#### *(k) Fair Value Hierarchy*

FASB ASC 820 defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified by FASB ASC 820, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the assets or liability either directly or indirectly.

Level 3 - Inputs are unobservable for the assets or liability.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, the liquidity of markets, and other characteristics particular to the security. To the extent the valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining the fair value is greatest for instruments categorized in level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety. For further discussion of fair value, see "Note 8 Fair Value"

### **3 Net Capital Requirements**

The Company is subject to the SEC Uniform Net Capital Rule (SEC Rule 15c3-1), which requires the maintenance of minimum net capital and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1 (and the rule of the "applicable" exchange also provides that equity capital may not be withdrawn or cash dividends paid if the resulting net capital ratio would exceed 10 to 1). At March 31, 2019, the Company's net capital and required net capital were \$74,156 and \$50,000, respectively, resulting in a net capital excess of \$24,156. The Company's net capital ratio was 0.0766 to 1.

### 4 Clearing Agreement with Off Balance Sheet Risk

To facilitate securities transactions on behalf of its customers, the Company enters into agreements with other broker/dealers ("Clearing Broker/Dealers") whereby the Company forwards (introduces) securities transactions to the Clearing Broker/Dealers on a fully disclosed basis. The processing, and if applicable, any financing pertaining to any introduced transactions, are performed by the Clearing Broker/Dealers.

The Company may be held responsible for any losses arising when the customers introduced by the Company to a Clearing Broker/Dealer fail to meet their contractual commitments pertaining to the purchase, sale and possible financing of securities transactions. The Company may therefore be exposed to off-balance-sheet risk in the event the customer is unable to fulfill its contracted obligations and it is necessary for the Clearing Broker/Dealer to purchase or sell the securities at a loss. The Company's exposure to risk would consist of the amount of loss realized and any additional expenses incurred pertaining to the transaction or other customer activity.

During the fiscal year ended March 31, 2019, the Company was required, according to an agreement to maintain a \$25,000 deposit with a Clearing Broker/Dealer of which \$25,000 had been made to assure the Company's performance under this agreement. The minimum clearing charges will be \$1,500 per month.

### 5 Credit Risk and Concentrations

The Company is engaged in various trading and brokerage activities in which the counter-parties primarily include broker/dealers, banks, municipalities, other financial institutions and the Company's own customers. In the event the counter-parties do not fulfill their obligations, the Company may be exposed to credit risk. The risk of default depends on the creditworthiness of the counter party or issuer of the instrument. It is the Company's policy to review, as necessary, the credit standing of each counter party.

The Company maintains its cash balance at one financial institution. The Federal Deposit Insurance Corporation insures the Company's bank account up to \$250,000. The Company has not experienced any losses on this account and believes it is not subject to any significant credit risk.

### 6 Liabilities Subordinated to Claims of General Creditors

In March 2010 the Company entered into two separate subordinated loan agreements in the amount of \$120,000. The notes are dated March 10, 2010 and March 30, 2010 and automatically roll over after their maturities dates, until terminated. The subordinated lenders are shareholders of the Company.

In addition, to the extent that such borrowings are required for the Company's continued compliance with minimum net capital requirements, they may not be repaid.

### **9 Commitments and Contingencies**

Pursuant to Securities and Exchange Commission Rule 15c3-1(e)(2) the Company may not authorize distributions to its stockholders if such distributions cause the Company's net capital to fall below 120% of the Company's minimum net capital requirement. ## **Notes to Financial Statements**

**Year Ended March 31, 2019**

### **12 Accounting Developments**

Adopted in 2018

In May 2017, the FASB issued ASU No. 2017-09, "Receivables—Compensation—Stock Compensation" (Subtopic 718): Scope of Modification Accounting, which amends the accounting for modifications of share-based payment awards. The amendments require that modification accounting be applied when a change to the terms or conditions of an award is substantive. The Company adopted the standard as of its mandatory effective date on January 1, 2018 and adoption did not have a material impact on the Company's consolidated statement of financial condition.

### **13 Related Party Transactions - Restated**

During the year ended March 31, 2019, the Company compensated two shareholders with an aggregate of 500 shares of common stock in lieu of cash compensation.

The Company recognizes share based compensation expense for stock awards granted in accordance with ASC Topic 718, stock compensation. Fair value is determined at the date of grant and is not re-measured unless its terms are modified such that the fair value immediately after modification exceeds the fair value immediately prior to modification. Management has determined, based on contemporaneous transactions at \$1,000 per share, that the fair value of the shares granted was approximately \$500,000 for the year ended March 31, 2019. No shares are expected to be repurchased in the following annual period in connection with this equity compensation. This share based compensation is not reflected in the accompanying financial statements in accordance with ASC Topic 718.
