ITEM 1. DESCRIPTION OF BUSINESS

History

Idaho General Mines, Inc., an Idaho Corporation (the "Company"), was incorporated in 1925 as General Mines Corporation. The Company was formed for the purpose of acquiring, exploring and, if warranted, developing mineral resource properties, primarily precious and associated base metals.

The Company currently owns two properties located in Shoshone County, Idaho. Neither property contains any known proven or probable reserves and there is no assurance that a commercially viable mineral deposit exists on either of the properties. Further exploration of the properties will be required before a final evaluation as to the economic and legal feasibility is determined. The Company does not intend to conduct further mineral exploration on either property. The properties are being held for the value of their timber. The Company has not conducted any mineral exploration activities for a number of years. The Company has been dormant except for occasional timber harvesting.

Due to increased prices for gold and silver and a more favorable climate for financing mineral exploration companies, in 2003 the Board of Directors decided to engage in mineral exploration. It is the Company's intention to engage in the business of acquiring, exploring, and, if warranted, developing mineral properties, primarily those containing gold, silver and associated base metals. (see "Plan of Operation").

Environmental Matters

The Company owns and has owned mineral property interests on certain public and private lands in Shoshone County, Idaho. The Company's mineral property holdings include lands contained in mining districts that have been designated as "Superfund" sites pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"). The Company and its properties have been and are subject to a variety of federal and state regulations governing land use and environmental matters. The Company believes it has been in substantial compliance with all such regulations, and is unaware of any pending action or proceeding relating to regulatory matters that would affect the financial position of the Company. The Company's management acknowledges, however, that the possibility exists that the Company may be subject to environmental liabilities associated with its properties in the future, and that the amount and nature of any liabilities the Company may be held responsible for is impossible to estimate.

Risk Factors

The Company's business is subject to numerous risk factors, including the following:

No Revenue and Minimal Assets

The Company has had no revenues or earnings from operations. The Company has no significant assets or financial resources. As a mineral exploration company, the Company will sustain operating expenses without corresponding revenues. This will result in the Company incurring net operating losses that will increase continuously until the Company can bring a property into production or lease, joint venture or sell any property it may acquire.

Risks Inherent in the Mining Industry

Mineral exploration is highly speculative and capital intensive. Most exploration efforts are not successful, in that they do not result in the discovery of mineralization of sufficient quantity or quality to be profitably mined. The operations of the Company are also indirectly subject to all of the hazards and risks normally incident to mineral exploration. These risks include insufficient ore reserves, fluctuations in production costs that may make mining of reserves uneconomic; significant environmental and other regulatory restrictions; labor disputes; geological problems; failure of pit walls or dams; force majeure events; and the risk of injury to persons, property or the environment.

Uncertainty of Reserves and Mineralization Estimates

There are numerous uncertainties inherent in estimating proven and probably reserves and mineralization, including many factors beyond the control of the Company. The estimation of reserves and mineralization is a subjective process and the accuracy of any such estimates is a function of the quality of available data and of engineering and geological interpretation and judgment. Results of drilling, metallurgical testing and production and the evaluation of mine plans subsequent to the date of any estimate may justify revision of such estimates. No assurances can be given that the volume and grade of reserves recovered and rates of production will not be less than anticipated. Assumptions about prices are subject to greater uncertainty and metals prices have fluctuated widely in the past. Declines in the market price of base or precious metals also may render reserves or mineralization containing relatively lower grades of ore uneconomic to exploit. Changes in operating and capital costs and other factors including, but not limited to, short-term operating factors such as the need for sequential development of ore bodies and the processing of new or different ore grades, may materially and adversely affect reserves.

Fluctuations in the Market Price of Minerals

The profitability of mining operations is directly related to the market price of the metals being mined. The market price of base and precious metals such as copper, gold and silver fluctuate widely and is affected by numerous factors beyond the control of any mining company. These factors include expectations with respect to the rate of inflation, the exchange rates of the dollar and other currencies, interest rates, global or regional political, economic or banking crises, and a number of other factors. If the market prices of the mineral commodities the Company plans to explore decline, this will have a negative effect on the availability of financing for the Company.

The volatility in metals prices is illustrated by the following table, which sets forth, for the periods indicated, the yearly high and low prices in U.S. dollars per ounce for silver and gold and the high and low yearly average prices for copper in U.S. dollars per pound.

<u>Year</u>	<u>Silver Price Per Ounce</u>		<u>Copper Price Per Pound</u>

Environmental Risks

Mineral exploration is subject to potential risks and liabilities associated with pollution of the environment and the disposal of waste products occurring as a result of mineral exploration. Insurance against environmental risk (including potential liability for pollution or other hazards as a result of the disposal of waste products occurring from exploration) is not generally available to the Company (or to other companies in the minerals industry) at a reasonable price. To the extent that the Company becomes subject to environmental liabilities, the satisfaction of any such liabilities would reduce funds otherwise available to the Company and could have a material adverse effect on the Company. Laws and regulations intended to ensure the protection of the environment are constantly changing, and are generally becoming more restrictive.

Our Exploration Programs Will Probably Not Result in a Commercial Mining Operation

Mineral exploration involves significant risk because few properties that are explored contain bodies of ore that would be commercially economic to develop into producing mines. The Company does not have any properties on which it intends to conduct exploration. If the exploration programs on any properties which the Company may acquire do not result in the discovery of commercial ore, we will be required to acquire additional properties and write-off all of our investments in our explored properties.

</r>

We May Not Have Sufficient Funds To Complete Further Exploration Programs

We have limited financial resources, do not generate operating revenue, and must finance our exploration activity by other means. We do not know whether additional funding will be available for further exploration of our projects. If we fail to obtain additional financing, we will have to delay or cancel further exploration of properties we may acquire, and we could lose all of our interest in our properties.

We Would Need Additional Funds To Develop Any Mineral Deposits For Commercial Production

If our exploration programs successfully locate an economic ore body, additional funds will be required to place it into commercial production. Substantial expenditures would be required to establish ore reserves through drilling, to develop metallurgical processes to extract the metals from the ore and to construct the mining and processing facilities at any site chosen for mining. We do not know whether additional financing will be available at all or on acceptable terms. If additional financing is not available, we may have to postpone the development of, or sell, the property.

Factors Beyond Our Control May Determine Whether Any Mineral Deposits We Discover Are Sufficiently Economic To Be Developed Into A Mine

The determination of whether our mineral deposits are economic is affected by numerous factors beyond our control. These factors include market fluctuations for precious metals, the proximity and capacity of natural resource markets and processing equipment, and government regulations as to governing prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection.

Our Resource Calculations Rely On Estimates That Cannot Be Confirmed Until The Ore Is Mined

In carrying on our mineral exploration activities, and making determinations about whether to proceed to the next stage of development, we must rely upon estimated calculations as to the ore mineralization and corresponding ore grades on our properties. Until ore is actually mined and processed, ore mineralization and ore grade must be considered as estimates only. Any material changes in ore mineralization estimates and ore grades will affect the economic viability of the placing of a property into production and a property's return on capital.

Properties May Be Subject To Uncertain Title

The ownership and validity, or title, of unpatented mining claims are often uncertain and may be contested. A successful claim contesting our title to a property will cause us to lose our rights to mine that property. This could result in our not being compensated for our prior expenditures relating to the property.

Mineral Exploration Activities Require Compliance With A Broad Range Of Law And Regulation Violation Of Which Can Be Costly

Mineral exploration activities are subject to national and local laws and regulations governing prospecting, development, mining, production, exports, taxes, labor standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety. In order to comply, we may be required to make capital and operating expenditures or to close an operation until a particular problem is remedied. In addition, if our activities violate any such laws and regulations, we may be required to compensate those suffering loss or damage, and may be fined if convicted of an offense under such legislation.

Land Reclamation Requirements For Our Exploration Properties May Be Burdensome

Although variable depending on location and the governing authority, land reclamation requirements are generally imposed on mineral exploration companies in order to minimize long term effects of land disturbance. Reclamation may include requirements to control dispersion of potentially deleterious effluents and to reasonably re-establish pre-disturbance land forms and vegetation. In order to carry out reclamation obligations imposed on us in connection with our mineral exploration, we must allocate financial resources that might otherwise be spent on further exploration programs.

We Face Industry Competition In The Acquisition Of Mining Properties And The Recruitment And Retention Of Qualified Personnel

We compete with other mineral exploration and mining companies, many of which have greater financial resources than us, for the acquisition of mineral claims, leases and other mineral interests as well as for the recruitment and retention of qualified employees and other personnel. If we require and are unsuccessful in acquiring additional mineral properties or personnel, we will not be able to grow at the rate we desire or at all.

Some Of Our Directors And Officers May Have Conflicts Of Interest As A Result Of Their Involvement With Other Natural Resource Companies

Some of our directors and officers are directors or officers of other natural resource or mining-related companies. These associations may give rise to conflicts of interest from time to time. As a result of these conflicts of interest, we may miss the opportunity to participate in certain transactions, which may have a material, adverse effect on our financial position.

Permitting

In the ordinary course of business, mineral resource companies are required to seek governmental permits for expansion of existing operations or for the commencement of new operations. Obtaining the necessary governmental permits is a complex and time-consuming process involving numerous jurisdictions and often involving public hearings and costly undertakings on our part. The duration and success of our efforts to obtain permits are contingent upon many variables not within our control. Obtaining environmental protection permits, including the approval of reclamation plans, may increase costs and cause delays depending on the nature of the activity to be permitted and the interpretation of applicable requirements implemented by the permitting authority. There can be no assurance that all necessary permits will be obtained and, if obtained, that the costs involved will not exceed those that we previously estimated. It is possible that the costs and delays associated with the compliance with such standards and regulations could become such that we would not proceed with the development or operation of a mine or mines.

