INTRODUCTION / SCOPE

Management Agreement Review NTS Realty Holdings Limited Partnership

U.S. Equities Asset Management, LLC has been retained by Shefsky & Froelich Ltd., on behalf of the Audit Committee of NTS Realty Capital, Inc., the managing general partner of NTS Realty Holdings Limited Partnership ("NTS Realty"), to provide consulting services to review and consider the reasonableness of the current Management Agreement between NTS Realty Holdings, as Owner, and NTS Development Company, its Manager. The overall objective of the consulting assignment also includes a review of the property management and other fees, charges and reimbursables allowed under the existing Management Agreement and to potentially make recommendations for revisions to the Management Agreement going forward.

Our scope of work has included a review of the existing Management Agreement, NTS Realty's Agreement of Limited Partnership and portions of its registration statement Form S-4 as filed with the Securities and Exchange Commission. We have also reviewed information provided regarding the properties owned by NTS Realty and the NTS Development Company organizational structure including its employees' job duties and costs, in order to understand the professional resources, experience and capabilities provided by NTS Development Company in performing real estate services under the existing Management Agreement. Additional documents reviewed were confidential salary information, commercial contract services language, apartment lease for The Willows Apartments, standard office lease agreement, shopping center lease, and NTS Realty employee allocations spreadsheet.

Our team has researched the markets where NTS Realty's properties reside, focusing primarily on market management, transaction, leasing, construction supervision, and various asset management fees for property types analogous to those in the NTS Realty's portfolio. Our research includes reference to our own individual contacts in the industry as well as reviews of various data provided through industry associations such as IREM (Institute of Real Estate Management), ULI (Urban Land Institute) and BOMA (Building Owners and Managers Association) for the local and regional markets including Louisville and Lexington, Kentucky; Indianapolis, Indiana; Atlanta, Georgia; and Fort Lauderdale, Florida.

Individual market resources include interviews and discussions with representatives of national and regional firms such as Equity Office, Equity Residential, BPG Properties, Ltd., Carter Companies, Colliers Turley Martin Tucker, CB Richard Ellis, Grubb & Ellis, The Webb Companies, and Tikijan Associates, among others.

Our research, along with data review, interviews, discussions and physical property and market tours has informed this report and the observations, comments and recommendations which follow in our discussion of the Management Agreement and the various types and amounts of fees and reimbursements which are reasonable to include in the Management Agreement going forward.

SITE VISITS

Site Visits

The primary purpose of making site visits to individual properties owned by NTS Realty was to establish a clear understanding of 1) the condition of the properties, the quality of their operations, and the management style of NTS Development Company; 2) how the properties are positioned in their various marketplaces; and 3) the level and breadth of professional real estate services required to maintain and enhance the performance and profitability of each asset.

On October 18, 2005, Katie Scott, Executive Vice President and Managing Director, and Dean Johnson, Senior Vice President, U.S. Equities Asset Management met with Greg Wells and toured the two residential properties, Willow Lake and The Lakes, in Indianapolis, Indiana. We met the on-site management staff and were given a tour of both properties by Gabrielle Evan, District Manager. The overall appearance, curb appeal, and landscaping of both properties appeared to be in excellent condition. We toured various market-ready apartment model units which were well-appointed. While walking the site, we observed the maintenance staff, which was very professional and courteous to the residents and visitors.

The following day, October 19, 2005, we visited the headquarters of NTS Development Company and met with its corporate executives and representatives of senior management and staff, touring the headquarters office and observing the activities, interaction and separate functions of its corporate and operating departments. All management employees we met were friendly, courteous and knowledgeable about their individual duties, the company and the industry.

We then toured all NTS Realty's properties in Louisville and Lexington, Kentucky. Again, we toured market-ready apartment units at the various residential complexes, vacant market-ready office space at selected office and business centers, as well as retail properties. At each property we visited, we noticed its special, signature features and the overall curb appeal. All of the properties were artistically landscaped; grounds clean of debris, parking lots striped and seal-coated to give the best possible appearance. Each property's amenities, club house facilities, swimming pools and management offices were presented graciously, and intelligent, service-oriented managers were proud to show their property and to convey their enthusiasm for their jobs.

On November 14, 2005, we visited the Peachtree Business Center in Norcross, Georgia. The property appeared to be highly occupied and again the NTS standards of property management and quality of on-site maintenance were experienced.

Unfortunately, damaging storms in Florida prevented us from visiting Lakeshore Business Centers I, II and II in Fort Lauderdale and we did not visit the properties in Orlando, as their sale was pending. At this point, we had visited approximately 85% of the properties and felt that we had an adequate understanding of the portfolio.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

General Observations

Under the existing Management Agreement between NTS Realty (Owner) and NTS Development Company (Manager), NTS Development Company takes on the role as owner's exclusive renting and management agent including responsibility for day-to-day operations, collections, legal actions, financial reporting and accounting, employment of management staff, lease negotiations and documentation, performing ordinary repairs and coordinating major capital work, rehabilitation and/or redevelopment projects.

NTS Development Company is expected to provide employees qualified to perform all of the services called for under the agreement, or to subcontract or engage third parties to assist in performing its duties under the Agreement.

Our study of the organizational structure of the firm, its leadership and staff establishes that the employees of NTS Development Company are very dedicated and highly capable of delivering the requisite skills to provide superior property management, leasing, legal, project management, construction supervision, maintenance, accounting and finance, marketing and support services such as human resources and information technology services.

Experienced professionals of the firm are organized in functional departments such as commercial management and leasing, multi-family management and leasing, legal, accounting, etc. Their time is allocated efficiently to properties in order to respond to the needs and requirements of each property in any given year. This organizational structure and service delivery methodology allows the company to operate flexibly, offering sophisticated human resources and management systems to a diverse portfolio of properties by type and geography. As well, the benefits of the support and leadership available to the field staff for each property are enhanced because team members of the various corporate departments of NTS Development Company retain a familiarity with the operational details and challenges of each property, yet bring a special expertise gained from working over the entire portfolio. By providing skilled, professional services through direct employees, NTS Development Company is able to eliminate, or drastically reduce, costs to the Owner for outside technical consultants, lawyers, etc. Also, a wide range of services can always be provided in a timely manner by professionals dedicated to the long-term success of each property's financial performance. By contrast, many property management companies, both regional and national, do not have full-service, readily available in-house resources in leasing, maintenance, construction, legal and marketing, particularly in markets outside of major cities. They must contract for most services, which can result in lower quality performance at higher prices.

NTS Development Company has positioned its teams to deliver high quality, comprehensive management services in all areas of its responsibilities under the Management Agreement and has set up systems to be conscientious in its attention to controlling costs to ownership. All contact with employees and executives of NTS Development, as well as our observations of the condition of each property we visited, reinforced this conclusion.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

As well, it appears that NTS Development Company is careful in its approach to leasing properties in markets where subcontracting to a local service provider should result in quicker and/or more intense market penetration, thereby potentially increasing profitability to the Owner faster. The executive leasing professionals in the commercial department retain oversight of the outsourced leasing firms and remain actively involved in the entire leasing process. Therefore, their expertise continues to provide significant value to the Owner whether NTS Development Company is the direct leasing agent or acting in a supervisory role. This is an important factor and will be addressed in our discussion of compensation, which follows.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Compensation for Real Estate Services of the Management Agreement

Based on information provided to us, the compensation structure, including various fees and reimbursements in the existing Management Agreement, was determined based on historical financial arrangements which had existed under the terms of the various partnerships which merged to become NTS Realty.

The resulting compensation structure allows fees and reimbursements for certain services required of the Manager under the Management Agreement, yet ignores others which are very common in the marketplace and are an essential part of leading real estate service provider's business models.

Our experience representing investor owners of real estate, as well as that of being a service provider to such owners, along with market research conducted by our team for this assignment, leads us to recommend that Article VI, Manager's Compensation, of the existing Management Agreement, be revised to prescribe the fees and reimbursements for each property type and service category called for under the responsibilities of the Manager as a part of the Management Agreement.

The major areas of potential compensation which can reasonably be included going forward are:

- 1) Property management fees for residential properties;
- 2) Property management fees for commercial office and business centers;
- 3) Property management fees for retail centers;
- 4) Construction supervision fees;
- 5) General Contractors Fees;
- 6) Commercial Leasing Fees; and
- 7) Disposition / Refinancing Fees

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Property Management Fees for Residential Properties

The portfolio of residential properties operated by NTS Development Company represents top quality residential product with high-end, well-maintained amenities such as club houses, extensively landscaped outdoor areas including swimming pools and private garage facilities. A knowledgeable, personal-service management style is required to attract rental prospects willing to pay premium rents and to retain such high-end tenants. As well, anticipation of capital projects and potential maintenance issues, which can have an impact on curb appeal, will give a manager / owner team an edge in the marketplace if such work can be planned and scheduled to reinforce marketing efforts and eliminate potential maintenance or marketing problems.

In researching the residential market, information was obtained from the following national and regional firms: Kensington Realty Advisors, Marquette Management, Inc., The Webb Companies, Tikijan Associates, Harbor Group Management Company, Fogelman Management Group, BPG Properties, Ltd., and Madison Apartment Group, L.P., and Equity Residential Properties. Additional research material from the Institute of Real Estate Management (IREM) – Income / Expense Analysis for Conventional Apartments.

Discussions regarding the various multi-family rental marketplaces with representatives of the national and regional firms all concluded that, given the type, location and class of the multi-family residential properties in the NTS Realty portfolio, a market management fee is five percent (5%) of collected gross rental income. This market management fee of five percent (5%) is further supported by our quantitative analysis in researching IREM's income and expense information. IREM has been obtaining quantitative information for over 49 years, with an annual research database of over 10,000 properties nationwide.

NTS Development Company, with its sophisticated, service-oriented property management field staff, supported by its corporate maintenance, engineering, construction management and marketing resources, is able to assure its existing residential portfolio remains positioned at the highest levels of its product type in each market. We observed impressive consistency in curb appeal, property cleanliness and marketability, as well as excellent communication skills and product knowledge on the part of field property managers and maintenance staff with whom we met. NTS Development Company is a high quality residential management service provider, offering access to in-house, professional real estate and construction support services beyond the norm in the industry, which is consistent with the requirements of NTS Realty's portfolio. Therefore, reasonable marketplace management fees payable going forward should correspond to that profile. We recommend a market management fee of five percent (5%) of collected gross rental income, be charged on all residential properties in the portfolio going forward.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Property Management Fees for Commercial Office and Business Centers

The commercial office portfolio of properties currently owned by NTS Realty includes very well-maintained, mid-rise, traditional office and medical office buildings originally developed in the 1980s, as well as several innovatively designed business centers easily adaptable for both office and flex space. Management of all the properties is extremely conscientious, emphasizing creative approaches to delivering repair and maintenance services, managing tenant improvement solutions and projects such as lobby renovations to maximize marketability while controlling costs of capital. Attention to detail is obvious and relationships with the tenants very positive and accommodating.

The portfolio also includes a retail component; also well-maintained. This retail component requires diligent attention to cleanliness and maintenance to maintain curb appeal and continuing leasability.

In researching the commercial office and business centers marketplace, information was obtained from the following national and regional firms: CB Richard Ellis, Cushman & Wakefield, Hines, Colliers International, OnCor International, The Webb Companies, Carter USA, Codina Group, BPG Properties, Ltd., Grubb & Ellis and Harbor Group Management Company and Equity Office Properties.

Interviews and discussions regarding the various marketplaces relevant to the NTS Realty's portfolio with the national and regional firms produced the conclusion that, given the type, location and property class of these office properties and business centers in the portfolio, a market management fee would depend on the rentable square footage of the individual commercial property. All management fees are based on gross revenue collected within the following ranges:

<u>Size</u>	<u>Percentage of Gross Revenue</u>
Up to 200,000 SF	4% to 5%
Over 200,000 SF to 300,000 SF	3½% to 4½%
Over 300,000 SF to 500,000 SF	2½% to 3½%
Over 500,000 SF	1¾% to 3%

Additional research material was reviewed from the Institute of Real Estate Management (IREM) Income / Expense Analysis for Office Buildings and Building Owners and Managers Association (BOMA) International's Experience Exchange Report (EER). BOMA has been obtaining quantitative information for over 80 years, which now encompasses over 5,000 office buildings, within 296 cities, representing over 950 million square feet of commercial properties. After reviewing all research materials, the aforementioned market management fee ranges are applicable.

We again conclude that NTS Development Company qualifies as a high quality office and business center management service provider, offering access to comprehensive services beyond the norm.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Therefore, we recommend a market management fee, based on a percentage of gross collected revenue as follows:

<u>Size</u>	<u>Percentage of Gross Revenue</u>
Up to 200,000 SF	5%
Over 200,000 SF to 300,000 SF	4%
Over 300,000 SF to 500,000 SF	3%
Over 500,000 SF	2½%

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Property Management Fees for Retail Centers

In researching the retail marketplace, information was obtained from the following national and regional firms: CB Richard Ellis, Cushman & Wakefield, Colliers International, Hines, OnCor International, Carter USA, The Webb Companies, BPG Properties, Ltd., Grubb & Ellis and Harbor Group Management Company.

Discussing the Louisville, Kentucky marketplace with the national and regional firms, all concluded that given the type, location and property class of these retail centers, a market management fee would depend on square footage of the individual retail center. All management fees are based on gross revenue collected within the following ranges:

<u>Size</u>	<u>Percentage of Gross Revenue</u>
Up to 250,000 SF	3% to 5%
Over 250,000 SF to 500,000 SF	2% to 4%
Over 500,000 SF	1½% to 2½%

Additional research material was reviewed from The International Council of Shopping Centers (ICSC) and the Institute of Real Estate Management (IREM) Income / Expense Analysis for Shopping Centers. The above indicated market management fees are further supported by our quantitative analysis in researching IREM's Income / Expense information, which is summarized in various formats. IREM, as previously noted, has been obtaining quantitative information for over 49 years, with an annual research database of over 10,000 properties nationwide.

As stated previously, NTS Development Company is a high-quality service provider; we therefore recommend a market management fee, based on a percentage of gross collected revenue as follows:

<u>Size</u>	<u>Percentage of Gross Revenue</u>
Up to 250,000 SF	5%
Over 250,000 SF to 500,000 SF	3%
Over 500,000 SF	2%

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Construction Supervision Fees

Construction supervision fees are based on a percentage of the actual hard construction costs of the specific construction project. Additionally, reimbursable expenses of the individual working on the project on a pro-rata basis, plus travel, may also be charged to the specific construction project.

The typical projects that would require construction supervision at residential properties would be exterior and interior renovations, roof replacements, parking lot replacement / overlay programs, energy retrofits or major projects such as a complete site rehabilitation program or any major capital project. Office, business centers and retail properties would have similar projects requiring technical support and construction supervision. Additional, specific projects that would be included in this category would be specific tenant improvement projects (whether performed by the landlord or tenant's contractor), HVAC replacements / retrofits, multi-tenant common corridor renovations, elevator modernization, fire / life safety upgrades, lobby renovations or any out-parcel build outs.

Some property management companies, including NTS Development Company, have in-house construction and operations professionals on staff employed specifically to provide property management teams with the support of experienced construction and project managers. These individuals maximize value for owners of real estate in terms of cost control and quality assurance within set time constraints. These technically trained specialists have extensive experience and bring a detailed, thorough approach to every project with solid backgrounds in architecture, interior design, planning, construction, contract negotiations and overall project management.

In researching the cost of such flexible and comprehensive construction and technical services with regional and national real estate companies, it is our recommendation that a market construction supervision services fee, relevant to the product types and sizes in NTS Realty's portfolio, should be five percent (5%) of the actual hard costs of each project. Also applicable would be reimbursable expenses, as previously noted.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

General Contractors Fees

A much smaller segment of real estate investment and service firms provide general contracting services. NTS Development Company offers special capabilities in this area, which give it a market edge in quick turnaround of project completion, as well as an ability to anticipate the needs of tenants and managers to solve potential problems or create special opportunities through efficient management of all levels of the construction process. These services are typically billed on a percentage fee basis. The fee basis has three specific components, which are general conditions, overhead and profit.

Typically, the reason real estate firms provide these services are to support an in-house property management group on specific construction projects. By providing this type of service, ownership may obtain a market edge over its competition directly related to lease-up timing in the tenant improvement marketplace. Additionally, when real estate property companies provide general contracting services in specific real estate markets, those companies may have the greatest flexibility to evaluate the most cost effective, bang for the buck, approach for ownership to target tenants, meet their space needs creatively and quickly, close deals and get space occupied and rent started with greater speed to market.

In researching general contractor's fees with regional and national real estate companies we conclude they fall within the following ranges:

<u>Type</u>	<u>Percentage of Hard Cost</u>
General Conditions	10% to 15%
Overhead	5% to 10%
Profit	3% to 8%

It is noteworthy to indicate that the general contracting business is priced on a supply and demand basis. By having the alternative of providing in-house general contracting capabilities, ownership should realize a marketing advantage. We recommend that a market general contractor's fee, being provided by the in-house employees, should be as follows:

<u>Type</u>	<u>Percentage of Hard Construction Costs of Each Project</u>
General Conditions	12½%
Overhead	8%
Profit	5%

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Commercial Leasing Fees

Currently, under the Management Agreement, NTS Development Company is responsible for the marketing and leasing of residential and commercial properties throughout the portfolio, including the negotiation of all lease terms and documentation of lease contracts. However, no specific commissions or fees are included in its compensation under the Management Agreement, with the exception of a provision of a one time, initial leasing fee for triple net based commercial or industrial leases of at least ten years in length. Compensation for achieving important revenue goals throughout the portfolio is through the property management fees paid under the Management Agreement.

Although the inclusion of leasing responsibilities as a part of property management fees has long been commonplace applied to multi-family income producing properties; it is not at all common for commercial property. Leasing space for the benefit of commercial owners involves constant outreach both to business owners and the brokers and agents representing them. Commercial leasing is a specialized professional activity. Lease transactions are most effectively completed by professionals actively involved in marketing to and networking with brokers and business people in each local market. Local and regional markets will have variations in accepted lease commission structures, which must be accommodated in order to maintain high occupancy of buildings at optimum rental rates. Property management fees for commercial properties are distinct from leasing fees and are often covered by separate contracts.

We recommend that NTS Realty should compensate NTS Development Company's leasing efforts and success, for the benefit of generating revenue for its portfolio, according to marketplace compensation structures.

Currently, NTS Development Company provides two commercial leasing professionals dedicated to securing revenue for NTS Realty through their own direct efforts in the marketplace or through hands-on involvement directing the efforts of leasing agents hired to lease properties in markets geographically far afield. As with other skilled professionals, NTS Development Company employees are dedicated directly to the financial success of the properties owned by NTS Realty. Having professional, experienced leasing agents, such as those provided by NTS Development Company, constantly available to search the market for the most attractive tenants and lease terms is a benefit not available from many property management service providers. Their detailed knowledge of the real estate conditions at each property, along with communication and coordination with fellow in-house property management and construction professionals, should result in the speedier closing of transactions, thereby enhancing the profitability of the portfolio.

Maximization of revenue is key to short and long term value creation for real estate investment property. We recommend appropriate leasing compensation, responsive to marketplace conventions where properties currently reside, be instituted for commercial properties.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Through our association networks and connections across the country with owners of real estate and leasing professionals representing both tenants and landlords, the following information outlines accepted leasing commission parameters in markets where current properties in NTS Realty's portfolio are located:

1) Atlanta, Georgia

For New Deals:

- When the listing agency firm completes a direct deal, the leasing commission payable is 4% of the rental due under the lease.
- When a co-operating broker is involved in the lease transaction, the co-operating broker receives 4% of the rental due under the lease and the listing agency firm receives 2% of the rental due under the lease.
- In addition, and peculiar to the Atlanta area market, for new deals, a "procurement fee" equal to one month's rent is payable to the listing agency firm on a direct deal. When a co-operating broker is involved, the "procurement fee" grows to equal one and one-half month's rent and is split between the co-operating broker (receiving one month's rent) and the listing agency broker (receiving one-half month's rent).

For Renewals:

- When the listing agency firm completes a direct renewal, the leasing commission payable is 2% of the rental due under the lease.
- When a co-operating broker is involved, both the listing agency firm and the co-operating broker are each paid a commission equal to 2% of the rental due under the lease.
- Additionally, in the Atlanta area, when an industrial lease renewal is accomplished by the listing agency firm on a direct basis, a commission of 3% of the rental due under the lease is paid.

