchanging shares

| | |
|--|---|
| Dreyfus Auto-Exchange Privilege | For making regular exchanges of Class J shares from a fund into Class J shares of another fund. |
|--|---|

For selling shares

| | |
|--|---|
| Dreyfus Automatic Withdrawal Plan | For making regular withdrawals from most Dreyfus funds. |
|--|---|

Exchange privilege

You can exchange your Class J shares worth \$500 or more (no minimum for retirement accounts) for Class J shares of Dreyfus Premier Balanced Opportunity Fund, Dreyfus Premier Blue Chip Fund or Dreyfus Premier Select Fund. You can request your exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on the shareholder services form.

Dreyfus Express® voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, purchase fund shares, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling 1-800-645-6561. Certain requests may require the services of a representative.

Retirement plans

Here's where you call for information:

- for traditional, rollover and Roth IRAs, and Education Savings Accounts, call **1-800-645-6561**
- for SIMPLE-IRAs, SEP-IRAs, Keogh accounts, 401(k) and 403(b) accounts, call **1-800-358-0910**

INSTRUCTIONS FOR **REGULAR ACCOUNTS**

TO ADD TO AN ACCOUNT

In Writing

Fill out an investment slip, and write your account number on your check.

Mail the slip and the check to:
The Dreyfus Family of Funds
P.O. Box 105, Newark, NJ 07101-0105

TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail your request to:
The Dreyfus Family of Funds
P.O. Box 55263, Boston, MA 02205-8501

By Telephone

Wire Have your bank send your investment to The Bank of New York, with these instructions

- ABA# 021000018
- Dreyfus Premier Balanced Opportunity Fund
DDA# 8900480084
- Dreyfus Premier Blue Chip Fund
DDA# 8900479132
- Dreyfus Premier Select Fund
DDA# 8900479124
- the fund name
- the share class
- your account number
- name(s) of investor(s)

Electronic check Same as wire, but insert "666" before your 14-digit account number.

Dreyfus TeleTransfer Call us to request a form to add Dreyfus TeleTransfer. Complete and return the form. Call us to request your transaction.

Wire Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be wired to your bank.

Dreyfus TeleTransfer Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be sent to your bank by electronic check.

Check Call us to request your transaction. A check will be sent to the address of record.

Outside the U.S. 516-794-5452

Make checks payable to:
The Dreyfus Family of Funds

You also can deliver requests to any Dreyfus Financial Center. Because processing time may vary, please ask the representative when your account will be credited or debited.

Concepts to understand

Wire transfer: for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

Electronic check: for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

INSTRUCTIONS FOR IRAS

TO ADD TO AN ACCOUNT

In Writing

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail the slip and the check to:

The Dreyfus Trust Company, Custodian
P.O. Box 55552, Boston, MA 02205-8568

TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail your request to:

The Dreyfus Trust Company, Custodian
P.O. Box 55552, Boston, MA 02205-8568

By Telephone

Wire Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- Dreyfus Premier Balanced Opportunity Fund
DDA# 8900480084
- Dreyfus Premier Blue Chip Fund
DDA# 8900479132
- Dreyfus Premier Select Fund
DDA# 8900479124
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- the contribution year

Electronic check Same as wire, but insert "666" before your 14-digit account number.

Telephone Contribution Call to request us to move money from a regular Dreyfus account to an IRA (both accounts must be held in the same shareholder name).

Automatically

All services Call us to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

Systematic Withdrawal Plan Call us to request instructions to establish the plan.

Series of Dreyfus Premier Manager Funds II

SEC file number: 811-21327

More information on each fund is available free upon request, including the following:

Annual/Semiannual Reports

Describes performance, lists portfolio holdings and discusses recent market conditions, economic trends and investment strategies that significantly affected the performance of the relevant fund during the last fiscal year. The funds' most recent annual and semiannual reports are available at www.dreyfus.com.

Statement of Additional Information (SAI)

Provides more details about the funds and their policies. A current SAI is available at www.dreyfus.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

Portfolio Holdings

Each fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the funds will publicly disclose at www.dreyfus.com their complete schedule of portfolio holdings as of the end of such quarter.

A complete description of each fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the funds' SAI.

DESCRIPTION OF THE COMPANY AND FUNDS

The Company is a Massachusetts business trust that commenced operations on January 30, 2004. Each Fund is a separate series of the Company, an open-end management investment company, known as a mutual fund. Each of Dreyfus Premier Balanced Opportunity Fund and Dreyfus Premier Blue Chip Fund is a diversified fund, which means that, with respect to 75% of the Fund's total assets, the Fund will not invest more than 5% of its assets in the securities of any single issuer, nor hold more than 10% of the outstanding voting securities of any single issuer (other than, in each case, securities of other investment companies, and securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities). Dreyfus Premier Select Fund is a non-diversified fund, which means that the proportion of its assets that may be invested in the securities of a single issuer is not limited by the Investment Company Act of 1940, as amended (the "1940 Act").

The Dreyfus Corporation (the "Manager" or "Dreyfus") serves as each Fund's investment adviser. The Manager has engaged Wisconsin Capital Management, LLC, formerly known as Thompson Plumb & Associates, Inc. (the "Sub-Adviser"), to serve as the Fund's sub-investment adviser to Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund and to provide day-to-day management of each Fund's investments, subject to the supervision of the Manager. The Manager and Sub-Adviser are referred to collectively as the "Advisers."

Dreyfus Service Corporation (the "Distributor") is the distributor of each Fund's shares.

Certain Portfolio Securities

The following information supplements (except as noted) and should be read in conjunction with the relevant Fund's Prospectus.

Common and Preferred Stocks. (All Funds) Stocks represent shares of ownership in a company. Generally, preferred stock has a specified dividend and ranks after bonds and before common stocks in its claim on income for dividend payments and on assets should the company be liquidated. After other claims are satisfied, common stockholders participate in company profits on a pro-rata basis; profits may be paid out in dividends or reinvested in the company to help it grow. Increases and decreases in earnings are usually reflected in a company's stock price, so common stocks generally have the greatest appreciation and depreciation potential of all corporate securities. While most preferred stocks pay a dividend, a Fund may purchase preferred stock where the issuer has omitted, or is in danger of omitting, payment of its dividend. Such investments would be made primarily for their capital appreciation potential. Each Fund may purchase trust preferred securities which are preferred stocks issued by a special purpose trust subsidiary backed by subordinated debt of the corporate parent. These securities typically bear a market rate coupon comparable to interest rates available on debt of a similarly rated company. Holders of the trust preferred securities have limited voting rights to control the activities of the trust and no voting rights with respect to the parent company.

Corporate Debt Securities. (All Funds) Corporate debt securities include corporate bonds, debentures, notes and other similar instruments, including certain convertible securities. Debt securities may be acquired with warrants attached. Corporate income-producing securities

also may include forms of preferred or preference stock. The rate of interest on a corporate debt security may be fixed, floating or variable, and may vary inversely with respect to a reference rate. The rate of return or return of principal on some debt obligations may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Variable and Floating Rate Securities. (All Funds) Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be event based, such as based on a change in the prime rate.

Each Fund may invest in floating rate debt instruments ("floaters"). The interest rate on a floater is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. The interest rate on a floater resets periodically, typically every six months. Because of the interest rate reset feature, floaters provide the Fund with a certain degree of protection against rises in interest rates, although the Fund will participate in any declines in interest rates as well.

Each Fund also may invest in inverse floating rate debt instruments ("inverse floaters"). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed or inversely to a multiple of the applicable index. An inverse floating rate security may exhibit greater price volatility than a fixed rate obligation of similar credit quality.

Convertible Securities. (All Funds) Convertible securities may be converted at either a stated price or stated rate into underlying shares of common stock. Convertible securities have characteristics similar to both fixed-income and equity securities. Convertible securities generally are subordinated to other similar but non-convertible securities of the same issuer, although convertible bonds, as corporate debt obligations, enjoy seniority in right of payment to all equity securities, and convertible preferred stock is senior to common stock, of the same issuer. Because of the subordination feature, however, convertible securities typically have lower ratings than similar non-convertible securities.

Although to a lesser extent than with fixed-income securities, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stock. A unique feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

Convertible securities provide for a stable stream of income with generally higher yields than common stocks, but there can be no assurance of current income because the issuers of the convertible securities may default on their obligations. A convertible security, in addition to providing fixed income, offers the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. There can be no assurance of capital appreciation, however, because securities prices fluctuate. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality because of the potential for capital appreciation.

Each Fund may invest in so-called "synthetic convertible securities," which are comprised of two or more different securities, each with its own market value, whose investment characteristics, taken together, resemble those of convertible securities. For example, each Fund may purchase a non-convertible debt security and a warrant or option. The "market value" of a synthetic convertible is the sum of the values of its fixed income component and its convertible component. For this reason, the values of a synthetic convertible and a true convertible security may respond differently to market fluctuations.

Warrants. (All Funds) A warrant is a form of derivative that gives the holder the right to subscribe to a specified amount of the issuing corporation's capital stock at a set price for a specified period of time. Each Fund may invest up to 5% of its net assets in warrants, except that this limitation does not apply to warrants purchased by the Fund that are sold in units with, or attached to, other securities.

Zero Coupon, Pay-in-Kind and Step-up Securities. (All Funds) Each Fund may invest in zero coupon U.S. Treasury securities, which are Treasury Notes and Bonds that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interests in such stripped debt obligations and coupons. Zero coupon securities also are issued by corporations and financial institutions which constitute a proportionate ownership of the issuer's pool of underlying U.S. Treasury securities. A zero coupon security pays no interest to its holders during its life and is sold at a discount to its face value at maturity. A Fund may invest in pay-in-kind bonds, which are bonds which generally pay interest through the issuance of additional bonds. A Fund also may purchase step-up coupon bonds, which are debt securities which typically do not pay interest for a specified period of time and then pay interest at a series of different rates. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of securities that pay cash interest periodically having similar maturities and credit qualities. In addition, unlike bonds that pay cash interest throughout the period to maturity, a Fund will realize no cash until the cash payment date unless a portion of such securities are sold and, if the issuer defaults, the Fund may obtain no return at all on its investment. Federal income tax law requires the holder of a zero coupon security or of certain pay-in-kind or step-up bonds to accrue income with respect to these securities prior to the receipt of cash payments. To maintain its qualification as a regulated investment company and avoid liability for Federal income taxes, a Fund may be required to distribute such income accrued with respect to these securities and may have to dispose of portfolio securities under disadvantageous circumstances in order to generate cash to satisfy these distribution requirements. See "Dividends, Distributions and Taxes."

Inflation-Indexed Bonds. (All Funds) Each Fund may invest in inflation-indexed bonds, such as Treasury Inflation-Protection Securities ("TIPS"), which are fixed-income securities whose value is periodically adjusted according to the rate of inflation. Two structures are common. The U.S. Treasury and some other issuers utilize a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the Consumer Price Index ("CPI") accruals as part of a semiannual coupon.

Inflation-indexed securities issued by the U.S. Treasury have varying maturities and pay interest on a semi-annual basis equal to a fixed percentage of the inflation-adjusted principal amount. If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed and will fluctuate. Each Fund also may invest in other inflation-related bonds which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rate of inflation rises at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds. Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the Consumer Price Index for Urban Consumers ("CPI-U"), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

U.S. Government Securities. (All Funds) Each Fund may invest in U.S. Treasury securities which include Treasury Bills, Treasury Notes and Treasury Bonds that differ in their interest rates, maturities and times of issuance. Treasury Bills have initial maturities of one year

or less; Treasury Notes have initial maturities of one to ten years; and Treasury Bonds generally have initial maturities of greater than ten years. In addition to U.S. Treasury securities, each Fund may invest in securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities. Some obligations issued or guaranteed by U.S. Government agencies and instrumentalities are supported by the full faith and credit of the U.S. Treasury; others by the right of the issuer to borrow from the Treasury; others by discretionary authority of the U.S. Government to purchase certain obligations of the agency or instrumentality; and others only by the credit of the agency or instrumentality. These securities bear fixed, floating or variable rates of interest. While the U.S. Government currently provides financial support to such U.S. Government-sponsored agencies or instrumentalities, no assurance can be given that it will always do so, since it is not so obligated by law.

Mortgage-Related Securities. (Dreyfus Premier Balanced Opportunity Fund only)
Mortgage-related securities are a form of derivative collateralized by pools of commercial or residential mortgages. Pools of mortgage loans are assembled as securities for sale to investors by various governmental, government-related and private organizations. These securities may include complex instruments such as collateralized mortgage obligations and stripped mortgage-backed securities, mortgage pass-through securities, interests in real estate mortgage investment conduits ("REMICs"), adjustable rate mortgages, real estate investment trusts ("REITs"), including debt and preferred stock issued by REITS, as well as other real estate-related securities, including those with fixed, floating and variable interest rates, those with interest rates based on multiples of changes in a specified index of interest rates and those with interest rates that change inversely to changes in interest rates, as well as those that do not bear interest. The Fund may invest up to 10% of its total assets in REITs and currently intends to limit its investment in other mortgage-related securities to no more than 5% of its net assets.

Residential Mortgage-Related Securities—The Fund may invest in mortgage-related securities representing participation interests in pools of one- to four-family residential mortgage loans issued or guaranteed by governmental agencies or instrumentalities, such as the Government National Mortgage Association ("GNMA"), the Federal National Mortgage Association ("FNMA") and the Federal Home Loan Mortgage Corporation ("FHLMC"), or issued by private entities. Residential mortgage-related securities may be issued using a variety of structures, including multi-class structures featuring senior and subordinated classes.

Mortgage-related securities issued by GNMA include GNMA Mortgage Pass-Through Certificates (also known as "Ginnie Maes") which are guaranteed as to the timely payment of principal and interest by GNMA and such guarantee is backed by the full faith and credit of the United States. GNMA certificates also are supported by the authority of GNMA to borrow funds from the U.S. Treasury to make payments under its guarantee. Mortgage-related securities issued by FNMA include FNMA Guaranteed Mortgage Pass-Through Certificates (also known as "Fannie Maes") which are solely the obligations of FNMA and are not backed by or entitled to the full faith and credit of the United States. Fannie Maes are guaranteed as to timely payment of principal and interest by FNMA.

Mortgage-related securities issued by FHLMC include FHLMC Mortgage Participation Certificates (also known as "Freddie Macs" or "PCs"). Freddie Macs are not guaranteed by the United States or by any Federal Home Loan Bank and do not constitute a debt or obligation of

the United States or of any Federal Home Loan Bank. Freddie Macs entitle the holder to timely payment of interest, which is guaranteed by FHLMC. FHLMC guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. When FHLMC does not guarantee timely payment of principal, FHLMC may remit the amount due on account of its guarantee of ultimate payment of principal at any time after default on an underlying mortgage, but in no event later than one year after it becomes payable.

Commercial Mortgage-Related Securities—Commercial mortgage-related securities generally are multi-class debt or pass-through certificates secured by mortgage loans on commercial properties. These mortgage-related securities generally are structured to provide protection to the holders of senior classes against potential losses on the underlying mortgage loans. This protection generally is provided by having the holders of subordinated classes of securities ("Subordinated Securities") take the first loss if there are defaults on the underlying commercial mortgage loans. Other protection, which may benefit all of the classes or particular classes, may include issuer guarantees, reserve funds, additional Subordinated Securities, cross-collateralization and over-collateralization.

Subordinated Securities—The Fund may invest in Subordinated Securities issued or sponsored by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other non-governmental issuers. Subordinated Securities have no governmental guarantee, and are subordinated in some manner as to the payment of principal and/or interest to the holders of more senior mortgage-related securities arising out of the same pool of mortgages. The holders of Subordinated Securities typically are compensated with a higher stated yield than are the holders of more senior mortgage-related securities. On the other hand, Subordinated Securities typically subject the holder to greater risk than senior mortgage-related securities and tend to be rated in a lower rating category, and frequently a substantially lower rating category, than the senior mortgage-related securities issued in respect of the same pool of mortgage. Subordinated Securities generally are likely to be more sensitive to changes in prepayment and interest rates and the market for such securities may be less liquid than is the case for traditional fixed-income securities and senior mortgage-related securities.

Collateralized Mortgage Obligations ("CMOs") and Multi-Class Pass-Through-Securities—A CMO is a multiclass bond backed by a pool of mortgage pass-through certificates or mortgage loans. CMOs may be collateralized by (a) Ginnie Mae, Fannie Mae, or Freddie Mac pass-through certificates, (b) unsecuritized mortgage loans insured by the Federal Housing Administration or guaranteed by the Department of Veterans' Affairs, (c) unsecuritized conventional mortgages, (d) other mortgage-related securities, or (e) any combination thereof.

Each class of CMOs, often referred to as a "tranche," is issued at a specific coupon rate and has a stated maturity or final distribution date. Principal prepayments on collateral underlying a CMO may cause it to be retired substantially earlier than the stated maturities or final distribution dates. The principal and interest on the underlying mortgages may be allocated among the several classes of a series of a CMO in many ways. One or more tranches of a CMO may have coupon rates which reset periodically at a specified increment over an index, such as the London Interbank Offered Rate ("LIBOR") (or sometimes more than one index). These floating rate CMOs typically are issued with lifetime caps on the coupon rate thereon. The Fund also may invest in inverse floating rate CMOs. Inverse floating rate CMOs constitute a tranche

of a CMO with a coupon rate that moves in the reverse direction to an applicable index such as LIBOR. Accordingly, the coupon rate thereon will increase as interest rates decrease. Inverse floating rate CMOs are typically more volatile than fixed or floating rate tranches of CMOs.

Many inverse floating rate CMOs have coupons that move inversely to a multiple of the applicable indexes. The effect of the coupon varying inversely to a multiple of an applicable index creates a leverage factor. Inverse floaters based on multiples of a stated index are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and loss of principal. The markets for inverse floating rate CMOs with highly leveraged characteristics at times may be very thin. The Fund's ability to dispose of its positions in such securities will depend on the degree of liquidity in the markets for such securities. It is impossible to predict the amount of trading interest that may exist in such securities, and therefore the future degree of liquidity.

Stripped Mortgage-Backed Securities—The Fund also may invest in stripped mortgage-backed securities which are created by segregating the cash flows from underlying mortgage loans or mortgage securities to create two or more new securities, each with a specified percentage of the underlying security's principal or interest payments. Mortgage securities may be partially stripped so that each investor class receives some interest and some principal. When securities are completely stripped, however, all of the interest is distributed to holders of one type of security, known as an interest-only security, or IO, and all of the principal is distributed to holders of another type of security known as a principal-only security, or PO. Strips can be created in a pass-through structure or as tranches of a CMO. The yields to maturity on IOs and POs are very sensitive to the rate of principal payments (including prepayments) on the related underlying mortgage assets. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IOs. Conversely, if the underlying mortgage assets experience less than anticipated prepayments of principal, the yield on POs could be materially and adversely affected.

Adjustable-Rate Mortgage Loans ("ARMs")—ARMs eligible for inclusion in a mortgage pool will generally provide for a fixed initial mortgage interest rate for a specified period of time, generally for either the first three, six, twelve, thirteen, thirty-six, or sixty scheduled monthly payments. Thereafter, the interest rates are subject to periodic adjustment based on changes in an index. ARMs typically have minimum and maximum rates beyond which the mortgage interest rate may not vary over the lifetime of the loans. Certain ARMs provide for additional limitations on the maximum amount by which the mortgage interest rate may adjust for any single adjustment period. Negatively amortizing ARMs may provide limitations on changes in the required monthly payment. Limitations on monthly payments can result in monthly payments that are greater or less than the amount necessary to amortize a negatively amortizing ARM by its maturity at the interest rate in effect during any particular month.