Employees

The Company currently has three employees. If circumstances require, the Company intends to utilize the services of consultants to provide additional services to the Company. The Company has in the past, and intends in the future, to compensate employees and consultants in whole, or in part, through grants of common stock or options to acquire common stock(See Part I Item 6 “Executive Compensation” and Part II Item 4 “Recent Sales of Unregistered Securities”).

Competition

There is aggressive competition within the minerals industry to discover and acquire properties considered to have commercial potential. The Company competes for the opportunity to participate in promising exploration projects with other entities, many of which have greater resources than the Company. In addition, the Company competes with others in efforts to obtain financing to explore and develop mineral properties.

Regulation

The Company’s activities in the United States are subject to various federal, state, and local laws and regulations governing prospecting, development, production, labor standards, occupational health and mine safety, control of toxic substances, and other matters involving environmental protection and taxation. It is possible that future changes in these laws or regulations could have a significant impact on the Company’s business, causing those activities to be economically reevaluated at that time.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Plan of Operation

The Company intends to engage in the exploration of properties containing silver, gold and associated precious and base metals. The Company does not now have an interest in any properties on which it intends to conduct mineral exploration. The Company is voluntarily registering its common stock under the Securities Exchange Act of 1934. The Company’s market maker has applied for and received approval to list the Company on the NASDAQ supervised OTC Bulletin Board contingent upon the staff of the SEC having no further comments on this registration. The Company believes that listing on the OTCBB will facilitate the Company’s efforts to obtain additional equity financing.

The Company has adequate financial resources to meet its financial obligations for the next 12 months but will need to raise additional capital in order to aggressively search for and acquire interests in properties. The Company intends to raise approximately \$500,000 - \$800,000 from a private placement of its common stock. The proceeds from the offering will be utilized to fund the Company's search for properties with mineral exploration potential. If the Company is able to successfully complete the private placement it intends to increase its activity level through the employment of consultants to assist it in its search for suitable exploration properties. The Company is currently in the process of identifying and evaluating mineral properties which may be available for option, lease or purchase or joint venture. At the date hereof the Company is not in negotiation with anyone to acquire an interest in any properties.

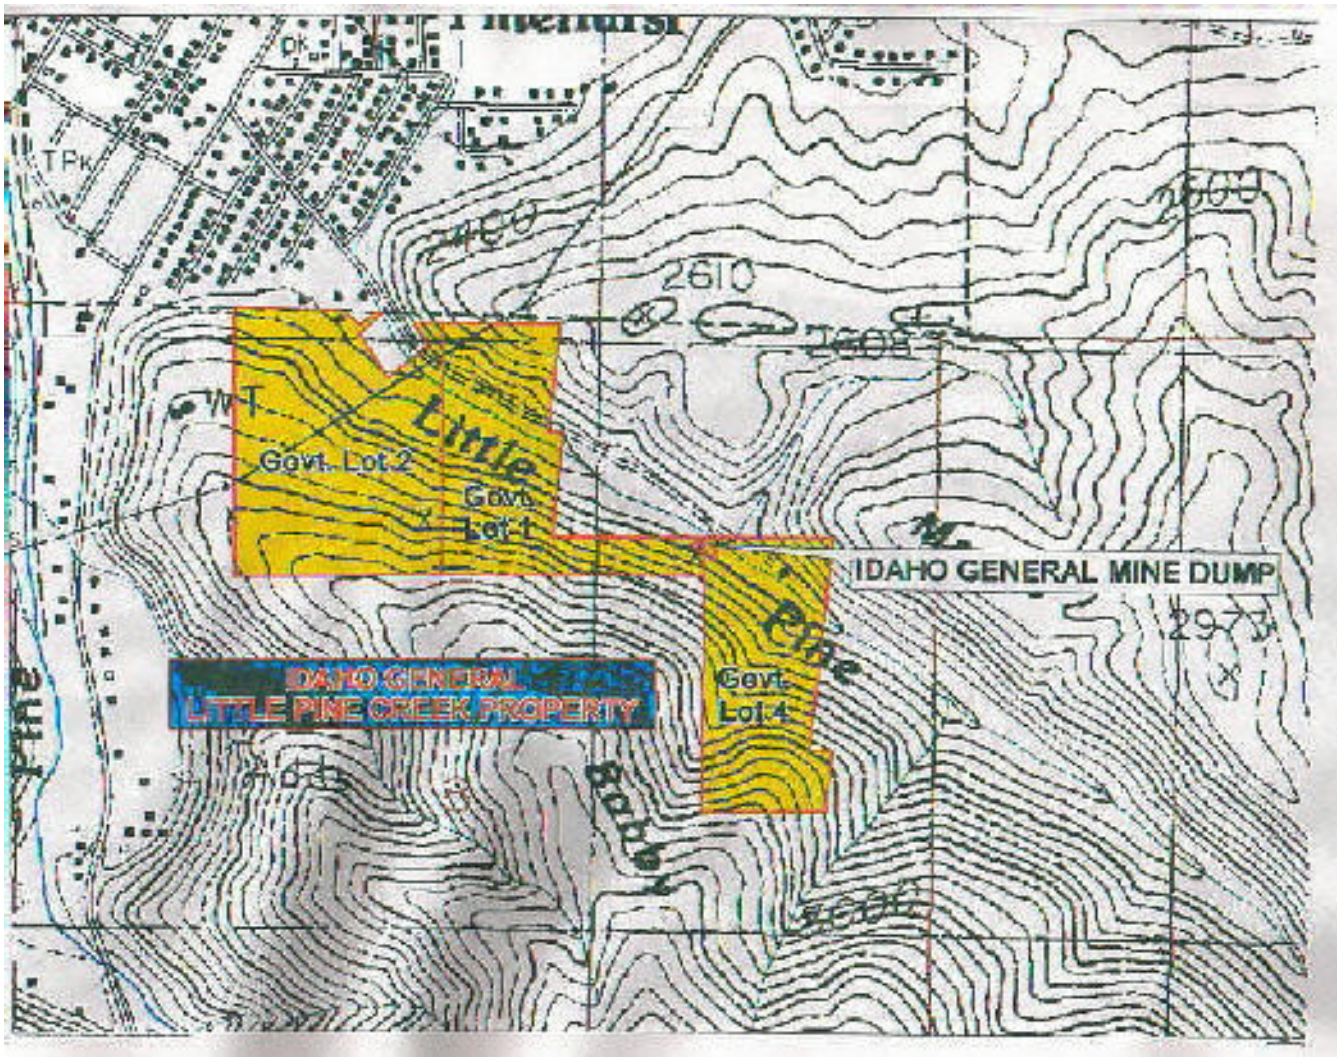

The Company does not anticipate a significant change in the number of employees during the next 12 months. The Company intends to rely primarily upon the use of outside consultants to provide services to the Company. These plans could change depending upon the success of the Company's contemplated private placement and the timing and nature of the acquisition of mineral exploration properties.

ITEM 3. DESCRIPTION OF PROPERTY

The Chicago-London Property

<r>
The Chicago-London property consists of six patented mining claims covering 121.3 acres located adjacent to Thompson Falls highway 6.5 miles east of Murray, Idaho. [A patented claim is a claim that has been secured from the U.S. Government in compliance with the laws relating to such claims. Title to the ground is owned by the claim holder, and no further assessment work need be done; however, taxes on the claim property must be paid.](#) The patented claim block, Mineral Survey No. 2130, is located in Sections 12 and 13, Township 49 North, Range 5 East of the Boise Meridian and Section 18, Township 49 North, Range 6 East of the Boise Meridian. The Property is surrounded by Idaho Panhandle National Forest lands which are undeveloped except for the paved forest highway and remains of historic mining activities. The property, which lies on the West side of Paragon Gulch, consists of steep partially forested hillsides with occasional rock outcrops and talus slopes. An unmaintained forest road leaves the forest highway and traverses the property generally following the bottom of Paragon Gulch. It is approximately 0.25 miles from the highway to the lower boundary of the patented claims. Payment of county taxes is the only requirement to maintain title. There are no planned future costs to be expended on this property except the yearly taxes which are less than \$1,000 to keep title to the property. Power can be supplied to the property from the nearby grid at the adjacent highway.

</r>
Idaho General Mines, Inc. management's current assessment is that the value of the property rests with the marketable timber only.

The Little Pine Creek Property

The Little Pine Creek Property consists of deeded land totaling approximately 103.9 acres located 1 mile east of the town of Pinehurst, Idaho in the Little Pine Creek Drainage. It is located in Section 8, Township 48 North, Range 2 East of the Boise meridian. The property is bordered on the north and east by the Page property of ASARCO Inc., on the north and west by private land and the city of Pinehurst and on the south by the United States Bureau of Land Management. The property to the north, east and south is essentially undeveloped and managed for timber production. The northwest corner of the property abuts the city of Pinehurst. The property lies on the south hillside and creek bottom of Little Pine Creek. The land consists of forested hillsides that have been recently selectively logged. Access is by a private road that runs from Pinehurst through the property on the north side of Little Pine Creek to a culvert creek crossing just east of the General Mine waste dump. A narrow hillside road accesses the western part of the property. Payment of county taxes is the only requirement to maintain title. There are no planned future costs to be expensed on this property except the yearly taxes which are less than \$1,000/year to keep title to the property. Power can be supplied to the property from the nearby grid in Pinehurst.