2) Fort Lauderdale, Florida

For New Deals:

- When the listing agency firm completes a direct deal, the leasing commission payable is 4% of the gross rental due under the lease.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

- When a co-operating broker is involved in the lease transaction, the co-operating broker receives 4% of the rental due under the lease and the listing agency firm receives 2% of the rental due under the lease.
- Alternatively, as an incentive to leasing velocity, the market is now seeing a commission structure of 4% of the rent under the lease payable to the co-operating broker and, to the listing agency firm, 3% of the rent under the lease for the first five years and 2% of the rent under the lease thereafter.

For Renewals:

- When the listing agency firm completes a direct renewal, the leasing commission payable is 2% of the rental due under the lease.
- When a co-operating broker is involved both the listing agency firm and the co-operating broker are each paid a commission equal to 2% of the rental due under the lease.

3) Indianapolis, Indiana

For New Deals:

- When the listing agency firm completes a direct deal, the leasing commission payable is typically 4% of the rental due under the lease.
- When a co-operating broker is involved in the lease transaction, the co-operating broker receives 4% of the rental due under the lease and the listing agency firm receives 2% of the rental due under the lease.
- Alternatively, also present in the market, though not prevailing at this time, are leasing fees paid on a square foot basis: \$4.00 - \$5.00 per rentable square foot to the co-operating broker and \$2.00 - \$3.00 per rentable square foot to the listing agency firm. If no co-operating broker is involved, the listing agency firm would be paid \$4.00 per rentable square foot.

For Renewals:

- When the listing agency firm completes a direct renewal, the leasing commission payable is 2% of the rental due under the lease.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

- When a co-operating broker is involved both the listing agency firm and the co-operating broker are each paid a commission equal to 2% of the rental due under the lease.

4) Louisville and Lexington, Kentucky

For New Deals:

- When the listing agency firm completes a direct deal, the leasing commission payable is 4% of the rental due under the lease.
- When a co-operating broker is involved in the lease transaction, the co-operating broker receives 4% - 6% of the rental due under the lease and the listing agency firm receives 2% - 3% of the rental due under the lease.
- Alternative lease commission structures are also appearing in these marketplaces, particularly Louisville, which has been influenced by Cincinnati brokers.

For example, for a direct deal, a commission payable of 8% of the average annual net rent payable under the lease, plus 3% of the remaining net rent thereafter through the term. If a co-operating broker is involved, the co-operating broker receives the commission outlined above and the listing agency firm receives an amount equal to one-half of the co-operating broker's commission.

Definitions

1. The term Aggregate Base Rent means the aggregate amount of net base rent payable during the initial term of the lease.
2. "Base Rent Exclusions" shall mean the payments for tenant electricity, real estate tax and operating expenses, or rent due to increases in the Consumer Price Index, cancellation or penalty payments, percentage rental on retail leases, coordination payments pursuant to work letters or security deposits.
3. Aggregate Base Rent excluding Base Rent Exclusions equals "Commissionable Rent".
4. The term "Average Annual Net Rent" shall mean the Commissionable Rent divided by the number of years in the initial lease term.
5. Commissionable Rent minus Average Annual Net Rent equals "Remaining Net Rent".

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

New Leases – A leasing commission will be earned by Broker, at the time a new lease for retail space is signed by both parties during the Term or such other time period as provided in this Agreement, equal to eight percent (8%) of the Average Annual Net Rent as set forth in the lease plus three percent (3%) of the Remaining Net Rent (as defined herein).

For Renewals:

- When the listing agency firm completes a direct renewal, the leasing commission payable is 2% of the rental due under the lease.
- When a co-operating broker is involved, either the co-operating broker receives 2% of the rental due under the lease as above and the listing agency broker receives 1% of the rental due under the lease, or, becoming more common in the marketplace, as in Atlanta, the listing agency firm also receives 2% of the rental due under the lease as a commission payment.

Compensation for leasing services changes over time in all markets as leverage shifts from owners to tenants and back again, influenced by economic conditions and business and real estate cycles, however; conventions of listing agency firm commissions do not vary as often. More common is the general rule that, when a co-operating broker is involved, the listing agency firm receives one-half the commission paid to the co-operating broker. All commissions are paid to incent quality transactions and are extremely important components of energizing the value creation process for all types of commercial real estate investments.

Our research to obtain leasing compensation information included interviews and data sharing with firms such as Carter & Associates, Hines, BPG Properties, CB Richard Ellis, Equity Office Properties, Grubb & Ellis Management Services, Inc., Colliers Turley Martin Tucker and our resources through BOMA, the Building Owners and Managers Association.

We strongly recommend that NTS Realty consider compensating NTS Development Company for commercial leasing on a market-based commission basis, as its listing agency leasing service provider in all markets where its properties reside. NTS Development Company would then have the option of outsourcing the direct leasing effort to other firms as, and if, it deemed that strategy most beneficial for the Owner's interests.

We also recommend that, where leasing services are not directly performed by NTS Development Company, but rather are supervised by the firm, that consideration be given to reimbursing NTS Development Company for a reasonable allocation of an experienced professional's time for that dedicated effort, which, otherwise, would result in no transactional compensation for the firm.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Disposition / Refinancing Fees

The existing Management Agreement does not include the potential for a sale or refinancing of a partnership property to involve the fee-based representation by professionals within NTS Development Company. NTS Realty's Agreement of Limited Partnership, in Section 15.6, Transactions with Affiliates, allows short-term debt financing from the Managing General Partner or its affiliates in connection with potential acquisitions, but, in Section 15.7, Limitation on Fees, does not allow either the Managing General Partner or its affiliates to receive compensation for acquisitions, dispositions or refinancings of properties by the Partnership.

It is a fact that many firms which provide management, leasing, development and other real estate services to many clients across the county and around the world also help their clients strategically monetize and/or sell their assets to harvest value and re-deploy funds to enhance the financial performance of their portfolios of real estate assets. Because such activities are very much part of the real estate investment marketplace, we raise the question as to why professionals within NTS Development Company and/or its affiliates, who know each property in the portfolio more completely than anyone, and may be most thoroughly able to sell the attributes of any number of the assets in the portfolio to a prospective purchaser or potential financing source, would be precluded from being allowed to benefit financially from creating and closing such a transaction as long as such activity was specifically approved by the partnership?

We believe it is reasonable for NTS Realty to consider allowing affiliates of the Managing General Partner of NTS Realty to participate in such efforts, as specifically to be approved, and to be compensated for such efforts. A reluctance to pay acquisition fees is understandable. However; the culmination of management efforts to increase revenues and control expenses creatively is ultimately achieved when the Owner completes a successful disposition or beneficial financing of the real estate asset.

We recommend that NTS Realty consider adding language to the Management Agreement which would allow for NTS Development Company to represent the partnership on disposition and financing transactions as determined by the partnership from time to time as opportunities arise and/or as strategic planning and forecasting for the owned assets indicate.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Disposition Fee Structure Examples

Fees for the sale of real property in the Midwest region are typically calculated as a percentage of the gross transaction amount. Because there is no specific property transactions for which to actually provide a fee quotation, the commission percentage charged will generally vary depending upon the actual transaction size according to the following general ranges:

Transaction Size	<u>Net Percentage</u>	<u>Gross Percentage</u> *
Up to \$5 Million	4%	6%
\$ 5 – 10 Million	3%	4.5%
\$10 – 20 Million	2%	3%
\$20 – 50 Million	1.5%	2.5%
Above \$50 Million	1%	2%

*Including co-broker, if applicable

The actual percentage will vary within these ranges depending upon where the size falls within the upper and lower limits of the ranges and also the scope of the work involved. The rates shown are based upon transactions involving existing buildings, and generally will be higher for vacant land by a multiple of 150 – 200%, again depending on the size of the transaction. Large transactions (over \$100 million) may also be subject to a total dollar cap (typically \$1 million for a net fee and \$1.5 million for a fee grossed-up to include a co-broker).

In addition to the fee structure discussed above, the representative would be reimbursed for direct out-of pocket costs incurred in executing the transaction, including the cost of preparing/printing marketing materials, transportation, signage, photography, telephone, postage, etc.

MANAGEMENT AGREEMENT REVIEW & RECOMMENDATIONS

Preliminary Suggestions for Potential Re-drafting of the Management Agreement

A significant aspect of the scope of work of our consulting assignment is our commitment to assist in the drafting of a revised Management Agreement if the Audit Committee determines that any changes are necessary to the current Management Agreement.

Our major recommendations and suggestions for consideration by NTS Realty, as presented in this report, are centered on restructuring and clarifying the statement of various responsibilities of the Manager and the payment of associated fees and reimbursements commensurate with the professional services currently being provided to the partnership by NTS Development Company. We do, however, have other thoughts regarding the Management Agreement in its current form and look forward to meeting with representatives of Shefsky & Froelich Ltd. to discuss some reorganization of the document and the addition of clarifying language. Of particular need for clarification would be to address the Manager's responsibilities for the supervision of its own employees, third-party maintenance contractors, and repair and construction contractors for physical work at the properties and to clearly provide for the Manager's own general contracting capabilities and general contracting assignments for the portfolio.

We recommend that the Management Agreement be comprehensive and include clearly articulated formulas for compensation for management, leasing, construction management and other appropriate, agreed-upon fees. As well, language in the new agreement should be structured to allow flexibility in scope of work which will serve the needs of the partnership's real estate investment portfolio as it evolves to accommodate growth.

We have provided in a separate volume to Shefsky & Froelich Ltd., redacted copies of property management and construction supervision, property leasing, sales, and third party broker commission agreements, which we find to be useful references, as consideration is given to any format or structure changes for documenting responsibilities, requirements and compensation for providing comprehensive real estate services for multiple property types.

In accordance with Section 15.9 of NTS Realty's Agreement of Limited Partnership, we believe that the amount and type of fees that we recommend in this report are consistent with those customarily charged for similar services in the relevant geographical areas in which NTS Realty's properties are located and would be no less favorable to NTS Realty than if NTS Realty engaged an unaffiliated third party to provide such services. Following review of our report and the associated materials by the Audit Committee, we will be pleased to attend an Audit Committee or other meeting(s) to discuss our observations and suggestions, and, further, to assist Shefsky & Froelich Ltd. in drafting or other tasks to assist the Audit Committee or NTS Realty in the future.

Total Apartment Base (units)	125,000
Number of Communities (all)	659
Number of Communities (> 200 units)	266
Average Community Size (units)	194
Average Occupancy Rate (2005)	89.0%
Median Occupancy Rate (2005)	91.3%
Rent Growth Rate (2004 to 2005)	0.2%
Annual Rent Growth (2000 to 2005)	1.1%
"Same Store" Rent Growth (2000 to 2005)	0.9%

2005 INDIANAPOLIS OCCUPANCIES BY REGION

Sales activity has grown due to abundant available capital from the coasts and 1031 investors eager to place proceeds to defer Capital Gains Tax. High prices in the coastal markets have enticed many owners to take the profit and seek alternative investments. Comparatively, the Midwest is quite inexpensive and sounds like a great deal to these investors who just sold out at a sub-5% cap rate. This has created a tremendous demand with an increasing number of investors chasing assets. Many owners of local properties are taking advantage of the abundance of capital and high prices and selling into the strong market. Although apartment deliveries are declining due to increased construction costs and flat rents, a number of units remain in the development pipeline. The majority of these projects are either tax credit developments or high-end conventional communities located in the counties surrounding Indianapolis. Much development activity of every type is taking place outside I-465, where land is still available. These outlying areas are growing at astronomical rates. Hamilton County was ranked the 16th fastest growing county in the country. Greenwood, Avon, and Zionsville are also expanding rapidly with growth in the 10%-20% range from 2000 to 2005, and similar increases expected from 2005 to 2010.

After three years of dismal reporting, we believe the Indianapolis apartment market has begun down the road to recovery. Although concessions are still abundant, rents are stable and occupancies are trending upward. The average occupancy rate of Indianapolis properties over 200 units in 2005 is 89%, which is up 1.2% from the year prior. For the last few years, rental communities have been luring residents to booming starter-home developers. However, with Indiana now ranked second highest in the country for number of foreclosures, renters are beginning to think twice before jumping into the world of homeownership.

This report covers the Indianapolis metropolitan area.

Apartment Research R E P O R T

October 2005

Executive Summary

Employers in Indianapolis are expected to add 9,200 jobs in 2005, a 1.0 percent increase.

Growth in the leisure and hospitality sector of 1.3 percent is expected, while trade, transportation, and utilities is scheduled to increase 3.0 percent by year end

Developers are expected to deliver 690 units this year, down from 1,950 units in 2004.

Vacancy is on course to decrease 60 basis points this year to 9.9 percent.

Asking rents are expected to increase 0.5 percent, to \$622. Effective rents are anticipated to rise 1.0 percent, to \$578 per month.

The median price in the metro is up 6 percent through the third quarter of 2005 to \$35,000 per unit.

INDIANAPOLIS APARTMENT MARKET ON THE ROAD TO RECOVERY

The outlook for the apartment market is greatly improved as better economic conditions and continued influx of new residents is increasing the renter pool. Owners are also getting a reprieve this year as development activity is sharply reduced. Vacancy is expected to post a healthy drop, with rents posting a moderate gain. The better fundamentals are causing more investors to examine local assets. However, there remains a sense of cautious optimism, which is limiting price gains.

Growth Continues to Push North

The population in Hamilton County grew by 68 percent from 1990 to 2000 and is forecast to grow 5 percent annually through 2009. The Marion County population, in contrast to Hamilton County, grew by only 8 percent from 1990 to 2000 and is on track to grow by less than 0.1 percent over the next five years. The northward migration is marked by the growing wealth in Northern Indianapolis, with a median income of \$75,000, compared to Marion County's \$45,000. Northern Indianapolis has established itself as the destination for luxury apartment developers in the metro. Low development costs and high wages have pulled multifamily demand into Hamilton County, which boasts the three rapidly growing cities of Fishers, Noblesville, and Carmel. Despite the increased development activity, demand for apartments in Hamilton County is offsetting new supply and vacancy is forecast to drop by 60 basis points this year.

Indianapolis Officials Seeking Regional Identity

City officials are hoping large scale developments and renovations to structures will improve the image of downtown Indianapolis and lure more residents to the area. The recently approved stadium and expansion of the Indiana Convention Center is an example of the city's commitment to regional growth. City officials are following the advice of local economy experts, who have stated that an enhanced downtown can greatly improve the regional economics and keep housing builders interested in the area. The Circle Centre Mall development is a prime example of a project that helped fuel a boom in demand for the downtown housing market. Since 1995, the Centre has spurred more than sixty-three housing developments, representing nearly 3,000 housing units. Development will continue into the future as 1,100 condos are forecast to be developed in the area over the next three years.

vacancy

0.5% Increase
in asking rents

Construction

Apartment construction in Indianapolis is expected to total 690 units this year, down from 1,950 units in 2004. The Southwest/Johnson submarket has been one of the more active development locations this year. The largest development in the metro, the 192-

unit Ashbury at Southern Dunes Apartments, was completed earlier this year in the sub-market. In another part of the submarket, Pinebrook apartments in the city of Greenwood more than doubled its size, adding 85 units for a total 155 units. The Southwest/Johnson will remain an active area of the metro in 2006, as there are currently 825 apartment units slated for delivery. In other parts of the metro, there are 200 affordable housing units being added to the Nobleville submarket. While this could siphon some of the demand from market-rate housing properties in the Hamilton County submarket, the overall impact on the county is expected to be minimal.

Vacancy and Rents

Despite an extremely competitive single-family housing market, vacancy at Indianapolis apartments is forecast to post a 60 basis point drop to 9.9 percent this year. While this represents a solid improvement in absorption, most owners will achieve little gain in rents this year since the overall vacancy rate is still quite high. As a result, asking rents in Indianapolis are forecast to end the year up just 0.5 percent over 2004 to \$622 per month. There are some pockets of the metro outperforming, including the popular Boone/Hendricks submarket which registered a 100 basis point decrease in vacancy through the third quarter to 5.6 percent. This allowed owners in the submarket to increase asking rents by nearly 2 percent to \$755 per month, during the same time period. These are the highest asking rents in the county, which are justified by the submarket's lofty median household income of \$77,500, compared to \$50,000 for the Indianapolis metro. Other areas posting stronger growth than the metro are in the suburbs, including the Far Northeast and Hancock/Shelby submarkets. Asking rents in the Far Northeast are expected to grow by 1.8 percent this year to \$560 per month, with owners in Hancock/Shelby expected to post a gain of 1.5 percent to \$615 per month.

Sales Trends

Investment activity has been occurring with a cautious sentiment, which has kept price growth mild despite the improving fundamentals. The median price has increased six percent so far in 2005, to \$35,000 per unit. Nevertheless, there have been some high-priced deals selling in the better performing areas of the metro, which includes Hamilton County and other northern submarkets. The largest deal of the year so far recently took place in Castleton, where an out-of-area investment group paid nearly \$74,000 per unit for the 996-unit Amli at River Bend. The northern areas have also been targeted by condo converters looking to take advantage of the strong housing demand. For example, the 186-unit Crescent at West Clay in Carmel was purchased for condo conversion in May, selling for more than \$80,000 per unit. Price appreciation, especially in the outlying northern areas, is expected to accelerate in the coming year as fundamentals continue to strengthen.

HOT TOPICS

- The Central Business District experienced 184,654 SF of positive absorption.
- Humana announced the addition of 1,100 new jobs to help support its increased Medicare operations.
- The Rawlings Group will, in two years, move its headquarters from Waterfront Plaza to a planned 150,000 SF building in a 1,000-acre Oldham Co. business campus.
- The Veterans Administration completed its relocation into Waterfront Plaza.
- Hilliard Lyons announced that it will relocate to PNC Plaza, owned by parent company PNC. In 2006, The Hilliard Lyons Center will be sold as a result.

www.cbrelouisville.com

The Louisville office market showed an increase in both leasing activity and absorption during the third quarter. The activity was experienced market-wide and resulted in a 1% decline in the overall availability rate to 20.0%. Both Class A and Class B properties participated in the increased activity, with declines in the availability rates for the overall Class A market of 0.7% to 13.4% and a decline in the overall Class B market of 1.4% to 24.9%.

The lion's share of the positive absorption and leasing activity occurred in the Central Business District. Recently announced expansions by Humana had a dramatic impact on two projects in the submarket and expansion plans by two other employers contributed to significant gains in another building. All told, the submarket experienced nearly 200,000 square feet of positive absorption, with approximately 160,000 square feet coming in the Class B market and 40,000 square feet in Class A properties. This activity served to further improve occupancy rates in both building categories, with Class A availability rates declining by 1.1% to 14.8%, and Class B availability rates declining by an impressive 3.0% to 27.2%. Average lease rate trends in the submarket were mixed however, with the Class A rates declining \$0.72 to \$19.22 per square foot, while Class B rates improved by \$0.26 to \$13.26.

The Hurstbourne Parkway/Shelbyville Road submarket showed improvement for the quarter, with slight losses in the Class A market offset by larger gains in the Class B market. The overall availability rates declined 0.7% to 21.2%. Reversing recent trends, the Class B submarket reported a decline in the availability rate of 2.1% to 31.8% on the strength of over 47,000 square feet of positive absorption. Class A availability rates also reversed recent trends to show a slight worsening of 0.6% to 10.7%, with negative absorption of over 14,000 square feet. Average asking rates nonetheless showed improvement in the Class A properties by gaining \$0.16 to \$17.15 per square foot, while Class B declined by \$0.17 to \$13.01.

Other significant activity came in both the East County and Interstate 71/Brownsboro Road submarkets. The East County submarket reported an increase in the overall availability rate due to the introduction of a 92,000 square foot building formerly occupied by Anthem in Blankenbaker Crossings. The Interstate 71/Brownsboro Road submarket tightened dramatically in both Class A and B segments, due to several small to medium-sized transactions in a statistically smaller submarket.

LOUISVILLE SUBMARKET MAP

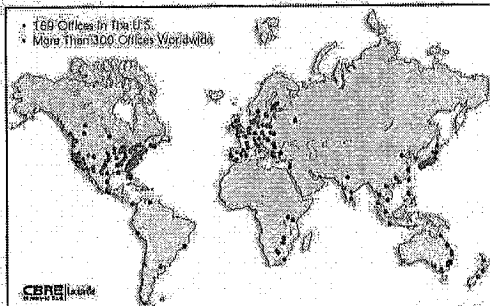

LOCAL MARKET OUTLOOK

We continue to feel that the Louisville office market will continue to improve over the coming months. Recently announced transactions in the Central Business District will positively impact the numbers over the next two quarters. The multi-housing momentum in the CBD should continue to result in the conversion of underutilized Class B and Class C properties to a residential use. The new hotels, entertainment venues, exciting housing, etc. should continue to build excitement in Louisville's CBD over the coming years.

The statistics for the suburban market should improve until speculative projects come on line. We anticipate that two or more substantial speculative buildings will begin construction during the next two quarters. The lease up or sale of the large blocks of space vacated by Anthem, Citigroup and others will determine the strength of the recovery in the market.

