FORM 10-Q

(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934 for the quarterly period ended September 30, 2010

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934 for the transition period from _____ to _____

Commission file number 000-53260

Best Energy Services, Inc.

(Exact name of registrant as specified in its charter)

Nevada 02-0789714
(State or other jurisdiction of incorporation or organization) (I. R. S. Employer Identification No.)

5433 Westheimer Road, Suite 825, Houston, Texas 77056
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code (713) 933-2600

N/A
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares of the registrant's common stock outstanding as of November 19, 2010 was 36,617,809 shares.

Best Energy Services, Inc.

Notes to the Unaudited Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to accounting principles generally accepted in the United States of America and the rules and regulations of the Securities and Exchange Commission and should be read in conjunction with the audited financial statements and notes thereto contained on Form 10-K for the year ended December 31, 2009 filed with the SEC on April 27, 2010. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and the results of operations for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. Notes to the financial statements which substantially duplicate the disclosure contained in the audited financial statements for the year ending December 31, 2009 have been omitted. These unaudited interim consolidated financial statements include the accounts of Best Energy Services, Inc. (“Best Energy”) and its wholly-owned subsidiaries: Best Well Services, Inc. (“BWS”) and Bob Beeman Drilling, Inc. (“BBD”), and its 42.5% owned subsidiary Best Energy Ventures, LLC (BEV). All significant inter-company balances and transactions have been eliminated. Except as otherwise noted, all references herein to “Best Energy,” the “Company,” “we,” “us,” or “our” means Best Energy Services, Inc. and its consolidated subsidiaries.

Going Concern

The Company’s consolidated financial statements are prepared using generally accepted accounting principles applicable to a going concern that contemplates the realization of assets and liquidation of liabilities in the normal course of business. At current levels, the Company’s established source of revenues is not sufficient to cover its operating costs, which raises substantial doubt about its ability to continue as a going concern. In addition, the Company is currently in default under the Amended Credit Agreement, further exacerbating its ability to continue as a going concern.

Reclassifications

Certain prior year amounts have been reclassified to conform to the current year presentation. There was no effect on net income, cash flows or stockholders’ deficit as a result of these reclassifications.

Note 2 - Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States necessarily requires management to make estimates and assumptions that affect the amounts reported in the financial statements. We regularly evaluate estimates and judgments based on historical experience and other relevant facts and circumstances. Actual results could differ from those estimates.

Principles of Consolidation

These consolidated financial statements include the accounts of Best Energy, its wholly owned subsidiaries Best Well Services, Inc. (BWS) and Bob Beeman Drilling Company (BBD), and its 42.5% owned subsidiary Best Energy Ventures, LLC (BEV). All significant inter-company balances and

transactions have been eliminated. All amounts are reported at gross on the consolidated statement of operations, with the loss attributable to the non-controlling members of BEV broken out on a separate line. We consolidate all exploration and production entities over which we exercise substantial control, irrespective of the percentage of ownership we hold in them.

Cash and Cash Equivalents

We consider all highly liquid investments with maturities from date of purchase of three months or less to be cash equivalents. Cash and cash equivalents consist of cash on deposit with domestic banks and, at times, may exceed federally insured limits. As of September 30, 2010 and December 31, 2009, we had no cash balances in excess of federally insured limits and no cash equivalents.

Accounts Receivable

We provide for an allowance for doubtful accounts on trade receivables based on historical collection experience and a specific review of each customer's trade receivable balance. Based on these factors we have established an allowance for doubtful accounts of \$48,623 at September 30, 2010 and December 31, 2009.

Credit Risk

We are subject to credit risk relative to our trade receivables. However, credit risk with respect to trade receivables is minimized due to the nature of our customer base.

Property and Equipment

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the respective assets, generally three to ten years. Leasehold improvements are amortized on a straight-line basis over the shorter of the assets' useful lives or lease terms.

Classification	Estimated Useful Life
Rigs and related equipment	10 years
Vehicles	5 years
Heavy trucks and trailers	7 years
Leasehold improvements	5 years
Office equipment	3 years

The cost of asset additions and improvements that improve the quality or safety or extend the useful lives of property and equipment are capitalized. Routine maintenance and repair items are charged to current operations. The original cost and accumulated depreciation of asset dispositions are removed from the accounts and any gain or loss is reflected in the statement of operations in the period of disposition.

Impairment of Long-Lived Assets

Long-lived assets, including property and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the long-lived asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If it is

determined that an impairment loss has occurred, the loss is measured as the amount by which the carrying amount of the long-lived asset exceeds its fair value.

Deferred Financing Costs

The Company capitalizes certain costs in connection with obtaining its borrowings, such as lender's fees and related attorney's fees. These costs are being amortized to interest expense using the effective interest method.

Deferred financing costs were \$123,396 and \$246,793 net of accumulated amortization at September 30, 2010 and December 31, 2009. Amortization of deferred financing costs totaled \$123,896 for the nine months ended September 30, 2010 and \$27,634 for the nine months ended September 30, 2009.

Assets Held for Sale

The Company classifies certain assets as held for sale, based on management having the authority and intent of entering into commitments for sale transactions expected to close in the next twelve months. When management identifies an asset held for sale, the Company estimates the net selling price of such an asset. If the net selling price is less than the carrying amount of the asset, a reserve for loss is established. Fair value is determined at prevailing market conditions, appraisals or current estimated net sales proceeds from pending offers. The Company identified \$3,004,641 and \$5,986,356 of assets held for sale at September 30, 2010 and December 31, 2009. These assets were part of the discontinued operations of BBD and BGS.

Financial Instruments

The carrying value of our financial instruments, consisting of cash, accounts receivable, accounts payable and accrued liabilities, dividends payable and loans payable approximate their fair value due to the short maturity of such instruments. Unless otherwise noted, it is management's opinion that Best Energy is not exposed to significant interest, exchange or credit risks arising from these financial instruments.

Best Energy follows FASB ASC Topic 480, "Distinguishing Liabilities from Equity" ("ASC Topic 480"). ASC Topic 480 establishes standards for issuers of financial instruments with characteristics of both liabilities and equity related to the classification and measurement of those instruments and Best Energy applies the provisions of this statement in the determination of whether its mandatorily redeemable preferred stock is properly classified as a liability or equity.

Derivative Instruments and Fair Value of Financial Instruments

Derivative Instruments

We have evaluated the application of FASB standards to certain freestanding warrants and preferred stock that contain exercise price adjustment features known as down round provisions. Based on the guidance in these standards, we have concluded these instruments are required to be accounted for as a derivative liability upon issuance. We have recorded the fair value of the warrants that are classified as derivative liabilities in our balance sheet at fair value with changes in the value of these derivatives reflected in the consolidated statements of operations as gain or loss on derivative liabilities. These derivative instruments are not designated as hedging instruments under the standard.

Lattice Valuation Model

We have valued the freestanding warrants and the conversion features in the preferred stock that contain down round provisions using a lattice model, with the assistance of a valuation consultant, for which management understands the methodologies. This model incorporates transaction details such as the company's stock price, contractual terms, maturity, risk free rates, as well as assumptions about future financings, volatility, and holder behavior as of September 30, 2010.

The primary assumptions include projected annual volatility of 63% to 173% and holder exercise targets at 200% of the exercise/conversion price for the warrants and preferred stock, decreasing as the instruments approach maturity. Based on these assumptions, the fair value of the warrant derivatives as of September 30, 2010 was estimated by management to be \$1,207,431, consisting of \$874,593 related to the equity offerings, \$318,660 related to the warrants issued for consulting fees and \$14,178 related to the change in the fair value of the derivative. This resulted in stock-based consulting expense of \$318,660, a loss on derivatives of \$14,178, and a reduction to additional paid in capital of \$874,593.

Income Taxes

Income taxes are accounted for in accordance with FASB ASC Topic 740, "Income Taxes" ("ASC Topic 740") Under ASC Topic 740, income taxes are recognized for the amount of taxes payable for the current year and deferred tax assets and liabilities for the future tax consequence of events that have been recognized differently in the financial statements than for tax purposes. Deferred tax assets and liabilities are established using statutory tax rates and are adjusted for tax rate changes. ASC 740 clarifies the accounting for uncertainty in income taxes recognized in an entity's financial statements and requires companies to determine whether it is "more likely than not" that a tax position will be sustained upon examination by the appropriate taxing authorities before any part of the benefit can be recorded in the financial statements. For those tax positions where it is not "more likely than not" that a tax benefit will be sustained, no tax benefit is recognized. Where applicable, associated interest and penalties are also recorded. Interest and penalties, if any, are recorded within the provision for income taxes in the Company's Consolidated Statements of Income and are classified on the Consolidated Balance Sheets with the related liability for uncertain tax contingency liabilities. As of September 30, 2010 and December 31, 2009, the Company had no uncertain tax positions.

The Company valued its deferred tax liabilities at \$4,833,098 and at \$5,269,691 at September 30, 2010 and December 31, 2009, all of which were related to the difference between tax and GAAP basis in fixed assets at BWS. We recognized a deferred tax benefit of \$436,593 and \$264,948 in the nine months ended September 30, 2010 and 2009, arising from GAAP-basis depreciation, which brought the net recognized value of the assets nearer to the net basis for tax, or from the sale of assets, which eliminated the difference. For the treatment of deferred tax liabilities at BBD and BGS, see the heading ***Liabilities Related to Assets Held for Sale*** at Note 10.

Revenue Recognition

We recognize service revenue based on rate agreements in effect with customers as the service is provided and realization is assured. We recognize equipment sales revenue when risk of loss has transferred to the purchaser and collectability is reasonably assured.

Operating Leases

The Company conducts its activities from leased offices in Liberal, Kansas and Houston, Texas. All leases are classified as operating leases that expire over the next three years and are expensed straight line.

In most cases, management expects that in the normal course of business, leases will be renewed or replaced by other leases.

Stock-Based Compensation

We account for stock-based compensation in accordance with FASB ASC Topic 718, “Compensation — Stock Compensation” (“ASC Topic 718”), which establishes accounting for stock-based payment transactions for employee services and goods and services received from non-employees. Under the provisions of ASC Topic 718, stock-based compensation cost is measured at the date of grant, based on the calculated fair value of the award, and is recognized as expense over the employee’s or non-employee’s service period, which is generally the vesting period of the equity grant.

