

PROSPECTUS SUPPLEMENT NO. 1
Dated August 19, 2009
(To Prospectus dated August 19, 2009)

TIMBERLINE RESOURCES CORPORATION

9,425,541 SHARES OF COMMON STOCK

Supplement to Prospectus

This supplements the prospectus dated August 19, 2009, of Timberline Resources Corporation (the “Company”) relating to the sale by certain of our security holders of up to 9,425,541 shares of Common Stock of the Company. You should read this prospectus supplement in conjunction with the prospectus dated August 19, 2009, and this supplement is qualified by reference to the prospectus, except to the extent that the information herein supersedes the information contained in the prospectus. This supplement includes the Company’s quarterly report on Form 10-Q as filed with the Securities and Exchange Commission on August 12, 2009.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement is truthful or complete. Any representation to the contrary is a criminal offense.

This supplement is part of the prospectus and must accompany the prospectus to satisfy prospectus delivery requirements under the Securities Act of 1933, as amended.

The date of this prospectus supplement is August 19, 2009

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

See accompanying notes to consolidated financial statements.

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS:

Timberline Resources Corporation (“Timberline” or “the Company”) was incorporated in August of 1968 under the laws of the state of Idaho as Silver Crystal Mines, Inc., for the purpose of exploring for precious metal deposits and advancing them to production.

In 2006, the Company acquired Kettle Drilling, Inc. (“Kettle Drilling” or “Kettle”) and its Mexican subsidiary, World Wide Exploration S.A. de C.V. (“World Wide”). Kettle provides drilling services to the mining and mineral exploration industries in North America. In September 2008, Kettle Drilling, Inc. changed its name to Timberline Drilling Incorporated (“Timberline Drilling”).

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

- a. *Basis of presentation* – The accompanying unaudited consolidated financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America for interim financial information, as well as the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of the Company’s management, all adjustments (consisting of only normal recurring accruals) considered necessary for a fair presentation of the interim financial statements have been included. Operating results for the three and nine month periods ended June 30, 2009 are not necessarily indicative of the results that may be expected for the full year ending September 30, 2009.

For further information refer to the financial statements and footnotes thereto in the Company’s Annual Report on Form 10-KSB for the year ended September 30, 2008.

- b. *Exploration Expenditures* – All exploration expenditures are expensed as incurred. Significant property acquisition payments for active exploration properties are capitalized. If no mineable ore body is discovered, previously capitalized costs are expensed in the period the property is abandoned.
- c. *Estimates and assumptions* – The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the dates of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and assumptions and could have a material effect on the Company’s reported financial position and results of operations.
- d. *Accounts Receivable* – Accounts receivable are carried at original invoice amount less an estimate for doubtful accounts. Management determines the allowance for doubtful accounts by regularly evaluating individual customer receivables and considering a customer’s financial condition, credit history, and current economic conditions. Trade receivables are written off when deemed uncollectible. Recoveries of receivables previously written off are recorded as income when received.
- e. *Materials and supplies inventory* – Inventories consist primarily of parts, operating supplies, drill rods and drill bits. The Company values its materials and supplies inventory, with the exception of drill rods, at the lower of average cost or market. Drill rods are valued using their average cost less an allowance for rod usage on a per foot drilled basis. Allowances are recorded for inventory considered to be in excess or obsolete.
- f. *Goodwill* - Goodwill relates to the acquisition of Timberline Drilling. In accordance with Statement of Financial Accounting Standards No. 142, “Goodwill and Other Intangible Assets,” at least annually goodwill is tested for impairment by applying a fair value based test. In assessing the value of goodwill, assets and liabilities are assigned to the reporting units and a discounted cash flow analysis is used to determine fair value. There was no impairment loss revealed by this test as of September 30, 2008.
- g. *Reclassifications* – Certain amounts in the prior period financial statements have been reclassified for comparative purposes to conform to current period presentation with no effect on previously reported net loss.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, (continued):

- h. *Provision for Taxes* – Income taxes are provided based upon the liability method of accounting pursuant to Statement of Financial Accounting Standards No. 109, “Accounting for Income Taxes” (hereafter “SFAS No. 109”). Under this approach, deferred income taxes are recorded to reflect the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year-end. A valuation allowance is recorded against the deferred tax asset if management believes it is more likely than not that some portion or all of the deferred tax assets will not be realized.
- i. *Stock-based compensation* – The Company accounts for its stock based compensation in accordance with Statement of Financial Accounting Standards No. 123 (revised 2004), Share-based Payment (“SFAS 123(R)”).

Under SFAS 123(R), the Company is required to select a valuation technique or option-pricing model that meets the criteria as stated in the standard. At present, the Company is continuing to use the Black-Scholes model, which requires the input of some subjective assumptions. These assumptions include estimating the length of time employees will retain their vested stock options before exercising them (“expected life”), the estimated volatility of the Company’s common stock price over the expected term (“volatility”), employee forfeiture rate, the risk-free interest rate and the dividend yield. Changes in the subjective assumptions can materially affect the estimate of fair value of stock-based compensation.

- j. *Net income (loss) per share* – Basic EPS is computed as net income (loss) divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock options, warrants, and other convertible securities.

The dilutive effect of convertible and exercisable securities, in periods of future income as of June 30, 2009 and 2008, would be as follows:

	June 30, 2009	June 30, 2008
Stock options	4,631,669	3,181,668
Warrants	1,337,934	2,401,734
Convertible debt	3,562,146	-
Total possible dilution	<u>9,531,749</u>	<u>5,583,402</u>

At June 30, 2009 and 2008, the effect of the Company’s outstanding options and common stock equivalents would have been anti-dilutive.

On June 27, 2008 the Company repurchased and cancelled 3,525,000 of the 4,700,000 Series A Preferred Stock. Under EITF D-53, the reduction in additional paid-in capital arising from this transaction is treated as a dividend for the purposes of calculating EPS for the three months and nine months ending June 30, 2008.

- k. *New accounting pronouncements* – In September 2006, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 157, Fair Value Measurements, (“SFAS 157”). SFAS 157 establishes a framework for measuring fair value and expands disclosure about fair value measurements, but does not require any new fair value measurements. Effective October 1, 2008, the Company adopted the provisions of SFAS 157 for our financial assets and financial liabilities without a material effect on the Company’s consolidated financial statements. In February 2008, FASB issued Staff position 157-2 which delays the effective date of SFAS 157 for non-financial assets and non-financial liabilities to fiscal years beginning after November 15, 2008. The Company is currently evaluating the impact of adopting SFAS 157 for non-financial assets and non-financial liabilities on our consolidated financial statements.

FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement No. 115*, in the first quarter 2007. This statement allows entities to value financial instruments and certain other items at fair value. The statement provides guidance over the election of the fair value option, including the timing of the election and specific items eligible for the fair value accounting. Changes in fair values would be recorded in earnings. The adoption of this statement on October 1, 2008 did not have a material effect on the Company’s consolidated financial statements.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, (continued):

In December 2007, FASB issued SFAS No. 141R “*Business Combinations*”, (“SFAS 141R”). The revised standard is effective for transactions where the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. SFAS No. 141R will change the accounting for the assets acquired and liabilities assumed in a business combination.

