ALDA PHARMACEUTICALS CORP.
MANAGEMENT DISCUSSION AND ANALYSIS (“MD&A”)
FOR THE THREE MONTHS ENDED DECEMBER 31, 2007

1.1 Date

This Management Discussion and Analysis (“MD&A”) is dated February 29, 2007 and should be read in conjunction with the consolidated interim financial statements of ALDA Pharmaceuticals Corp. (“ALDA” or the “Company”) for the six months period ended December 31, 2007. All financial information is expressed in Canadian dollars and is prepared in accordance with Canadian generally accepted accounting principles (“GAAP”).

1.2 Overall Performance

On November 13, 2003, ALDA Pharmaceuticals Corp., formerly Duft Biotech Capital Ltd., completed the acquisition of the assets of 513947 BC Ltd. formerly ALDA Pharmaceuticals Inc. (“the Qualifying Transaction”) and a \$1.2 Million financing arranged by Canaccord Capital Corporation (“the Financing”). ALDA trades on the TSX Venture Exchange in Vancouver, Canada under the symbol “APH”.

ALDA has developed a patent-pending infection control formulation, referred to as T³6[®], which is incorporated into therapeutic applications such as treatments for topical and vulvovaginitis infections, hand hygiene products, a skin antiseptic for clinical and consumer use and a first-aid ointment. Studies have been performed on the T³6[®] formulation which demonstrates its ability to kill all types of infectious micro-organisms within 3 minutes and tuberculosis within 5 minutes. Toxicology studies on animals have also demonstrated that the T³6[®] formulation is not toxic.

There is competition in all of the therapeutic markets that the Company has targeted. However, the T³6[®] formulation is not expensive to manufacture and can be used in a broad variety of infection-control products. Toxicology and efficacy studies have already demonstrated that the T³6[®] formulation is not toxic and is effective at killing all bacteria, viruses and fungi. The intended applications are topical, except for the vulvovaginitis treatment, so that registration is expected be faster and less expensive than for drugs that are taken internally. Rather than disrupting metabolic pathways, the T³6[®] formulation consists of four anti-microbial ingredients in relatively low concentrations that act synergistically to disrupt the physical structure of the infectious agents. This approach prevents microbial resistance from developing. None of the active ingredients are known to have any significant side effects on humans.

ALDA has started studies that will satisfy the registration requirements of Health Canada, the US Food and Drug Administration (“FDA”) and the European Medicines Agency (“EMeA”) for the targeted applications. In other parts of the world, FDA or EMeA testing is generally accepted for registration applications. If the Company decides to register the products in China, it is likely that the testing will have to be repeated in China unless there is harmonization of the requirements in the meantime.

ALDA is planning on introducing products to the consumer market and is developing over-the-counter (“OTC”) and prescription therapeutics. Marketing efforts will focus on appropriate distributors for each sector, following the distribution strategy that has already been established.

To complete this plan, the Company will need to raise money in the public markets. This will increase the number of shares outstanding and will lead to further dilution of existing shareholders.

Market knowledge of the ALDA name is limited. ALDA will need to devote considerable resources to educate new markets about the products the Company offers. In establishing new markets, the Company will be competing with companies that are potentially already entrenched in such markets or that may be better funded than the Company. ALDA also faces significant costs and risks associated with the protection and exploitation of its intellectual property. Although patents have been granted to the Company in China and Australia and projected to be granted in the United States on March 4, 2008, patents are still pending in Europe, Canada and Singapore. Competitors with significantly more resources may have an advantage over the Company in terms of the establishment, protection and exploitation of patents and other intellectual property. All of these factors are material to the Company and its business.

The management of the Company anticipates that additional investment in this area will be required for the balance of the current fiscal year.

