

Fiesta Restaurant Group, Inc.

2022 Annual Report

Dear Fellow Shareholders,

As we look back on 2022, we are pleased to have made solid progress across our key strategic growth initiatives while successfully navigating economic and industry challenges, all of which have resulted in accelerating restaurant sales and margin momentum as we begin 2023:

- We finished the year with a double digit increase in comparable restaurant sales of 11.0% in the fourth quarter of 2022 vs the fourth quarter of 2021, compared to an increase of 8.0% in the first quarter of 2022 vs the first quarter of 2021. In addition, we believe we slightly improved our share of restaurant segment traffic in the state of Florida in 2022 based on information provided by a third-party traffic tracking service.
- Profitable traffic growth has been and will continue to be our top priority. Year-over-year comparable restaurant transactions in the first quarter of 2022 declined 7.0% vs the first quarter of 2021 and improved in the second half of 2022 and are now trending positive as we started 2023.
- The significant business interruption from staffing level challenges has normalized, allowing us to focus on providing a consistent and high-quality guest experience.
- Restaurant-level operating profit¹ (previously presented as Restaurant-level Adjusted EBITDA) margins, a non-GAAP financial measure, are rebounding and are now on an upward trend after dipping in the middle of 2022. We ended the year with fourth quarter 2022 Restaurant-level operating profit margins exceeding fourth quarter 2021 margins and in 2023 restaurant-level operating profit margins are targeted to hit 18% on a run rate basis as we continue our focus on growing traffic.
- Our G&A expense reduction plan continues to be a high priority and we have made significant progress towards delivering the anticipated savings we have previously shared with you by outsourcing our accounting function, downsizing our Dallas office in February 2023, and renegotiating service vendor contracts across multiple expense categories. These efforts, completed or underway, are expected to meaningfully contribute toward our target of reducing our G&A expense run rate to between 8.5% to 9.0% of restaurant sales.

Total revenues for this past year increased 8.4% in 2022 to \$387.4 million from \$357.3 million in 2021, driven primarily by a 9.1% increase in comparable restaurant sales. Consolidated Adjusted EBITDA¹, a non-GAAP financial measure, decreased \$3.2 million to \$21.8 million in 2022 from \$25.0 million in 2021, driven primarily by higher commodity costs, labor costs, insurance costs, utilities costs, general and administrative expenses, and repair and maintenance costs, partially offset by higher restaurant sales. Restaurant-level operating profit¹ was \$59.4 million or 15.4% of restaurant sales in 2022 compared to \$62.8 million or 17.7% of restaurant sales in 2021.

After being named interim CEO last December, I moved quickly to ensure that we maintained focus on our strategic growth initiatives while sharpening our operations excellence and re-prioritizing the opportunities that we believe will have the biggest impact on transaction growth and margin expansion. For 2023, we have articulated four key themes to guide us forward – 1) Building operations excellence through “back to basics” training, simplification, and increased peak time productivity; 2) Creating a great guest experience in the areas of food quality, speed, accuracy, and hospitality across all channels; 3) Enhancing the Pollo Tropical brand; and 4) Developing great teams.

In closing, I want to share my appreciation for all of our team members for demonstrating their resilience and tenacity during these unusual times. While our strategy development, initiative assessment and organizational optimization program are still in process, our entire management team is excited about the steps we have taken thus far which we believe will focus and accelerate our efforts to grow traffic and expand restaurant-level operating profit margins to 18% on a run rate basis. We look forward to sharing the ongoing efforts we are making on behalf of our shareholders throughout the year.

Sincerely,

Dirk Montgomery
Interim Chief Executive Officer
Fiesta Restaurant Group, Inc.

¹ For further details regarding non-GAAP financial measures and a reconciliation to their most comparable GAAP measures, please see our Annual Report on Form 10-K for the fiscal year ended January 1, 2023.

PART I

Presentation of Information

Throughout this Annual Report on Form 10-K, we refer to Fiesta Restaurant Group, Inc. as “Fiesta Restaurant Group” or “Fiesta” and, together with its consolidated subsidiaries, as “we,” “our” and “us” unless otherwise indicated or the context otherwise requires. Any reference to restaurants refers to company-owned restaurants unless otherwise indicated.

We own, operate and franchise the fast-casual restaurant brand Pollo Tropical®, through our wholly-owned subsidiaries Pollo Operations, Inc. and its subsidiaries, and Pollo Franchise, Inc., (collectively “Pollo Tropical”). Our common stock is traded on The NASDAQ Global Select Market under the symbol “FRGI”.

We use a 52- or 53-week fiscal year ending on the Sunday closest to December 31. The fiscal years ended January 1, 2023 and January 2, 2022 each contained 52 weeks. The fiscal year ended January 3, 2021 contained 53 weeks. The next fiscal year to contain 53 weeks will be the fiscal year ending January 3, 2027.

Use of Non-GAAP Financial Measures

Consolidated Adjusted EBITDA and margin and Restaurant-level Operating Profit (previously presented as Restaurant-level Adjusted EBITDA) and margin are non-GAAP financial measures. We use these non-GAAP financial measures in addition to net income (loss) and income (loss) from operations to assess our performance, and we believe it is important for investors to be able to evaluate us using the same measures used by management. We believe these measures are important indicators of our operational strength and the performance of our business and they provide a view of operations absent non-cash activity and items that are not related to the ongoing operation of our restaurants or affect comparability period over period.

These non-GAAP financial measures as calculated by us are not necessarily comparable to similarly titled measures reported by other companies and should not be considered as an alternative to net income (loss), earnings (loss) per share, cash flows from operating activities or other financial information determined under GAAP.

Restaurant-level Operating Profit is defined as Consolidated Adjusted EBITDA excluding franchise royalty revenues and fees, pre-opening costs and general and administrative expenses (including corporate-level general and administrative expenses). Restaurant-level Operating Profit margin is derived by dividing Restaurant-level Operating Profit by restaurant sales.

Management believes that such financial measures, when viewed with our results of operations calculated in accordance with GAAP and our reconciliation of net income (loss) to Consolidated Adjusted EBITDA and reconciliation of income (loss) from operations to Restaurant-level Operating Profit (i) provide useful information about our operating performance and period-over-period changes, (ii) provide additional information that is useful for evaluating the operating performance of our business and (iii) permit investors to gain an understanding of the factors and trends affecting our ongoing earnings, from which capital investments are made and debt is serviced. However, such measures are not measures of financial performance or liquidity under GAAP and, accordingly, should not be considered as alternatives to net income or cash flow from operating activities as indicators of operating performance or liquidity. Also, these measures may not be comparable to similarly titled captions of other companies.

All such financial measures have important limitations as analytical tools. These limitations include the following:

- Such financial information does not reflect our capital expenditures, future requirements for capital expenditures or contractual commitments to purchase capital equipment;
- Such financial information does not reflect interest expense or the cash requirements necessary to service payments on our debt;
- Although depreciation and amortization are non-cash charges, the assets that we currently depreciate and amortize will likely have to be replaced in the future, and such financial information does not reflect the cash required to fund such replacements; and

- Such financial information does not reflect the effect of earnings or charges resulting from matters that our management does not consider to be indicative of our ongoing operations. However, some of these charges and gains (such as impairment and other lease charges (recoveries), closed restaurant rent expense, net of sublease income, other income and expense and stock-based compensation expense) have recurred and may recur.

See Item 7, “Management’s Discussion and Analysis” under the heading titled “Management’s Use of Non-GAAP Financial Measures” for a quantitative reconciliation from net income (loss), which we believe is the most directly comparable GAAP financial performance measure, to Consolidated Adjusted EBITDA, and from income (loss) from operations, which we believe is the most directly comparable GAAP financial performance measure, to Restaurant-level Operating Profit.

Forward-Looking Statements

Matters discussed in this report and in our public disclosures, whether written or oral, relating to future events or our future performance, including any discussion, express or implied, regarding our anticipated growth, plans, objectives and the impact of our initiatives, our investments in strategic initiatives for Pollo Tropical, such as improved customer experience initiatives, investments in our digital and related platforms and new unit expansion and remodeling on future sales, margins, earnings and liquidity contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, (the “Exchange Act”). These statements are often identified by the words “believe,” “positioned,” “estimate,” “project,” “plan,” “goal,” “target,” “assumption,” “continue,” “intend,” “expect,” “future,” “anticipate,” and other similar expressions, whether in the negative or the affirmative, that are not statements of historical fact. These forward-looking statements are not guarantees of future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict, and you should not place undue reliance on our forward-looking statements. Our actual results and the timing of certain events could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth under “Risk Factors” and elsewhere in this report and in our other public filings with the United States Securities and Exchange Commission (“SEC”). All forward-looking statements and the internal projections and beliefs upon which we base our expectations included in this report or other periodic reports represent our estimates as of the date made and should not be relied upon as representing our estimates as of any subsequent date. While we may elect to update forward-looking statements at some point in the future, we expressly disclaim any obligation to update any forward-looking statements, whether as a result of new information, future events, or otherwise.

ITEM 1. BUSINESS

Overview

Our Company

We own, operate and franchise the restaurant brand Pollo Tropical®, which has nearly 35 years of operating history and a loyal customer base. Our Pollo Tropical restaurants feature fire-grilled and crispy citrus marinated chicken and other freshly prepared menu items. We believe the brand offers a distinct and unique flavor with broad appeal at a compelling value, which differentiates it in the competitive fast-casual and quick-service restaurant segments. All but one of our restaurants offer the convenience of drive-thru windows.

For the fiscal year ended January 1, 2023, average annual sales per restaurant was approximately \$2.8 million for our Pollo Tropical restaurants. As of January 1, 2023, we owned and operated 137 Pollo Tropical restaurants, all of which are located in Florida. We franchise our Pollo Tropical restaurants primarily in international markets and, as of January 1, 2023, had 23 franchised Pollo Tropical restaurants outside the contiguous United States. In addition, as of January 1, 2023, we had six domestic non-traditional Pollo Tropical licensed locations on college campuses in Florida and locations at a hospital and two sports and entertainment stadiums in Florida. For the fiscal year ended January 1, 2023, we generated revenues of \$387.4 million, and comparable restaurant sales increased 9.1% for Pollo Tropical.

Sale of Taco Cabana

On July 1, 2021, we entered into a stock purchase agreement for the sale of all outstanding capital stock of Taco Cabana, Inc., the parent company of the Taco Cabana business (together with its subsidiaries, “Taco Cabana”), for a cash purchase price of \$85.0 million, subject to reduction for (i) closing adjustments of approximately \$4.6 million related to maintenance and repair work at the Taco Cabana restaurants and landscaping replacement as a result of Winter Storm Uri, and (ii) certain other working capital adjustments as set forth in the stock purchase agreement (the “Taco Cabana Divestiture”). The transaction was completed August 16, 2021, and the Company recognized a gain on the sale of Taco Cabana of \$25.0 million during the year ended January 2, 2022, which is included within income from discontinued operations, net of tax, in the consolidated statements of operations. Additionally in 2021, we filed an insurance claim for winter storm damages in Texas that occurred in the first quarter of 2021 and retained the right to receive the insurance claim proceeds. We recognized \$0.9 million of insurance proceeds within income (loss) from discontinued operations, net of tax, in the year ended January 2, 2022 based on a partial settlement reached with certain insurers. We recognized an additional \$1.0 million of insurance proceeds within income (loss) from discontinued operations, net of tax, in the year ended January 1, 2023. See Note 2 of the Notes to our Consolidated Financial Statements.

Proceeds from the sale were used to fully repay Fiesta’s approximately \$74.6 million of outstanding term loan borrowings under our senior credit facility and to pay divestiture transaction fees and a loan prepayment premium totaling approximately \$4.2 million, comprised of a loan prepayment fee of 3.0% of the principal repaid of \$2.2 million and divestiture transaction fees of approximately \$2.0 million.

All revenues, costs and expenses and income taxes attributable to Taco Cabana, together with the gain on the sale of Taco Cabana and certain costs related to the transaction, have been aggregated within income (loss) from discontinued operations, net of tax, in the consolidated statements of operations for all periods presented. No amounts for shared general and administrative operating support expense were allocated to discontinued operations. Interest expenses, the amortization of premiums and debt issuance costs of our new and former senior credit facilities and the loss on extinguishment of debt under our new and former senior credit facilities are included within income (loss) from discontinued operations, net of tax for the years ended January 2, 2022 and January 3, 2021.

Labor Challenges and Inflationary Factors

Throughout much of 2022, labor supply shortages impacted the entire restaurant industry as well as our operations. Hours of operations were limited across multiple channels due to labor shortages. In response to this challenge, we increased recruiting resources and offered additional payment incentives at the most affected locations as well as new hire sign-on bonuses. In addition, we benchmark our operations team wage rates and benefits on an ongoing basis to ensure our total compensation is market-competitive and the 2022 and 2023 hourly wage rates are above the required minimum levels for the State of Florida. As a result of our efforts and as overall labor supply improved, our staffing levels improved and stabilized during the second half of 2022 which enabled an increase in operating hours across all channels. Overall staffing levels at the end of the fourth quarter of 2022 recovered to the approximate staffing levels experienced in the first half of 2021 prior to the labor supply issues, although a small number of select locations continue to experience labor shortages. As a result of the improved staffing levels, the payment incentives are targeted to be phased out in the first quarter of 2023.

Inflationary factors have been experienced primarily in food costs and other operating costs categories. Commodity costs as a percentage of net sales increased 4.9% in the year ended January 1, 2023 compared to the year ended January 2, 2022. Utilities costs as a percentage of net sales also increased 0.4% in 2022 compared to 2021 primarily due to higher energy prices in 2022.

Pricing action has been taken to offset labor, food and other operating cost increases. In order to maintain value perceptions with our customers, we implemented a phased approach to menu price increases and took lower pricing increases on items purchased by value-conscious customers including our “Pollo Time” promotional items. Price increases include a 5.0% increase in March 2022, a 1.4% increase in June 2022, and a 4.0% increase in September 2022. As a result of this phased approach to menu price increases, margin improvement is trailing the impact of cost increases noted above, with improved margins expected in future quarters compared to the year ended January 1, 2023, barring unforeseen changes in our cost structure and operating environment.

Our Brand

Our restaurants operate in the fast-casual and quick-service restaurant segments and feature fresh-made cooking, drive-thru service and catering.

Pollo Tropical. Our Pollo Tropical restaurants feature fresh chicken marinated in a proprietary blend of tropical fruit juices and spices, crispy or fire-grilled, boneless and bone-in. Our menu's emphasis is on freshness and quality. Other fan-favorite menu items include TropiChops® (a create your own bowl of fire-grilled chicken, crispy chicken, mojo roast pork or churrasco, served over white, brown or yellow rice, and topped with a choice of black beans, tomatoes, kernel corn, peppers and sautéed onions), as well as platters, sandwiches, wraps and salads. Side dishes include rice, beans, corn, plantains and fried yuca. We also offer a wide selection of signature sauces which allow our guests to further customize their orders. Dessert offerings include flan, cuatro leches and key lime pie, as well as limited-time seasonal items, and beverages include fountain drinks, lemonade, flavored brewed teas, as well as frozen Tropichillers®. Most menu items are prepared daily in each of our restaurants, which feature open display cooking on large, open-flame grills. We offer both individual and family meal-sized portions which enable us to provide a home meal replacement for our guests and catering for parties and corporate events. We began selling proprietary alcoholic beverages including wine and beer at most Pollo Tropical locations in 2020 to increase off-premise sales.

Our Pollo Tropical restaurant dining areas are designed to create an inviting, festive and tropical atmosphere. We also provide our guests the option of take-out, including the ability to order online in advance, and all but one of our restaurants provide the convenience of drive-thru windows. Delivery is available through third-party partnerships at all Pollo Tropical locations. Our Pollo Tropical restaurants are generally open for lunch, dinner, and late night seven days a week. As of January 1, 2023, substantially all of our Pollo Tropical restaurants were freestanding buildings. Our typical freestanding Pollo Tropical restaurant ranges from 2,800 to 3,700 square feet and provides interior seating for approximately 70 to 90 guests. During the year ended January 1, 2023, the majority of our sales were through drive-thru windows, take-out, or delivery. For the year ended January 1, 2023, the average sales transaction at our Pollo Tropical restaurants was \$16.64, with sales at dinner/late night and lunch representing 49.3% and 50.7%, respectively. For the year ended January 1, 2023, our Pollo Tropical brand generated total revenues of \$387.4 million and Consolidated Adjusted EBITDA of \$21.8 million.

Pollo Tropical opened its first restaurant in 1988 in Miami, Florida. As of January 1, 2023, we owned and operated a total of 137 Pollo Tropical restaurants, all located in Florida.

We are franchising and licensing our Pollo Tropical restaurants internationally and in non-traditional domestic locations. As of January 1, 2023, we had 23 franchised Pollo Tropical restaurants located in Puerto Rico, Panama, Guyana, Ecuador, and the Bahamas, six non-traditional licensed locations on college campuses in Florida, and locations at a hospital and two sports and entertainment stadiums in Florida. We have agreements for the continued development of franchised Pollo Tropical restaurants in certain of our existing franchised markets.

Taco Cabana. Prior to our sale of Taco Cabana, our Taco Cabana restaurants served fresh, Mexican-inspired food. Typical freestanding Taco Cabana restaurants averaged approximately 3,500 square feet (exclusive of the exterior dining area) and provided seating for approximately 80 guests, with additional outside patio seating for approximately 50 guests.

Our Competitive Strengths

We believe our competitive strengths include the following key attributes:

Well Positioned and Differentiated in the Fast-Casual and Quick-Service Segments. As of January 1, 2023, we owned, operated and franchised 169 fast-casual restaurants under our Pollo Tropical brand which has nearly 35 years of operating history. We believe Pollo Tropical has compelling average annual sales per restaurant within the fast-casual and quick-service segments at \$2.8 million for 2022, and we believe it is well positioned in the industry due to our high quality, freshly-prepared food, value and differentiation of flavor profiles.

Leading, Differentiated Brand Serving Freshly Prepared, High Quality Foods with Broad Appeal and a Compelling Value Proposition. Our Pollo Tropical brand is differentiated from other dining options and offers distinct flavor profiles and healthy menu choices at affordable prices that we believe has broad consumer appeal, provides guests with a compelling value proposition, attracts a diverse customer base and drives guest frequency and loyalty. Pollo Tropical is committed to serving freshly-prepared food using quality ingredients that are made-to-order

and customized for each guest. Pollo Tropical offers a wide range of menu offerings and home meal replacement options in generous portion sizes and at affordable price points which appeal to a broad customer base. Our open display kitchen format allows guests to view and experience our food being freshly-prepared and cooked to order. We continue to refine our menus, including some seasonal offerings at our restaurants, in order to provide variety to our guests, address changes in consumer preferences, and maintain a speed of service that appeals to our customers. We also selectively use promotions and limited time offers which are intended to reinforce our value proposition and to introduce new products. Additionally, we offer our guests the convenience of drive-thru service, online ordering, curbside pickup, and delivery through third-party delivery services in order to provide a viable option for home meal replacement and family meals.

Compelling Business Model. We enjoy significant brand recognition due to high market penetration of our restaurants in our core markets which provides operating, marketing and distribution efficiencies and convenience for our guests. Pollo Tropical has a strong brand affinity in our core markets as evidenced by fast-casual and quick-service segment-leading average annual sales volumes, as noted above.

Growth Strategies

Our long-term strategy is focused on profitably building our base business, growing new distribution channels, including catering, delivery, licensed and franchised locations, and development of new restaurants.

Our strategies for growth primarily include:

Increase Comparable Restaurant Sales. Comparable restaurant sales increased 9.1% in 2022 compared to 2021. We also experienced an increase in comparable restaurant sales in 2021 of 16.0%, which we believe was attributable to the impact of the COVID-19 pandemic and labor challenges in 2020. These challenges continued into 2021 and, to a lesser extent, into 2022. We believe our significant mix of dine-in sales prior to the pandemic had a negative impact on comparable restaurant sales. We are focused on increasing comparable restaurant sales in the future by attracting new customers and increasing guest frequency through the following strategies:

- ***Focus on consistency of operations and food quality:*** We believe high quality food and hospitality, a comfortable ambience, and reasonable prices result in an enjoyable guest experience, which drives loyalty and guest frequency. We improved our operations training, systems, processes and equipment in 2022 and will continue to focus on improving operations training, systems and processes to ensure consistency of operations and improvements in execution. In addition, supply chain and food preparation processes have been implemented to ensure high quality, freshness and consistency of our food, which we believe are critical components to the continued success of our brand.
- ***Grow our off-premise sales with focus on digital platform:*** The inclusion of portable menu items, such as wraps, sandwiches, bowls and salads, as well as family meals, and an increased focus on catering and delivery will continue to be a key focus for Pollo Tropical as we look to capture more off-premise meal occasions which we believe may be significant. Off-premise meal consumption increased significantly during the COVID-19 pandemic and we believe that off-premise sales may continue to be significant. In 2020, we expanded our third-party delivery partnerships to include delivery through multiple delivery service providers. We engaged a third party to improve our mobile apps and enhance our digital connections and interactions to grow our digital business and create experiences that minimize friction within our digital platforms including creating a state-of-the-art mobile app. We also implemented curbside pickup functionality as an option with online ordering and began improving connectivity at our restaurants, upgrading portable tablets and enabling touchless payments. In 2021, we invested in improving our digital platform and improving the speed and ease of use for off-premise sales channels including an enhanced drive-thru experience, geofencing technology for curbside orders and infrastructure changes to improve the speed of order cycle time for drive-thru and delivery orders in the second half of 2021. In 2021, we also completed design and began the implementation of digital drive-thru technology, which is designed to grow traffic and drive-thru check averages by improving speed of service at peak times, increasing promotion visibility and upselling opportunities and increasing order accuracy. In 2022, rolled out curbside capabilities to substantially all locations. Additionally, we implemented our digital drive-thru technology at 10 locations and introduced QR “Kiosk in Hand” technology for ordering and payment for our counter guests.

