Reliance Worldwide Investments, LLC
Notes to Financial Statements
December 31, 2017

1. Organization and Nature of Business

Reliance Worldwide Investments, LLC (the “Company”) is a correspondent broker-dealer and investment banking firm. The Company is registered with the Securities and Exchange Commission (SEC), the Municipal Securities Rulemaking Board (MSRB) and applicable states. It is a member of the Financial Industry Regulatory Authority (FINRA) and the Securities Investor Protection Corporation (SIPC). The Company is a Wyoming single member Limited Liability Company wholly owned by one individual.

2. Significant Accounting Policies

Basis of Presentation – The financial statements include the accounts of the Company. The Company has no subsidiaries and is engaged in business as a correspondent broker-dealer. On June 25, 2007, the SEC granted the Company’s registration pursuant to Section 15(b) of the Securities Exchange Act of 1934 and FINRA granted the Company’s application for membership. FINRA approved the Company to conduct the following types of business: broker or dealer retailing corporate equity securities over-the-counter, broker or dealer selling corporate debt securities, mutual fund retailer, U.S. government securities broker, municipal securities broker, put and call broker or dealer or option writer and private placement of securities. The Company’s scope of approved services was expanded on March 22, 2010 with an amendment to its Form BD adding investment banking. The target market for these investment banking services is privately-held lower middle market businesses.

Use of Estimates – The preparation of financial statements in conformity with accounting principals generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Income Taxes – Profits and losses of the Company are passed through to the individual tax return of the managing member and no income tax allowances are included in these financial statements. As of December 31, 2017, the Company’s tax returns for the years 2014 through 2016 are subject to review by its taxing jurisdictions.

The accounting standard FASB ASC 740, Income Taxes, on accounting for uncertainty in income taxes addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. This requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Company’s tax returns to determine whether the tax positions are “more likely than not” of being sustained when challenged or when examined by the applicable tax authority. The measurement of unrecognized tax benefits as well as unrecorded tax liability is adjusted when new information is available, or when an event occurs that requires a change. For the year ended December 31, 2017, the Company has determined that there were no material uncertain tax positions.

Transaction-related expenses are deferred and recognized in the same period as the related revenue to match revenue recognition. Non-transactional based Investment Banking revenues are accrued as earned, consistent with the respective terms of such agreements.

Other revenues include interest earned on the firm's own funds deposited in financial institutions, and administrative registration fees for firm representatives, which are accrued as earned.
