

Annual Report

Cover Page

Name of issuer:

LAWRENCEVILLE PLASMA PHYSICS, INC.

Legal status of issuer:

Form: Corporation
Jurisdiction of Incorporation/Organization: NJ
Date of organization: 5/19/2003

Physical address of issuer:

128 Lincoln Boulevard
Middlesex NJ 08846

Website of issuer:

<https://lppfusion.com>

Name of intermediary through which the offering will be conducted:

Wefunder Portal LLC

CIK number of intermediary:

0001670254

SEC file number of intermediary:

007-00033

CRD number, if applicable, of intermediary:

283503

Current number of employees:

4

	Most recent fiscal year-end:	Prior fiscal year-end:
Total Assets:	\$624,019.00	\$420,385.00
Cash & Cash Equivalents:	\$246,004.00	\$59,323.00
Accounts Receivable:	\$0.00	\$0.00
Short-term Debt:	\$247,480.00	\$104,425.00
Long-term Debt:	\$0.00	\$0.00
Revenues/Sales:	\$74,384.00	\$229,983.00
Cost of Goods Sold:	\$0.00	\$0.00
Taxes Paid:	\$128.00	\$500.00
Net Income:	(\$737,056.00)	(\$586,228.00)

Select the jurisdictions in which the issuer intends to offer the securities:

AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VT, VA, WA, WV, WI, WY, BS, GU, PR, VI, IV

Offering Statement

Respond to each question in each paragraph of this part. Set forth each question and any notes, but not any instructions thereto, in their entirety. If disclosure in response to any question is responsive to one or more other questions, it is not necessary to repeat the disclosure. If a question or series of questions is inapplicable or the response is available elsewhere in the Form, either state that it is inapplicable, include a cross-reference to the responsive disclosure, or omit the question or series of questions.

Be very careful and precise in answering all questions. Give full and complete answers so that they are not misleading under the circumstances involved. Do not discuss any future performance or other anticipated event unless you have a reasonable basis to believe that it will actually occur within the foreseeable future. If any answer requiring significant information is materially inaccurate, incomplete or misleading the Company, its management and principal shareholders may be liable to investors based on that information.

THE COMPANY

1. Name of issuer:

LAWRENCEVILLE PLASMA PHYSICS, INC.

3. Has the issuer or any of its predecessors previously failed to comply with the ongoing reporting requirements of Rule 202 of Regulation Crowdfunding?

☐ Yes ☒ No

DIRECTORS OF THE COMPANY

4. Provide the following information about each director (and any persons occupying a similar status or performing a similar function) of the issuer.

Director	Principal Occupation	Main Employer	Year Joined as Director
Eric J. Lerner	Physicist	LPPFusion	2003

For three years of business experience, refer to [Appendix D: Director & Officer Work History](#).

OFFICERS OF THE COMPANY

5. Provide the following information about each officer (and any persons occupying a similar status or performing a similar function) of the issuer.

Officer	Positions Held	Year Joined
Rudolph Fritsch	Secretary	2015
Rudolph Fritsch	Treasurer	2015
Eric J. Lerner	President	2003
Eric J. Lerner	Chief Scientist	2003
Ivana Karamitsos	Chief Information Officer	2010
Ivana Karamitsos	Communications Director	2010

For three years of business experience, refer to [Appendix D: Director & Officer Work History](#).

INSTRUCTION TO QUESTION 5: For purposes of this Question 5, the term officer means a president, vice president, secretary, treasurer or principal financial officer, controller or principal accounting officer, and any person that routinely performing similar functions.

PRINCIPAL SECURITY HOLDERS

6. Provide the name and ownership level of each person, as of the most recent practicable date, who is the beneficial owner of 20 percent or more of the issuer's outstanding voting equity securities, calculated on the basis of voting power.

Name of Holder	No. and Class of Securities Now Held	% of Voting Power Prior to Offering
Eric Lerner	140020.0 Class B and Class A Common	100.0

INSTRUCTION TO QUESTION 6: The above information must be provided as of a date that is no more than 120 days prior to the date of filing of this offering statement.

