

Investor Presentation - May 2013

Disclaimers

FORWARD-LOOKING INFORMATION

This presentation contains forward-looking statements and information. Statements that are not historical facts, including statements about our beliefs and expectations, are forward-looking statements. Forward-looking statements include statements preceded by, followed by or that include the words “may,” “could,” “would,” “should,” “believe,” “expect,” “anticipate,” “plan,” “estimate,” “target,” “project,” “intend” and similar expressions. These statements include, among others, statements regarding our expected performance, anticipated returns and our investment strategy and means to implement the strategy.

Forward-looking statements are only predictions and are not guarantees of performance. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. These assumptions could prove inaccurate. Forward-looking statements also involve known and unknown risks and uncertainties, which could cause actual results that differ materially from those contained in any forward-looking statement. Many of these factors are beyond our ability to control or predict.

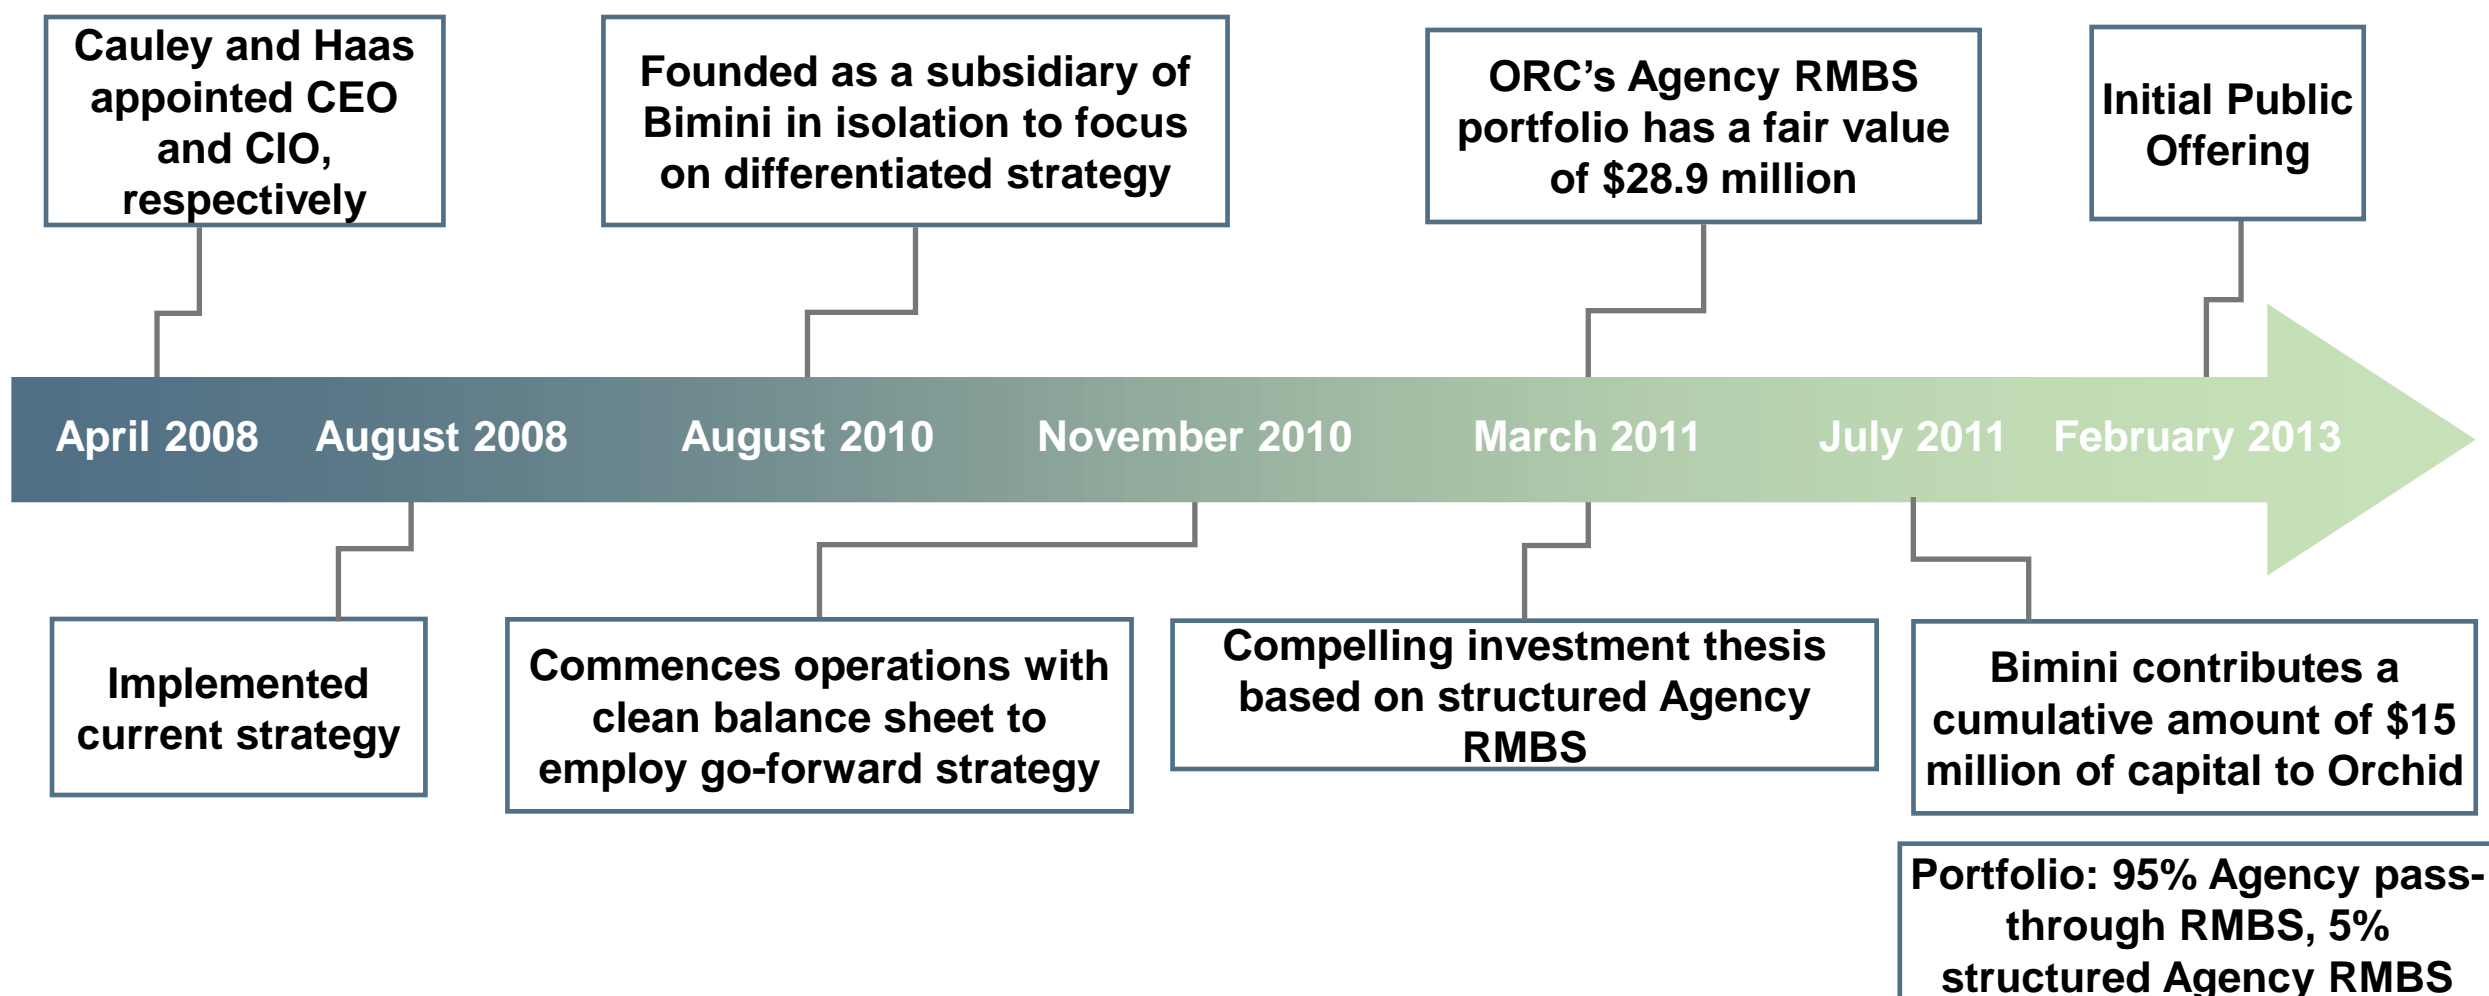

All forward-looking statements speak only as of the date of this presentation. Except as required by applicable law, we are under no obligation to publicly update or revise any forward-looking statements, whether as a result of any new information, future events or otherwise. Potential investors should not place undue reliance on our forward-looking