- Acquisition costs will be generally expensed as incurred;
- Noncontrolling interests (formally known as “minority interests”) will be valued at fair value at the acquisition date;
- Acquired contingent liabilities will be recorded at fair value at the acquisition date and subsequently measured at either the higher of such amount or the amount determined under existing guidance for non-acquired contingencies;
- Restructuring costs associated with a business combination will be generally expensed subsequent to the acquisition date; and
- Changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition date generally will affect income tax expense.

It does not appear that the adoption of SFAS No. 141R will have a material effect on our Consolidated Financial Statements. However, any future business acquisitions occurring on or after the beginning of the first annual reporting period on or after December 15, 2008 will be accounted for in accordance with the statement. In December 2007, FASB also issued SFAS No. 160, *Non-controlling Interests in Consolidated Financial Statements, an amendment of ARB 51* (“SFAS 160”). SFAS 160 will change the accounting and reporting for minority interests, which will be re-characterized as non-controlling interests and classified as a component of equity. SFAS 160 requires retroactive adoption of the presentation and disclosure requirements for existing minority interests. SFAS 160 is effective for fiscal years beginning on or after December 15, 2008 and interim periods within those fiscal years. The adoption of this statement is not expected to have a material effect on the Company’s future reported consolidated financial position or results of operations.

In March 2008, FASB issued SFAS No. 161 *Disclosures about Derivative Instruments and Hedging Activities – an amendment of SFAS 133*. This Statement requires enhanced disclosures about an entity’s derivative and hedging activities and thereby improves the transparency of financial reporting. This Statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. This Statement encourages, but does not require, comparative disclosures for earlier periods at initial adoption. The adoption of this statement is not expected to have a material effect on the Company’s future reported financial position or results of operations.

In May 2008, FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (“SFAS 162”). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. It was effective November 15, 2008, following the SEC’s approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. The adoption of this statement is not expected to have a material effect on the Company’s consolidated financial statements.

In May 2009, FASB issued SFAS No. 165, *Subsequent Events* (SFAS 165). SFAS 165 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. This statement is effective for interim and annual periods ending after June 15, 2009. Accordingly, the Company has adopted SFAS 165 in its quarter ending June 30, 2009. The adoption of this statement did not have a material effect on the Company’s consolidated financial statements.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, (continued):

In June 2009, FASB issued SFAS No. 167, *Amendments to FASB Interpretation No. 46R* (“SFAS 167”). SFAS 167 amends FASB Interpretation No. (FIN) 46 (revised December 2003), *Consolidation of Variable Interest Entities* (FIN 46R) to require an analysis to determine whether a variable interest gives the entity a controlling financial interest in a variable interest entity. This statement requires an ongoing reassessment and eliminates the quantitative approach previously required for determining whether an entity is the primary beneficiary. This statement is effective for fiscal years beginning after Nov. 15, 2009. Accordingly, the Company will adopt SFAS 167 in fiscal year 2011 and is currently evaluating the impact of adopting this statement on the consolidated financial statements.

In June 2009, FASB issued SFAS No. 166, *Accounting for Transfers of Financial Assets* (“SFAS 166”). SFAS 166 removes the concept of a qualifying special-purpose entity (QSPE) from SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (SFAS 140) and removes the exception from applying FIN 46R. This statement also clarifies the requirements for isolation and limitations on portions of financial assets that are eligible for sale accounting. This statement is effective for fiscal years beginning after Nov. 15, 2009. Accordingly, the Company will adopt SFAS 166 in fiscal year 2011 and is currently evaluating the impact of adopting this statement on the consolidated financial statements.

NOTE 3 – RELATED PARTY TRANSACTIONS:

On March 10, 2008, the Company entered into an agreement with Douglas Kettle and David and Margaret Deeds providing for severance arrangements relating to the resignation of Messrs. Kettle and Deeds, the President and CEO, respectively, of Timberline Drilling.

Messrs. Kettle and Deeds resigned from Timberline Drilling on May 15, 2008. In connection with the resignations, the Company transferred certain personal property to Messrs. Kettle and Deeds and paid Mr. Kettle and Mr. Deeds a cash severance amount of \$600,000 each at the time of their resignation, as well as the balance of their 2007 bonuses (\$135,822 each) and additional cash severance of \$300,000.

During the quarter ended March 31, 2009, the Company entered into a Settlement and Release Agreement with Douglas Kettle and David and Margaret Deeds (“Kettle Affiliates”). Pursuant to the agreement, the Kettle Affiliates agreed to purchase certain non-utilized assets from the Company and to release any claims against the Company, including their claim to the remaining \$350,000 of severance owing to them on December 31, 2008. The Company released any claims against the Kettle Affiliates, including releasing Mr. Kettle and Mr. Deeds from the remainder of the term of their previous non-competition agreements.

On October 31, 2008, the Company entered into two convertible notes (see Notes 6 and 8); one with Ronald Guill, a director of the Company, and his wife, Stacey Guill, and the other with Small Mine Development, LLC (“SMD”), an Idaho limited liability company owned by Mr. Guill. The Company used the proceeds of the notes to pay off the \$8,000,000 million bridge loan previously provided to the Company by Auramet Trading, LLC (“Auramet”) (See Note 5) and for general working capital purposes.

NOTE 4 – CUSTOMER ADVANCES:

During the quarter ended June 30, 2009, a major customer provided an advance payment for drilling services of \$1,000,000 to the Company and extended its contract with the Company through February 2011. The advance is to be repaid by twenty monthly payments of \$50,000 beginning May 15, 2009 and ending December 15, 2010. The advance was provided pursuant to a contract change order which did not contain any provisions for interest or prepayment penalties, nor any specified right of offset. As of June 30, 2009 and September 30, 2008, customer advances were \$900,000 and none, respectively, and \$300,000 of the remaining customer advance balance was classified as a long-term liability as of June 30, 2009.

NOTE 5 – BRIDGE LOAN FINANCING:

On June 24, 2008, the Company entered into a bridge loan financing arrangement for \$8,000,000 with Auramet Trading, LLC (“Auramet”) under which the Company could draw funds at any time before June 30, 2008. On June 27, 2008 the Company withdrew \$8,000,000, net of a fee equal to 4% of the principal amount of the loan, to repurchase the Company’s then outstanding Series A Preferred Shares.

NOTE 5 – BRIDGE LOAN FINANCING, (continued):

The loan incurred interest at 12% per annum, with interest payable monthly in arrears commencing August 1, 2008, and the principal amount outstanding was due October 31, 2008. On October 31, 2008 the bridge loan principal amount was repaid in full.

Pursuant to the loan's terms, the Company also issued 160,000 shares of the Company's common stock to Auramet after the Company's drawdown of the loan on June 27, 2008. The fair market value of the 160,000 common shares (\$484,800) was recorded on the balance sheet in common stock, additional paid-in capital and deferred financing cost, net. The deferred financing costs were ratably charged to interest expense over the term of the loan. In addition, Auramet received a put option for the 160,000 shares of common stock issued, exercisable ninety days from the maturity date of the bridge loan. On January 29, 2009, Auramet had a onetime option to put some or all of the 160,000 common shares back to the Company at a redemption price of \$2.00 per share.

