

QUITCLAIM DEED
FOR MINING CLAIMS/SITES IN OREGON

Oregon Belle Holdings, Inc., with a business address at 2355 Evan Way, Central Point, Oregon, 97502

for consideration paid, assigns, conveys, and quitclaims to:

Q Lotus Inc., a Nevada Corporation, with a business address at 500 N Dearborn, Unit 605, Chicago, IL, 60654

The following mining claims/sites in Jackson County, Oregon:

Claim/Site Name	BLM Serial Number
Lucky Strike #3	ORMC 14005
Lucky Strike #4	ORMC 14006
New Lucky Strike #1	ORMC 147 951
New Lucky Strike #2	ORMC 147 952
New Lucky Strike #5	ORMC 147 953
New Lindaglenn	ORMC 147 954

WITNESS this 23rd day of April, 2010.

Linda Hata
Linda Hata

LINDA HATA
(print name)

Acknowledgement for Person

State of Oregon)
Jackson County)

The foregoing instrument was acknowledged before me this 23rd day of April, 2010.

By Linda Hata (Name(s) of Person(s) Acknowledging)

My commission expires: April 18, 2011

(seal)

Jaime Womack
Notary Public

Acknowledgement for Corporation

State of Oregon)
Jackson County)

The foregoing instrument was acknowledged before me this 23rd day of April, 2010.

By Linda Hata (Name of Officer), President (Title) of
Oregon Belle Holdings Inc. (Name of corporation), a Oregon (State of Incorporation)
corporation, on behalf of said corporation.

My commission expires:

(seal)

Jaime Womack
Notary Public

February 23, 2010

Oregon Belle Holdings Inc.
2355 Evan Way
Central Point, OR
97502. USA

Oregon Belle Holdings Inc. submitted two shipments of samples to ALS Minerals Reno for gold and multi-element analysis in July 2009 (work orders RE09071191 and RE09064931). Work order RE09071191 contained two samples reporting 0.608 ppm [Ed. Note: this sample taken from 1890 tailings pile] and 164.5 ppm Au and RE09064931 contained one sample reporting 176.5 ppm Au. The analysis conducted for these work orders consisted of a 30 gram gold fire assay fusion with Atomic Absorption finish (Au-AA23) along with multi-element analysis by four acid digestion and lithium metaborate fusion with Inductively Coupled Plasma finish (ME-ICP61 and ME-MS81). The gold over limit analysis was 30 gram fire assay fusion with gravimetric finish (Au-GRA21). [Ed. Note: \$1140.20/ounce on 3/3/10, the value of the current 100 acres is \$2.28B. The claims are ORMC 14005, ORMC 14006, ORMC 147951, ORMC 147952 and ORMC 147953.]

The gold analysis was completed at our Reno Laboratory which specializes in the preparation of geological materials and analysis for gold using fire assay, Atomic Absorption Spectroscopy (AAS) and gravimetric techniques. The multi-element analyses were completed at our North Vancouver Laboratory. Both facilities have Quality Systems that comply with the requirements of ISO 9001:2008.

At the time the gold analysis was completed, our Reno Laboratory had completed all requirements, including an on-site technical audit and proficiency tests, for ISO 17025:2005 accreditation from the Standards Council of Canada under CAN-P-1579 "Guidelines for Accreditation of Mineral Analysis Testing Laboratories." Prior to completing these requirements the Reno facility had incorporated the same standard operating procedures as our North Vancouver facility which was accredited to ISO 17025 in 2005 for gold and multi-element methods. Reno was granted formal accreditation on December 23, 2009.

Data integrity and quality within all ALS laboratories is paramount. The consistent quality systems within our Reno and North Vancouver laboratories have been designed to provide consistent, reliable, and accurate analytical results.

If you have any questions, please feel free to contact me at any time.

Sincerely,

Erin Miller
Interim Quality Systems Manager - North America