Private Entity Securities—These mortgage-related securities are issued by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other non-governmental issuers. Timely payment of principal and interest on mortgage-related securities backed by pools created by non-governmental issuers often is supported partially by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance. The insurance and guarantees are issued by government entities, private insurers and

the mortgage poolers. There can be no assurance that the private insurers or mortgage poolers can meet their obligations under the policies, so that if the issuers default on their obligations the holders of the security could sustain a loss. No insurance or guarantee covers the Fund or the price of the Fund's shares. Mortgage-related securities issued by non-governmental issuers generally offer a higher rate of interest than government-agency and government-related securities because there are no direct or indirect government guarantees of payment.

Other Mortgage-Related Securities—Other mortgage-related securities include securities other than those described above that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property, including CMO residuals. Other mortgage-related securities may be equity or debt securities issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, homebuilders, mortgage banks, commercial banks, investment banks, partnerships, trusts and special purpose entities of the foregoing.

Real Estate Investment Trusts. (All Funds) A REIT is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the "Code"). The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level Federal income tax and making the REIT a pass-through vehicle for Federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

REITs are characterized as equity REITs, mortgage REITs and hybrid REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depends upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs combine the characteristics of both equity and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate. The value of securities issued by REITs are affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for tax-free status under the Code or to maintain exemption from the 1940 Act.

Asset-Backed Securities. (Dreyfus Premier Balanced Opportunity Fund only) Asset-backed securities are a form of derivative. The securitization techniques used for asset-backed securities are similar to those used for mortgage-related securities. These securities include debt securities and securities with debt-like characteristics. The collateral for these securities has included home equity loans, automobile and credit card receivables, boat loans, computer leases, airplane leases, mobile home loans, recreational vehicle loans and hospital account receivables.

The Fund may invest in these and other types of asset-backed securities that may be developed in the future.

Asset-backed securities present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may provide the Fund with a less effective security interest in the related collateral than do mortgage-backed securities. Therefore, there is the possibility that recoveries on the underlying collateral may not, in some cases, be available to support payments on these securities.

Depository Receipts. (All Funds) Each Fund may invest in the securities of foreign issuers in the form of American Depositary Receipts and American Depositary Shares (collectively, "ADRs") and Global Depositary Receipts and Global Depositary Shares (collectively, "GDRs") and other forms of depository receipts. These securities may not necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by a United States bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. GDRs are receipts issued outside the United States typically by non-United States banks and trust companies that evidence ownership of either foreign or domestic securities. Generally, ADRs in registered form are designed for use in the United States securities markets and GDRs in bearer form are designed for use outside the United States.

These securities may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities.

Investment Companies. (All Funds) Each Fund may invest in securities issued by registered and unregistered investment companies, including exchange-traded funds described below. Under the 1940 Act, a Fund's investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund's total assets with respect to any one investment company and (iii) 10% of the Fund's total assets in the aggregate. As a shareholder of another investment company, each Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. Each Fund also may invest its uninvested cash reserves or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund's securities lending program, in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above. See "Lending Portfolio Securities."

Exchange-Traded Funds. (All Funds) Each Fund may invest in shares of exchange-traded funds (collectively, "ETFs"), which are designed to provide investment results corresponding to a securities (or commodities) index. These may include Standard & Poor's Depositary Receipts ("SPDRs"), DIAMONDS, Nasdaq-100 Index Tracking Stock (also referred

to as "Nasdaq 100 Shares") and iShares exchange-traded funds ("iShares"), such as iShares Russell 2000 Growth Index Fund. ETFs usually are units of beneficial interest in an investment trust or represent undivided ownership interests in a portfolio of securities, in each case with respect to a portfolio of all or substantially all of the component securities of, and in substantially the same weighting as, the relevant benchmark index. The benchmark indices of SPDRs, DIAMONDS and Nasdaq-100 Shares are the Standard & Poor's 500 Stock Index, the Dow Jones Industrial Average and the Nasdaq-100 Index, respectively. The benchmark index for iShares varies, generally corresponding to the name of the particular iShares fund. ETFs are designed to provide investment results that generally correspond to the price and yield performance of the component securities (or commodities) of the benchmark index. ETFs are listed on an exchange and trade in the secondary market on a per-share basis.

The values of ETFs are subject to change as the values of their respective component securities (or commodities) fluctuate according to market volatility. Investments in ETFs that are designed to correspond to an equity index, for example, involve certain inherent risks generally associated with investments in a broadly based portfolio of common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of ETFs invested in by a Fund. Moreover, a Fund's investments in ETFs may not exactly match the performance of a direct investment in the respective indices to which they are intended to correspond due to the temporary unavailability of certain index securities in the secondary market or other extraordinary circumstances, such as discrepancies with respect to the weighting of securities.

Repurchase Agreements. (All Funds) For the purposes of maintaining liquidity and achieving income, a Fund may enter into repurchase agreements with domestic commercial banks or registered broker-dealers. A repurchase agreement is a contract under which the Fund would acquire a security for a relatively short period (usually not more than one week) subject to the obligation of the seller to repurchase and the Fund to resell such security at a fixed time and price (representing the Fund's cost plus interest). In the case of repurchase agreements with broker-dealers, the value of the underlying securities (or collateral) will be at least equal at all times to the total amount of the repurchase obligation, including the interest factor. The Fund bears a risk of loss if the other party to a repurchase agreement defaults on its obligations and the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities. This risk includes the risk of procedural costs or delays in addition to a loss on the securities if their value should fall below their repurchase price. The Fund currently intends to limit the entry into repurchase agreements (other than for temporary defensive purposes) to no more than 5% of the Fund's net assets.

Illiquid Securities. (All Funds) Each Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund's investment objective. These securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, repurchase agreements providing for settlement in more than seven days after notice and certain privately negotiated, non-exchange traded options and securities used to cover such options. As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

Money Market Instruments. (All Funds) When the Sub-Adviser determines that adverse market conditions exist, a Fund may adopt a temporary defensive position and invest up to 100% of its assets in money market instruments, including U.S. Government securities, repurchase agreements, bank obligations and commercial paper. A Fund also may purchase money market instruments when it has cash reserves or in anticipation of taking a market position.

Investment Techniques

The following information supplements (except as noted) and should be read in conjunction with the relevant Fund's Prospectus.

Foreign Currency Transactions. (All Funds) Each Fund may enter into foreign currency transactions for a variety of purposes, including: to fix in U.S. dollars, between trade and settlement date, the value of a security the Fund has agreed to buy or sell; to hedge the U.S. dollar value of securities the Fund already owns, particularly if it expects a decrease in the value of the currency in which the foreign security is denominated; or to gain exposure to the foreign currency in an attempt to realize gains.

Foreign currency transactions may involve, for example, a Fund's purchase of foreign currencies for U.S. dollars or the maintenance of short positions in foreign currencies. A short position would involve the Fund agreeing to exchange an amount of a currency it did not currently own for another currency at a future date in anticipation of a decline in the value of the currency sold relative to the currency the Fund contracted to receive. A Fund's success in these transactions may depend on the ability of the Sub-Adviser to predict accurately the future exchange rates between foreign currencies and the U.S. dollar.

Currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors, as seen from an international perspective. Currency exchange rates also can be affected unpredictably by intervention, or failure to intervene, by U.S. or foreign governments or central banks, or by currency controls or political developments in the United States or abroad.

Borrowing Money. (All Funds) Each Fund is permitted to borrow to the extent permitted under the 1940 Act, which permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. Each Fund, however, currently intends to borrow money only for temporary or emergency (not leveraging) purposes. While such borrowings exceed 5% of the Fund's total assets, the Fund will not make any additional investments. Each Fund, however, may borrow for investment purposes on a secured basis through entering into reverse repurchase agreements, as described below.

Reverse Repurchase Agreements. (All Funds) Each Fund may enter into reverse repurchase agreements with banks, broker/dealers or other financial institutions. This form of borrowing involves the transfer by the Fund of an underlying debt instrument in return for cash proceeds based on a percentage of the value of the security. The Fund retains the right to receive interest and principal payments on the security. At an agreed upon future date, the Fund

repurchases the security at principal plus accrued interest. As a result of these transactions, the Fund is exposed to greater potential fluctuations in the value of its assets and its net asset value per share. To the extent the Fund enters into a reverse repurchase agreement, the Fund will segregate permissible liquid assets at least equal to the aggregate amount of its reverse repurchase obligations, plus accrued interest, in certain cases, in accordance with releases promulgated by the Securities and Exchange Commission. The Securities and Exchange Commission views reverse repurchase transactions as collateralized borrowings by the Fund. Except for these transactions, the Fund's borrowings generally will be unsecured.

Lending Portfolio Securities. (All Funds) Each Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund's investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund's total assets (including the value of all assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The Fund may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Derivatives. (All Funds) In addition to mortgage-related securities and asset-backed securities, the Fund may invest in, or enter into, other derivatives, such as options, futures, options on futures, swaps and custodial receipts, for a variety of reasons, including to hedge certain market risks, to provide a substitute for purchasing or selling particular securities or to increase potential income gain. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to invest than "traditional" securities would. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, and related indexes. Examples of derivative instruments the Funds may use include options contracts, futures contracts, options on futures contracts swaps and credit derivatives. Derivatives may provide a cheaper, quicker or more specifically focused way for a Fund to invest than "traditional" securities would. A Fund's portfolio manager may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by a Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit a Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance.

If a Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund's return or result in a loss. A Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency that is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. In contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Advisers will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as they would review the credit quality of a security to be purchased by a Fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Some derivatives the Funds use involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index). This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable. Pursuant to regulations and/or published positions of the Securities and Exchange Commission, a Fund may be required to segregate permissible liquid assets, or engage in other measures approved by the Securities and Exchange Commission or its staff, to "cover" the Fund's obligations relating to its transactions in derivatives. For example, in the case of futures contracts or forward contracts that are not contractually required to cash settle, the Fund must set aside liquid assets equal to such contracts' full notional value (generally, the total numerical value of the asset underlying a future or forward contract at the time of valuation) while the positions are open. With respect to futures contracts or forward contracts that are contractually required to cash settle, however, a Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligation (i.e., the Fund's daily net liability) under the contracts, if any, rather than such contracts' full notional value. By setting aside assets equal to only its net obligations under cash-settled futures and

forwards contracts, the Fund may employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional value of such contracts.

Neither the Company nor any of the Funds will be a commodity pool. The Company has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility as a registered investment company for an exclusion from the definition of commodity pool operator and, that neither the Company nor any of the Funds is subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

Futures Transactions—In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date. A Fund may invest in futures contracts and options on futures contracts, including those with respect to interest rates, commodities, and security or commodity indexes. To the extent a Fund may invest in foreign currency-denominated securities, it also may invest in foreign currency futures contracts and options thereon.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. Transaction costs also are included in these calculations.

Each Fund may enter into futures contracts in U.S. domestic markets or on exchanges located outside the United States. Foreign markets may offer advantages such as trading opportunities or arbitrage possibilities not available in the United States. Foreign markets, however, may have greater risk potential than domestic markets. For example, some foreign exchanges are principal markets so that no common clearing facility exists and an investor may look only to the broker for performance of the contract. In addition, any profits that the Fund might realize in trading could be eliminated by adverse changes in the currency exchange rate, or the Fund could incur losses as a result of those changes. Transactions on foreign exchanges may include commodities which are traded on domestic exchanges or those which are not. Unlike trading on domestic commodity exchanges, trading on foreign commodity exchanges is not regulated by the Commodity Futures Trading Commission.

Engaging in these transactions involves risk of loss to a Fund which could adversely affect the value of the Fund's net assets. Although each of these Funds intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular

contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures by a Fund also is subject to the Sub-Adviser's ability to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Specific Futures Transactions. (All Funds) Each Fund may purchase and sell stock index futures contracts. A stock index future obligates the Fund to pay or receive an amount of cash equal to a fixed dollar amount specified in the futures contract multiplied by the difference between the settlement price of the contract on the contract's last trading day and the value of the index based on the stock prices of the securities that comprise it at the opening of trading in such securities on the next business day.

Each Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

Each Fund may purchase and sell currency futures. A foreign currency future obligates the Fund to purchase or sell an amount of a specific currency at a future date at a specific price.

Interest Rate Swaps. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (for example, an exchange of floating rate payments for fixed-rate payments). The exchange commitments can involve payments to be made in the same currency or in different currencies. The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If Dreyfus is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would diminish compared with what it would have been if these investment techniques were not used. Moreover, even if Dreyfus is correct in its forecasts, there is a risk that the swap position may correlate imperfectly with the price of the asset or liability being hedged. There is no limit on the amount of interest rate swap transactions that may be entered into by the Fund. These transactions do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to the net amount of interest payments that the Fund is contractually obligated to make. If the other party to an interest rate swap defaults, the Fund's risk of loss consists of the net amount of interest payments that the Fund contractually is entitled to receive.

Custodial Receipts. The Fund may purchase custodial receipts representing the right to receive certain future principal and/or interest payments on a basket of securities which underlie the custodial receipts. A number of different arrangements are possible. In a typical custodial receipt arrangement, an issuer or a third party owner of securities deposits such securities obligations with a custodian in exchange for custodial receipts. These custodial receipts typically are sold in private placements and are designed to provide investors with pro rata ownership of a portfolio of underlying securities.

Options—In General. (All Funds) Each Fund may purchase call and put options and write (i.e., sell) covered call and put option contracts. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by a Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction such as by segregating permissible liquid assets. A put option written by a Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken or otherwise covers the transaction. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. (All Funds) Each Fund may purchase and sell call and put options in respect of specific securities (or groups or "baskets" of specific securities) or stock indices listed on national securities exchanges or traded in the over-the-counter market. An option on a stock index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the stock index upon which the option is based is greater than in the case of a call, or less than in the case of a put, the exercise price of

the option. Thus, the effectiveness of purchasing or writing stock index options will depend upon price movements in the level of the index rather than the price of a particular stock.

Each Fund may purchase and sell call and put options on foreign currency. These options convey the right to buy or sell the underlying currency at a price which is expected to be lower or higher than the spot price of the currency at the time the option is exercised or expires.

Each Fund may purchase cash-settled options on interest rate swaps, interest rate swaps denominated in foreign currency and equity index swaps in pursuit of its investment objective. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (for example, an exchange of floating-rate payments for fixed-rate payments) denominated in U.S. dollars or foreign currency. Equity index swaps involve the exchange by the Fund with another party of cash flows based upon the performance of an index or a portion of an index of securities which usually includes dividends. A cash-settled option on a swap gives the purchaser the right, but not the obligation, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms.

Successful use by a Fund of options and options on futures will be subject to the Sub-Adviser's ability to predict correctly movements in the prices of individual stocks, the stock market generally, foreign currencies or interest rates. To the extent the Sub-Adviser's predictions are incorrect, the Fund may incur losses.

Swap Transactions and Other Credit Derivatives. (All Funds) Each Fund may engage in swap transactions, including interest rates swaps, interest rate locks, caps, collars and floors, credit default swaps, and index swap agreements and other credit derivative products, to seek to mitigate risk, manage maturity and duration, reduce portfolio turnover, or obtain a particular desired return at a lower cost to the Fund than if the Fund had invested directly in an instrument that yielded the desired return. A Fund also may enter into options on swaps, sometimes called “swaptions.”

Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or “swapped” between the parties are generally calculated with respect to a “notional amount,” i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of credit default swaps or securities representing a particular index. The “notional amount” of the swap agreement is only used on a basis upon which to calculate the obligations that the parties to a swap agreement have agreed to exchange.

Most swap agreements entered into by a Fund are cash settled and calculate the obligations of the parties to the agreement on a “net basis.” Thus, a Fund’s current obligations (or rights) under a swap agreement generally will be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to

the agreement (the “net amount”). The Fund’s current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the segregation of permissible liquid assets of the Fund.

A swap option is a contract that gives a counterparty the right (but not the obligation) in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. A cash-settled option on a swap gives the purchaser the right in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms. Depending on the terms of the particular option agreement, the Fund generally will incur a greater degree of risk when it writes a swap option than it will incur when it purchases a swap option. When a Fund purchases a swap option, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when a Fund writes a swap option, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.

Interest rate swaps are over-the-counter contracts in which each party agrees to make a periodic interest payment based on an index or the value of an asset in return for a periodic payment from the other party based on a different index or asset. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index rises above a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. Interest rate collars involve selling a cap and purchasing a floor or vice versa to protect the Fund against interest rate movements exceeding given minimum or maximum levels.

A Fund may enter into credit default swap agreements and similar agreements, which may have as reference obligations securities that are or are not currently held by a Fund. The protection “buyer” in a credit default contract may be obligated to pay the protection “seller” an up front payment or a periodic stream of payments over the term of the contract provided generally that no credit event on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the “par value” (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. A Fund may be either the buyer or seller in the transaction. If a Fund is a buyer and no credit event occurs, the Fund recovers nothing if the swap is held through its termination date. However, if a credit event occurs, the Fund may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. As a seller, a Fund generally receives an up front payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. Credit default swaps and similar instruments involve greater risks than if a Fund had invested in the reference obligation directly,

since, in addition to general market risks, they are subject to illiquidity risk, counterparty risk and credit risk.

Each Fund may invest in credit linked securities issued by a limited purpose trust or other vehicle that, in turn, invests in a derivative instrument or basket of derivative instruments, such as credit default swaps or interest rate swaps, to obtain exposure to certain fixed income markets or to remain fully invested when more traditional income producing securities are not available. Like an investment in a bond, an investment in these credit linked securities represents the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the security. However, these payments are conditioned on the issuer's receipt of payments from, and the issuer's potential obligations to, the counterparties to certain derivative instruments entered into by the issuer of the credit linked security. For example, the issuer may sell one or more credit default swaps entitling the issuer to receive a stream of payments over the term of the swap agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par (or other agreed upon value) of the referenced debt obligation.

The use of credit derivatives is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If the Manager is incorrect in its forecasts of default risks, market spreads or other applicable factors, or a counterparty defaults, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. In addition, it is possible that developments in the credit derivatives market, including potential government regulation, could adversely affect a Fund's ability to terminate existing swap or other credit derivative agreements or to realize amounts to be received under such agreements.

A Fund will enter into swap and other credit derivatives transactions only when the Manager believes it would be in the best interests of the Fund to do so. In addition, a Fund will enter into swap and other credit derivative agreements only with counterparties that meet certain standards of creditworthiness (generally, such counterparties would have to be eligible counterparties under the terms of the Funds' repurchase agreement guidelines).

Future Developments. (All Funds) A Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in its Prospectus or this SAI.

Short-Selling. (All Funds) In these transactions, the Fund sells a security it does not own in anticipation of a decline in the market value of the security. The Fund may make short-sales to hedge positions, for duration and risk management to maintain portfolio flexibility or to enhance returns. To complete a short-sale transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is obligated to replace the security borrowed by purchasing it subsequently at the market price at the time of replacement. The price at such time

may be more or less than the price at which the security was sold by the Fund, which would result in a loss or gain, respectively. The Fund also may make short sales "against the box," in which the Fund enters into a short sale of a security it owns or has the immediate and unconditional right to acquire at no additional cost at the time of the sale.

Securities will not be sold short if, after effect is given to any such short sale, the total market value of all securities sold short would exceed 5% of the value of the Fund's net assets.

Until the Fund closes its short position or replaces the borrowed security, it will: (a) segregate permissible liquid assets in an amount that, together with the amount provided as collateral, always equals the current value of the security sold short; or (b) otherwise cover its short position.