During the quarter ended March 31, 2009, Auramet indicated its intention to exercise the put option and return the shares to the Company. The Company and Auramet agreed that the Company would issue an additional 535,652 shares of common stock, valued at the trailing 30 day average closing price of the Company's stock of \$0.46 per share, to Auramet in lieu of settling the option with a cash payment. These shares were issued in March 2009 and the change in fair value of the derivative during the nine months ending June 30, 2009 is recorded in loss on derivative in the consolidated statement of operations.

NOTE 6 – CONVERTIBLE NOTE PAYABLE TO RELATED PARTY:

On October 31, 2008, the Company entered into a series of agreements with SMD in connection with a \$5 million loan from SMD. The loan documents included: a convertible note (the "Convertible Term Note"), a credit agreement (the "Credit Agreement"), a collateral assignment and pledge of stock and security agreement (the "Pledge Agreement"), a security agreement (the "Security Agreement") and a right of first refusal over the Company's Butte Highlands property (the "Right of First Refusal").

The Convertible Term Note has a principal amount of \$5 million and is collateralized with all of the stock of Timberline Drilling, Inc., and a Deed of Trust covering the Company's Butte Highlands property in Silver Bow County, Montana (the "Butte Highlands Property").

Pursuant to the terms of the Credit Agreement, the Convertible Term Note bears interest at 10% annually, compounded monthly, with interest due at maturity. The Convertible Term Note is convertible by SMD at any time prior to payment of the note in full, at a conversion price of \$1.50 per share. Should the Company issue any form of equity security other than the Company's common stock, SMD may also convert all or any portion of the outstanding amount under the Convertible Term Note into the new form of equity security at the issuance price of the new form of equity security. Management analyzed the conversion features contained in this note considering EITF No. 00-27 "Application of Issue No. 98-5 to Certain Convertible Instruments", EITF 00-19 "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock," EITF No. 98-5, "Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios", and APB 14, "Accounting for Convertible Debt and Debt Issued with Stock Purchase Warrants." Management's conclusion was that these convertible features are conventional convertible instruments and thus would qualify for equity classification under EITF 00-19. As conventional convertible instruments, the embedded conversion options qualify for the scope exception under FAS 133, and therefore would not be bifurcated from the host instrument.

The Convertible Term Note must be repaid on or before October 31, 2010, including interest due at maturity, and may be prepaid in whole or in part at any time without premium or penalty. If the Company defaults on the Convertible Term Note or any of the related agreements, SMD may declare the Convertible Term Note immediately due and payable, and the Company must pay SMD an origination fee in the amount of \$50,000.

Under the Right of First Refusal, the Company granted SMD a right of first refusal to purchase the Butte Highlands Property on the same terms as those of any bona fide offer from a third-party upon 60 days' notice from the Company of any such offer. In addition, the Company granted SMD a right to develop the Butte Highlands Property on the same terms as those of any bona fide offer to develop the property from a third-party upon 60 days' notice from the Company of any such offer.

TIMBERLINE RESOURCES CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2009

NOTE 7 – INCOME TAXES:

During the three months and nine months ended June 30, 2009, the Company realized an income tax benefit of none and \$145,089, respectively. This benefit represents the difference between the accrued and actual amount of Mexican income taxes paid by the Company's Mexican subsidiary, World Wide Exploration, for the 2008 calendar year.

For the fiscal year ended September 30, 2009 the Company anticipates an effective income tax rate of 31% in Mexico and 0% in the United States due to the availability of accumulated net operating losses to offset any U.S. income taxes.

NOTE 8 – COMMON STOCK AND WARRANTS:

In October, 2008, the Company entered into a short-term convertible note (the "Short-Term Convertible Note") for \$5 million with Ron Guill, a director of the Company, and his wife, Stacey Guill (see Note 3). The Short-Term Convertible Note principal automatically converted into 5,555,556 shares of Company stock (valued at \$0.90 per share) pursuant to the Subscription Agreement described below upon approval of the issuance of the additional shares for listing by the NYSE Amex which occurred in December 2008.

Under the Subscription Agreement, Mr. and Mrs. Guill subscribed to purchase 5,555,556 shares of the Company's common stock at a price of \$0.90 per share.

During the quarter ended March 31, 2009, the Company issued 535,652 shares of common stock, valued at the trailing 30 day average closing price of the Company's stock of \$0.46 per share (\$246,400), to Auramet in lieu of settling a put option held by Auramet with cash (see Note 5).

The following is a summary of the Company's warrants outstanding:

	Warrants		Weighted Average Exercise Price
Outstanding at September 30, 2008	2,301,734	\$	2.45
Issued	-		-
Expired	(963,800)		1.00
Outstanding at June 30, 2009	1,337,934		3.50

These warrants expire as follows:

Warrants	Price	Expiration Date
1,337,934	\$3.50	September 30, 2009
1,337,934		

NOTE 9 – STOCK OPTIONS:

The Company has established the 2005 Equity Incentive Plan (as amended August 31, 2006 and August 22, 2008) to authorize the granting of up to 7,000,000 stock options to employees, directors and consultants. Upon exercise of options, shares are issued from the available authorized shares of the Company. Option awards are granted with an exercise price equal to the market price of the Company's stock at the date of grant.

The fair value of option awards granted during the nine months ended June 30, 2009 and 2008, respectively, was estimated on the date of grant using the assumptions noted in the following table. Total compensation cost charged against operations under the plan for employees was \$38,543 and \$464,088 for the three months ended June 30, 2009 and 2008, respectively. Total compensation cost charged against operations under the plan for employees was \$828,330 and \$963,449 for the nine months ended June 30, 2009 and 2008, respectively. These costs are classified under salaries and

TIMBERLINE RESOURCES CORPORATION AND SUBSIDIARIES

June 30, 2009

NOTE 9 – STOCK OPTIONS, (continued):

benefits expense. Total compensation cost charged against operations under the plan for directors and consultants was \$7,950 and \$29,201 for the three months ended June 30, 2009 and 2008, respectively. Total compensation cost charged against operations under the plan for directors and consultants was \$172,153 and \$105,783 for the nine months ended June 30, 2009 and 2008, respectively. These costs are classified under other general and administrative expenses.

	Nine months ending	
	June 30, 2009	June 30, 2008
Expected volatility	105.30% - 106.60%	82.30%
Weighted-average volatility	105.30% - 106.60%	82.30%
Expected dividends	-	-
Expected term (in years)	3	3
Risk-free rate	1.02% - 1.38%	3.75%

The following is a summary of the Company's options issued under the Amended 2005 Equity Incentive Plan:

	Options	Weighted Average Exercise Price
Outstanding at September 30, 2008	3,917,502	\$ 2.65
Granted	3,005,000	0.33
Exercised	75,000	0.80
Expired and forfeited	(2,215,833)	2.91
Outstanding at June 30, 2009	4,631,669	\$ 1.05
Exercisable at June 30, 2009	2,170,434	\$ 1.23
Weighted average fair value of options granted during the nine months ended June 30, 2009		\$ 0.20

The average remaining contractual term of the options outstanding and exercisable at June 30, 2009 was 3.89 and 3.38 years, respectively. Options exercised were on a cashless basis, resulting in the issuance of 35,000 shares based on the current price of the Company's stock on the date of exercise. As of June 30, 2009, total unrecognized compensation expense related to options was \$1,040,271 and the related weighted-average period over which it is expected to be recognized is approximately 0.70 years. The aggregate intrinsic value of options exercised during the nine months ended June 30, 2009 and 2008 was \$52,500 and none, respectively. The aggregate intrinsic value of options outstanding and exercisable as of June 30, 2009 was \$53,633 and \$18,367, respectively.

