NEWS

FOR IMMEDIATE RELEASE

Set Ga Done Gold Optioned - Jet Gold to Focus on Coal

July 18, 2006 - Jet Gold Corp and joint venture partner, Leeward Capital Corp., are pleased to announce an agreement to option the Set Ga Done gold property, located in Myanmar, to Quad Energy SA.

The new option agreement with Quad Energy continues to advance the Set Ga Done property, giving Jet Gold a long-term interest, while allowing the Company to focus energy and resources on developing its Naskeena Coal property in NW British Columbia, Canada.

Quad Energy SA is a private venture capital company with interests in oil and gas and mining in Southeast Asia and maintains offices in Bangkok, Ho Chi Minh City and Calgary. Quad has an oil shale project in Myanmar and is expanding its interests to include gold mining projects in the country.

Under the terms of the agreement, Quad can earn up to 51 per cent of the JV interest in the property by spending US \$700,000 on exploration and development prior to January 7, 2008. It is anticipated that work will begin in November as soon as the Monsoon season ends.

The 350 square kilometer Set Ga Done property is considered highly prospective for gold. Artisanal workings indicate that the structure at Set Ga Done exceeds 600 m in length. Miners report that mineralization persists to at least 50m in depth. However, the width, depth, grade, and exact structural orientation are all unknown. The zone contains enough gold to have kept the local miners active since 1989.

Three previous drilling programs failed to fully penetrate the mineralized zone due to difficult drilling conditions. However, one hole intersected 9.80 g/t gold over 4.77 m of core length in the portion of the zone which was recovered. Elsewhere, grab samples attain maximum values of 10 to 16 g/t. Visible gold is sometimes present. Mineralization occurs in a shear zone in metabasalt. The mineralization is most likely deposited in lower epithermal or upper mesothermal rock.

Jet Gold and Leeward currently hold a 75% interest in the property, with the Government of Myanmar holding the remainder.

Jet Gold is building a cash flow foundation through participation in select oil and natural gas projects. The Naskeena Coal claims represent a new opportunity to participate in today's resource markets, either as a hedge against volatile energy pricing, or through capital growth inherent in structurally higher commodity pricing. The Company stands to emerge as a Canadian resource company of exceptional stature, based on prudent, insightful exploitation of all of its energy and precious metals prospects.

On behalf of the board of directors,

Jet Gold Corp.