To calculate total voting power, include all securities for which the person directly or indirectly has or shares the voting power, which includes the power to vote or to direct the voting of such securities. If the person has the right to acquire voting power of such securities within 60 days, including through the exercise of any option, warrant or right, the conversion of a security, or other arrangement, or if securities are held by a member of the family, through corporations or partnerships, or otherwise in a manner that would allow a person to direct or control the voting of the securities (or share in such direction or control – as, for example, a co-trustee) they should be

(included as being "beneficially owned." You should include an explanation of these circumstances in a footnote to the "Number of and Class of Securities Now Held." To calculate outstanding voting equity securities, assume all outstanding options are exercised and all outstanding convertible securities converted.

BUSINESS AND ANTICIPATED BUSINESS PLAN

7. Describe in detail the business of the issuer and the anticipated business plan of the issuer.

For a description of our business and our business plan, please refer to the attached **Appendix A, Business Description & Plan**.

INSTRUCTION TO QUESTION 7: Wefunder will provide your company's Wefunder profile as an appendix (Appendix A) to the Form C in PDF format. The submission will include all Q&A items and "read more" links in an unredacted format. All videos will be transcribed.

This means that any information provided in your Wefunder profile will be provided to the SEC in response to this question. As a result, your company will be potentially liable for misstatements and omissions in your profile under the Securities Act of 1933, which requires you to provide material information related to your business and anticipated business plan. Please review your Wefunder profile carefully to ensure it provides all material information, is not false or misleading, and does not omit any information that would cause the information included to be false or misleading.

RISK FACTORS

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

8. Discuss the material factors that make an investment in the issuer speculative or risky:

The Company plans on expanding its business in further research stages and eventually through the introduction of commercialization and marketing campaign. Any expansion of operations the Company may undertake will entail risks. Such actions may involve specific operational activities, which may negatively impact the profitability of the Company. Consequently, shareholders must assume the risk that: (i) such expansion may ultimately involve expenditures of funds beyond the resources available to the Company at that time, and (ii) management of such expanded operations may divert Management's attention and resources away from its existing operations, all of which factors may have a material adverse effect on the Company's present and prospective business activities.

While we believe we have a good chance of success, net power from fusion has not yet been achieved by anyone, and it's entirely possible that unexpected problems will arise. We won't know for sure until the experiments are complete. It's possible that the plasma won't behave the way we expect. There may also be engineering difficulties which delay the tests.

Even if we achieve net energy production in a laboratory device, we may not be able to overcome the engineering challenges to produce a working prototype generator. Heat removal is a significant engineering challenge and while this now appears possible within existing technology, it is near the limit of that technology. The x-ray collection device has never been built and unexpected difficulties may arise with that as well.

If a prototype generator is achieved, commercialization will be a remaining hurdle. Significant commercial interests in existing energy sources may be able to delay such commercialization. Many other competitors may well take a large share of the market for our devices, in regions not covered by our patents, by challenging the patents, or by ignoring them.

The Company is still in the R&D phase and has no profits to date. It has been financed primarily by investment, except for \$962k in crowd-funding contributions. Losses to date have been a significant fraction of total investment, and have been over \$5 million. Such losses are expected to continue until licenses in the Company's technology are sold, which is projected to occur no sooner than 2021. Delays in the sale of such licenses could lead to continued losses.

The Company has significant competition in the existing energy industry, and some of these competitors have significant resource bases with which to compete. In the particular field of fusion energy, other proposed fusion devices are in various phases of development, although no project has demonstrated net power generation yet. Primary competitors include EMC2 and Tri Alpha Energy.

In the early stages of development, the Company's business will be significantly dependent on the Company's management and scientific team. The Company's success will be mainly dependent upon Eric J. Lerner, and his loss could have a material adverse effect on the Company.

Inadequacy of Funds

If we are able to raise the full amount we are seeking to raise in this offering, we believe that such proceeds will capitalize and sustain us sufficiently to allow for the implementation of our business plans. If, however, we are unable to raise the full amount we are seeking, or if certain assumptions made by management are incorrect, we may have inadequate funds to fully develop our business and may need to raise additional capital through equity or debt financings, which may not be available on favorable terms, or at all.