- *New product innovation:* Our menu is centered on freshly prepared, quality food offerings that we believe have both broad appeal and provide everyday value. Pollo Tropical has a team of product research and development professionals that enables us to continually refine our menu offerings and develop new products, several of which are validated by consumer research. Maintaining a strong product pipeline is critical to keeping our offerings compelling, and we intend to introduce innovative new menu items and enhancements to existing menu favorites throughout the year to drive further guest traffic, maximize guest frequency, and increase average check.
- *Focus on effective advertising to highlight our everyday value proposition:* Pollo Tropical utilizes an integrated, multi-level marketing approach that includes periodic system-wide promotions, outdoor marketing including billboards, in-restaurant promotions, local trade area marketing, social media, digital and web-based marketing and other strategies, including the use of radio and television advertising and limited-time offer menu item and value promotions. In addition, we have email and app-based loyalty programs at Pollo Tropical (My Pollo™) to further connect with our guests to build affinity and frequency. In 2020, we introduced a new state-of-the-art mobile app for Pollo Tropical. As a percentage of Pollo Tropical restaurant sales, Pollo Tropical's advertising expenditures were 3.3% in 2022, 3.2% in 2021 and 2.7% in 2020.
- *Continue our reimage program:* We believe ensuring a high-quality restaurant environment that complements our quality focus on food and hospitality will further drive incremental sales and profitability. We continue to implement restaurant enhancement initiatives to ensure safe, consistent and appealing experiences at our Pollo Tropical restaurants. During 2021, we developed an updated and more efficient restaurant design that reflects evolving post-COVID consumer behavior as well as consumer research. During 2021 and 2022, we began testing the new design in remodels and refreshes. We completed 32 refreshes and remodels through the end of 2022. We continued to enhance the new design in additional remodels and refreshes in 2022 and will continue to do so in ongoing refreshes and remodels in 2023.

Non-Traditional License and International Franchise Development. We generally update our Pollo Tropical franchise disclosure documents each year to support potential franchise growth in the future. We are currently primarily focused on growing non-traditional domestic licensed locations on university campuses and non-traditional licensed locations in airports, events stadiums and highway rest stops, while modestly growing international locations with quality operators. In 2021, we opened our first licensed sports and entertainment location in a professional football stadium in Florida and expanded that footprint in 2022 to an additional sports and entertainment venue.

Improve Profitability and Optimize Our Infrastructure. We believe that our large restaurant base, skilled management team, operating systems, technology initiatives and training and development programs support our strategy of enhancing operating efficiencies while prudently growing our restaurant base. We continue to focus on maximizing cost efficiencies, including, among other things, implementing profit enhancement initiatives focused on food and labor costs, leveraging our purchasing power and enhancing our supply chain to optimize costs while delivering a high-quality guest experience with consistency. Our restaurant-level profitability at Pollo Tropical is very competitive within the restaurant industry segments in which we compete.

Develop New Restaurants. We believe that we have opportunities to develop additional Pollo Tropical restaurants in Florida, as well as potential future domestic expansion opportunities that match our site selection criteria. We paused our new restaurant development plans in 2020 through 2022 as a result of the COVID-19 pandemic and labor shortages. We intend to resume new restaurant development in the future and are currently qualifying sites in Florida for potential new units and are targeting a recommencement of restaurant openings in 2024, although there is no assurance that we will open any new restaurants in 2024. The development of new restaurants will incorporate what we have learned during the COVID-19 pandemic and our reimagining market research, both qualitative and quantitative. During 2021, we retained third-party consultants to assist in creating a new store design with a lower investment, optimized productivity and updated design features that we believe better match evolving consumer preferences. We began testing and refining the new design in remodels and refreshes in 2021 and continued these tests with additional remodels and refreshes in 2022, with even more expected in 2023.

We target opening freestanding restaurants in order to provide drive-thru service which is an important convenience and sales component for our brand. The location of our restaurants is a critical component of each restaurant's success. We evaluate potential new sites on many criteria including accessibility, visibility, costs,

surrounding traffic patterns, competition and demographic characteristics. Our senior management team determines the acceptability of all new sites based upon site visits, analyses prepared by our real estate, financial and operations professionals, and third-party proprietary location research and analysis. Historically, this process has typically resulted in entering into a long-term lease for the land followed by construction of the building or the conversion of an existing building using cash generated from our operations or with borrowings under our senior credit facility. While we have not yet entered into new unit lease agreements, we continue to evaluate opportunities for potential new sites.

The cost to construct a new or converted free-standing restaurant for our new restaurant design is estimated to be between \$1.6 million and \$2.0 million.

The cost of building and equipping new restaurants can vary significantly and depends on a number of factors, including the local economic conditions, geographic considerations, the size of the restaurant, the characteristics of a particular site, and whether we are constructing a new building or converting an existing building. Accordingly, the cost of opening new restaurants in the future may differ substantially from these estimates.

Competition

The restaurant industry is highly competitive with respect to price, service, location and food quality. In each of our markets, our restaurants compete with many national and regional quick service, fast casual, and in some cases casual dining restaurant chains, as well as locally owned restaurants. We also compete with delivered meal solutions, convenience stores, grocery stores and other restaurant retailers.

We believe that:

- Product quality and taste;
- Brand differentiation and recognition;
- Convenience of location;
- Comprehensive digital platform;
- Speed of service;
- Menu variety;
- Value perception;
- Ambience;
- Cleanliness; and
- Hospitality

are among the most important competitive factors in the fast-casual and quick-service restaurant segments and that Pollo Tropical effectively competes against those categories. Pollo Tropical's competitors include national and regional chicken-based concepts, as well as other concepts.

Restaurant Operating Data

Selected Pollo Tropical restaurant operating data is as follows:

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021
Average annual sales per company-owned restaurant (in thousands) ⁽¹⁾	\$ 2,801	\$ 2,576	\$ 2,220
Average sales transaction	\$ 16.64	\$ 14.30	\$ 12.83
Sales channel sales percentages:			
Drive-thru sales as a percentage of total sales	53.1%	57.8%	61.1%
Dine-in & counter take-out sales as a percentage of total sales	31.4%	27.4%	28.0%
Delivery sales as a percentage of total sales	10.9%	10.1%	7.3%
Online sales as a percentage of total sales	3.4%	3.5%	2.7%
Catering sales as a percentage of total sales	1.2%	1.2%	0.9%
Day-part sales percentages:			
Lunch	50.7%	49.5%	49.7%
Dinner and late night	49.3%	50.5%	50.3%

- (1) Average annual sales for company-owned restaurants are derived by dividing restaurant sales for such year by the average number of company-owned restaurants for such year. For comparative purposes, the calculation of average annual sales per company-owned restaurant is based on a 52-week fiscal year. Restaurant sales data for the extra week in the fiscal year ended January 3, 2021 have been excluded for purposes of calculating average annual sales per company-owned restaurant.

Seasonality

Our business is marginally seasonal due to regional weather conditions. Sales from our restaurants located in South Florida are generally higher during the winter months than during the summer months, while sales from our restaurants located in Central Florida and North Florida are generally higher during the summer months than the winter months. In addition, we have outdoor seating at many of our restaurants and the effects of adverse weather may impact the use of these areas and may negatively impact our restaurant sales.

Operations

Management Information Systems

Our management information systems provide us the ability to efficiently and effectively manage our restaurants and to ensure consistent application of operating controls at our restaurants.

In all corporate-owned restaurants, we use computerized management information systems, which we believe are scalable to support potential future growth plans. We use touch-screen point-of-sale (POS) systems, both fixed and mobile, designed specifically for the restaurant industry that facilitate accuracy and speed of order taking, are user-friendly, require limited cashier training, improve speed-of-service through the use of conversational order-taking techniques, and provide appropriate audit trails. We use credit card processing devices which utilize industry-leading Point-to-Point Encryption (P2PE) that protect our customers' credit card data. The POS systems are integrated with above-store enterprise applications that are designed to facilitate financial and management control of our restaurant operations. All products sold and related prices at our restaurants are programmed into the system from our central support office.

We provide in-store access to enterprise systems that assist in labor scheduling and food cost management, allow online ordering from distributors, and reduce managers' administrative time. Critical information from such systems is available in near real-time to our restaurant managers, who are expected to react quickly to trends or situations in their restaurant. Our district managers also receive near real-time information from all restaurants under their control and have access to key operating data on a remote basis. Management personnel at all levels, from the restaurant manager through senior management, utilize key restaurant performance indicators to manage our business.

These enterprise systems provide daily tracking and reporting of traffic counts, menu item sales, labor and food data including costs, and other key operating information for each restaurant. These systems also provide the ability to monitor labor utilization and sales trends on a real-time basis at each restaurant and provide analyses, reporting and tools to enable all levels of management to review a wide range of financial, product mix and operational data.

Our above-store digital ordering system is integrated with our POS system at each restaurant. Individual, group or catering orders placed on our website or that of our third-party delivery partners, mobile app or through our call center are transmitted electronically to the restaurants to provide a seamless ordering, payment and pickup or delivery experience for our guests. For mobile online ordering, we utilize a customized, proprietary consumer-facing mobile smartphone app developed in partnership with a leading third-party app developer.

In 2022, we made a number of improvements to our digital platform, including the following:

- Continued to deploy a curbside delivery program to help alleviate congestion at the drive-thru and in dining rooms;
- Continued the implementation of digital drive-thru technology, which is expected to grow traffic and drive-thru check averages by improving speed of service at peak times, increase promotion visibility and upselling opportunities and increase order accuracy; and
- Continued Pollo Tropical app enhancements to improve ease-of-use and maximize revenue per online transactions.

In order to maintain security and compliance, we utilize an Advanced Endpoint Protection service and conduct ongoing cybersecurity training and a mock ethical phishing campaign. We also upgraded older restaurant operating systems across a number of endpoints.

We expect to continue making significant investments in technology that we believe will drive sales, improve margins or upgrade infrastructure. In 2023, we intend to focus technology investments on the ongoing rollout of our digital drive-thru platform, enhancements to our loyalty platform including a higher level of loyalty integration and friction reduction across all channels, and continuing to proactively update infrastructure elements in the technology platform that are nearing end of life.

Community Social Impact

We are committed to being a deeply responsible company in the communities where we do business. Our focus is on serving high quality food to our guests and contributing positively to the communities where our restaurants are located. This is integral to our business strategy. Our initiatives include:

- Our chicken is free of hormones and trans-fats and our shrimp is Best Aquaculture certified;
- Our chicken is sourced from suppliers dedicated to uphold responsible animal welfare practices;
- We continue to pursue finding more earth-friendly serving and packaging materials for our products including bags that are made from recycled material, are 100% recyclable and reusable and are Rainforest Alliance certified, paper drink cups that are Sustainable Forest Initiative certified and aluminum that contains postindustrial re-processed and post-consumer material;
- Military veterans are actively recruited to work at our restaurants;
- We have military appreciation days and we provide discounts to military and first responders;
- We assist, through our non-profit Fiesta Family Foundation, many of our employees who have personally suffered losses or other hardships;
- We strive to provide aid to those in need in our communities on an ongoing basis and during times of crisis. Specific examples of our efforts to aid the community include the following:
 - During the COVID-19 pandemic in 2020, Pollo Tropical provided approximately 113,000 free meals to school-aged children and approximately 22,000 free meals to first responders and healthcare professionals. Pollo Tropical also donated approximately \$60 thousand in food donations to Miami Rescue Mission; and

- Immediately following the collapse of the Champlain Towers South in Surfside, Florida in 2021, Pollo Tropical was the first food provider on-site, distributing dinner to rescue workers the first night and continuing to deliver food on a weekly basis throughout the cleanup efforts. In addition to providing approximately 2,500 free meals to the rescue workers at the collapse site and to the Family Assistance Center at a nearby hotel, we also provided gift cards to displaced families from a nearby low-income condo building which was evacuated and shut down as a result of a safety audit immediately after the collapse.
- In 2022, we provided monetary and food donations or volunteered to various organizations including: World Central Kitchen, Miami Rescue Mission, Miami Dolphins Foundation, Miami Heat Charitable Fund, Fire and Police departments, The BBB Foundation (Bam Adebayo charitable organization), Easter Seals of South Florida, 305 Pink Pack, Homestead Air Force Base, Parkland Buddies, Broward County PBA, The Bill Tome Foundation, and the Florida Chapter of the Paralyzed Veterans of America.
- In 2021, we provided monetary and food donations or volunteered to the following organizations: Fire and Police departments, Federal Bureau of Investigation Headquarters, Baptist Hospital — Miami, Lotus House, Miami-Dade Firefighters Benevolent Association, Miami Dolphins Foundation, Miami Heat Charitable Fund, Miami Rescue Mission, the Motivational Edge, and Victim Service Center — Orlando.
- In 2020, we provided monetary and food donations or volunteered to the following organizations: Fire and Police departments, hospitals and COVID testing and vaccination sites throughout Florida, Big Brother Helping Hand, Farm Workers Association, Kidz Nation, L.O.V.E Our Youth Orlando, Miami Rescue Mission, Ronald McDonald House, Salvation Army, SOS Kids — Coconut Creek, St. Jude's Shelter, Star of Hope, United Way, YMCA, and Zebra Coalition.

As a result of these initiatives, we believe we deliver benefits to our stakeholders, including employees, business partners, customers, suppliers, stockholders, community members, and others.

Suppliers and Distributors

We have negotiated directly with local and national suppliers for the purchase of food and beverage products and supplies to ensure consistent quality and freshness and to obtain competitive prices. Supply contracts are negotiated on an annual basis in some cases to obtain favorable pricing and ensure consistent supply flow. Food and supplies are ordered from approved suppliers and are shipped to the restaurants via distributors. We are responsible for monitoring quality control, for the supervision of these suppliers and for conducting inspections to observe preparations and ensure the quality of products purchased.

We have service agreements with our primary distributors of food and paper products. Performance Food Group, Inc., is our primary distributor of food and beverage products and supplies for our Pollo Tropical restaurants under a distribution services agreement that expires on July 27, 2024. We also currently rely on three suppliers for chicken for our Pollo Tropical restaurants under agreements that expire on December 31, 2023.

Quality Assurance

Pollo Tropical is committed to obtaining quality ingredients and creating freshly-prepared food in a safe manner. In addition to operating in accordance with quality assurance and health standards mandated by federal, state and local governmental laws and regulations regarding minimum cooking times and temperatures, maximum time standards for holding prepared food, food handling guidelines and cleanliness, among other things, we have also developed our own internal quality control standards. We require our suppliers to adhere to our high quality control standards, and we regularly inspect their products and production and distribution facilities to ensure that they conform to those standards. We have also implemented certain procedures to ensure that we serve safe, quality meals to our guests. As an example, we utilize the nationally-recognized ServSafe program to train our kitchen staff and managers on proper food handling and preparation techniques. Additionally, we have hired a third-party specialized service provider that conducts unscheduled food safety inspections of our restaurants, and restaurant managers conduct internal inspections for taste, quality, cleanliness and food safety on a regular basis. These third-party inspections are one of the metrics used in our restaurant-level incentive bonus programs.

In addition to food safety, our operational focus is closely monitored to achieve a high level of guest satisfaction via speed of service, order accuracy and quality of service. Our senior management and restaurant management staffs are principally responsible for ensuring compliance with our operating policies. We have uniform operating standards and specifications relating to the quality, preparation and selection of menu items, maintenance and cleanliness of the restaurants and employee conduct. In order to maintain compliance with these operating standards and specifications, we distribute to our restaurant operations management team detailed reports measuring compliance with various guest service standards and objectives, including feedback obtained directly from our guests. The guest feedback is monitored by an independent agency and by us and consists of evaluations of speed of service, quality of service, quality of our menu items and other operational objectives including the cleanliness of our restaurants. We also have in-house guest service representatives that manage guest feedback and inquiries.

Trademarks

We believe that our trademarks, service marks, trade dress, logos and other proprietary intellectual property are important to our success. We have registered the principal Pollo Tropical logos and designs with the U.S. Patent and Trademark Office on the Principal Register as a service mark for our restaurant services. We also have secured or have applied for state and federal registrations for several other advertising or promotional marks, including variations of the Pollo Tropical principal marks as well as those related to our core menu offerings. In connection with our current and potential international franchising activities, we have applied for or been granted registrations in foreign countries of the Pollo Tropical principal marks and several other marks.

Other than the Pollo Tropical trademarks and the logo and trademark of Fiesta Restaurant Group (including internet domain names and addresses) and proprietary rights relating to certain of our core menu offerings, we have no proprietary intellectual property.

Continued Commitment to Strong Governance

We declassified our board of directors so that beginning at our 2019 Annual Meeting of Stockholders, our entire board of directors stands for re-election for a one-year term. Additionally, in 2018, our board of directors adopted a mandatory maximum age of 75 for any director nominee.

Government Regulation

Various federal, state and local laws affect our business, including various health, sanitation, fire and safety standards. Restaurants to be constructed or reimaged are subject to state and local building code and zoning requirements. In connection with the development and reimagining of our restaurants, we may incur costs to meet certain federal, state and local regulations, including regulations promulgated under the Americans with Disabilities Act.

We are subject to the federal Fair Labor Standards Act and various other federal and state laws governing employment matters. While we pay, on average, rates that are above the federal minimum wage, and where applicable, state minimum wage, increases in those minimum wages have in the past increased wage rates at our restaurants and in the future will affect our labor costs. We are also subject to provisions of the comprehensive federal health care reform law. We anticipate that a combination of labor management, cost reduction initiatives, technology and menu price increases can materially offset the potential increased costs associated with future regulations.

Pollo Tropical is subject to alcoholic beverage control regulations that require state, county or municipal licenses or permits to sell alcoholic beverages at each restaurant location that sells alcoholic beverages. Typically, licenses must be renewed every one to two years and may be revoked or suspended for cause at any time. Licensing entities, authorized with law enforcement authority, may issue violations and conduct audits and investigations of the restaurant's records and procedures. Alcoholic beverage control regulations relate to numerous aspects of the daily operations of our restaurants including minimum age for consumption, certification requirements for employees, hours of operation, advertising, wholesale purchasing, inventory control and handling, storage and dispensing of alcoholic beverages. These regulations also prescribe certain required banking and accounting practices related to alcohol sales and purchasing. Our restaurants are subject to state "dram-shop" laws. Dram-shop laws provide a person injured by an intoxicated person the right to recover damages from an establishment that wrongfully served alcoholic beverages to the intoxicated or minor patron. We have specific insurance that covers claims arising under dram-shop laws. However, we cannot ensure that this insurance will be adequate to cover any claims that may be instituted against us.

Human Capital Management

As of January 1, 2023, we employed approximately 4,350 persons, of which approximately 100 were corporate and administrative personnel and approximately 4,250 were restaurant operations and other supervisory personnel. None of our employees are covered by collective bargaining agreements and we consider that overall relations with our employees are favorable.

Culture, Values & Diversity, Equity & Inclusion

At Fiesta, we are in the business of inclusive hospitality. We strive to create diverse, respectful spaces where innovation can thrive, where being courageous is rewarded, and where treating each other like family is a core value.

These qualities have supported nearly 35 years of successful operations for our Pollo Tropical brand. We believe that the investments we are making in our employees, our restaurants, and our communities will contribute to our continued success in the restaurant business.

As of January 1, 2023, approximately 60% of our U.S.-based employee population identified as female and approximately 93% of our U.S. based employee population is comprised of racial and ethnic minorities. In addition, approximately 40% of our executive officers are female and approximately 40% are racial and ethnic minorities. Furthermore, approximately 60% of the restaurant field management of our restaurant brands identified as female and more than approximately 85% of this group is comprised of racial and ethnic minorities.

As a truly diverse organization, we foster a culture of inclusion that helps to remove some of the barriers to workplace entry and professional development that diverse groups might face. We provide opportunities for career progression through the training and development investments we make. Many of our field managers started as hourly team members and have had the opportunity to move up and become managers and supervisors at the corporate level. We believe in developing and promoting from within and in 2022 promoted approximately 175 employees to management or leadership roles.

We are committed to enhancing equality in ongoing career advancement for women and minorities through targeted education and development programs. Relevant initiatives include:

- Ongoing assessment and management of our talent pipeline to support the career progression of high-potential women and minorities;
- Well defined Career Path Programs for hourly employees to advance to management;
- Cultural and Compliance training for all our employees; and
- Creation of the Fiesta Women's Forum.