Income (Loss) per Share

We report basic loss per share in accordance with FASB ASC Topic 260, “Earnings Per Share” (“ASC Topic 260”). Basic loss per share is computed using the weighted average number of shares outstanding during the period. Fully diluted earnings (loss) per share is computed similar to basic income (loss) per share except that the denominator is increased to include the number of common stock equivalents (primarily outstanding options and warrants). Common stock equivalents represent the dilutive effect of the assumed exercise of the outstanding stock options and warrants, using the treasury stock method, at either the beginning of the respective period presented or the date of issuance, whichever is later, and only if the common stock equivalents are considered dilutive based upon Best Energy’s net income (loss) position at the calculation date. Diluted loss per share has not been provided as it is anti-dilutive.

Preferred Stock

We accrue a 1.75% dividend on our preferred stock each quarter. As dividends are paid, either as payment in kind or in cash, we relieve the accrued liability.

Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board (“FASB”) issued new revenue recognition standards for arrangements with multiple deliverables, where certain of those deliverables are non-software related. The new standards permit entities to initially use management’s best estimate of selling price to value individual deliverables when those deliverables do not have Vendor Specific Objective Evidence (“VSOE”) of fair value or when third-party evidence is not available. Additionally, these new standards modify the manner in which the transaction consideration is allocated across the separately identified deliverables by no longer permitting the residual method of allocating arrangement consideration. These new standards are effective for annual periods ending after June 15, 2010 and early adoption is permitted. The adoption of the new standards will not have an impact on The Company’s consolidated financial position, results of operations and cash flows.

In June 2009, the FASB issued guidance establishing the Codification as the source of authoritative U.S. Generally Accepted Accounting Principles (“U. S. GAAP”) recognized by the FASB to be applied by non-governmental entities. Rules and interpretive releases of the Securities and Exchange Commission

(“SEC”) under authority of federal securities laws are also sources of authoritative U.S. GAAP for SEC registrants. The Codification supersedes all existing non-SEC accounting and reporting standards. All other non-grandfathered non-SEC accounting literature not included in the Codification will become non-authoritative. The FASB will no longer issue new standards in the form of Statements, FASB Staff Positions, or Emerging Issues Task Force Abstracts. Instead, the FASB will issue Accounting Standards Updates, which will serve only to update the Codification, provide background information about the guidance and provide the basis for conclusions on changes in the Codification. All content in the Codification carries the same level of authority, and the U.S. GAAP hierarchy was modified to include only two levels of U.S. GAAP: authoritative and non-authoritative. The Codification is effective for the Company’s interim and annual periods beginning with the Company’s year ending December 31, 2009. Adoption of the Codification affected disclosures in the Consolidated Financial Statements by eliminating references to previously issued accounting literature, such as FASBs, EITFs and FSPs.

In June 2009, the FASB issued amended standards for determining whether to consolidate a variable interest entity. These new standards amend the evaluation criteria to identify the primary beneficiary of a variable interest entity and require ongoing reassessment of whether an enterprise is the primary beneficiary of the variable interest entity. The provisions of the new standards are effective for annual reporting periods beginning after November 15, 2009 and interim periods within those fiscal years. The adoption of the new standards will not have an impact on The Company’s consolidated financial position, results of operations and cash flows.

In May 2009, the FASB issued guidance establishing general standards for accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued and shall be applied to subsequent events not addressed in other applicable generally accepted accounting principles. This guidance, among other things, sets forth the period after the balance sheet date during which management should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and the disclosures an entity should make about events or transactions that occurred after the balance sheet date. The adoption of this guidance had no impact on the Company’s consolidated financial position, results of operations and cash flows.

Note 3 - Property and Equipment

Property and equipment consists of the following:

	September 30, 2010	December 31, 2009
Rigs, pumps, compressors, rig houses and related equipment	\$ 20,134,567	\$ 19,810,104
Vehicles	2,125,211	2,113,177
Office and computer equipment	46,250	46,250
Total property and equipment	22,306,028	21,969,531
Less: accumulated depreciation	(6,408,575)	(4,486,852)
Property and equipment, net	<u>\$ 15,897,453</u>	<u>\$ 17,482,679</u>

Depreciation expense was \$1,921,723 and \$1,149,374 for the nine months ended September 30, 2010 and 2009.

Note 4 – Loans Payable

Loan Agreement

The following summary of the terms of our loan agreement with PNC Bank, N.A. reflects the cumulative effect of the twelve amendments that have been entered into since February 14, 2008, the date we entered into the Revolving Credit, Term Loan and Security Agreement with PNC Bank, N.A. (as amended through the date of this Report, the “Loan Agreement”).

Term Loan. The principal amount owed under the term loan as of September 30, 2010 was \$16,222,660. Principal and interest on the term loan are payable monthly with principal payments due as follows: (i) \$98,500 per month from May 1, 2009 through December 31, 2009; (ii) \$125,000 per month from January 1, 2010 through December 31, 2010, except that for May and June 2010 the amount payable was reduced to \$50,000 per month, and for July and August 2010, (iii) except that for September, October and November, 2010 the amount payable was reduced to \$0 per month, (see “recent amendment”, below); and (iv) \$150,000 per month thereafter until maturity. The term loan matures on March 11, 2011. The term loan bears interest at a rate equal to either (i) the alternate base rate (which is generally the greater of the federal funds open rate plus ½%, PNC’s base commercial lending rate and the daily LIBOR rate) plus 2.75% or (ii) the greater of the eurodollar rate or 2% plus 4.00%. The interest rate on the term loan at June 30, 2010 was 6.00%.

Revolver. The principal amount owed under the revolver as of September 30, 2010 was \$3,067,020. The revolving line of credit under the Loan Agreement may be borrowed and re-borrowed until maturity. The amount available under the revolver is the lesser of (i) \$4.0 million and (ii) the sum of (A) 85% of eligible receivables, (B) 100% of cash collateral account held by PNC Bank as additional security and (C) a special over advance amount less (D) any outstanding undrawn letters of credit and such reserves as PNC Bank deems proper and necessary. At September 30, 2010, there was no availability to borrow under the revolver. As of the date of this Report, the special over advance amount is equal to \$1,750,000 less 65% of any net cash proceeds received from the Company from the issuance of any equity interests in the Company after the date of this Report and will remain in place until March 31, 2011 at which time it will reduce to zero. The revolving line of credit matures on March 11, 2011. The revolver bears interest at a rate equal to either (i) the alternate base rate (which is generally the greater of the federal funds open rate plus ½%, PNC’s base commercial lending rate and the daily LIBOR rate) plus 2.50% or (ii) the greater of the eurodollar rate or 2% plus 3.75%. The interest rate on the revolver at September 30, 2010 was 5.75%.

The Loan Agreement requires an annual 75% recapture of the Company’s excess cash flow to be applied to the principal balance, where excess cash flow is defined as EBIDTA less cash tax payments, non-financed capital expenditures and payments of principal on the term loan and interest on indebtedness for borrowed money.

Borrowings under the Loan Agreement are secured by all of the assets and equipment of the Company and all subsidiaries. Any equipment and assets purchased in the future will, once acquired, also be subject to the security interest in favor of PNC Bank.

Under the Loan Agreement, we are subject to customary covenants, including certain financial covenants and reporting requirements. Beginning on March 31, 2010, we were required to maintain a fixed charge coverage ratio. The fixed charge coverage ratio is defined as the ratio of EBITDA minus capital expenditures (except capital expenditures financed by lenders other than under the Amended Credit Agreement) made during such period minus cash taxes paid during such period minus all dividends and

distributions paid during such period (including, without limitation, all payments to the holders of the Series A Preferred Stock), to all senior debt payments as follows:

Twelve Month Period Ending:	Fixed Coverage Ratio:
March 31, 2010	No Test
June 30, 2010	No Test
September 30, 2010	No Test
December 31, 2010	No Test
March 31, 2011 and each fiscal quarter ending thereafter	1.00 to 1.0

Under the Loan Agreement, we are required to maintain a minimum EBITDA as follows:

Period:	Minimum EBITDA:
Three months ended March 31, 2010	\$ 130,000
Six months ended June 30, 2010	700,000
Nine months ended September 30, 2010	1,400,000
Twelve months ended December 31, 2010	2,200,000
Twelve months ended March 31, 2011 and each twelve month period ending on the final day of each fiscal quarter thereafter	No Test

Under the Loan Agreement, we may not pay cash dividends on our common stock or our preferred stock or redeem any shares of our common stock or preferred stock.

Under the Loan Agreement, we are required to maintain a minimum rig utilization requirements set forth in the table below:

Period	Minimum Rig Utilization
Three months ended March 31, 2010	5,325 hours
Six months ended June 30, 2010	14,825 hours
Nine months ended September 30, 2010	25,450 hours
Twelve months ended December 31, 2010	36,225 hours
Twelve months ended March 31, 2011 and each twelve month period ending on the final day of each fiscal quarter thereafter	47,125 hours

Under the Loan Agreement, we are required to make mandatory repayments of the term loan from the proceeds of sale of certain equipment used in our drilling operations (that have been discontinued) set forth in the table below:

Period	Minimum Repayments
One month ended March 31, 2010	\$375,000
Three months ended May 31, 2010	\$975,000
Five months ended July 31, 2010	\$1,575,000
Seven months ended September 30, 2010	\$2,175,000
Nine months ended November 30, 2010	\$2,775,000
Eleven months ended January 31, 2010	\$3,375,000
Thirteen months ended March 31, 2011	\$3,750,000

In addition to the foregoing and other customary covenants, the Loan Agreement contains a number of covenants that, among other things, will restrict our ability to:

- incur or guarantee additional indebtedness;
- transfer or sell assets;
- create liens on assets;
- engage in transactions with affiliates other than on an “arm’s-length” basis; and
- make any change in the principal nature of our business.

The Loan Agreement also contains customary events of default, including nonpayment of principal or interest, violations of covenants, cross default and cross acceleration to certain other indebtedness, bankruptcy, a change of control and material judgments and liabilities.

As collateral for our line of credit, one of our investors has agreed to collateralize the debt with a \$700,000 certificate of deposit. This certificate of deposit is a restricted asset of the investor and is therefore not represented on our balance sheet. We agree to pay that investor 1% per month simple interest on that balance as long as the collateral is outstanding. After September 30, 2010, that investor agreed to accept stock and warrants on terms identical to those in the August Offering in place of cash in full payment for the amount accrued through September 30, 2010.

