NOTES TO INTERIM AND UNAUDITED FINANCIAL STATEMENTS  
September 30, 2008

**NOTE 1 – ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES**

Nature of Operations

CHINA FUHUA NEW MATERIAL HOLDINGS INC. , a development stage company (the “Company”), was incorporated in the State of Delaware on January 8, 2008. The Company is 100% owned by Ming Xu. The Company is looking to acquire an existing company or acquire the technology to begin operations.

As a blank check company, the Company’s business is to pursue a business combination through acquisition, or merger with, an existing company. No assurances can be given that the Company will be successful in locating or negotiating with any target company.

Since inception, the Company has been engaged in organizational efforts.

General

The accompanying unaudited financial statements include all adjustments of a normal and recurring nature, which, in the opinion of Company’s management, are necessary to present fairly the Company’s financial position as of September 30, 2008, the results of its operations for the three months ended September 30, 2008, and from the date of inception (January 8, 2008) through September 30, 2008, and cash flows for the three months ended September 30, 2008 from the date of inception (January 8, 2008) through September 30, 2008.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to the rules and regulations of the Securities and Exchange Commission.

The results of operations and cash flows for the period ended September 30, 2008 are not necessarily indicative of the results to be expected for the full year’s operation.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The accompanying financial statements are prepared in accordance with accounting principles generally accepted in the United States. Significant accounting policies follow:

Loss per Common Share: Basic loss per share is calculated using the weighted-average number of common shares outstanding during each period. Diluted loss per share includes potentially dilutive securities such as outstanding options and warrants, using various methods such as the treasury stock or modified treasury stock method in the determination of dilutive shares outstanding during each period. The Company does not have any potentially dilutive instruments.

New Accounting Pronouncements:

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying financial statements.

**NOTE 3 - GOING CONCERN**

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates the recoverability of assets and the satisfaction of liabilities in the normal course of business.

The Company has had no revenue and has incurred accumulated net losses from January 8, 2008 (inception) through the period ended September 30, 2008 of \$5,000. In addition, the Company's development activities since inception have been financially sustained through equity financing.

The ability of the Company to continue as a going concern is dependent upon its ability to find a suitable acquisition/merger candidate, raise additional capital from the sale of common stock, and receive additional paid-in capital from its shareholder and, ultimately, the achievement of significant operating revenues. The accompanying financial statements do not include any adjustments that might be required should the Company be unable to recover the value of its assets or satisfy its liabilities.

**NOTE 4 - SHAREHOLDER'S EQUITY**

Holders of shares of common stock shall be entitled to cast one vote for each common share held at all stockholder's meetings for all purposes, including the election of directors. The common stock does not have cumulative voting rights.

The preferred stock of the Company shall be issued by the Board of Directors of the Company in one or more classes or one or more series within any class and such classes or series shall have such voting powers, full or limited, or no voting powers, and such designations, preferences, limitations or restrictions as the Board of Directors of the Company may determine, from time to time.

No holder of shares of stock of any class shall be entitled as a matter of right to subscribe for or purchase or receive any part of any new or additional issue of shares of stock of any class, or of securities convertible into shares of stock of any class, whether now hereafter authorized or whether issued for money, for consideration other than money, or by way of dividend.

**Item 2. Management's Discussion and Analysis or Plan of Operation.**

Plan of Operation

The Company will attempt to locate and negotiate with a business entity for the combination of that target company with the Company. The combination will normally take the form of a merger, stock-for-stock exchange or stock-for-assets exchange (the "business combination"). In most instances the target company will wish to structure the business combination to be within the definition of a tax-free reorganization under Section 351 or Section 368 of the Internal Revenue Code of 1986, as amended. No assurances can be given that the Company will be successful in locating or negotiating with any target company.

The Company has not restricted its search for any specific kind of businesses, and it may acquire a business which is in its preliminary or development stage, which is already in operation, or in essentially any stage of its business life. It is impossible to predict the status of any business in which the Company may become engaged, in that such business may need to seek additional capital, may desire to have its shares publicly traded, or may seek other perceived advantages which the Company may offer.

In implementing a structure for a particular business acquisition, the Company may become a party to a merger, consolidation, reorganization, joint venture, or licensing agreement with another corporation or entity.

It is anticipated that any securities issued in any such business combination would be issued in reliance upon exemption from registration under applicable federal and state securities laws. In some circumstances, however, as a negotiated element of its transaction, the Company may agree to register all or a part of such securities immediately after the transaction is consummated or at specified times thereafter. If such registration occurs, it will be undertaken by the surviving entity after the Company has entered into an agreement for a business combination or has consummated a business combination. The issuance of additional securities and their potential sale into any trading market which may develop in the Company's securities may depress the market value of the Company's securities in the future if such a market develops, of which there is no assurance. However, if the Company cannot effect a non-cash acquisition, the Company may have to raise funds from a private offering of its securities under Rule 506 of Regulation D. There is no assurance the Company would obtain any such equity funding.

The Company will participate in a business combination only after the negotiation and execution of appropriate agreements. Negotiations with a target company will likely focus on the percentage of the Company which the target company shareholders would acquire in exchange for their shareholdings.

---

Although the terms of such agreements cannot be predicted, generally such agreements will require certain representations and warranties of the parties thereto, will specify certain events of default, will detail the terms of closing and the conditions which must be satisfied by the parties prior to and after such closing and will include miscellaneous other terms. Any merger or acquisition effected by the Company can be expected to have a significant dilutive effect on the percentage of shares held by the Company's shareholders at such time.

#### Results of Operation

The Company has not conducted any active operations since inception, except for its efforts to locate suitable acquisition candidates. No revenue has been generated by the Company from January 8, 2008 (inception) to September 30, 2008. It is unlikely the Company will have any revenues unless it is able to effect an acquisition or merger with an operating company, of which there can be no assurance.

Expenses incurred since inception are primarily due to legal, accounting and other professional service fees.

#### Liquidity and Capital Resources

At September 30, 2008, the Company had no capital resources and will rely upon the issuance of common stock and additional capital contributions from shareholders to fund administrative expenses pending acquisition of an operating company.

Management anticipates seeking out a target company through solicitation. Such solicitation may include newspaper or magazine advertisements, mailings and other distributions to law firms, accounting firms, investment bankers, financial advisors and similar persons, the use of one or more World Wide Web sites and similar methods. No estimate can be made as to the number of persons who will be contacted or solicited. Management may engage in such solicitation directly or may employ one or more other entities to conduct or assist in such solicitation. Management and its affiliates will pay referral fees to consultants and others who refer target businesses for mergers into public companies in which management and its affiliates have an interest. Payments are made if a business combination occurs, and may consist of cash or a portion of the stock in the Company retained by management and its affiliates, or both.

The Company and/or shareholders will supervise the search for target companies as potential candidates for a business combination. The Company and/or shareholders may pay as their own expenses any costs incurred in supervising the search for a target company. The Company and/or shareholders may enter into agreements with other consultants to assist in locating a target company and may share stock received by it or cash resulting from the sale of its securities with such other consultants.

#### Off-balance sheet arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

---

**Item 3. Controls and Procedures.**

The management of the Company, including the principal executive and financial officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e) and 15d-15(e) as of September 30, 2008. Based on that evaluation, the principal executive and financial officer concluded that as of September 30, 2008, our disclosure controls and procedures were effective at the reasonable assurance level to ensure (i) that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) that information required to be disclosed in reports that we file or submit under the Exchange Act is accumulated and communicated to our management including our chief executive and financial officer, to allow timely decisions regarding required disclosure.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended September 30, 2008 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