Total Rewards

We believe rewarding our employees for their hard work and commitment starts with pay. We pay, on average, rates that are above the federal and applicable state minimum wage. In addition to their fixed salary, restaurant and district managers are compensated with an incentive bonus, based upon the performance of the restaurants under their supervision. Additionally, in 2021 and 2022 in response to emerging and continuing labor challenges, we examined our overall hourly compensation and benefits programs and adjusted our wages to reflect the broader market changes. We understand the importance of offering our employees benefits for all aspects of their lives and have added additional benefits in response to our employees' needs consistent with this broader philosophy in 2021 and 2022. Through our benefits program we hope to provide our employees with the stability they need to succeed not only in their careers, but in their personal lives as well. Benefits offered to all corporate employees, who work more than 24 hours per week include paid time-off programs including holiday, personal, vacation (adjusted in 2021 to accrue on monthly basis within 90 days of an employee's start date), family leave, commuter benefits, emergency child care, and volunteer time and retirement savings plan with company match. Additionally, all employees are eligible for assistance through our non-profit, Fiesta Family Foundation, which provides assistance to our employees who have personally suffered losses or other hardships.

Training and Development

We maintain a comprehensive training and development program for all our restaurant employees and provide both classroom and in-restaurant training for our salaried and hourly team members. Technology enhancements, expansion of leadership development curriculum and proven e-learning courses complement our Learning Management System platform to focus our team members on system-wide operating procedures by position, food preparation methods and guest service standards.

We have developed a comprehensive management training program, complemented by active coaching and dedicated field training manager supervision for all new managers. During the new manager onboarding process, we customize an intensive, self-paced ongoing development program designed to prepare each employee for the next level of management. The onboarding period also includes robust classroom training with an emphasis on skill and competency building.

In 2022, we expanded and enhanced our operations management training curriculum to include additional leadership effectiveness development with a focus on best practices for restaurant team talent development and coaching and change management. The enhanced leadership training will be continued in 2023 across all levels of operations management.

Management Structure

We conduct substantially all of our operations, training, marketing, real estate, facilities and culinary research and development support functions from our Pollo Tropical division headquarters in Miami, Florida. Our executive management functions are primarily conducted from our offices in Dallas, Texas, and Miami, Florida. Our management team is led by Dirk Montgomery who is currently serving as our Interim Chief Executive Officer and who served as our Senior Vice President, Chief Financial Officer and Treasurer until December 8, 2022, Louis DiPietro who serves as our Senior Vice President, Chief Legal and People Officer and Corporate Secretary, Hope Diaz who serves as our Senior Vice President and Chief Marketing Officer and Tyler Yoesting who serves as our Vice President, Corporate Controller and Chief Accounting Officer and who is currently serving as Acting Chief Financial Officer.

Availability of Information

We file annual, quarterly and current reports and other information with the SEC. The SEC maintains an internet site that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC. The address of that site is <http://www.sec.gov>.

We make available free of charge through our internet website (www.frgi.com) our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after electronically filing such material with the SEC. The references to our website address and the SEC's website address are textual references only, meaning that they do not constitute incorporation by reference of the information contained on those websites and should not be considered part of this document. In addition, at our website you may also obtain, free of charge, copies of our corporate governance materials, including the charters for the committees of our board of directors and copies of various corporate policies including our Code of Business Ethics and Conduct, Code of Ethics for Executives and our "Whistle Blower" policy.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described below, as well as other information and data included in this Annual Report on Form 10-K. The risks and uncertainties described below are those that we have identified as material, but are not the only risks and uncertainties we face. Our business is also subject to general risks and uncertainties that affect many other companies, including overall economic and industry conditions. Additional risks and uncertainties not currently known to us or that we currently believe are not material also may impair our business, consolidated financial condition and results of operations.

Risks Related to Our Business

The market in which we compete is highly competitive, and we may not be able to compete effectively.

The restaurant industry is highly competitive. In each of our markets, our restaurants compete with a large number of national and regional restaurant chains, as well as locally owned restaurants, offering low- and medium-priced fare. We also compete with delivered meal solutions, convenience stores, grocery stores and other restaurant retailers, including “ghost” or dark kitchens, where meals are prepared at separate premises rather than at a restaurant. Competition from food delivery services has also increased in recent years, particularly during and following COVID-19.

Pollo Tropical’s competitors include national and regional chicken-based concepts as well as other types of quick-service and fast-casual restaurants. Many of our competitors or potential competitors have greater financial and other resources than we do, which may allow them to react to changes in pricing, marketing, and trends in the restaurant industry more quickly or effectively than we can. Additionally, to remain competitive, we have increasingly offered selected food items and combination meals at discounted prices. These pricing and other marketing strategies have had, and in the future may have, a negative impact on our sales and earnings. If our marketing efforts are unsuccessful, or if our restaurants are unable to compete effectively, our operations and financial performance could be adversely impacted.

Factors applicable to the quick-service and fast-casual restaurant segments may adversely affect our results of operations, which may cause a decrease in earnings and revenues.

The quick-service and fast-casual restaurant segments are highly competitive and can be materially adversely affected by many factors, including:

- Changes in local, regional or national economic conditions;
- Inflation;
- Changes in demographic trends;
- Changes in consumer tastes;
- Changes in traffic patterns;
- Increases in fuel prices and utility costs;
- Consumer concerns about health, diet and nutrition;
- Instances of food-borne or localized illnesses or other food safety issues;
- Increases in the number of, and particular locations of, competing restaurants;
- Changes in discretionary consumer spending;
- Availability of key commodities such as beef, chicken, eggs and produce;
- Increases in the cost of key commodities, such as beef, chicken, eggs and produce as well as the cost of paper goods and packaging;
- The availability of hourly-paid employees and experienced restaurant managers including a decrease in the labor supply due to changes in immigration policy such as barriers for entry into, working in, or remaining in the United States;

- Increased labor costs, including higher wages, unemployment insurance, unionization of restaurant employees and overtime requirements;
- Increases in the cost of providing healthcare and related benefits to employees, including the impact of the Affordable Care Act;
- Costs related to remaining competitive and current with regard to new technologies in our restaurants such as loyalty programs, gift cards, online ordering and credit card security; and
- Regional weather conditions including hurricanes, windstorms and flooding, and other natural disasters.

Our continued growth depends on our ability to open and operate new restaurants profitably, which in turn depends on our continued access to capital, and newly developed restaurants may not perform as we expect and there can be no assurance that our growth and development plans will be achieved.

While we have limited the number of new restaurants which we plan to open in the near term, our continued growth still depends on our ability to develop additional Pollo Tropical restaurants. Development involves substantial risks, including the following:

- Developed restaurants that do not achieve desired revenue or cash flow levels or other operating and performance targets once opened;
- The inability to recruit and retain managers and other employees necessary to staff each new restaurant;
- Incurring substantial unrecoverable costs in the event a development project is abandoned prior to completion or a new restaurant is closed due to poor financial performance;
- Changes in general economic and business conditions;
- The inability to fund development;
- Increasing development costs or development costs that exceed budgeted amounts;
- Delays in completion of construction;
- The inability to obtain all necessary zoning and construction permits;
- The inability to identify, or the unavailability of, suitable sites on acceptable leasing or purchase terms; and
- Changes in governmental rules and regulations or enforcement thereof.

Our long-term development plans will require additional management, operational and financial resources. For example, we will be required to recruit managers and other personnel for each new restaurant. We cannot ensure that we will be able to manage our expanding operations effectively and our failure to do so could adversely affect our results of operations.

In addition, to maintain our competitive positioning and improve our sales and overall performance, we have launched an effort to improve our existing restaurants through remodels, upgrades and regular maintenance. If the costs associated with these activities are higher than projected, restaurants are closed for periods longer than anticipated or such remodels do not perform as forecasted, we may not realize an acceptable return on investment, which could have a negative effect on our results of operations.

Our ability to open new restaurants and to grow, as well as our ability to meet other anticipated capital needs, may depend on our continued access to external financing, including borrowing under our senior secured revolving credit facility, which we refer to as the “senior credit facility.” There can be no assurance that we will have access to the capital we need at acceptable terms or at all, which could materially adversely affect our business. In addition, while we do not currently have any borrowings under our senior credit facility, our need to manage our indebtedness levels to ensure continued compliance with financial leverage ratio covenants under our senior credit facility may reduce our ability to develop new restaurants.

Customer preferences and traffic could be adversely impacted by health concerns about certain food products, reports of food-borne illnesses or food safety issues, any of which could result in a decrease in demand for our products.

Customer preferences and traffic could be adversely impacted by health concerns or negative publicity about the consumption of particular food products, which could cause a decline in demand for those products and adversely impact our sales. Additionally, even with strong preventative controls and interventions, food safety risks cannot be completely eliminated in every restaurant as incidents of food-borne illnesses continue to occur in the restaurant industry and may result from the failure of restaurant employees or suppliers to follow our food safety policies and procedures, or from employees or guests entering our restaurant while ill and contaminating ingredients or surfaces. These problems, other food-borne illnesses (such as norovirus or hepatitis A), and injuries caused by the presence of foreign material could require us to temporarily close our restaurants. The occurrence of food-borne illnesses or food safety issues could also adversely affect the price and availability of affected ingredients, resulting in higher costs and a decrease in customer traffic to our restaurants. Furthermore, any instances of food contamination, whether or not at our restaurants, could subject us or our suppliers to a food recall pursuant to the United States Food and Drug Administration's Food Safety Modernization Act.

Instances or reports, whether verified or not, of food-safety issues, such as food-borne illnesses, food tampering, food contamination or mislabeling, either during growing, manufacturing, packaging, storing or preparation, have in the past severely injured the reputations of companies in the food processing, grocery and quick-service and fast-casual restaurant sectors and could affect us as well. Any report linking us to food-borne illnesses or food tampering, contamination, mislabeling or other food-safety issues could damage our brand value and severely hurt sales of our food products and possibly lead to product liability claims, litigation (including class actions) or damages.

An increase in food costs, including those caused by inflation, climate change, the COVID-19 pandemic, and global conflicts, could adversely affect our operating results.

Supply chain risk could increase our costs and limit the availability of ingredients and supplies important to the operation of our restaurants. Changes in the cost or availability of certain food products could affect our ability to offer a broad menu and maintain competitive prices and could materially adversely affect our profitability and reputation. The type, variety, quality and cost of produce, beef, poultry, cheese and other commodities can be subject to change and to factors beyond our control, including weather, governmental regulation, availability, seasonality and industry demand, each of which may affect our food costs or cause a disruption in our supply. We may not be able to anticipate and react to changing food costs through our purchasing practices and menu price adjustments in the future, and failure to do so could negatively impact our revenues and results of operations. Although we utilize a number of planning strategies to mitigate our risk, such as purchasing contracts to lock in the prices for a material portion of the food commodities used in our restaurants, these strategies may not fully insulate us from increases in commodity costs, which could adversely impact our profitability. We do not use financial instruments to hedge our risk against market fluctuations in the price of commodities at this time.

We could also be adversely affected by price increases specific to ingredients we have chosen due to their specific quality profile or related criteria, the markets for which are generally smaller and more concentrated than the markets for other commodity food products.

If a significant disruption in service or supply by any of our suppliers or distributors were to occur, it could create disruptions in the operations of our restaurants, which could have a material adverse effect on our business.

Our restaurants depend on frequent deliveries of ingredients and other products. For our Pollo Tropical restaurants, we have service agreements with our primary distributors of food and paper products. Performance Food Group, Inc., is our primary distributor of food and beverage products and supplies for our Pollo Tropical restaurants under a distribution services agreement that expires on July 27, 2024. We also currently rely on three suppliers for chicken for our Pollo Tropical restaurants under agreements that expire on December 31, 2023. There are many factors which could cause shortages or interruptions in the supply of our ingredients and products, including adverse weather, unanticipated demand, labor or distribution problems, food safety issues by our suppliers or distributors, cost, and the financial health of our suppliers. If we cannot replace or engage distributors or suppliers who meet our specifications in a short period of time, this could increase our expenses and cause shortages of food and other items at our restaurants, which could cause a restaurant to remove items from its menu. If such actions were to occur, customers could change their dining habits and affected restaurants could experience significant reductions in sales during the shortage or thereafter.

The success of our marketing programs and the impact of those of our competitors could have a material adverse effect on our results of operations and financial condition.

If our competitors increase spending on advertising and promotions, or our advertising and other marketing programs do not result in increased net sales or if the costs of advertising, media, or marketing increase greater than expected, or are less effective than our competitors, our profitability could be materially adversely affected.

Our inability or failure to recognize, respond to and effectively manage the accelerated impact of social media could have a material adverse impact on our business.

There has been a marked increase in the use of social media platforms and similar devices, including video-sharing, social networking, and gaming and messaging platforms, giving users immediate access to a broad audience, which has significantly increased the speed and scale of distribution of information to a broad audience of consumers and others. Many social media platforms immediately publish the content their subscribers and participants post, often without filters or checks on accuracy of the content posted. Information posted on such platforms at any time may be adverse to our interests or may be inaccurate, each of which may harm our performance, prospects, or business. The harm may be immediate without affording us an opportunity for redress or correction. The dissemination of information online could harm our business, prospects, financial condition, and results of operations, regardless of the information's accuracy.

Use of social media is an important element of our marketing efforts and many of our competitors are expanding their use of social media and new social media platforms are rapidly being developed, potentially making more traditional social media platforms obsolete. As a result, we need to continuously innovate and develop our social media strategies in order to maintain broad appeal with guests and brand relevance. As part of our marketing efforts, we expect to increasingly rely on social media platforms and internet-based communication platforms to attract and retain guests. We will also increase our investment in other digital marketing initiatives that allow us to reach our guests across multiple digital channels and build their awareness of, engagement with, and loyalty to our brands. These initiatives may not be successful, resulting in expenses incurred without the benefit of higher revenues, increased employee engagement or brand recognition. In addition, a variety of risks are associated with the use of social media, including the improper disclosure of proprietary information, negative comments about us, the association with influencers or online celebrities who become embroiled in controversy, platforms and business partners who experience challenges, exposure of personally identifiable information, fraud, or out-of-date information. The inappropriate use of social media vehicles by our guests or employees could increase our costs, lead to litigation or result in negative publicity that could damage our reputation.

Risks Related to Human Capital

If we are not able to hire, train, reward and retain qualified restaurant employees and/or appropriately maintain our workforce, our growth plan and profitability could be adversely affected.

We rely on our restaurant team members to consistently provide high-quality food and positive experiences to our guests. Staffing in our restaurants requires us to plan effectively. The market for qualified talent continues to be competitive and we must provide increasingly competitive wages, benefits and workplace conditions to retain qualified employees. We have experienced and may continue to experience challenges in recruiting and retaining restaurant employees and in maintaining full restaurant staffing in various locations, which has resulted and may continue to result in longer wait times for guest orders, temporary closures of the digital make line and decreased employee satisfaction. A shortage of qualified candidates who meet all legal work authorization requirements, our failure to recruit and retain new restaurant employees in a timely manner or higher than expected turnover levels could affect our ability to open new restaurants, maintain or grow sales at existing restaurants or meet our labor cost objectives. In addition, failure to adequately monitor and proactively respond to employee dissatisfaction could lead to poor guest satisfaction, higher turnover, litigation and unionization efforts, which could negatively impact our results of operations.

Increases in labor costs could adversely impact our operating results.

Given that labor is a primary component in the cost of operating our restaurants, our business has been and could continue to be adversely impacted by increased labor costs resulting from factors such as federal, state, or local laws related to prevailing wages or in other employee benefits costs (including costs associated with health insurance coverage or workers' compensation insurance) as well as higher wages and costs of other benefits necessary to attract, hire and retain employees at all levels in a highly competitive job market. Our ability to offset higher labor costs by increasing menu prices depends on the willingness of our guests to pay the higher prices and the perceived value of our meals relative to competitors. If competitive pressures or other factors prevent us from fully offsetting higher labor costs with increased menu prices, our profitability may decline which could adversely impact our operating results.

While our employees are not currently subject to a collective bargaining agreement, if a significant portion of our employees were to become unionized and covered by a collective bargaining agreement, our labor costs could increase. Potential changes in labor laws could increase the likelihood of some or all of our employees being subjected to greater organized labor influence, which could have an adverse effect on our business and operating results by imposing requirements that could potentially increase our costs.

Our failure to comply with various applicable federal and state employment and labor laws and regulations could have an adverse impact on our business.

Various federal and state labor laws govern the relationship with our employees and affect operating costs. These laws include employee classification as exempt/non-exempt for overtime and other purposes, minimum wage requirements, unemployment tax rates, workers' compensation rates, immigration status and other wage and benefit requirements. In addition, states in which we operate are considering or have already adopted new immigration laws or enforcement programs, and the U.S. Congress and Department of Homeland Security from time to time consider and may implement changes to federal immigration laws, regulations or enforcement programs as well. Some of these changes may increase our obligations for compliance and oversight, which could subject us to additional costs and make our hiring process more cumbersome, or reduce the availability of potential employees. Although we require all workers to provide us with government-specified documentation evidencing their employment eligibility, some of our employees may, without our knowledge, be unauthorized workers. We currently participate in the E-Verify program, an Internet-based, free program run by the United States government to verify employment eligibility, in states in which participation is required. However, use of the E-Verify program does not guarantee that we will properly identify all applicants who are ineligible for employment. Unauthorized workers are subject to deportation and may subject us to fines or penalties, and if any of our workers are found to be unauthorized we could experience adverse publicity that negatively impacts our brand and may make it more difficult for us to hire and keep qualified employees. Termination of a significant number of employees who are found to be unauthorized employees may disrupt our operations, cause temporary increases in our labor costs as we train new employees and result in additional adverse publicity. We could also become subject to fines, penalties and other costs related to claims that we did not fully comply with all recordkeeping obligations of federal and state immigration compliance laws.

Although we believe that compliance with these laws has not had a material adverse effect on our operations to date, we may experience material difficulties or failures with respect to compliance with such laws in the future. Complying with these laws and regulations subjects us to substantial expense and non-compliance could expose us to significant liabilities. For example, lawsuits have been filed against us in the past and may be filed against us in the future alleging violations of federal and state laws regarding employee wages and payment of overtime, meal and rest breaks, employee classification, employee record-keeping and related practices with respect to our employees. We may incur legal costs to defend any such lawsuits, and we could suffer losses from, these and similar cases, and the amount of such losses or costs could be significant.

In addition, the amount that we pay our restaurant employees will likely be impacted by minimum wage laws. To the extent implemented, federal, state, and local proposals that increase minimum wage requirements or mandates or impact other employee matters could, to the extent implemented, materially increase our labor and other costs. For example, the state of Florida recently approved a minimum wage increase effective in September of 2021 which will increase the minimum wage gradually over a period of five years. Our ability to respond to minimum wage increases by increasing menu prices depends on the willingness of our guests to pay higher prices and recognize our perceived value relative to competitors. Our distributors and suppliers could also be affected by higher minimum wage, benefit standards and compliance costs, which could result in higher costs for goods and services supplied to us.

Additionally, while our employees are not currently covered by any collective bargaining agreements, union organizers may in the future organize our employees and those of other restaurant companies. If a significant portion of our employees were to become covered by collective bargaining agreements, our labor costs could increase, and it could negatively impact our culture and reduce our flexibility to attract and retain top performing employees. Labor unions have attempted, and likely will continue to attempt, to attract media attention to their organizing efforts in our restaurants, and their organizing efforts may include claims that we mistreat or undervalue our employees. Despite our efforts to provide more accurate information about our policies and practices, these messages may dissuade guests from patronizing our restaurants and could adversely impact our results of operations.

Cybersecurity Risks

Cybersecurity breaches or other privacy or data security incidents that expose confidential guest, personal employee and other material, confidential information that is stored in our systems in connection with our electronic processing of credit and debit card transactions or security breaches of confidential employee information that is stored in our systems or by third parties on our behalf may adversely affect our business.

We rely heavily on information technology systems across our operations, including point-of-sale processing in our restaurants, gift and loyalty cards, online business, and various other processes and transactions. Our ability to effectively manage our business and coordinate the preparation and sale of our products depends significantly on the reliability and capacity of these systems. We expect to expand our utilization of technology throughout our business and the failure of these systems to operate effectively, problems with transitioning to upgraded or replacement systems, or a breach in security of these systems could cause reduced efficiency of our operations, and significant capital investments could be required to remediate the problem which could adversely affect our business. Any intentional attack or an unintentional event that results in unauthorized access to systems to disrupt operations, corrupt data or steal or expose confidential information or intellectual property that compromises the information of our guests or employees could result in widespread negative publicity, damage to our reputation, a loss of guests, disruption of our business and legal liabilities. As our reliance on technology has grown, the scope and severity of risks posed to our systems from cybersecurity threats has increased. The techniques and sophistication used to conduct cyber-attacks and breaches of information technology systems, as well as the sources and targets of these attacks, change frequently and are often not recognized until attacks are launched or have been in place for a period of time. We continuously monitor and develop our information technology networks and infrastructure to prevent, detect, address and mitigate the risk of unauthorized access, misuse, malware and other events that could have a security impact; however there can be no assurance that these measures will be effective.