Harry K. Moore Co. Colliers Market Report Louisville, Kentucky

Mid-Year 2005

Office Market Remains Stable

- Rental rates are stabilizing as vacancy declines.
- Speculative office development is expected in the suburban market.
- East Main Street activity and 4th Street Live enhance vibrancy in downtown Louisville.

HARRY K. MOORE CO.
Commercial Real Estate Services Since 1968

Overview

Vacancy Rate:	17.92%	
Absorption 1st Half 2005:	131,703 SF	
Average Rental Rates:		
CBD:	Class A: \$19.43/SF	Class B: \$13.65/SF
Suburban:	Class A: \$17.61/SF	Class B: \$14.29/SF

We are pleased to present our 2005 Mid-Year Real Estate Review and Forecast of Metro Louisville's Office Market. This report reflects Harry K. Moore Co. Colliers' continuing commitment to providing accurate and timely market knowledge to our clients and other interested parties.

The outlook for the Louisville office market for the balance of 2005 continues to be positive. Metro Louisville has seen an uptick in activity over the past 18 months and Harry K. Moore Co. Colliers expects this trend to continue, but anticipates growth to occur at a cautious pace.

Positive economic trends continue to impact Louisville, and as a consequence, the office market is rebounding. Growth, however, remains measured. A lack of new speculative construction, along with expansions of several local companies, has helped push the overall market vacancy rate below 18%. In fact, due to the shortage of large blocks of space, several companies have had to, or will have to, consider build-to-suit options. The Downtown market in particular is improving. Even with the addition of Brown & Williamson's 215,000 square feet of Class A space to the market, the downtown submarket saw only modest increases in vacancy rates. With more optimistic corporate sentiment about the economy, we expect to see expansions, consolidations of multiple locations and relocations to newer buildings. The key factor for continued improvement in the office market is continued economic growth.

We expect 4th Street Live, the new Marriott Convention Hotel and the new Waterfront developments to increase the vitality of downtown Louisville and continue to have a positive impact on Louisville's Central Business District.

Harry K. Moore Co. Colliers Market Report Louisville, Kentucky

CBD

Vacancy Rate:	21.47%
Absorption 1st Half 2005:	+22,962 SF
Average Rental Rates:	\$16.81/SF

Despite the addition of the Brown & Williamson space to the market, Louisville's CBD experienced only modest overall increases in vacancies. Many companies in the Downtown market are solidifying their leasehold positions through renewals and/or expansions. We expect this positive trend to continue in the Downtown market for the balance of 2005 and into 2006.

While landlords remain aggressive in the pursuit of tenants, rental rates have begun to stabilize. Class A quoted rental rates range from \$15.25 to \$26.00 per square foot, with effective full service rental rates generally in the \$17.00 to \$20.00 per square foot range, including a full complement of tenant improvements. Currently, the average quoted full service Class B rental rate is \$13.65 per square foot.

CBD Class A

Vacancy Rate:	12.96%
Absorption 1st Half 2005:	+122,471 SF
Average Rental Rates:	\$19.12/SF

The Class A Central Business District market has seen strong improvements in 2005. The vacancy rate increased only moderately to just over 12% for the first half of 2005. However, a vacancy rate increase was expected with Brown & Williamson's departure. In fact, the Brown & Williamson departure has not had as negative an impact on the CBD market as anticipated. Effective rental rates remained stable during the past six months because direct vacancy and sublease space maintained continued pressure on landlords.

CBD Class B

Vacancy Rate:	26.68%
Absorption 1st Half 2005:	99,509 SF
Average Rental Rates:	\$13.65/SF

The Class B downtown vacancy rate posted a decline from 28% in 2004 to just over 26% for the first half of 2005. However, corporate reorganizations, suburban relocations, and "move up" relocations to Class A properties all contributed to the continued sluggish movement in the Class B market. Just as it has in the suburban market, Class B space will lag behind Class A space in filling vacancies.

Harry K. Moore Co. Colliers Market Report Louisville, Kentucky

Suburban

Vacancy Rate:	14.03%
Absorption 1st Half 2005:	154,665 SF
Average Rental Rates:	\$16.03/SF

Louisville's suburban market continues to perform better than the Central Business District market, showing a decrease in the vacancy rate from 15.9% at the end of 2004 to just above 14% during the first half of 2005. The suburban market continues to experience positive absorption. This growth is due largely to a continually improving economy. An absence of any major new construction and a limited number of large blocks of contiguous space kept vacancy numbers on the decline, forcing several companies to consider build-to-suit options. As market sentiment improves, 2005 could see new construction start as the market continues to improve, and the expected economic recovery continues to provide positive results for the suburban office market.

Rental rates remain aggressive as landlords continued to compete for tenants. Class A quoted rental rates range from \$16.50 to \$19.50 per square foot, with effective full service rental rates generally in the \$16.00 to \$18.00 per square foot range, including a full complement of tenant improvements. Currently, the average quoted full service Class B rental rate is \$14.28 per square foot.

Suburban Class A

Vacancy Rate:	12.25%
Absorption 1st Half 2005:	28,941 SF
Average Rental Rates:	\$17.61/SF

The Class A suburban market continues to show improvement in 2005. The Mid-Year 2005 vacancy rate of 12.25% is a decline from the 13.11% vacancy rate at the end of 2004. Class A suburban landlords responded to the market's high vacancy levels by avoiding speculative construction projects, lowering existing rental rates and providing aggressive incentives to strong credit tenants. However, with most of the large blocks of space being leased, we expect developers to begin speculative construction by the end of 2005.

Suburban Class B

Vacancy Rate:	16.00%
Absorption 1st Half 2005:	125,725 SF
Average Rental Rates:	\$14.28/SF

Office buildings in the suburban Class B market are finally beginning to see a decline in vacancy rates as the Class A market begins to tighten. This submarket saw vacancy rates decline to 16% in the first half of 2005, down from over 19% at the end of 2004. The positive shift in the market can be largely attributed to the decline of "move up" relocations to suburban Class A buildings, as these buildings continue to fill. One problem spot is the Linn Station Road submarket, which will see the departure of Anthem by the end of 2005, along with the expected departure of both Kroger and ResCare. These companies will open up well over 250,000 square feet of Class B space.

Outlook

The office market continues to be very favorable to tenants. In the first half of the year, there have been numerous leases brokered and restructured under very favorable terms, particularly by agents who are representing tenants with strong credit, and who are willing to offer landlords longer lease terms. In the suburban market, where demand is catching up with supply, we expect rental rates to strengthen. For the near term, however, landlords will likely continue making concessions to attract tenants and retain current occupants. Some areas like the Linn Station Road submarket, with high vacancy rates and supply continuing to exceed demand, will generate lower effective rates and incentives for prospective tenants. Due to the lack of supply of large blocks of contiguous space, we expect to see some limited speculative development in the suburban market. Vacancy rates are expected to continue to post modest declines in 2005. Absorption should remain positive as indicators point to moderate but sustained economic improvement.

DEFINITIONS:

Absorption: The difference in physically occupied space within a given time period for a particular market.
Available Space: All spaces within established criteria physically vacant in a given market. For the purposes of this report, we have distinguished between direct and sublease available space only for the office discipline. Any space currently under construction or under substantial rehabilitation is not included in these totals, nor are Class C facilities as we seek to measure competitively available space.
Build-to-Suit: A developable parcel that an owner will improve to suit the needs of a particular tenant. Construction does not begin until a tenant has committed to the property.
Vacancy Rate: Available space divided by the total inventory.

OFFICE

Class A: Highest quality buildings in given market. Finishes, services, amenities and systems are first-rate. Rentals above market average.

Class B: Buildings with average services, image and rentals for market.

CBD: Central Business District. Generally, the "Downtown" of a city.

Direct Vacant Space: Physically vacant space for which no rent is being collected.

Method of Selections and Disclaimer: Inventory included office buildings greater than 20,000 SF including owner-occupied buildings but exclude office condominiums, hospitals, medical and government buildings. Information contained in this report is from sources deemed reliable including broker availability lists, brochures, publications (e.g., Business First) and broker market knowledge, including verbally confirmed availabilities, but its accuracy or its completeness is not guaranteed.

The Metro Louisville Industrial market continues to display positive growth and healthy trends. The construction of over three million square feet of Class A industrial product continues to progress, with over two million scheduled to be completed by the end of the first quarter 2006. The overall availability rate again experienced a decrease and fell from 9.4% in the second quarter to 7.6% in the third quarter. The continued strengthening of the market was also reflected in over 700,000 SF in net absorption for industrial properties. For the first time this year, the average asking lease rate for industrial properties did not decrease. Instead, the average asking lease rate slightly increased from \$2.53/SF/YR to \$2.54/SF/YR. This could indicate an end to the declining rates experienced over the past several years and in light of the decreasing availability, this could indicate a future increase in market rates.

The Downtown submarket experienced the largest decrease in the availability rate as it fell from 15.0% to 11.6%. The 3.4 percentage point decrease in the Downtown submarket can, in large part, be attributed to the acquisition of the 1.2 million SF Phillip Morris tobacco processing warehouses by a private investor from Florida. A portion of this property was subsequently sold off to local investors who operate a public warehousing operation.

No plans are being made to actively market the excess space not currently being utilized. The Downtown submarket accounted for over 700,000 SF of the 1.5 million square feet of industrial gross leasing activity in Metro Louisville in the third quarter 2005.

UPS again made news as they continue to have a profound effect on the Louisville economic landscape. UPS Supply Chain Solutions officially opened their new 517,000 SF health care distribution facility at the Louisville Metro Commerce Center. Due to the high demand for health care logistic services, they also announced that they will buy a second warehouse at the Commerce Center. The second warehouse, which will serve as a distribution hub for the health care and high-tech industries, is an 822,500 SF warehouse currently under construction, expected to be completed in May 2006. The two distribution facilities combined are expected to employ more than 600 people.

"I think we can make Louisville a health care capital," said Rocky Romanella, president and general manager of UPS Supply Chain Solutions' Americas region. Romanella said that he feels the facility can help UPS Supply Chain Solutions' health care clients meet the many operational and regulatory challenges they face."

AVAILABILITY RATE VS. LEASE RATE

Market Statistics – Buildings 100,000 SF And Over* +

LOUISVILLE KY

Third Quarter 2005

The debate over a downtown sports arena has focused attention on the need to reinforce redevelopment efforts in the Central Business District. The business community has shown overwhelming support for a new downtown arena.

A renewed sense of energy in the CBD is paying dividends. Year-to-date office absorption of 101,841 sf is at it's highest level in over almost ten years.

Market conditions continue to improve as class A suburban vacancies have dropped from 24.2% to 15.1% over the past eighteen months. The market may call for new product in 2006 as large blocks of class A space become scarce.

Market Highlights

	CBD	Non-CBD
Overall Vacancy Rate	21.3%	15.1%
Direct Class A Asking Rental Rate	\$18.36	\$17.55
YTD Leasing Activity	288,102	737,979
YTD Construction Completions	0	240,000

SF Under Construction	0	149,500

It has been two years since the city of Louisville merged with Jefferson County to form one entity called Louisville Metro. During that period, there has been quite a change in the economic landscape of what is now referred to as the nation's 16th largest city.

The elimination of the old city boundaries created not only a geographic unification, but also an economic synergy. This alliance has helped the newly expanded Louisville Metro Government focus its efforts on a strategy to retain, expand and attract businesses that provide quality employment opportunities and also to revitalize the downtown area.

One clear example involving the retail market in the downtown revitalization effort

is the success of Fourth Street Live! Although conceived before the city/county merger, this new hotspot in downtown Louisville, that attracts hundreds of consumers each day, has been enhanced by the increased focus on reviving the downtown area.

The merger has also supported the retail market through the Corridors of Opportunity in Louisville (COOL) program. Through this program, the Metro Government has fostered additional retail offerings along major roadways such as Bardstown Road at the Douglass Loop and the Eastern Parkway/Bardstown Road intersection. Specifically, COOL's goal is to identify underutilized or vacant retail space and convert those areas into vibrant neighborhood assets.

The availability rate for the Louisville area at the end of 2004 was 6.9 percent with the average asking lease rate at \$8.26 for big box retailers and \$15.12 for small shop spaces.

As possible evidence to the revitalization of the downtown area, the availability rate in the Central Business District was the lowest among the submarkets at 5.4 percent.

LOUISVILLE RETAIL AVAILABILITY RATE

AVAILABILITY RATE - BY SUBMARKET

Sub-Market	Rentable Area (SF)	Availability Rate %	Average Asking Lease Rate - Big Box (\$/SF/YR)	Average Asking Lease Rate - Small Shop (\$/SF/YR)
Northeast	14,323,012	5.6%	\$11.08	\$17.00
Southern Indiana	6,649,583	7.1%	\$7.35	\$12.00
South Central	6,001,702	8.8%	\$4.65	\$12.00
Southwest	3,657,270	9.0%	\$7.00	\$12.24
Downtown/Central	662,222	9.3%	N/A	\$12.50
Central Business District	649,087	5.4%	\$17.50	\$25.00
Overall Louisville Market	31,936,876	6.9%	\$8.26	\$15.12

Unemployment rates in the Louisville Metropolitan Statistical Area (MSA) and in Kentucky continued their downward trend in the fourth quarter 2004.

In the Louisville MSA, during 2004, significant job growth was seen in manufacturing, non-durable goods, government, and educational services. Also in 2004, the overall workforce grew from 552,399 to 554,141 in the Louisville MSA.

AVERAGE RETAIL ASKING LEASE RATES (\$ SF/YR) LOUISVILLE, KY VS. OTHER MARKETS

The overall average asking lease rate of big box and small shop spaces in Louisville, at \$11.62, is slightly lower but comparable to other similarly sized cities in the region. As expected, overall average asking lease rates in larger cities such as Chicago and Miami are much higher and are nearly twice that of the Louisville market.

U.S. RETAIL VACANCY OVERVIEW RETAIL VACANCY EXPECTED TO INCREASE MODERATELY*

Retail vacancy rates continue to be quite low throughout the U.S. A combination of continued new supply and an expected decline in the rate of net absorption is likely to push retail vacancies closer to nine percent by the end of 2007.*

*Source: Yondu Wharton Research, a business unit of CB Richard Ellis

LOCAL MARKET OUTLOOK

2005 appears to be positioned very well with new projects. In the Northeast submarket, Old Brownsboro Crossing is slated for development. There will also be considerable activity in the Clarksville, IN market with the development of Waterford Park, Waterford Park South, New Bass Pro Shop, Green Tree Mall, and Jeffersonville Town Center. Continuing this trend on the South side of Louisville, Hagun Development is planning a Wal-Mart Supercenter at I-65 and Outer Loop.

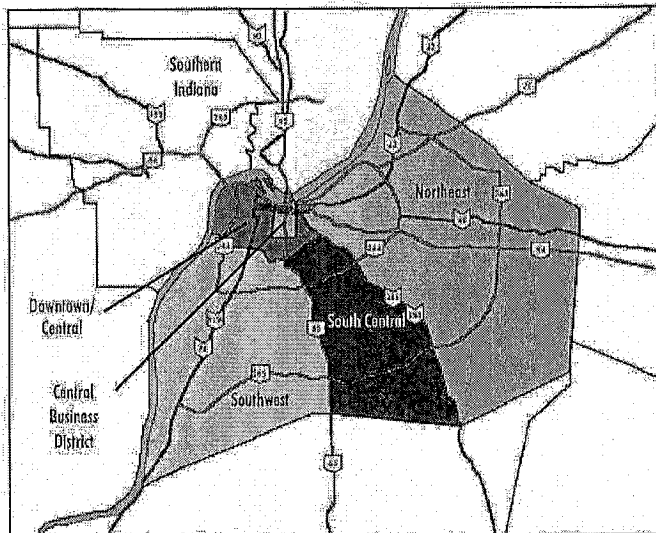

Existing retailers such as Kroger and Wal-Mart continue with aggressive expansion plans. Louisville is also on the radar screens of several new retailers as well as out-of-town developers.

The investment sale market is extremely interesting as there are more investors interested than product available. We expect no change in the foreseeable future.

AVERAGE ASKING LEASE RATE

Rate determined by multiplying the asking net lease rate for each building by its available space, summing the products, then dividing by the sum of the available space with net leases for all buildings in the summary.

NET LEASES

Includes all lease types whereby the tenant pays on agreed rent plus most, or all, of the operating expenses and taxes for the property, including utilities, insurance and/or maintenance expenses.

MARKET COVERAGE

Includes all competitive retail buildings 35,000 square feet and greater in size.

NET ABSORPTION

The change in occupied square feet from one period to the next.

NET RENTABLE AREA

The gross building square footage minus the elevator core, flues, pipe shafts, vent ducts, balconies, and stairwell areas.

AVAILABLE SQUARE FEET

Available Building Area which is either physically vacant or occupied.

AVAILABILITY RATE

Available Square Feet divided by the Net Rentable Area.

Apartment Research

R E P O R T

September 2005

Executive Summary

While economic recovery in Louisville has been relatively slow, employment is headed in the right direction. This year, employers are on track to add 5,100 jobs, a 0.9 percent increase.

Louisville's population is forecast to reach 1.1 million residents this year, a 0.5 percent gain from 2004.

Developers are expected to deliver 450 units this year, up 30 percent from 2004.

Increased demand spurred by job and population growth will support a 50 basis points decline in vacancy this year to 8.5 percent.

Asking rents are expected to increase 1.5 percent to \$598 per month by year end. Effective rents are on course to post growth of 2 percent for the year, as owners ease concessions.

Improved performance among local properties is supporting price appreciation. Relative to other markets, however, Louisville is still affordable, with the median price at less than \$50,000 per unit.

LOUISVILLE APARTMENTS SHOWING SIGNS OF RECOVERY AMID ECONOMIC GROWTH

The Louisville apartment market will continue to show signs of recovery as the local economy improves. The regional economy is strengthening and becoming more diversified, which is supporting growth even as the key manufacturing sector remains relatively weak. Demand for apartments remains healthy this year and vacancy has declined year to date in spite of several new projects coming online. Owners, while hesitant to increase asking rents in order to preserve occupancy, have been successful in reducing concessions. Investors have been active this year, with both sales velocity and prices increasing. Activity will continue at a healthy pace through the balance of the year as market fundamentals remain in check.

Economy & Housing Market

Payrolls are on track to rise 0.9 percent this year with the addition of 5,100 positions, up from a gain of 4,300 jobs in 2004. Employers in the hospitality, and education and health services sectors are leading growth. Combined, these sectors will add approximately 3,000 jobs this year, nearly 60 percent of the total. The manufacturing sector appears to be stabilizing after shedding almost 8,000 jobs over the past three years. Current forecasts suggest manufacturing will begin to post employment gains early next year. The outlook for Louisville's important transportation industry has also improved with the announcement of United Parcel Service's new air-freight service center. The \$82.5 million development will be the central hub for UPS' air-freight business and is expected to create 1,000 new jobs over the next 10 years. Locally based Humana is also expanding its operations in Louisville. In June 2005, Humana announced plans to increase local employment by just under 20 percent. New positions are being created in response to the company's growing Medicare segment and will be focused in service, technology and sales.

In recent years, Louisville's single-family housing market has grown at a relatively slow rate. This year, relatively high affordability is boosting demand, fueling price appreciation. The median price of an existing home is on track to increase by 11 percent this year to \$140,500, after registering gains of less than 2 percent annually during the past two years

The majority of units coming online this year are in east Jefferson County. The 236-unit Blankenbaker Crossing Apartment Complex, located in the Chenoweth/Taylorsville submarket, accounts for more than one-half of the total units scheduled for delivery this year. Construction is expected to pick up steam in the coming years, as there are approximately 700 units underway and 2,500 units in planning, though the majority have yet

to report a target start date. Similar to the national trend, buyer demand for condominiums in the metro has increased. This year developers are expected to deliver 1,150 condos to the Louisville market. There are an additional 5,300 condos in various stages of planning.

Vacancy and Rents

After dipping 60 basis points to 8.4 percent during the first half of the year, vacancy posted a minor increase of 10 basis points during the third quarter. We expect vacancy to remain relatively flat through the balance of the year as accelerating job growth offsets the seasonal rise in vacancy that is typically recorded in the winter months. Within the metro, the eastern submarkets have been the primary benefactors of stronger job growth. Vacancy in the Chenoweth/Taylorsville submarket has improved 120 basis

points over the past 12 months to 9.9 percent, while vacancy in the Northeast Jefferson County submarket has decreased 100 basis points, to 7.5 percent.

