ATTENTION TO QUALITY — ASSETS, PRODUCTION, EARNINGS

- **Growth** Maximizing shareholder returns from:
 - Recurring dividends, derived from sustainable harvests in existing timberland holdings,
 - An acquisitions strategy concentrating on the high-demand Southeast “fiber basket” to increase future harvest volumes and cash flow, and
 - Participation in the ongoing U.S. housing recovery as well as feeding into growing log and lumber demand from offshore users
- **Lower Volatility** Exclusively owning and managing (“Pure Play”) timberland—unlike most competitors, the company does not engage in higher-risk timber-related manufacturing operations
- **Inflation Protection** Investing in a non-correlated asset class

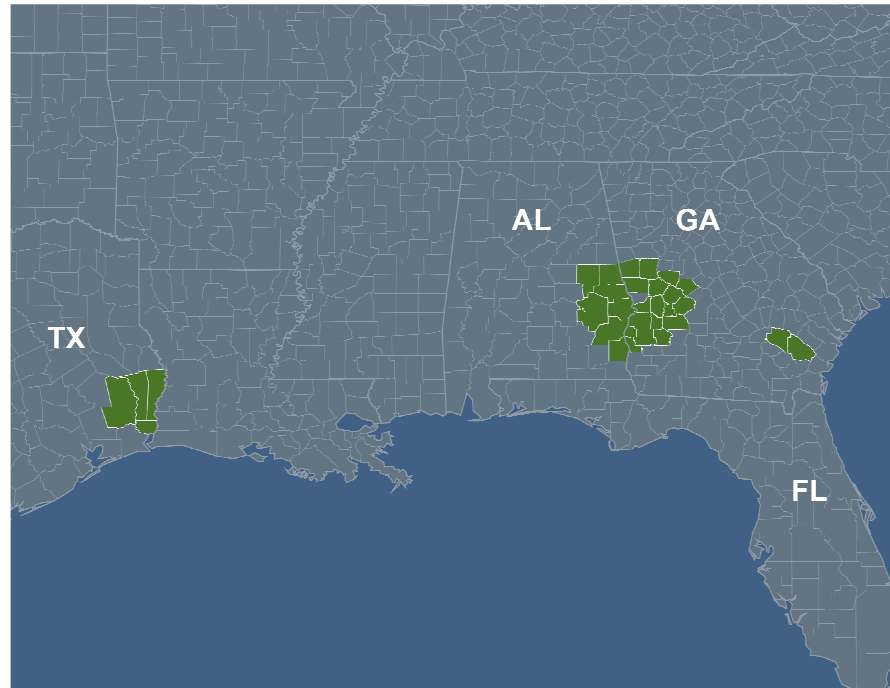

EXISTING PORTFOLIO

TIMBERLAND M&A ACTIVITY IS PICKING UP

Historical Timberland Transaction Volume (\$ in millions)

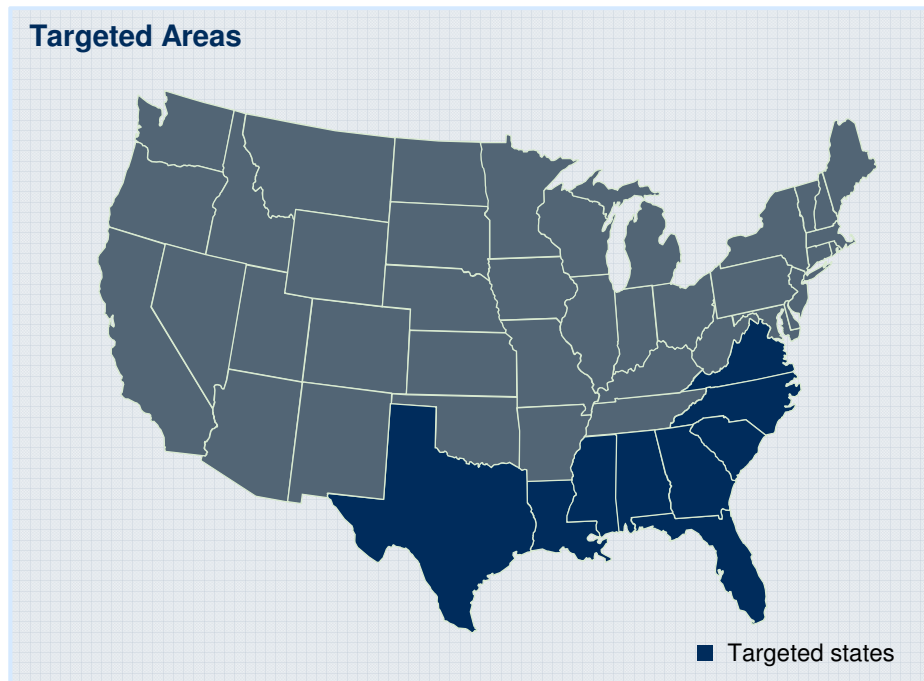

Source: Forest Economic Advisors

Timberland transaction volume totaled over \$35 billion between 2003 and 2008, the majority of which was acquired by TIMOs and will likely be coming back to the market over the next five years.

ROBUST AND ATTRACTIVE ACQUISITION PIPELINE

CatchMark seeks well-stocked, high quality timberlands with near-term income potential to increase its harvest volumes and cash flow as well as characteristics to sustain long-term growth.

- **Robust Pipeline:** \$500 million of identified transaction opportunities, including TIMO-owned properties in expiring funds
- **Current Geographic Focus:** Southern Pine Belt where best relative value exists today
- **Average Deal Size:** 10,000-40,000 acres

CatchMark has assembled a deep acquisition pipeline of mid-sized transactions in key U.S. South timber regions.

MAJOR 2014 TRANSACTIONS

CatchMark has closed on or agreed to acquire approximately 100,000 acres of high quality timberlands YTD, expanding its holdings by 36%, which will increase sustainable harvest volumes, improve product mix, and enhance long-term earnings.

Projected Housing Starts

Projected North America Lumber Consumption

Housing starts drive sawtimber prices: 1.5mm starts = \$40+ sawtimber (vs. \$26 today).

OTHER MACRO FACTORS WILL INTENSIFY THE RECOVERY

	Annual Demand Impact (Housing Start Equivalents)	Annual Demand Impact (Housing Start Equivalents)
Recent Upturn in U.S. Residential Construction	+820,000	
Significant Increase in Lumber and Log Exports to China	+490,000	
Mountain Pine Beetle Epidemic in British Columbia		(260,000)