A significant amount of our restaurant sales are by credit or debit cards. Other restaurants and retailers have experienced security breaches in which credit and debit card information of their guests has been stolen. We may in the future become subject to lawsuits or other proceedings for purportedly fraudulent transactions arising out of the actual or alleged theft of our guests' credit or debit card information. Any such claim or proceeding, or any adverse publicity resulting from these allegations, may have a material adverse effect on us and our restaurants.

From time to time we have been, and likely will continue to be, the target of cybersecurity and other security threats. We may in the future become subject to other legal proceedings or governmental investigations for purportedly fraudulent transactions arising out of the actual or alleged theft of our consumers' credit or debit card information or if consumer or employee information is obtained by unauthorized persons or used inappropriately. Any such claim or proceeding, or any adverse publicity resulting from such an event, may have a material adverse effect on our business and we may incur significant remediation costs.

If we fail to comply with privacy and data protection laws, we could be subject to government enforcement actions, private litigation and adverse publicity.

A cybersecurity breach also could result in a violation of applicable privacy and other laws, and subject us to private consumer, business partner, or securities litigation and governmental investigations and proceedings, any of which could result in our exposure to material civil or criminal liability. For example, many jurisdictions have adopted regulations which require companies to meet certain requirements regarding the handling of personal data and provide a private right of action for data breaches. These laws also typically require companies that process information on customers to make new disclosures to consumers about their data collection, use and sharing practices, allow consumers to opt out of certain data sharing with third parties and the right for consumers to request deletion

of personal information. If we become subject to such laws in the markets in which we operate and we fail, or are perceived to have failed, to properly respond to security breaches of our or third party's information technology systems or fail to properly respond to consumer requests under such laws, we could experience reputational damage, adverse publicity, loss of consumer confidence, reduced sales and profits, complications in executing our growth initiatives and regulatory and legal risk, including criminal penalties or civil liabilities.

Compliance with current and future applicable privacy, cybersecurity and related laws can be costly and time-consuming. We make significant investments in technology, third-party services and internal personnel to develop and implement systems and processes that are designed to anticipate cyber-attacks and to prevent or minimize breaches of our information technology systems or data loss, but these security measures cannot provide assurance that we will be successful in preventing such breaches or data loss. In addition, media or other reports of existing or perceived security vulnerabilities in our systems or those of our third-party business partners or service providers can also adversely impact our brand and reputation and materially impact our business, even if no breach has been attempted or has occurred.

The regulatory environment related to privacy and data security is changing at an ever-increasing pace, with new and increasingly rigorous requirements applicable to our business. In addition, the issues regulated by privacy laws (such as advertising and marketing, children, biometric, employee, and health related information) have expanded, as have the number of city, state, federal and international governmental bodies and agencies that have recently passed or are currently considering privacy legislation or regulatory rulemaking. Where not limited by preemption, many states have passed or are considering adopting stricter versions of federal privacy laws (e.g., state level statutes similar to the Telephone Consumer Protection Act of 1991 ("TCPA"), the Health Insurance Portability and Accountability Act, and the Children's Online Privacy Protection Act of 1998 ("COPPA")). Private service providers also have implemented mandatory privacy requirements impacting businesses, like Pollo Tropical, that wish to utilize services available on their platforms. As a result, we face rapidly increasing compliance costs in order to modify our operations and business practices to comply with applicable laws, regulations and other requirements which may materially impact our business.

Our digital business, which we expect to grow as a percentage of sales, is subject to risks.

Since 2020, we continue to see an increase in the number of digital orders, which includes delivery and customer pickup. Depending on which ordering platform a digital order is placed — our platform or the platform of a third-party delivery service — the delivery fee we collect from the guest may be less than the actual delivery cost, which has a negative impact on our profitability. While we have implemented a menu price increase to partially offset higher delivery costs, this higher menu prices may cause some guests to shift their purchases to other restaurants offered on the platform. As our digital business grows, we are increasingly reliant on third-party delivery companies, which maintain control over data regarding guests that use their platform and over the customer experience. If a third-party delivery company driver fails to make timely deliveries or fails to deliver the complete order, our guests may attribute the bad customer experience to our brands and could stop ordering from us. The ordering and payment platforms used by these third-parties, or our mobile app or online ordering system, could be interrupted by technological failures, user errors, cyber-attacks or other factors, which could adversely impact sales through these channels and negatively impact our overall sales and reputation. The third-party delivery business is intensely competitive, with a number of players competing for market share, online traffic capital, and delivery drivers. If the third-party delivery companies we utilize cease or curtail operations, increase their fees, or give greater priority or promotions on their platforms to our competitors, our delivery business and our sales may be negatively impacted. The delivery business has been consolidating and may continue to consolidate, and fewer third-party delivery companies may give them more leverage in negotiating the terms and pricing of contracts, which could negatively impact our profits from delivery orders.

Economic Risks

Our business is regional, and we therefore face risks related to reliance on certain markets as well as risks for other unforeseen events.

As of January 1, 2023, all of our Company-owned Pollo Tropical restaurants were located in Florida. Furthermore, approximately two-thirds of our Company-owned Pollo Tropical restaurants were located in three counties in Florida which represents a significant amount of the brand's sales and Restaurant-level Operating Profit. Therefore, events and

conditions specific to these regions, including economic conditions, state and local government regulations, weather conditions or other conditions affecting Florida and the tourism industry in Florida may have a material impact on the success of our restaurants in those locations.

Adverse weather conditions have impacted, and could in the future impact, guest traffic at our restaurants, cause the temporary underutilization of outdoor patio seating and, in more severe cases such as hurricanes, tornadoes or other natural disasters, cause temporary closures, sometimes for prolonged periods, which would negatively impact our restaurant sales. Changes in weather could result in construction delays, interruptions to the availability of utilities, and shortages or interruptions in the supply of food items and other supplies, which could increase our costs and could adversely impact our business. Some climatologists predict that the long-term effects of climate change and global warming may result in more severe, volatile weather or extended droughts, which could increase the frequency and duration of weather impacts on our operations.

Economic downturns may adversely impact consumer spending patterns.

Our business is dependent to a significant extent on national, regional and local economic conditions, particularly those that affect our guests that frequently patronize our restaurants. In particular, where our business is subject to factors which could reduce our guests' disposable income (such as by job losses, credit constraints and higher housing, tax, utility, gas, consumer credit or other costs) or where the perceived wealth of guests has decreased (because of circumstances such as lower residential real estate values, lower investment values, increased foreclosure rates, increased tax rates, social unrest, or other economic disruptions and governmental, political and budget concerns), our restaurants have in the past experienced, and may in the future experience, lower sales and guest traffic as guests choose lower-cost alternatives or choose alternatives to dining out. The resulting decrease in our guest traffic or average sales per transaction has had an adverse effect in the past, and could in the future have a material adverse effect, on our business.

Our expansion into new markets may present increased risks due to a lack of market awareness of our brands.

We have encountered and may continue to encounter difficulties developing restaurants outside of our more mature core markets. For example, we closed all Pollo Tropical restaurants in Texas, Tennessee and Georgia over the last four years. We may be unable to find attractive locations or successfully market our products as we attempt to expand beyond our existing markets, as the competitive circumstances and consumer characteristics in these new areas may differ substantially from those in areas in which we currently operate. It may be more challenging for us to attract guests to our restaurants in areas where there is a limited or a lack of market awareness of the Pollo Tropical brand. Restaurants opened in new markets where we have not reached media efficiency may open at lower sales volumes than restaurants opened in more mature markets, and may have lower restaurant-level operating margins than more mature markets. Sales at restaurants opened in new markets that are not yet media efficient have taken and may continue to take longer to reach average restaurant sales volumes, if at all, thereby adversely affecting our operating results, including the recognition of future impairment charges. Opening new restaurants in areas in which potential guests may not be familiar with our restaurants may include costs related to the opening and marketing of those restaurants that are substantially greater than those incurred by our restaurants in other areas. Even though we may incur substantial additional costs with respect to these new restaurants, they may attract fewer guests than our more established restaurants in existing markets. We may also not open a sufficient number of restaurants in new markets to adequately leverage distribution, supervision and marketing costs. As a result of the foregoing, we cannot ensure that we will be able to operate our new restaurants successfully or profitably outside our existing markets.

Changes in accounting standards or the recognition of impairment or other charges may adversely affect our future results of operations.

New accounting standards or changes in financial reporting requirements, accounting principles or practices, including with respect to our critical accounting estimates, could adversely affect our future results. We may also be affected by the nature and timing of decisions about underperforming markets or assets, including decisions that result in impairment or other charges that reduce our earnings. In assessing the recoverability of our long-lived assets, we consider changes in economic conditions and make assumptions regarding estimated future cash flows and other factors. These estimates are highly subjective and can be significantly impacted by many factors such as global and local business and economic conditions, operating costs, inflation, competition, and consumer and demographic

trends. If our estimates or underlying assumptions change in the future, we may be required to record impairment charges. If we experience any such changes, they could have a significant adverse effect on our reported results for the affected periods.

Legal Risks

Government regulation could adversely affect our financial condition and results of operations.

In connection with the operation of our business, we are subject to extensive federal, state, local, and foreign laws and regulations that are complex and vary from location to location, including those related to:

- Franchise relationships;
- Building construction and zoning requirements;
- Nutritional content labeling and disclosure requirements;
- Management and protection of the personal data of our employees and customers; and
- Environmental matters.

Our restaurants are licensed and subject to regulation under federal, state, local and foreign laws, including business, health, fire, sales of alcohol and safety codes. For example, we are subject to the U.S. Americans with Disabilities Act, or ADA, and similar state laws that give civil rights protections to individuals with disabilities in the context of employment, public accommodations and other areas.

In addition, new government initiatives or changes to existing laws, such as the adoption and implementation of national, state, or local government proposals relating to increases in minimum wage rates, may increase our costs of doing business and adversely affect our results of operations.

If one of our employees sells alcoholic beverages to an intoxicated patron or to a minor, we may be liable to third parties for the acts of the patron or incur significant fines or penalties.

We serve alcoholic beverages at our restaurants and are subject to the “dram-shop” statutes of the jurisdictions in which we serve alcoholic beverages. “Dram-shop” statutes generally provide that serving alcohol to an intoxicated patron is a violation of the law.

In most jurisdictions, if one of our employees sells alcoholic beverages to an intoxicated patron we may be liable to third parties for the acts of the patron. We cannot guarantee that those patrons will not be served or that we will not be subject to liability for their acts. Our liquor liability insurance coverage may not be adequate to cover any potential liability and insurance may not continue to be available on commercially acceptable terms or at all, or we may face increased deductibles on such insurance. A significant dram-shop claim or claims could have a material adverse effect on us as a result of the costs of defending against such claims, paying deductibles and increased insurance premium amounts, implementing improved training and heightened control procedures for our employees, and paying any damages or settlements on such claims.

Additionally, we are subject to statutes of the jurisdictions in which we serve alcoholic beverages which prohibit us from selling or serving alcohol to minor patrons. These statutes generally provide that serving or selling alcohol to minors is a violation of the law, and will result in fines and other penalties including the suspension or loss of our license to sell alcohol in the future. If we were to incur a significant number of sale to minor violations the fines or penalties could have a material adverse effect on us.

We may incur significant liability or reputational harm if claims are brought against us or against our franchisees.

We or our franchisees may be subject to complaints, regulatory proceedings or litigation from guests or other persons alleging food-related illness, injuries suffered on our premises or other food quality, health, or operational concerns, including environmental claims. In addition, in recent years a number of restaurant companies have been subject to lawsuits, including class action lawsuits, alleging, among other things, violations of federal and state law regarding workplace and employment matters, discrimination, harassment, wrongful termination and wage, rest break, meal break and overtime compensation issues and, in the case of certain restaurants, alleging that they have

failed to disclose the health risks associated with high-fat or high sodium foods and that their marketing practices have encouraged obesity. We may also be subject to litigation or other actions initiated by governmental authorities, our employees and our franchisees, among others, based upon these and other matters. Adverse publicity resulting from such allegations or occurrences or alleged discrimination or other operating issues stemming from one of our locations, a number of our locations or our franchisees could adversely affect our business, regardless of whether the allegations are true, or whether we are ultimately held liable. Any cases filed against us could materially adversely affect us if we lose such cases and have to pay substantial damages or if we settle such cases. In addition, any such cases may materially and adversely affect our operations by increasing our litigation costs and diverting our attention and resources to address such actions. In addition, if a claim is successful, our insurance coverage may not cover or be adequate to cover all liabilities or losses and we may not be able to continue to maintain such insurance, or to obtain comparable insurance at a reasonable cost, if at all. If we suffer losses, liabilities or loss of income in excess of our insurance coverage or if our insurance does not cover such loss, liability or loss of income, there could be a material adverse effect on our results of operations.

Our franchisees or licensees could take actions that harm our reputation.

As of January 1, 2023, a total of 32 Pollo Tropical restaurants were owned and operated by our franchisees and licensees. We do not exercise control of the day-to-day operations of our franchisees and licensees and the number of franchised or licensed restaurants may increase in the future. While we attempt to ensure that franchisee-owned and licensee-owned restaurants maintain the same high operating standards as our Company-owned restaurants, one or more of these franchisees or licensees may fail to meet these standards. Any shortcomings at our franchisee-owned and licensee-owned restaurants could be attributed to our company as a whole and could adversely affect our reputation and damage our brands.

Federal, state and local environmental regulations relating to the use, storage, discharge, emission and disposal of hazardous materials could expose us to liabilities, which could adversely affect our results of operations.

We are subject to a variety of federal, state and local environmental regulations relating to the use, storage, discharge, emission and disposal of hazardous substances or other regulated materials, release of pollutants into the air, soil and water, and the remediation of contaminated sites.

Failure to comply with environmental laws could result in the imposition of fines or penalties, restrictions on operations by governmental agencies or courts of law, as well as investigatory or remedial liabilities and claims for alleged personal injury or damages to property or natural resources. Some environmental laws impose strict, and under some circumstances joint and several, liability for costs of investigation and remediation of contaminated sites on current and prior owners or operators of the sites, as well as those entities that send regulated materials to the sites. We cannot ensure that we have been or will be at all times in complete compliance with such laws, regulations and permits. Therefore, our costs of complying with current and future environmental, health and safety laws could adversely affect our results of operations.

Major developments on trade relations could have a material adverse effect on our business.

The current political climate has introduced uncertainty with respect to trade policies, tariffs and government regulations impacting trade between the United States and other countries. We source several of our ingredients, paper products and other materials used within our business from suppliers outside of the United States, including Asia, Central America and Mexico.

Significant developments in trade relations, such as the imposition of tariffs on items imported by us, could increase our costs and materially and adversely affect our consolidated financial results.

We are subject to all of the risks associated with leasing property subject to long-term non-cancelable leases.

The leases for our restaurant locations generally have initial terms of 10 to 20 years, and typically provide for renewal options in five-year increments as well as for rent escalations. Generally, our leases are “net” leases, which require us to pay all of the costs of insurance, taxes, maintenance and utilities. We generally cannot cancel these leases. Additional sites that we lease are likely to be subject to similar long-term non-cancelable leases.

From time to time we have, and may in the future, close or relocate a restaurant if a current location becomes less profitable as a result of adverse economic conditions or other factors. If the closures continue for a long period of time, we may not be able to recover our investment due to the high rental rates. Because substantially all of our restaurants operate in leased facilities, we may incur significant lease termination expenses when we close or relocate a restaurant and are often obligated to continue rent and other lease related payments after restaurant closure. We also may incur significant asset impairment and other charges in connection with closures and relocations. If the lease termination cost is significant, we may decide to keep underperforming restaurants open. Ongoing lease obligations at closed or underperforming restaurant locations could decrease our results of operations. In addition, as each of our leases expire, we may fail to negotiate renewals, either on commercially acceptable terms or at all, which could cause us to close restaurants in desirable locations which could adversely affect our results of operations.

Our failure or inability to enforce our trademarks or other proprietary rights could adversely affect our competitive position or the value of our brand.

We own certain common law trademark rights and a number of federal and international trademark and service mark registrations, including the Pollo Tropical name and logo, and proprietary rights relating to certain of our core menu offerings. We believe that our trademarks, service marks, trade dress and other proprietary rights are important to our success and our competitive position. We, therefore, devote appropriate resources to the protection of our trademarks and proprietary rights. If our efforts to protect our intellectual property are inadequate or if any third party misappropriates or infringes on our intellectual property either in print or on the internet, the value of our brands may be harmed which could have a material adverse effect on our business. We are aware of restaurants in foreign jurisdictions using menu items, logos or branding that we believe are based on our intellectual property and our ability to prevent these restaurants from using these elements may be limited in jurisdictions in which we are not operating. This could have an adverse impact on our ability to expand into other jurisdictions in the future.

We are not aware of any assertions that our trademarks or menu offerings infringe upon the proprietary rights of third parties, but we cannot ensure that third parties will not claim infringement by us in the future. Any such claim, whether or not it has merit, could be time-consuming, result in costly litigation, cause delays in introducing new menu items in the future or require us to enter into royalty or licensing agreements. As a result, any such claim could have a material adverse effect on our business, results of operations and financial condition.

Our senior credit facility restricts our ability to engage in some business and financial transactions.

Our senior credit facility restricts our ability in certain circumstances to, among other things:

- Incur additional debt;
- Pay dividends and make other distributions on, redeem or repurchase, capital stock;
- Make investments or other restricted payments;
- Enter into transactions with affiliates;
- Sell all, or substantially all, of our assets;
- Create liens on assets to secure debt; or
- Effect a consolidation or merger.

These covenants limit our operational flexibility and could prevent us from taking advantage of business opportunities as they arise, growing our business or competing effectively which could adversely impact our business. In addition, our senior credit facility requires us to maintain specified financial ratios and satisfy other financial condition tests. Our ability to meet these financial ratios and tests can be affected by events beyond our control, and we cannot ensure that we will meet these tests.

Risks Related to Our Common Stock

We do not expect to pay any cash dividends for the foreseeable future, and our senior credit facility limits our ability to pay dividends to our stockholders.

We do not anticipate that we will pay any cash dividends to holders of our common stock in the foreseeable future. The absence of a dividend on our common stock may increase the volatility of the market price of our common stock or make it more likely that the market price of our common stock will decrease in the event of adverse economic conditions or adverse developments affecting our company. Our senior credit facility limits, and the debt instruments that we and our subsidiaries may enter into in the future may limit, our ability to pay dividends to our stockholders.

If securities analysts do not publish research or reports about our business or if they downgrade our stock, the price of our stock could decline.

The trading market for our common stock will rely in part on the research and reports that industry or financial analysts publish about us or our business. We cannot ensure that these analysts will publish research or reports about us or that any analysts that do so will not discontinue publishing research or reports about us in the future. If one or more analysts who cover us downgrade our stock, our stock price could decline rapidly. If analysts do not publish reports about us or if one or more analyst ceases coverage of our stock, we could lose visibility in the market, which in turn could cause our stock price to decline.

Percentage ownership of our common stock may be diluted in the future.

Percentage ownership of our common stock may be diluted in the future because of equity awards that we expect will be granted to our directors, officers and employees. The Fiesta Restaurant Group, Inc. 2021 Stock Incentive Plan (and any successor stock incentive plan that we may adopt) provides for the grant of equity-based awards, including restricted stock, restricted stock units, stock options, and other equity-based awards to our directors, officers and other employees, advisors and consultants. In addition, in the future we may also issue common stock or other securities to raise additional capital. Any new shares issued would dilute our existing shareholders.

Proxy contests threatened or commenced against us could be disruptive and costly, and adversely affect our business, operation results and financial condition.

Stockholders may from time to time attempt to effect changes, engage in proxy solicitations or advance stockholder proposals. Responding to proxy contests and related actions by activist stockholders can be costly and time-consuming, disrupt our operations, and divert the attention of our management and employees away from their regular duties and the pursuit of our business strategies, which could materially and adversely affect our business, operating results and financial conditions. Perceived uncertainties as to our future direction as a result of proxy contests and related actions by activist stockholders may lead to the perception of a change in the direction of our business, instability or lack of continuity. This may affect our relationship with current or potential suppliers, vendors, and other third parties, and make it more difficult to attract and retain management employees and executives which could adversely affect our business, operating results and financial condition. Further, proxy contests and related actions by activist stockholders could cause significant fluctuations in our stock price based on temporary or speculative market perceptions or other factors that do not necessarily reflect the underlying fundamentals and prospects of our business.

Provisions in our restated certificate of incorporation and amended and restated bylaws or Delaware law might discourage, delay or prevent a change of control of our company or changes in our management and, therefore, depress the trading price of our common stock.