By year end, we expect asking rents to reach \$598 per month. The average asking rent is currently up only 0.8 percent from last year as owners have focused on maintaining and improving occupancy. Louisville is one of the more affordable housing markets in the region, and some renters have opted for homeownership, hindering more significant improvement in vacancy and rents. Effective rents have fared slightly better and are up 1.1 percent from last year to \$556 per month. Effective rent growth has been particularly strong in the Southwest Jefferson County and West Central submarkets as limited new construction and rising demand in these areas is allowing owners to reduce concessions. Both of these submarkets have posted effective rent increases of more than 3 percent from last year, and additional gains are expected well into next year.

Sales Trends

Sales activity will remain healthy through the remainder of the year, with prices expected to climb further as investors take note of economic improvement and solid market fundamentals. The median price per unit in the \$5 million and greater segment of the market has increased 27 percent over the last 12 months to \$49,400 per unit, but is still affordable when compared to major metros across the nation. Eastern Jefferson County has been the most active trading area so far this year. Notable deals in this area include the 260-unit Fenwick Place apartments, which sold for \$87,500 per unit, and the 260-unit Shelby Crossing apartments, which traded for \$49,500 per unit. We expect the eastern portion of the metro to remain high on investors lists as it continues to post strong improvement in revenues over the forecast horizon.

- After two negative quarters, Buckhead posted positive absorption in third quarter, a welcomed sign for developers seeking to construct new office space here. Nonetheless, the submarket has lost more space than it has filled for the year.
- Development activity in Buckhead is on the verge of taking off. New office projects and high-rise residential are under construction or in the planning stage. Competition for the next Buckhead skyscraper is getting thick. Cousins is first off the mark with grading already begun for their 532,000 square foot "Terminus" office tower.
- Despite the significant absorption in the past three quarters, Buckhead still remains an attractive location for prospective tenants. Activity should begin picking back up in the next couple of quarters.

In the News: Buckhead's New Office Towers

The next wave of office development has already hit the Buckhead submarket. In the past year, five out of six possible developers have drawn up plans for new office towers to alter the Buckhead skyline. Of these developers, Cousins Properties is the first to go under construction. The new 'Terminus' office tower will be 25-stories with 532,000 square feet set to deliver in the second quarter of 2007. Second in line will be Regent Partners with a 47-story office tower consisting of 480,000 square feet of office along with 21 luxury condominiums. The project will be located on Peachtree Road at Tower Place and will begin construction in third quarter 2005. The delivery date is scheduled for third quarter 2007. Remaining developers aggressively pursuing pre-leasing for their projects include Pope & Land and Trizec Properties. Equity Office Properties is also marketing a second building at Prominence for preleasing. Needless to say, the competition is fierce amongst all seeking to fill their prospective buildings.

- 25-story, 532,000 SF office building with approximately 65,000 SF of ground level retail under construction by Cousins Properties.
- Located in the heart of Buckhead at the northwest corner of the Peachtree and Piedmont intersection.
- Scheduled for delivery in the second quarter of 2007.
- Currently 42% leased and 60% committed.
- Will feature a public gathering space covered with a translucent canopy of glass and steel at the base of the office tower.

MARKET PULSE

Office

Industrial

ATLANTA, GA

Third Quarter 2005

One of the highlights of the Atlanta office market this year has been the overall resurgence in demand, as nearly 3.0 million square feet (msf) has been absorbed year-to-date. The bulk of these gains are concentrated in suburban class A buildings, as Central Perimeter has absorbed 850,584 sf and Georgia 400 has absorbed 368,253 sf year-to-date.

After remaining dormant in recent years, there has been a significant increase in office construction in the past few quarters. While construction completions remain limited, there are 2.5 msf under construction as of third quarter, the majority of which is concentrated in well-leased projects in Atlanta's urban core.

Limited new supply and resurgent demand continue to erode existing vacancies. As of third quarter, Atlanta's overall vacancy rate was 19.1%, down from 21% a year ago. Sublease space has also decreased significantly from more than 5.0 msf two years ago to 2.1 msf. Vacancy rates, while improving, are still soft enough to continue to put downward pressure on overall weighted average rental rates, for now holding off the increases typical of a widespread market recovery.

THIRD QUARTER 2005

QUICK STATS

		Change from last *
	Current	Yr. Qtr.
Vacancy	21.1%	↓ ↓
Lease Rates	\$19.81	↓ ↑
Net Absorption	1,110,176	↑ ↑
Construction	2,903,296	↑ ↑

* The previous third indicates over this specified time period and does not represent a historical or negative value. (i.e., absorption could be negative, but will represent a positive trend over a specified period.)

HOT TOPICS

- Absorption posts strongest single-quarter performance in nearly five years.
- Vacancy continues to decline steadily.
- Lease rates are on an upward trend.
- Sublease space still receding by an average of half a million square feet a quarter.

In 2004, the Atlanta office market saw its first signs of recovery, with declining vacancies and improving occupancy growth. The first nine months of 2005 offer clear evidence that Atlanta's office market recovery is solidly underway. Absorption continues to be positive, with the strongest single-quarter performance since 2000. In addition, vacancy continues its decline, rental rates are beginning to move upward, and the amount of sublease space on-market has dipped by an average of about 500,000 square feet each quarter for nearly two years.

Of course, the market engine has yet to reach full speed. While the vacancy rate is sliding downward, it remains above 20 percent as it has for the past three years, and shows no sign of approaching the historic lows seen five years ago, anytime soon.

While sublease space recedes, it remains a factor in some submarkets, particularly North Fulton, Northwest, and Central Perimeter. And while construction remains below development highs of the 1990s, development is certainly on the rise, with more than twice as much space under construction today as at the end of 2004. The bulk of the nearly three million square feet under

construction is found in the Central Business District; significantly more than half of the in-town space under construction is still available for lease.

Atlanta's office market shows every sign of coming out of its "recovery mode" and moving into the next expansion cycle. Barring a new "next big thing" to drive Atlanta's economic expansion, it's difficult to imagine

the market experiencing the kind of growth seen during the high-tech boom in the late 1990s. Without that kind of activity, Atlanta is reliant on those factors that drive most office markets — expansions and relocations. Current growth is being driven in large part by expansions; some tenants are adding space to meet current needs, some in expectation of coming growth, and to take advantage of current

rents before they rise further. There are also reports of corporations considering moves to Atlanta, but it remains to be seen which will come to fruition, and how much growth they will bring. Still, 2005 is undeniably on track to improve on recent annual performance and provide the Atlanta office market with its best year since 2000.

Atlanta's office market shows every sign of coming out of its "recovery mode" and moving into the next expansion cycle

UNEMPLOYMENT RATE

Atlanta	5.2%
Georgia	5.2%
US	4.9%

Source: Georgia Department of Labor

The local economy continues to offer mixed signals to market watchers, just as the national picture does. Unemployment rates for both Atlanta and the state of Georgia dropped a bit over the course of the third quarter, but this year is still the first time that the state's unemployment rate has topped the comparable national rate since 1989. State Labor Commissioner Michael Thurmond pointed out that "Georgia's aviation, tourism and convention businesses were hard hit by 9-11, and the latest numbers show we clearly have not recovered as quickly as the nation as a whole." While it's too soon to know how the year will end, factors worth watching include the influx of hurricane evacuees to the area; the relocation of some events from New Orleans to Atlanta, including several conventions and the Singer Bowl; the opening of the new Georgia Aquarium; holiday consumer spending; and, of course, the fate of Delta Airlines as it attempts to restructure under bankruptcy protection.

VACANCY/AVAILABILITY/NET ABSORPTION

Vacancy 21.1%
Availability 22.2%
Absorption 1,110,176

Vacancy in metro Atlanta's office market, while still above twenty percent, has declined in each of the past five quarters, reporting a rate of 21.1% at the end of third quarter 2005. Space available for direct lease is at its lowest point in more than two years, and space on the sublease market has dropped by an average of 500,000 square feet for more than a year, currently reporting its lowest level since the end of 2003.

Meanwhile, absorption continues its trend of improvement begun during 2003. Third quarter's net absorption of 1.1 million square feet represents the strongest single-quarter performance in nearly five years, offering compelling evidence that the market is in growth mode.

AVERAGE ASKING LEASE RATES

Average Asking Lease Rate \$19.81

Average asking lease rates in metro Atlanta have remained relatively steady for more than two years, remaining in the vicinity of \$20.00 per rentable square foot (rsf) since late 2003. In third quarter 2005, weighted average lease rates were quoted at \$19.81 per rsf, representing a continuation of the rise in rates that began in the spring. Increases within the Class B and C sectors took this quarter, while average rates in Class A product remained stable at \$21.84 per rsf. The highest rents were found in Class A space in Midtown and Buckhead, as has been the case in recent years.

CONSTRUCTION ACTIVITY

Square Feet Under Construction 2,503,228

Construction activity has made a strong return in metro Atlanta's suburban core. There are six large Class A buildings underway in the Central Business District totaling more than 2.3 million square feet. Four of the properties are set to deliver in 2006: 1180 Peachtree in Midtown, future home to law firm King & Spalding; 30 Allen Plaza, the new home for the Southern Company in the Downtown area; Two Buckhead Plaza in Buckhead; and Two Peachtree Pointe, which recently broke ground at the upper-end of Midtown.

Two other properties are expected to be completed in the spring of 2007. Cousins Properties is building Phase I of Terminus, a planned mixed-use development in the heart of Buckhead; also, Barry Real Estate recently launched the second building at Downtown's Allen Plaza, which will be the new home of Ernst & Young in Atlanta. In addition, there are nearly 600,000 square feet of projects under construction scattered around the city's north side. Overall, properties under construction in Atlanta are currently 40% leased.

MARKET OUTLOOK

Atlanta's office market is poised to experience a greater level of growth in 2005 than it has seen since the decade began, with absorption in the first nine months of the year already exceeding the occupancy growth seen during any year here since 2000. However, without sustained job growth, metro Atlanta can only grow so much. While absorption continues to improve, the market still contains nearly 27 million square feet of vacant space, several years' worth of supply at current absorption rates. Still, 2005 brings clear evidence that Atlanta is poised to grow its way toward the next great cycle high point. Meanwhile, until job growth shows consistent growth, we can expect occupancy to continue at a positive, at times measured, pace.

TOP ATLANTA LEASE TRANSACTIONS

Size (SF)	Tenant	Address / Building Name
111,000	Infor	13560 Morris Road
97,000	Arby's	1155 Perimeter Center West

75,000	Clayco (renewal/expansion)	320 Interstate North Pkwy
64,000	Morgan Keegan	Two Buckhead Plaza

ATLANTA SUBMARKET MAP

AVERAGE ASKING LEASE RATE

Rate determined by multiplying the asking gross lease rate for each building by its available space, summing the products, then dividing by the sum of the available space with gross leases for all buildings in the summary.

NET LEASES

Includes all lease types whereby the tenant pays an agreed rent plus most, or all, of the operating expenses and taxes for the property, including utilities, insurance and/or maintenance expenses.

MARKET COVERAGE

Includes all competitive office buildings 30,000 square feet and greater in size.

NET ABSORPTION

The change in occupied square feet from one period to the next.

NET RENTABLE AREA

The gross building square footage minus the elevator core, flues, pipe shafts, vertical ducts, balconies, and stairwell areas.

OCCUPIED SQUARE FEET

Building area not considered vacant.

UNDER CONSTRUCTION

Buildings which have begun construction as evidenced by site excavation or foundation work.

AVAILABLE SQUARE FEET

Portion of Building Area which is on market for lease; may be either vacant or occupied at time of reporting.

AVAILABILITY RATE

Available Square Feet divided by the Net Rentable Area.

VACANT SQUARE FEET

Portion of Building Area which is physically vacant.

VACANCY RATE

Vacant Building Feet divided by the Net Rentable Area.

NORMALIZATION

Due to a reclassification of the market, the base number and square footings of buildings of previous quarters have been adjusted to match the current base. Availability and Vacancy figures for those buildings have been adjusted in previous quarters.

ATLANTA OFFICE MARKET

METHODOLOGY

The CoStar Office Report, unless specifically stated otherwise, calculates office statistics using CoStar Group's entire database of existing and under construction office buildings in each metropolitan area. Included are office, office condominium, office loft, office medical, all classes and all sizes, and both multi-tenant and single-tenant buildings, including owner-occupied buildings. CoStar Group's national database includes approximately 29.3 billion square feet of coverage in 1.2 million properties. All rental rates reported in the CoStar Office Report have been converted to a Full Service equivalent rental rate.

For information on subscribing to CoStar's Advisory reports, or for information on CoStar's other products and services, please contact us at 1-877-7COSTAR, or visit our web site at www.costar.com

ATLANTA OFFICE MARKET

TERMS & DEFINITIONS

Availability Rates: The ratio of available space to total rentable space, calculated by dividing the total available square feet by the total rentable square feet.

Available Space: The total amount of space that is currently being marketed as available for lease in a given time period. It includes any space that is available, regardless of whether the space is vacant, occupied, available for sublease, or available at a future date.

Build-to-Suit: A term describing a particular property, developed specifically for a certain tenant to occupy, with structural features, systems, or improvement work designed specifically for the needs of that tenant. A build-to-suit can be leased or owned by the tenant. In a leased build-to-suit, a tenant will usually have a long-term lease on the space.

Buyer: The individual, group, company, or entity that has purchased a commercial real estate asset.

Cap Rate: Short for capitalization rate. The Cap Rate is a calculation that reflects the relationship between one year's net operating income and the current market value of a particular property. The Cap Rate is calculated by dividing the annual net operating income by the sales price (or asking sales price).

CBD: Abbreviation for Central Business District. (See also: Central Business District)

Central Business District: The designations of Central Business District (CBD) and Suburban refer to a particular geographic area within a metropolitan statistical area (MSA) describing the level of real estate development found there. The CBD is characterized by a high density, well-organized core within the largest city of a given MSA.

Class A: A classification used to describe buildings that generally qualify as extremely desirable investment-grade properties and command the highest rents or sale prices compared to other buildings in the same market. Such buildings are well located and provide efficient tenant layouts as well as high quality, and in some buildings, one-of-a-kind floor plans. They can be an architectural or historical landmark, designed by prominent architects. These buildings contain a modern mechanical system, and have above-average maintenance and management as well as the best quality materials and workmanship in their trim and interior fittings. They are generally the most attractive and eagerly sought by investors willing to pay a premium for quality.

Class B: A classification used to describe buildings that generally qualify as a more speculative investment, and as such, command lower rents or sale prices compared to Class A properties. Such buildings offer utilitarian space without special attractions, and have ordinary design, if new or fairly new, good to excellent design if an older non-landmark building. These buildings typically have average to good maintenance, management and tenants. They are less appealing to tenants than Class A properties, and may be deficient in a number of respects including floor plans, condition and facilities. They lack prestige and must depend chiefly on a lower price to attract tenants and investors.

Class C: A classification used to describe buildings that generally qualify as no-frills, older buildings that offer basic space and command lower rents or sale prices compared to other buildings in the same market. Such buildings typically have below-average maintenance and management, and could have mixed or low tenant prestige, interior elevators, and/or mechanical/electrical systems. These buildings lack prestige and must depend chiefly on a lower price to attract tenants and investors.

Construction Starts: Buildings that began construction during a specific period of time. (See also: Deliveries)

Contiguous Blocks of Space: Space within a building that is, or is able to be joined together into a single contiguous space.

Delivered: Buildings that complete construction during a specified period of time. In order for space to be considered delivered, a certificate of occupancy must have been issued for the property.

Delivery Date: The date a building completes construction and receives a certificate of occupancy.

Developer: The company, entity or individual that transforms raw land to improved property by use of labor, capital and entrepreneurial efforts.

Direct Space: Space that is being offered for lease directly from the landlord or owner of a building, as opposed to space being offered in a building by another tenant (or broker of a tenant) trying to sublet a space that has already been leased.

Existing Inventory: The square footage of buildings that have received a certificate of occupancy and are able to be occupied by tenants. It does not include space in buildings that are either planned, under construction or under renovation.

Flex Building: A type of building designed to be versatile, which may be used in combination with office (corporate headquarters), research and development, quasi-retail sales, and including but not limited to industrial, warehouse, and distribution uses. A typical flex building will be one or two stories with at least half of the rentable area being used as office space, have ceiling heights of 16 feet or less, and have some type of drive-in door even though the door may be glassed in or sealed off.

Full Service Rental Rates: Rental rates that include all operating expenses such as utilities, electricity, janitorial services, taxes and insurance.

Gross Absorption: The total change in occupied space over a given period of time, counting space that is occupied but not space that is vacated by tenants. Gross absorption differs from leasing activity, which is the sum of all space leased over a certain period of time. Unless otherwise noted Gross Absorption includes direct and sublease space.

Growth in Inventory: The change in size of the existing square footage in a given area over a given period of time, generally due to the construction of new buildings.

Industrial Building: A type of building adapted for such uses as the assemblage, processing, and/or manufacturing of products from raw materials or fabricated parts. Additional uses include warehousing, distribution, and maintenance facilities. The primary purpose of the space is for storing, producing, assembling, or distributing product.

Landlord Rep. (Landlord Representative): In a typical lease transaction between an owner/landlord and tenant, the broker that represents the interests of the owner/landlord is referred to as the Landlord Rep.

Leased Space: All the space that has a financial lease obligation. It includes all leased space, regardless of whether the space is currently occupied by a tenant. Leased space also includes space being offered for sublease.

Leasing Activity: The volume of square footage that is committed to and signed under a lease obligation for a specific building, or market in a given period of time. It includes direct leases, subleases and renewals of existing leases. It also includes any pre-leasing activity in planned, under construction, or under renovation buildings.

Market: Geographic boundaries that serve to delineate core areas that are competitive with each other and constitute a generally accepted primary competitive set of areas. Markets are building-type specific, and are non-overlapping contiguous geographic designations having a cumulative sum that matches the boundaries of the entire Region (See also: Region). Markets can be further subdivided into Submarkets. (See also: Submarkets)

ATLANTA OFFICE MARKET

Multi-Tenant Buildings: Buildings that house more than one tenant at a given time. Usually, multi-tenant buildings were designed and built to accommodate many different floor plans and designs for different tenant needs. (See also: Tenancy).

Net Absorption: The net change in occupied space over a given period of time. Unless otherwise noted Net Absorption includes direct and sublease space.

Net Rental Rate: A rental rate that excludes certain expenses that a tenant could incur in occupying office space. Such expenses are expected to be paid directly by the tenant and may include janitorial costs, electricity, utilities, taxes, insurance and other related costs.

New Space: Sometimes called first generation space, refers to space that has never been occupied and/or leased by a tenant.

Occupied Space: Space that is physically occupied by a tenant. It does not include leased space that is not currently occupied by a tenant.

Office Building: A type of commercial building used exclusively or primarily for office use (business), as opposed to manufacturing, warehousing, or other uses. Office buildings may sometimes have other associated uses within part of the building, i.e., retail sales, financial, or restaurant, usually on the ground floor.

Owner: The company, entity, or individual that holds title on a given building or property.

Planned/Proposed: The status of a building that has been announced for future redevelopment but not yet started construction.

Preleased Space: The amount of space in a building that has been leased prior to its construction completion date, or certificate of occupancy date.

Price/SF: Calculated by dividing the price of a building (either sales price or asking sales price) by the Rentable Building Area (RBA).

Property Manager: The company and/or person responsible for the day-to-day operations of a building, such as cleaning, trash removal, etc. The property manager also makes sure that the various systems within the building, such as the elevators, HVAC, and electrical systems, are functioning properly.

Quoted Rental Rate: The asking rate per square foot for a particular building or unit of space by a broker or property owner. Quoted rental rates may differ from the actual rates paid by tenants following the negotiation of all terms and conditions in a specific lease.

RBA: Abbreviation for Rentable Building Area. (See also: Rentable Building Area)

Region: Core areas containing a large population nucleus, that together with adjacent communities have a high degree of economic and social integration. Regions are further divided into market areas, called Markets. (See also: Markets)

Relief Space: Sometimes called second generation or direct space, refers to existing space that has previously been occupied by another tenant.

Rentable Building Area (RBA): The total square footage of a building that can be occupied by, or assigned to a tenant for the purpose of determining a tenant's rental obligation. Generally, RBA includes a percentage of common areas including all hallways, main lobbies, bathrooms, and telephone closets.

Rental Rates: The annual costs of occupancy for a particular space quoted on a per square foot basis.

Sales Price: The total dollar amount paid for a particular property at a particular point in time.

Sales Volume: The sum of sales prices for a given group of buildings in a given time period.

Seller: The individual, group, company, or entity that sells a particular commercial real estate asset.

SF: Abbreviation for Square Feet.

Single-Tenant Buildings: Buildings that are occupied, or intended to be occupied by a single tenant. (See also: Build-to-suit and Tenancy)

Sublease Space: Space that has been leased by a tenant and is being offered for lease back to the market by the tenant with the lease obligation. Sublease space is sometimes referred to as sublet space.