statements. Before you invest in our common stock, you should be aware that the occurrence of the events described in “Risk Factors” section and elsewhere in the Registration Statement on Form S-11 relating to this offering could harm our business, financial condition and results of operations and our ability to pay distributions to our stockholders.

Linking Solutions, Inc.: President

Challenges of the Traditional Model

The traditional REIT investment model: Repo-funded pass-through securities

Price Risk

- Holders of premium priced Agency RMBS are vulnerable to losses if prepayments rise unexpectedly
- Limited further price appreciation with premium Agency RMBS, but risk of accelerated price declines remain as rates rise

Reinvestment Risk

- Agency RMBS prepay faster in low rate environments
 - But capital has to be deployed in a less attractive investment environment due to higher RMBS prices

Maturity Risk

- Short term repo funding comes due before the assets pay off creating funding risk
- Traditional REIT model assumes the ability to continuously roll-over maturing liabilities

Counterparty Risk

- Deteriorating counterparty financial condition can result in funding instability
 - Risk that all funding counterparties pull back simultaneously

Orchid Approach

	1 Asset Selection	2 Embedded Leverage	3 Protect Book Value
Issue	<ul style="list-style-type: none"> Traditional REITs buy a narrow catalogue of low-duration MBS 	<ul style="list-style-type: none"> Traditional REITs finance long-term assets with short term debt 	<ul style="list-style-type: none"> Traditional REITs imperfectly hedge MBS with swaps
Our Approach	<ul style="list-style-type: none"> Orchid expands the investment focus to include IO and IIO Agency RMBS Augments traditional pass-through investing which is based on characteristics of the underlying collateral 	<ul style="list-style-type: none"> Unfunded structured securities have comparable returns to repo-funded MBS portfolios Investing in securities with embedded leverage reduces hedging costs and counterparty risk 	<ul style="list-style-type: none"> Many structured securities have negative duration and positive yields Gains in the value of the structured securities portfolio offset losses in the pass-through portfolio as rates rise
Result	<ul style="list-style-type: none"> Greater flexibility to hedge performance and invest in cheaper assets 	<ul style="list-style-type: none"> Unencumbered assets and cash represent ~15% of the illustrative asset portfolio 	<ul style="list-style-type: none"> Greater expected book value stability to complement attractive returns

Our Approach to Risk Management

Asset Selection

- Structured Agency RMBS can provide more attractive returns than pass-throughs in low rate environments

Book Value Stability

- Agency pass-through securities combined with structured Agency RMBS can protect book value

Embedded Leverage

- Strategy does not require ongoing fixed swap payments, yet has a comparable return profile to hedged Agency pass-throughs

Evolution of the Total Portfolio Profile