Delaware corporate law and our restated certificate of incorporation and amended and restated bylaws contain provisions that could discourage, delay or prevent a change in control of our company or changes in our management that the stockholders of our company may deem advantageous. These provisions:

- Require that special meetings of our stockholders be called only by our board of directors or certain of our officers, thus prohibiting our stockholders from calling special meetings;
- Deny holders of our common stock cumulative voting rights in the election of directors, meaning that stockholders owning a majority of our outstanding common stock will be able to elect all of our directors;

- Authorize the issuance of “blank check” preferred stock that our board could issue to dilute the voting and economic rights of our common stock and to discourage a takeover attempt;
- Provide the approval of our board of directors or a supermajority of stockholders is necessary to make, alter or repeal our amended and restated bylaws and that approval of a supermajority of stockholders is necessary to amend, alter or change certain provisions of our restated certificate of incorporation;
- Establish advance notice requirements for stockholder nominations for election to our board or for proposing matters that can be acted upon by stockholders at stockholder meetings; and
- Require that any action required or permitted to be taken by our stockholders must be effected at a duly called annual or special meeting of stockholders and may not be effected by any consent in writing.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

As of January 1, 2023, we leased all 137 of our Company-owned Pollo Tropical restaurants, which includes six restaurants located in in-line or storefront locations. All but one of our restaurants offer the convenience of drive-thru windows. We typically enter into leases (including renewal options) ranging from 35 to 45 years. The average remaining term for all leases for operating restaurant properties, including renewal options, was approximately 24 years as of January 1, 2023. Generally, we have been able to renew leases, upon or prior to their expiration, at the prevailing market rates, although there can be no assurance that this will continue to occur.

Most leases require us to pay utility and water charges and real estate taxes. Certain leases also require contingent rentals based upon a percentage of gross sales of the particular restaurant that exceed specified minimums. In some of our mall locations, we are also required to pay certain other charges such as a pro-rata share of the mall’s common area maintenance costs, insurance and security costs.

As of January 1, 2023, we had 40 closed restaurant properties subleased to third parties and three closed restaurant properties available for sublease or to be terminated.

In addition to the restaurant locations, we lease approximately 21,000 square feet at 14800 Landmark Boulevard, Suite 500, Dallas, Texas which houses some of our executive offices and certain of our administrative functions. We also lease approximately 19,500 square feet at 7255 Corporate Center Drive, Miami, Florida, which houses some of our executive offices and administrative operations for our Pollo Tropical restaurants.

ITEM 3. LEGAL PROCEEDINGS

We are a party to various litigation matters incidental to the conduct of business. We do not believe that the outcome of any of these matters will have a material adverse effect on our business, results of operations or financial condition.

ITEM 4. MINE SAFETY DISCLOSURES

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock trades on The NASDAQ Global Select Market under the symbol "FRGI". On February 24, 2023, shares of our common stock outstanding were held by 407 holders of record. This excludes persons whose shares are held by a brokerage house or clearing agency.

Dividends

We did not pay any cash dividends during 2022 or 2021. We do not anticipate paying any cash dividends on our common stock in the foreseeable future. We currently intend to retain the majority of available funds to fund the development and growth of our business or to use for other corporate related purposes. In addition, we are a holding company and conduct all of our operations through our direct and indirect subsidiaries. As a result, for us to pay dividends, we need to rely on dividends and distributions to us from our subsidiaries. Our senior credit facility limits, and debt instruments that we and our subsidiaries may enter into in the future may limit, our ability to pay dividends to our stockholders.

Stock Performance Graph

The following performance graph compares our cumulative total stockholder return on our common stock with the cumulative total returns of The NASDAQ Composite Index and a peer group, The S&P Small Cap 600 Restaurant Index. We have elected to use the S&P Small Cap 600 Restaurant Index in compiling our stock performance graph because we believe that index represents a comparison to competitors with similar market capitalization as us. The graph and table below assume that \$100 was invested on December 31, 2017, with dividends reinvested quarterly.

The trading price of our common stock on December 31, 2017, was \$19.00 and the closing price of our common stock on December 30, 2022, the last trading day before our fiscal year end date of January 1, 2023, was \$7.35.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Fiesta Restaurant Group, the NASDAQ Composite Index
and the S&P 600 Restaurants Index

*\$100 invested on 12/31/17 in stock or index, including reinvestment of dividends.
Indexes calculated on month-end basis.

Issuer Purchases of Equity Securities

During the years ended December 30, 2018, and December 29, 2019, our board of directors authorized the repurchase of an aggregate 3.0 million shares of our common stock through the following actions:

- 1.5 million shares of common stock were authorized for repurchase on February 26, 2018;
- An additional 0.5 million shares of common stock were authorized for repurchase on August 7, 2019; and
- An additional 1.0 million shares of common stock were authorized for repurchase on November 5, 2019.

Under the share repurchase program, shares may be repurchased from time to time in open market transactions at prevailing market prices, in privately negotiated transactions or by other means in accordance with federal securities laws, including Rule 10b-18 under the Securities Exchange Act of 1934, as amended. The number of shares repurchased and the timing of repurchases will depend on a number of factors, including, but not limited to, stock price, trading volume, general market and economic conditions, and other corporate considerations. The share repurchase program has no time limit and may be modified, suspended, superseded or terminated at any time by our board of directors.

The following table sets forth information with respect to the Company's repurchases of common stock during the quarter ended January 1, 2023:

Period	Total Number of Shares Purchased⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
October 3, 2022 to November 6, 2022	—	\$ —	—	137,462
November 7, 2022 to December 4, 2022	64,901	6.94	—	137,462
December 5, 2022 to January 1, 2023	39,200	7.35	—	137,462
Total	104,101	\$ 7.09	—	

- (1) Shares purchased in order to meet participants' tax withholding liability through net share settlement related to vesting of restricted stock awards.

ITEM 6. RESERVED

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of financial condition and results of operations ("MD&A") is written to help the reader understand our company. The MD&A is provided as a supplement to, and should be read in conjunction with, our audited consolidated financial statements and the accompanying notes. Any reference to restaurants refers to company-owned restaurants unless otherwise indicated.

We use a 52- or 53-week fiscal year ending on the Sunday closest to December 31. The fiscal years ended January 1, 2023 and January 2, 2022 each contained 52 weeks. The fiscal year ended January 3, 2021 contained 53 weeks. The next fiscal year to contain 53 weeks will be the fiscal year ending January 3, 2027.

Company Overview

We own, operate and franchise the restaurant brand Pollo Tropical®, which has nearly 35 years of operating history and a loyal customer base. Our Pollo Tropical restaurants feature fire-grilled and crispy citrus marinated chicken and other freshly prepared menu items. We believe the brand offers a distinct and unique flavor with broad appeal at a compelling value, which differentiates it in the competitive fast-casual and quick-service restaurant segments. All but one of our restaurants offer the convenience of drive-thru windows. As of January 1, 2023, we had 137 Company-owned Pollo Tropical restaurants, all of which are located in Florida.

We franchise our Pollo Tropical restaurants primarily in international markets, and as of January 1, 2023, we had 23 franchised Pollo Tropical restaurants located in Puerto Rico, Panama, Guyana, Ecuador, and the Bahamas, six on college campuses in Florida and locations at a hospital and two sports and entertainment stadiums in Florida. We have agreements for the continued development of franchised Pollo Tropical restaurants in certain of our existing franchised markets.

Events Affecting Our Results of Operations

Hurricanes Ian and Nicole

During the second half of 2022, Florida was struck by Hurricanes Ian and Nicole (the "Hurricanes"). In an effort to ensure the safety of our team members, select Pollo Tropical restaurants in the storm's path were closed in preparation and as a result of these Hurricanes. There was no significant facilities damage to Company-owned restaurants and we expect to file insurance claims upon completion of the final assessment of damages and losses.

Due to the business disruption related to the Hurricanes, the Company incurred expenses totaling \$0.5 million for spoiled inventory and for incremental labor costs from paying hourly employees for scheduled time not worked due to temporary restaurant closures. We estimate that the Hurricanes negatively impacted loss from operations by approximately \$1.8 million and negatively impacted comparable restaurant sales and transactions by approximately 0.8% and 0.6%, respectively, for the year ended January 1, 2023.

Labor Challenges and Inflationary Factors

Throughout much of 2022, labor supply shortages impacted the entire restaurant industry as well as our operations. Hours of operations were limited across multiple channels due to labor shortages. In response to this challenge, we increased recruiting resources and offered additional payment incentives at the most affected locations as well as new hire sign-on bonuses. In addition, we benchmark our operations team wage rates and benefits on an ongoing basis to ensure our total compensation is market-competitive and the 2022 and 2023 hourly wage rates are above the required minimum levels for the State of Florida. As a result of our efforts and as overall labor supply improved, our staffing levels improved and stabilized during the second half of 2022 which enabled an increase in operating hours across all channels. Overall staffing levels at the end of the fourth quarter of 2022 recovered to the approximate staffing levels experienced in the first half of 2021 prior to the labor supply issues, although a small number of select locations continue to experience labor shortages. As a result of the improved staffing levels, the remaining payment incentives are targeted to be phased out in the first quarter of 2023.

Inflationary factors have been experienced primarily in food costs and other operating costs categories. Commodity costs as a percentage of net sales increased 4.9% in the year ended January 1, 2023 compared to the year ended January 2, 2022. Utilities costs as a percentage of net sales also increased 0.4% in 2022 compared to 2021 primarily due to higher energy prices in 2022.

Pricing action has been taken to offset labor, food and other operating cost increases. In order to maintain value perceptions with our customers, we implemented a phased approach to menu price increases and took lower pricing increases on items purchased by value-conscious customers including our “Pollo Time” promotional items. Price increases include a 5.0% increase in March 2022, a 1.4% increase in June 2022, and a 4.0% increase in September 2022. As a result of this phased approach to menu price increases, margin improvement is trailing the impact of cost increases noted above, with improved margins expected in future quarters compared to the year ended January 1, 2023, barring unforeseen changes in our cost structure and operating environment.

COVID-19 Pandemic

The novel coronavirus (COVID-19) pandemic has affected and may continue to affect the restaurant industry and the economy. The impacts were most severe in 2020 and have improved over 2021 and 2022. Based on current conditions, we do not expect sales trends to significantly deteriorate further as a direct result of COVID-19. However, labor shortages may negatively impact sales trends and there can be no assurance that sales trends will not deteriorate further. We have implemented measures to control costs to mitigate any negative impact from the COVID-19 pandemic and labor shortages.

Executive Summary — Consolidated Operating Performance for the Year Ended January 1, 2023

Our fiscal year 2022 results include the following:

- We recognized net loss of \$(14.6) million, or \$(0.58) per diluted share, in 2022 compared to net income of \$10.4 million, or \$0.40 per diluted share in 2021, due primarily to the impact of income from discontinued operations of \$18.5 million in 2021 compared to \$1.1 million in 2022. The loss in 2022 was primarily the result of higher cost of sales, restaurant operating expenses and general and administrative expenses. Higher Pollo Tropical commodity costs, labor costs, insurance costs, utilities costs, general and administrative expenses, and repair and maintenance costs in 2022 were partially offset by increased comparable restaurant sales at Pollo Tropical.
- We recognized a loss from continuing operations of \$(15.7) million, or \$(0.62) per diluted share, in 2022 compared to a loss from continuing operations of \$(8.1) million, or \$(0.31) per diluted share, in 2021 primarily as a result of the foregoing.
- Total revenues increased 8.4% in 2022 to \$387.4 million from \$357.3 million in 2021, driven primarily by an increase in comparable restaurant sales at Pollo Tropical. Comparable restaurant sales increased 9.1% for our Pollo Tropical restaurants resulting from an increase in the net impact of product/channel mix and pricing of 15.2%, partially offset by a decrease in comparable restaurant transactions of 6.1%.
- Consolidated Adjusted EBITDA decreased \$3.2 million for the year ended January 1, 2023 to \$21.8 million compared to \$25.0 million for the year ended January 2, 2022, driven primarily by higher commodity costs, labor costs, insurance costs, utilities costs, general and administrative expenses, and repair and maintenance costs, partially offset by higher restaurant sales. Consolidated Adjusted EBITDA is a non-GAAP financial measure of performance. For a discussion of our use of Consolidated Adjusted EBITDA and a reconciliation from net income (loss) to Consolidated Adjusted EBITDA, see “Management’s Use of Non-GAAP Financial Measures.”
- Income from discontinued operations decreased \$17.4 million for the year ended January 1, 2023 to \$1.1 million compared to \$18.5 million for the year ended January 2, 2022, driven primarily by the impact of the gain on the sale of Taco Cabana and related costs in 2021. Income from discontinued operations for the year ended January 1, 2023 was primarily due to insurance proceeds received, partially offset by workers compensation and general liability claims.

Results of Operations

Unless otherwise noted, this discussion of operating results relates to our continuing operations.

The following table summarizes the changes in the number and mix of Pollo Tropical Company-owned and franchised restaurants in each fiscal year:

	2022			2021			2020		
	Owned	Franchised	Total	Owned	Franchised	Total	Owned	Franchised	Total
Beginning of year	138	31	169	138	29	167	142	32	174
New	—	4	4	—	2	2	—	2	2
Closed	(1)	(3)	(4)	—	—	—	(4)	(5)	(9)
End of year	<u>137</u>	<u>32</u>	<u>169</u>	<u>138</u>	<u>31</u>	<u>169</u>	<u>138</u>	<u>29</u>	<u>167</u>

The following table sets forth, for the years ended January 1, 2023, January 2, 2022 and January 3, 2021, selected operating results as a percentage of restaurant sales:

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021
Costs and expenses:			
Cost of sales	32.3%	30.5%	31.9%
Restaurant wages and related expenses	25.3%	25.8%	23.7%
Restaurant rent expense	6.2%	6.6%	7.2%
Other restaurant operating expenses	17.5%	16.2%	15.2%
Advertising expense	3.3%	3.2%	2.7%

Revenues. Revenues include restaurant sales and franchise royalty revenues and fees. Restaurant sales consist of food and beverage sales, net of discounts, at our restaurants. Franchise royalty revenues and fees represent ongoing royalty payments that are determined based on a percentage of franchisee sales and the amortization of initial franchise fees and area development fees associated with the opening of new franchised restaurants. Restaurant sales are influenced by new restaurant openings, closures of restaurants and changes in comparable restaurant sales.

Total revenues increased 8.4% to \$387.4 million in 2022 from \$357.3 million in 2021, while the 2021 total revenues represent an increase of 13.3% from \$315.4 million in 2020. Restaurant sales increased 8.6% to \$385.9 million in 2022 from \$355.5 million in 2021, while 2021 restaurant sales represent an increase of 13.2% from \$314.1 million in 2020.

The following table presents the primary drivers of the increase or decrease in restaurant sales for Pollo Tropical (in millions):

	2022 vs. 2021	2021 vs. 2020
Increase in comparable restaurant sales	\$ 31.9	\$ 48.7
Decrease in sales related to closed restaurants, including temporary and partial closures	(1.4)	(1.5)
Additional week in 2020	—	(5.8)
Total increase	<u>\$ 30.5</u>	<u>\$ 41.4</u>

Restaurants are included in comparable restaurant sales after they have been open for 18 months. Restaurants are excluded from comparable restaurant sales for any fiscal month in which the restaurant was closed for more than five days. Comparable restaurant sales are compared to the same period in the prior year. For comparative purposes, the calculation of the changes in comparable restaurant sales is based on a 52-week fiscal year. Restaurant sales for the extra week in the fiscal year ended January 3, 2021 have been excluded for purposes of calculating the change in comparable company-owned restaurant sales. Comparable restaurant sales in 2020 were negatively impacted by governmental restrictions, closed dining rooms, reductions in operating hours and reduced staffing as a result of COVID-19. We believe our significant mix of dine-in sales prior to the pandemic had a negative impact on comparable restaurant sales.

Comparable restaurant sales increased 9.1% for Pollo Tropical restaurants in 2022. Increases or decreases in comparable restaurant sales result primarily from an increase or decrease in comparable restaurant transactions and in average check. Changes in average check are primarily driven by menu price increases net of discounts and promotions and changes in sales channel and sales mix.

An increase in the net impact of pricing and product/channel mix of 15.2% was partially offset by a decrease in comparable restaurant transactions of 6.1% in 2022 compared to 2021. The increase in pricing and product/channel mix was driven primarily by menu price increases of 14.4% and increases in dine-in and delivery average check. We estimate that Hurricanes Ian and Nicole negatively impacted comparable restaurant sales and transactions by approximately 0.8% and 0.6%, respectively, in 2022. We believe staffing challenges had a negative impact on sales trends driven by reduced operating hours and sales channels in 2022. Comparable restaurant sales in 2022 were also negatively impacted by remodels and refreshes that temporarily closed dine-in and counter take-out operations.

Comparable restaurant sales increased 16.0% for Pollo Tropical in 2021. An increase in the net impact of product/channel mix and pricing of 11.8% was coupled with an increase in comparable restaurant transactions of 4.2% in 2021 compared to 2020. The increase in product/channel mix and pricing was driven primarily by increases in delivery and drive-thru average check and sales channel penetration, and menu price increases of 4.6%. We believe restaurant sales were negatively impacted by staffing challenges and reduced operating hours and sales channels due to labor shortages in 2021. Comparable restaurant sales in adequately staffed markets increased 18.7% in 2021 compared to 2020.

Franchise revenues decreased \$0.4 million to \$1.4 million in 2022 compared to 2021 due primarily to a temporary decrease in franchise royalty fees while a franchise agreement was being renegotiated. Franchise revenues increased \$0.5 million to \$1.8 million in 2021 compared to 2020 due to higher sales at franchised restaurants in 2021 primarily as a result of the impact of COVID-19 in 2020.

Operating costs and expenses. Operating costs and expenses include cost of sales, restaurant wages and related expenses, other restaurant expenses and advertising expenses. Cost of sales consists of food, paper and beverage costs including packaging costs, less rebates and purchase discounts. Cost of sales is generally influenced by changes in commodity costs, the sales mix of items sold and the effectiveness of our restaurant-level controls to manage food and paper costs. Key commodities, including chicken, are generally purchased under contracts for future periods of up to one year. Continuing inflation pressure is expected in 2023 compared to 2022 for certain food, packaging and utility costs and we are planning additional pricing measures to offset any ongoing inflationary cost increases.

Restaurant wages and related expenses include all restaurant management and hourly productive labor costs, employer payroll taxes, restaurant-level bonuses and related benefits. Payroll and related taxes and benefits are subject to inflation, including from factors such as labor supply and changing market conditions, as well as minimum wage increases and changes in costs for health insurance, workers' compensation insurance and state unemployment insurance.

Other restaurant operating expenses include all other restaurant-level operating costs, the major components of which are utilities, repairs and maintenance, general liability insurance, sanitation, supplies and credit card and delivery fees.

Advertising expense includes all promotional expenses including television, radio, billboards and other sponsorships and promotional activities and agency fees.

The following table presents the primary drivers of the changes in the components of restaurant operating margins for Pollo Tropical. All percentages are stated as a percentage of restaurant sales.

	2022 vs. 2021	2021 vs. 2020
Cost of sales:		
Higher commodity costs	4.9%	0.4%
Sales mix	1.5%	(0.3)%
Higher (lower) promotions and discounts	0.2%	(0.5)%
Menu price increases	(4.5)%	(0.9)%
Operating inefficiencies (efficiencies)	(0.7)%	0.1%
Other ⁽¹⁾	0.4%	(0.2)%
Net increase (decrease) in cost of sales as a percentage of restaurant sales	1.8%	(1.4)%
Restaurant wages and related expenses:		
Higher (lower) labor costs including special incentive pay and sign-on bonuses in 2021 ⁽²⁾	(0.8)%	0.4%
Higher (lower) incentive bonus ⁽³⁾	(0.2)%	0.3%
Lower medical benefits costs	(0.2)%	(0.3)%
Higher payroll taxes and workers' compensation costs	—%	0.3%
Higher labor costs due to higher wage rates and overtime partially offset by the impact of higher restaurant sales ⁽⁴⁾	0.8%	1.3%
Other ⁽¹⁾	(0.1)%	0.1%
Net increase (decrease) in restaurant wages and related expenses as a percentage of restaurant sales	(0.5)%	2.1%
Other operating expenses:		
Higher repairs and maintenance costs	0.6%	0.6%
Higher insurance costs	0.4%	—%
Higher utilities costs in 2022 and impact of higher restaurant sales in 2021 vs. 2020	0.4%	(0.3)%
Higher delivery fee expense due to higher delivery channel sales	0.1%	0.7%
Other ⁽¹⁾	(0.2)%	—%
Net increase in other restaurant operating expenses as a percentage of restaurant sales	1.3%	1.0%
Advertising expense:		
Increased advertising	0.1%	0.5%
Net increase in advertising expense as a percentage of restaurant sales . . .	0.1%	0.5%

(1) Other consists of any other driver with an impact of less than 20 basis points.

(2) Change in 2022 compared to 2021 and 2021 compared to 2020 primarily includes the impact of special incentive pay offered in 2021.

(3) Primarily due to guaranteed bonus payments due to staffing challenges. Guaranteed bonus payments, which were lower in 2020, are included in other labor costs in 2020.

(4) Higher wage rates and overtime pay due in part to labor shortages in 2022 and 2021.