Submarkets: Specific geographic boundaries that serve to delineate a core group of buildings that are competitive with each other and constitute a generally accepted primary competitive set, or peer group. Submarkets are building type specific (office, industrial, retail, etc.), with distinct boundaries dependent on different factors relevant to each building type. Submarkets are non-overlapping, contiguous geographic designations having a cumulative sum that matches the boundaries of the Market they are located within. (See also: Market)

Suburban: The Suburban and Central Business District (CBD) designations refer to a particular geographic area within a metropolitan statistical area (MSA). Suburban is defined as including all office inventory not located in the CBD. (See also: CBD)

Tenancy: A term used to indicate whether or not a building is occupied by multiple tenants (See also: Multi-tenant) or a single tenant. (See also: Single-tenant)

Tenant Rep: Tenant Rep stands for Tenant Representative. In a typical lease transaction between an owner/landlord and tenant, the broker that represents the interests of the tenant is referred to as a Tenant Rep.

Time On Market: A measure of how long a currently available space has been marketed for lease, regardless of whether it is vacant or occupied.

Under Construction: The status of a building that is in the process of being developed, assembled, built or constructed. A building is considered to be under construction after it has begun construction and until it receives a certificate of occupancy.

Vacancy Rate: A measurement expressed as a percentage of the total amount of physically vacant space divided by the total amount of existing inventory. Under construction space generally is not included in vacancy calculations.

Vacant Space: Space that is not currently occupied by a tenant, regardless of any lease obligation that may be on the space. Vacant space could be space that is either available or not available. For example, sublease space that is currently being paid for by a tenant but not occupied by that tenant, would be considered vacant space. Likewise, space that has been leased but not yet occupied because of finish work being done, would also be considered vacant space.

Weighted Average Rental Rate: Rental rates that are calculated by factoring in, or weighting, the square footage associated with each particular rental rate. This has the effect of causing rental rates on larger spaces to affect the average more than that of smaller spaces. The weighted average rental rate is calculated by taking the ratio of the square footage associated with each rental rate to the square footage associated with all rental rates; multiplying the rental rate by that ratio; and then adding together all the resulting numbers.

Year Built: The year in which a building completed construction and was issued a certificate of occupancy.

YTD: Abbreviation for Year-to-Date. Describes statistics that are cumulative from the beginning of a calendar year through whatever time period is being studied.

ATLANTA OFFICE MARKET

OVERVIEW

ATLANTA'S VACANCY DECREASES TO 14.6%

Net Absorption Positive 1,840,625 SF in the Quarter

The Atlanta Office market ended the second quarter 2005 with a vacancy rate of 14.6%. The vacancy rate was down over the previous quarter, with net absorption totaling positive 1,840,625 square feet in the second quarter. Vacant sublease space decreased in the quarter, ending the quarter at 2,943,437 square feet. Rental rates ended the second quarter at \$18.63, a increase over the previous quarter. A total of 22 buildings delivered to the market in the quarter totaling 784,208 square feet, with 2,419,526 square feet still under construction at the end of the quarter.

Absorption

Net absorption for the overall Atlanta office market was positive 1,840,625 square feet in the second quarter 2005. That compares to positive 1,364,630 square feet in the first quarter 2005, positive 1,296,156 square feet in the fourth quarter 2004, and positive 1,109,418 square feet in the third quarter 2004.

The Class-A office market recorded net absorption of positive 228,461 square feet in the second quarter 2005, compared to positive 919,644 square feet in the first quarter 2005, positive \$14,720 in the fourth quarter 2004, and positive 982,778 in the third quarter 2004.

The Class-B office market recorded net absorption of positive 1,369,341 square feet in the second quarter 2005, compared to positive 639,479 square feet in the first quarter 2005, positive 672,769 in the fourth quarter 2004, and positive 180,687 in the third quarter 2004.

The Class-C office market recorded net absorption of positive 242,823 square feet in the second quarter 2005 compared to positive 5,507 square feet in the first quarter 2005, positive

108,667 in the fourth quarter 2004, and negative (\$4,047) in the third quarter 2004.

Net absorption for Atlanta's central business district was negative (47,869) square feet in the second quarter 2005. That compares to positive 189,333 square feet in the first quarter 2005, negative (196,583) in the fourth quarter 2004, and positive 30,688 in the third quarter 2004.

Net absorption for the suburban markets was positive 1,894,294 square feet in the second quarter 2005. That compares to positive 1,369,497 square feet in first quarter 2005, positive 1,486,579 in the fourth quarter 2004, and positive 1,062,610 in the third quarter 2004.

Vacancy

The office vacancy rate in the Atlanta market area decreased to 14.6% at the end of the second quarter 2005. The vacancy rate was 15.1% at the end of the first quarter 2005, 13.7% at the end of the fourth quarter 2004, and 16.1% at the end of the third quarter 2004.

Class-A projects reported a vacancy rate of 16.4% at the end of the second quarter 2005, 16.5% at the end of the first quarter 2005, 17.5% at the end of the fourth quarter 2004, and 18.0% at the end of the third quarter 2004.

Class-B projects reported a vacancy rate of 14.0% at the end of the second quarter 2005, 14.8% at the end of the first quarter 2005, 15.3% at the end of the fourth quarter 2004, and 15.6% at the end of the third quarter 2004.

Class-C projects reported a vacancy rate of 10.4% at the end of the second quarter 2005, 11.3% at the end of first quarter 2005, 11.3% at the end of the fourth quarter 2004, and 11.9%.

VACANCY RATES BY CLASS 1986-2005

Source: Costar Group, Inc.

ATLANTA OFFICE MARKET

OVERVIEW

at the end of the third quarter 2004.

The overall vacancy rate in Atlanta's central business district at the end of the second quarter 2005 increased to 14.8%. The vacancy rate was 14.7% at the end of the first quarter 2005, 15.3% at the end of the fourth quarter 2004, and 14.8% at the end of the third quarter 2004.

The vacancy rate in the suburban markets decreased to 14.5% in the second quarter 2005. The vacancy rate was 15.2% at the end of the first quarter 2005, 15.8% at the end of the fourth quarter 2004, and 16.4% at the end of the third quarter 2004.

Largest Lease Signings

The largest lease signings occurring in 2005 included: the 96,675-square-foot lease signed by RaceTrac at Cumberland Center IV; the 83,260-square-foot lease signed by Leica Geosystems at 5051 Peachtree Corners Cir; and the 73,328-square-foot deal signed by NAC International Inc. at The Forum.

Sublease Vacancy

The amount of vacant sublease space in the Atlanta market decreased to 2,943,437 square feet by the end of the second quarter 2005, from 3,178,775 square feet at the end of the first quarter 2005. There was 3,458,830 square feet vacant at the end of the fourth quarter 2004 and 3,791,014 square feet at the end of the third quarter 2004.

Atlanta's Class-A projects reported vacant sublease space of 1,970,009 square feet at the end of second quarter 2005, down from the 2,139,131 square feet reported at the end of the first quarter 2005. There were 2,301,847 square feet of sublease space vacant at the end of the fourth quarter 2004 and 2,337,529 square feet at the end of the third quarter 2004.

Class-B projects reported vacant sublease space of 907,338 square feet at the end of the second quarter 2005, down from the 950,992 square feet reported at the end of the first quarter 2005. At the end of the fourth quarter 2004 there were 1,039,337 square feet, and at the end of the third quarter 2004 there were

1,323,152 square feet vacant.

Class-C projects reported decreased vacant sublease space from the first quarter 2005 to the second quarter 2005. Sublease vacancy went from 88,652 square feet to 66,090 square feet during that time. There was 117,446 square feet at the end of the fourth quarter 2004, and 130,263 square feet at the end of the third quarter 2004.

Sublease vacancy in Atlanta's central business district stood at 243,494 square feet at the end of the second quarter 2005. It was 262,680 square feet at the end of the first quarter 2005, 345,384 square feet at the end of the fourth quarter 2004, and 368,740 square feet at the end of the third quarter 2004.

Sublease vacancy in the suburban markets ended the second quarter 2005 at 2,699,943 square feet. At the end of the first quarter 2005 sublease vacancy was 2,916,095 square feet, was 3,113,446 square feet at the end of the fourth quarter 2004, and was 3,422,274 square feet at the end of the third quarter 2004.

Rental Rates

The average quoted asking rental rate for available office space, all classes, was \$18.63 per-square-foot per year at the end of the second quarter 2005 in the Atlanta market area. This represented a 0.8% increase in quoted rental rates from the end of the first quarter 2005, when rents were reported at \$18.49 per-square-foot.

The average quoted rate within the Class-A sector was \$20.88 at the end of the second quarter 2005, while Class-B rates stood at \$16.48, and Class-C rates at \$14.83. At the end of the first quarter 2005, Class-A rates were \$20.71 per-square-foot, Class-B rates were \$16.50, and Class-C rates were \$14.81.

The average quoted asking rental rate in Atlanta's CBD was \$19.99 at the end of the second quarter 2005, and \$18.41 in the suburban markets. In the first quarter 2005, quoted rates were \$19.86 in the CBD and \$18.35 in the suburbs.

Deliveries and Construction

During the second quarter 2005, 22 buildings totaling 784,208 square feet were completed in the Atlanta market area. This compares to 19 buildings totaling 226,192 square feet that were completed in the first quarter 2005, 44 buildings totaling 569,072 square feet completed in the fourth quarter 2004, and 243,018 square feet in 30 buildings completed in the third quarter 2004.

There were 2,419,526 square feet of office space under construction at the end of the second quarter 2005.

Inventory

Total office inventory in the Atlanta market area amounted to 225,253,418 square feet in 6,604 buildings as of the end of the second quarter 2005. The Class-A office sector consisted of 96,590,513 square feet in 402 projects. There were 2,600 Class-B buildings totaling 100,335,874 square feet, and the Class-C sector consisted of 28,327,031 square feet in 3,602 buildings. Within

ATLANTA OFFICE MARKET

OVERVIEW

COSTAR
GROUP

the Office market there were 711 owner-occupied buildings accounting for 36,816,798 square feet of office space.

Sales Activity

Tallying office building sales of 15,000 square feet or larger, Atlanta office sales figures fell during the first quarter 2005 in terms of dollar volume compared to the fourth quarter of 2004.

In the first quarter, 27 office transactions closed with a total volume of \$307,752,388. The 27 buildings totaled 2,432,251 square feet and the average price per square foot equated to \$126.53 per square foot. That compares to 41 transactions totaling \$837,729,353 in the fourth quarter 2004. The total square footage in the fourth quarter was 6,306,139 square feet for an average price per square foot of \$132.84.

Total office building sales activity in 2005 was up compared to 2003 & 2004. In the first three months of 2004, the market saw 19 office sales transactions with a total volume of \$257,353,500. The price per square foot averaged \$137.80. In the same first three months of 2003, the market posted 14 transactions with a total volume of \$107,696,174. The price per square foot averaged \$91.29.

The largest transaction that has occurred within the last 4 quarters in the Atlanta market is the sale of The Pinnacle & Two

MARKETS

CoSTAR MARKETS & SUBMARKETS

In analyzing metropolitan areas in the U.S., CoStar has developed geographic designations to help group properties together, called Regions, Markets and Submarkets. Regions are the equivalent of metropolitan areas, or areas containing a large population nucleus, that together with adjacent communities have a high degree of economic and social integration. Regions are then divided into Markets, which are core areas within a metropolitan area that are known to be competitive with each other in terms of attracting and keeping tenants. Markets are then further subdivided into smaller units called Submarkets, which serve to delineate a core group of buildings that are competitive with each other and constitute a generally accepted competitive set, or peer group.

Markets	Submarkets
Buckhead	Lower Buckhead Upper Buckhead
Central Perimeter	Central Perimeter
Downtown Atlanta	Downtown Atlanta*
Midtown Atlanta	Midtown/Pershing Point Northside Dr/Georgia Tech
North Fulton	Dawson County N Fulton/Porsyth County
Northeast Atlanta	Bartow County/ Duluth/Suwanee/Buford Gainesville/Hall County Lawrenceville/Lithium Woods/Pine Corners Wellen County
Northlake	Chamblee/Dorle/N D Hills Decatur East Lake/Conyers Newton County Northlake/Lavista Stone Mountain
Northwest Atlanta	Cherokee County Cumberland/Gallatin East Cobb Kennesaw/Town Center Pickens County
South Atlanta	Fayette/Covatta County North Clayton/Airport South Clayton/Henry/Orly Spalding County
West Atlanta	Douglasville/Lithia Springs Villa Rica/Vest County West Atlanta

* Submarkets comprising the CBD. For statistics reference the CBD vs Suburban figures at a Glance Page.

CoSTAR MARKET REPORT

In today's uncertain economic times, the difference between the right decision and a wrong one can mean hundreds of thousands, if not millions of dollars. With the CoStar Market Report, you'll have the critical information you need to help you and your clients make smarter decisions.

CoStar's Office or Industrial Market Report, updated every quarter, contains the most current statistics available for you local market, right now to the submarket level. Comprehensive charts, graphs and detailed narrative will give you a precise picture of absorption, vacancy rates, rental rates, existing inventory and buildings under construction, sales prices, and cap rates.

INDIVIDUAL MARKETS

Individual market reports include comprehensive statistics and analysis on local market conditions, right down to the submarket level. Individual reports are available for 46 major U.S. Office markets and 45 major U.S. Industrial Markets. All local market subscriptions include a national overview.

Single Market (office or industrial) - **Hard Copy \$495**
 Single Market (office or industrial) - **Electronic Format \$695**

NATIONAL EDITION

The National edition includes a national overview and comprehensive statistics and analysis on 46 major U.S. Office markets and 45 major U.S. Industrial Markets. Published in PDF format on a CD-ROM version, use it to copy charts and graphs into your client reports, presentations and marketing materials.

Single Copy - **CD-ROM \$7,200**

THIRD QUARTER 2005

QUICK STATS

	Current	Yr.	Qtr.
Vacancy	11.73%	↓	↓
Lease Rates	\$15.22	↓	↑
Net Absorption*	246K	↓	↓
Construction	402K	↑	↑

*The arrows indicate indicators over the specified time period and do not represent a positive or negative value. (e.g., absorption could be negative, but still represent a positive trend over a specified period.)

HOT TOPICS

- 4 million sf of Planned Office Projects and 400k sf under construction in the county.
- The CBD experienced 136,811 sf of positive absorption.
- Vacancy rates drop for the 6th straight quarter.
- 441,516 sf positive absorption YTD.

Trends during the third quarter of 2005 for the Broward County office market continue in the direction of those during the second quarter. Defined by an overall decrease in vacancy rates, an increase in absorption rates, despite a nominal increase in rental rates, the market continues to strengthen. Total vacancy figures decreased by 1.04% yielding a generous overall absorption figure of 246,236 sf. The total availability rate decreased to 13.98% as average rental rates increased to \$15.22 triple net, leading to further tightening in the market.

The Ft. Lauderdale Central Business District (CBD) pulled ahead this quarter with positive absorption of 136,811 sf, a 2.82% reduction in vacancies from last quarter, and reinforced by a slight increase in rental rates. 107,074 sf of net positive class A space was absorbed, leaving only 13.9% of the most desirable class A buildings vacant. These circumstances have afforded an increase in the class A rental rates, which grew by 2.2% from last quarter to \$18.26 psf.

Cypress Creek jumps on the board showing 110,389 sf of absorption, a 78.23 percent increase from the second quarter. For many tenants, Cypress Creek provides itself as a good cost alternative to the downtown market. Plantation turned around this quarter with positive absorption of 39,307 and vacancy rates decreasing by 1.42 percentage points. American Express renewed 390,000 sf at 777 N Pine Island Rd, the largest transaction year to date in south Florida. Rental rates also increased by \$0.98 psf to \$13.97. Plantation maintains a positive absorption figure of 126,764 sf for 2005.

Overall, the third quarter followed the second quarter's prediction of strengthening market conditions, boosting favorable figures. The positive direction, in part, is attributed to job growth both nationally and locally. Economic conditions continue to be favorable in South Florida, providing the Broward office market with a continual benefit. If favorable conditions persist Broward County should continue positive market trends during future quarters.

VACANCY RATE VS. LEASE RATE

UNEMPLOYMENT RATE

The national unemployment rate decreased .45 percentage points from the second quarter coming in at a rate of 4.95% for the third quarter. According to the Bureau of Labor Statistics, Florida's unemployment rate experienced 0.3 of a percentage point decrease yielding a rate of 4.0% during the third quarter. The Tri-County unemployment rate showed signs of improvement in two counties. Broward County's unemployment rate decreased by 0.5 of a percentage point from the second quarter's rate of 4.5%, resulting in a third quarter rate of 4.0%. Palm Beach County reported a decrease of .05 of a percentage point, dropping to 4.55%. Miami-Dade's rate of 4.8% remained unchanged from the second quarter.

The Bureau of Labor Statistics is using a new statistical database, which according to one Labor Statistic employee is a "new econometric technique creating a more sophisticated analysis." As a result, statistical differences, albeit however large or minimal, need another quarter to readjust in order to accurately gauge the economic health of South Florida.

The Bureau of Labor Statistics is using a new statistical database, which according to one Labor Statistic employee is a "new econometric technique creating a more sophisticated analysis." As a result, statistical differences, albeit however large or minimal, need another quarter to readjust in order to accurately gauge the economic health of South Florida. © 2005 CB Richard Ellis, Inc.

VACANCY/AVAILABILITY/NET ABSORPTION

Success continues as vacancy rates decrease by approximately 8.2% from 12.77% in 2Q05 to 11.73% during the third quarter. Availabilities have experienced a smaller change, decreasing by 5.9% from 14.80% to 13.98% over the same period. Sublease space remains scarce, indicated by the decrease in availabilities this quarter. The quarterly rate of absorption is at 243,236 sf indicating increased leasing activity. Transactions in both the non-CBD and CBD contributing to these favorable figures include non-CBD transactions: Kaplan University's lease of 110,000 sf in Cypress Creek Concourse II and DHL's agreement to fully lease Cornerstone II accounting for 110,000 sf. CBD transactions include Island Global Yachting's lease at 1515 E Las Olas Blvd for 10,367 sf and Derek Hodgson & Partners' lease at 100 SE Third Ave. for 10,184 sf.

CONSTRUCTION ACTIVITY

New construction remains unchanged this quarter, as 402,343 sf is still slated for delivery by year end. Over 4 million square feet of office space is in the planning stages with expectations of construction to begin within the year. There are currently two Class A buildings under construction in Broward County. Weston Pointe IV will provide 97,178 sf of Class A space when completed in October of this year. The 147,865 sf Class A Lake Shore Plaza is scheduled to complete construction in December of this year at its location in Sawgrass Corporate Park. Cornerstone II in Plantation is now complete adding 112,000 sf of office product and will be occupied in its entirety by DHL.

AVERAGE ASKING LEASE RATES

The overall average asking NNN rental rate for the third quarter 2005 was \$15.22 psf, a \$.18 psf increase from last quarter. This increase can be attributed to the decrease in vacant space and availabilities resulting in a tightening of the office market. Sublease space is minimal, allowing rental rates to steadily increase. The steepest overall average asking rates were recorded in the Downtown Ft. Lauderdale submarket at \$17.85 psf, where class A space is going for \$18.26 psf. The lowest rates were recorded in the Pompano Beach market at \$12.26 psf. Following suit with overall rates, Downtown Ft. Lauderdale also has the highest Class A rate at \$18.26 psf, while the highest Class B rate is in Northwest Broward at \$18.04 psf.

MARKET OUTLOOK

As favorable market conditions persist and new tenants continue to enter the market, leasing activity should consistently escalate throughout future quarters. Broward County continues to capitalize on its central location, coupled with overall economical rates (relative to Dade and Palm Beach counties), in order to service the county efficiently. Overall, availability should continue to decrease absorbing what sublease space remains in Broward County.

Average asking rental rates should persistently climb, increasing about 1 percent per quarter. Absorption will continue the rise and fall pattern from quarter to quarter as new space is brought into the market and short-term sublease space expires. Construction activity, primarily in the Western Broward submarkets is expected to increase. Three projects are expected to break ground in the near future: Cornerstone IV (Plantation), Royal Palm @ SouthPointe (Plantation), and Miramar Centre III (Miramar).

MIAMI CBD

Vacancy Rate*	13.4%
New Construction	163,000 SF
Net Absorption	23,566 SF
Average Asking Rents	A \$30.24 Full Service
	B \$18.78 Full Service

Trends

The vacancy rate for the CBD increased during 2004 as a result of companies moving to the Brickell and Coral Gables submarkets. Absorption was low, but positive. Most of the leasing has been deals under 5,000 square feet, with a large percentage of these transactions by law firms.