Terms of Subsequent Financings

We may need to engage in other common equity, debt, or preferred stock financing in the future. As a result of these additional offerings, your rights and the value of your investment in the Class B Common Stock could be reduced. Interest on debt securities could increase costs and negatively impact operating results. Preferred stock could be issued in series from time to time with such designations, rights, preferences, and limitations as needed to raise capital. The terms of preferred stock could be more advantageous to those investors than to the holders of Class B Common Stock. In addition, if we need to raise additional equity capital from the sale of Class B Common Stock, institutional or other investors may negotiate terms at least as, and possibly more, favorable than the terms of your investment, including, a lower purchase price.

Our business strategy depends on the widespread adoption of our technology

We do not have an existing customer base, and do not anticipate the development of a customer base until we have proven our technology. While we believe we can develop a customer base, our inability to do so could have a material adverse effect on us. Although we believe that our products may eventually offer advantages over competitive companies and products, no assurance can be given that our products will attain a degree of market acceptance on a sustained basis or that we will generate revenues sufficient for sustained profitable operations.

We Face Intense Competition

We compete with major and widely used and existing power generation facilities and devices, public utilities and alternative energy companies. Our primary competitors in the alternative energy space include EMC2 and Tri Alpha Energy. In the specific field of fusion energy, other proposed fusion devices are in various phases of development, although no project has demonstrated net energy production yet. Most of our current and potential competitors have greater market recognition and customer bases, longer operating histories and substantially greater financial, technical, marketing, distribution, purchasing, manufacturing, personnel and other resources than we do. If we fail to compete successfully, our business would suffer and we may lose or be unable to gain market share.

Our Competitive Position Depends on Maintaining Intellectual Property Protection

Our ability to compete and to achieve and maintain profitability depends in part on our ability to protect our proprietary discoveries and technologies. We rely on a combination of patents and trade secret laws to protect our intellectual property rights. We also rely upon unpatented know-how and continuing technological innovation to develop and maintain our competitive position. Our patents might be challenged by third parties as being invalid or unenforceable, or third parties may independently develop similar or competing technology that avoids our patents. We cannot be certain that the steps we take will prevent the misappropriation and use of our intellectual property, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States.

Unanticipated Obstacles to Execution of Our Business Plan

Our business plans may change significantly. Many of our potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that our chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of our principals and advisors. Management reserves the right to make significant modifications to our stated strategies depending on future events.

Developing New Products and Technologies Entails Significant Risks

We are currently in the research and development stage. Delays or cost overruns in the development of our technology and failure of the product to meet our performance estimates may be caused by, among other things, unanticipated technological hurdles, difficulties in manufacturing, changes to design and regulatory hurdles. Any of these events could materially and adversely affect our operating performance and results of operations.

If We do not Retain Key Personnel, Our Business Will Suffer

The success of our business is heavily dependent on the leadership of our key management personnel, specifically Eric J. Lerner and Ivy Karamitsos. If any of these people were to leave us, it would be difficult to replace them, and our business would be harmed. However, Lerner has a contract with our company prohibiting him from contributing fusion expertise to another company. We will

also need to retain additional highly-skilled individuals if we are to effectively grow. Our future success depends on our continuing ability to identify, hire, develop, motivate and retain highly skilled personnel for all areas of our organization. Competition in our industry for qualified employees is intense, and we anticipate that certain of our competitors may directly target our employees and officers, all of whom are at-will employees and not parties to long-term employment agreements with us. Our continued ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing employees and officers.

Risks of Borrowing

We may have to seek loans from financial institutions. Typical loan agreements might contain restrictive covenants which may impair our operating flexibility. A default under any loan agreement could result in a charging order that would have a material adverse effect on our business, results of operations or financial condition.