Forward Roll Transactions. (Dreyfus Premier Balanced Opportunity Fund only) To enhance current income, the Fund may enter into forward roll transactions with respect to mortgage-related securities. The Fund will only enter into covered rolls. In a forward roll transaction, the Fund sells a mortgage-related security to a financial institution, such as a bank or broker-dealer, and simultaneously agrees to purchase a similar security from the institution at a later date at an agreed upon price. The securities that are purchased will bear the same interest rate as those sold, but generally will be collateralized by different pools of mortgages with different pre-payment histories than those sold. During the period between the sale and purchase, the Fund will not be entitled to receive interest and principal payments on the securities sold. Proceeds of the sale typically will be invested in short-term instruments, particularly repurchase agreements, and the income from these investments, together with any additional fee income received on the sale will be expected to generate income for the Fund exceeding the yield on the securities sold. Forward roll transactions involve the risk that the market value of the securities sold by the Fund may decline below the purchase price of those securities. The Fund will segregate permissible liquid assets at least equal to the amount of the repurchase price (including accrued interest).

Forward Commitments. (All Funds) Each Fund may purchase or sell securities on a forward commitment, when-issued or delayed-delivery basis, which means delivery and payment take place in the future after the date of the commitment to purchase or sell the securities at a predetermined price and/or yield. Typically, no interest accrues to the purchaser until the security is delivered. When purchasing a security on a forward commitment basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its net asset value. Because the Fund is not required to pay for these securities until the delivery date, these risks are in addition to the risks associated with the Fund's other investments. If the Fund is fully or almost fully invested when forward commitment purchases are outstanding, such purchases may result in a form of leverage. A Fund would engage in forward commitments to increase its portfolio's financial exposure to the types of securities in which it invests. Leveraging the portfolio in this manner will increase the Fund's exposure to changes in interest rates and will increase the volatility of its returns. Each Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Securities purchased on a forward commitment, when-issued or delayed-delivery basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities purchased on a forward commitment or when-issued or delayed-delivery basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a when-issued or delayed-delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed-delivery basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share. Each Fund currently intends to limit its purchase of securities on a when-issued or delayed-delivery basis to no more than 5% of the Fund's net assets.

Certain Investment Considerations and Risks

Equity Securities. (All Funds) Equity securities, including common stock, and certain preferred stock, convertible securities and warrants, fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be pronounced. Changes in the value of a Fund's investments will result in changes in the value of its shares and thus the Fund's total return to investors.

Each Fund may purchase equity securities of small capitalization companies. The stock prices of these companies may be subject to more abrupt or erratic market movements than the stocks of larger, more established companies, because these securities typically are traded in lower volume and the issuers typically are more subject to changes in earnings and prospects. Each Fund, together with other investment companies advised by the Sub-Adviser or the Manager and its affiliates, may own significant positions in portfolio companies which, depending on market conditions, may affect adversely the Fund's ability to dispose of some or all of its position should it desire to do so.

Dreyfus Premier Balanced Opportunity Fund and Dreyfus Premier Select Fund may purchase securities of companies that have no earnings or have experienced losses. A Fund generally will make these investments based on a belief that actual anticipated products or services will produce future earnings. If the anticipated event is delayed or does not occur, or if investor perception about the company changes, the company's stock price may decline sharply and its securities may become less liquid.

Dreyfus Premier Balanced Opportunity Fund and Dreyfus Premier Select Fund may purchase securities of companies in initial public offerings ("IPOs") or shortly thereafter. An IPO is a corporation's first offering of stock to the public. Shares are given a market value reflecting expectations for the corporation's future growth. Special rules of the National Association of Securities Dealers, Inc. ("NASD") apply to the distribution of IPOs. Corporations offering IPOs generally have limited operating histories and may involve greater investment risk. The prices of these companies' securities can be very volatile, rising and falling rapidly, sometimes based solely on investor perceptions rather than economic reasons.

Each Fund may invest in securities issued by companies in the technology sector, which has been among the most volatile sectors of the stock market. Technology companies involve greater risk because their revenues and earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain technology companies may have limited product lines, markets or financial resources, or may depend on a limited management group. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of technology stocks than it does in other sectors. Fund investments made in anticipation of future products and services may decline dramatically in value if the anticipated products or services are delayed or canceled.

Fixed-Income Securities. (All Funds) Each Fund may invest in fixed-income securities rated at the time of investment at least Baa by Moody's Investors Service, Inc. ("Moody's") or BBB by Standard & Poor's Ratings Services ("S&P") or Fitch Ratings ("Fitch" and together with Moody's and S&P, the "Rating Agencies") or, if unrated, deemed to be of comparable quality by the Sub-Adviser. Even though interest-bearing securities are investments which promise a stable stream of income, the prices of such securities are inversely affected by changes in interest rates and, therefore, are subject to the risk of market price fluctuations. The values of fixed-income securities also may be affected by changes in the credit rating or financial condition of the issuer. In addition, each Fund may invest up to 5% of its net assets in fixed-income securities rated below investment grade by the Rating Agencies, which may be subject to such risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated fixed-income securities. Certain securities that may be purchased by the Fund, such as those with interest rates that fluctuate directly or indirectly based on multiples of a stated index, are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and possibly loss of principal. The values of fixed-income securities also may be affected by changes in the credit rating or financial condition of the issuer. Once the rating of a portfolio security has been changed, the Fund will consider all circumstances deemed relevant in determining whether to continue to hold the security. See "Appendix" for a general description of the Rating Agencies' ratings.

High Yield-Lower Rated Securities. (All Funds) Each Fund may invest up to 5% of its total assets in debt securities rated below Baa by Moody's and below BBB by S&P and Fitch, and as low as the lowest rating assigned by the Rating Agencies. Higher yielding (and, therefore, higher risk) securities may be subject to certain risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated securities. The retail secondary market for these securities may be less liquid than that of higher rated securities; adverse conditions could make it difficult at times for the Fund to sell certain securities or could result in lower prices than those used in calculating the Fund's net asset value.

Bond prices are inversely related to interest rate changes; however, bond price volatility also is inversely related to coupon. Accordingly, below investment grade securities may be relatively less sensitive to interest rate changes than higher quality securities of comparable maturity, because of their higher coupon. This higher coupon is what the investor receives in return for bearing greater credit risk. The higher credit risk associated with below investment grade securities potentially can have a greater effect on the value of such securities than may be

the case with higher quality issues of comparable maturity, and will be a substantial factor in the Fund's relative share price volatility. Although ratings may be useful in evaluating the safety of interest and principal payments, they do not evaluate the market value risk of these securities. Each Fund will rely on the Sub-Adviser's judgment, analysis and experience in evaluating the creditworthiness of an issuer.

You should be aware that the market values of many of these securities tend to be more sensitive to economic conditions than are higher rated securities and will fluctuate over time. These securities generally are considered by the Rating Agencies to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation and generally will involve more credit risk than securities in the higher rating categories.

Companies that issue certain of these securities often are highly leveraged and may not have available to them more traditional methods of financing. Therefore, the risk associated with acquiring the securities of such issuers generally is greater than is the case with the higher rated securities. For example, during an economic downturn or a sustained period of rising interest rates, highly leveraged issuers of these securities may not have sufficient revenues to meet their interest payment obligations. The issuer's ability to service its debt obligations also may be affected adversely by specific corporate developments, forecasts, or the unavailability of additional financing. The risk of loss because of default by the issuer is significantly greater for the holders of these securities because such securities generally are unsecured and often are subordinated to other obligations of the issuer.

Because there is no established retail secondary market for many of these securities, the Funds anticipate that such securities could be sold only to a limited number of dealers or institutional investors. To the extent a secondary trading market for these securities does exist, it generally is not as liquid as the secondary market for higher rated securities. The lack of a liquid secondary market may have an adverse impact on market price and yield and the Fund's ability to dispose of particular issues when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of a liquid secondary market for certain securities also may make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio and calculating its net asset value. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of these securities. In such cases, judgment may play a greater role in valuation because less reliable, objective data may be available.

These securities may be particularly susceptible to economic downturns. An economic recession could adversely affect the ability of the issuers of lower rated bonds to repay principal and pay interest thereon and increase the incidence of default for such securities. It is likely that an economic recession also could disrupt severely the market for such securities and have an adverse impact on their value.

Each Fund may acquire these securities during an initial offering. Such securities may involve special risks because they are new issues. The Sub-Adviser will review carefully the credit and other characteristics pertinent to such new issues.

The credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon bonds, pay-in-kind bonds and step-up bonds. In addition to the risks associated with the credit rating of the issuers, the market prices of these securities may be very volatile during the period no interest is paid.

Mortgage-Related Securities. (Dreyfus Premier Balanced Opportunity Fund only)
Mortgage-related securities are subject to both credit and prepayment risk. Although they may provide opportunities for enhanced total return, you should be aware that the lower rated mortgage-related securities in which the Fund may invest are likely to be more volatile and less liquid, and more difficult to price accurately, than more traditional debt securities. These securities may be particularly susceptible to economic downturns. It is likely that an economic recession could disrupt severely the market for such securities and may have an adverse impact on the value of such securities.

Mortgage-related securities generally are subject to credit risks associated with the performance of the underlying mortgage properties and to prepayment risk. In certain instances, the credit risk associated with mortgage-related securities can be reduced by third party guarantees or other forms of credit support. Improved credit risk does not reduce prepayment risk that is unrelated to the rating assigned to the mortgage-related security. Prepayment risk can lead to fluctuations in value of the mortgage-related security that may be pronounced. If a mortgage-related security is purchased at a premium, all or part of the premium may be lost if there is a decline in the market value of the security, whether resulting from changes in interest rates or prepayments on the underlying mortgage collateral. Certain mortgage-related securities that may be purchased by the Fund, such as inverse floating rate collateralized mortgage obligations, have coupons that move inversely to a multiple of a specific index, which may result in a form of leverage. As with other interest-bearing securities, the prices of certain mortgage-related securities are inversely affected by changes in interest rates. However, although the value of a mortgage-related security may decline when interest rates rise, the converse is not necessarily true, since in periods of declining interest rates the mortgages underlying the security are more likely to be prepaid. For this and other reasons, a mortgage-related security's stated maturity may be shortened by unscheduled prepayments on the underlying mortgages, and, therefore, it is not possible to predict accurately the security's return to the Fund. Moreover, with respect to certain stripped mortgage-backed securities, if the underlying mortgage securities experience greater than anticipated prepayments of principal, the Fund may fail to fully recoup its initial investment even if the securities are rated in the highest rating category by a nationally recognized statistical rating organization. During periods of rapidly rising interest rates, prepayments of mortgage-related securities may occur at slower than expected rates. Slower prepayments effectively may lengthen a mortgage-related security's expected maturity which generally would cause the value of such security to fluctuate more widely in response to changes in interest rates. Were the prepayments on the Fund's mortgage-related securities to decrease broadly, the Fund's effective duration, and thus sensitivity to interest rate fluctuations, would increase. Commercial real property loans, however, often contain provisions that reduce the likelihood that such securities will be prepaid. The provisions generally impose significant prepayment penalties on loans and in some cases there may be prohibitions on principal prepayments for several years following origination.

Foreign Securities. (All Funds) Investing in the securities of foreign issuers, as well as instruments that provide investment exposure to foreign securities and markets, involves risks that are not typically associated with investing in U.S. dollar-denominated securities of domestic issuers. Investments in foreign issuers may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. A change in the value of such foreign currency against the U.S. dollar also will result in a change in the amount of income the Fund has available for distribution. Because a portion of a Fund's investment income may be received in foreign currencies, the Fund will be required to compute its income in U.S. dollars for distribution to shareholders, and therefore the Fund will absorb the cost of currency fluctuations. After the Fund has distributed income, subsequent foreign currency losses may result in the Fund having distributed more income in a particular fiscal period than was available from investment income, which could result in a return of capital to shareholders. In addition, if the exchange rate for the currency in which the Fund receives interest payments declines against the U.S. dollar before such income is distributed as dividends to shareholders, the Fund may have to sell portfolio securities to obtain sufficient cash to enable the Fund to pay such dividends. Commissions on transactions in foreign securities may be higher than those for similar transactions on domestic stock markets and foreign custodial costs are higher than domestic custodial costs. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have on occasion been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign securities markets generally are not as developed or efficient as those in the United States. Securities of some foreign issuers are less liquid and more volatile than securities of comparable U.S. issuers. Similarly, volume and liquidity in most foreign securities markets are less than in the United States and, at times, volatility of price can be greater than in the United States.

Because evidences of ownership of foreign securities usually are held outside the United States, by investing in foreign securities a Fund will be subject to additional risks, which include possible adverse political and economic developments, seizure or nationalization of foreign deposits and adoption of governmental restrictions that might adversely affect or restrict the payment of principal and interest on the foreign securities to investors located outside the country of the issuer, whether from currency blockage or otherwise. Foreign securities held by the Fund may trade on days when the Fund does not calculate its net asset value and thus may affect the Fund's net asset value on days when investors have no access to the Fund.

Developing countries have economic structures that are generally less diverse and mature, and political systems that are less stable, than those of developed countries. The markets of developing countries may be more volatile than the markets of more mature economies; however, such markets may provide higher rates of return to investors. Many developing countries providing investment opportunities for the Fund have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations

in inflation rates have had and may continue to have adverse effects on the economies and securities markets of certain of these countries.

Since foreign securities often are purchased with and payable in currencies of foreign countries, the value of these assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in currency rates and exchange control regulations.

Investment Restrictions

Under normal circumstances, Dreyfus Premier Blue Chip Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in the stocks (or other instruments with similar economic characteristics) of "blue chip" companies. Dreyfus Premier Blue Chip Fund has adopted a policy to provide its shareholders with at least 60 days' prior notice of any change in its policy to so invest 80% of its assets.

Each Fund's investment objective is a fundamental policy, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of such Fund's outstanding voting shares. In addition, each Fund has adopted investment restrictions numbered 1 through 7 as fundamental policies, and Dreyfus Premier Balanced Opportunity Fund and Dreyfus Premier Blue Chip Fund also have adopted investment restrictions numbered 13 and 14 as additional fundamental policies, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. Investment restrictions numbered 8 through 12 are not fundamental policies and may be changed, as to a Fund, by vote of a majority of the Company's Board members at any time. No Fund may:

1. Invest more than 25% of the value of its total assets in the securities of issuers in any single industry, provided that there shall be no limitation on the purchase of obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.
2. Invest in physical commodities or commodities contracts, except that the Fund may purchase and sell options, forward contracts, futures contracts, including those related to indices, and options on futures contracts or indices and enter into swaps and other derivatives.
3. Purchase, hold or deal in real estate, or oil, gas or other mineral leases or exploration or development programs, but the Fund may purchase and sell securities that are secured by real estate or issued by companies that invest or deal in real estate or real estate investment trusts.
4. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowing to no more than 33-1/3% of the value of the Fund's total assets). For purposes of this Investment Restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.
5. Lend any securities or make loans to others, except to the extent permitted under the 1940 Act (which currently limits such loans to no more than 33-1/3% of the value of the Fund's total assets) or as otherwise permitted by the Securities and Exchange Commission. For purposes of this Investment Restriction, the purchase of debt obligations (including

acquisitions of loans, loan participations or other forms of debt instruments) and the entry into repurchase agreements shall not constitute loans by the Fund. Any loans of portfolio securities will be made according to guidelines established by the Securities and Exchange Commission and the Company's Board.

6. Act as an underwriter of securities of other issuers, except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.

7. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except insofar as the Fund may be deemed to have issued a senior security by reason of borrowing money in accordance with the Fund's borrowing policies. For purposes of this Investment Restriction, collateral, escrow, or margin or other deposits with respect to the making of short sales, the purchase or sale of futures contracts or options, purchase or sale of forward foreign currency contracts, and the writing of options on securities are not deemed to be an issuance of senior security.

8. Purchase securities on margin, except for use of short-term credit necessary for clearance of purchases and sales of portfolio securities, but the Fund may make margin deposits in connection with transactions in options, forward contracts, futures contracts, and options on futures contracts, and except that effecting short sales will be deemed not to constitute a margin purchase for purposes of this Investment Restriction.

9. Invest in the securities of a company for the purpose of exercising management or control, but the Fund will vote the securities it owns in its portfolio as a shareholder in accordance with its views.

10. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities that are illiquid, if, in the aggregate, more than 15% of the value of the Fund's net assets would be so invested.

11. Purchase securities of other investment companies, except to the extent permitted under the 1940 Act.

12. Pledge, mortgage or hypothecate its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the purchase of securities on a when-issued, forward commitment or delayed-delivery basis and the deposit of assets in escrow in connection with writing covered put and call options and collateral and initial or variation margin arrangements with respect to permitted transactions.

The following investment restrictions numbered 13 and 14 are fundamental and apply to only Dreyfus Premier Balanced Opportunity Fund and Dreyfus Premier Blue Chip Fund. Neither of these Funds may:

13. Invest more than 5% of its assets in the obligations of any single issuer, except that up to 25% of the value of the Fund's total assets may be invested, and securities issued or guaranteed by the U.S. Government, or its agencies or instrumentalities may be purchased, without regard to any such limitation.

14. Hold more than 10% of the outstanding voting securities of any single issuer. This Investment Restriction applies only with respect to 75% of the Fund's total assets.

If a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values or assets will not constitute a violation of such restriction. With respect to Investment Restriction No. 4, however, if borrowings exceed 33-1/3% of the value of a Fund's total assets as a result of a change in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

MANAGEMENT OF THE COMPANY

The Company's Board is responsible for the management and supervision of the Funds, and approves all significant agreements with those companies that furnish services to the Funds. These companies are as follows:

| | |
|---|---|
| The Dreyfus Corporation | Investment Adviser |
| Wisconsin Capital Management, LLC | Sub-Adviser (Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund only) |
| Dreyfus Service Corporation | Distributor |
| Dreyfus Transfer, Inc. | Transfer Agent |
| Mellon Bank, N.A. | Custodian |

Board Members of the Company¹

Board members of the Company, together with information as to their positions with the Company, principal occupations and other board memberships and affiliations, are shown below.

| Name (Age) Position with Company (Since) | Principal Occupation During Past 5 Years | Other Board Memberships and Affiliations |
|--|---|---|
| Joseph S. DiMartino (63) Chairman of the Board (2003) | Corporate Director and Trustee | The Muscular Dystrophy Association, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i> Sunair Services Corporation, engages in the design, manufacture and sale of high frequency systems for long-range voice and data communications, as well as provides certain outdoor-related services to homes and businesses, <i>Director</i> |

¹ None of the Board members are "interested persons" of the Company, as defined in the 1940 Act.

| Name (Age) Position with Company (Since) | Principal Occupation During Past 5 Years | Other Board Memberships and Affiliations |
|---|---|--|
| Peggy C. Davis (63) Board Member (2006) | Shad Professor of Law, New York University School of Law (1983 – present) Writer and teacher in the fields of evidence, constitutional theory, family law, social sciences and the law, legal process and professional methodology and training | None |

Anne Wexler (76)
Board Member (2003)

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2006.

[illegible]

| | <u>Joseph S. DiMartino</u> | <u>Peggy C. Davis</u> | <u>David P. Feldman</u> | <u>James F. Henry</u> | <u>Ehud Houminer</u> | <u>Gloria Messinger</u> | <u>Dr. Martin Peretz</u> | <u>Anne Wexler</u> |
|--|--------------------------------|---------------------------|-----------------------------|---------------------------|--------------------------|-----------------------------|------------------------------|------------------------|
| Dreyfus Premier Blue Chip Fund | None | None | None | None | None | None | None | None |
| Dreyfus Premier Select Fund | None | None | None | None | None | None | None | None |
| Aggregate Holdings of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member | Over \$100,000 | None | Over \$100,000 | \$50,001- \$100,000 | None | \$1 - \$10,000 | \$1 - \$10,000 | None |

As of December 31, 2006, none of the Board members or their immediate family members owned securities of the Manager, the Sub-Adviser, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager, the Sub-Adviser or the Distributor.

