Dear Mr. Mukunda:

In some of our comments, we may ask you to provide us with information so we may better understand your disclosure.

Please respond to this letter within ten business days by amending your filing, by providing the requested information, or by advising us when you will provide the requested response. Form 10-K for the Fiscal Year Ended March 31, 2013

General

1. We note your disclosure of estimated values associated with mineral reserves. For instance on page 4 you state that four properties have an estimated \$500 million of iron ore reserves calculated at a price of \$125 per metric ton. Please note that estimated values of reserves should only be included in your filing if supported by a final bankable feasibility study using the historical three-year average commodity price.
2. Please forward to our engineer as supplemental information and not as part of your filing, your information that establishes the legal, technical, and economic feasibility of your materials designated as reserves, as required by paragraph (c) of Industry Guide 7. The information requested includes, but is not limited to:

- Property and geologic maps
- Description of your sampling and assaying procedures
- Drill-hole maps showing drill intercepts
- Representative geologic cross-sections and drill logs
- Description and examples of your cut-off calculation procedures
- Cutoff grades used for each category of your reserves and resources
- Justifications for the drill hole spacing used to classify and segregate proven and probable reserves
- A detailed description of your procedures for estimating reserves
- Copies of any pertinent engineering or geological reports, and executive summaries of feasibility studies or mine plans which including the cash flow analyses
- A detailed permitting and government approval schedule for the project, particularly identifying the primary environmental or construction approval(s) and your current location on that schedule.

Please provide this information on a CD, formatted as Adobe PDF files. Please also provide the name and phone number for a technical person whom our engineer may call if he has technical questions about your reserves. You may ask to have this information returned by making a written request at the time it is furnished, as provided in Rule 12b-4 of Regulation 12B. If you have questions concerning the above request, please contact John Coleman, Mining Engineer at (202) 551-3610.

3. Please be advised that if your company does not have a mineral reserve you must be in the exploration stage pursuant to the definitions in paragraph (4) of Industry Guide 7. As such, your filing should be substantially revised to remove terms such as production, development, and ore so that readers understand that you are an exploration stage company without a mineral reserve.

13. We note your revenue has increased about 91.2% in fiscal 2013 from fiscal 2012.