Restaurant Rent Expense. Restaurant rent expense includes base rent, contingent rent and common area maintenance and property taxes related to our leases characterized as operating leases. Restaurant rent expense, as a percentage of total restaurant sales, decreased to 6.2% in 2022 from 6.6% in 2021, due primarily to the impact of higher comparable restaurant sales which were partially offset by higher rental costs related to renewed leases. Restaurant rent expense, as a percentage of total restaurant sales, was 6.6% in 2021 compared to 7.2% in 2020, due primarily to the impact of higher comparable restaurant sales which were partially offset by higher rental costs related to sale-leasebacks and lease renewals.

General and Administrative Expenses. General and administrative expenses are comprised primarily of (1) salaries and expenses associated with the development and support of our Company and brand and the management oversight of the operation of our restaurants; and (2) legal, auditing and other professional fees, corporate system costs, and stock-based compensation expense.

General and administrative expenses increased to \$52.3 million in 2022 from \$45.5 million in 2021, and as a percentage of total revenues, were 13.5% in 2022 and 12.7% in 2021 due primarily to increased professional fees, higher employee costs and other support costs, partially offset by higher total revenue. General and administrative expenses include \$7.3 million in non-recurring expenses comprised of \$2.7 million of general and administrative efficiency initiative costs, which includes \$1.6 million related to the acceleration and write-off of costs related to an accounting system implementation, \$2.0 million of professional fees, \$1.4 million of restructuring costs primarily related to the departure of our former CEO, and \$1.2 million of digital platform costs.

General and administrative expenses increased to \$45.5 million in 2021 from \$39.8 million in 2020, and as a percentage of total revenues, were 12.7% in 2021 and 12.6% in 2020 due primarily to higher digital platform costs, higher continuing mobile app development and maintenance costs and higher incentive and other support center costs including additional costs related to the sale of Taco Cabana, partially offset by higher total revenues. General and administrative expenses include corporate overhead costs allocated to Taco Cabana that are not included in discontinued operations. General and administrative expenses in 2021 also included \$3.3 million related to digital platform costs. General and administrative expense in 2020 included \$0.7 million related to severance costs associated with positions eliminated in response to the COVID-19 pandemic, \$0.4 million related to digital and brand repositioning costs, and \$0.1 million related to search fees for senior executive positions.

Consolidated Adjusted EBITDA. Consolidated Adjusted EBITDA, a non-GAAP financial measure, is the primary measure of profit or loss used by our chief operating decision maker for purposes of assessing performance and is defined as earnings before interest expense, income taxes, depreciation and amortization, impairment and other lease charges (recoveries), goodwill impairment, closed restaurant rent expense, net of sublease income, stock-based compensation expense, other expense (income), net, and certain significant items that management believes are related to strategic changes and/or are not related to the ongoing operation of our restaurants.

Consolidated Adjusted EBITDA may not necessarily be comparable to other similarly titled captions of other companies due to differences in methods of calculation. Consolidated Adjusted EBITDA includes an allocation of certain general and administrative expenses associated with administrative support for executive management, information systems and certain finance, legal, supply chain, human resources, development, and other administrative functions. For a discussion of our use of Consolidated Adjusted EBITDA and a reconciliation from net income (loss) to Consolidated Adjusted EBITDA, see the heading titled “Management’s Use of Non-GAAP Financial Measures.”

Consolidated Adjusted EBITDA decreased to \$21.8 million, or 5.6% of total revenues, in 2022 from \$25.0 million, or 7.0% of total revenues, in 2021 due primarily to higher commodity costs and sales mix within cost of sales, repair and maintenance costs, insurance costs, and utilities costs, partially offset by the impact of menu price increases and higher restaurant sales.

Consolidated Adjusted EBITDA decreased to \$25.0 million, or 7.0% of total revenues, in 2021 from \$26.0 million, or 8.2% of total revenues, in 2020 due primarily to the impact of higher restaurant sales and improved cost of sales margins, partially offset by higher labor costs, delivery fees, repair and maintenance costs, advertising and general and administrative costs, and the impact of the extra week in 2020.

Restaurant-level Operating Profit. We also use Restaurant-level Operating Profit (previously presented as Restaurant-level Adjusted EBITDA), a non-GAAP financial measure, as a supplemental measure to evaluate the performance and profitability of our restaurants in the aggregate, which is defined as Consolidated Adjusted EBITDA excluding franchise royalty revenues and fees, pre-opening costs and general and administrative expenses (including corporate-level general and administrative expenses).

Restaurant-level Operating Profit was \$59.4 million, or 15.4% of restaurant sales, \$62.8 million, or 17.7% of restaurant sales, and \$60.8 million, or 19.4% of restaurant sales, in 2022, 2021 and 2020, respectively. The changes in Restaurant-level Operating Profit were primarily due to the foregoing. In addition, we estimate the additional week of

sales in our fiscal 2020 had a \$2.0 million unfavorable impact on Restaurant-level Operating Profit in 2021 compared to 2020. For a reconciliation from loss from operations to Restaurant-level Operating Profit, see the heading titled “Management’s Use of Non-GAAP Financial Measures.”

Depreciation and Amortization. Depreciation and amortization expense decreased to \$20.1 million in 2022 from \$20.6 million in 2021 due primarily to decreased depreciation related to impairment of assets from underperforming restaurants that have been made since 2021, partially offset by an increase in depreciation related to ongoing reinvestment and enhancements to our restaurants. Depreciation and amortization expense decreased to \$20.6 million in 2021 from \$22.0 million in 2020 due primarily to decreased depreciation as a result of entering into sale-leaseback transactions for several owned restaurant locations and impairing closed restaurant assets, partially offset by an increase in depreciation related to ongoing reinvestment and enhancements to our restaurants.

Impairment and Other Lease Charges (Recoveries). Impairment and other lease charges (recoveries) decreased to \$1.4 million in 2022 from \$1.5 million in 2021.

Impairment and other lease charges (recoveries) in 2022 include impairment charges of \$2.3 million related primarily to the impairment of assets from eight underperforming Pollo Tropical restaurants, partially offset by net gains from lease terminations and a lease term reassessment of \$(0.9) million.

Impairment and other lease charges (recoveries) decreased to \$1.5 million in 2021 from \$8.0 million in 2020. Impairment and other lease charges in 2021 include impairment charges of \$2.1 million related primarily to the impairment of assets from five underperforming Pollo Tropical restaurants and impairment of equipment from previously closed restaurants, partially offset by net gains from lease terminations \$(0.6) million.

Impairment and other lease charges (recoveries) in 2020 include impairment charges of \$7.3 million related primarily to the impairment of assets from three underperforming Pollo Tropical restaurants, two of which we closed in the third quarter of 2020, the write-down of saucing islands and self-service soda machines that were removed from dining rooms as a result of COVID-19 and the write-down of assets held for sale to their fair value less costs to sell, and lease termination charges of \$0.9 million for restaurant locations we decided not to develop, net of a gain from lease terminations of \$(0.2) million.

Each quarter we assess the potential impairment of any long-lived assets that have experienced a triggering event, including restaurants for which the related trailing twelve-month cash flows are below a certain threshold. We determine if there is impairment at the restaurant level by comparing undiscounted future cash flows from the related long-lived assets, exclusive of operating lease payments, to their respective carrying values, excluding operating lease liabilities. In determining future cash flows, significant estimates are made by us with respect to future operating results of each restaurant over its remaining lease term, including sales trends, labor rates, commodity costs and other operating cost assumptions. If assets are determined to be impaired, the impairment charge is measured by calculating the amount by which the asset group’s carrying amount exceeds its fair value. This process of assessing fair values requires the use of estimates and assumptions, including our ability to sell or reuse the related assets and market conditions, and for right-of-use lease assets, current market lease rent and discount rates, which are subject to a high degree of judgment. If these assumptions change in the future, we may be required to record impairment charges for these assets and these charges could be material.

For two Pollo Tropical restaurants with combined carrying values (excluding right-of-use lease assets) of \$1.1 million, projected cash flows are not substantially in excess of their carrying values. If the performance of these restaurants does not improve as projected, an impairment charge could be recognized in future periods, and such charge could be material.

Closed Restaurant Rent Expense, Net of Sublease Income. Closed restaurant rent expense, net of sublease income was \$1.9 million in 2022 and consisted of closed restaurant rent and ancillary lease costs of \$8.5 million net of sublease income of \$(6.5) million.

Closed restaurant rent expense, net of sublease income was \$3.0 million in 2021 and consisted of closed restaurant rent and ancillary lease costs of \$9.1 million net of sublease income of \$(6.1) million.

Closed restaurant rent expense, net of sublease income was \$4.3 million in 2020 and consisted of closed restaurant rent and ancillary lease costs of \$9.2 million net of sublease income of \$(4.9) million.

Other (Income) Expense, Net. Other (income) expense, net, was \$(0.6) million in 2022 and primarily consisted of net proceeds from a legal settlement of \$(0.8) million, partially offset by other closed restaurant related costs. Other expense (income), net, was \$0.5 million in 2021 and primarily consisted of costs for the removal, transfer and storage of equipment from closed restaurants. Other (income) expense, net, in 2020 primarily consisted of total gains of \$(3.3) million on the sale-leaseback of five restaurant properties and the sale of three restaurant properties, partially offset by \$0.5 million in costs for the removal, transfer and storage of equipment from closed restaurants and other closed restaurant costs and \$0.7 million for the write-off of site development costs.

Loss from Operations. As a result of the foregoing, we had a loss from operations of \$(14.4) million, or (3.7)% of restaurant sales, in 2022 compared to a loss from operations of \$(6.6) million, or (1.9)% of restaurant sales, in 2021 and a loss from operations of \$(10.1) million, or (3.2)% of restaurant sales, in 2020.

Interest Expense. Interest expense decreased \$0.1 million to \$0.3 million in 2022 from 2021. Interest expense increased \$0.1 million to \$0.4 million in 2021 from 2020. Interest charges related to our senior credit facility and former amended senior credit facility are included in discontinued operations for 2021 and 2020. In 2022, interest charges related to our undrawn revolving credit facility are included in continuing operations.

Provision for (Benefit from) Income Taxes. The effective tax rate was (6.6)% for the year ended January 1, 2023, and (15.5)% for the year ended January 2, 2022. The provision for income taxes for 2022 includes changes in the valuation allowance as a result of originating temporary differences during the year.

The effective tax rate was (15.5)% for 2021 and 67.5% for 2020. The provision for income taxes for 2021 includes changes in the valuation allowance as a result of originating temporary differences during the year and a reserve for unrecognized tax benefits. The benefit from income taxes for 2020 includes a benefit related to the carryback of net operating losses and reclassifying certain assets as qualified improvement property as permitted by the Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”) and other changes to depreciation methods for certain assets made in conjunction with a cost segregation study conducted prior to filing our 2019 federal income tax return, as well as a decrease to the valuation allowance on our deferred tax assets related to changes in our deferred tax assets and liabilities.

The CARES Act, which was signed into law on March 27, 2020, includes provisions that allow net operating losses arising in 2018, 2019, and 2020 to be carried back for up to five years and includes technical amendments that are retroactive to 2018 which permit certain assets to be classified as qualified improvement property and expensed immediately.

Income (Loss) from Discontinued Operations, Net of Tax. All revenues, costs and expenses and income taxes attributable to Taco Cabana have been aggregated within income (loss) from discontinued operations, net of tax, in the consolidated statements of operations for all periods presented. Income from discontinued operations, net of tax, was \$1.1 million in 2022 compared to \$18.5 million in 2021 and a loss from discontinued operations, net of tax, of \$(6.8) million in 2020. Income from discontinued operations, net of tax, for the year ended January 1, 2023 was primarily due to insurance proceeds received, partially offset by workers compensation and general liability claims. Taco Cabana results of operations are included through August 15, 2021 for the year ended January 2, 2022 compared to a full year in 2020 due to the sale of Taco Cabana on August 16, 2021.

A gain of \$25.0 million was recognized on the sale of Taco Cabana in 2021. See Note 2 of the Notes to our Consolidated Financial Statements.

Net (Loss) Income. As a result of the foregoing, we had a net loss of \$(14.6) million, or (3.8)% of total revenue, in 2022 compared to net income of \$10.4 million, or 2.9% of total revenue, in 2021 and a net loss of \$(10.2) million, or (3.2)% of total revenue, in 2020.

Liquidity and Capital Resources

Unless otherwise noted, this discussion of liquidity and capital resources relates to our combined operations.

We do not have significant receivables or inventory and receive trade credit based upon negotiated terms in purchasing food products and other supplies. Although, as a result of our substantial cash balance, we did not have a working capital deficit at January 1, 2023, we have the ability to operate with a substantial working capital deficit (and we have historically operated with a working capital deficit) because:

- Restaurant operations are primarily conducted on a cash basis;
- Rapid turnover results in a limited investment in inventories; and
- Cash from sales is usually received before related liabilities for supplies and payroll become due.

Operating Activities. Net cash provided by operating activities for 2022, 2021, and 2020 was \$15.4 million, \$14.1 million and \$40.3 million, respectively. The \$1.4 million increase in net cash provided by operating activities in 2022 compared to 2021 was primarily driven by timing of payments, partially offset by a decrease in Consolidated Adjusted EBITDA, contributions from discontinued operations in 2021, and the receipt of income tax refunds in 2021. The \$26.2 million decrease in net cash provided by operating activities in 2021 compared to 2020 was driven primarily by the timing of payments, including the impact of the timing of payments related to Taco Cabana and vendor and landlord payment term renegotiations in 2020, and a decrease in Consolidated Adjusted EBITDA. The impact of extended vendor payment terms in 2020 was partially offset by the payment of January 2021 rent in fiscal 2020 as a result of the 53rd week in fiscal 2020.

Investing Activities. Net cash used in investing activities in 2022 was \$19.1 million. Net cash provided by investing activities and 2021 and 2020 was \$59.8 million and \$8.4 million, respectively. Capital expenditures are typically the largest component of our investing activities and include: (1) new restaurant development, which may include the purchase of real estate; (2) restaurant remodeling/reimaging, which includes the renovation or rebuilding of the interior and exterior of our existing restaurants; (3) other restaurant capital expenditures, which include capital maintenance expenditures for the ongoing reinvestment and enhancement of our restaurants; and (4) corporate and restaurant information systems.

The following table sets forth our capital expenditures from continuing operations for the periods presented (dollars in thousands):

	Pollo Tropical	Other	Continuing Operations
Year ended January 1, 2023:			
New restaurant development	\$ —	\$ —	\$ —
Restaurant remodeling	8,760	—	8,760
Other restaurant capital expenditures ⁽¹⁾	7,820	—	7,820
Corporate and restaurant information systems	2,759	90	2,849
Total capital expenditures	<u>\$ 19,339</u>	<u>\$ 90</u>	<u>\$ 19,429</u>
Number of new restaurant openings	—	—	—
Year ended January 2, 2022:			
New restaurant development	\$ —	\$ —	\$ —
Restaurant remodeling	1,097	—	1,097
Other restaurant capital expenditures ⁽¹⁾	9,682	—	9,682
Corporate and restaurant information systems	1,645	602	2,247
Total capital expenditures	<u>\$ 12,424</u>	<u>\$ 602</u>	<u>\$ 13,026</u>
Number of new restaurant openings	—	—	—
Year ended January 3, 2021:			
New restaurant development	\$ 1,009	\$ —	\$ 1,009
Restaurant remodeling	358	—	358
Other restaurant capital expenditures ⁽¹⁾	6,542	—	6,542
Corporate and restaurant information systems	1,254	1,320	2,574
Total capital expenditures	<u>\$ 9,163</u>	<u>\$ 1,320</u>	<u>\$ 10,483</u>
Number of new restaurant openings	—	—	—

(1) Excludes restaurant repair and maintenance expenses included in other restaurant operating expenses in our consolidated financial statements. For the years ended January 1, 2023, January 2, 2022 and January 3, 2021, total restaurant repair and maintenance expenses were approximately \$15.5 million, \$12.5 million, and \$9.3 million, respectively.

The following table sets forth our capital expenditures from discontinued operations for the periods presented (dollars in thousands):

	Taco Cabana
Year ended January 2, 2022:	
New restaurant development	\$ —
Restaurant remodeling	1,283
Other restaurant capital expenditures ⁽¹⁾	5,050
Corporate and restaurant information systems	169
Total capital expenditures	<u>\$ 6,502</u>
Number of new restaurant openings	<u>—</u>
Year ended January 3, 2021:	
New restaurant development	\$ 854
Restaurant remodeling	745
Other restaurant capital expenditures ⁽¹⁾	4,728
Corporate and restaurant information systems	1,559
Total capital expenditures	<u>\$ 7,886</u>
Number of new restaurant openings	<u>1</u>

- (1) Excludes restaurant repair and maintenance expenses included in income (loss) from discontinued operations in our consolidated financial statements. For the years ended January 2, 2022 and January 3, 2021, total restaurant repair and maintenance expenses were approximately \$5.5 million and \$8.1 million, respectively.

Cash provided by investing activities from continuing operations in 2020 included net proceeds of \$13.3 million from the sale-leaseback of five restaurant properties and \$5.3 million from the sale of an additional three restaurant properties.

Cash provided by investing activities from discontinued operations in 2022 included net proceeds from insurance recoveries of \$0.3 million. Net cash provided by investing activities from discontinued operations in 2021 included net proceeds of \$74.9 million from the sale of Taco Cabana, \$3.1 million from the sale-leaseback of two restaurant properties and \$1.3 million from the sale of an additional restaurant property. Net cash provided by investing activities from discontinued operations in 2020 included net proceeds of \$4.0 million from the sale-leaseback of two restaurant properties and \$4.3 million from the sale of an additional three restaurant properties.

Total capital expenditures in 2023 are expected to be between \$22.0 million and \$28.0 million.

Financing Activities. Net cash used in financing activities in 2022 was \$1.2 million and primarily consisted of payments to repurchase our common stock of \$0.9 million and payments of tax withholdings related to net share settlements of \$0.2 million.

Net cash used in financing activities in 2021 included term loan borrowing repayments under our senior credit facility of \$75.0 million, \$9.4 million in payments to repurchase our common stock, a \$2.2 million payment for a premium associated with extinguishment of the term loan under our senior credit facility and \$0.2 million in principal payments on finance leases.

Net cash used in financing activities in 2020 included net revolving credit borrowing repayments under our former amended senior credit facility of \$75.0 million, \$3.0 million in payment of debt issuance costs associated with our former amended senior credit facility and senior credit facility combined with \$3.7 million in payments to repurchase our common stock, partially offset by proceeds of \$73.5 million under our senior credit facility.

Senior Credit Facility. On November 23, 2020, we terminated our former amended senior secured revolving credit facility, referred to as the “former senior credit facility,” and entered into a new senior secured credit facility, which is referred to as the “senior credit facility.” The senior credit facility was comprised of a term loan facility (the “term loan facility”) of \$75.0 million and a revolving credit facility (the “revolving credit facility”) of up to \$10.0 million and matures on November 23, 2025. The senior credit facility also provides for potential incremental term loan borrowing increases of up to \$37.5 million in the aggregate, subject to, among other items, compliance with

a minimum Total Leverage Ratio and other terms specified in the senior credit facility. As required by the terms of the senior credit facility, the proceeds from the sale of Taco Cabana were used to fully repay our outstanding term loan borrowings on August 16, 2021. The early repayment was subject to a 103% loan prepayment premium.

The senior credit facility provides that we must maintain minimum Liquidity (as defined in the senior credit facility) of \$20.0 million (the “Liquidity Threshold”) until January 3, 2022. The senior credit facility also provides that we are not required to be in compliance with the Total Leverage Ratio under the senior credit facility until the earlier of January 3, 2022, or the date in which Liquidity is less than the Liquidity Threshold. We will be permitted to exercise equity cure rights with respect to compliance with the Total Leverage Ratio subject to certain restrictions as set forth in the senior credit facility.

Borrowings under the senior credit facility bear interest at a rate per annum, at our option, equal to either (all terms as defined in the senior credit facility):

- 1) the Base Rate plus the Applicable Margin of 6.75% with a minimum Base Rate of 2.00%, or
- 2) the LIBOR (or Benchmark Replacement) Rate plus the Applicable Margin of 7.75%, with a minimum LIBOR (or Benchmark Replacement) Rate of 1.00%.

In addition, the senior credit facility requires us to pay a commitment fee of 0.50% per annum on the daily amount of the unused portion of the revolving credit facility.

The outstanding borrowings under the revolving credit facility are prepayable without penalty or premium (other than customary breakage costs). The outstanding borrowings under the term loan facility were voluntarily prepayable by us, and the term loan facility provided that each of the following required a mandatory prepayment of outstanding term loan borrowings by us as follows: (i) 100% of any cash Net Proceeds (as defined in the senior credit facility) in excess of \$2.0 million individually or in the aggregate over the term of the senior credit facility in respect of any Casualty Event (as defined in the senior credit facility) affecting collateral provided that we were permitted to reinvest such Net Proceeds in accordance with the senior credit facility, (ii) 100% of any Net Proceeds of a Specified Equity Contribution (as defined in the senior credit facility), (iii) 100% of any cash Net Proceeds from the issuance of debt issued by us or our subsidiaries other than Permitted Debt (as defined in the senior credit facility), (iv) 100% of any Net Proceeds from the Disposition (as defined in the senior credit facility) of certain assets individually, or in the aggregate, in excess of \$2.0 million in any fiscal year provided that we were permitted to reinvest such Net Proceeds in accordance with the senior credit facility and (v) beginning with the fiscal year ending January 2, 2022, an amount equal to the Excess Cash Flow (as defined in the senior credit facility) in accordance with the senior credit facility.