We May Face Intellectual Property Infringement Claims

If we receive notice of claims of infringement, misappropriation or misuse of other parties' proprietary rights, some of these claims could lead to litigation. We cannot assure you that we will prevail in these actions. We may also initiate claims to defend our intellectual property. Intellectual property litigation, regardless of outcome, is expensive and time-consuming, could divert management's attention from our business and have a material negative effect on our business, operating results or financial condition. If there is a successful claim of infringement against us, we may be required to pay substantial damages (including treble damages if we were to be found to have willfully infringed a third party's patent) to the party claiming infringement, develop non-infringing technology, stop selling our products or using technology that contains the allegedly infringing intellectual property or enter into royalty or license agreements that may not be available on acceptable or commercially practical terms, if at all. Our failure to develop non-infringing technologies or license the proprietary rights on a timely basis could harm our business. Parties making infringement claims on our patents may be able to obtain an injunction that would prevent us from selling our products or using technology that contains the allegedly infringing intellectual property, which could harm our business.

Limited Transferability and Liquidity

Each investor agrees that it will acquire our Class B Common Stock for investment purposes only and not with a view towards distribution. Certain conditions imposed by the Securities Act must be satisfied prior to any sale, transfer, conversion or other disposition of our Class B Common Stock. In addition, each investor shall sign a Shareholder Agreement (the "Shareholder Agreement"), which imposes certain additional restrictions on the transfer of the Class B Common Stock. Under the Shareholder Agreement, until such time as we become a public company, no Shares may be sold or transferred without first offering us and all of the other holders of Class B Common Stock the right to purchase such Shares. Excluded from this provision are transfers resulting from the death of a shareholder or a transfer to an affiliate of the shareholder. No public market exists for our Class B Common Stock and no market is expected to develop.

We May Experience Significant Delays or Other Complications

We may experience significant delays or other complications in bringing to market our systems. Any significant delays or other complications in the development, manufacture and/or launch, including, but not limited to, complications associated with launching our production or supply chain, or regulatory approvals, could materially damage our brand, business, prospects, financial condition and operating results.

Management Discretion as to Use of Proceeds

Our success will be substantially dependent upon the discretion and judgment of our management team with respect to the application and allocation of the proceeds of this Offering. The use of proceeds described below is an estimate based on our current business plan. We, however, may find it necessary or advisable to re-allocate portions of the net proceeds reserved for one category to another, and we will have broad discretion in doing so.

Control by Majority Stockholder

Even if this offering is fully subscribed, Eric Lerner, who serves as an officer and our sole director, owns 100% of our Class A Voting Common Stock, and therefore maintains control. The Class B Common Stock does not have any voting rights. Therefore, investors will not have the ability to control our management. Notwithstanding the foregoing, Mr. Lerner and certain holders of our Class B Common Stock are parties to the Shareholder Agreement, pursuant to which the approval of certain holders of Class B Common Stock is required by the Company, to increase executive compensation beyond certain levels, increase the authorized number of shares, create new classes of shares, or enter into transactions with affiliates that have a value in excess of \$5,000.

Offering Price

The price of the Shares has been arbitrarily established by us, considering such matters as the state of our business development and the general condition of the industry in which we operate. The Offering price bears little relationship to the assets, net worth, or any other objective criteria of value applicable to us.

Dilution Risks

You should understand the potential for dilution. Each investor's stake in us, could be diluted due to our issuing additional shares. In other words, if we issue more shares, the percentage of the Company that you own will decrease, even though our value may increase. You will own a smaller piece of a larger company. This increase in the number of shares outstanding could result from a stock offering (such as an initial public offering, a crowdfunding round, a venture capital round or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g., convertible notes, preferred shares or warrants) into stock.

If we decide to issue more shares, you could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (although this typically occurs only if we offer dividends, and most development and early stage companies are unlikely to offer dividends, preferring to invest any earnings into the Company).

The type of dilution that hurts early-stage investors mostly occurs when the company sells more shares in a "down round," meaning at a lower valuation than in earlier offerings.

If you are making an investment expecting to own a certain percentage of the Company or expecting each share to hold a certain amount of value, it is important to realize how the value of those shares can decrease by actions taken by the Company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.

Rudolph Fritsch is a part-time officer. As such, it is likely that the company will not make the same progress as it would if that were not the case.

INSTRUCTION TO QUESTION 8: Avoid generalized statements and include only those factors that are unique to the issuer. Discussion should be tailored to the issuer's business and the offering and should not repeat the factors addressed in the legends set forth above. No specific number of risk factors is required to be identified.