NOTE 10 – PREFERRED STOCK:

Timberline is authorized to issue up to 10,000,000 shares of preferred stock, \$.01 par value. The Board of Directors of Timberline is authorized to issue the preferred stock from time to time in series and is further authorized to establish such series, to fix and determine the variations in the relative rights and preferences as between series, to fix voting rights, if any, for each series, and to allow for the conversion of preferred stock into Common Stock.

NOTE 11 – COMMITMENTS AND CONTINGENCIES:

Real Estate Lease Commitments

The Company has real estate lease commitments related to its main office in Coeur d'Alene, Idaho, a facility in Butte, Montana, offices and a shop of Timberline Drilling in Coeur d'Alene, Idaho; and its operational facility in Elko, Nevada. The Company's Mexico subsidiary also leases facilities for its administrative office and warehouse under defined term lease agreements which are for one year. Total office and storage rental expense aggregated \$72,168 and \$83,576 for the three months ended June 30, 2009 and 2008, respectively, and \$219,830 and \$208,722 for the nine months ended June 30, 2009 and 2008, respectively.

Offering Costs Arising From the Proposed Acquisition of SMD

On October 24, 2008, the Company and Ronald Guill mutually agreed by written consent to terminate the Stock Purchase Agreement previously entered into between the Company and Mr. Guill on February 23, 2008, which would have provided for the purchase by the Company of all of Mr. Guill's membership interests in SMD.

The Company had engaged a full service investment banking and institutional securities firm to render an opinion to the Company's Board as to whether the consideration to be paid by the Company for the membership interests of SMD was fair, from a financial point of view. The Company also engaged this firm to arrange for financing of the acquisition of SMD's membership interests. All fees to be paid by the Company for these services were contemplated to be paid out of proceeds raised during the financing.

Subsequent to the termination of the acquisition of SMD and the failure of the investment banking firm to arrange financing, an invoice was received by the Company from the investment banking firm for the provision of the fairness opinion, as well as legal fees incurred by the firm during the course of the financing. The total amount charged for the services provided was \$923,957, and these fees were classified with professional fees in the statement of operations during the quarter ended December 31, 2008. During the quarter ended June 30, 2009, the Company reached an agreement in principle with the investment banking firm to satisfy the outstanding invoice by payment of \$50,000 in cash and issuance of 950,000 common shares of the Company subject to approval by the NYSE Amex. The Stock Settlement and Release Agreement (the "Agreement") between the Company and the investment banking firm was finalized on July 14, 2009. As a result of the Agreement, the amount of accrued offering and acquisition costs included in current liabilities on the Company's consolidated balance sheet at June 30, 2009 has been reduced to \$50,000. The remaining \$346,750, equal to the fair market value of the 950,000 shares of the Company as of the date of the Agreement, has been classified as a long-term liability on the consolidated balance sheet since the liability was settled with common stock of the Company subsequent to the balance sheet date. A corresponding recovery of \$527,207 in professional fees has been recognized in the statement of operations for the three months and nine months ended June 30, 2009.

Unpaid IRS Interest and Penalties

The Company has received notice from the Internal Revenue Service ("IRS") that Timberline Drilling has been assessed late filing penalties for payroll taxes not paid on a timely basis during the period from October 1, 2007 through May 15, 2008. As of June 30, 2009, the balance of those unpaid interest and penalties is \$453,741.

The Company has negotiated a payment plan with the IRS relating to the unpaid interest and penalties owed as of June 30, 2009. In April 2009, the Company began making monthly installment payments on the outstanding balance of interest and penalties. During the nine months ended June 30, 2009, Timberline Drilling's assets became subject to a tax lien until all interest and penalties assessed by the IRS are satisfied. If the Company fails to comply with the negotiated payment plan or is otherwise unable to pay the interest and penalties owed to the IRS, the IRS could force the sale of certain assets of Timberline Drilling to satisfy the interest and penalties due.

Environmental Contingencies

The Company has in past years been engaged in mining in northern Idaho, which is currently the site of a federal Superfund cleanup project. Although the Company is no longer involved in mining in this or other areas at present, the possibility exists that environmental cleanup or other environmental restoration procedures could remain to be completed or mandated by law, causing unpredictable and unexpected liabilities to arise. At the date of these financial statements, the Company is not aware of any environmental issues or litigation relating to any of its current or former properties.

TIMBERLINE RESOURCES CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 12 – SEGMENT INFORMATION:

The Company has three operating segments at June 30, 2009: drilling revenues from Timberline Drilling; drilling revenues in Mexico through Timberline Drilling's subsidiary, World Wide Exploration; and Timberline's exploration activities.

Segment information for the three months and nine months ended June 30, 2009 and 2008 are as follows:

	Three months ending June 30		Nine months ending June 30	
	2009	2008	2009	2008
Revenues:				
Timberline	\$ -	\$ -	\$ -	\$ -
Timberline Drilling	3,592,474	7,318,802	8,823,389	17,983,223
World Wide Exploration	768,663	2,385,011	3,721,828	6,542,042
Total revenues	<u>\$ 4,361,137</u>	<u>\$ 9,703,813</u>	<u>\$ 12,545,217</u>	<u>\$ 24,525,265</u>
Income / (Loss) before income taxes:				
Timberline	\$ (91,033)	\$ (1,325,486)	\$ (4,071,881)	\$ (4,060,370)
Timberline Drilling	270,380	(1,745,974)	(1,536,892)	(1,935,476)
World Wide Exploration	61,714	682,164	(242,774)	1,451,322
Income/ (Loss) before income taxes	<u>\$ 241,061</u>	<u>\$ (2,389,296)</u>	<u>\$ (5,851,547)</u>	<u>\$ (4,544,524)</u>
Total assets:		June 30, 2009		September 30, 2008
Timberline		\$ 1,722,661		\$ 2,803,202
Timberline Drilling		10,081,794		12,456,114
World Wide Exploration		2,764,342		5,110,471
Total assets		<u>\$ 14,568,797</u>		<u>\$ 20,369,787</u>

The accounting policies of the segments are the same as those described in the notes to the consolidated financial statements included in the Company's annual report filed on Form 10-KSB for the fiscal year ended September 30, 2008, after considering newly adopted accounting pronouncements described elsewhere herein. Separate management of each segment is required because each business unit is subject to different marketing, production, and technology strategies.

During the three months and nine months ended June 30, 2009, revenues from transactions with two customers each amounted to 10% or more of our total revenues. Customer A accounted for revenue of \$3,592,474 and customer B accounted for revenue of \$768,663 during the three months ended June 30, 2009. Customer A accounted for revenue of \$7,900,866 and customer B accounted for revenue of \$3,656,981 during the nine months ended June 30, 2009. The revenue for customer A is reported through Timberline Drilling, while the revenue for customer B is reported through World Wide Exploration.

The assets of Timberline are located in the United States. The assets of Timberline Drilling are also located in the United States and their revenues are derived from drilling contracts in the United States. The assets of World Wide Exploration are located in Mexico and their revenues are derived from drilling contracts in Mexico.

Timberline is not an operating entity at this point insofar as they are not generating revenues from the sales of their properties, but they are actively exploring several properties for their mining potential.