There is only one new office building under construction, and sites for new development are limited. Construction in the CBD is dominated by residential projects, both on redevelopment sites and the conversion of rental apartments to condos. It is estimated that there will be 16,000 new residential units completed within the next 5 years. After nearly two decades of stagnation, many older, empty commercial buildings are being converted, transforming the downtown. With the huge demand for these properties, and the seemingly never-ending supply of buyers, the price of land has doubled in the past year. The residential explosion will not only constrain the size of the office market by consuming most of the potential sites for new development, but the increase in population should eventually create more demand for office space.

	B \$24.35 Full Service

Trends

The vacancy rate continues to improve at a steady pace as space is absorbed, and is down almost 3 percentage points from 2003. Sublease space has diminished, and there are strong signs that this area is changing from a tenant to a landlord market. Contributing to the dropping vacancy rate is the leasing of two newly completed projects, the 753,000 square foot mixed-use Espirito Santo Plaza, now 75% leased, and the Four Seasons Tower, (with 201,000 square feet of office space) now 100% leased.

The current interest in investment properties remains strong. For example, the 432,000 square foot 800 Brickell Building sold to Stiles/Guggenheim. Re-development sites, including older buildings and parking lots, continue to be procured by developers. A recent example is the Related Group of Florida's \$94 million purchase of a property that currently holds the Sheraton Biscayne Bay Hotel, which will be razed for either a commercial or mixed use project. Additionally, construction will soon begin on the Latitude, a mixed use project on 2.3 acres on the Miami River, which will contain 231,000 square feet of office space and a 44-story condo tower.

Trends

The absorption for Coral Gables in 2004 was very strong for this smaller, 7 million square foot submarket. The vacancy rate decreased over 11% from year end 2003, making it the hottest area in Miami-Dade County.

In September, 2525 Ponce de Leon was completed, a 250,000 square foot Class A project, that is now 50% leased.

Several significant lease transactions took place as major corporations and more quality credit tenants such as financial services and law firms are relocating to Coral Gables. With high demand for space, it is now a landlord's market, and as a result, Class A rates have begun to increase.

Investment sale activity was also brisk in this dynamic submarket of Miami. Crescent RE Equities purchased a 317,000 square foot building for \$227 per square foot and plans more acquisitions in South Florida. KPER Realty purchased the 302,000 square foot 550 Biltmore for \$219 per square foot. Even smaller properties are bringing record prices as a 12,831 square foot building was recently sold for \$292 per square foot.

New Construction	107,000 SF
Net Absorption	437,099 SF
Average Asking Rents	A \$23.84 Full Service
	B \$19.38 Full Service

Trends

There was robust leasing this year with over 1.1 million square feet of new deals. The increase in demand for new space resulted in healthy absorption. In addition, there was less than one third the amount of sublease on the market than at the end of 2003 and only 107,000 square feet of new construction during 2004. As a result, the vacancy rate decreased by almost three percentage points.

Investor demand continues to be extremely strong. A primary property, the 1.1 million square foot Airport Corporate Center, was recently offered for sale at over \$160 million, and is generating investor interest. This property includes six acres of undeveloped land, which adds significant value to this investment opportunity.

The Airport West submarket has the infrastructure to compete on national and international levels, and will continue to attract airport-related or airport-dependent tenants. Miami's designation as the "Gateway to the Americas" will also continue to create steady demand from companies with ties to Latin America.

Net Absorption	541,938 SF
Average Asking Rents	A: \$23.82 Full Service
	B: \$21.97 Full Service

Trends

This is the fastest growing area in Broward and has the highest level of absorption and lowest vacancy rate.

There is currently 2.85 million square feet of planned development, almost 1.3 million square feet of which will be in Miramar. Construction will begin in January on Metropica in Sunrise, a 500,000 square foot office and 2,363 unit residential complex. Developers are determined to keep ahead of office demand and westward growth. Companies are primed to grow after several years of an economic slump, and this submarket has strong potential to attract new corporations due to abundant housing, retail, interstate access and available land, which is almost non-existent in the eastern part of the county.

Investors are also recognizing this market's potential, and recent sales are between \$145 and \$185 per square foot. Buyers will continue to look for long term opportunities as tenant demand rises.

Net Absorption	1,163,325 SF
Average Asking Rents	A: \$24.60 Full Service
	B: \$22.47 Full Service

Trends

Absorption in Palm Beach County is very strong as the improving economy increased the demand for new space. As a result of the sharp increase in interest and waning supply, investors are paying top dollar for buildings. In Boca Raton, a 242,000 square foot building recently sold for \$206 per square foot.

The county is still finalizing the location for The Scripps Institute's research facility, originally designated for 1,900 acres west of Palm Beach Gardens. Alternative venues are being considered as environmentalists and the county strive to resolve issues. Land prices in the area are soaring and investors are acquiring any available acreage.

Downtown West Palm Beach is experiencing a revival, both in commercial and residential development. There will be over 4,000 new condo units, and the influx of residents will give a boost to retail and office space. As a result, optimistic investors are renovating older office buildings.

Vacancy Rate*	7.0%
New Construction	144,517 SF
Net Absorption	32,577 SF
Average Rent PSF	\$5.00
Average Sale PSF	\$60.00

Trends

Absorption exceeded new construction during 2004, lowering the vacancy to 7.3%. There were several larger (100,000 square foot plus) lease transactions and investor demand remains strong. Both lease and sale prices have risen appreciably.

The increase in demand has also begun to affect the leasing strategies of the landlords, with less free rent offered and a significant lack of flexibility in lease rates. Tenants are still able to obtain some concessions (free rent and higher TIs) when signing longer lease terms; however, there is minimal flexibility with base lease rates and escalations, and the most influential criteria is still tenant credit.

While there are some large (60,000 square foot and greater) spaces still available, there is a growing lack of quality space in this submarket. Developers are building speculative buildings in anticipation of continued strong demand. Flagler Development recently broke ground on a 200,000 square foot building at Flagler Station, and plans a 100,000 square foot building.

Airport West-Medley

Trends

This industrial area of northern Miami Dade County has not been as active as other submarkets in the county. The vacancy rate, while down from mid-year 2004, is higher than at the end of 2003. Northern Dade continues to compete for tenants with neighboring Broward County.

New construction has been limited; however, there are new projects on the horizon. The area around the Opa Locka Airport has generated interest for business development because of its location near Miami Lakes, rail access, and workforce potential.

Investor demand has remained strong. This area, with its central location between two ports and good highway access, is considered a lower cost alternative to Airport West, and may be undervalued. AMB recently purchased a 230,000 square foot complex on 10 acres, and now controls about 14% of the warehouse space in this North Dade/Gratigny area. The company recently shifted from buying in Airport West to Northern Dade.

Average Sale psf	\$50.00

Trends

Central Miami-Dade had healthy absorption in 2004, and the lowest vacancy rate in the county. There is a high demand for property to purchase as the vacancy rate in this already supply-constrained market is forecast to decline further over the next 2 years.

A 40-acre development project in Liberty City appears to be moving forward. The owners of this 2.2 million square foot project, Town Center Properties, are focusing on revitalizing this depressed area with the first building to be delivered late 2005. This project has the potential to be an important bio-tech hub of Miami, due to its close proximity to hospitals and universities and access to transportation. The first tenant, MediVector, has committed to 50,000 square feet, with plans to expand to 300,000 square feet.

This submarket has also seen a renewed interest in the "Design and Art District", where buyers of unique properties are creating a renaissance for artist space. A 53,000 square foot warehouse recently sold for \$3.2 million to a company that develops art-oriented projects.

New Construction	1,352,406 SF
Net Absorption	2,071,058 SF
Average Rent psf	\$6.26
Average Sale psf	\$68.00

Trends

With the strengthening economy, Broward's industrial segment is seeing a revival of activity. Companies are emerging from a slower economy and are back in the market for space. As purchase prices increase, users are becoming more reluctant to buy, resulting in an upswing in leasing and absorption.

Available land is in short supply and selling at record prices. Industrial developers have been reluctant to pay high prices, and there is a growing trend of industrially-zoned land selling to residential developers. For example, in Sunrise, a 113-acre industrial site was recently purchased to build a 2,000-unit retirement community.

Newly completed construction this year reflects optimism for a strong future for Broward County. Over 1.3 million square feet was delivered, with the northernmost cities of Pompano Beach and Deerfield Beach experiencing the most new development.

Vacancy Rate*	7.2%
New Construction	631,471 SF
Net Absorption	246,171 SF
Average Rent PSF	\$6.00
Average Sale PSF	\$65.00

Trends

Despite damage, displacement and a general slowdown in activity in August and September due to the hurricanes, the Palm Beach County market maintained strong absorption and single digit vacancy.

Developers were cautiously optimistic in 2004 with 632,000 square feet of new construction. The pace of new development starts has slowed to avoid possible over-building.

Sales activity has been strong and reflects well on the economic future of this county. Prices for land have more than doubled from a year ago as developers and speculators are acquiring sites at a rapid pace. Available land is becoming increasingly scarce. The potential of the Scripps Institute Research Center being developed in the western part of the county is providing an immense economic boost to this region, and is having a direct impact on prices. Office Depot recently announced that it will be selling its prime 23-acre site in Boca Raton, generating a great deal of interest from commercial developers.

SOUTH FLORIDA

MIAMI-DADE • BROWARD • PALM BEACH

RETAIL TRENDS

Retail investment in South Florida continues to soar due to this region's heavy population upswing and affluent demographics. In a national survey of local economies by the Milken Institute, the West Palm Beach-Boca Raton area ranked 4th and Fort Lauderdale ranked 9th in the "Best 2004 Performing Cities Index". This positive report is enticing investors to pursue this market.

With vacancy rates declining and rental rates rising in all 3 counties, new development is brisk and builders are acquiring land or re-development parcels. In Miami, just north of the CBD, a 580,000 square foot, 26-acre retail project, Shops at Midtown Miami, is planned.

A current trend occurring throughout South Florida is the development of mixed-use projects with office and multi-family combined with retail. For example, the "Metropolis" center in Sunrise will house 500,000 square feet of office, 2,363 residences and 124,000 square feet of retail. In Miami, MDM will complete a project in July 2007 with 220,000 square feet of retail, 1,500 condo units and 500,000 square feet of office space.

Palm Beach County retail developers are responding to the thriving residential sectors with four proposed malls totaling 1.8m square feet. In Broward County, the Seminole Tribe recently opened Seminole Paradise, a 350,000 square foot shopping and entertainment complex. The site features 25 retail stores, 13 night clubs and 11 restaurants.

FT. LAUDERDALE, FL

Third Quarter 2005

Broward County is experiencing notable construction activity with over 611,000 sf currently underway. The majority of this new construction is occurring in the western end of the county.

The largest lease deals in Broward County were DHL leasing 110,000 sf in the new Cornerstone II building in Plantation and Kaplan using their lease option to begin building next quarter a new 100,000 sf building adjacent to their current space.

Leasing activity reached 795,000 sf in third quarter 2005 compared to 774,000 sf in second quarter 2005 causing the vacancy rate to drop by 1 percentage point to 13.6% this quarter from 14.6% last quarter.

BROWARD COUNTY OFFICE MARKET

METHODOLOGY

The CoStar Office Report, unless specifically stated otherwise, calculates office statistics using CoStar Group's entire database of existing and under construction office buildings in each metropolitan area. Included are office, office condominium, office loft, office medical, all classes and all sizes, and both multi-tenant and single-tenant buildings, including owner-occupied buildings. CoStar Group's national database includes approximately 29.3 billion square feet of coverage in 1.2 million properties. All rental rates reported in the CoStar Office Report have been converted to a Full Service equivalent rental rate.

BROWARD COUNTY OFFICE MARKET

TERMS & DEFINITIONS

Availability Rates: The ratio of available space to total rentable space, calculated by dividing the total available square feet by the total rentable square feet.

Available Space: The total amount of space that is currently being marketed as available for lease in a given time period. It includes any space that is available, regardless of whether the space is vacant, occupied, available for sublease, or available at a future date.

Build-to-Suit: A term describing a particular property developed specifically for a certain tenant to occupy, with structural features, systems, or improvement work designed specifically for the needs of that tenant. A build-to-suit can be leased or owned by the tenant. In a leased build-to-suit, a tenant will usually have a long term lease on the space.

Buyer: The individual, group, company, or entity that has purchased a commercial real estate asset.

Cap Rate: Short for capitalization rate. The Cap Rate is a calculation that reflects the relationship between one year's net operating income and the current market value of a particular property. The Cap Rate is calculated by dividing the annual net operating income by the sales price (or asking sales price).

CBD: Abbreviation for Central Business District. (See also Central Business District.)

Central Business District: The designations of Central Business District (CBD) and Suburban refer to a particular geographic area within a metropolitan statistical area (MSA) describing the level of real estate development found there. The CBD is characterized by a high density, well organized core within the largest city of a given MSA.

Class A: A classification used to describe buildings that generally qualify as extremely desirable investment-grade properties and command the highest rents or sale prices compared to other buildings in the same market. Such buildings are well located and provide efficient tenant layouts as well as high quality, and in some buildings, one-of-a-kind floor plans. They can be an architectural or historical landmark designed by prominent architects. These buildings contain a modern mechanical system, and have above-average maintenance and management as well as the best quality materials and workmanship in their trim and interior fittings. They are generally the most attractive and eagerly sought by investors willing to pay a premium for quality.

Class B: A classification used to describe buildings that generally qualify as a more speculative investment, and as such, command lower rents or sale prices compared to Class A properties. Such buildings offer utilitarian space without special attractions, and have ordinary design, if new or fairly new, good to excellent design if an older non-landmark building. These buildings typically have average to good maintenance, management and tenants. They are less appealing to tenants than Class A properties, and may be deficient in a number of respects including floor plans, condition and facilities. They lack prestige and must depend chiefly on a lower price to attract tenants and investors.

Class C: A classification used to describe buildings that generally qualify as no-frills, older buildings that offer basic space and command lower rents or sale prices compared to other buildings in the same market. Such buildings typically have below-average maintenance and management, and could have mixed or low tenant prestige, inferior elevators, and/or mechanical/electrical systems. These buildings lack prestige and must depend chiefly on a lower price to attract tenants and investors.

Construction Starts: Buildings that began construction during a specific period of time. (See also Deliveries.)

Contiguous Blocks of Space: Space within a building that is, or is able to be joined together into a single contiguous space.

Deliveries: Buildings that complete construction during a specified period of time. In order for space to be considered delivered, a certificate of occupancy must have been issued for the property.

Delivery Date: The date a building completes construction and receives a certificate of occupancy.

Developer: The company, entity or individual that transforms raw land to improved property by use of labor, capital and entrepreneurial efforts.

Direct Space: Space that is being offered for lease directly from the landlord or owner of a building, as opposed to space being offered in a building by another tenant (or broker of a tenant) trying to sublet a space that has already been leased.

Existing Inventory: The square footage of buildings that have received a certificate of occupancy and are able to be occupied by tenants. It does not include space in buildings that are either planned, under construction or under renovation.

Flex Building: A type of building designed to be versatile, which may be used in combination with office (corporate headquarters), research and development, quasi-retail sales, and including but not limited to industrial, warehouse, and distribution uses. A typical flex building will be one or two stories with at least half of the rentable area being used as office space, have ceiling heights of 16 feet or less, and have some type of drive-in door, even though the door may be glassed in or sealed off.

Full Service Rental Rate: Rental rates that include all operating expenses such as utilities, electricity, janitorial services, taxes and insurance.

Gross Absorption: The total change in occupied space over a given period of time, counting space that is occupied but not space that is vacated by tenants. Gross absorption differs from leasing activity, which is the sum of all space leased over a certain period of time. Unless otherwise noted, Gross Absorption includes direct and sublease space.

Growth in Inventory: The change in size of the existing square footage in a given area over a given period of time, generally due to the construction of new buildings.

Industrial Building: A type of building adapted for such uses as the assemblage, processing, and/or manufacturing of products from raw materials or fabricated parts. Additional uses include warehousing, distribution, and maintenance facilities. The primary purpose of the space is for storing, producing, assembling, or distributing product.

Landlord Repr (Landlord Representative): In a typical lease transaction between an owner/landlord and tenant, the broker that represents the interests of the owner/landlord is referred to as the Landlord Rep.

Leased Space: All the space that has a financial lease obligation. It includes all leased space, regardless of whether the space is currently occupied by a tenant. Leased space also includes space being offered for sublease.

Leasing Activity: The volume of square footage that is committed to and signed under a lease obligation for a specific building or market in a given period of time. It includes direct leases, subleases and renewals of existing leases. It also includes any pre-leasing activity in planned, under construction, or under renovation buildings.

Market: Geographic boundaries that serve to delineate core areas that are competitive with each other and constitute a generally accepted primary competitive set of areas. Markets are building-type specific, and are non-overlapping contiguous geographic designations having a cumulative sum that matches the boundaries of the entire Region (See also Region). Markets can be further subdivided into Submarkets. (See also Submarkets.)

BROWARD COUNTY OFFICE MARKET

Multi-Tenant Buildings Buildings that house more than one tenant at a given time. Usually, multi-tenant buildings were designed and built to accommodate many different floor plans and designs for different tenant needs. (See also: Tenancy).

Net Absorption The net change in occupied space over a given period of time. Unless otherwise noted Net Absorption includes direct and sublease space.

Net Rental Rate A rental rate that excludes certain expenses that a tenant could incur in occupying office space. Such expenses are expected to be paid directly by the tenant and may include janitorial costs, electricity, utilities, taxes, insurance and other related costs.

New Space Sometimes called first generation space, refers to space that has never been occupied and/or leased by a tenant.

Occupied Space Space that is physically occupied by a tenant. It does not include leased space that is not currently occupied by a tenant.

Office Building A type of commercial building used exclusively or primarily for office use (business), as opposed to manufacturing, warehousing, or other uses. Office buildings may sometimes have other associated uses within part of the building, i.e., retail sales, financial, or restaurant, usually on the ground floor.

Owner The company, entity, or individual that holds title on a given building or property.

Planned/Proposed The status of a building that has been announced for future development but not yet started construction.

Preleased Space The amount of space in a building that has been leased prior to its construction completion date, or certificate of occupancy date.

Price/SF Calculated by dividing the price of a building (either sales price or asking sales price) by the Rentable Building Area (RBA).

Property Manager The company and/or person responsible for the day-to-day operations of a building, such as cleaning, trash removal, etc. The property manager also makes sure that the various systems within the building, such as the elevators, HVAC, and electrical systems, are functioning properly.

Quoted Rental Rate The asking rate per square foot for a particular building or unit of space by a broker or property owner. Quoted rental rates may differ from the actual rates paid by tenants following the negotiation of all terms and conditions in a specific lease.

RBA Abbreviation for Rentable Building Area. (See also: Rentable Building Area)

Region Core areas containing a large population nucleus, that together with adjacent communities have a high degree of economic and social integration. Regions are further divided into market areas, called Markets. (See also: Markets)

Ratet Space Sometimes called second generation or direct space, refers to existing space that has previously been occupied by another tenant.

Rentable Building Area (RBA) The total square footage of a building that can be occupied by or assigned to a tenant for the purpose of determining a tenant's rental obligation. Generally RBA includes a percentage of common areas including all hallways, main lobbies, bathrooms, and telephone closets.

Rental Rates The annual costs of occupancy for a particular space quoted on a per square foot basis.

Sales Price The total dollar amount paid for a particular property at a particular point in time.

Sales Volume The sum of sales prices for a given group of buildings in a given time period.

Seller The individual, group, company, or entity that sells a particular commercial real estate asset.

SF Abbreviation for Square Feet.

Single-Tenant Buildings Buildings that are occupied, or intended to be occupied by a single tenant. (See also: Build-to-suit and Tenancy)

Sublease Space Space that has been leased by a tenant and is being offered for lease back to the market by the tenant with the lease obligation. Sublease space is sometimes referred to as sublet space.

Submarkets Specific geographic boundaries that serve to delineate a core group of buildings that are competitive with each other and constitute a generally accepted primary competitive set, or peer group. Submarkets are building type specific (office, industrial, retail, etc.), with distinct boundaries dependent on different factors relevant to each building type. Submarkets are non-overlapping, contiguous geographic designations having a cumulative sum that matches the boundaries of the Market they are located within (See also: Market).

Suburban The Suburban and Central Business District (CBD) designations refer to a particular geographic area within a metropolitan statistical area (MSA). Suburban is defined as including all office inventory not located in the CBD. (See also: CBD)

Tenancy A term used to indicate whether or not a building is occupied by multiple tenants (See also: Multi-tenant) or a single tenant. (See also: Single-tenant)

Tenant Rep Tenant Rep stands for Tenant Representative. In a typical lease transaction between an owner/landlord and tenant, the broker that represents the interests of the tenant is referred to as a Tenant Rep.