<r>

Idaho General Mines, Inc. management's current assessment is that the value of the property rests with the marketable timber only.

</r>

Environmental Matters

The Company's mineral property holdings include lands contained in mining districts that have been designated as "Superfund" sites pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"). The Company is unaware of any pending action or proceeding relating to regulatory matters that would affect the financial position of the Company. The Company's management acknowledges, however, that the possibility exists that the Company may be subject to environmental liabilities associated with its properties in the future, and that the amount and nature of any liabilities the Company may be held responsible for is impossible to estimate.

During the fall of 2003 the Company retained W.C. Rust, Consulting Metallurgist to conduct a property environmental investigation of the Chicago London and Little Pine Creek Properties. The investigation consisted of a review of deemed relevant documents and a visual site inspection.

The investigation of Chicago London revealed no potential for adverse environmental effects other than approximately 8,000 tons of mine waste rocks. These were identified only insofar as they contain metals with a potential for adverse environmental effects. No evidence was observed that there had been any significant adverse environmental effects from the mine waste rock piles.

At Little Pine Creek the investigation revealed no potential for adverse environmental effects other than the General Mine waste dump and portal water discharge. The Little Pine Creek Property lies within the original Bunker Hill Superfund Site. The Bunker Hill RI/FS, Revised Task I Data Evaluation Report, Phase 1 Sampling, Document No. 15852-PDO98/1303, Prepared by Dames and Moore, November 2, 1988 gives the results of sampling the General Mine waste rock dump. It was found to have elevated levels of arsenic. There are hundreds of other documents concerning the original Bunker Hill Superfund Site RI/FS that were not reviewed although they may contain information concerning the property because discussions with personnel managing the site indicate that the arsenic content of the dump is the primary concern regarding the property. The Idaho General Mine waste rock dump was not specifically identified as needing remediation in the Nonpopulated Areas Record of Decision. However, personal communication was received from an Idaho Department of Environmental Quality staff member who is part of the ROD capping group that is responsible for planning the remaining work needed to complete the ROD. The staff member said that the Idaho General dump was re-sampled in 2002. The results confirmed the high levels of arsenic and there has been discussion within the group that remediation may be needed to protect recreational users from possible exposure to arsenic but no decisions have been made. Remediation, if done, will probably be some form of capping with cleaner material. The portal was identified because it may contain dissolved minerals.

ITEM 7. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

In March 2004, Matthew F. Russell was hired as the Vice President of Operations. Matthew F. Russell is the son of Robert L. Russell, President of the Company. There have been no transactions or series of transactions, or proposed transactions during the last two years to which the Company is a party in which any director, nominee for election as a director, executive officer or beneficial owner of five percent or more of the Company's common stock, or any member of the immediate family of the foregoing had or is to have a direct or indirect material interest exceeding \$60,000.

ITEM 8. DESCRIPTION OF SECURITIES

Common Stock

The Company is authorized to issue 25,000,000 shares of its \$ 0.10 par value Common Stock. At April 1, 2004, there were 3,505,469 shares issued and outstanding held by approximately 800 shareholders of record. All shares of Common Stock are equal to each other with respect to voting, liquidation, dividend and other rights. Owners of shares of Common Stock are entitled to one vote for each share of Common Stock owned at any Shareholders' meeting. Holders of shares of Common Stock are entitled to receive such dividends as may be declared by the Board of Directors out of funds legally available therefor; and upon liquidation, are entitled to participate pro rata in a distribution of assets available for such a distribution to Shareholders. Except for stock options which may be issued pursuant to the Company's Stock Option Plan, there are no conversion, preemptive, or other subscription rights or privileges with respect to any shares. The Common Stock of the Company does not have cumulative voting rights which means that the holders of more than fifty percent (50%) of the shares voting in an election of directors may elect all of the directors if they choose to do so. In such event, the holders of the remaining shares aggregating less than fifty percent (50%) would not be able to elect any directors. There are no provisions in the Company's articles of incorporation or by-laws that would delay, defer or prevent a change in control.

Stock Option Plan

The Board of Directors has adopted a Stock Option Plan. The purpose of the Plan is to give the Company greater ability to attract, retain, and motivate its officers, key employees, directors and consultants; and is intended to provide the Company with the ability to provide incentives more directly linked to the success of the Company's business and increases in Shareholder value. The Plan has not yet been submitted to the shareholders of the Company for approval.

The Plan provides for both incentive stock options (ISOs) (pursuant to Internal Revenue code § 422) and Nonqualified Stock Options (NSOs). In general, ISOs have more favorable tax consequences to employees. Assuming that option shares are held for the requisite period, employees will be taxed at the capital gain rates on exercise of an ISO, rather than the ordinary income tax rates, plus employment taxes, on exercise of a NSOs. In addition, the time at which taxes must be paid on exercise of an ISO is deferred until sale of the underlying shares, resulting in further time-based savings if such shares are not sold. On the other hand, NSOs have some tax benefits to the corporation, in the form of a tax deduction to the corporation at the time of exercise by the employee, but the corporation does have withholding tax obligations for NSOs and shares in employment taxes. The following is a non-exhaustive list of some of the characteristics of ISOs and NSOs:

ISOs:

- Eligible: only employees
- Additional Limits: must be granted pursuant to an option plan, which must be approved by the shareholders within 12 months of adoption
- Exercise Price must be at least fair market value ("FMV") (110% of FMV if employee owns more than 10% of corporation)
- Termination of Employment: exercise must be within 3 months of termination of employment
- Option Term: cannot exceed 10 years (5 years if employee owns more than 10% of the corporation)
- Restrictions on Amounts for Vesting: not more than \$100,000 of stock can vest in any calendar year (determined at the date of grant)
- Holding: if stock is sold within 1 year of exercise or 2 years of date of grant, option will be taxed much like a NSO

NSOs:

- Eligible: employees and certain non-employees (e.g., consultants/advisors)
- Exercise Price: can be more than, less than or equal to FMV (although discounted options may have adverse accounting consequences)

In addition to meeting the requirements of the Internal Revenue Code as an incentive stock option, the stock option plan also meets the requirements of rule 16(b)-3 of the Securities and Exchange Commission. Officers and directors of a corporation that has adopted an employee stock option plan that meets the requirements of Rule 16(b)-3 may undertake transactions pursuant to the plan without having to be concerned about short-swing profit liability under Section 16(b) of the Exchange Act of 1934.

The plan provides that it shall be approved by the shareholders of the Company within 12 months after the date the plan is adopted by the board of directors. Although shareholder approval of the plan is not required under the Idaho Business Corporation Act, it is required under Section 422 of the Internal Revenue Code of 1986.

Options are exercisable for a maximum of fifteen (15) years (ten years in the case of an Incentive Stock Option). Transferability is prohibited except for limited circumstances regarding the demise of an Optionee.

The option exercise price for Incentive Stock Options may be no less than the fair market value on the date of grant of the Option, except that the exercise price for any ten percent (10%) shareholder must be 110% of the fair market value on the date of grant. The option price for the Non-Qualified Stock Options is the lowest allowable price under applicable law.

The maximum number of shares available for issue upon the exercise of all stock option plans adopted by the Company shall not exceed 3,000,000 shares.

The Company has never paid any dividends and does not anticipate the payment of dividends in the foreseeable future.

ITEM 5. INDEMNIFICATION OF DIRECTORS AND OFFICERS

Although the Company's Articles of Incorporation and By Laws do not address the subject of indemnification, The Idaho Business Corporations Act Sections 30-1-850 through 30-1-859, permits the Company to indemnify its officers and directors against liabilities they incur in such positions. Pursuant to the Idaho Business Corporations Act, both permissible and mandatory indemnification is provided for officers and directors of the Company.

Permissive Indemnification

- (1) Except as otherwise provided by law, a corporation may indemnify an individual who is a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative, arbitral or investigative and whether formal or informal (a "Proceeding") because he is a director against liability incurred in the proceeding if:
 - (a)
 - (i) He conducted himself in good faith; and
 - (ii) He reasonably believed:
 - (A) In the case of conduct in his official capacity, that his conduct was in the best interest of the corporation, and
 - (B) In all cases, that his conduct was at least not opposed to the best interests of the corporation; and
 - (iii) In the case of any criminal proceeding, he had no reasonable cause to believe his conduct was unlawful; or
 - (b) He engaged in conduct for which broader indemnification has been made permissible or obligatory under a provision of the articles of incorporation, as authorized by section 30-1-202(2)(e), Idaho Code.
- (2) A director's conduct with respect to an employee plan for a purpose he reasonably believed to be in the best interests of the participants in, and the beneficiaries of, the plan is conduct that satisfies the requirement of subsection (1)(a)(ii)(B) above.
- (3) The termination of a proceeding by judgment, order, settlement or conviction, or upon a plea of nolo contendere or its equivalent, is not, of itself, determinative that the director did not meet the relevant standard of conduct described in this section.
- (4) Unless ordered by a court under section 30-1-854(1)(c), Idaho Code, a corporation may not indemnify a director:
 - (a) In connection with a proceeding by or in the right of the corporation, except for reasonable expenses incurred in connection with the proceeding if it is determined that the director has met the relevant standard of conduct under subsection (1) of this section; or
 - (b) In connection with any proceeding with respect to conduct for which he was adjudged liable on the basis that he received a financial benefit to which he was not entitled, whether or not involving action in his official capacity.

