Notes to the Financial Statements

Note 1 - Summary of significant accounting policies

Description of the company

Lawrenceville Plasma Physics, Inc., D/B/A LPPFusion, Inc. (the Company), incorporated in 2003, is a development-stage enterprise, researching and developing an economical, ecologically safe energy generation technology called Focus Fusion. This technology uses a Dense Plasma Focus device, fueled by hydrogen and boron, and converts energy directly into electricity.

The Company has already achieved major experimental milestones. Of the three factors that serve as an indicator of fusion energy yield (temperature, density and confinement time), the Company has so far achieved adequate temperature and confinement time for net energy. It plans to carry out scientific experiments to demonstrate the scientific feasibility of its approach and develop a prototype fusion generator. The Company expects that it will achieve profitable operation after that time primarily by selling licenses for the manufacture of the generators and from the royalties from those licenses.

Use of estimates

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and to disclose contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Income taxes

Deferred income taxes reflect the temporary differences in reporting assets and liabilities for income and financial accounting purposes. These temporary differences arise primarily from the recognition of accelerated depreciation for income tax purposes and net operating loss carryforwards.

With few exceptions, the Company is no longer subject to the U.S. Federal, state or local income tax examinations by tax authorities for years before 2017.

Property and equipment

Property and equipment are stated at cost. Repairs and maintenance costs are expensed, while additions and betterments are capitalized. Depreciation is being provided for principally by the straight-line method over estimated useful lives of the related assets.

Notes to the Financial Statements

Note 6 - Stock option plan

Pursuant to the Company's Stock Option Plan, the Company will issue from time to time, to employees, officers, directors and consultants of the Company, options to purchase shares of the Company's common stock.

Options are granted with an exercise price equal to the fair value of the Company's stock at the date of the grant; the options generally vest immediately. The exercise price for the options range from \$60 to \$126. The options generally have ten-year contractual terms. The fair value of each option award was the market price of the stock as determined arbitrarily by the management of the Company on the date of the issuance. At September 30, 2021, there were 19,008 options outstanding.

There was no compensation expense recorded for any of the options because management of the Company, using qualitative inputs, has determined the fair value to be negligible.