As of September 30 and through the date of this report, we are in default on certain covenants of our Credit Agreement and are working with our bank to remedy those defaults, including those related to payroll and sales taxes.

Recent Amendments

On September 10, 2010 the Company entered into Amendment No. 13 to the PNC agreement. The amendment reduced the Company’s Term Loan repayment obligation for September, October and November to \$0.

Vehicle Notes

We have entered into various note agreements for the purchase of vehicles used in our business. The notes bear interest at rates between 0.00% and 9.10%, require monthly payments of principal and interest and are generally secured by the specific vehicle being financed. The notes typically have original terms of three to four years. The majority of these notes were assumed by us in the acquisition of BWS. As of September 30, 2010, we owed a total of \$45,705 for all vehicle notes.

Future minimum payments under existing notes payable are as follows:

For the twelve months ending September 30,	Amount
<u>2011</u>	<u>\$ 20,414,210</u>
2012	9,175

Convertible Debt

During June, July and August 2009, we had several preliminary closings of a private placement for a total of 1,088 Units and received gross proceeds of \$1,088,000 (net proceeds of \$843,355 after cash commission of \$244,645). Each Unit consists of a subordinated convertible note payable of \$1,000 and

warrants to purchase 4,000 shares of common stock at an exercise price of \$0.25 per share at any time until expiration on July 1, 2014. A total of 4,352,000 warrants were issued resulting in a discount on debt of \$348,895. The notes bear interest at a rate of 10% per annum, which is payable either in cash semi-annually in arrears on July 1 and January 2 each year, commencing on January 2, 2010 or in shares of common stock at a price of \$0.25 per share. Under the terms of the Amended Credit Agreement, we may not pay cash interest on the notes. The notes are convertible at the option of the note holder into common stock at the rate of \$0.25 per share (the "Conversion Price") and mature on July 1, 2011. If we achieve certain earnings hurdles, we may force the noteholders to convert all or part of the then outstanding notes at the Conversion Price. The notes are unsecured obligations and are subordinate in right of payment to all of our existing and future senior indebtedness.

We evaluated the terms of the notes in accordance with the new standard issued by the FASB related to the disclosure of derivative instruments and hedging activities. Best Energy determined that the conversion feature did not meet the definition of a liability and therefore did not bifurcate the conversion feature and account for it as a separate derivative liability. We evaluated the conversion feature for a beneficial conversion feature. The effective conversion price was compared to the market price on the date of the notes and was deemed to be less than the market value of our common stock at the inception of the note. A beneficial conversion feature was recognized and gave rise to a debt discount of \$237,113, which is amortized over the life of the loans through July 2011 using the effective-interest-rate method.

In connection with the private placement, we issued warrants to the placement agent to purchase 435,200 shares of common stock at an exercise price of \$0.25 per share at any time until expiration on July 1, 2014. These warrants were valued at \$71,264 and are being amortized over the life of the loans through July 2011 using the effective-interest-rate method.

The amortized value of the warrants and the beneficial conversion feature was \$397,396 and \$540,016 as of September 30, 2010 and December 31, 2009. Additionally, cash fees totaling \$244,645 and warrants valued at \$71,264 are being amortized over the life of the loans through July 2011 using the straight-line method. Their net amortized value on September 30, 2010 was \$123,396, and on December 31, 2009, it was \$246,793.

Note 5 – Payroll Taxes

We owe \$592,553 to state and federal taxing entities for past payroll and sales taxes, including penalties and interest. We have negotiated or are in the process of negotiating all late amounts and as of November 19, 2010 are paying all current amounts timely. We have accrued all estimated interest and penalties related to delinquent payroll taxes as of September 30, 2010.

Note 6 - Stock Options and Warrants

Stock Options

Incentive and non-qualified stock options issued to directors, officers, employees and consultants are issued at an exercise price equal to or greater than the fair market value of the stock at the date of grant. The stock options vest immediately or conditionally over a period of ten to twenty-four months, and expire five years from the date of grant. Compensation cost related to stock options is recognized on a straight-line basis over the vesting or service period.

The fair value of each stock option granted is estimated on the date of grant using a Black-Scholes option pricing model and the following weighted average assumptions for the nine months ended:

	September 30, 2010	September 30, 2009
Expected life (years)	4.25	2.50
Risk-free interest rate	2.40 %	1.35 %
Volatility	176.20%	120.00 %
Dividend yield	0.00 %	0.00 %

The expected life of the options represents the period of time the options are expected to be outstanding. The expected term of options granted was derived based on a weighting between the average midpoint between vesting and the contractual term. Our expected volatility is based on the historical volatility of comparable companies for a period approximating the expected life, due to the limited trading history of our common stock. The risk-free interest rate is based on the observed U.S. Treasury yield curve in effect at the time the options were granted. The dividend yield is based on the fact that we do not anticipate paying any dividends on common stock in the near term.

A summary of our stock option activity and related information is presented below:

	Number of Options	Weighted Average Exercise Price Per Option	Weighted Average Contractual Life (Years)
Outstanding at December 31, 2009	4,165,000	0.31	
Granted/Issued	8,550,000	0.10	
Exercised	-	-	
Forfeited	(2,365,000)	0.25	
Outstanding at September 30, 2010	<u>10,350,000</u>	<u>\$ 0.16</u>	<u>4.31</u>

The weighted average grant-date fair value per share for options granted during the period ended September 30, 2010 and 2009 was \$0.10 and \$0.86, respectively. As of September 30, 2010, there was \$251,641 of unrecognized compensation cost related to non-vested stock options. Stock option expense recognized in the nine months ended September 30, 2010 and 2009 was \$352,300 and \$462,888.

At September 30, 2010 the aggregate intrinsic value of stock options outstanding was zero, of which 2,850,000 shares are immediately exercisable and have a remaining contractual term of 4.3 years. At December 31, 2009, the aggregate intrinsic value of stock options outstanding was zero. The intrinsic value for stock options outstanding is calculated as the amount by which the quoted price of our common stock as of September 30, 2010 and December 31, 2009 exceeds the exercise price of the option.

During the nine months ended September 30, 2009, 150,000 options were exercised in a cashless exercise that resulted in 75,743 shares being issued.

On February 3, 2010, the Board of Directors of the Company approved 8,550,000 options, including 7,250,000 to officers and directors with a strike price of the Company, as described below:

- David Voyticky, a Director, received options to acquire 1,000,000 shares of the Company's common stock at an exercise price of \$0.10 per share.
- James Byrd, Jr., a Director, received options to acquire 1,000,000 shares of the Company's common stock at an exercise price of \$0.10 per share.
- Joel Gold, a Director, received options to acquire 1,000,000 shares of the Company's common stock at an exercise price of \$0.10 per share.
- Mark G. Harrington, Chairman and CEO, received options to acquire 3,000,000 shares of the Company's common stock at an exercise price of \$0.10 per share.
- Eugene Allen, President and COO, received options to acquire 750,000 shares of the Company's common stock at an exercise price of \$0.10 per share. Those options were forfeited upon termination of his contract.
- Dennis Irwin, CFO, received options to acquire 500,000 shares of the Company's common stock at an exercise price of \$0.10 per share.

These options will vest as follows: (i) one-third (1/3) immediately upon date of grant, (ii) one-third (1/3) on the date that the Company first records EBITDA of at least \$5 million for a fiscal year (as reflected in the filing of the Company Annual report on Form 10-K for that fiscal year) and (iii) one-third (1/3) on the date that the Company next records EBITDA of at least \$5 million for a fiscal year (as reflected in the filing of the Company Annual report on Form 10-K for that fiscal year). These option grants are also subject to the following conditions: (i) the options will vest immediately upon the occurrence of a change in control of the Company or the holder's termination without cause; (ii) the options will be forfeited immediately upon a holder's termination for cause; (iii) the options will be exercisable for 90 days following the holder's voluntary termination from the Company; (iv) the options were not issued under a shareholder approved plan and will be non-qualified stock options under applicable IRS rules; (v) the options will be "restricted securities" under federal securities laws; (vi) the options will be subject to the Company's ability to comply with applicable federal and state securities laws; (vii) the directors' options are subject to cutbacks if necessary to provide additional authorized shares for the Company's various needs; (viii) the Board will have the sole and absolute discretion to interpret the terms of the options, including vesting, change in control and terminations for cause, and such determinations shall be final and binding on the holders. Options with contingent vesting are not expensed until vesting is determined likely to occur.

The following table summarizes the grant date fair values of our stock option activity, for non-vested options, granted options, vested options and forfeited options during the period ended September 30, 2010:

	Number of Options	Weighted Average Grant Date Fair Value
Non-vested at December 31, 2009	330,521	\$ 0.25
Granted	8,550,000	0.10
Vested	(2,850,000)	0.10
Forfeited	(647,118)	0.18
Non-vested at September 30, 2010	5,383,403	\$ 0.10

Warrants

	Number of Common Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Number of Preferred Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)
Outstanding at December 31, 2009	8,665,475	0.29	4.44	135,630	0.16	3.98
Granted/Issued	42,441,100	0.10	4.99	-	-	-
Exercised	-	-	-	-	-	-
Forfeited	(2,550,000)	0.25	4.71	-	-	-
Outstanding at September 30, 2010	<u>48,556,575</u>	<u>0.13</u>	<u>4.90</u>	<u>135,630</u>	<u>0.16</u>	<u>3.98</u>
Exercisable at September 30, 2010	<u>48,556,575</u>	<u>\$0.13</u>	<u>4.90</u>	<u>135,630</u>	<u>\$0.16</u>	<u>3.98</u>

The fair value of each warrant granted is estimated on the date of grant using a Black-Scholes option pricing model and the following weighted average assumptions:

At September 30, 2010 and December 31, 2009, the aggregate intrinsic value of the warrants outstanding and exercisable for common shares and preferred shares was zero, due to a higher exercise price for all outstanding and exercisable warrants than the September 30, 2010 and December 31, 2009 closing stock price.