Mandatory Indemnification.

A corporation shall indemnify a director who was wholly successful, on the merits or otherwise, in the defense of any proceeding to which he was a party because he was a director of the corporation against reasonable expenses incurred by him in connection with the proceeding.

Public Policy

Insofar as indemnification for liabilities arising under the Securities Act of 1933 (the "Act") may be permitted to directors, officers and controlling persons of the small business issuer pursuant to the foregoing provisions, or otherwise, the small business issuer has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable.

Notes to Financial Statements

1. Description of Business

Idaho General Mines, Inc. ("the Company") is an Idaho corporation originally incorporated as General Mines Corporation on November 23, 1925. In 1966 the Company amended its articles of incorporation to change its name to "Idaho General Petroleum and Mines Corporation," and amended its articles again in 1967 changing its name to Idaho General Mines, Inc. The Company's historic activities have principally consisted of the exploration for non-ferrous and, precious metals, in and around Shoshone County, Idaho. In recent years, however, the Company's business has been confined to periodic timber sales from its mining property holdings and other general and administrative activities.

Unless otherwise indicated, amounts provided in these notes to the financial statements pertain to continuing operations.

2. Summary of Significant Accounting Policies

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Income Taxes

Income taxes are recognized in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes," whereby deferred income tax liabilities or assets at the end of each period are determined using the tax rate expected to be in effect when the taxes are actually paid or recovered. A valuation allowance is recognized on deferred tax assets when it is more likely than not that some or all of these deferred tax assets will not be realized. At December 31, 2003 and 2002, the Company had recorded no net deferred tax assets or liabilities and recognized no income tax provision, as it had no taxable income for the years then ended.

Reclassifications

Certain reclassifications have been made to the 2002 financial statements in order to conform to the 2003 presentation. These reclassifications have no effect on net loss, total assets or stockholders' equity as previously reported.

Fair Values of Financial Instruments

The carrying amounts of financial instruments including cash and cash equivalents, and marketable securities, and related party advances, approximated their fair values as of December 31, 2003 and 2002.

Cash Equivalents

Highly liquid short-term investments with a remaining maturity when purchased of three months or less are classified as cash equivalents.

2. Summary of Significant Accounting Policies, Continued:

Net Loss Per Share

Statement of Financial Accounting Standards No. 128, "Earnings per Share," requires dual presentation of basic earnings per share ("EPS") and diluted EPS on the face of all income statements, for all entities with complex capital structures. At December 31, 2003 and 2002, the Company had no outstanding common stock equivalents, and only basic EPS is reported for the years then ended.

Investments

Marketable securities are categorized as available-for-sale and carried at quoted market value. Investments in securities of privately held entities are quoted at their estimated fair value. Realized gains and losses on the sale of securities are recognized on a specific identification basis. Unrealized gains and losses are included as a component of accumulated other comprehensive income or loss, net of related deferred income taxes, if applicable, unless a permanent impairment in value has occurred, which is then charged to operations.

Comprehensive Income (Loss)

Statement of Financial Accounting Standards No. 130, "Reporting Comprehensive Income," requires the disclosure of comprehensive income, which includes net income (loss), and unrealized gains and losses on marketable securities classified as available-for-sale.

Mining Claims and Land

Costs of acquiring and developing mineral properties are capitalized by the project area. Exploration and related costs and costs to maintain mineral rights and leases are expensed as incurred. When a property reaches the production stage, the related capitalized costs are amortized using the units-of-production method on the basis of periodic estimates of ore reserves. Mineral properties are periodically assessed for impairment of value, and any subsequent losses are charged to operations at the time of impairment. If a property is abandoned or sold, its capitalized costs are charged to operations.

Reclamation and Remediation

The Company's operations have been and are subject to standards for mine reclamation that have been established by various governmental agencies. Environmental costs relating to properties put into production are estimated based primarily upon environmental and regulatory requirements, and are accrued and charged to expense over the expected economic life of the operation using the units-of-production method. The liability for reclamation is classified as current or long-term based on the expected timing of the expenditures.

The Company accrues costs associated with environmental remediation obligations when it is probable that such costs will be incurred and they are reasonably estimable. Such costs are based on management's estimate of amounts expected to be incurred when the remediation work is performed.

2. Summary of Significant Accounting Policies, Continued:

Stock-Based Compensation

Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" ("SFAS No. 123") and as amended by SFAS No. 148, requires companies to recognize stock-based expense based on the estimated fair value of employee stock options. Alternatively, SFAS No. 123 allows companies to retain the current approach set forth in APB Opinion 25, "Accounting for Stock Issued to Employees," provided that expanded footnote disclosure is presented. The Company has not adopted the fair value method of accounting for stock-based compensation under SFAS No. 123, but provides the pro forma disclosure required when appropriate.

New Accounting Pronouncements

In April 2002, the FASB issued SFAS No. 145, "Rescission of SFAS Statements No. 4, 44, and 64, Amendment of SFAS No. 13, and Technical Corrections." This statement culminates the current requirements that gains and losses on debt extinguishment must be classified as extraordinary items in the income statement. Instead, such gains and losses will be classified as extraordinary items only if they are deemed to be unusual and infrequent, in accordance with the current GAAP criteria for extraordinary classifications. In addition, SFAS No. 145 eliminates an inconsistency in lease accounting by requiring that modifications of capital leases that result in reclassification as operating leases be accounted for consistent with sales-leaseback accounting rules. The statement also contains other nonsubstantive corrections to authoritative accounting literature. The rescission of SFAS No. 4 is effective in fiscal years beginning after May 15, 2002. The amendment and technical corrections of SFAS No. 13 are effective for transactions occurring after May 15, 2002. All other provisions of SFAS No. 145 are effective for financial statements issued on or after May 15, 2002. SFAS No. 145 has no impact on the Company's financial statements.

In June 2002, the FASB issued SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities," which addresses accounting for restructuring and similar costs. SFAS No. 146 supersedes previous accounting guidance, principally Emerging Issues Task Force Issue No. 94-3. SFAS No. 146 requires that the liability for costs associated with an exit or disposal activity be recognized when the liability is incurred. SFAS No. 146 also establishes that the liability should initially be measured and recorded at fair value. Accordingly SFAS No. 146 may affect the timing of recognizing future restructuring costs as well as the amount recognized. The provisions of SFAS 146 are effective for exit or disposal activities that are initiated after December 31, 2002. SFAS No. 146 has no impact on the Company's financial statements.

In August 2002, the FASB issued SFAS No. 147, "Acquisitions of Certain Financial Institutions." SFAS No. 147 removes acquisitions of financial institutions from the scope of SFAS No. 72 and FASB Interpretation No. 9, and requires that those transactions be accounted for in accordance with SFAS No. 141 and SFAS No. 142. In addition, SFAS No. 147 amends SFAS No. 144, to include in its scope long-term customer-relationship intangible assets of financial institutions. The provisions of SFAS No. 147 are generally effective October 1, 2002. SFAS No. 147 has no impact on the Company's financial statements.

2. Summary of Significant Accounting Policies, Continued:

New Accounting Pronouncements, Continued:

In October 2002, the FASB issued SFAS No. 147, "Acquisitions of Certain Financial Institutions-an amendment of FASB Statements No. 72 and 144 and FASB Interpretation No. 9." SFAS No. 147 has no impact on the Company's financial statements.

In November 2002, the FASB issued FASB Interpretation No. 45, "Guarantor's Accounting for Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, an interpretation of FASB Statements No. 5, 57 and 107 and rescission of FASB Interpretation No. 34, Disclosure of Indirect Guarantees of Indebtedness of Others" ("FIN 45"). FIN 45 clarifies the requirements for a guarantor's accounting for and disclosure of certain guarantees issued and outstanding. It also requires a guarantor to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. This interpretation also incorporates without reconsideration the guidance in FASB Interpretation No. 34, which is being superseded. The adoption of FIN 45 has no material effect on the Company's financial statements.

In November 2002, the Emerging Issues Task Force ("EITF") reached a consensus on EITF 00-21, "Revenue Arrangements with Multiple Deliverables," related to the timing of revenue recognition for arrangements in which goods or services or both are delivered separately in a bundled sales arrangement. The EITF requires that when the deliverables included in this type of arrangement meet certain criteria they should be accounted for separately as separate units of accounting. This consensus is effective prospectively for arrangements entered into in fiscal periods beginning after June 15, 2003. EITF 00-21 will not have an impact upon initial adoption and is not expected to have a material impact on the Company's results of operations, financial position and cash flows.

In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation, Transition and Disclosure, an amendment of FASB Statement No. 123." SFAS No. 148 provides alternative methods of transition for an entity that voluntarily changes to the fair value based method of accounting for stock-based employee compensation. It also amends the disclosure provisions of SFAS No. 123 to require prominent disclosure about the effects of reported net income of an entity's accounting policy decisions with respect to stock-based employee compensation. Finally, this Statement amends APB Opinion No. 28, Interim Financial Reporting, to require disclosure about those effects in interim financial information. The amendments to SFAS No. 123, which provides alternative methods of transition for an entity that voluntarily changes to the fair value based method of accounting for stock-based employee compensation is effective for financial statements for fiscal years ending after December 15, 2002. The amendment to SFAS No. 123 relating to disclosures and the amendment to Opinion 28 is effective for financial reports containing condensed financial statements for interim periods beginning after December 15, 2002. Management does not intend to adopt the fair value accounting provisions of SFAS No. 123 and currently believes that the adoption of SFAS No. 148 will not have a material impact on the Company's financial statements.