Currently, the Company and 13 other funds (comprised of 47 portfolios) in the Dreyfus Family of Funds pay each Board member their respective allocated portion of an annual retainer of \$85,000, and a fee of \$10,000 for each regularly scheduled Board meeting attended, \$2,000 for separate in-person committee meetings attended which are not held in conjunction with a regularly scheduled Board meeting and \$1,000 for Board meetings and separate committee meetings attended that are conducted by telephone.¹ The Chairman of the Board receives an additional 25% of such compensation and the audit committee chairman receives an additional \$15,000 per annum. The Company also reimburses each Board member for travel and out of pocket expenses in connection with attending Board or committee meetings. Emeritus Board members are entitled to receive an annual retainer and a per meeting attended fee of one-half the amount paid to them as Board members. The aggregate amount of compensation paid to each Board member by the Company for the fiscal year ended August 31, 2006, and by all funds in the Dreyfus Family of Funds for which such person is a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) for the year ended December 31, 2006, was as follows:

| <u>Name of Board Member</u> | <u>Aggregate Compensation From the Company²</u> | <u>Total Compensation From the Company and Fund Complex Paid to Board Member⁽³⁾</u> |
|----------------------------------|--|--|
| Joseph S. DiMartino | \$4,064 | \$857,400 (193) |
| Peggy C. Davis ⁷ | \$970 | \$125,750 (72) |
| David P. Feldman | \$3,447 | \$217,000 (58) |
| John M. Fraser, Jr. ⁵ | \$530 | \$32,500 (49) |

| Name of Board Member | Aggregate Compensation From the Company ² | Total Compensation From the Company and Fund Complex Paid to Board Member ⁽³⁾ |
|---------------------------------|--|--|
| James F. Henry ⁷ | \$970 | 111,250 (49) |
| Ehud Houminer | \$3,124 | \$143,250 (79) |
| Gloria Messinger | \$3,334 | \$93,250 (26) |
| Dr. Paul A. Marks ⁴ | \$970 | \$111,250 (49) |
| T. John Szarkowski ⁶ | \$1,570 | \$32,500 (49) |
| Dr. Martin Peretz ⁷ | \$970 | \$112,250 (49) |
| Anne Wexler | \$3,334 | \$134,250 (58) |

¹ Prior to October 1, 2006, the Company paid its Board members its allocated portion of an annual retainer of \$40,000 and, prior to September 26, 2006 a fee of \$5,000 per meeting (with a minimum of \$500 per meeting and per telephone meeting) attended for the Company and five other funds (comprised of 13 portfolios) in the Dreyfus Family of Funds and reimbursed them for their expenses.

² Amount does not include the cost of office space, secretarial services and health benefits for the Chairman and expenses reimbursed to Board members for attending Board meetings, which in the aggregate amounted to \$7,156.

³ Represents the number of separate portfolios comprising the investment companies in the Fund complex, including the Funds, for which the Board member serves.

⁴ Emeritus Board member as of December 31, 2006.

⁵ Emeritus Board member as of May 24, 2000.

⁶ Emeritus Board member as of December 14, 2005.

⁷ Ms. Davis and Messrs. Henry and Peretz were elected Board members of the Fund effective September 26, 2006. Accordingly, they received no compensation from the Fund for periods prior thereto.

Officers of the Company

J. DAVID OFFICER, President since December 2006. Chief Operating Officer, Vice Chairman and a director of the Manager, and an officer of 90 investment companies (comprised of 190 portfolios) managed by the Manager. He is 58 years old and has been an employee of the Manager since April 1998.

MARK N. JACOBS, Vice President since September 2003. Executive Vice President, Secretary and General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 60 years old and has been an employee of the Manager since June 1977.

MICHAEL A. ROSENBERG, Vice President and Secretary since September 2003. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 47 years old and has been an employee of the Manager since October 1991.

JAMES BITETTO, Vice President and Assistant Secretary since August 2005. Associate General Counsel and Assistant Secretary of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since December 1996.

JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. She is 51 years old and has been an employee of the Manager since October 1988.

JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since June 2000.

JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. She is 44 years old and has been an employee of the Manager since February 1984.

JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since February 1991.

ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 55 years old and has been an employee of the Manager since May 1986.

JEFF PRUSNOFSKY, Vice President and Assistant Secretary since September 2003. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since October 1990.

JAMES WINDELS, Treasurer since September 2003. Director-Mutual Fund Accounting of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 48 years old and has been an employee of the Manager since April 1985.

ROBERT SVAGNA, Assistant Treasurer since September 2003. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 39 years old and has been an employee of the Manager since November 1990.

GAVIN C. REILLY, Assistant Treasurer since December 2005. Tax Manager of the Investment Accounting and Support Department of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Manager since April 1991.

ERIK D. NAVILOFF, Assistant Treasurer since August 2005. Senior Accounting Manager – Taxable Fixed Income Funds of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Manager since November 1992.

ROBERT S. ROBOL, Assistant Treasurer since August 2005. Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 42 years old and has been an employee of the Manager since October 1988.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since September 2003. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 87 investment companies (comprised of 202 portfolios) managed by the Manager. He is 36 years old and has been an employee of the Distributor since October 1998.

JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004. Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (91 investment companies, comprised of 206 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 49 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

The address of each Board member and officer of the Company is 200 Park Avenue, New York, New York 10166.

The Company's Board members and officers, as a group, owned less than 1% of each Fund's shares outstanding on March 9, 2007. See "Information About the Company and Funds" for a list of shareholders known by the Company to own of record 5% or more of a Fund's outstanding voting securities as of March 9, 2007.

MANAGEMENT ARRANGEMENTS

Investment Adviser. The Manager is a wholly-owned subsidiary of Mellon Financial Corporation ("Mellon"). Mellon is a global financial holding company incorporated under Pennsylvania law in 1971 and registered under the Federal Bank Holding Company Act of 1956,

as amended. Mellon provides a comprehensive range of financial products and services in domestic and selected international markets.

The Manager supervises investment management of the Funds pursuant to a Management Agreement (the "Agreement") between the Company and the Manager. As to each Fund, the Agreement is subject to annual approval by (i) the Company's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Company's Board members who are not "interested persons" (as defined in the 1940 Act) of the Company or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. As to each Fund, the Agreement is terminable without penalty, on 60 days' notice, by the Company's Board or by vote of the holders of a majority of the Fund's shares, or, on not less than 90 days' notice, by the Manager. The Agreement will terminate automatically, as to the relevant Fund, in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of the Manager: Jonathan Little, Chair of the Board; Thomas F. Eggers, President, Chief Executive Officer and a director; Jonathan Baum, Vice-Chair-Distribution and a director; J. Charles Cardona, Vice Chair and a director; Diane P. Durnin, Vice Chair and a director; Phillip N. Maisano, Chief Investment Officer, Vice Chair and a director; J. David Officer, Chief Operating Officer, Vice Chair and a director; Mark N. Jacobs, Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President-Corporate Communications; Jill Gill, Vice President-Human Resources; Anthony Mayo, Vice President-Information Systems; Theodore A. Schachar, Vice President-Tax; Alex G. Sciulli, Vice President; Wendy H. Strutt, Vice President; Gary Pierce, Controller; Joseph W. Connolly, Chief Compliance Officer; James Bitetto, Assistant Secretary; and Steven G. Elliott, Robert P. Kelly, David F. Lamere and Ronald P. O'Hanley III, directors.

The Manager maintains office facilities on behalf of the Funds, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Company. The Manager may pay the Distributor for shareholder services from the Manager's own assets, including past profits but not including the management fee paid by each Fund. The Distributor may use part or all of such payments to pay certain financial institutions (which may include banks), securities dealers ("Selected Dealers") and other industry professionals (collectively, "Service Agents") in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

Sub-Investment Adviser. The Sub-Adviser provides investment advisory assistance and day-to-day management of Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund investments pursuant to the Sub-Investment Advisory Agreement (the "Sub-Advisory Agreement") between the Sub-Adviser and the Manager. As to each Fund, the Sub-Advisory Agreement is subject to annual approval by (i) the Company's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Company's Board members who are not "interested persons" (as defined in the 1940 Act) of the Company or the Advisers, by vote cast in person at a meeting called for the purpose of voting on such approval. As to each Fund, the Sub-Advisory Agreement is terminable without penalty (i) by the Manager on 60 days' notice, (ii) by

the Company's Board or by vote of the holders of a majority of the Fund's shares on 60 days' notice, or (iii) by the Sub-Adviser on not less than 90 days' notice. The Sub-Advisory Agreement will terminate automatically, as to each Fund, in the event of its assignment (as defined in the 1940 Act) or upon the termination of the Management Agreement for any reason.

Thomas G. Plumb serves as the Sub-Adviser's President. Thomas G. Plumb is the sole owner of WCM, Inc., the manager of the Sub-Adviser, which has control and authority over the management and operation of the firm. Mr. Plumb controls the Sub-Adviser through his ownership of WCM, Inc., and he shares the allocation of the Sub-Adviser's profits and cash distributions with certain other portfolio managers of the firm.

Portfolio Management. The Manager manages each Fund's portfolio of investments in accordance with the stated policies of the Fund, subject to the approval of the Company's Board. The Sub-Adviser provides day-to-day management of Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund's portfolio of investments in accordance with the stated policies of each Fund, subject to the supervision of the Manager and the approval of the Company's Board. The Manager (or, in the case of Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund, the Sub-Adviser) provides each Fund with portfolio managers who are authorized by the Company's Board to execute purchases and sales of securities. The portfolio managers for Dreyfus Premier Balanced Opportunity Fund are Keith Stransky, Brian Ferguson, Sean Fitzgibbon, Catherine Powers and Kent Wosepka. The portfolio managers for Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund are Thomas G. Plumb, David B. Duchow, Timothy R. O'Brien and Clint A. Oppermann. The Manager and the Sub-Adviser also maintain research departments with professional staffs of portfolio managers and securities analysts who provide research services for the Funds and other funds advised by the Manager and the Sub-Adviser.

Mellon and its affiliates may have deposit, loan and commercial banking or other relationships with the issuers of securities purchased by the Fund. The Manager has informed the Company that in making its investment decisions it does not obtain or use material inside information that Mellon or its affiliates may possess with respect to such issuers.

The Company, the Manager, the Sub-Adviser and the Distributor each have adopted a Code of Ethics that permits its personnel, subject to such respective Code of Ethics, to invest in securities, including securities that may be purchased or held by the Funds. The Manager's Code of Ethics subjects its employees' personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics and are also subject to the oversight of Mellon's Investment Ethics Committee (the "Committee"). Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

Portfolio Manager Compensation. Portfolio manager compensation is comprised primarily of a market-based salary and a profit-sharing compensation arrangement. Overall Wisconsin Capital

profitability determines the total amount of compensation that is available for portfolio managers. The portfolio managers are compensated by the Wisconsin Capital and not by Dreyfus or the Fund. The portfolio managers own all of the equity of Wisconsin Capital. The profit-sharing compensation arrangement is governed by an Operating Agreement that sets forth the method in which net profits of Wisconsin Capital (above those net profits distributed to non-member employees as discretionary bonuses) are allocated among the members. Members of the sub-investment adviser divide the net profits of the firm on an annual fixed percentage that is designed to provide the minority members an increasing ownership interest in the firm over time. The profit-sharing compensation plan is not directly related to the performance or size of the Fund or any other account managed by the sub-investment adviser. However, the performance and size of the Fund may have a material impact on the sub-investment adviser's net profits.

Additional Information about Portfolio Managers. (Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund Only). The following table lists the number and types of other accounts advised by each Fund's primary portfolio manager and assets under management in those accounts as of November 30, 2006:

| <u>Portfolio Manager</u> | <u>Registered Investment Company Accounts</u> | <u>Assets Managed</u> | <u>Pooled Accounts</u> | <u>Assets Managed</u> | <u>Other Accounts</u> | <u>Assets Managed</u> |
|--------------------------|---|---------------------------|----------------------------|---------------------------|---------------------------|---------------------------|
| Thomas G. Plumb | 2 | 829.7M | 7 | 14.9M | 196 | 419.9M |
| David B. Duchow | 0 | 0 | 0 | 0 | 96 | 116.2M |
| Timothy R. O'Brien | 1 | 25.2M | 1 | 0.6M | 112 | 153M |
| Clint A. Oppermann | 1 | 28.4M | 3 | 5.9M | 29 | 25.5M |

None of the funds or accounts are subject to a performance-based advisory fee.

The dollar range of Fund shares beneficially owned by the primary portfolio manager is as follows as of the end of the Fund's fiscal year:

| <u>Portfolio Manager</u> | <u>Fund Name</u> | <u>Dollar Range of Fund Shares Beneficially Owned</u> |
|--------------------------|--------------------------------|---|
| Thomas G. Plumb | Dreyfus Premier Blue Chip Fund | Over \$100,000 |
| | Dreyfus Premier Select Fund | Over \$100,000 |
| David B. Duchow | Dreyfus Premier Blue Chip Fund | Over \$100,000 |
| | Dreyfus Premier Select Fund | Over \$100,000 |
| Timothy R. O'Brien | Dreyfus Premier Blue Chip Fund | Over \$100,000 |
| | Dreyfus Premier Select Fund | Over \$100,000 |
| Clint A. Oppermann | Dreyfus Premier Select Fund | Over \$100,000 |

Additional Information about Portfolio Managers. (Dreyfus Premier Balanced Opportunity Fund Only). The following table lists the number and types of other accounts advised by each Fund's primary portfolio manager and assets under management in those accounts as of November 30, 2006:

| <u>Portfolio Manager</u> | <u>Registered Investment Company Accounts</u> | <u>Assets Managed</u> | <u>Pooled Accounts</u> | <u>Assets Managed</u> | <u>Other Accounts</u> | <u>Assets Managed</u> |
|--------------------------|---|-----------------------|------------------------|-----------------------|-----------------------|-----------------------|

*Two of the accounts, totaling \$942 million in total assets, charge an advisory fee based on the performance of the accounts.

**One of the accounts, totaling \$207 million in total assets, charge an advisory fee based on the performance of the account.

The dollar range of Fund shares beneficially owned by the primary portfolio manager is as follows as of the end of the Fund's fiscal year:

| <u>Portfolio Manager</u> | <u>Dollar Range of Fund Shares Beneficially Owned</u> |
|--------------------------|---|
| Keith Stransky | \$0 |
| Brian Ferguson | \$0 |
| Sean Fitzgibbon | \$0 |
| Catherine Powers | \$0 |
| Kent Wosepka | \$0 |

Portfolio managers may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of institutions such as pension funds, insurance companies and foundations), bank common trust accounts and wrap fee programs (“Other Accounts”).

Potential conflicts of interest may arise because of Dreyfus’ management of the Funds and Other Accounts. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Dreyfus may be perceived as causing accounts it manages to participate in an offering to increase Dreyfus’ overall allocation of securities in that offering, or to increase Dreyfus’ ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as Dreyfus may have an incentive to allocate securities that are expected to increase in value to preferred accounts. Initial public offerings, in particular, are frequently of very limited availability. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the Fund, that they are managing on behalf of Dreyfus. Dreyfus periodically reviews each portfolio manager’s overall responsibilities to ensure that he or she is able to allocate the necessary time and resources to effectively manage the Fund. In addition, Dreyfus could be viewed as having a conflict of interest to the extent that Dreyfus or its affiliates and/or portfolio managers have a materially larger investment in Other Accounts than their investment in the Fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the Funds. For these or other reasons, the portfolio managers may purchase different securities for a Fund and the Other Accounts, and the performance of securities purchased for the Fund may vary from the performance of securities purchased for Other Accounts. The portfolio managers may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the Fund, which could have the potential to adversely impact the Fund, depending on market conditions.

A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in another account, such as when a purchase increases the value of securities previously purchased by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Conflicts of interest similar to those described above arise when portfolio managers are employed by a sub-investment adviser or are dual employees of the Manager and an affiliated entity and such portfolio managers also manage Other Accounts.

Dreyfus’ goal is to provide high quality investment services to all of its clients, while meeting Dreyfus’ fiduciary obligation to treat all clients fairly. Dreyfus has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that it believes address the conflicts associated with managing multiple accounts for multiple clients. In addition, Dreyfus monitors a variety of areas, including compliance with

Fund guidelines, the allocation of IPOs, and compliance with the firm's Code of Ethics. Furthermore, senior investment and business personnel at Dreyfus periodically review the performance of the portfolio managers for Dreyfus-managed funds.

Expenses. All expenses incurred in the operation of the Company are borne by the Company, except to the extent specifically assumed by the Manager or Sub-Adviser. The expenses borne by the Company include, without limitation: taxes, interest, loan commitment fees, interest and distributions paid on securities sold short, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager or Sub-Adviser or their affiliates, Securities and Exchange Commission fees and state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of independent pricing services, costs of maintaining the Company's existence, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders, costs of shareholders' reports and meetings, and any extraordinary expenses. In addition, each class of shares bears any class specific expenses allocated to such class, such as expenses related to the distribution and/or shareholder servicing of such class. Class A, Class B, Class C, Class T and Class Z shares of the Fund are subject to an annual shareholder services fee, and Class B, Class C and Class T shares of the Fund are subject to an annual distribution fee. See "Distribution Plan and Shareholder Service Plan."

As compensation for the Manager's services, the Company has agreed to pay the Manager a monthly management fee at the annual rate of 0.80% of the value of Dreyfus Premier Balanced Opportunity Fund's average daily net assets, 0.75% of the average daily net assets of Dreyfus Premier Blue Chip Fund and 0.80% of the average daily net assets of Dreyfus Premier Select Fund.

For the fiscal years ended November 30, 2006, 2005 and 2004, the management fees payable by each indicated Fund, the amounts waived by the Manager and the net fees paid by the Fund were as follows:

| Name of Fund | 2006 | | | 2005 | | | 2004 | | |
|---|--------------------|-------------------------|----------------|--------------------|-------------------------|----------------|--------------------|-------------------------|----------------|
| | <u>Fee Payable</u> | <u>Reduction in Fee</u> | <u>Net Fee</u> | <u>Fee Payable</u> | <u>Reduction in Fee</u> | <u>Net Fee</u> | <u>Fee Payable</u> | <u>Reduction in Fee</u> | <u>Net Fee</u> |
| Dreyfus Premier Balanced Opportunity Fund | \$6,682,561 | \$71,371 | \$6,611,190 | \$7,468,083 | \$160,093 | \$7,307,990 | \$3,509,529+ | \$0+ | \$3,509,529+ |
| Dreyfus Premier Blue Chip Fund | \$196,439 | \$62,713 | \$133,726 | \$251,245* | \$87,620* | \$163,625* | N/A | N/A | N/A |
| Dreyfus Premier Select Fund | \$236,436 | \$47,229 | \$189,207 | \$289,224* | \$73,878* | \$215,346* | N/A | N/A | N/A |

+ For the period February 2, 2004 (commencement of operations) through November 30, 2004.

* For the period February 25, 2005 (commencement of operations) through November 30, 2005.

Under the Sub-Advisory Agreement, the Manager has agreed to pay the Sub-Adviser a monthly fee in the amount of 100% of the management fee paid by Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund to the Manager for such month, less certain fees waived or expenses paid or reimbursed by the Manager, on each Fund's assets attributable to accounts of shareholders who have an adviser-client relationship with the Sub-Adviser (including the accounts of all shareholders of the Funds' Predecessor Funds as of the relevant reorganization date who continue as shareholders of the Fund following the reorganization of such Predecessor Fund), and, with respect to all other assets of Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund, 50% of the net management fee paid to the Manager on such assets.