Ownership and Capital Structure

DESCRIPTION OF ISSUER'S SECURITIES

17. What other securities or classes of securities of the issuer are outstanding? Describe the material terms of any other outstanding securities or classes of securities of the issuer.

Class of Security	Securities (or Amount) Authorized	Securities (or Amount) Outstanding	Voting Rights
Class A Common Stock	20	20	Yes <input type="button" value="v"/>
Class B Common Stock	400,000	318,907	No <input type="button" value="v"/>

**Securities Reserved for
Issuance upon Exercise or Conversion**

Warrants: _____

Options: 7,514

24. Describe the material terms of any indebtedness of the issuer:

Lender	Wells Fargo
Issue date	06/14/20
Amount	\$73,945.00
Outstanding principal plus interest	\$73,945.00 as of 01/25/21
Interest rate	1.0% per annum
Current with payments	Yes

Paycheck Protection Program Loan: The Company expects the full amount of the loan to be forgiven.

None

INSTRUCTION TO QUESTION 24: name the creditor, amount owed, interest rate, maturity date, and any other material terms.

25. What other exempt offerings has the issuer conducted within the past three years?

Offering Date	Exemption	Security Type	Amount Sold	Use of Proceeds
4/2018	Regulation Crowdfunding	Priced Round	\$963,250	General operations
9/2018	Regulation D, Rule 506(c)	Common stock	\$339,706	General operations
12/2020	Regulation D, Rule 506(c)	Common stock	\$591,125	General operations

26. Was or is the issuer or any entities controlled by or under common control with the issuer a party to any transaction since the beginning of the issuer's last fiscal year, or any currently proposed transaction, where the amount involved exceeds five percent of the aggregate amount of capital raised by the issuer in reliance on Section 4(a)(5) of the Securities Act during the preceding 12-month period, including the amount the issuer seeks to raise in the current offering, in which any of the following persons had or is to have a direct or indirect material interest:

1. any director or officer of the issuer;
 2. any person who is, as of the most recent practicable date, the beneficial owner of 20 percent or more of the issuer's outstanding voting equity securities, calculated on the basis of voting power;
 3. if the issuer was incorporated or organized within the past three years, any promoter of the issuer;
 4. or (4) any immediate family member of any of the foregoing persons.
- ☐ Yes
☒ No

INSTRUCTIONS TO QUESTION 26: The term transaction includes, but is not limited to, any financial transaction, arrangement or relationship (including any indebtedness or guarantee of indebtedness) or any series of similar transactions, arrangements or relationships.

Beneficial ownership for purposes of paragraph (4) shall be determined as of a date that is no more than 120 days prior to the date of filing of this offering statement and using the same calculation described in Question 8 of this Question and Answer format.

The term "member of the family" includes any child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law of the person, and includes adoptive relationships. The term "spousal equivalent" means a cohabitant occupying a relationship generally equivalent to that of a spouse.

Compute the amount of a related party's interest in any transaction without regard to the amount of the profit or loss involved in the transaction. Where it is not practicable to state the approximate amount of the interest, disclose the approximate amount involved in the transaction.

FINANCIAL CONDITION OF THE ISSUER

27. Does the issuer have an operating history?

☒ Yes
☐ No

28. Describe the financial condition of the issuer, including, to the extent material, liquidity, capital resources and historical results of operations.

Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with our financial statements and the related notes and other financial information included elsewhere in this offering. Some of the information contained in this discussion and analysis, including information regarding the strategy and plans for our business, includes forward-looking statements that involve risks and uncertainties. You should review the "Risk Factors" section for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis.

Overview

We're on a near-term path to achieving nuclear fusion energy at a low enough cost to replace all fossil-fuel based energy sources and end fossil fuel use. We will harness the energy source that powers the sun to create clean, safe energy. If we secure the funding to complete our project, we believe this will be the most fundamental change in technology in decades. It will flip the power from fossil to fusion.