2. Summary of Significant Accounting Policies, Continued:

New Accounting Pronouncements, Continued:

In April 2003, the FASB issued SFAS No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities." This standard amends and clarifies the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and hedging activities under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities." This statement is effective prospectively for contracts entered into or modified after June 30, 2003, and for hedging relationships designated after June 30, 2003. SFAS No. 149 will not have an impact upon initial adoption and is not expected to have a material effect on the Company's results of operations, financial position and cash flows.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity." SFAS No. 150 establishes standards for the classification and measurement of certain financial instruments with characteristics of both liabilities and equity. The requirements of SFAS No. 150 become effective for the Company for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. The Company has evaluated the impact of SFAS No. 150 to determine the effect it may have on its results of operations, financial position or cash flows and has concluded that the adoption of this statement is not expected to have a material effect on the Company's financial position or results of operations.

3. Income Taxes

Income taxes are recognized in accordance with Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes," whereby deferred income tax liabilities or assets at the end of each period are determined using the tax rate expected to be in effect when the taxes are actually paid or recovered. A valuation allowance is recognized on deferred tax assets when it is more likely than not that some or all of these deferred tax assets will not be realized. The Company has not recorded an income tax provision for the years ended December 31, 2003 and 2002, as it had no taxable income. The Company has net operating loss carryforwards for income tax purposes at December 31, 2003 and 2002, of approximately \$276,000 and \$207,000, respectively, which will expire through 2023, and an associated deferred tax asset of approximately \$110,000 and \$83,000, respectively, based upon an combined federal and state 40% marginal income tax rate. The deferred tax assets have been fully reserved for as management believes it is more likely than not that the deferred tax assets will not be utilized.

Idaho General Mines, Inc.
Notes to Financial Statements

4. Investments

The Company accounts for its investments in debt and equity securities in accordance with the provisions of SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," and reports its investments in available-for-sale securities at their fair value, with unrealized gains and losses excluded from income or loss and included in other comprehensive income or loss. Marketable securities expected to be sold within one year are classified as current assets. At December 31, 2003 and 2002, the Company's investments in marketable securities were as follows:

	2003		2002	
	<u>Market Value</u>	<u>Cost</u>	<u>Market Value</u>	<u>Cost</u>
Classified as current assets:				
Various equity securities	\$ 108,583	\$ 97,507	\$ 97,674	\$ 106,982
Federal home loan bank debt Security (matures 9/15/03)	<u>29,936</u>	<u>30,005</u>	<u>30,392</u>	<u>30,005</u>
	\$ 138,519	\$ 127,512	\$ 128,066	\$ 136,987

At December 31, 2003, the Company had unrealized gains in marketable securities of \$11,007 resulting from a change in market value of its marketable securities of \$19,928 during 2003, that includes a reclassification adjustment for realized losses from sales of marketable equity securities of \$714. At December 31, 2002, the Company had unrealized losses in marketable securities of \$8,921.

5. Mining Claims and Land

The Company's mining claims and land consist of approximately 107 acres of fee simple land in the Pine Creek area of Shoshone County, Idaho and six patented mining claims known as the Chicago-London group, located near the town of Murray in Shoshone County, Idaho. The carrying value of these properties at December 31, 2003 and 2002 is as follows:

	2003	2002
Pine Creek land	\$ 1,450	\$ 1,450
Chicago-London group	<u>80,001</u>	<u>80,001</u>
Total	\$ 81,451	\$ 81,451

The Company reviews the carrying value of its assets whenever events or circumstances indicate that an asset's fair value may not be at least equal to its carrying value.

6. Related Party Advance

During 2003, Robert L. Russell, the Company's president and a director, advanced \$35,000 to the Company to fund its operating activities. The advance was not subject to specific repayment terms and accrued no interest. The advance was repaid in full during the first quarter of 2004.

7. Contingency

Environmental Matters

The Company owns and has owned mineral property interests on certain public and private lands in Shoshone County, Idaho (see Note 5). The Company's mineral property holdings include lands contained in mining districts that have been designated as "Superfund" sites pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"). The Company and its properties have been and are subject to a variety of federal and state regulations governing land use and environmental matters. The Company believes it has been in substantial compliance with all such regulations, and is unaware of any pending action or proceeding relating to regulatory matters that would affect the financial position of the Company. The Company's management acknowledges, however, that the possibility exists that the Company may be subject to environmental liabilities associated with its properties in the unforeseeable future, and that the amount and nature of any liabilities the Company may be held responsible for is impossible to estimate.

8. Stockholders' Equity

Common Stock

The Company has one class of \$0.10 par value common stock with 25,000,000 shares authorized for issue; and 3,505,469 and 3,425,469 shares issued and outstanding at December 31, 2003 and 2002, respectively.

Common Stock Issued for Directors' Services

During the year ended December 31, 2003, the Company issued 80,000 shares of its unregistered common stock to seven members of the Board of Directors and two officers of the Company, for their attendance at board meetings throughout the year. Directors' fee expense related to the issue was \$8,000, based on the fair value of the services rendered and the common stock issued.

2003 Stock Option Plan

In December of 2003, the Company's Board of Directors resolved to create the Idaho General Mines, Inc. 2003 Stock Option Plan ("the Plan"). The purpose of the Plan is to attract and retain the best available personnel for positions of substantial responsibility and to provide additional incentive to employees, directors and consultants of the Company to promote the success of the Company's business. The maximum number of shares of common stock or options to purchase common stock that may be issued pursuant to the Plan is 3,000,000. At December 31, 2003, no shares of the Company's common stock had been issued under the Plan and no stock options had been granted.

8. Stockholders' Equity, Continued:

Management and Administrative Fees Paid with Common Stock Purchase Options

During December of 2003, the Company issued 1,150,000 common stock purchase options to directors, officers and other related parties as compensation for their services, as follows:

<I>

Options issued to directors	700,000

James Moore, metallurgical and engineering consultant	100,000
Matthew F. Russell, engineering consultant	<u>100,000</u>
 Total	 <u><u>1,150,000</u></u>

The options are exercisable at \$0.11 per share and expire five years from the date of the grant. In connection with the issue, the Company recorded \$11,500, or \$0.01 per option in compensation expense based upon management's estimate of the value of the services rendered and the value of the options granted.

9. Related Party Transactions

In addition to the transactions described in Notes 6 and 8, the Company had the following related party transactions:

The Company paid professional service fees of \$4,869 and \$4,824 during the years ended December 31, 2003 and 2002, respectively, to Michael Branstetter, the Company's legal counsel, and secretary/treasurer for his legal services rendered. </r>

During the year ended December 31, 2002, the Company issued 285,000 shares of its common stock to five members of the Board of Directors for their services and attendance at Board of Director meetings. These stock awards were recorded as \$18,525 of directors' fees expense, based upon the estimated value of the services rendered.

Included in the grant of common stock purchase options (See Note 8) to officers and directors during 2003, were 350,000 common stock purchase options (in the aggregate) granted to Robert L. Russell, the Company's president, and three other members of his immediate family for their management and administrative services.

During 2003, the Company paid \$18,000 to Matthew F. Russell, a consultant to the Company and son of Robert L. Russell, for his services provided to the Company.

For purposes of the preceding sentence, indirect beneficial ownership shall include, without limitation, an interest resulting from ownership of the voting securities of one or more corporations or other business entities which own the Company or the Transferee, as the case may be, either directly or through one or more subsidiary corporations or other business entities. The Board shall have the right to determine whether multiple sales or exchanges of the voting securities of the Company or multiple Ownership Change Events are related, and its determination shall be final, binding and conclusive. Notwithstanding the preceding sentence, a Change in Control shall not include a distribution or transaction in which the voting stock of the Company or a Parent or Subsidiary is distributed to the shareholders of a Parent of such entity. Any change in ownership resulting from an underwritten public offering of the Common Stock or the stock of any Parent or Subsidiary shall not be deemed a change in control for any purpose hereunder.

For purposes of Incentive Stock Options, no such leave may exceed ninety (90) days, unless reemployment upon expiration of such leave is guaranteed by statute or contract. If reemployment upon expiration of a leave of absence approved by the Company is not so guaranteed, then three (3) months following the 90th day of such leave, any Incentive Stock Option held by the Optionee shall cease to be treated as an Incentive Stock Option and shall be treated for tax purposes as a Nonstatutory Stock Option. Neither service as a Director nor payment of a director's fee by the Company shall be sufficient to constitute "employment" by the Company.

(m) "Exchange Act" means the Securities Exchange Act of 1934, as amended.

(n) "Fair Market Value" means, as of any date, the value of Common Stock determined as follows:

(i) If the Common Stock is listed on any established stock exchange or a national market system, including without limitation the NASDAQ National Market, The NASDAQ SmallCap Market of The NASDAQ Stock Market or on the NASDAQ supervised OTC Bulletin Board, its Fair Market Value shall be the closing sales price for such stock (or the closing bid, if no sales were reported) as quoted on such exchange or system on the day of determination, as reported in The Wall Street Journal or such other source as the Administrator deems reliable;

(ii) If the Common Stock is regularly quoted by a recognized securities dealer but selling prices are not reported, its Fair Market Value shall be the mean between the high bid and low asked prices for the Common Stock on the day of determination; or

(iii) In the absence of an established market for the Common Stock, the Fair Market Value thereof shall be determined in good faith by the Administrator.

