**Item 5. Full Description of Material Change**

The full text of the news release referred to in Item 3 above announcing the material change is as follows:

## **“KIMBER BOARD RECEIVES INDEPENDENT COMMITTEE REPORT**

*November 10, 2006*

VANCOUVER, BRITISH COLUMBIA - Kimber Resources Inc. (AMEX:KBX, TSX:KBR)

### **Independent Committee**

The Board of Directors of Kimber Resources Inc. is pleased to advise that it has received the report and recommendations of the Independent Committee. The report concluded that no corporate action is required, beyond a number of specific internal steps that were recommended to be undertaken by the Board of Directors.

The factual investigation and legal analysis of the allegations was carried out by Special Counsel, Gerald W. Ghikas, Q.C. of Borden Ladner Gervais L.L.P., under the direction of Independent Committee members Dennis Bergen and Cliff Grandison.

The Board of Directors will review and implement as necessary the recommendations of the Independent Committee concerning a review of certain corporate policies, a review of Directors' responsibilities, and improved communication between Board members and management.

The Company's sole focus continues to be to enhance shareholder value by developing further resources on the Monterde property, while simultaneously advancing pre-feasibility studies on the Carmen deposit.

### **Stock Options**

The Board also announces that it has granted stock options to purchase a total of 225,000 common shares to two new directors, an Officer of the Company and an executive responsible for operations in Mexico. The exercise price of the options is C\$2.59 per share.

### **About Kimber**

Kimber Resources Inc. holds a 100% interest in the Monterde property in the Sierra Madre of northern Mexico. On the Monterde property, The Company is advancing the Carmen gold-silver deposit towards production. The Carmen deposit, an underground mine in the 1930's, is a typical low sulphidation epithermal system, oxidized, and believed to be suitable for open pit mining. Two adjacent epithermal systems first identified in 2005, the Carotare deposit and El Orito Norte exploration target appear to be similar to the Carmen. The goal of the company is to demonstrate at least three million resource ounces from the two deposits and exploration target identified. For further information on the company visit SEDAR or the company website at