Time On Market A measure of how long a currently available space has been marketed for lease, regardless of whether it is vacant or occupied.

Under Construction The status of a building that is in the process of being developed, assembled, built or constructed. A building is considered to be under construction after it has begun construction and until it receives a certificate of occupancy.

Vacancy Rates A measurement expressed as a percentage of the total amount of physically vacant space divided by the total amount of existing inventory. Under construction space generally is not included in vacancy calculations.

Vacant Space Space that is not currently occupied by a tenant, regardless of any lease obligation that may be on the space. Vacant space could be space that is either available or not available. For example, sublease space that is currently being paid for by a tenant but not occupied by that tenant, would be considered vacant space. Likewise, space that has been leased but not yet occupied because of finish work being done, would also be considered vacant space.

Weighted Average Rental Rates Rental rates that are calculated by factoring in, or weighting, the square footage associated with each particular rental rate. This has the effect of causing rental rates on larger spaces to affect the average more than that of smaller spaces. The weighted average rental rate is calculated by taking the ratio of the square footage associated with each rental rate to the square footage associated with all rental rates, multiplying the rental rate by that ratio, and then adding together all the resulting numbers.

Year Built The year in which a building completed construction and was issued a certificate of occupancy.

YTD Abbreviation for Year-to-Date. Describes statistics that are cumulative from the beginning of a calendar year through whatever time period is being studied.

BROWARD COUNTY OFFICE MARKET

OVERVIEW

BROWARD COUNTY'S VACANCY DECREASES TO 9.8%

Net Absorption Positive 633,958 SF in the Quarter

The Broward County Office market ended the second quarter 2005 with a vacancy rate of 9.8%. The vacancy rate was down over the previous quarter, with net absorption totaling positive 633,958 square feet in the second quarter. Vacant sublease space decreased in the quarter, ending the quarter at 181,181 square feet. Rental rates ended the second quarter at \$22.57, a increase over the previous quarter. A total of 6 buildings delivered to the market in the quarter totaling 188,687 square feet, with 669,489 square feet still under construction at the end of the quarter.

Absorption

Net absorption for the overall Broward County office market was positive 633,958 square feet in the second quarter 2005. That compares to positive 574,083 square feet in the first quarter 2005, positive 539,233 square feet in the fourth quarter 2004, and positive 413,576 square feet in the third quarter 2004.

The Class-A office market recorded net absorption of positive 111,888 square feet in the second quarter 2005, compared to positive 146,657 square feet in the first quarter 2005, positive 221,932 in the fourth quarter 2004, and positive 201,031 in the third quarter 2004.

The Class-B office market recorded net absorption of positive 380,168 square feet in the second quarter 2005, compared to positive 379,556 square feet in the first quarter 2005, positive 199,484 in the fourth quarter 2004, and positive 249,320 in the third quarter 2004.

The Class-C office market recorded net absorption of positive 141,902 square feet in the second quarter 2005 compared to positive 47,870 square feet in the first quarter 2005, positive

117,819 in the fourth quarter 2004, and negative (36,775) in the third quarter 2004.

Net absorption for Broward County's central business district was positive 108,945 square feet in the second quarter 2005. That compares to positive 36,689 square feet in the first quarter 2005, positive 104,958 in the fourth quarter 2004, and negative (64,233) in the third quarter 2004.

Net absorption for the suburban markets was positive 505,703 square feet in the second quarter 2005. That compares to positive 520,894 square feet in first quarter 2005, positive 377,445 in the fourth quarter 2004, and positive 434,917 in the third quarter 2004.

Vacancy

The office vacancy rate in the Broward County market area decreased to 9.8% at the end of the second quarter 2005. The vacancy rate was 10.7% at the end of the first quarter 2005, 11.6% at the end of the fourth quarter 2004, and 12.2% at the end of the third quarter 2004.

Class-A projects reported a vacancy rate of 14.3% at the end of the second quarter 2005, 14.5% at the end of the first quarter 2005, 15.6% at the end of the fourth quarter 2004, and 16.5% at the end of the third quarter 2004.

Class-B projects reported a vacancy rate of 9.8% at the end of the second quarter 2005, 11.1% at the end of the first quarter 2005, 12.3% at the end of the fourth quarter 2004, and 12.7% at the end of the third quarter 2004.

Class-C projects reported a vacancy rate of 6.0% at the end of the second quarter 2005, 6.9% at the end of first quarter 2005, 7.2% at the end of the fourth quarter 2004, and 7.9% at

THE COSTAR OFFICE REPORT

1

BROWARD COUNTY OFFICE MARKET

OVERVIEW

the end of the third quarter 2004.

The overall vacancy rate in Broward County's central business district at the end of the second quarter 2005 decreased to 12.4%. The vacancy rate was 13.8% at the end of the first quarter 2005, 14.4% at the end of the fourth quarter 2004, and 15.0% at the end of the third quarter 2004.

The vacancy rate in the suburban markets decreased to 9.3% in the second quarter 2005. The vacancy rate was 10.1% at the end of the first quarter 2005, 11.1% at the end of the fourth quarter 2004, and 11.7% at the end of the third quarter 2004.

Largest Lease Signings

The largest leases reported signed in Broward County include: 33,800 s.f. leased by CorSolutions, Inc. at the Atlantech Tower in Ft. Lauderdale, 18,720 leased by Stearns, Weaver, Miller, Weisler at the New River Center, and 12,302 leased by Ace Mortgage at Cypress Financial Center.

Sublease Vacancy

The amount of vacant sublease space in the Broward County market decreased to 181,181 square feet by the end of the second quarter 2005, from 319,950 square feet at the end of the first quarter 2005. There was 474,732 square feet vacant at the end of the fourth quarter 2004 and 462,340 square feet at the end of the third quarter 2004.

Broward County's Class-A projects reported vacant sublease space of 152,463 square feet at the end of second quarter 2005, up from the 142,687 square feet reported at the end of the first quarter 2005. There were 164,238 square feet of sublease space vacant at the end of the fourth quarter 2004, and 213,234 square feet at the end of the third quarter 2004.

Class-B projects reported vacant sublease space of 24,761 square feet at the end of the second quarter 2005, down from the 58,927 square feet reported at the end of the first quarter 2005. At the end of the fourth quarter 2004 there were 189,573 square feet, and at the end of the third quarter 2004 there were 125,267

square feet vacant.

Class-C projects reported decreased vacant sublease space from the first quarter 2005 to the second quarter 2005. Sublease vacancy went from 118,336 square feet to 3,953 square feet during that time. There was 120,921 square feet at the end of the fourth quarter 2004, and 123,839 square feet at the end of the third quarter 2004.

Sublease vacancy in Broward County's central business district stood at 47,263 square feet at the end of the second quarter 2005. It was 26,665 square feet at the end of the first quarter 2005, 27,516 square feet at the end of the fourth quarter 2004, and 33,530 square feet at the end of the third quarter 2004.

Sublease vacancy in the suburban markets ended the second quarter 2005 at 133,916 square feet. At the end of the first quarter 2005 sublease vacancy was 293,285 square feet, was 447,216 square feet at the end of the fourth quarter 2004, and was 428,810 square feet at the end of the third quarter 2004.

Rental Rates

The average quoted asking rental rate for available office space, all classes, was \$22.57 per-square-foot per year at the end of the second quarter 2005 in the Broward County market area. This represented a 0.2% increase in quoted rental rates from the end of the first quarter 2005, when rents were reported at \$22.53 per-square-foot.

The average quoted rate within the Class-A sector was \$25.55 at the end of the second quarter 2005, while Class-B rates stood at \$21.26, and Class-C rates at \$19.27. At the end of the first quarter 2005, Class-A rates were \$25.35 per-square-foot, Class-B rates were \$21.25, and Class-C rates were \$18.48.

The average quoted asking rental rate in Broward County's CBD was \$26.68 at the end of the second quarter 2005, and \$21.70 in the suburban markets. In the first quarter 2005, quoted rates were \$26.04 in the CBD and \$21.74 in the suburbs.

Deliveries and Construction

During the second quarter 2005, 6 buildings totaling 188,687 square feet were completed in the Broward County market area. This compares to 9 buildings totaling 148,161 square feet that were completed in the first quarter 2005, 12 buildings totaling 230,253 square feet completed in the fourth quarter 2004, and 318,274 square feet in 12 buildings completed in the third quarter 2004.

There were 669,489 square feet of office space under construction at the end of the second quarter 2005.

Some of the notable 2005 deliveries include: Cornerstone Two, a 110,000-square-foot facility that delivered in second quarter 2005 and is now reported to be leased by DHL Worldwide, and Marina Mile Business Parks Bldg 2, a 43,826-square-foot condo building that delivered in first quarter 2005 and is now sold out.

BROWARD COUNTY OFFICE MARKET

MARKETS

CoSTAR MARKETS

In analyzing metropolitan areas in the U.S., CoStar has developed geographic designations to help group properties together, called Regions, Markets and Submarkets. Regions are the equivalent of metropolitan areas, or areas containing a large population nucleus, that together with adjacent communities have a high degree of economic and social integration. Regions are then divided into Markets, which are core areas within a metropolitan area that are known to be competitive with each other in terms of attracting and keeping tenants. Markets are then further subdivided into smaller units called Submarkets, which serve to delineate a core group of buildings that are competitive with each other and constitute a generally accepted competitive set, or peer group.

U.S. EQUITIES – BACKGROUND INFORMATION

U.S. Equities Realty is a national, full-service real estate company headquartered in Chicago. The firm, which has expanded its services into South America, is involved in six major areas of real estate activity:

- providing comprehensive facility management, asset management, property management and leasing services to other owners and developers of all types of commercial properties;
- providing consulting and analysis services to owners and large users of office space in the areas of data collection, database design, administrative controls, management reporting, occupancy cost analysis, tax and expense escalation reviews and lease audits;
- consulting with banks, other financial institutions, corporations, law firms, accounting firms, professional associations and other large organizations in the analysis and management of their space needs and/or real estate portfolios and the structuring and negotiation of acquisition, development and disposition transactions to satisfy those needs;
- providing comprehensive construction and program management services;
- acquiring, developing, leasing and managing commercial buildings for its own and its investors' portfolios; and
- representing investors and owners in commercial real estate sales and acquisitions.

U.S. Equities is one of the most stable and highly respected privately-held, full-service real estate firms in the country. Chicago-based, the firm is recognized for its highly skilled professional staff, broad-based capabilities and commitment to client service. Founded in 1978 by Robert A. Wislow and Camille P. Julmy, who serve as chairman and vice-chairman respectively, U.S. Equities now includes four additional principals: Nancy A. Pacher, president and chief operating officer; John A. Garbossa, managing director and executive vice president; Katherine K. Scott, managing director and executive vice president; and Martin Stern, executive vice president. Each principal of the firm is actively involved in client work with a "hands-on" approach that has become a hallmark of the level of professionalism and attention that U.S. Equities brings to every assignment.

The company enjoys preeminent standing among the country's top-tier real estate firms and has earned an outstanding reputation through exceptional performance by its four business groups: Real Estate Consulting Services, Development/Program Management, Investment Services, and Asset Management Services. In 1997, U.S. Equities expanded into South America opening an office in Buenos Aires, Argentina; followed by another office in São Paulo, Brazil, in 1999 and another in Santiago, Chile, in 2000.

U.S. Equities is known for the capabilities and technical diversity of its more than 500 employees, many of them longtime colleagues. In addition to their professional responsibilities, U.S. Equities' staff takes an active role in many civic affairs, serving on a variety of government-appointed committees as well as business, cultural and community organizations.

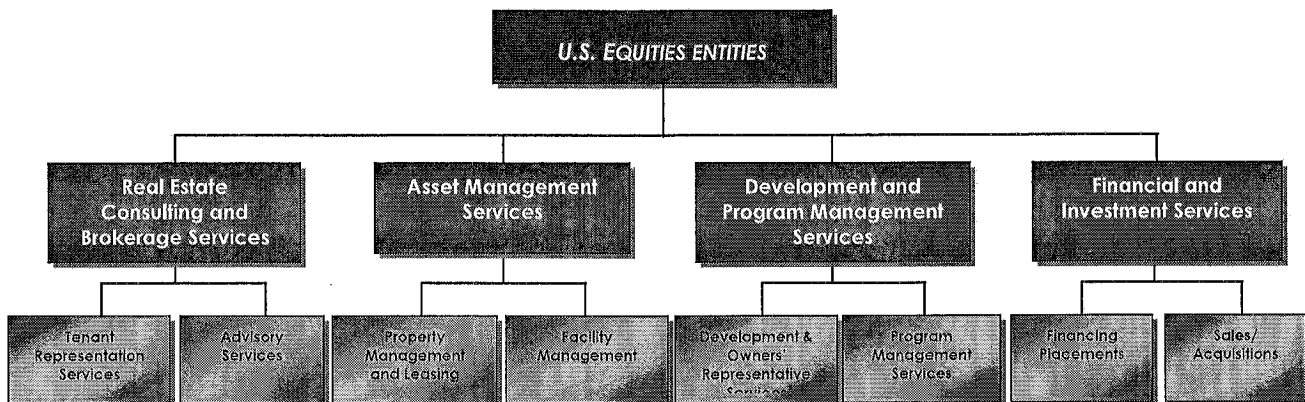

CURRENT SCOPE OF SERVICES

U.S. Equities is currently organized into the following four major client-based divisions:

Asset Management Services
Investment Services
Real Estate Consulting Services
Development/Program Management Services

The technology support, accounting/human resources and marketing departments are support groups, set up to serve the needs of all of those within our organization and, where appropriate, to provide direct assistance to clients as well.

U.S. Equities' services are provided in essentially the same manner throughout the entire company. For each client and assignment, a team is assembled by the principal-in-charge of the service-providing group. He or she draws from the pool of professional talent, being cognizant at all times of workloads, expertise and experience given the nature, complexity and time commitment needed. Professionals from the other business groups are then drawn in as active participants, project team members and/or advisors.

ASSET MANAGEMENT SERVICES

Since its inception, U.S. Equities has been deeply committed to providing the finest asset management services possible to owners of office buildings and associated properties such as retail and parking facilities. This has been the primary focus of our business. In 1978, our first year of operation, we assumed the management, marketing and leasing responsibilities for the Midwest Federal Plaza in Minneapolis, Minnesota, a mixed-use, twin tower 900,000 square foot office building with a two-story retail complex at its base and an integrated 850-space parking garage. Over the next five years we supervised a highly successful repositioning and two profitable sales of this property. Our track record with Midwest Federal Plaza began our highly successful 25-year track record in the asset management services arena. Fundamental to the company's organization and the successful implementation of its asset management programs is a dedicated, skilled group of management and marketing professionals who are a dominant force in the marketplace. Asset

management, specifically the management of high traffic, office-based, mixed-use properties for third-party clients has always been one of the cornerstones of U.S. Equities' business.

Our firm's office-based, mixed-use property assignments include 224 South Michigan Avenue (the Santa Fe Building), The Office Tower at 676 North Michigan Avenue, 20 North Michigan Avenue, 555 West Adams Street, 550 West Van Buren, 939 North Avenue Collection, Orchard Point Office Center and University Center. Over the past several years, we have managed, leased, renovated and/or sold other major office properties such as John Hancock Center, 150 North Michigan Avenue, 55 West Monroe, the Peoples Gas Building, 300 North Michigan Avenue, O'Hare Plaza and Woodfield Corporate Center. Several of these assignments required repositioning of the property through partial or complete redevelopment projects, which included major parking, mechanical, and technological modernization essential for attracting and retaining high-quality, long-term office tenants.

Our firm was development consultant and remains property manager for 555 West Adams Street, one of the country's most security-sensitive, mechanically and technologically sophisticated buildings. We also were the developers of One Financial Place, a one million square foot mixed-use office and trading facility and the world's largest interconnected financial center. One Financial Place remains one of the most technologically advanced buildings in the world. Our experiences with 555 West Adams Street, One Financial Place and our other renovation and repositioning projects help U.S. Equities understand how to deliver and maintain superfunctional, efficient, high-tech and secure office environments.

Over our firm's history, we have used our office expertise as a base from which to develop a broad range of property management successes. We have experience managing mixed-use rail station properties, which include office and retail such as the LaSalle Street Station in Chicago's south Loop, 30th Street Station and the Suburban Station complexes in Philadelphia, Pennsylvania, the Amtrak Midwest Reservation Sales Office in Chicago, Chicago Union Station, and the historic Denver Union Station in Denver, Colorado. We manage corporate facilities for financial institutions and multinational firms, office properties for county and city governments, park district property and office and educational facilities for elementary, secondary and college institutions.

U.S. Equities' current asset management portfolio includes more than 650 properties totaling more than 34 million square feet of mixed-use commercial, retail and industrial space for nearly 50 clients. This portfolio includes a 1.75 million square foot management assignment in Buenos Aires, Argentina and a 1.7 million square foot portfolio in Santiago, Chile. Owners for whom the firm has leased and/or managed properties include large, national organizations and institutions such as John Hancock Mutual Life Insurance Co., Prudential Realty Group, Mutual of New York, Mass Mutual, TransUnion Corp., Catellus Development and New York Life as well as government bodies, major corporations and entrepreneurial real estate investment groups.

In our early years, the firm capitalized on the management and leasing expertise brought from LaSalle Partners, Gerald Hines Interests, and Fidinam, Inc. by Bob Wislow and Camille Julmy. As we initially expanded our asset management group, because of the very manageable size of our organization, Bob Wislow and Camille Julmy continued to personally oversee and manage the firm's leasing activities for our client's properties. As our management responsibilities continued to grow, we expanded our executive management staff. Bill Vail, senior vice president, joined us from Farnsworth, Palmer & Company in 1980 and was placed in charge of property operations. Katherine Scott, a former partner at Boston-based Winthrop Financial Associates, joined U.S. Equities in 1992

and today, as managing director, directs the activities of our entire asset management group. Dean Johnson, formerly with JMB Realty Corporation, joined us in 1992 and currently serves as a senior vice president.

It is under this team's leadership that we have continued to meet and exceed the expectations of the institutions, corporations and investors who make up our asset management client base. More than 96 percent of the firm's asset management work is performed for third-party properties in which U.S. Equities has no ownership interests.

Direct responsibility for asset management programs lies with seven senior-level executives. They work together to provide sophisticated, cost-effective operations and maintenance programs as well as strategic capital improvement programs, financial plans and leasing programs to enhance a property's value with particular attention given to public areas seen by tenants, visitors and prospective tenants or purchasers of the property. Each building is viewed as a unique business from an individual ownership perspective. Every decision is made with this view in mind. We work closely with our clients in the creation of both long-range and situation-specific strategic positioning plans for each facility.

Facilities Management Services

Under the structure of our Asset Management Group, U.S. Equities provides facilities management services with an experience range from privately-held, owner-occupied facilities to public and quasi-governmental facilities such as schools, transportation centers and recreational areas.

By providing asset management services for more than 20 years, our professionals have developed and perfected a wide range of systems, programs and techniques that are now used in our facility management assignments. In addition, our staff includes several key members whose real estate careers began in corporate facilities management departments. This gives us the experience and perspective to provide facilities management services both today and tomorrow as this relatively new field continues to evolve.

Over the past eight to ten years the field of facilities management has already rapidly evolved and become more sophisticated. Each new project requires that the management team work with the client to fully understand the client's individual and, often times, unique needs. Only with that understanding can the management team successfully draw upon their years of experience in the field to custom fit a program that will work for the client.

The common element found in virtually all facilities management assignments is the client's desire to concentrate on its core business while looking to the specialized experience and expertise of professional real estate service firms. Minimally, this service will typically involve property maintenance and operations, but often times includes construction management, leasing services, architectural and engineering services and long range strategic planning related to housing and real estate holdings.

Our primary objectives in providing management services are as follows:

- establish single point of accountability for real estate and facility-related services
- increase value of real estate holdings through effective asset management
- reduce operating expenses

- allow client to focus additional time, energy and internal resources on its core business and competencies
- increase (or standardize) level of service provided to facility occupants
- establish means for benchmarking facility performance across a portfolio
- segregate facilities management expenses from core business operations

These objectives could be listed in any order as their importance is relative to the needs of each individual client. It is essential that we come in with our expertise, experience and ideas; but that we also come in with an open mind to determine the client's true priorities. For example, we cannot automatically assume that expense reductions are more important than increased service. That determination must be made with the client. Our job is to present the client with alternatives and their quantitative and qualitative impact, thus enabling the client to make better informed business decisions.

With those objectives as a starting point, facilities management can include a large variety of services including other non-real estate functions such as reprographics, purchasing, fleet management and other services that support the core business. The broader the range of services handled in a facilities management assignment, the more likely it is that the service provider becomes a true strategic partner of its client rather than simply a contracted service.