NOTE 13 – SUBSEQUENT EVENTS

Butte Highlands Joint Venture Operating Agreement

Subsequent to the quarter ended June 30, 2009, the Company entered into a Joint Venture Operating Agreement with Highland Mining, LLC (“Highland”), an entity controlled by Ronald Guill, a director of the Company. The joint venture entity, Butte Highlands JV, LLC (“BHJV”) was created for the purpose of developing and mining the Butte Highlands Gold Project. As a result of its contribution of the Company’s 100% interest in the Butte Highlands Gold Project to BHJV, the Company holds a 50% interest in BHJV. Under terms of the agreement, the Company will be carried to production by Highland, which will fund all future project exploration and mine development costs.

Under the operating agreement for BHJV, Highland will contribute property and fund all future mine development costs at Butte Highlands. Both the Company’s and Highlands’s share of costs will be paid out of proceeds from future mine production. The BHJV operating agreement stipulates that Highland shall appoint a manager of BHJV and that Highland will manage BHJV until such time as all mine development costs, less \$2 million, are distributed to Highland out of the proceeds from future mine production.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion and analysis of our financial condition and results of operations together with our financial statements and related notes appearing elsewhere in this quarterly report.

Forward-Looking Statements

This quarterly report and the exhibits attached hereto contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements concern the Company's anticipated results and developments in the Company's operations in future periods, planned exploration and development of its properties, plans related to its business and other matters that may occur in the future. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be forward-looking statements. Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events or results to differ from those expressed or implied by the forward-looking statements, including, without limitation:

- risks related to our properties being in the exploration stage;
- risks related our mineral operations being subject to government regulation;
- risks related to our ability to obtain additional capital to develop our resources, if any;
- risks related to mineral exploration and development activities;
- risks related to our insurance coverage for operating risks;
- risks related to the fluctuation of prices for precious and base metals, such as gold, silver and copper;
- risks related to the competitive industry of mineral exploration;
- risks related to our title and rights in our mineral properties;
- risks related to our limited operating history;
- risks related the possible dilution of our common stock from additional financing activities;
- risks related to potential conflicts of interest with our management;
- risks related to our subsidiaries activities; and
- risks related to our shares of common stock.

This list is not exhaustive of the factors that may affect our forward-looking statements. Some of the important risks and uncertainties that could affect forward-looking statements are described further in our annual report on Form 10-KSB for the year ended September 30, 2008, filed with the Securities and Exchange Commission on December 30, 2008, as amended on May 21, 2009. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, believed, estimated or expected. We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. We disclaim any obligation subsequently to revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events.

We qualify all the forward-looking statements contained in this report by the foregoing cautionary statements.

Corporate Background and History

We commenced our exploration stage in January 2004 with the change in the management of the Company. From January 2004 until March 2006, we were strictly a mineral exploration company. Beginning with the management appointments of John Swallow and Paul Dirksen, the addition of Randal Hardy, our acquisition of a drilling services company, and the acquisition of Butte Highlands, we continue to advance our business plan. Prior to our new business model, the addition of new management, the purchase of Timberline Drilling (formerly known as Kettle Drilling), and a more active and focused exploration division, the Company had no reported revenues and accumulated losses.

Timberline Resources Corporation has taken the complementary businesses of drilling and mineral exploration and combined them into a unique, forward-thinking investment vehicle. The Timberline business model provides investors exposure to both the “picks and shovels” and “blue sky” aspects of the mining industry. The “picks and shovels” aspect of our business includes the mining services provided by Timberline Drilling and other potential operating businesses that we may acquire. We use the term “blue sky” to mean the potential of our exploration properties. Because of the nature of exploration for precious metals, a property’s exploration potential is not known until a significant amount of geologic information has been generated. As the work progresses, the potential of the property becomes more and more clear. If the exploration results are favorable, the value of the property may increase significantly. The term “blue sky” refers to the upside potential of that value. We believe our business model offers the opportunity to participate in both the “picks and shovels” and “blue sky” aspects of the business—our shareholders can participate in the markets for precious and base metal mining without the degree of risk inherent to mine operation and/or sole reliance on speculative early-stage drill-plays.

Corporate Overview

Timberline Resources Corp.’s business is comprised of an exploration division and two wholly-owned operating drilling subsidiaries.

Our exploration division is focused on district-scale gold projects with the potential for near-term, low-cost development. In addition to the evaluation of other potential properties and projects, the exploration division is responsible for the acquisition and advancement of our Butte Highlands Gold project that is part of a 50/50 joint venture agreement with Highland Mining, LLC and scheduled to begin development in the latter half of 2009.

Timberline Resources’ operating subsidiaries are Timberline Drilling and its Mexican subsidiary, World Wide Exploration S.A. de C.V. (“WWE”). They provide both surface and underground drilling services in the United States and Mexico, with their two largest clients being Newmont Mining and Exploraciones Mineras Penoles S.A. de C.V., respectively. Both units specialize in underground, hard rock core drilling – a niche business that we believe is well-positioned as the industry matures and exploration projects are advanced into producing mines.

Timberline is listed on the NYSE Amex (“Exchange”) and trades under the symbol “TLR”. On February 13, 2009, we received notice from the Exchange that as of September 30, 2008 the Company was below certain of the Exchange’s continued listing standards due to Timberline’s stockholders’ equity not meeting certain minimum requirements. Timberline submitted a plan of compliance to the Exchange on March 13, 2009.

On May 4, 2009 the Company received notice from the Exchange that the Exchange had accepted its plan of compliance and will continue listing Timberline on the Exchange, subject to certain conditions. While Timberline remains out of compliance with certain listing standards, the Exchange has granted the Company an extension until August 13, 2010 to regain compliance with the Exchange’s continued listing standards. Until Timberline regains compliance, the Company remains subject to periodic review by the Exchange.

Drilling Services

Our underground focus with established customers continues to provide a solid base of operations as a large percentage of the above-ground and more speculative exploration drilling has been cut back and/or delayed during the current industry slowdown. Many companies have delayed exploration plans and reduced their exploration spending in order to conserve cash. While the current economic environment continues to impact drilling demand, we believe that right-sizing efforts initiated at Timberline Drilling in 2008 and continued in 2009, a more balanced level of input costs, availability of qualified labor, and our ongoing focus on profitability will continue to improve the operating results of our drilling subsidiaries.

Over the past year, we have successfully established a new corporate culture in our drilling subsidiaries and have renewed our focus on underground drilling at established mining operations. We have reduced the layers of management between the head office and the field, streamlined our processes and operations, strengthened our balance sheet, and implemented new employee incentive programs. These objectives were achieved under extremely difficult market conditions.

In the previous quarter, Timberline Drilling extended its current contract with Newmont Mining through February 2011, enhancing an already solid relationship. We have established joint planning and safety review teams with Newmont and, furthermore, Newmont has provided us with mine site facilities to support our operations. We believe that the contract extension provides a higher degree of certainty in future cash flows for Timberline Drilling while presenting an excellent foundation for future stability and growth. This also allows us to focus on further improvements in customer service and safety with our largest client.