For the fiscal years ended November 30, 2006, 2005 and 2004, the sub-investment advisory fees paid to the Sub-Adviser by the Manager with respect to each indicated Fund were as follows:

| Name of Fund | 2006 <u>Fee</u> | 2005 <u>Fee</u> | 2004 <u>Fee</u> |
|--------------------------------|----------------------------|----------------------------|----------------------------|
| Dreyfus Premier Blue Chip Fund | \$527 | \$89,196* | N/A |
| Dreyfus Premier Select Fund | \$917 | \$121,705* | N/A |

+ For the period February 2, 2004 (commencement of operations) through November 30, 2004.

* For the period February 25, 2005 (commencement of operations) through November 30, 2005.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of a Fund's net assets increases.

Prior to March 30, 2007, the Manager paid the Sub-Adviser a monthly fee in the amount of 100% of the management fee paid by Dreyfus Premier Balanced Opportunity Fund to the Manager for such month, less certain fees waived or expenses paid or reimbursed by the Manager, on the Fund's assets attributable to accounts of shareholders who had an adviser-client relationship with the Sub-Adviser (including the accounts of all shareholders of the Fund's Predecessor Fund as of the relevant reorganization date who continue as shareholders of the Fund following the reorganization of such Predecessor Fund), plus, with respect to all other assets of Dreyfus Premier Balanced Opportunity Fund, a monthly fee at the annual rate of 0.30% of the average daily net asset value of such assets up to \$300 million and 0.25% of the average daily net asset value of such assets in excess of \$300 million.

For the fiscal years ended November 30, 2006, 2005 and 2004, the sub-investment advisory fees paid to the Sub-Adviser by the Manager with respect to Dreyfus Premier Balanced Opportunity Fund was \$1,756,533, \$1,906,786 and \$580,471, respectively.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager, located at 200 Park Avenue, New York, New York 10166, serves as each Fund's distributor on a best efforts basis pursuant to an agreement with the Company, which is renewable annually.

The Distributor compensates Service Agents for selling Class A shares and Class T shares subject to a contingent deferred sales charge ("CDSC"), and Class C shares at the time of purchase from its own assets. The Distributor also compensates certain Service Agents for selling Class B shares at the time of purchase from its own assets when the Funds' offered Class B shares; the Funds' no longer offer Class B shares except in connection with dividend reinvestments and permitted exchanges. The proceeds of the CDSC and fees pursuant to the Company's Distribution Plan (described below), in part, are used to defray the expenses incurred by the Distributor in connection with the sale of the applicable class of Fund shares. The Distributor also may act as a Service Agent and retain sales loads and CDSCs and Distribution Plan fees. For purchases of Class A shares and Class T shares subject to a CDSC, the Distributor generally will pay Service Agents on new investments made through such Service Agents a commission of up to 1% of the amount invested. The Distributor generally will pay Service Agents 1% on new investments of Class C shares made through such Service Agents, and generally paid Service Agents 4% on new investments of Class B shares made through such Service Agents, of the net asset value of such shares purchased by their clients. With respect to Class B shares issued to shareholders in exchange for shares originally issued by a series of The Bear Stearns Funds (the "Acquired Fund"), the proceeds of any CDSC and fees pursuant to the Distribution Plan with respect to such Class B shares are payable to the Acquired Fund's former distributor to defray the expenses it incurred in connection with the sale of such shares when originally issued by the Acquired Fund.

The amounts retained on the sale of Fund shares by the Distributor from sales loads and from CDSCs, as applicable, with respect to Class A, Class B, Class C and Class T shares, are set forth below.

| Name of Fund | Class | Fiscal Year Ended 2006 | Fiscal Year Ended 2005 | Fiscal Year Ended 2004 |
|---|--------------|-----------------------------------|-----------------------------------|-----------------------------------|
| Dreyfus Premier Balanced Opportunity Fund | Class A | \$116,666 | \$492,523 | \$794,696+ |
| | Class B | \$651,036 | \$429,241 | \$102,704+ |
| | Class C | \$44,249 | \$86,126 | \$31,556+ |
| | Class T | \$312 | \$2,905 | \$8,031+ |
| Dreyfus Premier Blue Chip Fund | Class A | \$1,538 | \$391* | N/A |
| | Class B | N/A | N/A | N/A |
| | Class C | N/A | N/A | N/A |
| | Class T | N/A | N/A | N/A |
| Dreyfus Premier Select Fund | Class A | \$999 | \$1,053* | N/A |
| | Class B | N/A | N/A | N/A |
| | Class C | N/A | N/A | N/A |
| | Class T | N/A | N/A | N/A |

+ For the period February 2, 2004 (commencement of operations) through November 30, 2004.

* For the period February 25, 2005 (commencement of operations) through November 30, 2005.

The Distributor may pay Service Agents that have entered into agreements with the Distributor a fee based on the amount invested through such Service Agents in Fund shares by

employees participating in qualified or non-qualified employee benefit plans, including pension, profit-sharing and other deferred compensation plans, whether established by corporations, partnerships, non-profit entities or state and local governments ("Retirement Plans"), or other programs. The term "Retirement Plans" does not include IRAs, IRA "Rollover Accounts" or IRAs set up under Simplified Employee Pension Plans ("SEP-IRAs"). Generally, the Distributor may pay such Service Agents a fee of up to 1% of the amount invested through the Service Agents. The Distributor, however, may pay Service Agents a higher fee and reserves the right to cease paying these fees at any time. The Distributor will pay such fees from its own funds, other than amounts received from the Fund, including past profits or any other source available to it. Sponsors of such Retirement Plans or the participants therein should consult their Service Agent for more information regarding any such fee payable to the Service Agent.

The Manager or the Distributor may provide additional cash payments out of its own resources to financial intermediaries that sell shares of the Fund or provide other services. Such payments are separate from any 12b-1 fees and/or shareholder services fees and other expenses paid by the Fund to those intermediaries. Because those payments are not made by you or the Fund, the Fund's total expense ratio will not be affected by any such payments. These additional payments may be made to Service Agents, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid from the Manager's or the Distributor's own resources to Service Agents for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. These payments or compensation sometimes are referred to as "revenue sharing." From time to time, the Manager or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets, or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments may create an incentive for a Service Agent to recommend or sell shares of the Fund to you. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Funds.

Transfer and Dividend Disbursing Agents and Custodian. Dreyfus Transfer, Inc. (the "Transfer Agent"), a wholly-owned subsidiary of the Manager, 200 Park Avenue, New York, New York 10166, is the Company's transfer and dividend disbursing agent. Under the transfer agency agreement with the Company, the Transfer Agent arranges for the maintenance of the relevant shareholder account records for the Funds, the handling of certain communications between shareholders and the Funds and the payment of dividends and distributions payable by the Funds. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Funds during the month, and is reimbursed for certain out-of-pocket expenses.

Mellon Bank, N.A. (the "Custodian"), an affiliate of the Manager, One Mellon Bank Center, Pittsburgh, Pennsylvania 15258, acts as custodian for the investments of each Fund. The Custodian has no part in determining the investment policies of the Funds or which securities are to be purchased or sold by the Funds. Under a custody agreement with the Company, the

Custodian holds each Fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of each respective Fund's assets held in custody and receives certain securities transaction charges.

HOW TO BUY SHARES

General. Class A shares, Class C shares and Class T shares of the Funds may be purchased only by clients of certain Service Agents, including the Distributor. You will be charged a fee if an investment check is returned unpayable. Subsequent purchases may be sent directly to the Transfer Agent or your Service Agent. Share certificates are issued only upon your written request. No certificates are issued for fractional shares. The Company reserves the right to reject any purchase order.

The Company reserves the right to reject any purchase order. The Company will not establish an account for a "foreign financial institution," as that term is defined in Department of the Treasury rules implementing section 312 of the USA PATRIOT Act of 2001, Foreign financial institutions include: foreign banks (including foreign branches of U.S. depository institutions); foreign offices of U.S. securities broker-dealers, futures commission merchants, and mutual funds; non-U.S. entities that, if they were located in the United States, would be securities broker-dealers, futures commission merchants or mutual funds; and non-U.S. entities engaged in the business of a currency dealer or exchanger or a money transmitter.

As of June 1, 2006 (the "Effective Date"), Class B shares of each Fund are offered only in connection with dividend reinvestment and exchanges of Class B shares of certain other funds advised by Dreyfus or by Founders Asset Management LLC ("Founders"), an indirect subsidiary of Dreyfus, or shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. held in an Exchange Account (as defined under "Shareholder Services--Fund Exchanges") as a result of a previous exchange of Class B shares. No new or subsequent investments, including thorough automatic investment plans, are allowed in Class B shares of any Fund, except through dividend reinvestment or permitted exchanges. If you hold Class B shares and make a subsequent investment in Fund shares, unless you specify the Class of shares you wish to purchase, such subsequent investment will be made in Class A shares and will be subject to any applicable sales load. For Class B shares outstanding on the Effective Date and Class B shares acquired upon reinvestment of dividends, all Class B share attributes, including associated CDSC schedules, conversion to Class A features and Distribution Plan and Shareholder Services Plan fees, will continue in effect.

Class J shares of a Fund are offered only to shareholders who received Class J shares of the Fund in exchange for shares of the Fund's Predecessor Fund as a result of the reorganization of such Predecessor Fund. Class J shareholders of a Fund may purchase additional Class J shares of the Fund without a sales charge through their Service Agents or the Distributor.

Class R shares are offered only to (i) bank trust departments and other financial service providers (including Mellon Bank, N.A. and its affiliates) acting on behalf of their customers having a qualified trust or investment account or relationship at such institution, or to customers who have received and hold Class R shares of a Fund distributed to them by virtue of such an

account or relationship, and (ii) institutional investors acting for themselves or in a fiduciary, advisory, agency, custodial or similar capacity for Retirement Plans and SEP-IRAs. Class R shares may be purchased for a Retirement Plan or SEP-IRA only by a custodian, trustee, investment manager or other entity authorized to act on behalf of such Retirement Plan or SEP-IRA. Institutions effecting transactions in Class R shares for the accounts of their clients may charge their clients direct fees in connection with such transactions.

Class Z shares are offered only to shareholders who received Class Z shares of Dreyfus Premier Balanced Opportunity Fund in exchange for their shares of Dreyfus Balanced Fund, Inc. as a result of the reorganization of such fund and who continue to maintain accounts with Dreyfus Premier Balanced Opportunity Fund at the time of purchase. In addition, certain broker-dealers and other financial institutions maintaining accounts with Dreyfus Balanced Fund, Inc. at the time of the reorganization of such fund may open new accounts in Class Z shares of Dreyfus Premier Balanced Opportunity Fund on behalf of qualified retirement plans and "wrap accounts" or similar programs. Class Z shares generally are not available for new accounts.

When purchasing shares of a Fund, you must specify which Class is being purchased. Your Service Agent can help you choose the share class that is appropriate for your investment. The decision as to which Class of shares is most beneficial to you depends on a number of factors, including the amount and the intended length of your investment in the Fund. Please refer to the relevant Fund's prospectus for a further discussion of those factors.

In many cases, neither the Distributor nor the Transfer Agent will have the information necessary to determine whether a quantity discount or reduced sales charge is applicable to a purchase. You or your Service Agent must notify the Distributor whenever a quantity discount or reduced sales charge is applicable to a purchase and must provide the Distributor with sufficient information at the time of purchase to verify that each purchase qualifies for the privilege or discount.

Service Agents may receive different levels of compensation for selling different Classes of shares. Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the relevant Fund's Prospectus and this SAI, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. As discussed under "Management Arrangements—Distributor," Service Agents may receive revenue sharing payments from the Manager or the Distributor. The receipt of such payments could create an incentive for a Service Agent to recommend or sell shares of a Fund instead of other mutual funds where such payments are not received. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Funds.

For Class A, C, R and T shares of each Fund, the minimum initial investment is \$1,000. Subsequent investments in a Fund must be at least \$100. However, the minimum initial investment is \$750 for Dreyfus-sponsored Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs and rollover IRAs) and 403(b)(7) Plans with only one participant and \$500 for Dreyfus-sponsored Education Savings Accounts, with no minimum for subsequent purchases. The initial investment must be accompanied by the Account Application. For full-time or part-time employees of the Manager or any of its affiliates or

subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. Fund shares are offered without regard to the minimum initial investment requirements to Board members of a fund advised by the Manager, including members of the Company's Board, who elect to have all or a portion of their compensation for serving in that capacity automatically invested in a Fund. The Company reserves the right to offer Fund shares without regard to minimum purchase requirements to employees participating in certain Retirement Plans or other programs where contributions or account information can be transmitted in a manner and form acceptable to the Company. Fund shares are offered without regard to the minimum subsequent investment requirements to shareholders purchasing Fund shares through the Dreyfus managed assets program or through other wrap account programs. The Company reserves the right to vary further the initial and subsequent investment minimum requirements at any time.

The minimum initial investment through an exchange of Class B shares of a Fund is \$1,000. Subsequent exchanges for Class B shares of a Fund must be at least \$500.

A Fund may, in its discretion, accept securities in payment for Fund shares. Securities may be accepted in payment for shares only if they are, in the judgment of the Manager, appropriate investments for the Fund. These securities are valued by the same method used to value the Fund's existing portfolio holdings. The contribution of securities to the Fund may be a taxable transaction to the shareholder.

The Code imposes various limitations on the amount that may be contributed to certain Retirement Plans or government-sponsored programs. These limitations apply with respect to participants at the plan level and, therefore, do not directly affect the amount that may be invested in a Fund by a Retirement Plan or government-sponsored programs. Participants and plan sponsors should consult their tax advisers for details.

Class A, C, R, T and Z shares also may be purchased through Dreyfus-Automatic Asset Builder[®], Dreyfus Payroll Savings Plan and Dreyfus Government Direct Deposit Privilege as described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

Fund are sold on a continuous basis. Net asset value per share of each Class is determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time), on each day the New York Stock Exchange is open for regular business. For purposes of determining net asset value, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share of each Class is computed by dividing the value of the Fund's net assets represented by such Class (i.e., the value of its assets less liabilities) by the total number of shares of such Class outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

If an order is received in proper form by the Transfer Agent or other entity authorized to receive orders on behalf of the Fund by the close of trading on the floor of the New York Stock

Exchange (usually 4:00 p.m., Eastern time) on a regular business day, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange on the next regular business day, except where shares are purchased through a dealer as provided below.

Orders for the purchase of Fund shares received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee by the close of such business day (usually 5:15 p.m., Eastern time) will be based on the public offering price per share determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the orders will be based on the next determined public offering price. It is the dealer's responsibility to transmit orders so that they will be received by the Distributor or its designee before the close of its business day. For certain institutions that have entered into agreements with the Distributor, payment for the purchase of Fund shares may be transmitted, and must be received by the Transfer Agent, within three business days after the order is placed. If such payment is not received within three business days after the order is placed, the order may be canceled and the institution could be held liable for resulting fees and/or losses.

Class A Shares. The public offering price for Class A shares is the net asset value per share of that Class plus a sales load as shown below:

| <u>Amount of Transaction</u> | <u>Total Sales Load*—Class A Shares</u> | | <u>Dealers' reallowance as a % of offering price</u> |
|------------------------------------|---|--|--|
| | <u>As a % of offering price per share</u> | <u>As a % of net asset value per share</u> | |
| Less than \$50,000 | 5.75 | 6.10 | 5.00 |
| \$50,000 to less than \$100,000 | 4.50 | 4.70 | 3.75 |
| \$100,000 to less than \$250,000 | 3.50 | 3.62 | 2.75 |
| \$250,000 to less than \$500,000 | 2.50 | 2.56 | 2.25 |
| \$500,000 to less than \$1,000,000 | 2.00 | 2.04 | 1.75 |
| \$1,000,000 or more | -0- | -0- | -0- |

* Due to rounding, the actual sales load you pay may be more or less than that calculated using these percentages.

Class A shares purchased without an initial sales charge as part of an investment of \$1,000,000 or more will be assessed at the time of redemption a 1% CDSC if redeemed within one year of purchase. The Distributor may pay Service Agents an up-front commission of up to 1% of the net asset value of Class A shares purchased by their clients as part of a \$1,000,000 or

more investment in Class A shares that are subject to a CDSC. See "Management Arrangements--Distributor."

The scale of sales loads applies to purchases of Class shares made by any "purchaser," which term includes an individual and/or spouse purchasing securities for his, her or their own account or for the account of any minor children, or a trustee or other fiduciary purchasing securities for a single trust estate or a single fiduciary account (including a pension, profit-sharing or other employee benefit trust created pursuant to a plan qualified under Section 401 of the Code) although more than one beneficiary is involved; or a group of accounts established by or on behalf of the employees of an employer or affiliated employers pursuant to an employee benefit plan or other program (including accounts established pursuant to Sections 403(b), 408(k), and 457 of the Code); or an organized group that has been in existence for more than six months, provided that it is not organized for the purpose of buying redeemable securities of a registered investment company and provided that the purchases are made through a central administration or a single dealer, or by other means that result in economy of sales effort or expense.

The dealer reallowance provided with respect to Class A shares may be changed from time to time but will remain the same for all dealers.

Set forth below is an example of the method of computing the offering price of Class A shares of each Fund. The example assumes a purchase of Class A shares of each Fund aggregating less than \$50,000, subject to the schedule of sales charges set forth above, at a price based on the Fund's net asset value as of November 30, 2006:

| | Dreyfus Premier Balanced Opportunity Fund— Class A | Dreyfus Premier Blue Chip Fund— Class A | Dreyfus Premier Select Fund— Class A |
|---|--|--|--|
| Net Asset Value Per Share..... | \$20.38 | \$13.17 | \$12.61 |
| Per Share Sales Charge | | | |
| Class A - 5.75% of offering price | | | |
| (6.10% of net asset value per share)..... | 1.24 | 0.80 | 0.77 |
| Per Share Offering Price to the Public..... | <u>\$21.62</u> | <u>\$13.97</u> | <u>\$13.38</u> |

Class B Shares. Class B shares of each Fund are offered only in connection with dividend reinvestment and permitted exchanges of Class B shares of certain other funds. The public offering price for such Class B shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of dividend reinvestment or exchange. A CDSC is imposed on certain redemptions of Class B shares as described in the relevant Fund's Prospectus and in this SAI under "How to Redeem Shares—Contingent Deferred Sales Charge—Class B Shares."

Approximately six years after the date of purchase, Class B shares automatically will convert to Class A shares, based on the relative net asset values for shares of each such Class. Class B shares of a Fund that have been acquired through the reinvestment of the Fund's

dividends and distributions will be converted on a pro rata basis together with other Class B shares, in the proportion that a shareholder's Class B shares converting to Class A shares bears to the total Class B shares held by a shareholder not acquired through the reinvestment of the Fund's dividends and distributions.

Class B shares of a Fund acquired by shareholders in exchange for Class B shares originally issued by the Acquired Fund before December 1, 2003 are subject to different CDSC and conversion to Class A schedules. See "How to Redeem Shares—Contingent Deferred Sales Charge—Class B Shares."

Class C Shares. The public offering price for Class C shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of purchase. A CDSC is imposed, however, on redemptions of Class C shares made within the first year of purchase. See "How to Redeem Shares—Contingent Deferred Sales Charge—Class C Shares."

Class J Shares. The public offering price for Class J shares is the net asset value per share of that Class.

Class R Shares. The public offering price for Class R shares is the net asset value per share of that Class.