Some of the services frequently provided under a facilities management agreement include:

- Contract management
- Operations and maintenance of physical plant and building grounds
- Operating and capital budget preparation and administration
- Full financial reporting
- Facility audits
- Facility benchmarking
- Real estate tax consulting coordination
- Construction and project management
- Space utilization and space planning services
- Furniture repair
- Technical and consulting services
- Leasing services
- Document management
- Lease audit and abstract services
- Management of other support services including:
 - food services
 - security services
 - reprographics
 - fleet management
 - shipping and receiving
 - internal mail distribution

U.S. Equities is capable of providing all of the services identified above with internal resources, our own alliances or in some cases, through the existing structures and vendor relationships established by the client.

Our experience in providing facilities management services to a wide range of clients with very different priorities has taught us valuable lessons. It has reinforced perhaps the single most important component in being successful in facilities management - every client has its own unique set of needs. We must enter into each new assignment with an open mind, providing an effective forum for decision making and identifying priorities without forcing any predetermined standards on our client. Our ability to meet our client's objectives while effectively blending into their organization and taking the time to understand their corporate or institutional culture has contributed significantly to our success.

Product Leasing

A major part of the success of the asset management services division has come from our strength in developing and implementing strategic leasing plans. U.S. Equities fields one of the most talented and experienced product teams (i.e., leasing or sales on behalf of owners and landlords) in the metropolitan Chicago market. Our philosophy centers on the creation of a unified marketing concept for each property, which sets it apart from its competition. That concept is carried through all phases of marketing, leasing and management. We believe the cornerstone to any successful leasing or sales effort is an organized approach to its implementation and "hands-on" management of all aspects of the marketing process.

In the years we have managed, leased and sold or otherwise disposed of property assets for third-party owners, we have consistently achieved performance levels that lead the market. This success has been reached both in bringing new buildings and properties to the market (One Financial Place - 60 percent preleased prior to completion of construction, 85 percent leased within 11 months of opening, 95 percent leased within the next 7 months all at above-market rates; and 20 North Michigan Avenue - 95 percent leased within 10 months of opening), as well as cases in which we had to reposition existing properties with stalled leasing programs or other marketing problems (150 North Michigan Avenue - 98 percent leased within one year of U.S. Equities taking over after leasing had stalled at 84 percent; the Santa Fe Building - occupancy brought from 53 to 85 percent in less than one year after U.S. Equities took over; and the John Hancock Center - office occupancy brought from 47% to 96% and retail occupancy brought from zero to 98% in five years); dramatic turnarounds leasing and managing Woodfield Corporate Center, and 55 West Monroe resulted in profitable sales of both major assets by institutional owners.

We have had similar results on the sales side of dispositions. For example, in more than 20 individual sale transactions for the Continental Bank during the 1980s, we were ahead of both schedule and budget (i.e., net return to the Bank) on every single asset sold. This kind of success comes from knowing our product, knowing the market and knowing how to access that market to maximize the performance of the asset and benefit to its owner.

The Asset Management Services division is headed by Camille Julmy, vice chairman and Katherine Scott, managing director and executive vice president.

In-House Marketing Capabilities

The scope and strength of our in-house marketing group is one of the things that sets U.S. Equities apart from our competition. We believe it to be a major reason why we have led the market in leasing, selling and marketing the properties we represent. We were the first Chicago real estate company to create an in-house marketing team and we have always been in the forefront in this area.

Since its formation, our marketing group has directed marketing activities for all properties leased or sold on our clients' behalf. Under the active guidance of Bob Wislow, our marketing group works in conjunction with our leasing and disposition teams for each project to devise marketing programs and oversee the creation and production of all marketing materials and the implementation of all aspects of each marketing program. We coordinate the production of flyers, brochures, announcements, invitations, building signage, construction barricades and interior signage, as well as planning and implementing broker relations activities and media services. We maintain an active media database and are in weekly contact with reporters covering real estate and business. Because of the volume of work we do, we are able to gain favorable rates with outside designers, printers, other vendors and suppliers of specialty items, as well as being an agency of record with the ability to gain percentage discounts on all media advertising, which discounts we pass along directly to our clients.

Technical Resource Services

U.S. Equities supports its property and facility management assignments with a mechanical, electrical, plumbing (MEP) and construction related Technical Services department, staffed with a team of broadly experienced, full time professionals.

The Technical Services group provides consulting services that include, but are not limited to, MEP systems inspections, energy use audits and review, energy procurement options investigation and analyses, peer review and value engineering of third party studies, base building project management and tenant build-out coordination and oversight.

When the scope of work requires resources or expertise exceeding the capabilities of the on-site facility management staff and the Technical Services group, we have the ability to draw upon the deeper resources of our Development/Program Management division, and we occasionally employ outside consultants and other professional resources for very specialized needs as appropriate and as approved by our client.

INVESTMENT SERVICES

Since U.S. Equities' was formed in 1978, its principals have executed finance and investment transactions for their various clients, as well as for their own account, providing acquisition, disposition and financing services. In 1996, the firm formally organized an investment group to provide a complete spectrum of transactional services, including hold/sell/finance analysis, valuation analysis, preparation of finance and sales brochures, marketing, brokerage, qualification of prospective investors, site inspections and coordination of due diligence and closing procedures.

Over the last ten years, the Financial and Investment Services group has successfully executed capital markets assignments totaling over 17 million square feet of commercial space and land, valued at approximately \$1.3 billion. Recent transactions include:

Long-term fixed rate financing totaling \$232,000,000 for a 1.3 million square foot mixed-use development in Chicago's River North area;

Sale of the 76,000 square foot Chicago Sun-Times headquarters site for the new Trump Tower Chicago development;

Purchase of the two building, 350,000 square foot former Pfizer headquarters in Skokie, Illinois;

Sale of a 175,000 square foot grocery anchored shopping center in Chicago;

Purchase of a 286,000 square foot, class A office building in the O'Hare office market of Chicago on behalf of a regional bank;

Sale of a 1.6 million square foot industrial portfolio located in the Chicago suburbs;

Long-term fixed rate financing for a high-end retail development at 840 North Michigan Avenue.

The Investment Services group is headed by James M. Whittington, executive vice president, with Camille Julmy, vice chairman, as guiding partner.

REAL ESTATE CONSULTING AND BROKERAGE SERVICES

The professional staff in this group provide brokerage and consulting services to office space users nationwide. Our services are performed on both a transaction as well as on a strategic alliance basis. For a client that employs us on a transaction basis, we provide the full range of consulting and brokerage services including market research, site/building tours, request for proposal drafting and delivery, preparation of analyses and comparisons of financial terms of proposals, buildings and building systems (HVAC, mechanical, electrical, plumbing), transaction negotiations, letter of intent drafting and negotiations, lease and other transaction document negotiations, and ongoing administrative services (such as escalation expense reviews and audits, sublets, expansions, etc.) as needed.

U.S. Equities is a member and the Chicago office affiliate of ONCOR International, an organization of top-ranked, privately-owned, commercial real estate companies that offer a comprehensive selection of corporate-and investor-related services. Our clients benefit from our membership in ONCOR International, which reaches more than 200 global markets. ONCOR's 2,900 specialists have services more than \$60 billion of commercial real estate requirements for worldwide clients over the past five years.

On a national account basis, U.S. Equities has sought and acquired long-term relationships with a group of clients that have in-house real estate expertise but have chosen to outsource work for all or significant parts of their real estate needs to one real estate services provider.

With such clients, we have established alliances that encompass not only the short-term objectives of a given transaction, but also address the area of long-range planning and strategic asset management. For these clients, in addition to providing the services described above for each specific transaction, we help to develop strategies, both short and long term, so that we can ultimately meet the needs of the entire network of space users within the company while assessing how real estate affects the long-range objectives of the organization; help to develop formats to centralize, gather and organize facilities data and institute appropriate administrative controls; create databases; create programs to assess the current use of space and ways to reduce space utilization and costs; anticipate and then manage the transaction process for acquiring and disposing of office space; refine and streamline responsibilities on an ongoing basis; monitor and review operating expenses and real estate tax escalations; and assist them in achieving their global corporate missions by the enlightened use and management of their real estate assets and obligations.

Our strategic alliance clients include: Winston and Strawn; The Boston Consulting Group; Lord, Bissell & Brook; Hinshaw & Culbertson; Huron Consulting Group; Citadel Investment Group; Hewitt Associates; Merck & Co., Inc.; Compuware Corporation; The IBM Corporation; and ABN-AMRO.

The Real Estate Consulting Services division is managed by Nancy Pacher, president & chief operating officer.

On the pages that follow, we list the clients we have served over the years in both a consulting and alliance capacity.

DEVELOPMENT/PROGRAM MANAGEMENT SERVICES

Development

The development arm of U.S. Equities has been responsible for numerous highly visible projects totaling more than 12.7 million square feet. Completed projects include the \$612 million, 1.2 million square foot John H. Stroger, Jr. Hospital of Cook County, including a parking garage and power plant; a 1.1 million square foot corporate headquarters for Compuware in Detroit, including a 4,000 car parking garage; Grand Plaza, a major mixed-use 764-unit apartment complex, including 100,000 square feet of retail space and a 1,000 parking garage in Chicago's River North area; Stony Island Plaza, an urban community shopping center at 95th and Stony Island; Harold Washington Library Center, the nation's largest municipal library; Plaza Escada on Chicago's Magnificent Mile; 20 North Michigan Avenue; One Financial Place, including the Chicago Stock Exchange and the Chicago Board Options Exchange; the Evanston Public Library; the renovation of the Cook County Building; WBEZ Public Radio Station broadcast facility at Navy Pier; The Arts Club of Chicago; the redevelopment of John Hancock Center; the redevelopment of Chicago Union Station; a 500-bed joint facility for American Youth Hostels and Columbia College; a new 90,000 square foot office building for the University of Chicago Press on the University of Chicago's Hyde Park campus; a 400,000 square foot headquarters office building for BankBoston in Buenos Aires, Argentina; a 840,000 square foot BankBoston headquarters office building in Sao Paulo, Brazil and work with the School of the Art Institute to develop a strategic plan addressing the future real estate needs of the school.

Among projects currently in progress are MetraMarket, a 200,000 square foot specialty food, restaurant and retail market in Chicago's west loop at the Ogilvie Transportation Center; a new headquarters' facility for the Spertus Institute of Jewish Studies which will include a museum, classrooms, offices and archival spaces; a new condo tower and church facilities for the Fourth Presbyterian Church; a new 200,000 square foot headquarters and a new 40,000 square foot center of influence for MB Financial; the renovation and repositioning of Suburban Station in downtown Philadelphia; and the donor enhancement projects for Chicago's Millennium Park, which include the Frank Gehry designed Music Pavilion and pedestrian bridge, the Anish Kapoor sculpture and the Jaume Plensa designed Crown Fountain.

The development group has also worked with the City of Chicago on four major assignments: consultant to the Department of Planning and Development for the redevelopment of the 9-block North Loop area of downtown Chicago and other tax increment financing districts; assisting the Department of General Services with its strategic plan for all of the City's real estate assets; consultant to the City of Chicago during its selection process for a master developer for 108 North State Street formerly referred to as Block 37; and overseer for the Office of Budget and Management of the management of a \$50 million Section 108 HUD grant, earmarked for the clean up of sites for industrial redevelopment. U.S. Equities is also the real estate strategic planning consultant to the Chicago Board of Education.

U.S. Equities is noted for its excellence in commercial development. The firm's projects have won numerous awards including:

- **ULI Global Award for Excellence** in 2005 by Urban Land Institute for Millennium Park, Chicago.

- **ULI Award for Excellence** in 2005 by Urban Land Institute for Millennium Park, Chicago.
- **Special Achievement Award** in 2004 by Greater Chicago Commercial Real Estate for Millennium Park, Chicago.
- **Development of the Year Award** in 2003 by Greater North Michigan Avenue Association (GNMAA) for Grand Plaza, Chicago.
- **Special Recognition Award** in 2002 by Greater Chicago Commercial Real Estate for development of John H. Stroger, Jr. Hospital of Cook County.
- **ULI Award for Excellence** in 1999 by Urban Land Institute for the redevelopment of John Hancock Center.
- **ULI Award for Excellence** in 1998 by Urban Land Institute for Harold Washington Library Center.
- **Award of Recognition for New Construction** in 1995 by the Chicago Building Congress for the Evanston Public Library.
- **Developer Of The Year** in 1992 by the National Association of Industrial and Office Parks for the Harold Washington Library, Chicago Union Station and 840 North Michigan Avenue.
- **Developer Of The Year** in 1991 by the *Chicago Sun-Times Commercial Real Estate Awards* for the Harold Washington Library, Chicago Union Station and 840 North Michigan Avenue.
- **Citation of Merit** from *Progressive Architecture* for The Harold Washington Library Center, the nation's largest municipal library.
- **Impact Award** for 1990 by the Chicago Purchasing Council for the Harold Washington Library Center, which had the highest minority impact of any Chicago project.
- **Best New Open Space in Chicago** in 1987 from the Friends of Downtown for the award-winning 52,000 square foot landscaped plaza and sculpture garden at One Financial Place.
- **Renovation Of The Year** in 1986 by the *Chicago Sun-Times Commercial Real Estate Awards* for 20 North Michigan Avenue (the Illinois State Medical Society Building).
- **Development Of The Year** in 1984 by the *Chicago Sun-Times Commercial Real Estate Awards* for One Financial Place. One Financial Place was a South Loop pioneer, converting a derelict railroad station to a new home for the Chicago

Board Options Exchange, the Midwest Stock Exchange, a four star restaurant and the most prestigious new business club in the city, The LaSalle Club.

This group offers a broad range of services and in-house expertise to our clients. Plans, Specifications and Regulatory Approvals
Commissioning and Acceptance

Program Management

Included in the services provided by this division are reviews, analyses of and recommendations about physical plants and facilities, and comprehensive construction and program management services. These services have been provided to hundreds of space users of all sizes, both for space users we represent, and occupants of buildings we manage.

Facilities reviews and analyses are performed on behalf of our clients for a variety of purposes: to assist them in developing plans for upgrading, renovating or retrofitting of facilities, complying with ADA and other code requirements, and developing hazardous materials containment policies, etc.; to advise them on the leasability or salability of properties and enhanced marketability; and to advise them on efficient property utilization. Construction and program management services range from minimal oversight to intense involvement in the design, development, building and construction of projects. Below are brief descriptions of typical construction and program management services we perform:

Facilities Review and Construction Consultation

The professionals in this division act as an adjunct to our consulting group whenever there is a need to perform facilities review. Areas include assessing building operating and structural systems, code compliance, divisibility, space utilization, site adaptability, reconfiguration and construction analyses, and related matters.

Plan Development, Schedule, and Budget

We act as the liaison between the architect/space planner and client in the development of plans for tenant improvements and/or the development of a building. We also assist in the development of realistic schedules and budget, and provide value engineering services.

Bidding

We help decide how projects are to be bid and we review, comment upon and revise bid packages that are delivered to general contractors and subcontractors, holding scope review meetings to assure uniformity and clarity of responses to those bid packages. We subsequently review the contractor submittals and seek clarifications so that all responses may be analyzed on an apples-to-apples basis, analyze all bids and make recommendations based on those analyses.

Construction Monitoring

During the actual construction phase of any project, we act as the mediator of disputes between the architect and general contractor, and conduct periodic inspections of the job sites to determine whether the work is progressing in accordance with the plans.

Punchlist and Post Occupancy

At the completion of construction, we conduct a walk-through with the client, architect and general contractor to create a punchlist of items that need to be corrected or completed and oversee the correction and completion thereof.

The extent of construction-related services and involvement of our development/program management professional staff in any given project depends on the needs of a particular client or the nature of the transaction ultimately negotiated. For example, we have, for some clients, actually developed preliminary specifications for either a build-to-suit development or a speculative high-rise office building in which our client was to be the anchor tenant.

AWARDS

U.S. Equities has received numerous awards and frequent recognition:

- 2005 TOBY Suburban Corporate Facility Award for MB Financial Center, 6111 North River Road, Rosemont, BOMA/Chicago

- 1985 Renovation of the Year Award, Chicago Sun-Times Commercial Real Estate Awards
- 1984 Development of the Year Award, Chicago Sun-Times Commercial Real Estate Awards
- 1983 Best Structure Award, Consulting Engineers Council of Illinois

The company's projects also have been recognized by major awards from such prestigious groups as the Chicago Building Congress, Friends of Downtown, the Brick Institute, the Stone Institute and *Progressive Architecture* magazine. A 1994/95 poll of the Commercial Real Estate Organization (CREO) named U.S. Equities as Chicago's number-one brokerage and property leasing firm.

PROFESSIONAL, CIVIC AND COMMUNITY INVOLVEMENT

Members of U.S. Equities' professional staff are actively involved in local, regional and national real estate groups and hold leadership positions in the following organizations:

- Building Owners and Managers Association (BOMA)
- Chicago Office Leasing Brokers Association (COLBA)
- Commercial Real Estate Organization (CREO)
- Institute of Real Estate Management (IREM)
- International Association of Corporate Real Estate Executives (NACORE)
- International Development Research Council (IDRC)

- International Facility Management Association (IFMA)
- Lambda Alpha International
- ONCOR International
- Society of Industrial and Office Realtors (SIOR)
- Urban Land Institute (ULI)

Executives of the firm demonstrate their commitment to the city through active participation in numerous institutional, civic, community and charitable organizations and hold board and volunteer positions for the following organizations:

Chicago Architecture Foundation

- Chicago Bar Foundation
- Chicago Chamber of Commerce
- Chicago Development Council
- Chicago Plan Commission
- Chicago Urban League Development Corporation
- Children's Memorial Hospital – The Woman's Board
- Columbia College
- DePaul University, Real Estate Center

- Rush-Presbyterian-St. Luke's Medical Center
- Sculpture Chicago
- The Chicago Network
- The School of the Art Institute of Chicago
- U.S. Committee for UNICEF/Chicago
- Women's Business Development Center
-

In addition to his many business interests, Chairman Bob Wislow is a leader in community and civic affairs. He is the first real estate entrepreneur to serve as the Chairman of the Chicagoland Chamber of Commerce where he chaired the Chamber's Economic Development Committee for the past four years. Noteworthy recognitions include the 2002 Award of Honor from the Chicago Building Congress for significant contributions to the building industry and the 1997 COLBY Humanitarian Award, which is issued by COLBA, one of the city's prominent commercial real estate organizations, to a leading individual for his/her outstanding charitable and not-for-profit contributions. As co-chair of the Chicago Development Council, he played an important role in the successful campaign to repeal the 1987 lease tax imposed on office-space users, introduced a progressive new income tax formula to the Illinois legislature in 1988 and twice testified on the City of Chicago's behalf before the U.S. Congress on a proposed light-rail system. Additionally, he was appointed by Mayor Richard Daley to serve on the Metra Commuter Rail Board, the Mayor's Fellows Program and the Financial Research and Advisory Council.

BUSINESS PHILOSOPHY

U.S. Equities has stayed committed to hiring the most experienced people possible and providing them with an atmosphere in which they can work and grow together as a team and in which their success is our success.

The visions, values and goals which guide our firm and set the direction for everything we do are as follows:

- the pursuit of excellence and integrity;
- the absolute commitment to maintain the highest degree of honesty and ethical standards;
- the belief that the ultimate measure of organizational success is in the degree of client satisfaction with the work product;
- the delivery of service through the creation and maintenance of multi-disciplined project teams designed around the requirements of a particular client or group of clients;
- the creation of an integrated business relationship between our client and us; and the utmost respect for the individual.

The principals of U.S. Equities, inspired by the vision and values set forth above, created the following mission statement which forms the foundation for our company's business philosophy.

MISSION STATEMENT

- provide the best possible service to our clients, remembering that our client's interests always come first;
- create and maintain a reputation as the most professional organization in our industry by achieving excellence in everything we do;
- strive to recruit the best people and provide these people with an enjoyable, productive and stimulating work environment;
- encourage and foster teamwork;
- control growth to ensure that we are large enough to undertake any project and yet small enough to maintain the intimacy, loyalty and camaraderie we have developed and treasure; and
- maintain the highest degree of integrity and honesty.

Part of the reason we are able to maintain our high standards, and continue to provide high-quality work and in-depth services to all of our clients is that all important decisions at the company are made by or in consultation with the firm's principals.

In a company of our size, all of our employees are important. We carefully recruit and screen all applicants. We pay all of our professional and support staff salaries and bonuses commensurate with

the quality of work we expect them to deliver. From the doorman to the chairman, we spend a great deal of time developing an esprit de corps, inspiring loyalty and commitment to our mission from everyone at U.S. Equities.