Also, during our second fiscal quarter, Timberline Drilling agreed to sell several under-utilized, non-core drill rigs, increasing the overall rig utilization rate and decreasing depreciation expenses. Additionally, former management of Timberline Drilling agreed to forego \$350,000 in severance payments. During the quarter ended June 30, 2009, the \$1 million proceeds from the drill sales were received and used to help retire more than \$1.9 million in liabilities.

Our Mexican subsidiary, World Wide Exploration (WWE), has two drills in service and has seen a significant slowdown in drilling activity in 2009. Sources of funding for junior exploration and mining companies are limited and many projects, both base and precious metals, have been delayed or cancelled. We have begun to see marginal increases in demand for drilling projects, but expected pricing levels have lowered anticipated margins to the point that we do not pursue certain contracts that would not be profitable. In addition to market and financing factors, the demand for drilling services in Mexico remains subdued due, in part, to a number of other factors, including increased violence in some areas and public health concerns. As evidenced by its previous results, we have a seasoned and experienced management team at WWE, and the overall situation in Mexico is being monitored closely by our management.

Exploration Division

Our Exploration Division continues to advance our Butte Highlands Gold Project in southwestern Montana. During the quarter, we continued the permitting process, mine and underground exploration planning, and our evaluation of the anticipated mineralization.

Previously, we completed a hydrogeologic study at Butte Highlands. In support of the study, the Company drilled a 1,167-foot groundwater monitoring well to identify groundwater quantity and quality at the project site and sampled surface water from local stream systems. The borehole tests yielded 12 gallons of water per minute for the full length of the monitoring well which is within the range anticipated by Timberline and Small Mine Development, LLC ("SMD"). The hydrogeologic study considered local geology, precipitation, hydrologic basins, and other pertinent information needed to predict water inflow into the anticipated underground workings. Resulting data was used by AMEC Geomatrix to develop a Conceptual Hydrological Model of the deposit to predict potential mine inflow during planned exploration and mine production activities. The positive results of this study represent a significant milestone in the permitting process and the proposed underground exploration and development schedule.

During this quarter we continued our exploration planning, including the requirements and locations for on-site facilities, water handling systems, and site disturbance calculations. All of this data was generated in order to submit a thorough application for the underground exploration permit. We submitted the underground exploration permit application to the State of Montana Department of Environmental Quality in early April 2009.

Subsequent to the quarter we finalized a 50/50 joint-venture agreement with Highland Mining, LLC ("Highland"), an affiliate of SMD and Ron Guill, at Butte Highlands. Under terms of the agreement, Timberline will be carried to production by Highland which will fund all project development costs and is expected to begin development in the summer of 2009. Timberline's 50-percent share of project costs is expected to be paid out of proceeds from future mine production. Given the uncertainty of the marketplace and credit markets, we believe that our strategic partnership with Highland at Butte Highlands provides an excellent opportunity for us and our shareholders by placing our most-advanced project on a development track with relatively small share dilution. We believe this partnership may be a model for future opportunities in underground mine development and mining with SMD and/or other contractors.

Pending proper approvals and permits, which we expect by late summer of this year, Highland and SMD are expected to begin development of the underground ramp to access the mineralized areas, which is expected to allow for additional underground drilling and exploration. The exploration and development phase of the program is expected to take approximately one year and, assuming acceptable permitting and results, is expected to be followed by production in late 2010.

We believe the global economic environment and monetary situation favor a solid and relatively steady gold price for the foreseeable future. Volatility is to be expected, however our view is that we don't require higher gold prices in order to advance our business model. As a company we are focused on our drilling subsidiaries, advancing Butte Highlands and are currently evaluating new opportunities. We have evaluated a number of projects and opportunities in both the services and production aspects of the business and will continue to do so. Our industry and the world have changed in the past year and we anticipate a number of changes in the year ahead. We feel we have the knowledge base to evaluate opportunities – either organically or through mergers and acquisitions – and continue to do so.

Results of Operations for the Three Month and Nine Month Periods ended June 30, 2009 and 2008

Combined Results – Timberline Corporate, Timberline Exploration, Timberline Drilling and WWE

For the three months ended June 30, 2009, we reported \$4,361,137 in revenue compared to \$9,703,813 in the same period of 2008. For the nine months ended June 30, 2009, we reported revenues of \$12,545,217 versus revenues of \$24,525,265 in the same period of 2008. Our revenues are derived entirely from our drilling subsidiaries and are comprised of \$3,592,474 from Timberline Drilling and \$768,663 from WWE for the three months ended June 30, 2009. For the nine months ended June 30, 2009 Timberline Drilling and WWE reported revenues of \$8,823,389 and \$3,721,828, respectively. Gross profit from Timberline Drilling and WWE was \$679,796 and \$122,383, respectively, for the three months ended June 30, 2009 and \$20,693 and \$348,819, respectively, for the nine months ended June 30, 2009.

Our overall after tax net income for the three months ended June 30, 2009 was \$241,061 compared to an overall net loss of \$2,615,278 for the three months ended June 30, 2008. For the nine months ended June 30, 2009, our overall net loss was \$5,706,458 compared to \$5,096,026 for the same period in 2008. Our net income for the three months ended June 30, 2009 is comprised of a loss of \$91,033 for Timberline Corporate and Exploration, offset by net income of \$270,380 for Timberline Drilling and \$61,714 at WWE. Interest expense for the three months ended June 30, 2009 was \$167,309, compared to \$54,924 for the three months ended June 30, 2008. The increase in interest expense is attributable to interest accrued on the Company's long term debt owed to a related party.

Our net loss for the nine months ended June 30, 2009 is comprised of \$4,071,881 for Timberline Corporate and Exploration, \$1,536,892 for Timberline Drilling, and \$97,685 at WWE. Interest expense for the nine months ended June 30, 2009 was \$1,341,007, compared to \$306,864 for the nine months ended June 30, 2008. The increase in interest expense is attributable to interest expense on the Company's bridge loan financing, interest accrued on the Company's long term debt owed to a related party, and interest accrued on the Company's unpaid balance of payroll taxes to the IRS.

Overall the demand for drilling services has declined due to a decrease in demand from the exploration industry and the general economic downturn. Junior resource and exploration stage companies have been adversely affected by the state of the capital markets and many have scaled back or eliminated exploration and development activities. As a result, the demand for drilling services began a steep decline during the second half of 2008 and into 2009. The decline for drilling services and the resulting reduction in the number of Timberline Drilling's drill rigs operating this year versus last year has had an adverse affect on our revenues compared to last year, and we expect revenues for the remainder of 2009 to be less than our corresponding revenues the previous year. In response to the changes in the economic environment, we have implemented cost-cutting measures and stabilized our revenue stream in order to achieve profitability. We expect that our continued implementation of operational improvements and focus on financial prudence will result in continued positive earnings, more healthy margins, and more positive cash flow.

Timberline Drilling and WWE provide drilling services on a contract basis, which often requires long lead times based on drill rig availability. In the past, we have had a backlog related to several customers for drilling services work to be performed in future periods. Due to declining demand for drilling services, some of our drill rigs are currently idle, and our backlog consists of drilling services work to be performed for two major customers. While we have seen marginal increases in requests for proposals for drilling services, we cannot predict if demand for drilling services will increase in future periods.