The warrants that were issued with the equity offerings and the additional 10,000,000 warrants issued to AG are all subject to a provision (the “Anti-Dilutive Provision”) such that if any shares or warrants are later issued by the Company at a lower price, the strike price of the warrants will be reset to the lower value. The Anti-Dilutive Provision gives rise to a derivative liability that we valued at \$1,207,431 as of September 30, 2010. There was no derivative liability at December 31, 2009.

Note 7 - Stockholders' Equity

Private Placements

From March 25 through March 31, 2010 the Company sold units of Company securities (the “March Units”) at a price of \$24,000 per Unit (the “March Offering”), with each March Unit consisting of (i) 240,000 shares of Common Stock, (ii) five-year warrants to acquire 240,000 shares of Common Stock at an exercise price of \$0.10 per share (“March Subscription Warrants”) and (iii), if investors in the Offering hold shares of the Company’s Series A Preferred Stock, par value \$0.001 per share (“March Preferred Stock”), five-year warrants to acquire up to 240,000 additional shares of Common Stock at an exercise price of \$0.10 per share, depending on ownership of Preferred Stock (“March Participation Warrants”). The placement agent for the Offering (or its sub-agents) received the following compensation in connection with the Offering: (i) as a commission, an amount equal to seven percent (7%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share, plus (ii) as a management fee, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share, plus (iii) as a non-accountable expense allowance, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share. In addition, the Company is obligated to

issue to the placement agent, or its sub-agents: (i) warrants to purchase up to 10% of the shares of Common Stock issued to investors in connection with the Offering and (ii) ten percent (10%) of the Subscription Warrants issued.

The Company received gross cash proceeds of \$1,204,630. The cash portion of the placement agent's fees and commissions in connection with the initial closing of the Offering totaled \$112,938. We also paid legal expenses of \$111,559 and escrow fees of \$7,500.

From August 16 through September 22, 2010 the Company sold units of Company securities (the "August Units") at a price of \$25,000 per August Unit (the "August Offering"), with each August Unit consisting of (i) 250,000 shares of Common Stock, (ii) five-year warrants to acquire 240,000 shares of Common Stock at an exercise price of \$0.10 per share ("August Subscription Warrants") and (iii), if investors in the Offering hold shares of the Company's Series A Preferred Stock, par value \$0.001 per share ("Preferred Stock"), five-year warrants to acquire up to 250,000 additional shares of Common Stock at an exercise price of \$0.10 per share, depending on ownership of Preferred Stock ("August Participation Warrants"). The placement agent for the Offering (or its sub-agents) received the following compensation in connection with the Offering: (i) as a commission, an amount equal to seven percent (7%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share, plus (ii) as a management fee, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share, plus (iii) as a non-accountable expense allowance, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share. In addition, the Company is obligated to issue to the placement agent, or its sub-agents: (i) warrants to purchase up to 10% of the shares of Common Stock issued to investors in connection with the Offering and (ii) ten percent (10%) of the Subscription Warrants issued.

The Company received gross cash proceeds of \$105,000. After September 30, 2010 we received additional proceeds of \$223,500, for a total of \$328,500. The cash portion of the placement agent's fees and commissions in connection with the closings of the Offering totaled \$29,905. We also paid legal expenses of \$40,000, marketing costs of \$18,400 and escrow fees of \$7,500.

Net proceeds from sales of March Units and August Units for the nine months ended September 30, 2010 were \$1,007,326.

Dividends

The Series A Preferred Stock has a stated face value of \$10 per share, which shall be redeemed by us using not less than 25% of our net income after tax each year. The unredeemed portion of the face value of the Series A Preferred Stock will receive dividends at an annual rate of 7%, payable quarterly in kind at the then-current market price or in cash at our option. The shareholders have the right to convert the Series A Preferred Stock into Common Stock at a rate of \$4.00 per share of Common Stock.

On February 3, 2010 we declared and paid Series A Preferred Stock dividend to be paid in kind with shares of Series A Preferred Stock at a rate of \$10 per share. The total amount of the dividend of \$840,570 was paid by the issuance of 84,057 shares of Series A Preferred Stock.

At September 30, 2010 and December 31, 2009, there were \$1,169,719 and \$1,137,534 of accrued and unpaid dividends.

We have not paid or declared any dividends on our common stock and currently intend to retain earnings to redeem the Series A Preferred Stock and to fund our working capital needs and growth opportunities. Any future dividends on common stock will be at the discretion of our board of directors after taking into account various factors it deems relevant, including our financial condition and performance, cash needs, income tax consequences and the restrictions Nevada and other applicable laws and our credit facilities then impose. Our debt arrangements include provisions that generally prohibit us from paying dividends, other than dividends in kind, on our preferred stock.

Shares Issued as Compensation

On January 2, 2010, we issued 217,600 shares of common stock as paid-in-kind interest on convertible debt. The accrued interest owed was \$56,425 and it was converted at \$0.25 a share according to the conversion agreement. No gain or loss was recorded on the conversion due to the conversion being within the terms of the convertible debt agreement.

On February 8, 2010, in settlement of certain claims made by a party that previously provided bridge financing to the Company, the Company issued 750,000 shares of the Company's common stock to such party. The shares were valued at \$82,500, based on the market price of the shares on the date of issuance.

On March 31, 2010, the Company agreed to reduce the exercise price on the warrants held by certain investors in BEV from \$0.25 per share to \$0.10. The original warrants contained a provision that exercise price would be reduced to equal that of any closings that took place within 60 days of the agreement to purchase membership interest in BEV, which was signed December 16, 2009. Although the Offering did not close until more than 60 days after the agreement, the Company reduced the exercise price in good faith with its investors. The Company recognized a deemed dividend of \$5,129 in association with the reduction of the exercise price, using the Black-Scholes method, a volatility of 171.19%, a remaining life of 4.71 years and a market price of stock of \$0.08 per share.

On April 15, 2010, we agreed to issue James Byrd, director, 360,000 shares of stock as compensation for consulting services he provided to the Company from May 2009 through April 2010. The expense was recognized in the nine months ending September 30, 2010. The market price of the stock was \$.07 and we recognized \$25,200 expense in association with the shares issued.

On May 26, 2010, we agreed to issue our attorneys 50,000 shares of common stock as part of our retainer agreement. The market price of the stock was \$.05 and we recognized \$2,500 expense in association with the shares issued.

Conversion of Preferred Stock

In the nine months ending September 30, 2009 one of our shareholders converted 36,000 shares of Series A Preferred Stock to 90,000 shares of Common Stock at a conversion price of \$4.00 per shares. The conversion was recorded according to the terms of the Series A Preferred Stock agreement and therefore resulted in a \$360,000 decrease in Series A Preferred Stock valued at par, an increase of \$90 in Common Stock valued at par and an increase in additional paid in capital of \$359,910. On conversion, the investor's shares of Series A Preferred Stock were retired.

Note 8 - Related Party Transactions

Larry Hargrave, our former CEO, was awarded a bonus of \$1,000,000 to be paid \$15,000 per month beginning in March 2008. As of September 30, 2010 and 2009, \$535,000 remained unpaid. During 2009, we renegotiated the payment of the remaining bonus to be paid as follows:

- We agreed to issue 600,000 shares of common stock and reduce the cash payment of deferred compensation by \$300,000. The shares were valued at \$606,000 based on the closing price of the stock on the date of the agreement.
- We agreed to repay the money owed to Mr. Hargrave, subject to availability of cash, at the sole and absolute discretion of the Board of Directors.

Joel Gold, one of our directors, was a Director of Investment Banking at Andrew Garrett. In 2009, we paid Andrew Garrett as our placement agent a total of \$141,440 in fees. We also issued warrants to purchase 435,200 shares.

For the nine months ended September 30, 2010, we paid Andrew Garrett as our placement agent a total of \$126,588 in fees and 1,631,300 in warrants. The warrants issued in to Andrew Garrett in 2010 have a strike price of \$0.10 and are subject to the Anti-Dilutive Provision described in Note 6, and were valued at \$318,660.

On April 15, 2010, we agreed to issue James Byrd, director, 360,000 shares of stock as compensation for consulting services he provided to the Company from May 2009 through April 2010. The expense was recognized in the nine months ending September 30, 2010.

Note 9 –Fair Value Measurement

The Company determines fair value measurements used in its consolidated financial statements based upon the exit price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants exclusive of any transaction costs, as determined by either the principal market or the most advantageous market. The principal market is the market with the greatest level of activity and volume for the asset or liability. Absent a principal market to measure fair value, the Company has used the most advantageous market, which is the market in which the Company would receive the highest selling price for the asset or pay the lowest price to settle the liability, after considering transaction costs. However, when using the most advantageous market, transaction costs are only considered to determine which market is the most advantageous and these costs are then excluded when applying a fair value measurement.

Inputs used in the valuation techniques to derive fair values are classified based on a three-level hierarchy. The basis for fair value measurements for each level within the hierarchy is described below with Level 1 having the highest priority and Level 3 having the lowest.

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable in active markets.

Level 3: Valuations derived from valuation techniques in which one or more significant inputs are unobservable.

The following tables provide a summary of the recognized assets and liabilities that are measured at fair value on a non-recurring basis:

	September 30, 2010	Quoted Prices in Active Markets for Identical Assets / Liabilities	Significant Other Observable Inputs	Significant Unobservable Inputs
Assets:				
Assets held for sale	<u>3,004,644</u>	<u>-</u>	<u>-</u>	<u>3,004,644</u>

	December 31, 2009	Quoted Prices in Active Markets for Identical Assets / Liabilities	Significant Other Observable Inputs	Significant Unobservable Inputs
Assets:				
Assets held for sale	<u>5,986,356</u>	<u>-</u>	<u>-</u>	<u>5,986,356</u>

The following tables provide a summary of the recognized assets and liabilities that are measured at fair value on a recurring basis:

	September 30, 2010	Quoted Prices in Active Markets for Identical Assets / Liabilities	Significant Other Observable Inputs	Significant Unobservable Inputs
Liabilities:				
Derivates associated with warrants	<u>1,207,431</u>	<u>-</u>	<u>-</u>	<u>1,207,431</u>

The fair value measurements of assets held for sale are calculated based on the expected realization from selling those assets.

The carrying amounts of cash and cash equivalents, accounts receivable and accounts payable, and accrued expenses approximate fair value based on the short maturities of these instruments. At September 30, 2010 and December 31, 2009, the fair value of the debt was equal to the carrying value.

