FOR IMMEDIATE RELEASE
LUNA GOLD ANNOUNCES DRILLING TO COMMENCE ON
RED ROCK PROJECT, CORTEZ TREND, NEVADA

Vancouver, May 3, 2007 – Luna Gold Corp. (TSXV-LGC, OTCBB-LGCU) (“Luna” or the “Company”) is pleased to announce that Centerra (U.S.) Inc. (“Centerra”) has commenced work on Luna’s Red Rock project, in Lander County, Nevada. This year’s work program will focus on geologic mapping, geochemical sampling, and drilling lower plate targets.

Luna’s Red Rock project borders the western boundary of the Cortez JV – the Barrick & Kennecott Joint Venture that hosts the multimillion ounce Pipeline and Cortez Hills deposits. Luna and Centerra are exploring at Red Rock for similar targets in favorable host rocks in the lower plate of the Roberts Mountains thrust fault beneath as little as 1500 feet of upper plate rocks.

Tim Searcy, Luna’s President and CEO comments “The Company is pleased with Centerra’s commitment to the Red Rock project. Centerra will be drilling RC holes, and is mobilizing a core rig that will be used to extend the depth of one of last year’s RC holes, RRC06-08. This hole targets the intersection of the lower plate rocks and the Caetano break, a potential mineralization-controlling structure in the Cortez trend.”

Last year, Centerra spent approximately US\$450,000 on mapping, sampling, and drilling two holes on the Red Rock project.

Luna’s strategy in Nevada is to generate projects, undertake preliminary surface work in order to identify drill targets, and then joint venture the projects to majors or intermediates for the drill testing of the targets.

About Luna Gold Corp

Luna is a mining exploration company with a focus on gold development in Brazil and gold exploration in Nevada.
