Dear Mr. Smith:

We have reviewed your draft registration statement and have the following comments. In some of our comments, we may ask you to provide us with information so we may better understand your disclosure.

Please respond to this letter by providing the requested information and either submitting an amended draft registration statement or publicly filing your registration statement on EDGAR. If you do not believe our comments apply to your facts and circumstances or do not believe an amendment is appropriate, please tell us why in your response.

After reviewing the information you provide in response to these comments and your amended draft registration statement or filed registration statement, we may have additional comments.

General

1. If our comments are applicable to portions of the filings that we have not cited as examples, please make the appropriate changes elsewhere in the filing in accordance with our comments.
2. Please submit all exhibits as soon as practicable. We may have further comments upon examination of these exhibits.
3. Please confirm that the graphics included in your registration statement are the only graphic, visual, or photographic information you will use in your prospectus. If those are not the only graphics, please provide any additional graphics prior to their use for our review.

4. Please supplementally provide us with copies of all written communications, as defined in Rule 405 under the Securities Act, that you, or anyone authorized to do so on your behalf, present to potential investors in reliance on Section 5(d) of the Securities Act, whether or not they retain copies of the communications. Similarly, please supplementally provide us with any research reports about you that are published or distributed in reliance upon Section 2(a)(3) of the Securities Act of 1933 added by Section 105(a) of the Jumpstart Our Business Startups Act by any broker or dealer that is participating or will participate in your offering.

Warrant Liability, page 64

8. You state that “We estimate the warrant fair values using option pricing models which include inputs which we estimate, including the expected term of the warrants, expected volatility and the estimated fair value of the underlying preferred stock.” Please provide more detailed information including the specific valuation model(s) and methods used and why that model(s) was selected.

Stock-Based Compensation, page 64

9. As you have not disclosed an estimated offering price we are deferring a final evaluation of your stock compensation accounting and disclosures until the estimated offering price is specified. We may have further comment in this regard when the amendment containing an estimated offering price is filed. Please continue to update your tabular

disclosure on page 65 for any new option grants or other equity issuances and discuss how you determined the fair value. Provide us with a quantitative and qualitative analysis explaining the difference between the estimated offering price and the fair value of recent equity issuances.

13. We note your statement that FXS is "the most common known genetic cause of autism." Please cite for us, with a view to revising your disclosure, your support for your conclusion that FXS is a known cause of autism.