Class T Shares. The public offering price for Class T shares of the Fund is the net asset value per share of that Class plus a sales load as shown below:

Total Sales Load*—Class T Shares

| <u>Amount of Transaction</u> | <u>As a % of offering price per share</u> | <u>As a % of net asset value per share</u> | <u>Dealers' reallowance as a % of offering price</u> |
|-------------------------------------|--|---|---|
| Less than \$50,000 | 4.50 | 4.70 | 4.00 |
| \$50,000 to less than \$100,000 | 4.00 | 4.17 | 3.50 |
| \$100,000 to less than \$250,000 | 3.00 | 3.10 | 2.50 |
| \$250,000 to less than \$500,000 | 2.00 | 2.04 | 1.75 |
| \$500,000 to less than \$1,000,000 | 1.50 | 1.52 | 1.25 |
| \$1,000,000 or more | -0- | -0- | -0- |

* Due to rounding, the actual sales load you pay may be more or less than that calculated using these percentages.

Class T shares purchased without an initial sales charge as part of an investment of at least \$1,000,000 will be assessed at the time of redemption a 1% CDSC if redeemed within one year of purchase. The Distributor may pay Service Agents an amount up to 1% of the net asset value of Class T shares purchased by their clients that are subject to a CDSC. See "Management Arrangements—Distributor." Because the expenses associated with Class A shares will be lower

than those associated with Class T shares, purchasers investing \$1,000,000 or more in a Fund will find it beneficial to purchase Class A shares rather than Class T shares.

The scale of sales loads applies to purchases of Class T shares made by any "purchaser," as defined above for Class A shares.

Set forth below is an example of the method of computing the offering price of each Fund's Class T shares. The example assumes a purchase of Class T shares of each Fund aggregating less than \$50,000, subject to the schedule of sales charges set forth above, at a price based on the Fund's net asset value as of November 30, 2006:

| | Dreyfus Premier Balanced Opportunity Fund— <u>Class T</u> | Dreyfus Premier Blue Chip Fund— <u>Class T</u> | Dreyfus Premier Select Fund— <u>Class T</u> |
|--|--|--|---|
| Net Asset Value Per Share..... | \$20.32 | \$13.11 | \$12.56 |
| Per Share Sales Charge | | | |
| Class T - 4.50% of offering price | | | |
| (4.70% of net asset value per | | | |
| share) | 0.96 | 0.62 | 0.59 |
| Per Share Offering Price to the Public | <u>\$21.28</u> | <u>\$13.73</u> | <u>\$13.15</u> |

Class Z Shares. The public offering price for Class Z shares is the net asset value per share of that Class.

Dealers' Reallowance—Class A and Class T Shares. The dealer reallowance provided with respect to Class A and Class T shares may be changed from time to time but will remain the same for all dealers.

Class A or Class T Shares Offered at Net Asset Value. Full-time employees of NASD member firms and full-time employees of other financial institutions that have entered into an agreement with the Distributor pertaining to the sale of Fund shares (or which otherwise have a brokerage related or clearing arrangement with an NASD member firm or financial institution with respect to the sale of such shares) may purchase Class A shares for themselves directly or pursuant to an employee benefit plan or other program (if Fund shares are offered to such plans or programs), or for their spouses or minor children, at net asset value without a sales load, provided they have furnished the Distributor such information as it may request from time to time in order to verify eligibility for this privilege. This privilege also applies to full-time employees of financial institutions affiliated with NASD member firms whose full-time employees are eligible to purchase Class A shares at net asset value. In addition, Class A shares are offered at net asset value to full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager or its affiliates, including members of the Company's Board, or the spouse or minor child of any of the foregoing.

Class A shares may be purchased at net asset value through an account in the name of or for the benefit of a client of the Sub-Adviser or its affiliates resulting from the investment adviser-client relationship between the Sub-Adviser or its affiliates and such client.

Class A shares may be purchased at net asset value without a sales load through certain broker-dealers and other financial institutions that have entered into an agreement with the Distributor, which includes a requirement that such shares be sold for the benefit of clients participating in a "wrap account" or a similar program under which such clients pay a fee to such broker-dealer or other financial institution.

Class A shares also may be purchased at net asset value without a sales load, subject to appropriate documentation, by (i) qualified separate accounts maintained by an insurance company pursuant to the laws of any State or territory of the United States, (ii) a State, county or city or instrumentality thereof, (iii) a charitable organization (as defined in Section 501(c)(3) of the Code) investing \$50,000 or more in Fund shares, and (iv) a charitable remainder trust (as defined in Section 501(c)(3) of the Code).

Class A shares may be purchased at net asset value without a sales load by qualified investors who (i) purchase Class A shares directly through the Distributor, and (ii) have, or whose spouse or minor children have, beneficially owned shares and continuously maintained an open account directly through the Distributor in a Dreyfus-managed fund, including the Fund, or a Founders-managed fund since on or before February 28, 2006.

Class A shares may be purchased at net asset value without a sales load with the cash proceeds from an investor's exercise of employment-related stock options, whether invested in the Fund directly or indirectly through an exchange from a Dreyfus-managed money market fund, provided that the proceeds are processed through an entity that has entered into an agreement with the distributor specifically relating to process stock options. Upon establishing the account in the Fund or Dreyfus-managed money market fund, the investor and the investor's spouse or minor children become eligible to purchase Class A shares of the Fund at net asset value, whether or not using the proceeds of the employment-related stock options.

Class A shares may be purchased at net asset value without a sales load by members of qualified affinity groups who purchase Class A shares directly through the Distributor provided that the qualified affinity group has entered into an affinity agreement with the Distributor.

Class A shares also may be purchased at net asset value by investors with an investment adviser-client relationship with the Sub-Adviser (it is the responsibility of the Sub-Adviser to notify the relevant Fund at the time of initial and any subsequent purchase of Fund shares including exchanges).

Class A shares of the Dreyfus Premier Balanced Opportunity Fund may be purchased at net asset value without a sales load by accountholders under the "ACS/Mellon HSA Solution", an integrated health savings account solution. Health Savings Accounts are flexible accounts that provide employers and/or employees covered under qualified high deductible health plans the ability to make contributions to special savings accounts generally without federal or state tax consequences.

Class A and Class T shares of the Funds are offered at net asset value without a sales load to employees participating in Retirement Plans. Class A and Class T shares also may be purchased (including by exchange) at net asset value without a sales load for Dreyfus-sponsored IRA "Rollover Accounts" with the distribution proceeds from a Retirement Plan or a Dreyfus-sponsored 403(b)(7) plan, provided that, in case of a Retirement Plan, the rollover is processed through an entity that has entered into an agreement with the Distributor specifically relating to processing rollovers. Upon establishing the Dreyfus-sponsored IRA rollover account in the Fund, the shareholder becomes eligible to make subsequent purchase of Class A or Class T shares of the Fund at NAV in such account.

Right of Accumulation--Class A and Class T Shares. Reduced sales loads apply to any purchase of Class A and Class T shares by you and any related "purchaser" as defined above, where the aggregate investment, including such purchase, is \$50,000 or more. If, for example, you previously purchased and still hold shares of the Fund or shares of certain other funds advised by the Manager or Founders that are subject to a front-end sales load or a CDSC or shares acquired by a previous exchange of such shares (hereinafter referred to as "Eligible Funds"), or combination thereof, with an aggregate current market value of \$40,000 and subsequently purchase Class A or Class T shares of such Fund having a current value of \$20,000, the sales load applicable to the subsequent purchase would be reduced to 4.5% of the offering price in the case of Class A or 4.0% of the offering price in the case of Class T shares. All present holdings of Eligible Funds may be combined to determine the current offering price of the aggregate investment in ascertaining the sales load applicable to each subsequent purchase.

To qualify for reduced sales loads, at the time of purchase you or your Service Agent must notify the Distributor if orders are made by wire, or the Transfer Agent if orders are made by mail. The reduced sales load is subject to confirmation of your holdings through a check of appropriate records.

Dreyfus TeleTransfer Privilege. You may purchase Fund shares (excluding Class B) by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the public offering price determined on that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the public offering price determined on the next bank business day following such purchase order. To qualify to use the Dreyfus TeleTransfer Privilege, the initial payment for purchase of shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder

Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares—Dreyfus TeleTransfer Privilege."

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

DISTRIBUTION PLAN AND SHAREHOLDER SERVICES PLANS

Class B, Class C and Class T shares are subject to a Distribution Plan, and Class A, Class B, Class C, Class T and Class Z shares are subject to a Shareholder Services Plan. Class J and Class R shares are not subject to any Distribution Plan or Shareholder Services Plan.

Distribution Plan. Rule 12b-1 (the "Rule") adopted by the Securities and Exchange Commission under the 1940 Act provides, among other things, that an investment company may bear expenses of distributing its shares only pursuant to a plan adopted in accordance with the Rule. The Company's Board has adopted such a plan (the "Distribution Plan") with respect to each Fund's Class B, Class C and Class T shares pursuant to which the Fund pays the Distributor for distributing such shares at an annual rate of 0.75% of the value of the average daily net assets of Class B and Class C shares and 0.25% of the value of the average daily net assets of Class T shares. The Distributor may pay one or more Service Agents in respect of advertising, marketing and other distribution services, and determines the amounts, if any, to be paid to Service Agents and the basis on which such payments are made. The Company's Board believes that there is a reasonable likelihood that the Distribution Plan will benefit each Fund and the holders of its Class B, Class C and Class T shares.

A quarterly report of the amounts expended under the Distribution Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, the Distribution Plan provides that it may not be amended to increase materially the costs that holders of the Fund's Class B, Class C or Class T shares may bear pursuant to the Distribution Plan without the approval of the holders of such shares and that other material amendments of the Distribution Plan must be approved by the Company's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Company and have no direct or indirect financial interest in the operation of the Distribution Plan or in any agreements entered into in connection with the Distribution Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The Distribution Plan is subject to annual approval by such vote cast in person at a meeting called for the purpose of voting on the Distribution Plan. As to the relevant Class of shares, the Distribution Plan may be terminated at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Distribution Plan or in any agreements entered into in connection with the Distribution Plan or by vote of the holders of a majority of such Class of shares.

For the fiscal year ended November 30, 2006, the amount paid by each indicated Fund to the Distributor pursuant to the Distribution Plan was as follows:

| <u>Name of Fund/Class</u> | <u>Amount Paid To the Distributor</u> |
|---|---|
| Dreyfus Premier Balanced Opportunity Fund | |
| Class B | \$1,326,440 |
| Class C | \$1,030,443 |
| Class T | \$6,590 |
| Class Z | \$83,326 |
| Dreyfus Premier Blue Chip Fund | |
| Class B | \$327 |
| Class C | \$200 |
| Class T | \$2 |
| Dreyfus Premier Select Fund | |
| Class B | \$148 |
| Class C | \$7 |
| Class T | \$12 |

Shareholder Services Plans. The Company has adopted separate Shareholder Services Plans, pursuant to which each Fund pays the Distributor for the provision of certain services to the holders of a Fund's Class A, Class B, Class C, Class T shares at an annual rate of 0.25% of the value of the average daily net assets of such shares, and pursuant to which Dreyfus Premier Balanced Opportunity Fund reimburses the Distributor for certain allocated expenses of providing personal services and/or maintaining shareholder accounts with respect to Class Z shares an amount not to exceed an annual rate of 0.25% of the average daily net assets of Class Z. The services provided may include personal services relating to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of such shareholder accounts. Under the Shareholder Services Plan, with respect to Class A, Class B, Class C and Class T, the Distributor may make payments to certain Service Agents in respect of these services.

A quarterly report of the amounts expended under each Shareholder Services Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, each Shareholder Services Plan provides that material amendments must be approved by the Company's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Company and have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. Each Shareholder Services Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Shareholder Services Plan. As to the relevant Class of shares, each Shareholder Services

Plan is terminable at any time by vote of a majority of the Board members who are not "interested persons" and who have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan.

For the fiscal year ended November 30, 2006, the amount paid by each indicated Fund to the Distributor pursuant to the Shareholder Services Plan was as follows:

| <u>Name of Fund/Class</u> | <u>Amount Paid To the Distributor</u> |
|---|---|
| Dreyfus Premier Balanced Opportunity Fund | |
| Class A | \$606,325 |
| Class B | \$442,147 |
| Class C | \$343,481 |
| Class T | \$6,590 |
| Dreyfus Premier Blue Chip Fund | |
| Class A | \$2,052 |
| Class B | \$109 |
| Class C | \$67 |
| Class T | \$2 |
| Dreyfus Premier Select Fund | |
| Class A | \$2,935 |
| Class B | \$49 |
| Class C | \$3 |
| Class T | \$12 |

HOW TO REDEEM SHARES

General. The Funds ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the rules of the Securities and Exchange Commission. However, if you have purchased Fund shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder® and subsequently submit a written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Fund will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder order against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares may not be redeemed until the Transfer Agent has received your Account Application.

If you hold shares of more than one Class of a Fund, any request for redemption must specify the Class of shares being redeemed. If you fail to specify the Class of shares redeemed or if you own fewer shares of the Class than specified to be redeemed, the redemption request may be delayed until the Transfer Agent receives further instructions from you or your Service Agent.

Contingent Deferred Sales Charge--Class B Shares. A CDSC payable to the Distributor is imposed on any redemption of Class B shares which reduces the current net asset value of your Class B shares to an amount which is lower than the dollar amount of all payments by you for the purchase of Class B shares of the Fund held by you at the time of redemption. No CDSC will be imposed to the extent that the net asset value of the Class B shares of the Fund redeemed does not exceed (i) the current net asset value of Class B of the Fund shares acquired through reinvestment of Fund dividends or capital gain distributions, plus (ii) increases in the net asset value of your Class B shares above the dollar amount of all your payments for the purchase of Class B shares held by you at the time of redemption.

If the aggregate value of Class B shares redeemed has declined below their original cost as a result of the Fund's performance, a CDSC may be applied to the then-current net asset value rather than the purchase price.

In circumstances where the CDSC is imposed, the amount of the charge will depend on the number of years for the time you purchased the Class B shares until the time of redemption of such shares. Solely for purposes of determining the number of years from the time of any payment for the purchase of Class B shares, all payments during a month will be aggregated and deemed to have been made on the first day of the month.

The following table sets forth the rates of the CDSC and the conversion to Class A schedule for Class B shares, except for certain Class B shares issued in exchange for shares originally issued by the Acquired Fund described below:

| <u>Year Since Purchase Payment Was Made</u> | <u>CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less)</u> |
|---|--|
| First | 4.00 |
| Second..... | 4.00 |
| Third..... | 3.00 |
| Fourth..... | 3.00 |
| Fifth..... | 2.00 |
| Sixth..... | 1.00* |

* These Class B shares will automatically convert into Class A shares approximately six years after the date of purchase.

The following table sets forth the rates of the CDSC payable to the Acquired Fund's former distributor and the conversion to Class A schedule for Class B shares of a Fund issued in exchange for Class B shares originally issued by the Acquired Fund before December 1, 2003:

| Year Since Purchase Payment Was Made | CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less) |
|--|--|
| First | 5.00 |
| Second | 4.00 |
| Third | 3.00 |
| Fourth | 3.00 |
| Fifth | 2.00 |
| Sixth | 1.00 |
| Seventh | 0.00 |
| Eighth | 0.00** |

** These Class B shares will automatically convert into Class A shares at the end of the calendar quarter that is eight years after the initial purchase of the Class B shares of the Acquired Fund (applies to such Class B shares originally issued by the Acquired Fund before December 1, 2003).

In determining whether a CDSC is applicable to a redemption, the calculation will be made in a manner that results in the lowest possible rate. It will be assumed that the redemption is made first of amounts representing Class B shares of the Fund acquired pursuant to the reinvestment of Fund dividends and distributions; then, of amounts representing the increase in net asset value of Class B shares above the total amount of payments for the purchase of Class B shares made during the preceding six years (or eight years for certain shares issued in exchange for shares originally issued by the Acquired Fund); and finally, of amounts representing the cost of shares held for the longest period.

For example, assume an investor purchased 100 shares of a Fund at \$10 per share for a cost of \$1,000. Subsequently, the shareholder acquired five additional Fund shares through the reinvestment of Fund dividends. During the second year after the purchase the investor decided to redeem \$500 of the investment. Assuming at the time of the redemption the net asset value had appreciated to \$12 per share, the value of the investor's shares would be \$1,260 (105 shares at \$12 per share). The CDSC would not be applied to the value of the reinvested dividend shares and the amount that represents appreciation (\$260). Therefore, \$240 of the \$500 redemption proceeds (\$500 minus \$260) would be charged at a rate of 4% (the applicable rate in the second year after purchase) for a total CDSC of \$9.60.

Contingent Deferred Sales Charge--Class C Shares. A CDSC of 1% payable to the Distributor is imposed on any redemption of Class C shares within one year of the date of purchase. The basis for calculating the payment of any such CDSC will be the method used in calculating the CDSC for Class B shares. See "Contingent Deferred Sales Charge--Class B Shares" above.

Waiver of CDSC. The CDSC may be waived in connection with (a) redemptions made within one year after the death or disability, as defined in Section 72(m)(7) of the Code, of the shareholder, (b) redemptions by employees participating in Retirement Plans, (c) redemptions as a result of a combination of any investment company with a Fund by merger, acquisition of

assets or otherwise, (d) a distribution following retirement under a tax-deferred retirement plan or upon attaining age 70½ in the case of an IRA or Keogh plan or custodial account pursuant to Section 403(b) of the Code, and (e) redemptions pursuant to the Automatic Withdrawal Plan, as described below. If the Company's Board determines to discontinue the waiver of the CDSC, the disclosure herein will be revised appropriately. Any Fund shares subject to a CDSC which were purchased prior to the termination of such waiver will have the CDSC waived, as provided in the relevant Fund's Prospectus or this SAI at the time of the purchase of such shares.

To qualify for a waiver of the CDSC, at the time of redemption you or your Service Agent must notify the Distributor. Any such qualification is subject to confirmation of your entitlement.

Reinvestment Privilege. Upon written request, you may reinvest up to the number of Class A or Class T shares you have redeemed, within 45 days of redemption, at the then-prevailing net asset value without a sales load, or reinstate your account for the purpose of exercising Fund Exchanges. Upon reinstatement, if such shares were subject to a CDSC, your account will be credited with an amount equal to the CDSC previously paid upon redemption of the shares reinvested. The Reinvestment Privilege may be exercised only once.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you or a representative of your Service Agent and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Company will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt by the Transfer Agent of the redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Share Certificates; Signatures."

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. See "How to Buy Shares—Dreyfus TeleTransfer Privilege."

Redemption Through a Selected Dealer. If you are a customer of a Selected Dealer, you may make redemption requests to your Selected Dealer. If the Selected Dealer transmits the

redemption request so that it is received by the Transfer Agent prior to the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time), the redemption request will be effective on that day. If a redemption request is received by the Transfer Agent after the close of trading on the floor of the New York Stock Exchange, the redemption request will be effective on the next business day. It is the responsibility of the Selected Dealer to transmit a request so that it is received in a timely manner. The proceeds of the redemption are credited to your account with the Selected Dealer. See "How to Buy Shares" for a discussion of additional conditions or fees that may be imposed upon redemption.

In addition, the Distributor or its designee will accept orders from Selected Dealers with which the Distributor has sales agreements for the repurchase of shares held by shareholders. Repurchase orders received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee prior to the close of its business day (usually 5:15 p.m., Eastern time), are effected at the price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the shares will be redeemed at the next determined net asset value. It is the responsibility of the Selected Dealer to transmit orders on a timely basis. The Selected Dealer may charge the shareholder a fee for executing the order. This repurchase arrangement is discretionary and may be withdrawn at any time.

Share Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. A fee may be imposed to replace lost or stolen certificates, or certificates that were never received. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program ("STAMP") and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and "Signature-Guaranteed" must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians, and may accept other suitable verification arrangements from foreign investors, such as consular verification. For more information with respect to signature-guarantees, please call one of the telephone numbers listed on the cover.