1.4 Results of Operations (continued)

Wages and benefits

Wages and benefits were \$136,783 and \$149,636 for the three months and six months period ended December 31, 2007 compared to \$17,395 and 56,545 incurred in the same period ended last year. Costs in this category include the wages paid to accounting and administrative assistance and to sales and marketing staff as well as the expenses related to stock Options granted to certain directors and employees. Expenses related to stock Options granted during the period ended December 31, 2007 were \$124,112.

Loss from operations

The loss from operations was \$575,763 and \$711,836 for the three months and six months period ended December 31, 2007 compared to \$90,182 and \$205,993 for the three months and six months period ended December 31, 2006. Losses for period ended December 31, 2007 were greater than the corresponding period ended December 31, 2006 due to the non-cash compensation expenses of \$402,057 related to the granting of stock options as disclosed above and in Note 7(b) of the consolidated interim financial statements.

A number of initiatives were taken during the year to promote further growth of the Company, including private placements, expanding the patent portfolio of the Company, seeking expert advice on product registrations, undertaking laboratory tests of the T³6[®] formulation, preparing marketing materials, evaluating new manufacturing facilities, and seeking out new distributors and customers. The Company retained Cowie and Fox, Group 270 Sales & Marketing and Brand Institute, Inc. to re-brand its product's image and to design a new marketing campaign for the new and existing T³6[®] product.

Management continues to work towards the launch of new products, including T³6[®] Personal Disinfectant, T³6[®] Hand Sanitizer and the therapeutic products. The pursuit of the new therapeutics products requires the Company to invest continuously in product development, clinical trials, product registrations and intellectual property protection. As a result, further losses will be anticipated in the subsequent periods.

Loss for the year

The loss for the three months and six months period ended December 31, 2007 was \$564,163 and \$695,246, respectively, compared to \$90,182 and \$195,448 recognized in the same corresponding period last year. The losses for the three months and six months period ended December 31, 2007 were relatively high compared to the corresponding quarter for the previous year because of the granting of stock options as disclosed above and in Note 7(b) of the consolidated interim financial statements. The loss was offset by interest income of \$16,590 earned from the deposits for the six months period ended December 31, 2007, and net gains of \$10,545 due to the settlement of legal dispute against the competitor recognized in the six months period ended December 31, 2006.

Use of proceeds

The net proceeds received from the closing of recent private placements will be used for working capital including such activities as starting initial clinical trials of the T³6[®] formulation in therapeutic products, registering T³6[®] products in major markets, seeking expert advice on product regulatory issues, re-branding and advertising current and new lines of products and seeking possible registration of ALDA's securities in foreign jurisdictions.

1.5 Summary of Quarterly Results

Period ended	Dec/07	Sept/07	Jun/07	Mar/07	Dec/06	Sept/06	Jun/06	Mar/06	Dec/05
Revenue	53,298	55,537	61,433	72,879	64,356	57,575	58,724	47,694	60,285

Total assets were increased significantly over the quarters as a result of capitalizing patent application and development costs and receiving external funding from the private placements. The revenues generated from the sale of T³6[®] Disinfectant and T³6[®] Hand Sanitizer have been relatively consistent. The Company continued to observe net losses due to resources spent in registering T³6[®] products in major markets, seeking expert advice on product regulatory issues, re-branding and advertising current and new lines of products and seeking registration of ALDA’s securities in foreign jurisdictions. The greater loss recognized in December 31, 2007 was mainly due the non-cash stock options granted to certain officers, directors, consultants and an employee and increased consulting fees and wages. The non-cash stock-based compensation expenses accounted for \$402,057.

1.6 Liquidity

Although the Company generates revenues from the sale of its lead product, T³6[®] Disinfectant, sales are still occurring only in Canada. Approvals have been obtained for T³6[®] Disinfectant in the European Union and China and the Company will be pursuing opportunities in these markets. The Company has also established a plan for the development, testing, registration and marketing of therapeutic applications of the T³6[®] formulation. Management is also evaluating the possibility of acquiring technologies that are complementary to T³6[®] technology and launching similar type of products lines in the near future. It is expected that the Company will need to undertake further financing in order to pursue these plans and these financings will lead to the dilution of current shareholders of the Company.