Our senior credit facility contains customary default provisions, including without limitation, a cross default provision pursuant to which it is an event of default under this facility if there is a default under any of our indebtedness having an outstanding principal amount in excess of \$5.0 million which results in the acceleration of such indebtedness prior to its stated maturity or is caused by a failure to pay principal when due.

The senior credit facility contains certain covenants, including, without limitation, those limiting our ability to, among other things, incur indebtedness, incur liens, sell or acquire assets or businesses, change the character of our business in any material respects, engage in transactions with related parties, make certain investments, make certain restricted payments or pay dividends.

Our obligations under the senior credit facility are secured by all of our and our subsidiaries’ assets (including a pledge of all of the capital stock and equity interests of our subsidiaries).

Under the senior credit facility, the lenders may terminate their obligation to advance and may declare the unpaid balance of borrowings, or any part thereof, immediately due and payable upon the occurrence and during the continuance of customary defaults which include, without limitation, payment default, covenant defaults, bankruptcy type defaults, defaults on other indebtedness, certain judgments or upon the occurrence of a change of control (as specified in the senior credit facility).

As of January 1, 2023, we were in compliance with the financial covenants under our senior credit facility. At January 1, 2023, \$10.0 million was available for borrowing under the revolving credit facility.

Share Repurchase Plan

In 2018, our board of directors approved a share repurchase program for up to 1.5 million shares of our common stock. In 2019, our board of directors approved increases to the share repurchase program of an additional 1.5 million shares of our common stock. Under the share repurchase program, shares may be repurchased from time to time in open market transactions at prevailing market prices, in privately negotiated transactions or by other means in accordance with federal securities laws, including Rule 10b-18 under the Securities Exchange Act of 1934, as amended. The number of shares repurchased and the timing of repurchases will depend on a number of factors, including, but not limited to, stock price, trading volume, general market and economic conditions, and other corporate considerations. The share repurchase program has no time limit and may be modified, suspended, superseded or terminated at any time by our board of directors.

Cash Requirements

Our significant cash requirements within the next twelve months include working capital requirements, operating lease obligations and capital expenditures, as well as purchase obligations and insurance liabilities. We believe our cash reserves, cash generated from our operations, and availability of borrowings under our senior credit facility will provide sufficient cash availability to cover our anticipated working capital needs and capital expenditures for the next twelve months. We used the net proceeds from the sale of Taco Cabana to repay all of the outstanding term loan borrowings under our senior credit facility in 2021.

Our significant cash requirements under our various contractual obligations and commitments include:

- *Operating Lease Obligations.* See Note 8 of the Notes to our Consolidated Financial Statements for information on our operating and finance lease obligations and the amount and timing of future payments.
- *Capital Expenditures.* See Investing Activities subsection in this MD&A under the heading titled Liquidity and Capital Resources.
- *Insurance Liabilities.* Insurance liabilities include obligations associated with employee health care, workers' compensation claims and general liability claims, all of which have some inherent uncertainty as to the amount and timing of payments and were reflected on our Consolidated Balance Sheet as of January 1, 2023. See Note 7 of the Notes to our Consolidated Financial Statements for more information about our insurance liabilities.
- *Purchase Obligations.* Purchase obligations include agreements to purchase goods or services that are legally binding on us and that specify all significant terms.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Inflation

The inflationary factors that have historically affected our results of operations include increases in food and paper costs, labor and other operating expenses and energy costs. Labor costs in our restaurants are impacted by a number of factors such as labor supply and changing market conditions, as well as changes in the federal and state hourly minimum wage rates as well as changes in payroll related taxes, including federal and state unemployment taxes. Labor supply across other industries also negatively impacts the costs of supplies, commodities, logistics, and utilities. We typically attempt to offset the effect of inflation, at least in part, through periodic menu price increases and various cost reduction programs. However, no assurance can be given that we will be able to fully offset such inflationary cost increases in the future.

Critical Accounting Estimates

Our Consolidated Financial Statements and accompanying Notes are prepared in accordance with accounting principles generally accepted in the United States of America. Preparing consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. These estimates and assumptions are affected by the application of our accounting policies. Our significant accounting

policies are described in Note 1 — Basis of Presentation in the Notes to our Consolidated Financial Statements. Critical accounting estimates are those that require application of management's most difficult, subjective, or complex judgments, often as a result of matters that are inherently uncertain and may change in subsequent periods. These estimates involve a significant level of estimation uncertainty and are reasonably likely to have a material impact of the financial condition or results of operations.

Sales recognition at our restaurants is straightforward as customers pay for products at the time of sale and inventory turns over very quickly. Payments to vendors for products sold in the restaurants are generally settled within 60 days. The earnings reporting process is covered by our system of internal controls and generally does not require significant management estimates and judgments. However, critical accounting estimates and judgments, as noted below, are inherent in the assessment and recording of insurance liabilities, the valuation of goodwill for impairment, assessing impairment of long-lived assets, lease accounting matters and the valuation of deferred income tax assets. While we apply our judgment based on assumptions believed to be reasonable under the circumstances, actual results could vary from these assumptions. It is possible that materially different amounts would be reported using different assumptions.

Insurance Liabilities. We are insured for workers' compensation, general liability and medical insurance claims under policies where we pay all claims, subject to annual stop-loss limitations both for individual claims and for general liability, medical insurance and certain workers' compensation claims in the aggregate. At January 1, 2023 and January 2, 2022, we had \$8.8 million and \$9.5 million, respectively, accrued for these insurance claims. We record insurance liabilities based on historical and industry trends, which are continually monitored, with the assistance of actuaries, and adjust accruals as warranted by changing circumstances. Since there are estimates and assumptions inherent in recording these insurance liabilities, including the ability to estimate the future development of incurred claims based on historical trends or the severity of the claims, differences between actual future events and prior estimates and assumptions could result in adjustments to these liabilities and those adjustments could be material.

Evaluation of Goodwill. We must evaluate our recorded goodwill for impairment annually or more frequently when events and circumstances indicate that the carrying amount may be impaired. We have elected to conduct our annual impairment review of goodwill assets as of the last day of our fiscal year. We may first qualitatively assess goodwill impairment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. This qualitative analysis is performed by examining key events and circumstances affecting fair value. If it is determined it is more likely than not that the reporting unit's fair value is not greater than its carrying amount, we perform a quantitative assessment. We adopted ASU No. 2017-04, *Simplifying the Test for Goodwill Impairment* ("ASU 2017-04") in 2019, which eliminates the requirement to calculate the implied fair value of goodwill if the fair value of a reporting unit is less than the carrying amount of the reporting unit. Instead, if the carrying amount of a reporting unit exceeds its fair value, an impairment loss will be recognized in an amount equal to that excess, limited to the total amount of goodwill allocated to that reporting unit.

In performing a quantitative assessment for impairment, we compare the net book value of our reporting unit to its estimated fair value. In determining the estimated fair value of the reporting unit, we employ a combination of a discounted cash flow analysis based on management's best estimates of future cash flows and one or two market-based approaches. The results of these analyses are corroborated with other value indicators where available, such as comparable company earnings multiples. This evaluation of goodwill requires us to make estimates and assumptions to determine the fair value of our reporting unit including projections regarding future operating results, anticipated growth rates, the weighted average cost of capital used to discount projected cash flows, and market multiples.

We performed a qualitative assessment, which included examining key events and circumstances affecting fair value, for our annual impairment review as of January 1, 2023, and determined it was more likely than not that the Pollo Tropical reporting unit's fair value was greater than its carrying amount. As of January 1, 2023, our Pollo Tropical reporting unit goodwill has a carrying value of \$56.3 million. See Note 5 of the Notes to our Consolidated Financial Statements.

We estimate the fair value of the Pollo Tropical reporting unit significantly exceeds its carrying value as of January 1, 2023. The estimates and assumptions used to determine and assess fair value may differ from actual future events and if these estimates or related projections change significantly in the future, we may be required to record material impairment charges for goodwill assets.

Impairment of Long-lived Assets. We assess the potential impairment of long-lived assets, principally property and equipment and operating lease right-of-use assets, whenever events or changes in circumstances indicate that the carrying value of the restaurant asset group may not be recoverable. In addition to considering management's plans, known regulatory/governmental actions and damage due to acts of God (hurricanes, tornadoes, etc.), we consider an event indicating that the carrying value may not be recoverable to have occurred related to a specific restaurant if the restaurant's cash flows for the last twelve months are less than a minimum threshold or if consistent levels of cash flows for the remaining lease period are less than the carrying value of the restaurant's assets. We determine if there is impairment at the restaurant level by comparing undiscounted future cash flows from the related long-lived assets to their respective carrying values. We have elected to exclude operating lease payments and liabilities from future cash flows and carrying values, respectively, in the comparison. In determining future cash flows, significant estimates are made by us with respect to future operating results of each restaurant over its remaining lease term, including sales trends, labor rates, commodity costs and other operating cost assumptions. Our estimates of future cash flows are highly subjective judgments based on internal projections and knowledge of our operations, historical performance and current trends in sales and restaurant operating costs. If assets are determined to be impaired, the impairment charge is measured by calculating the amount by which the asset carrying amount exceeds its fair value. This process of assessing fair values requires the use of estimates and assumptions, including our ability to sell or reuse the related assets and market conditions and, for right-of-use lease assets, current market lease rent and discount rates, which are subject to a high degree of judgment. If these estimates or assumptions change in the future, we may be required to record impairment charges for these assets and these charges could be material.

For two Pollo Tropical restaurants with combined carrying values (excluding right-of-use lease assets) of \$1.1 million, projected cash flows are not substantially in excess of their carrying values. If the performance of these restaurants does not improve as projected, an impairment charge could be recognized in future periods, and such charge could be material. See Note 6 of the Notes to our Consolidated Financial Statements.

Lease Accounting. Judgments made by management for our lease obligations include the determination of our incremental borrowing rate, the determination of standalone selling prices used to allocate the consideration in the contract, and the length of the lease term, which includes the determination of renewal options that are reasonably assured. The lease term can affect the classification of a lease as finance or operating for accounting purposes, the amount of the lease liability and corresponding right-of-use lease asset recognized, the term over which related leasehold improvements for each restaurant are amortized and any rent holidays and/or changes in rental amounts for recognizing rent expense over the term of the lease. These judgments may produce materially different amounts of depreciation, amortization and rent expense than would be reported if different assumed lease terms were used.

We use our estimated incremental borrowing rate in determining the present value of lease payments for purposes of determining lease classification and recording lease liabilities and lease assets on our consolidated balance sheet. Our incremental borrowing rate is determined based on a synthetic credit rating, determined using a valuation model, adjusted to reflect a secured credit rating and a developed spread curve, if applicable, applied to a risk-free rate yield curve. If the estimate of our incremental borrowing rate was changed, our operating lease assets and liabilities could differ materially. Changes in the determination of our incremental borrowing rate could also have an impact on the depreciation and interest expense recognized for finance leases. See Note 8 of the Notes to our Consolidated Financial Statements.

Valuation of Deferred Income Tax Assets. Deferred tax assets and liabilities, which represent temporary differences between the financial statement and tax basis of assets and liabilities, are measured using enacted tax rates expected to apply to the years in which those differences are expected to be recovered or settled. Deferred tax assets are recognized to the extent we believe these assets will more likely than not be realized. A valuation allowance is established to reduce the carrying amount of deferred tax assets if we believe it is more likely than not that a portion or all of the tax benefit from these deferred tax assets will not be realized. The realization of a deferred tax asset is dependent on the generation of sufficient taxable income in future periods, and the reversal of existing taxable temporary differences in the applicable periods. In evaluating the realizability of our deferred tax assets, we perform an assessment of positive and negative evidence. The weight given to negative and positive evidence is commensurate only to the extent that such evidence can be objectively verified. Objective historical evidence is given greater weight than subjective evidence such as forecasts of future taxable income. We considered three years of cumulative operating income (loss) in evaluating the objective evidence that historical results provide. Objective negative evidence limits our ability to consider other subjective evidence, such as our future earnings projections. Based on our evaluation of all available positive and negative evidence, and placing greater weight on the objective evidence, we determined that

it is more likely than not that our deferred tax assets will not be fully realized in future periods. In 2019, we determined that it was more likely than not that the deferred tax assets would not be fully realized and established a valuation allowance against federal and state deferred tax assets. Based on changes in our deferred tax assets and liabilities in 2020, adjustments to our valuation allowance totaling \$0.4 million were recorded in 2020 resulting in a valuation allowance of \$9.7 million as of January 3, 2021. Based on changes in our deferred tax assets and liabilities in 2021, adjustments to our valuation allowance totaling \$0.2 million were recorded in 2021 resulting in a valuation allowance of \$9.9 million as of January 2, 2022. Based on changes in our deferred tax assets and liabilities in 2022, adjustments to our valuation allowance totaling \$6.4 million were recorded in 2022 resulting in a valuation allowance of \$16.3 million as of January 1, 2023. If we generate sufficient taxable income in the future to fully utilize the tax benefits of the deferred tax assets on which a valuation allowance was recorded, a portion or all of the valuation allowance could be reversed, which would decrease our tax expense in the period or periods in which the valuation allowance is reversed. We will continue to monitor and evaluate the positive and negative evidence considered in arriving at the above conclusion in order to assess whether such conclusion remains appropriate in future periods. Separate valuation allowances, not subject to the critical accounting estimates, for the income tax capital loss generated on the sale of Taco Cabana in 2021 and a foreign tax credit have been established as we do not expect to generate sufficient future taxable income related to those tax attributes. See Note 10 of the Notes to our Consolidated Financial Statements.

New Accounting Pronouncements

See Note 1 of the Notes to our Consolidated Financial Statements for a discussion of recently issued and adopted accounting standards.

Management's Use of Non-GAAP Financial Measures

Consolidated Adjusted EBITDA is a non-GAAP financial measure. We use Consolidated Adjusted EBITDA in addition to net income (loss) and income (loss) from operations to assess our performance, and we believe it is important for investors to be able to evaluate us using the same measures used by management. We believe this measure is an important indicator of our operational strength and the performance of our business and it provides a view of operations absent non-cash activity and items that are not related to the ongoing operation of our restaurants or affect comparability period over period. Consolidated Adjusted EBITDA is defined as earnings before interest expense, income taxes, depreciation and amortization, impairment and other lease charges (recoveries), goodwill impairment, closed restaurant rent expense, net of sublease income, stock-based compensation expense, other expense (income), net, and certain significant items that management believes are related to strategic changes and/or are not related to the ongoing operation of our restaurants as set forth in the reconciliation table below. Consolidated Adjusted EBITDA as calculated by us is not necessarily comparable to similarly titled measures reported by other companies and should not be considered as an alternative to net income (loss), earnings (loss) per share, cash flows from operating activities or other financial information determined under GAAP.

We also use Restaurant-level Operating Profit (previously presented as Restaurant-level Adjusted EBITDA) as a supplemental measure to evaluate the performance and profitability of our restaurants in the aggregate, which is defined as Consolidated Adjusted EBITDA excluding franchise royalty revenues and fees, pre-opening costs, and general and administrative expenses (including corporate-level general and administrative expenses). Restaurant-level Operating Profit margin is derived by dividing Restaurant-level Operating Profit by restaurant sales. Restaurant-level Operating Profit is also a non-GAAP financial measure.

Management believes that Consolidated Adjusted EBITDA and Restaurant-level Operating Profit, when viewed with our results of operations calculated in accordance with GAAP and our reconciliation of net income (loss) to Consolidated Adjusted EBITDA and reconciliation of income (loss) from operations to Restaurant-level Operating Profit (i) provide useful information about our operating performance and period-over-period changes, (ii) provide additional information that is useful for evaluating the operating performance of our business and (iii) permit investors to gain an understanding of the factors and trends affecting our ongoing earnings, from which capital investments are made and debt is serviced. However, such measures are not measures of financial performance or liquidity under GAAP and, accordingly, should not be considered as alternatives to net income or cash flow from operating activities as indicators of operating performance or liquidity. Also, these measures may not be comparable to similarly titled captions of other companies.

All such financial measures have important limitations as analytical tools. These limitations include the following:

- Such financial information does not reflect our capital expenditures, future requirements for capital expenditures or contractual commitments to purchase capital equipment;
- Such financial information does not reflect interest expense or the cash requirements necessary to service payments on our debt;
- Although depreciation and amortization are non-cash charges, the assets that we currently depreciate and amortize will likely have to be replaced in the future, and such financial information does not reflect the cash required to fund such replacements; and
- Such financial information does not reflect the effect of earnings or charges resulting from matters that our management does not consider to be indicative of our ongoing operations. However, some of these charges and gains (such as impairment and other lease charges (recoveries), closed restaurant rent expense, net of sublease income, other income and expense, and stock-based compensation expense) have recurred and may recur.

A reconciliation from consolidated net income (loss) to Consolidated Adjusted EBITDA follows (in thousands). All amounts are from continuing operations unless otherwise indicated.

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021

(1) Excludes general and administrative adjustments included in Consolidated Adjusted EBITDA.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

We are exposed to market risk associated with fluctuations in interest rates, primarily limited to our senior credit facility, under which we did not have any outstanding borrowings as of January 1, 2023. Borrowings under our senior credit facility bear interest at a per annum rate, at our option, of either (all terms as defined in the senior credit facility):

- 1) the Base Rate plus the Applicable Margin of 6.75% with a minimum Base Rate of 2.00%, or
- 2) the LIBOR (or Benchmark Replacement) Rate plus the Applicable Margin of 7.75%, with a minimum LIBOR (or Benchmark Replacement) Rate of 1.00%.

For variable rate debt instruments, market risk is defined as the potential change in earnings resulting from a hypothetical adverse change in interest rates. As of January 1, 2023, we had no outstanding borrowings, thus minimal market risk. Future market risk will be limited to the borrowings made on our revolving credit facility.

Commodity Price Risk

We purchase certain products which are affected by commodity prices and are, therefore, subject to price volatility caused by weather, market conditions and other factors which are not considered predictable or within our control. Although many of the products purchased are subject to changes in commodity prices, certain purchasing contracts or pricing arrangements have been negotiated in advance to minimize price volatility. Where possible, we use these types of purchasing techniques to control costs as an alternative to using financial instruments to hedge commodity prices. In many cases, we believe we will be able to address commodity cost increases that are significant and appear to be long-term in nature by adjusting our menu pricing. However, long-term increases in commodity prices may result in lower restaurant-level operating margins.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements and supplementary data of Fiesta Restaurant Group, Inc. required by this Item are described in Item 15 of this Annual Report on Form 10-K and are presented beginning on page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures. Our senior management is responsible for establishing and maintaining disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)), designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer’s management, including its principal executive officer or officers and principal financial officer or officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Evaluation of Disclosure Controls and Procedures. We have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report, with the participation of our Interim Chief Executive Officer and Acting Chief Financial Officer, as well as other key members of our management. Based on this evaluation, our Interim Chief Executive Officer and Acting Chief Financial Officer concluded that our disclosure controls and procedures were effective as of January 1, 2023.

Changes in Internal Control over Financial Reporting. No change occurred in our internal control over financial reporting during the fourth quarter of 2022 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

Our senior management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) and Rule 15d-15(f) under the Exchange Act), designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms.

Because of inherent limitations, a system of internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has evaluated the effectiveness of its internal control over financial reporting as of January 1, 2023 based on the criteria set forth in a report titled *Internal Control-Integrated Framework (2013)*, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, we have concluded that, as of January 1, 2023, our internal control over financial reporting was effective based on those criteria.

Our independent registered public accounting firm, RSM US LLP, has issued an audit report on the effectiveness of our internal control over financial reporting and their report is included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stockholders and the Board of Directors
Fiesta Restaurant Group, Inc.

Opinion on the Internal Control Over Financial Reporting

We have audited Fiesta Restaurant Group, Inc.'s (the "Company") internal control over financial reporting as of January 1, 2023, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 1, 2023, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements of the Company and our report dated March 2, 2023, expressed an unqualified opinion.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ RSM US LLP

Dallas, Texas
March 2, 2023

ITEM 9B. OTHER INFORMATION

In connection with Dirk Montgomery's appointment as Interim Chief Executive Officer of the Company on December 8, 2022, the Company entered into an offer letter (the "Offer Letter") dated December 8, 2022 with Mr. Montgomery, which provided among other items, that Mr. Montgomery will be eligible for annual equity grants which would represent an amount of the Company's common stock having a Fair Market Value (as defined in the Company's 2021 Stock Incentive Plan (the "2021 Plan")) on the date of grant equal to eighty-percent (80%) of his annual base salary, subject to the discretion of the Compensation Committee of the Company's Board of Directors. On February 28, 2023, the Company's Board of Directors authorized an increase to Mr. Montgomery's annual equity grants to an amount of the Company's common stock having a Fair Market Value (as defined in the 2021 Plan) on the date of grant equal to one-hundred percent (100%) of his annual base salary (instead of eighty-percent (80%) of his annual base salary pursuant to the Offer Letter), which percentage is consistent with the grant value which had been awarded to Mr. Montgomery annually while he was Chief Financial Officer, subject to the discretion of the Compensation Committee of the Company's Board of Directors. The equity grants are currently expected to be comprised of 50% restricted stock awards to be subject to time based vesting and 50% subject to performance-based vesting to be determined prior to the date of grant.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Incorporated by reference from our Definitive Proxy Statement to be filed in connection with the 2023 Annual Meeting of Stockholders.