Note 10 –Discontinued Operations and Assets Held for Sale

Bob Beeman Drilling, Company

On or about October 8, 2009, the Company discontinued the operations of BBD, due to lack of profitability. The discontinuation of operations resulted in a 100 percent impairment of the goodwill associated with the purchase of the BBD. The related assets are now being held for sale. Due to the

current depressed market for assets in the drilling industry, an impairment of their value was recorded in 2009, which reduced their value to \$4,873,256 as of December 31, 2009.

In November 2010 we filed a claim with our insurance company for \$654,189 related to assets missing from our yard in Moab, Utah. We accounted for the theft as an extraordinary loss. See Note 13.

During the nine months ended September 30, 2010, the total loss associated with discontinued operations was \$233,545, including operating loss of \$123,303, allocated interest expense of \$415,240, a gain on deferred taxes associated with the disposition of assets of \$335,374, and a loss on the sale of equipment of \$30,376.

The assets and liabilities of items held for sale associated with discontinued operations at BBD are as follows as of September 30, 2010 and December 31, 2009:

	<u>September 30, 2010</u>	<u>December 31, 2009</u>
ASSETS:		
Fixed assets	\$ 2,374,241	\$ 4,873,256
Goodwill	<u>-</u>	<u>-</u>
LIABILITIES:		
Deferred tax liability	<u>\$ 711,776</u>	<u>\$ 1,501,046</u>

Best Geological Services

On or about December 31, 2009, the Company discontinued the operations of BGS, due to lack of profitability. The related assets are now being held for sale. Due to the condition of the assets and current depressed market for assets in the rig-housing industry, impairment was recorded in 2009, which reduced their value to \$1,113,100. A further impairment was recorded on June 30, 2010 following an independent appraisal order by PNC Credit, which reduced their values by another \$482,700. As a result of the write

down of the fixed assets, the Company recognized a deferred tax asset of \$335,485, calculated on the difference between the taxable basis of the assets and their value for the Company.

During the nine months ended September 30, 2010, the total loss associated with discontinued operations was \$473,460, including a loss from operations of \$72,617 allocated interest expense of \$87,088, a write-down of assets of \$482,700 and gain on deferred taxes associated with the impairment of assets of \$168,945.

The assets and liabilities of items held for sale associated with discontinued operations at BGS are as follows as of September 30, 2010 and December 31, 2009:

	<u>September 30, 2010</u>	<u>December 31, 2009</u>
ASSETS:		
Fixed assets	\$ 630,400	\$ 1,113,100
Deferred tax asset*	<u>\$ 335,485</u>	<u>\$ 166,540</u>
Total assets	<u>\$ 965,885</u>	<u>\$ 1,279,640</u>

* This asset is offset against liabilities at the consolidated level and, therefore, is not subject to a valuation allowance.

Best Energy Ventures

BEV was formed in 2009 to rejuvenate oil wells for the production of natural gas. We purchased rights to develop one such well, but, due to lack of capital, did not commence operations within the terms of the lease. In connection with the sale of membership interest in Best Energy Ventures, LLC, we issued warrants to the members to purchase 1,800,000 shares of common stock at an exercise price of \$0.25 per share at any time until expiration on December 16, 2014. We valued these warrants using the Black-Scholes option pricing model with the following assumptions: stock prices on the grant date of \$0.20, lives of five years, expected volatility of 179.43%, risk-free interest rate of 2.34%, and expected dividend rate of 0.00%. These warrants were valued at \$267,366 and were expensed on the discontinuance of the operation in 2009. On March 31, 2010, we reduced the strike price on the warrants to equal that of the strike price on the warrants issued with the private placement and recognized a deemed dividend of \$5,129. Also in connection with the sale of BEV, we offered 1,000,000 shares to certain investors if we did not commence work on the rig within 90 days of the date of their investment. We did not begin that work and a related stock payable of \$120,000 was recorded as of December 31, 2009. The payable was valued based on the trading market price of the shares on December 31, 2009. During the nine months ended September 30, 2010, the total loss associated with discontinued operations was \$63,000, all of which was associated with operations.

On June 4, 2010, the Company extended its lease for another 12 months in exchange for a 7.5% interest in BEV. Because the lease value is fully impaired for accounting purposes, no gain or loss was recorded as of the date of the transaction.

Liabilities Related to Assets Held for Sale

Deferred tax liabilities associated with assets held for sale are classified as liabilities related to assets held for sale. The Company identified \$376,291 and \$1,334,506 liabilities related to assets held for sale at September 30, 2010 and December 31, 2009. The decrease of \$958,215 resulted from 453,896 related to the extraordinary loss from theft at BBD, \$335,374 related to sales of assets at BBD and \$168,945 related to the impairment in the value of the assets at BGS.

Note 11 – Subsequent Events

On October 10, 2010, we issued 217,600 shares of common stock as paid-in-kind interest on convertible debt as of July 1, 2010. The accrued interest owed was \$56,425 and it was converted at \$0.25 a share according to the conversion agreement. No gain or loss was recorded on the conversion due to the conversion being within the terms of the convertible debt agreement.

On November 11, 2010, we declared and paid Series A Preferred Stock dividend to be paid in kind with shares of Series A Preferred Stock at a rate of \$10 per share. The total amount of the dividend of \$1,169,719 was paid by the issuance of 116,792 shares of Series A Preferred Stock.

Also November 11, 2010, we agreed to issue 2,713,667 shares of Common Stock and 5,427,333 warrants at \$0.10 as paid-in-kind interest to the investor who has provided us with \$700,000 of bridge financing. Those warrants are subject to the Anti-Dilutive Provision described in Note 6.

From October 18, 2010 to October 29, 2010 the Company received gross cash proceeds of \$223,500 for October sales of units related to the August Offering, which closed October 29, 2010. See Note 6.

Note 12 – Legal Matters

We are from time to time subject to litigation arising in the normal course of business. As of the date of this Quarterly Report on Form 10-Q, there are no pending or threatened proceedings which are currently anticipated to have a material adverse effect on our business, financial condition or results of operations.

On or about April 7, 2010, the Company was served with a petition captioned *Larry W. Hargrave and American Rig Housing, Inc. v. Best Energy Services, Inc.* that was filed in the 234th Judicial District Court of Harris County, Texas (Cause Number 201021424). Mr. Hargrave is the former CEO of the Company. The lawsuit asserts the following breach of contract claims: (1) failure to issue and deliver to American Rig Housing, Inc. (“ARH”) 1,465,625 shares of the Company’s common stock as required under the acquisition agreement pursuant to which the Company purchased certain assets of ARH in February 2008, (2) failure to issue 75,000 shares of the Company’s common stock as required under a severance agreement entered into with Mr. Hargrave, the former CEO of the Company (the “Severance Agreement”), (3) failure to reimburse Mr. Hargrave for certain unspecified verified out-of-pocket expenses incurred in the performance of his duties as CEO of the Company, (4) failure to issue 600,000 shares of the Company’s common stock, as deferred compensation, as required under the Severance Agreement, (5) failure to make the monthly cash payments due to Mr. Hargrave under the Severance Agreement, which consist of (i) \$15,000 per month for the first four months beginning in January 2009 and (ii) \$10,000 per months for the next forty-nine (49) months, (6) failure to make certain unspecified payments, including expense reimbursements, under a consulting agreement alleged to have been entered into in January 2009 and (7) failure to reimburse Mr. Hargrave for certain unspecified payments made by the plaintiffs to vendors of the Company. The relief requested by the plaintiffs includes actual damages, specific performance and costs and attorneys’ fees. The Company plans to contest the lawsuit vigorously. As of September 30, 2010, the stock had not been issued in certificate form, but had been recorded. Further, the deferred compensation of \$535,000 has been accrued, which is equal to the amounts in the severance agreement less the \$15,000 payment that was made in January 2009.

On or about May 17, 2010, the Company was served with a petition captioned *Linda J. Hargrave vs. Best Energy Services, Inc.* that was filed in the 234th Judicial District Court of Harris County, Texas (Cause No. 2010-24463). Mrs. Hargrave contends that the Company has defaulted on lease payments in the total amount of \$64,000 for the property at 4092 US Highway 59 South, Cleveland, Texas 77327. Mrs. Hargrave additionally alleges that the Company had failed to pay the property taxes in the amount of \$5,792. Mrs. Hargrave obtained the property from her ex-husband, Larry Hargrave, through a divorce decree. The relief requested by the Plaintiff includes actual damages, pre-judgment interest, attorney’s fees and costs of court. All taxes and rent have been accrued.

The Company plans to contest both of these lawsuits vigorously and file substantial counterclaims for breach of fiduciary duty, fraud and fraudulent inducement. Although the Company believes the plaintiffs’ claims are meritless, there can be no assurance that the Company will prevail in this litigation, the consequences of which would be potentially substantial economic costs to the Company, substantial dilution through the issuance of additional shares of Common Stock to the plaintiffs, any of which would be a material adverse effect which could potentially cause the Company to declare bankruptcy and make the Units worthless.

Note 13 – Extraordinary Loss

In November 2010 we filed a claim with our insurance company for \$654,189 related to assets missing from our yard in Moab, Utah.

We accounted for the stolen assets as an extraordinary item, writing off \$1,440,940 of assets held for sale and, based on our determination that collection of the receivable was more than likely, recording an insurance receivable of \$654,189, an extraordinary loss on insurance claim of \$786,751 and an extraordinary deferred tax gain of \$453,896.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD LOOKING STATEMENTS: STATEMENTS ABOUT OUR FUTURE EXPECTATIONS ARE "FORWARD-LOOKING STATEMENTS" AND ARE NOT GUARANTEES OF FUTURE PERFORMANCE. WHEN USED HEREIN, THE WORDS "MAY," "WILL," "SHOULD," "ANTICIPATE," "BELIEVE," "APPEAR," "INTEND," "PLAN," "EXPECT," "ESTIMATE," "APPROXIMATE," AND SIMILAR EXPRESSIONS ARE INTENDED TO IDENTIFY SUCH FORWARD-LOOKING STATEMENTS. THESE STATEMENTS INVOLVE RISKS AND UNCERTAINTIES INHERENT IN OUR BUSINESS, INCLUDING THOSE SET FORTH UNDER THE CAPTION "RISK FACTORS," IN THIS DISCLOSURE STATEMENT, AND ARE SUBJECT TO CHANGE AT ANY TIME. OUR ACTUAL RESULTS COULD DIFFER MATERIALLY FROM THESE FORWARD-LOOKING STATEMENTS. THIS FORM 10-Q DOES NOT HAVE ANY STATUTORY SAFE HARBOR FOR THIS FORWARD LOOKING STATEMENT. WE UNDERTAKE NO OBLIGATION TO UPDATE PUBLICLY ANY FORWARD-LOOKING STATEMENT.