(o) "Incentive Stock Option" means an Option intended to qualify as an incentive stock option within the meaning of Section 422 of the Code.

(p) "Nonstatutory Stock Option" means an Option not intended to qualify as an Incentive Stock Option.

3. Stock Subject to the Plan. Subject to the provisions of Section 12 of the Plan, the maximum aggregate number of Shares that may be subject to option and sold under the Plan is Three Million (3,000,000) Shares. The Shares may be authorized but unissued, or reacquired Common Stock.

If an Option expires or becomes unexercisable without having been exercised in full, the unpurchased Shares which were subject thereto shall become available for future grant or sale under the Plan (unless the Plan has terminated). However, Shares that have actually been issued under the Plan, upon exercise of an Option, shall not be returned to the Plan and shall not become available for future distribution under the Plan, except that if Shares of restricted stock issued pursuant to an Option are repurchased by the Company at their original purchase price, such Shares shall become available for future grant under the Plan. However, except as adjusted pursuant to Section 12, in no event shall more than one million (1,000,000) Shares be available for issuance pursuant to the exercise of Incentive Stock Options (the "ISO Share Issuance Limit").

4. Administration of the Plan.

(a) The Plan shall be administered by the Board or a Committee appointed by the Board, which Committee shall be constituted to comply with Applicable Laws.

(b) Powers of the Administrator. Subject to the provisions of the Plan and, in the case of a Committee, the specific duties delegated by the Board to such Committee, and subject to the approval of any relevant authorities, the Administrator shall have the authority in its discretion:

(i) to determine the Fair Market Value;

(ii) to select the Service Providers to whom Options may from time to time be granted hereunder;

(iii) to determine the number of Shares to be covered by each such Option granted hereunder;

(iv) to approve forms of agreement for use under the Plan;

(v) to determine the terms and conditions of any Option granted hereunder. Such terms and conditions include, but are not limited to, the exercise price, the time or times when Options may be exercised (which may be based on performance criteria), any vesting, acceleration or waiver of forfeiture restrictions, and any restriction or limitation regarding any Option or the Common Stock relating thereto, based in each case on such factors as the Administrator, in its sole discretion, shall determine;

(vi) to prescribe, amend and rescind rules and regulations relating to the Plan, including rules and regulations relating to sub-plans established for the purpose of satisfying applicable foreign laws;

(vii) to allow Optionees to satisfy withholding tax obligations by electing to have the Company withhold from the Shares to be issued upon exercise of an Option that number of Shares having a Fair Market Value equal to the minimum amount required to be withheld. The Fair Market Value of the Shares to be withheld shall be determined on the date that the amount of tax to be withheld is to be determined. All elections by Optionees to have Shares withheld for this purpose shall be made in such form and under such conditions as the Administrator may deem necessary or advisable; and

(viii) to construe and interpret the terms of the Plan and Options granted pursuant to the Plan.

(c) Effect of Administrator's Decision. All decisions, determinations and interpretations of the Administrator shall be final and binding on all Optionees.

5. Eligibility. Nonstatutory Stock Options may be granted to Service Providers. Incentive Stock Options may be granted only to Employees.

6. Limitations.

(a) Incentive Stock Option Limit. Each Option shall be designated in the Option Agreement as either an Incentive Stock Option or a Nonstatutory Stock Option. However, notwithstanding such designation, to the extent that the aggregate Fair Market Value of the Shares with respect to which Incentive Stock Options are exercisable for the first time by the Optionee during any calendar year (under all plans of the Company and any Parent or Subsidiary) exceeds \$100,000, such Options shall be treated as Nonstatutory Stock Options. For purposes of this Section 6(a), Incentive Stock Options shall be taken into account in the order in which they were granted. The Fair Market Value of the Shares shall be determined as of the time the Option with respect to such Shares is granted.

(b) At-Will Employment. Neither the Plan nor any Option shall confer upon any Optionee any right with respect to continuing the Optionee's relationship as a Service Provider with the Company, nor shall it interfere in any way with his or her right or the Company's right to terminate such relationship at any time, with or without cause, and with or without notice.

7. Term of Plan. Subject to shareholder approval in accordance with Section 18, the Plan shall become effective upon its adoption by the Board. Unless sooner terminated under Section 14, it shall continue in effect for a term of ten (10) years from the later of (i) the effective date of the Plan, or (ii) the date of the most recent Board approval of an increase in the number of shares reserved for issuance under the Plan.

8. Term of Option. The term of each Option shall be stated in the Option Agreement; provided, however, that the term shall be no more than fifteen (15) in the case of a NonQualified Option and ten (10) years from the date of grant thereof in the case of an Incentive Stock Option. In the case of an Incentive Stock Option granted to an Optionee who, at the time the Option is granted, owns stock representing more than ten percent (10%) of the voting power of all classes of stock of the Company or any Parent or Subsidiary, the term of the Option shall be five (5) years from the date of grant or such shorter term as may be provided in the Option Agreement.

9. Option Exercise Price and Consideration.

(a) Exercise Price. The per share exercise price for the Shares to be issued upon exercise of an Option shall be such price as is determined by the Administrator, but shall be subject to the following:

(i) In the case of an Incentive Stock Option

(A) granted to an Employee who, at the time of grant of such Option, owns stock representing more than ten percent (10%) of the voting power of all classes of stock of the Company or any Parent or Subsidiary, the exercise price shall be no less than 110% of the Fair Market Value per Share on the date of grant.

(B) granted to any other Employee, the per Share exercise price shall be no less than 100% of the Fair Market Value per Share on the date of grant.

(ii) In the case of a Nonstatutory Stock Option, the per Share exercise price shall be determined by the Administrator.

(iii) Notwithstanding the foregoing, Options may be granted with a per Share exercise price other than as required above pursuant to an assumption or substitution of another option in connection with a merger or other corporate transaction.

(b) Forms of Consideration. The consideration to be paid for the Shares to be issued upon exercise of an Option, including the method of payment, shall be determined by the Administrator (and, in the case of an Incentive Stock Option, shall be determined at the time of grant). Such consideration may consist of, without limitations, (1) cash, (2) check, (3) promissory note, (4) other Shares, provided any Shares acquired from the Company, either directly or indirectly, (x) have been owned by the Optionee for more than six months on the date of surrender, and (y) have a Fair Market Value on the date of surrender equal to the aggregate exercise price of the Shares as to which such Option shall be exercised, (5) consideration received by the Company under a cashless exercise program implemented by the Company in connection with the Plan, or (6) any combination of the foregoing methods of payment. In making its determination as to the type of consideration to accept, the Administrator shall consider if acceptance of such consideration may be reasonably expected to benefit the Company. Notwithstanding the foregoing, the Administrator may permit an Optionee to exercise his or her Option by delivery of a full-recourse promissory note secured by the purchased Shares. The terms of such promissory note shall be determined by the Administrator in its sole discretion.

10. Exercise of Option.

(a) Procedure for Exercise; Rights as a Shareholder. Any Option granted hereunder shall be exercisable according to the terms hereof at such times and under such conditions as determined by the Administrator and set forth in the Option Agreement. Unless the Administrator provides otherwise, vesting of Options granted hereunder shall be suspended during any unpaid leave of absence. An Option may not be exercised for a fraction of a Share.

An Option shall be deemed exercised when the Company receives: (i) written or electronic notice of exercise (in accordance with the Option Agreement) from the person entitled to exercise the Option, and (ii) full payment for the Shares with respect to which the Option is exercised. Full payment may consist of any consideration and method of payment authorized by the Administrator and permitted by the Option Agreement and the Plan. Shares issued upon exercise of an Option shall be issued in the name of the Optionee or, if requested by the Optionee, in the name of the Optionee and his or her spouse. Until the Shares are issued (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company), no right to vote or receive dividends or any other rights as a shareholder shall exist with respect to the Shares, notwithstanding the exercise of the Option. The Company shall issue (or cause to be issued) such Shares promptly after the Option is exercised. No adjustment will be made for a dividend or other right for which the record date is prior to the date the Shares are issued, except as provided in Section 12 of the Plan.

Exercise of an Option in any manner shall result in a decrease in the number of Shares thereafter available, both for purposes of the Plan and for sale under the Option, by the number of Shares as to which the Option is exercised.

(b) Termination of Relationship as a Service Provider. If an Optionee ceases to be a Service Provider, such Optionee may exercise his or her Option within such period of time as is specified in the Option Agreement to the extent that the Option is vested on the date of termination (but in no event later than the expiration of the term of the Option as set forth in the Option Agreement). In the absence of a specified time in the Option Agreement, the Option shall remain exercisable for three (3) months following the Optionee's termination. If, on the date of termination, the Optionee is not vested as to his or her entire Option, the Shares covered by the unvested portion of the Option shall revert to the Plan. If, after termination, the Optionee does not exercise his or her Option within the time specified by the Administrator, the Option shall terminate, and the Shares covered by such Option shall revert to the Plan.

(c) Disability of Optionee. If an Optionee ceases to be a Service Provider as a result of the Optionee's Disability, the Optionee may exercise his or her Option within such period of time as is specified in the Option Agreement to the extent the Option is vested on the date of termination (but in no event later than the expiration of the term of such Option as set forth in the Option Agreement). In the absence of a specified time in the Option Agreement, the Option shall remain exercisable for twelve (12) months following the Optionee's termination. If, on the date of termination, the Optionee is not vested as to his or her entire Option, the Shares covered by the unvested portion of the Option shall revert to the Plan. If, after termination, the Optionee does not exercise his or her Option within the time specified herein, the Option shall terminate, and the Shares covered by such Option shall revert to the Plan.