Redemption Commitment. The Company has committed itself to pay in cash all redemption requests by any shareholder of record of a Fund, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of such Fund's net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the Securities and Exchange Commission. In the case of requests for redemption in excess of such amount, the Board reserves the right to make payments in whole or in part in securities or other assets in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Fund's portfolio is valued. If the recipient sells such securities, brokerage charges would be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when the Securities and Exchange Commission determines that trading in the markets the relevant Fund ordinarily utilizes is restricted, or when an emergency exists as determined by the Securities and Exchange Commission so that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods as the Securities and Exchange Commission by order may permit to protect the Fund's shareholders.

SHAREHOLDER SERVICES

Fund Exchanges. You may purchase, in exchange for shares of a Fund, shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of certain other funds in the Dreyfus Family of Funds, and, with respect to Class T shares of a Fund, Class A shares of certain Dreyfus Premier fixed-income funds, to the extent such shares are offered for sale in your state of residence. Shares of the same Class of such funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.
- E. Shares of funds subject to a CDSC that are exchanged for shares of another fund will be subject to the higher applicable CDSC of the two funds, and, for purposes of calculating CDSC rates and conversion periods, if any, will be deemed to have been held since the date the shares being exchanged were initially purchased.

To accomplish an exchange under item D above, your Service Agent acting on your behalf, must notify the Transfer Agent of your prior ownership of Fund shares and your account number.

As of the Effective Date, you also may exchange your Class shares for Class B shares of General Money Market Fund, Inc. (the "General Fund"), a money market fund advised by the Manager. The shares so purchased will be held in a special account created solely for this purpose ("Exchange Account"). Exchanges of shares from an Exchange Account only can be made into Class B shares of funds in the Dreyfus Premier Family of Funds or certain funds advised by Founders. No CDSC is charged when an investor exchanges into an Exchange Account; however, the applicable CDSC will be imposed when shares are redeemed from an Exchange Account or other applicable fund account. Upon redemption, the applicable CDSC will be calculated taking into account the time such shares were held in the General Fund's Exchange Account. In addition, the time Class B shares are held in the General Fund's Exchange Account will be taken into account for purposes of calculating when such shares convert to Class A shares. If your Class B shares are held in the General Fund's Exchange Account at the time such shares are scheduled to convert to Class A shares, you will receive Class A shares of the General Fund. Prior to the Effective Date, shareholders were permitted to exchange their Class B shares for shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. ("Worldwide Dollar Fund"), and such shares were held in an Exchange Account. Shareholders who held shares of Worldwide Dollar Fund in an Exchange Account on the Effective Date may continue to hold those shares and upon redemption from the Exchange Account or other applicable fund account, the applicable CDSC and conversion to Class A schedule will be calculated, except for Fund shares issued in exchange for shares originally issued by the Acquired Fund, without regard to the time such shares were held in an Worldwide Dollar Fund's Exchange Account; for Fund shares issued in exchange for shares originally issued by the Acquired Fund, the applicable CDSC and conversion to Class A schedule will be calculated taking into account the time such shares were held in the Worldwide Dollar Fund's Exchange Account. Exchanges of shares from an Exchange Account in Worldwide Dollar Fund only can be made into Class B shares of funds in the Dreyfus Premier Family of Funds, certain funds advised by Founders and the General Fund. See "How to Redeem Shares." Redemption proceeds for Exchange Account shares are paid by Federal wire or check only. Exchange Account shares also are eligible for the Dreyfus Auto-Exchange Privilege and the Automatic Withdrawal Plan, as described below.

To request an exchange, you or your Service Agent acting on your behalf, must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone or online is given to all Fund shareholders automatically, unless you check the applicable "No" box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic and online instructions (including over the Dreyfus Express® voice response telephone system) from any person representing himself or herself to be you or a representative of your Service Agent and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form are not eligible for telephone or online exchange. No fees currently are charged shareholders directly in connection with exchanges, although the Company reserves the right, upon not less than 60 days' written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the Securities and Exchange Commission.

Exchanges of Class R shares held by a Retirement Plan may be made only between the investor's Retirement Plan account in one fund and such investor's Retirement Plan account in another fund.

To establish a personal retirement plan by exchange, shares of the fund being exchanged must have a value of at least the minimum initial investment being required for shares of the same Class of the fund into which the exchange is being made.

During times of drastic economic or market conditions, the Company may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate components -- redemption orders with a simultaneous request to purchase the other fund's shares. In such a case, the redemption request would be processed at the Fund's next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of a Fund, shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of the same Class of certain other funds in the Dreyfus Family of Funds of which you are a shareholder (including, for Class B shares, Class B shares of the General Fund held in an Exchange Account). This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under "Fund Exchanges." Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by you. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction. Shares held under IRA and other retirement plans are eligible for this Privilege. Exchanges of IRA shares may be made between IRA accounts and from regular accounts to IRA accounts, but not from IRA accounts to regular accounts. With respect to all other retirement accounts, exchanges may be made only among those accounts.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-645-6561, or visiting www.dreyfus.com. The Company reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Exchange and Auto-Exchange Privileges--Class J Shares only. Class J shares of a Fund may be exchanged only for Class J shares of another Fund. For more information, please refer to the prospectus for Class J.

Dreyfus-Automatic Asset Builder®--Classes A, C, R, T or Z shares only. Dreyfus-Automatic Asset Builder permits you to purchase Fund shares (minimum of \$25 for Class J and \$100 for all other classes and a maximum of \$150,000 per transaction) at regular intervals

selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege--Classes A, C, R, T or Z shares only.

Dreyfus Government Direct Deposit Privilege enables you to purchase Fund shares (minimum of \$100 and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the U.S. Government automatically deposited into your Fund account.

Dreyfus Payroll Savings Plan--Classes A, C, R, T or Z shares only.

Dreyfus Payroll Savings Plan permits you to purchase a Fund's shares (minimum of \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer's payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from Class A, C, R, T or Z shares of a Fund in shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of certain other funds in the Dreyfus Family of Funds of which you are a shareholder. Dividends or distributions from Class J shares of a Fund may be invested only in Class J shares of another Fund. Shares of the same Class of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund that does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that imposed a CDSC and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from a Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. Automatic Withdrawal may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which share certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

No CDSC with respect to Class B shares (including Class B shares held in an Exchange Account) or Class C shares will be imposed on withdrawals made under the Automatic Withdrawal Plan, provided that any amount withdrawn under the plan does not exceed on an annual basis 12% of the greater of (1) the account value at the time of the first withdrawal under the Automatic Withdrawal Plan, or (2) the account value at the time of the subsequent withdrawal. Withdrawals with respect to Class B or Class C shares under the Automatic Withdrawal Plan that exceed such amounts will be subject to a CDSC. Withdrawals of Class A or Class T shares subject to a CDSC under the Automatic Withdrawal Plan will be subject to any applicable CDSC. Purchases of additional Class A or Class T shares where the sales load is imposed concurrently with withdrawals of Class A or Class T shares generally are undesirable.

Certain Retirement Plans, including Dreyfus-sponsored retirement plans, may permit certain participants to establish an automatic withdrawal plan from such Retirement Plans. Participants should consult their Retirement Plan sponsor and tax adviser for details. Such a withdrawal plan is different than the Automatic Withdrawal Plan.

Letter of Intent--Class A and Class T Shares. By signing a Letter of Intent form, you become eligible for the reduced sales load on purchases of Class A and Class T shares based on the total number of shares of Eligible Funds (as defined under "Right of Accumulation" above) purchased by you and any related "purchaser" (as defined above) in a 13 month period pursuant to the terms and conditions set forth in the Letter of Intent. Shares of any Eligible Fund purchased within 90 days prior to the submission of the Letter of Intent may be used to equal or exceed the amount specified in the Letter of Intent. A minimum initial purchase of \$5,000 is required. You can obtain a Letter of Intent form by calling 1-800-554-4611.

Each purchase you make during the 13-month period (which begins on the date you submit the Letter of Intent) will be at the public offering price applicable to a single transaction of the aggregate dollar amount you select in the Letter of Intent. The Transfer Agent will hold in escrow 5% of the amount indicated in the Letter of Intent, which may be used for payment of a higher sales load if you do not purchase the full amount indicated in the Letter of Intent. When you fulfill the terms of the Letter of Intent by purchasing the specified amount the escrowed amount will be released and additional shares representing such amount credited to your account. If your purchases meet the total minimum investment amount specified in the Letter of Intent within the 13-month period, an adjustment will be made at the conclusion of the 13-month period to reflect any reduced sales load applicable to shares purchased during the 90-day period prior to submission of the Letter of Intent. If your purchases qualify for a further sales load reduction, the sales load will be adjusted to reflect your total purchase at the end of 13 months. If total purchases are less than the amount specified, the offering price of the shares you purchased

(including shares representing the escrowed amount) during the 13-month period will be adjusted to reflect the sales load applicable to the aggregate purchases you actually made (which will reduce the number of shares in your account), unless you have redeemed the shares in your account, in which case the Transfer Agent, as attorney-in-fact pursuant to the terms of the Letter of Intent, will redeem an appropriate number of Class A or Class T shares of the Fund held in escrow to realize the difference between the sales load actually paid and the sales load applicable to the aggregate purchases actually made and any remaining shares will be credited to your account. Signing a Letter of Intent does not bind you to purchase, or the Fund to sell, the full amount indicated at the sales load in effect at the time of signing, but you must complete the intended purchase to obtain the reduced sales load. At the time you purchase Class A or Class T shares, you must indicate your intention to do so under a Letter of Intent. Purchases pursuant to a Letter of Intent will be made at the then-current net asset value plus the applicable sales load in effect at the time such Letter of Intent was submitted.

Corporate Pension/Profit-Sharing and Retirement Plans. The Company makes available to corporations a variety of prototype pension and profit-sharing plans, including a 401(k) Salary Reduction Plan. In addition, the Company makes available Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs, rollover IRAs, and, for Class J, SIMPLE IRAs), Education Savings Accounts, 401(k) Salary Reduction Plans and 403(b)(7) Plans. Plan support services also are available.

If you wish to purchase Fund shares in conjunction with a Keogh Plan, a 403(b)(7) Plan or an IRA, including a SEP-IRA, you may request from the Distributor forms for adoption of such plans.

The entity acting as custodian for Keogh Plans, 403(b)(7) Plans or IRAs may charge a fee, payment of which could require the liquidation of shares. All fees charged are described in the appropriate form.

Shares may be purchased in connection with these plans only by direct remittance to the entity acting as custodian. Purchases for these plans may not be made in advance of receipt of funds.

You should read the prototype retirement plan and the appropriate form of custodial agreement for further details on eligibility, service fees and tax implications, and should consult a tax adviser.

DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. Each Fund's investments are valued on the basis of market quotations or official closing prices. Each Fund's portfolio securities, including covered call options written by the Fund, are valued at the last sale price on the securities exchange or national securities market on which such securities primarily are traded. Securities listed on the Nasdaq National Market System for which market quotations are available are valued at the official closing price or, if there is no official closing price on that day, at the last sale price. Securities not listed on an exchange or national securities market, or securities in which there were no transactions, are valued at the average of the most recent bid and asked prices, except

that open short positions are valued at the asked price. Bid price is used when no asked price is available. Substantially all of a Fund's fixed-income investments (excluding short-term investments) are valued by one or more independent pricing services (the "Service") approved by the Board. Securities valued by the Service for which quoted bid prices in the judgment of the Service are readily available and are representative of the bid side of the market are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other fixed-income investments is determined by the Service based on methods which include consideration of: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. Market quotations of foreign securities in foreign currencies are translated into U.S. dollars at the prevailing rates of exchange. Any securities or other assets for which recent market quotations are not readily available are valued at fair value as determined in good faith by the Board. Any assets or liabilities initially expressed in terms of foreign currency will be translated into U.S. dollars at the midpoint of the New York interbank market spot exchange rate as quoted on the day of such translation by the Federal Reserve Bank of New York or if no such rate is quoted on such date, at the exchange rate previously quoted by the Federal Reserve Bank of New York, or at such other quoted market exchange rate as may be determined to be appropriate by the Advisers. Forward currency contracts will be valued at the current cost of offsetting the contract. If a Fund has to obtain prices as of the close of trading on various exchanges throughout the world, the calculation of net asset value may not take place contemporaneously with the determination of prices of certain of the Fund's portfolio securities. Short-term investments may be carried at amortized cost, which approximates value. Expenses and fees, including the management fee and fees pursuant to the Distribution Plan, and each Shareholder Services Plan, if applicable, are accrued daily and taken into account for the purpose of determining the net asset value of the relevant Fund's shares. Because of the differences in operating expenses incurred by each Class of shares of a Fund, the per share net asset value of each Class of shares of a Fund will differ.

Restricted securities, as well as securities or other assets for which recent market quotations or official closing prices are not readily available or are determined by the Company not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market) but before the Company calculates its NAV), or which are not valued by the Service, are valued at fair value as determined in good faith based on procedures approved by the Company's Board. Fair value of investments may be determined by the Company's Board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate. The factors that may be considered when fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased or sold, and public trading in similar securities of the issuer or comparable issuers. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indices of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. The valuation of a security based on fair value procedures may differ from the security's most recent closing price, and from the prices

used by other mutual funds to calculate their net asset values. Foreign securities held by a Fund may trade on days that the Fund is not open for business, thus affecting the value of the Fund's assets on days when Fund investors have no access to the Fund. Restricted securities that are, or are convertible into, securities of the same class of other securities for which a public market exists usually will be valued at such market value less the same percentage discount at which the restricted securities were purchased. This discount will be revised periodically by the Board if the Board members believe that it no longer reflects the value of the restricted securities. Restricted securities not of the same class as securities for which a public market exists usually will be valued initially at cost. Any subsequent adjustment from cost will be based upon considerations deemed relevant by the Board.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Management of the Company believes that each Fund has qualified for treatment as a "regulated investment company" under the Code for its most recent fiscal year. Each Fund intends to continue to so qualify if such qualification is in the best interests of its shareholders. As a regulated investment company, each Fund will pay no Federal income tax on net investment income and net realized securities gains to the extent that such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment company, each Fund must distribute at least 90% of its net income (consisting of net investment income and net short-term capital gain) to its shareholders and meet certain asset diversification and other requirements. If a Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

If you elect to receive dividends and distributions in cash, and your dividend or distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividends or distributions and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Any dividend or distribution paid shortly after an investor's purchase may have the effect of reducing the aggregate net asset value of the shares below the cost of the investment. Such a dividend or distribution would be a return of capital in an economic sense, although taxable as stated in the relevant Fund's Prospectus. In addition, the Code provides that if a shareholder holds shares of the Fund for six months or less and has received a capital gain distribution with respect to such shares, any loss incurred on the sale of such shares will be treated as long-term capital loss to the extent of the capital gain distribution received.

In general, dividends (other than capital gain dividends) paid by the Fund to U.S. individual shareholders may be eligible for the 15% preferential maximum tax rate to the extent

that the Fund's income consists of dividends paid by U.S. corporations and certain foreign corporations on shares that have been held by the Fund for at least 61 days during the 121-day period commencing 60 days before the shares become ex-dividend. In order to be eligible for the preferential rate, the investor in the Fund must have held his or her shares in the Fund for at least 61 days during the 121-day period commencing 60 days before the Fund shares become ex-dividend. Additional restrictions on an investor's qualification for the preferential rate may apply.

In general, dividends (other than capital gain dividends) paid by the Fund to U.S. corporate shareholders may be eligible for the dividends received deduction to the extent that the Fund's income consists of dividends paid by U.S. corporations on shares that have been held by the Fund for at least 46 days during the 91-day period commencing 45 days before the shares become ex-dividend. In order to claim the dividends received deduction, the investor in the Fund must have held its shares in the Fund for at least 46 days during the 91-day period commencing 45 days before the Fund shares become ex-dividend. Additional restrictions on an investor's ability to claim the dividends received deduction may apply.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gains and losses. However, a portion of the gain or loss realized from the disposition of foreign currencies (including foreign currency denominated bank deposits) and non-U.S. dollar denominated securities (including debt instruments and certain futures or forward contracts and options) may be treated as ordinary income or loss. In addition, all or a portion of any gains realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. Finally, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by a Fund from certain financial futures or forward contracts and options transactions ("Section 1256 contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing transactions. In addition, any Section 1256 contracts remaining unexercised at the end of the Fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund characterized in the manner described above.

Offsetting positions held by a Fund involving certain financial futures or forward contracts or options transactions with respect to actively traded personal property may be considered, for tax purposes, to constitute "straddles." To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by the Fund may constitute "mixed straddles." The Fund may make one or more elections with respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If a Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial position") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") with respect to the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Fund generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively. The foregoing will not apply, however, to any transaction during any taxable year that otherwise would be treated as a constructive sale if the transaction is closed within 30 days after the end of that year and the Fund holds the appreciated financial position unhedged for 60 days after that closing (i.e., at no time during that 60-day period is the Fund's risk of loss regarding that position reduced by reason of certain specified transactions with respect to substantially identical or related property, such as having an option to sell, being contractually obligated to sell, making a short sale, or granting an option to buy substantially identical stock or securities).

If a Fund enters into certain derivatives (including forward contracts, long positions under notional principal contracts, and related puts and calls) with respect to equity interests in certain pass-thru entities (including other regulated investment companies, real estate investment trusts, partnerships, real estate mortgage investment conduits and certain trusts and foreign corporations), long-term capital gain with respect to the derivative may be recharacterized as ordinary income to the extent it exceeds the long-term capital gain that would have been realized had the interest in the pass-thru entity been held directly by the Fund during the term of the derivative contract. Any gain recharacterized as ordinary income will be treated as accruing at a constant rate over the term of the derivative contract and may be subject to an interest charge. The Treasury has authority to issue regulations expanding the application of these rules to derivatives with respect to debt instruments and/or stock in corporations that are not pass-thru entities.

If a Fund invests in an entity that is classified as a "passive foreign investment company" ("PFIC") for Federal income tax purposes, the operation of certain provisions of the Code applying to PFICs could result in the imposition of certain Federal income taxes on the Fund. In addition, gain realized from the sale or other disposition of PFIC securities may be treated as ordinary income.

Investment by a Fund in securities issued or acquired at a discount, or providing for deferred interest or for payment of interest in the form of additional obligations could under special tax rules affect the amount, timing and character of distributions to shareholders by causing the Fund to recognize income prior to the receipt of cash payments. For example, the Fund could be required each year to accrue a portion of the discount (or deemed discount) at which the securities were issued and to distribute such income in order to maintain its qualification as a regulated investment company. In such case, the Fund may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy the distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further

information concerning this requirement. Failure to furnish a certified TIN to the Company could subject you to a \$50 penalty imposed by the Internal Revenue Service.

PORTFOLIO TRANSACTIONS

General. The Manager assumes general supervision over the placement of securities purchase and sale orders on behalf of the funds it manages. In cases where the Manager or fund employs a sub-adviser, the sub-adviser, under the supervision of the Manager, places orders on behalf of the applicable fund(s) for the purchase and sale of portfolio securities.