This Management's Discussion and Analysis should be read in conjunction with the financial statements included in this Quarterly Report on Form 10-Q (the "Financial Statements"). The financial statements have been prepared in accordance with generally accepted accounting policies in the United States ("GAAP"). Except as otherwise disclosed, all dollar figures included therein and in the following management discussion and analysis are quoted in United States dollars.

Company Overview

Through our wholly owned subsidiary, Best Well Service, Inc. ("BWS"), we have a strong footprint in the hydrocarbon rich Hugoton basin. BWS has distinguished itself over the years in its service to both major oil companies and large independents, as well as an employee retention history that we believe is among the best in the industry. BWS also has complete in-house safety certifications and we rank extremely high within our regional peer group. BWS is headquartered out of Liberal, Kansas and has 25 workover rigs.

Business Strategy

Our overreaching goal for 2010 is to increase the level and predictability of our revenues in the well services business. To accomplish this objective we are focused on three distinct growth avenues as discussed below.

Basin-Centered Opportunities. In early 2009, workover activity industry-wide witnessed a severe contraction. At BWS, activity decreased in a matter of weeks from 25 active rigs to as few as three. In the wake of that decline, BWS was able to restore its activity level to between 40-60% of available rigs by capturing a larger market share of available work in the Hugoton Basin. Best now estimates that BWS's share of the local market as measured by being its customers' "first call" is roughly 80% versus 30-35% in 2008. Best believes this higher market share is directly attributable to the following:

- More customer-friendly pricing practices. In 2008, based on available information, competitors of Best were charging as much as \$340-\$360 per hour for the same services for which BWS was charging \$240 per hour. Following the early 2009 downturn, BWS reduced the price of its services by an additional 10-15%. Based on available information, BWS's competitors reduced their prices more in an attempt to remain competitive with BWS's pricing, and in many cases after failing to do so, withdrew from the Hugoton Basin. Best will continue to offer value-priced

service with strong on the job performance and a superb safety record to its customers in the Hugoton and likewise as it expands into areas outside its traditional Hugoton area of operations.

- Safety record. BWS has an active in-house safety program, which it also tailors to fit its customers' needs when requested. In fact, Best aims to act pro-actively by putting in place safety protocols that exceed the expectations of our customers. Best believes that BWS's safety record ranks superior to that of its local competitors.
- Reputation and performance. BWS began operations in the Hugoton Basin in 1991. The reputation and performance of BWS over that time has been consistent and always customer-focused. In addition, many of our key employees, including sales, pushers, operators and rig hands have been with BWS for many years. In addition, BWS's low historical employee turnover rate of less than 10% in recent years ranks BWS among the top companies in its sector in employee retention. Best believes the loyalty of its employees and their intimate knowledge of operational challenges in the Hugoton are the key reason for high "first call" rate with its customers.

In addition to continuing growth in our traditional Hugoton Basin market area, our business plan calls for growth through two additional efforts- New Basin Opportunities and HBFP.

New Basin Opportunities. We believe the strength of BWS's reputation in the Hugoton Basin is an important asset for Best. Fueling that reputation is our intense focus on the needs of our customers, including the need for value-oriented pricing and strong safety programs. In furtherance of this aspect of our strategy, on August 3, 2010, Best announced that it had expanded the reach of its well service business to now include the Central Kansas Uplift. Operations are centered in Pratt, Kansas, located some 120 miles to the East of Liberal. Best has deployed up to three rigs thus far into the area and expects demand for additional equipment as Best's brand, value pricing and performance become more demonstrated to potential new customers in the area.

In addition, for the past six months, Best has been exploring and analyzing opportunities to redeploy some of BWS's equipment into more active basins, in particular where there are high levels of activity in emerging shale-based plays that have a strong oil-focused component. After considerable analysis, Best is focusing its attention on the Eagle Ford shale play of South Texas. Best was recently a sponsoring exhibitor at the largest industry trade show to date on the Eagle Ford. The Eagle Ford covers a 15 county area of South Texas and is believed to cover a potentially prospective geographic reach of some 50 by 400 square miles. Several of Best's existing customers in the Hugoton Basin are also large stakeholders in the Eagle-Ford play. In addition to those customers, Best has relationships with an additional base of customers through prior relationships between Best's CEO and those potential customers. Best's objective is to have several rigs deployed into South Texas prior to the end of the year. Based on industry forecasts of activity for the area, Best believes that as many as ten rigs could be actively deployed into South Texas within the next year. Finally, Best is exploring various avenues to accelerate its presence in South Texas beyond its base case of forecasted growth.

HBFP. During 2009, a much repeated reason our customers gave for not having more active workover programs was that capital was not being made available from their corporate decision makers. In recognition of the customer's need for capital, Best is in the process of establishing Hugoton Basin Financing Partners ("HBFP"), a joint undertaking with an oil and gas focused private equity group based in New York. Under the arrangement as currently contemplated, BWS would source candidates for HBFP that require capital to finance their workover projects. HBFP would take capital advanced to it by the private equity Fund and, on certain undisclosed terms, provide financing to the customer in return for a preferential return from production from the wells, plus a premium and a residual back-in after payout.

Customers of HBFP would be required to use BWS to provide their workover services. In addition, BWS would be retained to bundle certain additional services for the HBFP customer, with BWS being compensated for such services by the vendor. The HBFP non-binding indicative term sheet calls for up to \$5 million of capital being made available to potential BWS customers. The HBFP transaction is subject to negotiation of a definitive agreement between the Fund and Best. Best believes there may be a substantial market for this style of financing, not only in the Hugoton Basin, but in other basins as well.

Other Initiatives. During 2009, Best formed a new minority owned subsidiary, Best Energy Ventures (“BEV”) for the purpose of developing projects in the exploration and production business that could utilize our workover rigs. The Company has matured one such project in the southern United States that could represent an important extension of an existing shale-based play currently underway within a 100-mile proximity of the target area. To test this potential extension, BEV acquired a 160 acre lease which also contains a previously abandoned well in a horizon slightly deeper than the targeted extension play horizon. The deeper horizon may contain between 100,000-350,000 barrels of remaining recoverable oil, which would be additive to the potential gas horizon up hole. BEV is currently seeking an industry partner that would fund the reentry, test the potential shale-gas extension, and restore the deeper producing oil horizon to production and near-term cash flow. If successful in establishing commercial production in the natural gas zone, BEV and its industry partner would seek to scale out development throughout this lease. To date, Best has funded the efforts of BEV by sales of membership in the subsidiary totaling \$150,000. Best holds a 42.5% interest in BEV and will direct the project development. Best is not liable for any capital calls or liabilities of BEV and intends to finance the entirety of any future development with industry partner’s capital. There can be no assurance BEV will be successful in finding an industry partner or that the well can be successfully reentered. If the reentry is mechanically successful there can be no assurance that the deeper oil horizon can be mechanically restored to production and/or that the shallower gas horizon can be sufficiently stimulated to produce economic quantities of natural gas.

Market Conditions in Our Industry

The United States oil field services industry is highly cyclical. Volatility in oil and natural gas prices can produce wide swings in the levels of overall drilling activity in the markets we now serve and affect the demand for our drilling services and the day rates we can charge for our rigs. The availability of financing sources, past trends in oil and natural gas prices and the outlook for future oil and natural gas prices strongly influence the number of wells oil and natural gas exploration and production companies decide to drill. In particular, the significant BTU disparity between crude oil and natural gas prices has persisted, with natural gas selling at a significant discount to its crude oil comparative. In part for that reason, Best over the past six months embarked on a program of refocusing its equipment into areas with higher levels of crude oil activity versus natural gas activity, such as the Hugoton Basin.

Results of Operations

Three Months Ended September 30, 2010 compared with the Three Months Ended September 30, 2009

Revenues were \$1,578,297 for the three months ended September 30, 2010 compared with revenues of \$854,938 million for the three months ended September 30, 2009. The increase of \$723,359 million was primarily the result of increasing activity in the drilling and reworking of natural gas wells in the Hugoton Basin, of our increasing market share and of our expansion into new regions.

Operating Expenses were \$1,218,113 for the three months ended September 30, 2010 compared with \$872,834 million for the three months ended September 30, 2009, resulting in an increase of \$345,279. This increase was a result of the increase in business unit operating expenses consequent to

increasing rig activity. Although revenues increased by more than 85%, direct costs were up just 40%. Operating expenses includes direct costs of revenues, and business unit operating expenses, but exclude depreciation and amortization. Considering just direct costs, Best's gross margin improved to 54% in the third quarter of 2010 from 41% in the third quarter of 2009.

General and Administrative Expenses on a cash basis continued to decrease, though on a GAAP basis inclusive of non-cash based stock compensation, reported G&A was higher. On a GAAP basis, G&A expenses were \$551,745 for the three-month period ended September 30, 2010 compared with \$434,699 for the three months ended September 30, 2009, for an increase of \$117,046, resulting primarily from \$318,660 of professional fees paid in stock. Cash G&A, exclusive of stock-based compensation costs, was \$233,085 for the three-month period ended September 30, 2010 compared with \$434,699 for the three months ended September 30, 2009, for a decrease of \$201,614. Management has made a concerted effort to reduce cash corporate overhead through downsizing office space, reduction in corporate staff and other overhead expenses. Management expects cash G&A costs to now be under \$1 million per year going forward.

Net Loss from Operations was \$844,371 for the three months ended September 30, 2010 compared with \$1,027,283 for the three months ended September 30, 2009, resulting in a decreased loss of \$182,912. The decreased loss resulted from higher sales and margins. Exclusive of the \$318,660 of stock-based compensation in 2010, the net loss from operations would have been \$525,711, a decrease of \$501,572. Net loss from operations includes revenues, direct operating expenses, G&A expenses, and depreciation and amortization expenses.