To achieve the future we want for ourselves and our children, we must replace fossil fuels with a cheap, clean, safe, and unlimited energy source. Our small, decentralized 5 MW generators will use hydrogen and boron fuel, both of which are essentially unlimited in nature, to allow a direct conversion of energy to electricity without expensive turbines or radioactive waste. We believe costs will be 10x cheaper than existing energy sources, meaning our Focus Fusion technology can change the world. These projections are not guaranteed.

Given the Company's limited operating history, the Company cannot reliably estimate how much revenue it will receive in the future, if any.

Milestones

LAWRENCEVILLE PLASMA PHYSICS, INC. was incorporated in the State of New Jersey in May 2003.

Since then, we have:

- Achieved the highest confined temperature of any fusion experimental device, over 2 billion degrees, sufficient for hydrogen-boron fusion.
- Highest fusion energy output per unit energy input of any private fusion experiment, more than a thousand times the closest competitor.
- Patents issued in the U.S., China, Australia, Canada, and the European Union, with patent pending in India.
- Collaborating with international network of 40 labs organized by the International Center for Magnetized Plasmas.
- Raised over \$7.5 million from over 500 investors.
- Research published in leading peer-reviewed journals documenting the LPP Fusion device as the most advanced, privately funded fusion experiment in the world.
- Easiest path to fusion by using natural instabilities of plasmas, not fighting them. We imitate nature.

Historical Results of Operations

- *Revenue & Gross Margin.* For the period ended September 30, 2020, the Company had revenues of \$74,384 compared to the year ended September 30, 2019, when the Company had revenues of \$229,993.
- *Assets.* As of September 30, 2020, the Company had total assets of \$624,019, including \$246,004 in cash. As of September 30, 2019, the Company had \$420,385 in total assets, including \$59,323 in cash.
- *Net Loss.* The Company has had net losses of \$737,056 and net losses of \$586,228 for the fiscal years ended September 30, 2020 and September 30, 2019, respectively.
- *Liabilities.* The Company's liabilities totaled \$247,480 for the fiscal year ended September 30, 2020 and \$104,426 for the fiscal year ended September 30, 2019.

Liquidity & Capital Resources

To-date, the company has been financed with \$73,945 in debt and \$6,976,654 in equity.

We plan to use the proceeds as set forth in this Form C under "Use of Funds". We don't have any other sources of capital in the immediate future.

We will likely require additional financing in excess of the proceeds from the offering in order to perform operations over the lifetime of the Company. Except as otherwise described in this Form C, we do not have additional sources of capital other than the proceeds from the offering. Because of the complexities and uncertainties in establishing a new business strategy, it is not possible to adequately project whether the proceeds of this offering will be sufficient to enable us to implement our strategy. This complexity and uncertainty will be increased if less than the maximum amount of securities offered in this offering is sold. The Company intends to raise additional capital in the future from investors. Although capital may be available for early-stage companies, there is no guarantee that the Company will receive any investments from investors.

Runway & Short/Mid Term Expenses

LAWRENCEVILLE PLASMA PHYSICS, INC. cash in hand is \$108,579.41, as of December 2020. Over the last three months, revenues have averaged \$165/month

cost of goods sold has averaged \$0/month, and operational expenses have averaged \$64,400/month, for an average burn rate of \$64,235 per month. Our intent is to be profitable in 0 months.

Since the date our financials cover, we have completed redesign of our switches and anode and have received most of the parts for the switches, which we are now assembling. We expect the next set of experiments to start in late April 2021 after we receive the new anode.

Over the next 3 to 6 months, we expect revenue to continue to be small and expenses to continue at the same level, around \$65,000/month.

In the short-term, we expect that investments in our shares will fully cover our expenses and allow us to build up a reserve.

However, to reach profitability in the next 4-5 years, we will need much larger funds, in the region of \$100 million. This will be used for a development project to create a commercial prototype ready for manufacture. We expect to be able to raise these funds once we have completed the present research phase and have demonstrated net energy production in the lab. We expect that these funds will come from a combination of government grants and large investments, which we think we have a good chance of obtaining once we demonstrate we are the first to attain net energy for a fusion energy device.