Timberline Corporate and Exploration Division

The after tax net loss of \$91,033 for the combined Timberline Corporate and the Exploration division during the three months ended June 30, 2009 is comprised of non-cash charges of \$60,916, exploration expenditures of \$61,561, salaries and benefits of \$133,153, other general and administrative costs of \$117,945 and interest expense of \$121,654, less a net recovery of professional fees of \$402,124 and interest income of \$2,072. Included in the non-cash charges are \$46,493 in expenses related to stock options that vested during the quarter. Also included in the non-cash charges are \$9,023 in depreciation and amortization.

During this quarter, we entered into an agreement in principle with Jefferies & Co. (“Jefferies”) to settle an invoice with an outstanding balance of \$923,957 for advisory services and third party legal services provided during the course of our proposed acquisition of Small Mine Development, LLC in 2008. Jefferies agreed to the satisfaction of this outstanding balance by payment of \$50,000 in cash as well as the issuance of 950,000 shares of common stock of Timberline, along with registration rights for the shares. The agreement was finalized on July 14, 2009. The net result of this transaction was the recovery of previously-expensed professional fees of \$527,207. The Company incurred \$125,083 in professional fees during the quarter ended June 30, 2009, resulting in a net recovery of professional fees of \$402,124.

The after tax net loss of \$4,071,881 for the combined Timberline Corporate and the Exploration division during the nine months ended June 30, 2009 is comprised of non-cash charges of \$1,050,513, exploration expenditures of \$374,180, salaries and benefits of \$399,386, professional fees of \$1,019,998, other general and administrative costs of \$459,557, and interest expense of \$780,789, less interest income of \$12,542. \$396,750 of our professional fees during the nine months ended June 30, 2009 was related to legal and financial advisory costs associated with our proposed acquisition of SMD. Included in the non-cash charges are \$1,000,483 in expenses related to stock options that vested during the year to date. Also included in the non-cash charges are \$27,470 in depreciation and amortization.

Timberline Drilling and WWE

For the three months ended June 30, 2009, Timberline Drilling had revenues of \$3,592,474 as compared to \$7,318,802 for the three months ended June 30, 2008. WWE had revenues of \$768,663 for the three months ended June 30, 2009 as compared to \$2,385,011 for the three months ended June 30, 2008. Overall the demand for drilling services has declined due to the current economic crisis. Junior resource and exploration stage companies have been adversely affected by the state of the capital markets. As a result, the overall demand for drilling services decreased during the second half of 2008 and has continued in 2009. The decrease in revenues at both Timberline Drilling and WWE is attributable to the reduced demand for drilling services and the resulting reduction in the number of operating drill rigs compared to the previous year. We expect that our revenue for the remainder of 2009 will be less than the corresponding revenue in 2008 due to the reduced number of drill rigs operating.

For the three months ended June 30, 2009, net income before taxes from Timberline Drilling was \$270,380 while net income before taxes at WWE was \$61,714 as compared to a net loss before taxes of \$1,745,974 for Timberline Drilling and net income before taxes of \$682,164 for WWE for the three months ended June 30, 2008. At Timberline Drilling and WWE, the current quarter income is primarily attributable to decreased drilling revenue being more than offset by significantly decreased operating and general and administrative expenses.

For the nine months ended June 30, 2009, Timberline Drilling had revenues of \$8,823,389 as compared to \$17,983,223 for the nine months ended June 30, 2008. WWE had revenues of \$3,721,828 for the nine months ended June 30, 2009 as compared to \$6,542,042 for the nine months ended June 30, 2008. The decrease in revenues at Timberline Drilling and WWE is attributable to a reduction in the number of operating drill rigs.

For the nine months ended June 30, 2009, net loss before taxes from Timberline Drilling was \$1,536,892 while net loss before taxes at WWE was \$242,774 as compared to a net loss before taxes of \$1,935,476 for Timberline and net income before taxes of \$1,451,322 for WWE for the nine months ended June 30, 2008. At Timberline Drilling and WWE, the year to date loss is primarily attributable to significantly decreased drilling revenue despite decreased operating and general and administrative expenses.

We expect that the extension of our drilling contract for Newmont Mining and the resulting revenue stability, coupled with our continued focus on reducing operating and administrative costs and performance efficiencies, will result in continued positive earnings and cash flow from our drilling subsidiaries despite drilling revenues that are not expected to be as strong as last year.

Financial Condition and Liquidity

At June 30, 2009, we had assets of \$14,568,797 consisting of cash in the amount of \$1,374,857; accounts receivable, net of allowance for doubtful accounts, in the amount of \$1,128,155; inventories valued at \$1,345,546; property, mineral rights and equipment, net of depreciation of \$7,278,481; goodwill in the amount of \$2,808,524 and prepaid expenses and other assets of \$633,234.

The deteriorating economic conditions experienced in the second half of 2008 in the U.S. housing market and the credit quality of mortgage backed securities have continued during 2009 to date. This situation has caused a loss of confidence in

the broader U.S. and global credit and financial markets and has resulted in the collapse of, and government intervention in, several major banks, financial institutions and insurers. The contraction and unavailability of credit has created a climate of greater volatility, less liquidity, widening of credit spreads, a lack of price transparency, increased credit losses and tighter credit conditions. These disruptions in the current credit and financial markets have had a significant material adverse impact on a number of financial institutions and have limited access to capital and credit for many companies. These disruptions could, among other things, make it more difficult for us to obtain, or increase our cost of obtaining, capital and financing for our operations if needed. Access to additional capital may not be available on terms acceptable to us or at all if the current economic situation persists.

Economic conditions have had an adverse affect on junior resource and exploration stage companies. Market declines have adversely affected the ability to raise capital on acceptable terms, if at all, and many companies are significantly reducing investments in exploration, including drilling services. We expect to rely upon the cash flow generated by our drilling subsidiaries. However, the recent economic instability makes it difficult for the Company's management to accurately predict cash flows from these services through the remainder of the 2009 fiscal year. While the majority of Timberline Drilling's underground drilling rigs remained active during the fiscal year to date, surface drilling by our customers has been negatively impacted by the current economic instability. While we do not expect fiscal 2009 revenues to match 2008 levels, we also believe that revenues will increase above the year to date levels in future quarters and profitability and positive cash flows will be improved.

At June 30, 2009 the Company has a working capital surplus of \$275,999. Management expects to preserve, or increase, this working capital surplus through efforts to improve operating cash flows at the Company's drilling subsidiaries, reduction of exploration expenditures, reduced professional and consulting expenses, and, potentially, additional sales of capital assets. The current liabilities of the Company include outstanding interest and penalties due to the Internal Revenue Service in the amount of \$453,741. The Company is making monthly installment payments on the outstanding balance.

During our second fiscal quarter of 2009, Timberline Drilling agreed to sell several under-utilized, non-core drill rigs, increasing the overall rig utilization rate and decreasing depreciation expenses. Additionally, former management of Timberline Drilling agreed to forego \$350,000 in severance payments. During the quarter ended June 30, 2009, the \$1 million proceeds from the drill sales were received and used to help retire more than \$1.9 million in liabilities.

Management expects to continue to improve operating cash flows at the Company's drilling subsidiaries by further reducing hourly and salaried payroll expenses, reducing supplies inventory levels, and eliminating non-essential general and administrative costs. The Company plans to curtail exploration expenditures to focus on only our material exploration properties. This curtailment has already included a reduction in geological staff salaries expense and reduced use of outside geological consultants. The Company also expects to incur significantly reduced legal, accounting and financial advisory expenses in future periods as compared to the past fiscal year and first quarter of the current fiscal year due to the termination of our proposed acquisition of SMD. Finally, the Company's capital assets include drills, drilling related equipment and vehicles for which a resale market exists. The Company will consider sales of a portion of these capital assets, if necessary, to fund working capital.