Certain funds are managed by dual employees of the Manager and an affiliated entity in the Mellon organization. Funds managed by dual employees use the research and trading facilities, and are subject to the internal policies and procedures, of the affiliated entity. In this regard, the Manager places orders on behalf of those funds for the purchase and sale of securities through the trading desk of the affiliated entity, applying the written trade allocation procedures of such affiliate.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) generally has the authority to select brokers (for equity securities) or dealers (for fixed income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions, including their frequency, is made in the best judgment of the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) and in a manner deemed fair and reasonable to shareholders. The primary consideration in placing portfolio transactions is prompt execution of orders at the most favorable net price. In choosing brokers or dealers, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) evaluates the ability of the broker or dealer to execute the particular transaction (taking into account the market for the security and the size of the order) at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of a fund are selected on the basis of their professional capability and the value and quality of their services. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) attempts to obtain best execution for the funds by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) the availability of natural liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the measured quality and efficiency of the broker's or dealer's execution; (v) the broker's or dealer's willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counter-party risk (*i.e.*, the broker's or dealer's financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (*e.g.*, foreign or domestic security, large block, illiquid security). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors will be more important than others in determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

With respect to the receipt of research, the brokers or dealers selected may include those that supplement the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's)

research facilities with statistical data, investment information, economic facts and opinions. Such information may be useful to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in serving funds or accounts that it advises and, conversely, supplemental information obtained by the placement of business of other clients may be useful to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in carrying out its obligations to the funds. Information so received is in addition to, and not in lieu of, services required to be performed by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate), and the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) fees are not reduced as a consequence of the receipt of such supplemental information. Although the receipt of such research services does not reduce the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) normal independent research activities, it enables it to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff.

Under the Manager's (and where applicable, a sub-adviser's or Dreyfus affiliate's) procedures, portfolio managers and their corresponding trading desks may seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one fund or account. In some cases, this policy may adversely affect the price paid or received by a fund or an account, or the size of the position obtained or liquidated. As noted above, certain brokers or dealers may be selected because of their ability to handle special executions such as those involving large block trades or broad distributions, provided that the primary consideration of best execution is met. Generally, when trades are aggregated, each fund or account within the block will receive the same price and commission. However, random allocations of aggregate transactions may be made to minimize custodial transaction costs. In addition, at the close of the trading day, when reasonable and practicable, the completed securities of partially filled orders will generally be allocated to each participating fund and account in the proportion that each order bears to the total of all orders (subject to rounding to "round lot" amounts).

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) will not be deterred from changing a Fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of brokerage commissions paid is evaluated by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that a fund invests in foreign securities, certain of such fund's transactions in those securities may not benefit from the negotiated commission rates available to funds for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may deem it appropriate for one fund or account it manages to sell a security while another fund or account it manages is purchasing the same security. Under such circumstances, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may arrange to have the purchase and sale transactions effected directly between the funds and/or accounts (“cross transactions”). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

IPO Allocations. Certain funds advised by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may participate in IPOs. In deciding whether to purchase an IPO, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) generally considers the capitalization characteristics of the security, as well as other characteristics of the security, and identifies funds and accounts with investment objectives and strategies consistent with such a purchase. Generally, as more IPOs involve small- and mid-cap companies, the funds and accounts with a small- and mid-cap focus may participate in more IPOs than funds and accounts with a large-cap focus. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate), when consistent with the fund’s and/or account’s investment guidelines, generally will allocate shares of an IPO on a pro rata basis. In the case of “hot” IPOs, where the Manager (and if applicable, a sub-adviser or Dreyfus affiliate) only receives a partial allocation of the total amount requested, those shares will be distributed fairly and equitably among participating funds or accounts managed by the Manager (or where applicable, a sub-adviser or Dreyfus affiliate). “Hot” IPOs raise special allocation concerns because opportunities to invest in such issues are limited as they are often oversubscribed. The distribution of the partial allocation among funds and/or accounts will be based on relevant net asset values. Shares will be allocated on a pro rata basis to all appropriate funds and accounts, subject to a minimum allocation based on trading, custody, and other associated costs. International hot IPOs may not be allocated on a pro rata basis due to transaction costs, market liquidity and other factors unique to international markets.

Soft Dollars. Subject to the policy of seeking the best combination of price and execution, a fund may execute transactions with brokerage firms that provide, along with brokerage services, research services and products, as defined in Section 28(e) of the Securities Exchange Act of 1934. Section 28(e) provides a “safe harbor” to investment managers who use commission dollars of their advised accounts to obtain investment research and brokerage services and products. These arrangements are often called “soft dollar” arrangements. Research and brokerage services and products that provide lawful and appropriate assistance to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in performing investment decision-making responsibilities fall within the safe harbor.

The services and products provided under these arrangements permit the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) to supplement its own research and analysis activities, and provide it with information from individuals and research staffs of many securities firms. Such services and products may include, but are not limited to the following: fundamental research reports (which may discuss, among other things, the value of securities, or the advisability of investing in, purchasing or selling securities, or the availability of securities or the purchasers or sellers of securities, or issuers, industries, economic factors and trends, portfolio strategy and performance); current market data and news, technical and portfolio analyses,

economic forecasting and interest rate projections, and historical information on securities and companies. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) also may defray the costs of certain computer and communication systems that facilitate trade execution (such as on-line quotation systems, direct data feeds from stock exchanges and on-line trading systems with brokerage commissions generated by client transactions) or functions related thereto (such as clearance and settlement). Some of the research products or services received by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may have both a research function and a non-research administrative function (a “mixed use”). If the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) determines that any research product or service has a mixed use, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) will allocate in good faith the cost of such service or product accordingly. The portion of the product or service that the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) determines will assist it in the investment decision-making process may be paid for in soft dollars. The non-research portion is paid for by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in hard dollars. Any such allocation may create a conflict of interest for the Manager (and where applicable, a sub-adviser or Dreyfus affiliate).

Certain funds are managed by dual employees of the Manager and an affiliated entity in the Mellon organization. The affiliated entity effects trades for funds managed by these dual employees. Because those funds may benefit from the research products and services the affiliated entity receives from brokers, commissions generated by those funds may be used to help pay for research products and services used by the affiliated entity.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) generally considers the amount and nature of research, execution and other services provided by brokerage firms, as well as the extent to which such services are relied on, and attempts to allocate a portion of the brokerage business of its clients on the basis of that consideration. Neither the research services nor the amount of brokerage given to a particular brokerage firm are made pursuant to any agreement or commitment with any of the selected firms that would bind the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) to compensate the selected brokerage firm for research provided. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) endeavors to direct sufficient commissions to broker/dealers that have provided it with research to ensure continued receipt of research the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) believes is useful. Actual commissions received by a brokerage firm may be more or less than the suggested allocations.

The Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may receive a benefit from the research services and products that is not passed on to a fund in the form of a direct monetary benefit. Further, research services and products may be useful to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) in providing investment advice to any of the funds or clients it advises. Likewise, information made available to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) from brokerage firms effecting securities transactions for a fund may be utilized on behalf of another fund or client. Thus, there may be no correlation between the amount of brokerage commissions generated by a particular fund or client and the indirect benefits received by that fund or client.

There were no transactions for each fund during the last fiscal year in securities effected on an agency basis through a broker for, among other things, research services, and the commissions and concessions.

Brokerage Commissions. The Company contemplates that, consistent with the policy of obtaining the most favorable net price, brokerage transactions may be conducted through the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) or their affiliates. The Company's Board has adopted procedures in conformity with Rule 17e-1 under the 1940 Act to ensure that all brokerage commissions paid to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) are reasonable and fair.

For the fiscal years ended November 30, 2006, 2005 and 2004, the Funds paid total brokerage commissions in the amount indicated below, none of which was paid to the Distributor.

| <u>Name of Fund</u> | <u>Brokerage Commissions Paid</u> | | |
|---|-----------------------------------|-------------|-------------|
| | <u>2006</u> | <u>2005</u> | <u>2004</u> |
| Dreyfus Premier Balanced Opportunity Fund | \$891,687 | \$813,878 | \$812,415* |
| Dreyfus Premier Blue Chip Fund | \$29,766 | \$25,283** | N/A |
| Dreyfus Premier Select Fund | \$55,962 | \$34,389** | N/A |

* For the period February 2, 2004 (commencement of operations) through November 30, 2004.

** For the period February 25, 2005 (commencement of operations) through November 30, 2005.

During the fiscal years ended November 30, 2006, 2005 and 2004, Dreyfus Premier Balanced Opportunity did not pay brokerage commissions to the Manager or its affiliates. During the fiscal year ended November 30, 2006, Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund did not pay brokerage commissions to the Manager or its affiliates. .

Regular Broker-Dealers. A Fund may acquire securities issued by one or more of its “regular brokers or dealers,” as defined in Rule 10b-1 under the 1940 Act. Rule 10b-1 provides that a “regular broker or dealer” is one of the ten brokers or dealers that, during the Fund’s most recent fiscal year (i) received the greatest dollar amount of brokerage commissions from participating, either directly or indirectly, in the Fund’s portfolio transactions, (ii) engaged as principal in the largest dollar amount of the Fund’s portfolio transactions or (iii) sold the largest dollar amount of the Fund’s securities. Listed below for the Dreyfus Premier Balanced Opportunity Fund are the acquired securities of its regular brokers or dealers for the fiscal year ended November 30, 2006, the issuer of the securities and the aggregate value per issuer, as of November 30, 2006, of such securities:

Goldman Sachs & Co. \$10,626,000 and Bear Stearns & Co., Inc. \$1,133,000.

Disclosure of Portfolio Holdings. It is the policy of the Company to protect the confidentiality of each Fund's portfolio holdings and prevent the selective disclosure of non-public information about such holdings. Each Fund will publicly disclose its holdings in accordance with regulatory requirements, such as periodic portfolio disclosure in filings with the SEC. Each Fund will publicly disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at <http://www.dreyfus.com>. The information will be posted with a one-month lag and will remain accessible until the Fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition fifteen days following the end of each calendar quarter, the Fund will publicly disclose on the website its complete schedule of portfolio holdings as of the end of such quarter.

If a Fund's portfolio holdings are released pursuant to an ongoing arrangement with any party, the Fund must have a legitimate business purpose for doing so, and neither the Fund, nor Dreyfus or its affiliates, may receive any compensation in connection with an arrangement to make available information about the Fund's portfolio holdings. The Funds may distribute portfolio holdings to mutual fund evaluation services such as Standard & Poor's, Morningstar or Lipper Analytical Services; due diligence departments of broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds before their public disclosure; and broker-dealers that may be used by the Funds, for the purpose of efficient trading and receipt of relevant research, provided that: (a) the recipient does not distribute the portfolio holdings to persons who are likely to use the information for purposes of purchasing or selling Fund shares or Fund portfolio holdings before the portfolio holdings become public information; and (b) the recipient signs a written confidentiality agreement.

Each Fund may also disclose any and all portfolio information to its service providers and others who generally need access to such information in the performance of their contractual duties and responsibilities and are subject to duties of confidentiality, including a duty not to trade on non-public information, imposed by law and/or contract. These service providers include the Fund's custodian, auditors, investment adviser, administrator, and each of their respective affiliates and advisers.

Disclosure of a Fund's portfolio holdings may be authorized only by the Company's Chief Compliance Officer, and any exceptions to this policy are reported quarterly to the Company's Board.

SUMMARY OF THE PROXY VOTING POLICY, PROCEDURES AND GUIDELINES OF THE DREYFUS FAMILY OF FUNDS

The Board of each fund in the Dreyfus Family of Funds has delegated to the Manager the authority to vote proxies of companies held in the fund's portfolio. The Manager, through its participation on the Mellon Proxy Policy Committee (the "MPPC"), applies Mellon's Proxy Voting Policy, related procedures, and voting guidelines when voting proxies on behalf of the funds.

The Manager recognizes that an investment adviser is a fiduciary that owes its clients, including funds it manages, a duty of utmost good faith and full and fair disclosure of all material facts. An investment adviser's duty of loyalty requires an adviser to vote proxies in a manner

consistent with the best interest of its clients and precludes the adviser from subrogating the clients' interests to its own. In addition, an investment adviser voting proxies on behalf of a fund must do so in a manner consistent with the best interests of the fund and its shareholders.

The Manager seeks to avoid material conflicts of interest by participating in the MPPC, which applies detailed, pre-determined written proxy voting guidelines (the "Voting Guidelines") in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, the MPPC engages a third party as an independent fiduciary to vote all proxies of funds managed by Mellon or its affiliates (including the Dreyfus Family of Funds), and may engage an independent fiduciary to vote proxies of other issuers at its discretion.

All proxies received by the funds are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. The guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in Mellon's or the Manager's policies on specific issues. Items that can be categorized under the Voting Guidelines are voted in accordance with any applicable guidelines or referred to the MPPC, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines are referred to the MPPC for discussion and vote. Additionally, the MPPC reviews proposals where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, the MPPC weighs the cost of voting and potential inability to sell the securities (which may occur during the voting process) against the benefit of voting the proxies to determine whether or not to vote. With respect to securities lending transactions, the MPPC seeks to balance the economic benefits of continuing to participate in an open securities lending transaction against the inability to vote proxies.

When evaluating proposals, the MPPC recognizes that the management of a publicly-held company may need protection from the market's frequent focus on short-term considerations, so as to be able to concentrate on such long-term goals as productivity and development of competitive products and services. In addition, the MPPC generally supports proposals designed to provide management with short-term insulation from outside influences so as to enable them to bargain effectively with potential suitors to the extent such proposals are discrete and not bundled with other proposals. The MPPC believes that a shareholder's role in the governance of a publicly-held company is generally limited to monitoring the performance of the company and its management and voting on matters which properly come to a shareholder vote. However, the MPPC generally opposes proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. Accordingly, the MPPC generally votes in accordance with management on issues that the MPPC believes neither unduly limit the rights and privileges of shareholders nor adversely affect the value of the investment.

On questions of social responsibility where economic performance does not appear to be an issue, the MPPC attempts to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the particular social issue including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The MPPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take actions on issues.

In evaluating proposals regarding incentive plans and restricted stock plans, the MPPC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the MPPC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The MPPC generally votes against proposals that permit or are silent on the repricing or replacement of stock options without shareholder approval.

Information regarding how the Manager voted proxies for the Funds is available on the Dreyfus Family of Funds' website at <http://www.dreyfus.com> and on the SEC's website at <http://www.sec.gov> on the Fund's Form N-PX filed with the SEC.

INFORMATION ABOUT THE COMPANY AND FUNDS

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and non-assessable. Shares have no preemptive or subscription rights and are freely transferable.

The Company is organized as an unincorporated business trust under the laws of the Commonwealth of Massachusetts. Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of a Massachusetts business trust. However, the Company's Agreement and Declaration of Trust disclaims shareholder liability for acts or obligations of the Company and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the Fund or a Trustee. The Agreement and Declaration of Trust provides for indemnification from a Fund's property for all losses and expenses of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund itself would be unable to meet its obligations, a possibility which management believes is remote. Upon payment of any liability incurred by a Fund, the shareholder paying such liability will be entitled to reimbursement from the general assets of the Fund. The Company intends to conduct its operations in such a way so as to avoid, as far as possible, ultimate liability of the shareholders for liabilities of the Fund.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Company to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Company to hold a special meeting of shareholders for purposes of removing a Board member from office. Fund shareholders may remove a Board member by the affirmative vote of 66-2/3% of the Company's outstanding voting shares entitled to vote thereon. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Company is a "series fund," which is a mutual fund divided into separate portfolios, each of which is treated as a separate entity for certain matters under the 1940 Act and for other purposes. A shareholder of one portfolio is not deemed to be a shareholder of any other

portfolio. For certain matters shareholders vote together as a group; as to others they vote separately by portfolio.

To date, the Board has authorized the creation of three series of shares. All consideration received by the Company for shares of a series, and all assets in which such consideration is invested, will belong to that series (subject only to the rights of creditors of the Company) and will be subject to the liabilities related thereto. The income attributable to, and the expenses of, a series will be treated separately from those of the other series. The Company has the ability to create, from time to time, new series without shareholder approval.

Rule 18f-2 under the 1940 Act provides that any matter required to be submitted under the provisions of the 1940 Act or applicable state law or otherwise to the holders of the outstanding voting securities of an investment company, such as the Company, will not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each series affected by such matter. Rule 18f-2 further provides that a series shall be deemed to be affected by a matter unless it is clear that the interests of each series in the matter are identical or that the matter does not affect any interest of such series. The Rule exempts the selection of the registered public accounting firm and the election of Board members from the separate voting requirements of the Rule.

Each Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing shares of other funds in the Dreyfus Family of Funds. Accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive or abusive trading. In addition, each Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Company will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Company will take reasonable steps to prevent excessive short term trading deemed to be harmful to the Funds, it may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

The Company will send annual and semi-annual financial statements to all its shareholders.

The following persons are known by the Company to own of record 5% or more of the indicated Fund's outstanding voting securities March 9, 2007. A shareholder who beneficially owns, directly or indirectly, more than 25% of a Fund's voting securities may be deemed a "control person" (as defined in the 1940 Act) of the Fund.

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Funds, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Funds' Prospectus.

PricewaterhouseCoopers LLP, 300 Madison Avenue, New York, New York 10017, an independent registered public accounting firm, were the independent registered public accounting firm for Dreyfus Premier Balanced Opportunity Fund, Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund for the fiscal year ended November 30, 2006. At a meeting held on December 5, 2006, the Company's Audit Committee and the Company's Board engaged Ernst & Young LLP to replace PricewaterhouseCoopers LLP as the independent registered public accounting firm for Dreyfus Premier Balanced Opportunity Fund, Dreyfus Premier Blue Chip Fund and Dreyfus Premier Select Fund, effective upon the conclusion of the audits of the 2006 financial statements of such Funds. The principal accountant's reports on financial statements for the past two years did not contain an adverse opinion or disclaimer of opinion, and was not qualified or modified as to uncertainty, audit scope, or accounting principles. There were no disagreements for the previous two fiscal years and through December 5, 2006 with the principal accountant on any matter of accounting principles or practices, financial statement disclosure or auditing scope or procedure which, if not resolved to the satisfaction of PricewaterhouseCoopers LLP, would have caused them to make reference thereto in their reports of the financial statements for such years.

APPENDIX

Rating Categories

Description of certain ratings assigned by Standard & Poor's Ratings Services ("S&P"), Moody's Investors Service ("Moody's"), and Fitch Ratings ("Fitch"):

S&P

Long-term

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A subordinated debt or preferred stock obligation rated 'C' is currently highly vulnerable to nonpayment. The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action taken, but payments on this obligation are being continued. A 'C' also will be assigned to a preferred stock issue in arrears on dividends or sinking fund payments, but that is currently paying.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

r

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

N.R.

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.

Short-term

A-1

A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are given a plus sign (+) designation. This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B

A short-term obligation rated 'B' is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C

A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Moody'sLong-term**Aaa**

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

A

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B

Bonds rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa

Bonds rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca

Bonds rated 'Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C

Bonds rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated **Prime-3** (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Fitch

Long-term investment grade

AAA

Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA

Very high credit quality. 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. 'BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Long-term speculative grade

BB

Speculative. 'BB' ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B

Highly speculative. 'B' ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. 'CC' ratings indicate that default of some kind appears probable. 'C' ratings signal imminent default.

DDD, DD, D

Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. 'DDD' obligations have the highest potential for recovery, around 90% - 100% of outstanding amounts and accrued interest. 'DD' ratings indicate potential recoveries in the range of 50% - 90% and 'D' the lowest recovery potential, i.e., below 50%.

Entities rated in this category have defaulted on some or all of their obligations. Entities rated 'DDD' have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated 'DD' and 'D' are generally undergoing a formal reorganization or liquidation process; those rated 'DD' are likely to satisfy a higher portion of their outstanding obligations, while entities rated 'D' have a poor prospect of repaying all obligations.

Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2

Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

F3

Fair credit quality. The capacity for timely payment of financial commitment is adequate; however, near-term adverse changes could result in a reduction non-investment grade.

B

Speculative. Minimal capacity for timely payment of financial commitments plus vulnerability to near-term adverse changes in financial and economic conditions.

C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D

Default. Denotes actual or imminent payment default.

'NR' indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' long-term rating category, to categories below 'CCC', or to short-term ratings other than 'F1.'