(d) Death of Optionee. If an Optionee dies while a Service Provider, the Option may be exercised within such period of time as is specified in the Option Agreement (but in no event later than the expiration of the term of such Option as set forth in the Option Agreement), by the Optionee's designated beneficiary, provided such beneficiary has been designated prior to Optionee's death in a form acceptable to the Administrator. If no such beneficiary has been designated by the Optionee, then such Option may be exercised by the personal representative of the Optionee's estate or by the person(s) to whom the Option is transferred pursuant to the Optionee's will or in accordance with the laws of descent and distribution. If, at the time of death, the Optionee is not vested as to his or her entire Option, the Shares covered by the unvested portion of the Option shall immediately revert to the Plan. If the Option is not so exercised within the time specified herein, the Option shall terminate, and the Shares covered by such Option shall revert to the Plan.

11. Limited Transferability of Options. Unless determined otherwise by the Administrator, Options may not be sold, pledged, assigned, hypothecated, transferred, or disposed of in any manner other than by will or the laws of descent and distribution, and may be exercised during the lifetime of the Optionee, only by the Optionee. Notwithstanding the foregoing, to the extent permitted by the Administrator, in its discretion, and set forth in the Option Agreement evidencing such Option, a Nonstatutory Stock Option shall be assignable or transferable subject to the applicable limitations, if any, described in Rule 701 under the Securities Act and the General Instructions to Form S-8 Registration Statement under the Securities Act. In addition, any transferable Option shall contain additional terms and conditions as the Administrator deems appropriate.

12. Adjustments Upon Changes in Capitalization, Merger or Change in Control.

(a) Changes in Capitalization. Subject to any required action by the shareholders of the Company, the number and type of Shares which have been authorized for issuance under the Plan but as to which no Options have yet been granted or which have been returned to the Plan upon cancellation or expiration of an Option, the ISO Share Issuance Limit, and the number and type of Shares covered by each outstanding Option, as well as the price per Share covered by each such outstanding Option, shall be proportionately adjusted for any increase or decrease in the number or type of issued Shares resulting from a stock split, reverse stock split, stock dividend, combination or reclassification of the Common Stock, or any other increase or decrease in the number of issued shares of Common Stock effected without receipt of consideration by the Company. The conversion of any convertible securities of the Company shall not be deemed to have been "effected without receipt of consideration." Such adjustment shall be made by the Board, whose determination in that respect shall be final, binding and conclusive. Except as expressly provided herein, no issuance by the Company of shares of stock of any class, or securities convertible into shares of stock of any class, shall affect, and no adjustment by reason thereof shall be made with respect to, the number, type or price of Shares subject to an Option.

(b) Dissolution or Liquidation. In the event of the proposed dissolution or liquidation of the Company, the Administrator shall notify each Optionee as soon as practicable prior to the effective date of such proposed transaction. The Administrator in its discretion may provide for an Optionee to have the right to exercise his or her Option until fifteen (15) days prior to such transaction as to all of the Optioned Stock covered thereby, including Shares as to which the Option would not otherwise be exercisable. In addition, the Administrator may provide that any Company repurchase option applicable to any Shares purchased upon exercise of an Option shall lapse as to all such Shares, provided the proposed dissolution or liquidation takes place at the time and in the manner contemplated. To the extent it has not been previously exercised, an Option will terminate immediately prior to the consummation of such proposed action.

(c) Change in Control. In the event of a Change in Control, each outstanding Option shall be assumed or an equivalent option substituted by the successor corporation or a Parent or Subsidiary of the successor corporation. If, in such event, the Option is not assumed or substituted, then the Optionee shall fully vest in and have the right to exercise this Option as to all of the Optioned Stock, including Shares as to which it would not otherwise be vested or exercisable. If this Option becomes fully vested and exercisable in lieu of assumption or substitution in the event of a Change in Control, the Administrator shall notify the Optionee in writing or electronically that this Option shall be fully exercisable for a period of fifteen (15) days from the date of such notice, and this Option shall terminate upon the expiration of such period. For the purposes of this paragraph, the Option shall be considered assumed if, following the Change in Control, the Option confers the right to purchase or receive, for each Share of Optioned Stock subject to the Option immediately prior to the Change in Control, the consideration (whether stock, cash, or other securities or property) received in the Change in Control by holders of Common Stock for each Share held on the effective date of the transaction (and if holders were offered a choice of consideration, the type of consideration chosen by the holders of a majority of the outstanding Shares); provided, however, that if such consideration received in the Change in Control

is not solely common stock of the successor corporation or its Parent, the Administrator may, with the consent of the successor corporation, provide for the consideration to be received upon the exercise of the Option, for each Share of Optioned Stock subject to the Option, to be solely common stock of the successor corporation or its Parent equal in fair market value to the per share consideration received by holders of Common Stock in the Change in Control.

13. Time of Granting Options. The date of grant of an Option shall, for all purposes, be the date on which the Administrator makes the determination granting such Option, or such later date as is determined by the Administrator. Notice of the determination shall be given to each Service Provider to whom an Option is so granted within a reasonable time after the date of such grant.

14. Amendment and Termination of the Plan.

(a) Amendment and Termination. The Board may at any time amend, alter, suspend or terminate the Plan.

(b) Shareholder Approval. The Board shall obtain shareholder approval of any Plan amendment to the extent necessary and desirable to comply with Applicable Laws.

(c) Effect of Amendment or Termination. No amendment, alteration, suspension or termination of the Plan shall impair the rights of any Optionee, unless mutually agreed otherwise between the Optionee and the Administrator, which agreement must be in writing and signed by the Optionee and the Company. Termination of the Plan shall not affect the Administrator's ability to exercise the powers granted to it hereunder with respect to Options granted under the Plan prior to the date of such termination.

15. Conditions Upon Issuance of Shares.

(a) Legal Compliance. Shares shall not be issued pursuant to the exercise of an Option unless the exercise of such Option and the issuance and delivery of such Shares shall comply with Applicable Laws and shall be further subject to the approval of counsel for the Company with respect to such compliance.

(b) Investment Representations. As a condition to the exercise of an Option, the Administrator may require the person exercising such Option to represent and warrant at the time of any such exercise that the Shares are being purchased only for investment and without any present intention to sell or distribute such Shares if, in the opinion of counsel for the Company, such a representation is required.

16. Inability to Obtain Authority. The inability of the Company to obtain authority from any regulatory body having jurisdiction, which authority is deemed by the Company's counsel to be necessary to the lawful issuance and sale of any Shares hereunder, shall relieve the Company of any liability in respect of the failure to issue or sell such Shares as to which such requisite authority shall not have been obtained.

17. Reservation of Shares. The Company, during the term of this Plan, shall at all times reserve and keep available such number of Shares as shall be sufficient to satisfy the requirements of the Plan.

18. Shareholder Approval. The Plan shall be subject to approval by the shareholders of the Company within twelve (12) months after the date the Plan is adopted. Such shareholder approval shall be obtained in the degree and manner required under Applicable Laws.

IN WITNESS WHEREOF, the undersigned Secretary of the Company certifies that the foregoing sets forth the Idaho General Mines, Inc. 2003 Stock Option Plan as duly adopted by the Board on December 18, 2003

Vesting Schedule:

This Option shall be exercisable, in whole or in part, according to the following vesting schedule:

This Option is vested according to the following schedule:.

Notwithstanding the foregoing and anything contrary in the Plan, following an assumption or substitution in connection with a Change in Control, if an Optionee's status as a Service Provider of the Company or the successor corporation is terminated by the Company or successor corporation as a result of an "Involuntary Termination" (as defined below) within two (2) years following the Change in Control, the Optionee shall fully vest in and have the right to exercise the Option as to all of the Optioned Stock, including Shares as to which Optionee would not otherwise be vested or exercisable.

For this purpose, "Involuntary Termination" means (i) without Optionee's express written consent, a significant reduction of Optionee's duties, position or responsibilities relative to Optionee's duties, position or responsibilities in effect immediately prior to the Change in Control; (ii) without Optionee's express written consent, a substantial reduction, without good business reasons, of the facilities and perquisites (including office space and location) available to Optionee immediately prior to the Change in Control; (iii) without Optionee's express written consent, a material reduction by the Company of Optionee's base salary as in effect immediately prior to the Change in Control; (iv) without Optionee's express written consent, a material reduction by the Company in the kind or level of employee benefits to which Optionee is entitled immediately prior to the Change in Control with the result that Optionee's overall benefits package is significantly reduced (unless reductions comparable in amount and duration are concurrently made for all other employees of the Company with responsibilities, organizational level, and title comparable to the Optionee); (v) without Optionee's express written consent, the relocation of Optionee to a facility or a location more than fifty (50) miles from his location before the Change in Control; or (vi) any purported termination of Optionee other than for "Cause" (as defined below).

For this purpose, "Cause" means (i) any act of personal dishonesty taken by the Optionee in connection with his responsibilities as a Service Provider which is intended to result in personal enrichment of the Optionee; (ii) the Optionee's conviction of a felony; (iii) any act by the Optionee that constitutes material misconduct and is injurious to the Company; and (iv) continued violations by the Optionee of the Optionee's obligations to the Company after written notice from the Company of, and a reasonable opportunity to cure, such violations.