Cash EBITDA from Operations was \$127,099 for the three months ended September 30, 2010 for the three months ended September 30, 2010, compared with a loss of \$452,595 for the three months ended September 30, 2009, resulting in increased earnings of \$579,694. The increased earnings resulted from higher sales and gross margin and lower G&A expenses. Cash EBITDA from Operations is calculated as Net Loss from Operations with depreciation of \$652,810 in 2010 and \$574,688 in 2009 and stock-based compensation of \$318,660 in 2010 and zero in 2009 added back.

Interest Expense remained consistent at \$358,231 for the three-month period ended September 30, 2010 compared with \$346,852 for the three-month period ended September 30, 2009, for an increase of \$11,379. The Company's term loan with PNC Credit bears interest at prime + 2.75%. Best continues to work toward further debt reductions through asset sales of discontinued assets.

Net Loss was \$1,897,257, or \$0.06, per common share after accrued preferred dividends for the three months ended September 30, 2010 compared with a net loss of \$5,688,276, or \$0.28, per common share for the three months ended September 30, 2009, for a decrease of \$3,791,019 or \$0.22 per share. This decrease was primarily due to a smaller loss on discontinued operations.

Nine Months Ended September 30, 2010 compared with the Nine Months Ended September 30, 2009

Revenues were \$4,839,711 for the nine-month period ended September 30, 2010 compared with revenues of \$3,572,240 for the nine-month period ended September 30, 2009. The increase of \$1,267,471 million was primarily the result of increasing activity in the drilling and reworking of natural gas wells in the Hugoton Basin and of our increasing market share.

Operating Expenses were \$3,582,808 for the nine-month period ended September 30, 2010 compared with \$3,278,806 for the nine-month period ended September 30, 2009, resulting in an increase of \$304,002. This increase was a result of the increase in business unit operating expenses consequent to increasing rig activity. Operating expenses includes direct costs of revenues, and business unit operating

expenses, but exclude depreciation and amortization. Considering just direct costs, Best's gross margin improved to 55% in 2010 from 40% in 2009.

General and Administrative Expenses on a GAAP and cash basis continued to decrease in the period. On a GAAP basis, G&A expenses were \$1,332,637 for the nine-month period ended September 30, 2010 compared with \$1,678,756 for the nine months ended September 30, 2009, for a decrease of \$346,119. The decrease in G&A costs resulted primary from Management's cost-cutting measures. Included in G&A was stock based compensation expense of \$698,660 and \$462,888 for the first nine months of 2010 and 2009. Cash G&A, exclusive of stock-based compensation costs, was \$633,977 for the nine-month period ended September 30, 2010 compared with \$1,215,868 for the nine-month period ended September 30, 2009, for a decrease of \$581,891. Management has made a concerted effort to reduce cash corporate overhead through downsizing office space, reduction in corporate staff and other overhead expenses. Management expects cash G&A costs to now be under \$1 million per year going forward.

Net Loss from Operations was \$1,997,457 for the nine-month period ended September 30, 2010 compared with \$3,109,384 for the nine-month period ended September 30, 2009, resulting in a decreased loss of \$1,111,927. The decreased loss resulted from higher sales. Net loss from operations includes revenues, direct operating expenses, G&A expenses, and depreciation and amortization expenses.

Cash EBITDA from Operations was \$622,926 for the nine months ended September 30, 2010 for the nine months ended September 30, 2010, compared with a loss of \$922,434 for the nine months ended September 30, 2009, resulting in increased earnings of \$1,545,360. The increased earnings resulted from higher sales and gross margin and lower G&A expenses. Cash EBITDA from Operations is calculated as Net Loss from Operations with depreciation of \$1,921,723 in 2010 and \$1,724,062 in 2009 and stock-based compensation of \$698,660 in 2010 and \$462,888 in 2009 added back.

Interest Expense was \$1,188,914 for the nine-month period ended September 30, 2010 compared with \$754,011 for the nine months ended September 30, 2009, for an increase of \$434,903. This increase was primarily a result of non-cash interest expenses, such as warrants issued to our bank and amortization related to convertible debt. The Company's term loan with PNC Credit bears interest at prime + 2.75%.

Net Loss was \$4,684,536, or \$0.16, per common share after accrued preferred dividends and deemed dividends for the nine-month period ended September 30, 2010 compared with a net loss of \$9,426,669, or \$0.45, per common share for the nine-month period ended September 30, 2009. The decrease of \$4,742,133 million or \$0.29 per share resulted primarily from a smaller loss on discontinued operations and higher revenues.

Liquidity and Capital Resources

Historical Cash Flows

The following table summarizes our cash flows for the nine months ended September 30, 2010 and 2009:

	<u>Nine Months Ended September 30,</u>	
	<u>2010</u>	<u>2009</u>
Net cash provided by (used in) operating activities	\$ (313,941)	\$ 401,658
Net cash used in investing activities:		
Capital expenditures, net	(336,497)	(326,556)
Cash provided by (used in) financing activities:		
Net borrowings on LOC	310,947	187,125
Principal payments on debt	(746,235)	(1,019,432)
Proceeds from issuance of stock	1,007,326	1,088,000
Payment of deferred financing costs	-	(643,693)
Increase in bank overdraft	<u>57,105</u>	<u>63,568</u>
Net increase (decrease) in cash and cash equivalents	<u>\$ (21,295)</u>	<u>\$ (249,330)</u>

Operating activities during the nine months ended September 30, 2010 used \$313,941 of cash compared to providing \$401,658 in the nine months ended September 30, 2009. The decrease in cash from operations resulted mainly from accounts receivable earned in 2008 but paid in early 2009, while in the first nine months of 2010, accounts receivable grew as a result of increased activity.

Financing activities contributed cash of \$629,143 for the nine months ended September 30, 2010 compared to using \$324,432 for the nine months ended September 30, 2009. The primary source of cash from financing activities in the first nine months of 2010 was the issuance of units of warrants and common stock.

We have no current commitment from our officers and directors or any of our stockholders to supplement our operations or provide us with financing in the future. If we are unable to increase revenues from operations, to raise additional capital from conventional sources and/or additional sales of stock in the future, and/or if we are unable to extend or repay our line of credit with PNC Bank, we may be forced to curtail or cease our operations. In the future, we may be required to seek additional capital by selling debt or equity securities. The sale of additional equity or debt securities, if accomplished, may result in dilution to our then stockholders. We provide no assurance that financing will be available in amounts or on terms acceptable to us, or at all.

Working Capital Deficit

At September 30, 2010, our current liabilities of \$25,159,832 exceeded our current assets of \$1,033,132 resulting in a working capital deficit of \$24,126,700. This compares to a working capital deficit of

\$6,572,937 million at December 31, 2009. The increase in the working capital deficit is primarily the result the reclassification of the majority of our loans payable to current as a result of the March 31, 2011 due date for the term loan. Current liabilities at September 30, 2010, include preferred stock dividends payable of \$1,169,719, current portion of loans payable of \$19,326,210, accounts payable of \$1,897,504 and a derivative liability of \$1,207,431. On November 11, 2010, we declared a dividend in full payment of the accrued preferred stock dividends.

Sources of Liquidity

Our sources of liquidity include our current cash and cash equivalents, availability under the revolving portion of the Amended Credit Agreement, and internally generated cash flows from operations. We continue to explore other sources of financing that are available to us including possible sales of stock or issuance of subordinated debt.

We had availability of \$14,490 under the Amended Credit Agreement as of September 30, 2010.

Off-Balance Sheet Arrangements

As of September 30, 2010, we had no transactions, agreements or other contractual arrangements with unconsolidated entities or financial partnerships, often referred to as special purpose entities, which generally are established for the purpose of facilitating off-balance sheet arrangements.

Contractual Obligations

Tabular Disclosure of Contractual Obligations

	Over the Next	
	Five Years	12 Months
Notes Payable	\$ 20,423,385	\$ 20,414,210
Operating Leases	173,700	84,400
Employment/Consultant Contracts	764,000	356,000
Total	<u>\$ 21,361,085</u>	<u>\$ 20,854,610</u>

Subject to the limitations set forth in the Amended Credit Agreement, our Series A Preferred Stock must be redeemed using not less than 25% of our net income after tax each year. For the nine months ended September 30, 2010, we did not have positive net income after tax and did not redeem any outstanding shares of Series A Preferred Stock.

Disclosure Regarding Forward-Looking Statements

We caution that this document contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical facts, included in or incorporated by reference into this Form 10-Q which address activities, events or developments which we expect, believe or anticipate will or may occur in the future are forward-looking statements. The words “believes,” “intends,” “expects,” “anticipates,” “projects,” “estimates,” “predicts,” “plans” and similar expressions, or the negative thereof, are also intended to identify forward-looking statements. In particular, statements, expressed or implied, concerning future operating results, the ability to increase utilization or redeploy rigs, or the ability to generate income or cash flows are by nature, forward-looking statements. These statements are based on certain assumptions and analyses made by management in

light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances. However, forward-looking statements are not guarantees of performance and no assurance can be given that these expectations will be achieved.

Important factors that could cause actual results to differ materially from the expectations reflected in the forward-looking statements include, but are not limited to any of the following: the timing and extent of changes in commodity prices for crude oil, natural gas and related products, interest rates, inflation, the availability of goods and services, operational risks, availability of capital resources, legislative or regulatory changes, political developments, and acts of war and terrorism. A more detailed discussion on risks relating to the oilfield services industry and to us is included in our Annual Report on Form 10-K for the year ended December 31, 2009.

In light of these risks, uncertainties and assumptions, we caution the reader that these forward-looking statements are subject to risks and uncertainties, many of which are beyond our control, which could cause actual events or results to differ materially from those expressed or implied by the statements. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements. We undertake no obligations to update or revise our forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

None.

ITEM 4. CONTROLS AND PROCEDURES.

(a) Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer (the "Certifying Officers") maintain a system of disclosure controls and procedures that is designed to provide reasonable assurance that information, which is required to be disclosed, is accumulated and communicated to management timely. Under the supervision and with the participation of management, the Certifying Officers carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures as of September 30, 2010 (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)), and within 45 days prior to the filing date of this report.