Management believes that these remedies will provide it with sufficient working capital to meet the Company's ongoing operating expenses for the next 12 months. Additional financing may be required if the Company seeks to undertake further property acquisitions or expand its exploration or mine services operations.

If cash flow from our drilling subsidiaries is insufficient, our exploration activities and other operations will be reliant upon equity financings, or other outside funding, to continue into the future. The current market conditions could make it difficult or impossible for us to raise necessary funds to meet our capital requirements. We will continue to evaluate all available avenues to generate cash including, but not limited to, equity placements, asset sales, credit facilities or debt issuances.

On February 13, 2009, we received a notice from the NYSE Amex indicating that we were not in compliance with the exchange's continued listing requirements. During the quarter we submitted a compliance plan to the NYSE Amex to maintain our listing. On May 4, 2009 this compliance plan was accepted by the NYSE Amex, giving the Company until August 13, 2010 to regain compliance with the continued listing standards of the exchange. If we are unable to maintain our listing on the NYSE Amex and are unable to obtain a comparable listing, the liquidity of our common stock could decrease significantly and our ability to raise additional capital through equity or convertible debt could be impaired.

Off-Balance Sheet Arrangements

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

Critical Accounting Policies and Estimates

See Note 2 to the financial statements contained elsewhere in this Quarterly Report for a complete summary of the significant accounting policies used in the presentation of our financial statements. The summary is presented to assist the reader in understanding the financial statements. The accounting policies used conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the financial statements.

Our critical accounting policies are as follows:

Exploration Expenditures

All exploration expenditures are expensed as incurred. Significant property acquisition payments for active exploration properties are capitalized. If no mineable ore body is discovered, previously capitalized costs are expensed in the period the property is abandoned.

Revenue Recognition

The Company recognizes drilling service revenues as the drilling services are provided to the customer based on the actual amount drilled for each contract on a per foot or per hour drilled basis. In some cases, the customer is also responsible for paying for mobilization and stand-by costs. Mobilization is charged to a customer when the Company deploys its personnel and equipment to a specific drilling site. Stand-by is charged to a customer when the Company deploys its personnel and equipment to a specific drilling site, but for reasons beyond the Company's control, drilling activities are not able to take place. Revenue related to reimbursement of mobilization and "stand by" costs is recognized in the same period as the costs of mobilization or stand-by are incurred by the Company. The specific terms of each drilling job are agreed to by the customer and the Company prior to the commencement of drilling. Contract losses are not recognized as the Company's agreements with its customers do not put the Company at a risk of loss.

Materials and Supplies Inventory

Inventories consist primarily of parts, operating supplies, drill rods and drill bits. The Company values its inventories, with the exception of drill rods, at the lower of average cost or market, using the first-in-first-out (FIFO) method. Drill rods are valued using their average cost less an allowance for rod usage on a per foot drilled basis. Allowances are recorded for inventory considered to be in excess or obsolete.

Review of Carrying Value of Property and Equipment for Impairment

The Company reviews the carrying value of property and equipment for impairment whenever events and circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use and eventual disposition. In cases where undiscounted expected future cash flows are less than the carrying value, an impairment loss is recognized equal to an amount by which the carrying value exceeds the fair value of the asset. The factors considered by management in performing this assessment include current operating results, trends and prospects, the manner in which the property is used, and the effects of obsolescence, demand, competition, and other economic factors.

Goodwill

Goodwill relates to the acquisition of Timberline Drilling. In accordance with Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets," at least annually goodwill is tested for impairment by applying a fair value based test. In assessing the value of goodwill, assets and liabilities are assigned to the reporting units and a discounted cash flow analysis is used to determine fair value. There was no impairment loss revealed by this test as of September 30, 2008.

Derivative Financial Instruments

The Company does not use derivative instruments to hedge exposures to cash flow, market, or foreign currency risks. Derivative financial instruments are initially measured at their fair value. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value, with changes in the fair value reported as charges or credits to income. For option-based derivative financial instruments, we use the Black-Scholes option pricing model to value the derivative instruments.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES

Conclusions of Management Regarding Effectiveness of Disclosure Controls and Procedures

At the end of the period covered by this report, an evaluation was carried out under the supervision of and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, Randal Hardy ("CEO/CFO") and Chief Accounting Officer, Craig Crowell, ("CAO"), of the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Rule 13a – 15(e) and Rule 15d – 15(e) under the Exchange Act). Based on that evaluation the CEO/CFO and the CAO have concluded that as of the end of the period covered by this report, the Company's disclosure controls and procedures were adequately designed and effective in ensuring that: (i) information required to be disclosed by the Company in reports that it files or submits to the Securities and Exchange Commission under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and (ii) material information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our management, including our CEO/CFO and CAO, as appropriate, to allow for accurate and timely decisions regarding required disclosure.

Changes in Internal Controls over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting

PART II — OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

On January 16, 2009, the Company filed a complaint in the United States District Court for the District of Idaho (the "Court") against American Drilling, LLC, American Drilling Corporation (along with American Drilling, LLC referred to as "American Drilling"), and Steven Elloway ("Elloway"). Timberline Drilling alleged that when Elloway left employment with the Company he immediately started American Drilling, and that Elloway and American Drilling have subsequently violated Elloway's Supplemental Income Agreement with Timberline Drilling, which restricted his post-termination competitive activities. Timberline Drilling also asserted that Elloway and American Drilling have converted confidential and proprietary Timberline Drilling information and documents, misappropriated trade secrets, tortiously and negligently interfered with Timberline Drilling's contractual relations with its business relationships and its prospective economic advantage, and that Elloway breached fiduciary duties to Timberline Drilling and unjustly enriched himself. In addition to seeking monetary damages, Timberline Drilling asked the Court to issue an injunction to prohibit future improper competition or use of Timberline Drilling trade secrets by Elloway or American Drilling.

A temporary restraining order was issued and arguments regarding the entry of a preliminary injunction were heard by the Court on February 11, 2009. On March 2, 2009, the Court stated that Timberline Drilling had demonstrated likelihood of success at trial on the merits, therefore a preliminary injunction was not issued due to no showing of irreparable harm. The Court also stated that given the probable success of Timberline Drilling at trial, Timberline Drilling would have a claim for damages related to its loss of business extending to the trial date of July 11, 2010. We are currently in the discovery phase and expect that Timberline Drilling will prevail at trial. Rather than incur elevated legal costs at this time, and given that damages are ongoing and expected to continue, we plan to accelerate our legal expenditures and preparations closer to the trial date.

No director, officer or affiliate of Timberline and no owner of record or beneficial owner of more than 5.0% of our securities or any associate of any such director, officer or security holder is a party adverse to Timberline or has a material interest adverse to Timberline in reference to pending litigation.

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors as previously disclosed in our Form 10-KSB for the year ended September 30, 2008 which was filed with the SEC on December 30, 2008.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.

- 10.1** Operating Agreement with Highland Mining
- 10.2** Stock Settlement and Release Agreement with Jefferies & Company