INSTRUCTIONS TO QUESTION 28: The discussion must cover each year for which financial statements are provided. For issuers with no prior operating history, the discussion should focus on financial milestones and operational, liquidity, and other challenges. For issuers with an operating history, the discussion should focus on whether historical results and cash flows are representative of what investors should expect in the future. Take into account the proceeds of the offering and any other known or pending sources of capital. Discuss how the proceeds from the offering will affect liquidity, whether receiving these funds and any other additional funds is necessary to the viability of the business, and how quickly the issuer anticipates using its available cash. Describe the other available sources of capital to the business, such as lines of credit or required contributions by shareholders. References to the issuer in this Question 28 and these instructions refer to the issuer and its predecessors, if any.

FINANCIAL INFORMATION

29. Include financial statements covering the two most recently completed fiscal years or the period(s) since inception, if shorter.

Refer to [Appendix C, Financial Statements](#)

I, Eric J. Lerner, certify that:

- (1) the financial statements of LAWRENCEVILLE PLASMA PHYSICS, INC. included in this Form are true and complete in all material respects; and
- (2) the tax return information of LAWRENCEVILLE PLASMA PHYSICS, INC. included in this Form reflects accurately the information reported on the tax return for LAWRENCEVILLE PLASMA PHYSICS, INC. filed for the fiscal year ended 2018.

Eric J. Lerner
Physicist

OTHER MATERIAL INFORMATION

31. In addition to the information expressly required to be included in this Form, include:

- (1) any other material information presented to investors; and

- (2) such further material information, if any, as may be necessary to make the required statements, in the light of the circumstances under which they are made, not misleading.

All information presented to investors hosted on Wefunder.com is available in [Appendix A: Business Description & Plan](#).

INSTRUCTIONS TO QUESTION 30: If information is presented to investors in a format, media or other means not able to be reflected in text or portable document format, the issuer should include:

- (a) a description of the material content of such information;
- (b) a description of the format in which such disclosure is presented; and
- (c) in the case of disclosure in video, audio or other dynamic media or format, a transcript or description of such disclosure.

ONGOING REPORTING

32. The issuer will file a report electronically with the Securities & Exchange Commission annually and post the report on its website, no later than:

120 days after the end of each fiscal year covered by the report.

33. Once posted, the annual report may be found on the issuer's website at:
<http://lppfusion.com/invest>

The issuer must continue to comply with the ongoing reporting requirements until:

1. the issuer is required to file reports under Exchange Act Sections 13(a) or 15(d);
2. the issuer has filed at least one annual report and has fewer than 300 holders of record;
3. the issuer has filed at least three annual reports and has total assets that do not exceed \$10 million;
4. the issuer or another party purchases or repurchases all of the securities issued pursuant to Section 4(a)(6), including any payment in full of debt securities or any complete redemption of redeemable securities; or the issuer liquidates or dissolves in accordance with state law.

APPENDICES

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100 et seq.), the issuer certifies that it has reasonable grounds to believe that it meets all of the requirements for filing an Annual Report and has duly caused this Form to be signed on its behalf by the duly authorized undersigned.

LAWRENCEVILLE PLASMA
PHYSICS, INC.

By

Eric J. Lerner

President and Chief Scientist

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100 et seq.), this Annual Report and Transfer Agent Agreement has been signed by the following persons in the capacities and on the dates indicated.

Eric J. Lerner

President and Chief Scientist
9/17/2020

The Annual Report must be signed by the issuer, its principal executive officer or officers, its principal financial officer, its controller or principal accounting officer and as least a majority of the board of directors or persons performing similar functions.

I authorize Wefunder Portal to submit a Annual Report to the SEC based on the information I provided through this online form and my company's Wefunder profile.

As an authorized representative of the company, I appoint Wefunder Portal as the company's true and lawful representative and attorney-in-fact, in the company's name, place and stead to make, execute, sign, acknowledge, swear to and file a Annual Report on the company's behalf. This power of attorney is coupled with an interest and is irrevocable. The company hereby waives any and all defenses that may be available to contest, negate or disaffirm the actions of Wefunder Portal taken in good faith under or in reliance upon this power of attorney.