Based upon that evaluation, the Certifying Officers concluded that, as of the end of the period covered in this report, our disclosure controls and procedures were not effective to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the required time periods and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. In particular, we found control weaknesses in segregation of duties in the field and home offices. As recently acquired operations are assimilated, we intend to address these weaknesses by centrally locating payables, check writing, and implementing controls regarding segregation of duties related to cash management. We plan to have these controls in place by year end. In the interim, management has been reviewing all disbursements and cash account activity. We also found that we did not maintain

As of September 30, 2010, we did not maintain effective controls over the control environment. Specifically, we had not extended our written code of business conduct and ethics to include non-officers. This has resulted in inconsistent practices. Since these entity level programs have a pervasive effect across the organization, management has determined that these circumstances constitute a material weakness.

As of September 30, 2010, we did not maintain effective controls over financial statement disclosure. Specifically, controls were not designed and in place to ensure that all disclosures required were originally addressed in our financial statements. Accordingly, management has determined that this control deficiency constitutes a material weakness.

As of September 30, 2010, we did not maintain effective controls over equity transactions. Specifically, controls were not designed and in place to ensure that equity transactions were properly reflected. Accordingly, management has determined that this control deficiency constitutes a material weakness.

Our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Due to the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected.

To address the material weaknesses, we performed additional analysis and other post-closing procedures in an effort to ensure our consolidated financial statements included in this quarterly report have been prepared in accordance with generally accepted accounting principles. Accordingly, management believes that the financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

(b) Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended September 30, 2010, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

ITEM 1 - LEGAL PROCEEDINGS

We are from time to time subject to litigation arising in the normal course of business. As of the date of this Quarterly Report on Form 10-Q, there are no pending or threatened proceedings which are currently anticipated to have a material adverse effect on our business, financial condition or results of operations.

On or about April 7, 2010, the Company was served with a petition captioned *Larry W. Hargrave and American Rig Housing, Inc. v. Best Energy Services, Inc.* that was filed in the 234th Judicial District Court of Harris County, Texas (Cause Number 201021424). Mr. Hargrave is the former CEO of the Company. The lawsuit asserts the following breach of contract claims: (1) failure to issue and deliver to American Rig Housing, Inc. ("ARH") 1,465,625 shares of the Company's common stock as required under the acquisition agreement pursuant to which the Company purchased certain assets of ARH in February 2008,

(2) failure to issue 75,000 shares of the Company's common stock as required under a severance agreement entered into with Mr. Hargrave, the former CEO of the Company (the "Severance Agreement"), (3) failure to reimburse Mr. Hargrave for certain unspecified verified out-of-pocket expenses incurred in the performance of his duties as CEO of the Company, (4) failure to issue 600,000 shares of the Company's common stock, as deferred compensation, as required under the Severance Agreement, (5) failure to make the monthly cash payments due to Mr. Hargrave under the Severance Agreement, which consist of (i) \$15,000 per month for the first four months beginning in January 2009 and (ii) \$10,000 per months for the next forty-nine (49) months, (6) failure to make certain unspecified payments, including expense reimbursements, under a consulting agreement alleged to have been entered into in January 2009 and (7) failure to reimburse Mr. Hargrave for certain unspecified payments made by the plaintiffs to vendors of the Company. The relief requested by the plaintiffs includes actual damages, specific performance and costs and attorneys' fees. The Company plans to contest the lawsuit vigorously. As of September 30, 2010, the stock had not been issued in certificate form, but had been recorded. Further, the deferred compensation of \$535,000 has been accrued, which is equal to the amounts in the severance agreement less the \$15,000 payment that was made in January 2009.

On or about May 17, 2010, the Company was served with a petition captioned Linda J. Hargrave vs. Best Energy Services, Inc. that was filed in the 234th Judicial District Court of Harris County, Texas (Cause No. 2010-24463). Mrs. Hargrave contends that the Company has defaulted on lease payments in the total amount of \$64,000 for the property at 4092 US Highway 59 South, Cleveland, Texas 77327. Mrs. Hargrave additionally alleges that the Company had failed to pay the property taxes in the amount of \$5,792. Mrs. Hargrave obtained the property from her ex-husband, Larry Hargrave, through a divorce decree. The relief requested by the Plaintiff includes actual damages, pre-judgment interest, attorney's fees and costs of court. All taxes and rent have been accrued.

The Company plans to contest both of these lawsuits vigorously and file substantial counterclaims for breach of fiduciary duty, fraud and fraudulent inducement. Although the Company believes the plaintiffs' claims are meritless, there can be no assurance that the Company will prevail in this litigation, the consequences of which would be potentially substantial economic costs to the Company, substantial dilution through the issuance of additional shares of Common Stock to the plaintiffs, any of which would be a material adverse effect which could potentially cause the Company to declare bankruptcy and make the Units worthless.

ITEM 2 - UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Private Placements

From March 25 through March 31, 2010 the Company sold units of Company securities (the "March Units") at a price of \$24,000 per Unit (the "March Offering"), with each March Unit consisting of (i) 240,000 shares of Common Stock, (ii) five-year warrants to acquire 240,000 shares of Common Stock at an exercise price of \$0.10 per share ("March Subscription Warrants") and (iii), if investors in the Offering hold shares of the Company's Series A Preferred Stock, par value \$0.001 per share ("March Preferred Stock"), five-year warrants to acquire up to 240,000 additional shares of Common Stock at an exercise price of \$0.10 per share, depending on ownership of Preferred Stock ("March Participation Warrants"). The placement agent for the Offering (or its sub-agents) received the following compensation in connection with the Offering: (i) as a commission, an amount equal to seven percent (7%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share, plus (ii) as a management fee, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per

share, plus (iii) as a non-accountable expense allowance, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share. In addition, the Company is obligated to issue to the placement agent, or its sub-agents: (i) warrants to purchase up to 10% of the shares of Common Stock issued to investors in connection with the Offering and (ii) ten percent (10%) of the Subscription Warrants issued.

The Company received gross cash proceeds of \$1,204,630. The cash portion of the placement agent's fees and commissions in connection with the initial closing of the Offering totaled \$112,938. We also paid legal expenses of \$111,559 and escrow fees of \$7,500.

From August 16 through September 22, 2010 the Company sold units of Company securities (the "August Units") at a price of \$25,000 per August Unit (the "August Offering"), with each August Unit consisting of (i) 250,000 shares of Common Stock, (ii) five-year warrants to acquire 240,000 shares of Common Stock at an exercise price of \$0.10 per share ("August Subscription Warrants") and (iii), if investors in the Offering hold shares of the Company's Series A Preferred Stock, par value \$0.001 per share ("Preferred Stock"), five-year warrants to acquire up to 250,000 additional shares of Common Stock at an exercise price of \$0.10 per share, depending on ownership of Preferred Stock ("August Participation Warrants"). The placement agent for the Offering (or its sub-agents) received the following compensation in connection with the Offering: (i) as a commission, an amount equal to seven percent (7%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share, plus (ii) as a management fee, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share, plus (iii) as a non-accountable expense allowance, an amount equal to three percent (3%) of the funds raised in the Offering through such placement agent (or sub-agent), such amount to be paid in cash and/or shares of Common Stock at a price of \$0.10 per share. In addition, the Company is obligated to issue to the placement agent, or its sub-agents: (i) warrants to purchase up to 10% of the shares of Common Stock issued to investors in connection with the Offering and (ii) ten percent (10%) of the Subscription Warrants issued.

The Company received gross cash proceeds of \$105,000. After September 30, 2010 we received additional proceeds of \$223,500, for a total of \$328,500. The cash portion of the placement agent's fees and commissions in connection with the closings of the Offering totaled \$29,905. We also paid legal expenses of \$40,000, marketing costs of \$18,400 and escrow fees of \$7,500.

Net proceeds from March Units and August Units for the nine months ended September 30, 2010 were \$1,007,326.

ITEM 3 - DEFAULTS UPON SENIOR SECURITIES

As of August 13, 2010, we are in default on certain non-financial covenants of our Credit Agreement and our working with our bank to remedy those defaults. The defaults are as follows:

1. An Event of Default as a result of the aggregate balance of Revolving Advances outstanding exceeding the Formula Amount less, the aggregate Maximum Undrawn Amount of all issued and outstanding Letters of Credit, in violation of Section 2.5 of the Loan Agreement
2. Events of Default as a result of the Borrowers' failure to deliver to Agent annual financial statements pursuant to Section 9.7 of the Loan Agreement for the year ended December 31, 2009 (x) by April 15,

2010 and (y) accompanied by an unqualified report of the Accountants in either case, as required by said Section.

3. An Event of Default as a result of the Borrowers' failure to pay certain taxes as required pursuant to Section 4.13 of the Loan Agreement (the "Tax Default").

ITEM 4 – (Removed and Reserved)

ITEM 5 - OTHER INFORMATION

On September 13, 2010, the Board of Directors terminated Eugene Allen's contract as President and Chief Operating Officer and offered him three months' pay as severance. At the same meeting, JR Flores was appointed the new President and COO.

ITEM 6 – EXHIBITS

The following exhibits are filed as part of this quarterly report on Form 10-Q:

- 31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 31.2 Certification of Interim Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 32.1 Certification of Chief Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
- 32.1 Certification of Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

CERTIFICATIONS

I, Mark Harrington, certify that:

1. I have reviewed this Report on Form 10-Q of Best Energy Services, Inc. (the “Company”) for the period ending September 30, 2010;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this report;
4. I am responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the Company’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the Company’s internal control over financial reporting that occurred during the Company’s most recent fiscal quarter (the Company’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.
5. I have disclosed, based on my most recent evaluation of internal control over financial reporting, to the Company’s auditors and the audit committee of the Company’s Board of Directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Company’s ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Company’s internal control over financial reporting.

 - (c) evaluated the effectiveness of the Company’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the Company’s internal control over financial reporting that occurred during the Company’s most recent fiscal quarter (the Company’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.
5. I have disclosed, based on my most recent evaluation of internal control over financial reporting, to the Company’s auditors and the audit committee of the Company’s Board of Directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Company’s ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Company’s internal control over financial reporting.

**CERTIFICATION PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002
(18 U.S.C. 1350)**

In connection with the Report of Best Energy Services, Inc. (the “Company”) on Form 10-Q for the quarter ended September 30, 2010, as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, Mark Harrington, Chief Executive Officer of the Company, certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. 1350), that to my knowledge:

1. the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
