Aircraft Acquisition Strategy, page 7

1. We note your response to our prior comment number one. Based on the proposed disclosure enhancements you provided in your response, it appears you have determined how you intend to record maintenance right assets when a related lease ends. We note you will disclose "the amortization of the net maintenance right asset included in depreciation expense." Please explain to us your full prospective accounting policy for maintenance right assets/liabilities that arise as a result of acquisition accounting under ASC 805, including your end-of-lease accounting for these assets and liabilities. Please

be advised, it does not appear to us that it would be appropriate to combine maintenance rights with the value of your rental fleet and amortize them over the remaining useful life of your aircraft.

2. With regard to your accounting for maintenance right assets at the end of the lease term, please tell us, and disclose in future filings, your accounting policy for planned major maintenance.

3. We note your response to our prior comment number two. Please revise the titles of Non-GAAP financial measures you present to more clearly convey what they represent, such as "adjusted net income before income taxes" and "adjusted diluted earnings per share before income taxes" or other similar titles.