1.7 Capital Resources

During the six months period ended December 31, 2007, the Company arranged two private placements at \$0.12 and \$0.15 per Unit. The Company raised a total of \$765,000 by issuing a total of 5,500,000 Units of the Company’s Common Share and Warrants. Each warrant entitled the holder to purchase one additional Common Share at an exercise price of \$0.24 or \$0.30 for the first year following the closing date and thereafter at an exercise price of \$0.36 or \$0.45 for the second year after the closing date. The estimated fair value of Warrants, being \$321,958, was allocated to the contributed surplus for Warrants. The estimated fair value of Warrants was calculated as at the date of grant using Black-Scholes pricing model. The net proceeds will be used for general working capital. As of December 31, 2007, the Company received funds of \$674,800 from the exercise of 5,342,500 Warrants at an exercise price range of \$0.10 to \$0.24 and 300,000 Options at an exercise price of \$0.10. Option values of \$8,000 previously recorded in contributed surplus for Options were credited to share capital.

As at December 31, 2007, the Company had 43,417,799 outstanding common shares. Subsequent to the closing of private placements, the Company has a total of 12,421,500 outstanding Warrants exercisable at an exercise price range of \$0.10 to \$0.30 before the date of expiration. The outstanding exercisable stock Options as at December 31, 2007 were 4,000,000 at an exercise price range of \$0.10 to \$0.50 per Options.

FOR THE SIX MONTHS PERIOD ENDED DECEMBER 31, 2007

1.7 Capital Resources (continued)

There can be no assurance that the Company will be able to obtain adequate financing in the future to fulfill its business objectives or that the terms of such financing will be favourable. Many of the Company's products still require further development and laboratory testing in order to obtain required regulatory approvals. A lack of funds will impair the ability of the Company to complete such tests. A lack of funds will also impair the Company's ability to establish marketing and sales plans once the products have been approved for sale. If adequate financing is not available when required, the Company may be required to delay, scale back or eliminate various activities and may be unable to continue in operation. ALDA may seek such additional financing through debt or equity offerings, but there can be no assurance that such financing will be available on terms acceptable to the Company or at all. Any equity offering will result in dilution to the ownership interests of the Company's shareholders and may result in dilution to the value of such interests.

1.8 Off-Balance Sheet Arrangements

The Company is not aware of any off-balance sheet transactions requiring disclosure.

1.9 Transactions with Related Parties

- a) During the six months period ended December 31, 2007, the Company incurred consulting fees of \$108,000 (2006: \$60,000) to companies controlled by directors of the Company.
- b) During the six months period ended December 31, 2007, the Company incurred premises rent of \$12,986 (2006: \$14,775) to a Company controlled by a director of the Company.

These transactions were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

1.10 Second Quarter Events, 2008

During the three months period ended December 31, 2007, a private placement for \$525,000 was completed by selling 3,500,000 million Units, consisting of One Common Share and One Share Purchase Warrant, at a price of \$0.15. In addition to the private placement, the Company received fund of \$342,800 from the exercise of Warrants and Options. The Company granted options to acquire 1,820,000 common shares of the Company to directors, consultants, officers, employees and investor relations. The options have an exercise price of \$0.50 with an exercisable term of two years expiring December 7, 2011.

The Company's sales were close to the average sales recorded per quarters for the last quarters. General and administration expenses were increased to \$596,291 for the three months period ended December 31, 2007 compared to \$114,121 for the same corresponding quarter last year. Patent application and development costs include all expenditures attributable to efforts by the Company to develop, and bring to commercial production a new product as well as to acquire legal protections for its proprietary products, such as trademarks and patents. In the latter case, patent application and development costs are amortized on a systematic basis over the patent life of 20 years.
