**Re: Oculus Innovative Sciences, Inc.
Registration Statement on Form S-1
Filed July 3, 2006
File No. 333-135584**

Dear Mr. Alimi:

We have reviewed your registration statement and have the following comments. Where indicated, we think you should revise your document in response to these comments. If you disagree, we will consider your explanation as to why our comment is inapplicable or a revision is unnecessary. Please be as detailed as necessary in your explanation. In some of our comments, we may ask you to provide us with information so we may better understand your disclosure. After reviewing this information, we may raise additional comments.

Please understand that the purpose of our review process is to assist you in your compliance with the applicable disclosure requirements and to enhance the overall disclosure in your filing. We look forward to working with you in these respects. We welcome any questions you may have about our comments or on any other aspect of our review. Feel free to call us at the telephone numbers listed at the end of this letter.

General

1. Please confirm that any preliminary prospectus you circulate will include all non-Rule 430A information. This includes the price range and related information based on a *bona fide* estimate of the public offering within that range. Also, in the next amendment, please fill in the blanks throughout the filing, and note that we may have additional comments after you do so.
2. Please provide us with copies of any graphics or artwork that you intend to use in your prospectus. We may have further comment after reviewing those materials.

3. We note that on your website you reference distribution of your products in Iran, Sudan, and Syria, countries identified by the U.S. State Department as state sponsors of terrorism, and subject to U.S. economic sanctions. Please describe for us the extent and nature of your past, current, and anticipated contacts with those countries, whether through subsidiaries, distributors, affiliates or other direct or indirect arrangements. Discuss sales or other contacts with the governments of these countries, including government-owned or controlled entities, and private parties. Please also describe any potential or actual military uses of your products, other than wound care.
4. Discuss for us the materiality to you of your contacts with Iran, Sudan, and Syria, individually and in the aggregate, and whether those contacts, individually or in the aggregate, constitute a material investment risk for your security holders. Please address materiality in quantitative terms, including the dollar amounts of any associated assets and liabilities, and revenues. Please also address materiality in terms of qualitative factors that a reasonable investor would deem important in making an investment decision, including the potential impact of corporate activities upon a company's reputation and share value.

We note, for example, that Arizona and Louisiana have adopted legislation that requires their state retirement systems to prepare reports regarding state pension fund assets invested in, and/or permits divestment of state pension fund assets from, companies that do business with U.S.-designated state sponsors of terrorism. The Pennsylvania legislature has adopted a resolution directing its Legislative Budget and Finance Committee to report annually to the General Assembly regarding state funds invested in companies that have ties to terrorist-sponsoring countries. The Missouri Investment Trust has established an equity fund for the investment of certain state-held monies that screens out stocks of companies that do business with U.S.-designated state sponsors of terrorism. Illinois, Maine, New Jersey and Oregon have adopted legislation requiring reporting of interests in, or divestment from, companies that do business with Sudan, and similar legislation has been proposed by several other states. Finally, Harvard University, Yale University, Stanford University, and other educational institutions have adopted policies prohibiting investment in, and/or requiring divestment from, companies that do business with Sudan. Your materiality analysis should address the potential impact of the investor sentiment evidenced by such actions directed toward companies that operate in Iran, Sudan, and Syria.

Also, indicate when discussions were initiated with your underwriter(s).