Termination Period:

This Option shall be exercisable for three months after Optionee ceases to be a Service Provider. Upon Optionee's death or Disability, this Option may be exercised for one year after Optionee ceases to be a Service Provider. In no event may Optionee exercise this Option after the Term/Expiration Date as provided above.

II. AGREEMENT

1. Grant of Option. The Plan Administrator of the Company hereby grants to the Optionee named in the Notice of Grant (the "Optionee"), an option (the "Option") to purchase the number of Shares set forth in the Notice of Grant, at the exercise price per Share set forth in the Notice of Grant (the "Exercise Price"), and subject to the terms and conditions of the Plan, which is incorporated herein by reference. Subject to Section 14(c) of the Plan, in the event of a conflict between the terms and conditions of the Plan and this Option Agreement, the terms and conditions of the Plan shall prevail.

If designated in the Notice of Grant as an Incentive Stock Option ("ISO"), this Option is intended to qualify as an Incentive Stock Option as defined in Section 422 of the Code. Nevertheless, to the extent that it exceeds the \$100,000 rule of Code Section 422(d), this Option shall be treated as a Nonstatutory Stock Option ("NSO").

2. Exercise of Option.

(a) Right to Exercise. This Option shall be exercisable during its term in accordance with the Vesting Schedule set out in the Notice of Grant and with the applicable provisions of the Plan and this Option Agreement.

(b) Method of Exercise. This Option shall be exercisable by delivery of an exercise notice in the form attached as Exhibit A (the "Exercise Notice") which shall state the election to exercise the Option, the number of Shares with respect to which the Option is being exercised, and such other representations and agreements as may be required by the Company. The Exercise Notice shall be signed by the Optionee and accompanied by payment of the aggregate Exercise Price as to all Exercised Shares. The Exercise Notice must be delivered in person, by certified or registered mail, return receipt requested, by confirmed facsimile transmission, or by such other means as the Company may permit, to the Chief Financial Officer of the Company, or other authorized representative of the Company. This Option shall be deemed to be exercised upon receipt by the Company of such fully executed Exercise Notice accompanied by the aggregate Exercise Price.

(c) Requirement of Advance Notice. For so long as the provisions of this Section 2(c) are in effect, the Optionee shall deliver the Exercise Notice to the Company at least five (5) days prior to the date on which such exercise is proposed to be effective (the "Proposed Exercise Date") and at least five (5) days prior to the termination of the Option. In addition to the requirements stated in Section 2(b), the Exercise Notice shall state the Proposed Exercise Date, and the Option shall be deemed to be exercised on the Proposed Exercise Date. Except as otherwise permitted by the Company, the Optionee's failure to comply with the requirements of this Section 2(c) shall extend the Proposed Exercise Date to a date at least five (5) days following the Company's receipt of an Exercise Notice which complies in full with the requirements of Sections 2(b) and 2(c). If the Proposed Exercise Date, as extended pursuant to the preceding sentence, would follow the termination of the Option, the Option shall terminate at the time provided in this Stock Option Agreement. The provisions of this Section 2(c) shall terminate upon the first day after the occurrence of any one of the following events: (i) Optionee and Company otherwise agree in writing, or (ii) twelve months following an underwritten public offering of the Common Stock, or (iii) a Change in Control.

No Shares shall be issued pursuant to the exercise of an Option unless such issuance and such exercise complies with Applicable Laws. Assuming such compliance, for income tax purposes the Shares shall be considered transferred to the Optionee on the date on which the Option is exercised with respect to such Shares.

3. Optionee's Representations. In the event the Shares have not been registered under the Securities Act of 1933, as amended, at the time this Option is exercised, the Optionee shall, if required by the Company, concurrently with the exercise of all or any portion of this Option, deliver to the Company his or her Investment Representation Statement in the form attached hereto as Exhibit B.

(a) Lock-Up Period. Optionee hereby agrees that Optionee shall not offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, lend, or otherwise transfer or dispose of, directly or indirectly, any Common Stock (or other securities) of the Company or enter into any swap, hedging or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of any Common Stock (or other securities) of the Company held by Optionee (other than those included in the registration) for a period specified by the representative of the underwriters of Common Stock (or other securities) of the Company not to exceed one hundred eighty (180) days following the effective date of a registration statement of the Company filed under the Securities Act.

(b) Optionee agrees to execute and deliver such other agreements as may be reasonably requested by the Company or the underwriter which are consistent with the foregoing or which are necessary to give further effect thereto. In addition, if requested by the Company or the representative of the underwriters of Common Stock (or other securities) of the Company, Optionee shall provide, within ten (10) days of such request, such information as may be required by the Company or such representative in connection with the completion of any public offering of the Company's securities pursuant to a registration statement filed under the Securities Act. The obligations described in this Section shall not apply to a registration relating solely to employee benefit plans on Form S-1 or Form S-8 or similar forms that may be promulgated in the future, or a registration relating solely to a Commission Rule 145 transaction on Form S-4 or similar forms that may be promulgated in the future. The Company may impose stop-transfer instructions with respect to the shares of Common Stock (or other securities) subject to the foregoing restriction until the end of said one hundred eighty (180) day period. Optionee agrees that any transferee of any Option shall be bound by this Section.

4. Method of Payment. Payment of the aggregate Exercise Price shall be by any of the following, or a combination thereof, at the election of the Optionee:

(a) cash or check;

(b) surrender of other Shares which, (i) in the case of Shares acquired from the Company, either directly or indirectly, have been owned by the Optionee for more than six (6) months on the date of surrender, and (ii) have a Fair Market Value on the date of surrender equal to the aggregate Exercise Price of the Exercised Shares; or

AUDIT COMMITTEE PRE-APPROVAL POLICY

I. STATEMENT OF PRINCIPLES

The Audit Committee (or if no Audit Committee has been appointed, the entire Board of Directors performing the function of the Audit Committee) is required to pre-approve the audit and non-audit services performed by the independent auditor in order to assure that the provision of such services do not impair the auditor's independence. Unless a type of service to be provided by the independent auditor has received general pre-approval, it will require specific pre-approval by the Audit Committee. Any proposed services exceeding pre-approved cost levels will require specific pre-approval by the Audit Committee.

The appendices to this Policy, which are for illustrative purposes only, describe the Audit, Audit-related, Tax and All Other services that have the general pre-approval of the Audit Committee. The term of any general pre-approval is 12 months from the date of pre-approval, unless the Audit Committee specifically provides for a different period. The Audit Committee will annually review and pre-approve the services that may be provided by the independent auditor without obtaining specific pre-approval from the Audit Committee. The Audit Committee will revise the list of general pre-approved services from time to time, based on subsequent determinations. The Audit Committee does not delegate its responsibilities to pre-approve services performed by the independent auditor to management.

II. DELEGATION

The Audit Committee may delegate pre-approval authority to one or more of its members. The member or members to whom such authority is delegated shall report any pre-approval decisions to the Audit Committee at its next scheduled meeting.

III. AUDIT SERVICES

The annual Audit services engagement terms and fees will be subject to the specific pre-approval of the Audit Committee. The Audit Committee will approve, if necessary, any changes in terms, conditions and fees resulting from changes in audit scope, Company structure or other matters.

In addition to the annual Audit services engagement specifically approved by the Audit Committee, the Audit Committee may grant general pre-approval for other Audit services, which are those services that only the independent auditor reasonably can provide. The Audit Committee has pre-approved the Audit services listed in Appendix A. All other Audit services not listed in Appendix A must be specifically pre-approved by the Audit Committee.

IV. AUDIT-RELATED SERVICES

Audit-related services are assurances and related services that are reasonably related to the performance of the audit or review of the Company's financial statements or that are traditionally performed by the independent auditor. The Audit Committee believes that the provision of Audit-related services does not impair the independence of the auditor, and has pre-approved the Audit-related services listed in Appendix B. All other Audit-related services not listed in Appendix B must be specifically pre-approved by the Audit Committee.

V. TAX SERVICES

The Audit Committee believes that the independent auditor can provide Tax services to the Company such as tax compliance, tax planning and tax advice without impairing the auditor's independence. However, the Audit Committee will not permit the retention of the independent auditor in connection with a transaction initially recommended by the independent auditor, the purpose of which may be tax avoidance and the tax

treatment of which may not be supported in the Internal Revenue Code and related regulations. The Audit Committee has pre-approved the Tax services listed in Appendix C. All Tax services involving large and complex transactions not listed in Appendix C must be specifically pre-approved by the Audit Committee.

VI. ALL OTHER SERVICES

The Audit Committee may grant general pre-approval to those permissible non-audit service classified as All Other services that it believes are routine and recurring services, and would not impair the independence of the auditor. The Audit Committee has pre-approved the All Other services listed in Appendix D. Permissible All Other services not listed in Appendix D must be specifically pre-approved by the Audit Committee.

VII. PRE-APPROVAL FEE LEVELS

Pre-approval fee levels for all services to be provided by the independent auditor will be established annually by the Audit Committee. Any proposed services exceeding these levels will require specific pre-approval by the Audit Committee.

VIII. PROCEDURES

Requests or applications to provide services that require specific approval by the Audit Committee will be submitted to the Audit Committee by both the independent auditor and the Chief Financial Officer, or the person performing such function for the Company, and must include a joint statement as to whether, in their view, the request or application is consistent with the SEC's rules on auditor independence.