We have adopted a written code of ethics applicable to our directors, officers and employees in accordance with the rules of The NASDAQ Stock Market and the SEC. We make our code of ethics available free of charge through our internet website, *www.frgi.com*. We will disclose on our website amendments to or waivers from our code of ethics in accordance with all applicable laws and regulations.

ITEM 16. FORM 10-K SUMMARY

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stockholders and the Board of Directors
Fiesta Restaurant Group, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheet of Fiesta Restaurant Group, Inc. (the Company) as of January 1, 2023, the related consolidated statements of operations, changes in stockholders' equity and cash flows, for the period ended January 1, 2023, and the related notes to the consolidated financial statements and the schedule listed in the Index at Item 15 (collectively the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of January 1, 2023, and the results of its operations and its cash flows for the period ended January 1, 2023, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of January 1, 2023, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013, and our report dated March 2, 2023, expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matters or on the accounts or disclosures to which it relates.

Impairment of Long-Lived Assets at the Restaurant Level

As described in Notes 4 and 8 to the financial statements, property and equipment, net as was \$87.1 million and operating lease right-of-use assets was \$146.7 million, respectively, as of January 1, 2023. As described in Notes 1 and 6 to the financial statements, the Company assesses the potential impairment of long-lived assets, principally property and equipment and operating lease right-of-use assets, whenever events or changes in circumstances indicate that the carrying value of the restaurant asset group may not be fully recoverable. The Company reviews its long-lived assets, principally property and equipment and lease right-of-use assets, for impairment at the restaurant level (asset group). If an indicator of impairment exists for any of its asset groups, an estimate of undiscounted future cash flows (exclusive of operating lease payments), over the life of the primary asset for each restaurant is compared to that long-lived asset group's carrying value, excluding operating lease liabilities. If the carrying value of the asset group is greater than the estimated future undiscounted cash flow, the Company then determines the fair value of the assets, and if an asset

is determined to be impaired, the impairment loss is measured by the excess of the carrying amount of the asset over its fair value. There is uncertainty in the projected undiscounted future cash flows and subjective assumptions used to determine the fair value of assets, including current market lease rent and discount rates for right-of-use lease assets. As discussed in Note 6 to the financial statements, during the year ended January 1, 2023, the Company recorded impairment charges for long-lived assets of \$2.3 million.

We identified the impairment of long-lived assets at the restaurant level as a critical audit matter due to the impact the judgments used by the Company in determining the undiscounted future cash flows, when an impairment indicator has been identified, and the determination of fair value of assets, when the carrying value of the asset group exceeds the undiscounted future cash flows, have on the accounting conclusion. Auditing management's judgments regarding estimated future cash flows and the fair value of assets involved a high degree of auditor judgement and increased audit effort, including the use of valuation specialists.

Our audit procedures related to the Company's impairment of long-lived assets at the restaurant level included the following, among others:

- We obtained an understanding of the relevant controls and tested such controls for design and operating effectiveness, including controls around estimates of future undiscounted cash flows and the determination of the fair value of assets.
- We evaluated the reasonableness of management's estimated future undiscounted cash flows by comparing them to:
 - Historical actual cash flows for the restaurant being evaluated
 - Strategic business plans and actions planned by the Company
 - Industry data
- We performed a comparison of actual results to prior management estimates.
- With the assistance of our valuation specialists, we developed an independent estimate of the fair value of the right-of-use assets utilizing market rent and discount rate assumptions and compared our independent estimate to management's estimates.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of
Fiesta Restaurant Group, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheet of Fiesta Restaurant Group, Inc. and subsidiaries (the “Company”) as of January 2, 2022, the related consolidated statements of operations, changes in stockholders’ equity, and cash flows, for each of the two years in the period ended January 2, 2022, and the related notes and the schedule listed in the Index at Item 15 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of January 2, 2022, and the results of its operations and its cash flows for each of the two years in the period ended January 2, 2022, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

1. Basis of Presentation

Business Description. Fiesta Restaurant Group, Inc. (“Fiesta Restaurant Group” or “Fiesta”) owns, operates and franchises Pollo Tropical restaurants through its wholly-owned subsidiaries Pollo Operations, Inc., and Pollo Franchise, Inc., (collectively “Pollo Tropical”). Fiesta owned, operated and franchised Taco Cabana restaurants through its wholly-owned subsidiary, Taco Cabana, Inc. and its subsidiaries (collectively “Taco Cabana”) through August 15, 2021. Unless the context otherwise requires, Fiesta and its subsidiaries are collectively referred to as the “Company.” At January 1, 2023, the Company owned and operated 137 Pollo Tropical® restaurants located in Florida and franchised a total of 32 Pollo Tropical restaurants. The franchised Pollo Tropical restaurants include 17 in Puerto Rico, two in Panama, one in Guyana, two in Ecuador, one in the Bahamas, and six on college campuses in Florida, and locations at one hospital and two sports and entertainment stadium in Florida.

Discontinued Operations. On July 1, 2021, the Company entered into a stock purchase agreement for the sale of Taco Cabana, Inc. and its subsidiaries (collectively “Taco Cabana”). On August 16, 2021, the Company completed the sale of Taco Cabana. The Company has classified the revenues, costs and expenses and income taxes attributable to the Taco Cabana business segment, together with certain costs related to the transaction, within income (loss) from discontinued operations, net of tax, on the consolidated statements of operations for all periods presented. See Note 2 — Dispositions. Unless otherwise noted, amounts and disclosures throughout these notes to the consolidated financial statements relate to the Company’s continuing operations.

Basis of Consolidation. The consolidated financial statements presented herein reflect the consolidated financial position, results of operations and cash flows of Fiesta and its wholly-owned subsidiaries. All intercompany transactions have been eliminated in consolidation.

Fiscal Year. The Company uses a 52 – 53 week fiscal year ending on the Sunday closest to December 31. The fiscal years ended January 1, 2023 and January 2, 2022 each contained 52 weeks. The fiscal year ended January 3, 2021 contained 53 weeks.

Reclassification. Certain prior period balances have been reclassified to conform to the current period presentation in the accompanying notes to the condensed consolidated financial statements.

Use of Estimates. The preparation of the consolidated financial statements in conformity with U.S. Generally Accepted Accounting Principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements. Estimates also affect the reported amounts of expenses during the reporting periods. Significant items subject to such estimates and assumptions include: insurance liabilities, evaluation for impairment of goodwill and long-lived assets, lease accounting matters, and deferred income tax assets. Actual results could differ from those estimates.

Concentrations of Risk. Food and supplies are ordered from approved suppliers and are shipped to the restaurants via distributors. Performance Food Group, Inc. is the primary distributor of food and beverage products and supplies for Pollo Tropical. In the years ended January 1, 2023 and January 2, 2022, Performance Food Group, Inc. accounted for approximately 97% and 96%, respectively, of the food and supplies delivered to restaurants. The Company’s limited distributor relationships could have an adverse effect on the Company’s operations.

Cash and Cash Equivalents. The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents.

Restricted Cash. The Company’s restricted cash is comprised of certain cash balances that are reserved as cash collateral for the Company’s existing letters of credit.

Inventories. Inventories, primarily consisting of food and paper, are stated at the lower of cost (first-in, first-out) or market.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

1. Basis of Presentation (cont.)

Property and Equipment. The Company capitalizes all direct costs incurred to construct and substantially improve its restaurants. These costs are depreciated and charged to expense based upon their property classification when placed in service. Property and equipment is recorded at cost. Application development stage costs for significant internally developed software projects are capitalized and amortized. Repairs and maintenance activities are expensed as incurred. Depreciation and amortization is provided using the straight-line method over the following estimated useful lives:

Buildings and improvements	5 to 30 years
Equipment	3 to 7 years
Computer hardware and software	3 to 7 years
Assets subject to finance lease	Shorter of useful life or lease term

Leasehold improvements, including new buildings constructed on leased land, are depreciated over the shorter of their estimated useful lives or the underlying lease term. In circumstances where an economic penalty would be presumed by the non-exercise of one or more renewal options under the lease, the Company includes those renewal option periods when determining the lease term for depreciation purposes. For significant leasehold improvements made during the latter part of the lease term, the Company amortizes those improvements over the shorter of their useful life or an extended lease term. The extended lease term would consider the exercise of renewal options if the value of the improvements would imply that an economic penalty would be incurred without the renewal of the option. Building costs incurred for new restaurants on leased land are depreciated over the lease term, which is generally a 20-year period.

Cloud-Based Computing Arrangements. The Company defers and amortizes application development stage costs for cloud-based computing arrangements over the life of the related service (subscription) agreement.

Goodwill. Goodwill represents the excess purchase price and related costs over the value assigned to the net tangible and identifiable intangible assets acquired by Carrols Restaurant Group, Inc. ("Carrols"), Fiesta's former parent company, from the acquisition of Pollo Tropical in 1998. Goodwill is not amortized but is assessed for impairment at least annually as of the last day of the fiscal year or more frequently if impairment indicators exist. See Note 5 — Goodwill.

Long-Lived Assets. The Company assesses the recoverability of property and equipment and definite-lived intangible assets, including right-of-use ("ROU") lease assets, by determining whether the carrying value of these assets can be recovered over their respective remaining lives through undiscounted future operating cash flows. Impairment is reviewed whenever events or changes in circumstances indicate that the carrying amounts of these assets may not be fully recoverable. See Note 6 — Impairment of Long-Lived Assets.

Deferred Financing Costs. Financing costs incurred and the original issue discount recognized in obtaining revolving credit facilities are capitalized and included within other assets on the consolidated balance sheets and are amortized over the life of the related credit facility as interest expense on a straight-line basis. Financing costs incurred and original issue discount recognized in obtaining long-term debt are capitalized and amortized over the term of the associated debt agreement as interest expense using the effective interest method. These financing costs and the original issue discount are presented as a reduction from the carrying amount of the related long-term debt balance on the consolidated balance sheets.

Leases. The Company assesses whether an agreement contains a lease at inception. All leases are reviewed for finance or operating classification once control is obtained. The majority of the Company's leases are operating leases. Operating leases are included within operating lease ROU assets, other current liabilities, and operating lease liabilities on the consolidated balance sheets. Finance leases are included within property and equipment, net, current portion of long-term debt, and long-term debt, net of current portion, on the consolidated balance sheets.

(Dollars in thousands, except per share data)

1. Basis of Presentation (cont.)

ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. The operating lease ROU asset also includes any lease payments made in advance and is reduced by lease incentives received. As most leases do not provide an implicit rate, the Company uses its incremental borrowing rate at commencement date in determining the present value of lease payments. Lease terms include options to extend the lease when it is reasonably certain that the Company will exercise that option. The Company assumes options are reasonably certain to be exercised when such options are required to achieve a minimum 20-year lease term for new restaurant properties and when it incurs significant leasehold improvement costs near the end of a lease term. The Company uses judgment and available data to allocate consideration in a contract when it leases land and a building. The Company also uses judgment in determining its incremental borrowing rate, which includes selecting a yield curve based on a synthetic credit rating determined using a valuation model. Lease expense for lease payments is recognized on a straight-line basis over the lease term unless the related ROU asset has been adjusted for an impairment charge. The Company has real estate lease agreements with lease and non-lease components, which are accounted for as a single lease component. See Note 8 — Leases.

The Company separately presents rent expense related to its closed restaurant locations and any sublease income related to these closed restaurant locations within closed restaurant rent expense, net of sublease income in the consolidated statement of operations.

Income Taxes. Deferred income tax assets and liabilities are based on the difference between the financial statement and tax bases of assets and liabilities as measured by the tax rates that are anticipated to be in effect when those differences reverse. The deferred tax provision generally represents the net change in deferred tax assets and liabilities during the period. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that includes the enactment date. A valuation allowance is established when it is necessary to reduce deferred tax assets to amounts for which realization is more likely than not. The Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position.

Advertising Costs. All advertising costs are expensed as incurred.

Cost of Sales. The Company includes the cost of food, beverage and paper, net of any discounts, in cost of sales. Cost of sales excludes depreciation and amortization expense, which are presented separately on the consolidated statement of operations.

Insurance. The Company is insured for workers' compensation, general liability and medical insurance claims under policies where it pays all claims, subject to stop-loss limitations both for individual claims and for general liability, medical insurance and certain workers' compensation claims in the aggregate. Losses are accrued based upon estimates of the aggregate liability for claims based on the Company's experience and certain actuarial methods used to measure such estimates. The Company does not discount any of its self-insurance obligations.

Fair Value of Financial Instruments. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date under current market conditions. In determining fair value, the accounting standards establish a three-level hierarchy for inputs used in measuring fair value as follows: Level 1 inputs are quoted prices in active markets for identical assets or liabilities; Level 2 inputs are observable for the asset or liability, either directly or indirectly, including quoted prices in active markets for similar assets or liabilities; and Level 3 inputs are unobservable and reflect management's own assumptions. The following methods were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate the fair value:

- *Current Assets and Liabilities.* The carrying values reported on the consolidated balance sheets of cash and restricted cash, accounts receivable and accounts payable approximate fair value because of the short maturity of those financial instruments.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

1. Basis of Presentation (cont.)

- *Term Loan Borrowings.* The fair value of outstanding term loan borrowings under the Company's senior credit facility, which is considered Level 2, is based on current LIBOR rates. There were no outstanding term loan borrowings as of January 1, 2023 and January 2, 2022 as the Company fully repaid the outstanding term loan borrowings on August 16, 2021.

See Note 6 for discussion of the fair value measurement of non-financial assets.

Revenue Recognition. Revenue is recognized upon transfer of promised products or services to customers in an amount that reflects the consideration the Company received in exchange for those products or services. Revenues from the Company's owned and operated restaurants are recognized when payment is tendered at the time of sale. Franchise royalty revenues are based on a percent of gross sales and are recorded as income when earned. Initial franchise fees and area development fees associated with new franchise agreements are not distinct from the continuing rights and services offered by the Company during the term of the related franchise agreements and are recognized as income over the term of the related franchise agreements. A portion of the initial franchise fee is allocated to training services and is recognized as revenue when the Company completes the training services.

Gift Cards. The Company sells gift cards to its customers in its restaurants and through select third parties. The Company recognizes revenue from gift cards upon redemption by the customer. For unredeemed gift cards that the Company expects to be entitled to breakage, the Company recognizes expected breakage as revenue in proportion to the pattern of redemption by the customers. The gift cards have no stated expiration dates. Revenues from unredeemed gift cards and gift card liabilities, which are recorded in other current liabilities, are not material to the Company's financial statements.

Loyalty Program. The Company's loyalty program for Pollo Tropical (My Pollo™) allows eligible customers who enroll in the program to earn points for every dollar spent. After accumulating a certain number of points, the customer earns a reward that can be used for future purchases at Pollo Tropical. Earned rewards expire 90 days after they are issued. Earned points that have not been converted to rewards do not currently expire.

The Company defers revenue associated with the estimated standalone selling price of points earned by customers as each point is earned, net of points the Company does not expect to be redeemed. The estimated standalone selling price of each point earned is based on the estimated value of the reward which is expected to be redeemed.

Loyalty revenue is recognized when a customer redeems an earned reward. For unredeemed rewards that the Company expects to be entitled to breakage, the Company recognizes expected breakage as revenue in proportion to the pattern of redemption of the rewards by the customers. The costs associated with rewards are recorded when they are redeemed and are included within cost of sales on the consolidated statements of operations. Deferred revenue associated with the rewards is included within other current liabilities on the consolidated balance sheets.

Guidance Adopted in 2021. In December 2019, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2019-12, *Income Taxes (Topic 740)* ("ASU No. 2019-12"), which is a part of the Simplification Initiative being undertaken by the FASB to reduce complexity of accounting standards. The amendments in this update simplify the accounting for income taxes by removing certain exceptions, the most notable for the Company being the exception to the general methodology for calculating income taxes in an interim period when the year-to-date loss exceeds the anticipated loss for the full year. The Company adopted this new accounting standard on January 4, 2021, and will apply it prospectively in each period after the date of adoption. The impact of the standard is largely dependent on interim and anticipated profit or loss in a given period, however the Company does not expect ASU No. 2019-12 to have a significant impact on its financial statements.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

1. Basis of Presentation (cont.)

Recent Accounting Pronouncements. In March 2020, the FASB issued ASU No. 2020-04, *Reference Rate Reform (Topic 848)* (“ASU No. 2020-04”), which provides optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions affected by reference rate reform if certain criteria are met. The amendments in this update are effective as of March 12, 2020, through December 31, 2022. As of January 1, 2023, the Company’s only exposure to LIBOR rates was the undrawn \$10.0 million revolving credit facility under its senior credit facility. Upon cessation of the LIBOR, the senior credit facility would use a benchmark replacement rate. According to ASU No. 2020-04, modifications of contracts within the scope of Topic 470 *Debt* should be accounted for by prospectively adjusting the effective interest rate. The Company does not expect ASU No. 2020-04 to have a significant impact on its financial statements.

2. Dispositions

On June 30, 2021, the Company’s Board of Directors approved a stock purchase agreement, which was subsequently entered into by the Company on July 1, 2021, for the sale of all of the outstanding capital stock of Taco Cabana, Inc., including nearly all related assets and liabilities, for a cash purchase price of \$85.0 million subject to reduction for (i) closing adjustments of approximately \$4.6 million and (ii) certain other working capital adjustments as set forth in the stock purchase agreement. The transaction was completed August 16, 2021 and the Company recognized a gain on the sale of Taco Cabana of \$25.0 million during the year ended January 2, 2022, which is included within income from discontinued operations, net of tax, in the consolidated statements of operations.

The Company filed an insurance claim for winter storm damages in Texas that occurred in the first quarter of 2021 and retained the right to receive the insurance claim proceeds. The Company recognized \$1.0 million and \$0.9 million of insurance proceeds within income (loss) from discontinued operations, net of tax, in the years ended January 1, 2023 and January 2, 2022, respectively. The Company expects to recognize any additional proceeds when the claim is ultimately resolved.

All revenues, costs and expenses and income taxes attributable to Taco Cabana, together with certain costs related to the transaction, have been aggregated within income (loss) from discontinued operations, net of tax, in the consolidated statements of operations for all periods presented. No amounts for shared general and administrative operating support expense were allocated to discontinued operations. Depreciation and amortization related to Taco Cabana property and equipment and lease ROU assets was not recorded after June 30, 2021 when Taco Cabana was classified as held for sale. As required by the terms of the senior credit facility, the proceeds from the sale were used to fully repay Fiesta’s outstanding term loan borrowings on August 16, 2021. The early repayment was subject to a 103% loan prepayment premium. Interest expense and amortization of discount and debt issuance costs related to the term loan portion of the senior credit facility are included within income (loss) from discontinued operations, net of tax.

Upon completion of the sale of Taco Cabana, the Company began providing certain services to Taco Cabana subject to a transition services agreement which expired on December 13, 2021. The Company recognized \$0.5 million in income under the transition services agreement for the year ended January 2, 2022, which was recorded as a reduction to general and administrative expense. The Company retained certain closed Taco Cabana restaurant leases, including the associated operating lease right-of-use assets and operating lease liabilities. The Company also retained liability for Taco Cabana’s accrued worker’s compensation and general liability claims for periods prior to the sale. These liabilities are recognized in other current liabilities and other non-current liabilities in the consolidated balance sheets. As there are estimates and assumptions inherent in recording these insurance liabilities, including the ability to estimate the future development of incurred claims based on historical trends or the severity of the claims, differences between actual future events and prior estimates and assumptions will result in adjustments to these liabilities.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

2. Dispositions (cont.)

During the year ended January 1, 2023, income from discontinued operations, net of tax, of \$1.1 million was primarily due to insurance proceeds received and a reduction of stock-based compensation of \$(0.1) million, partially offset by workers compensation and general liability claims. A summary of the results of the discontinued operations for the years ended January 2, 2022 and January 3, 2021 is as follows:

	Year Ended	
	January 2, 2022	January 3, 2021
Major classes of line items constituting pretax loss of discontinued operations:		
Revenues:		
Total revenues	\$ 152,339	\$ 239,445
Costs and expenses:		
Cost of sales	43,480	70,433
Restaurant wages and related expenses (including stock-based compensation expense of \$172 and \$127, respectively)	48,399	74,817
Restaurant rent expense	12,995	22,588
Other restaurant operating expenses	24,814	34,357
General and administrative (including stock-based compensation expense of \$1,688 and \$603, respectively)	11,442	13,229
Depreciation and amortization	7,799	16,197
Pre-opening costs	—	69
Other income and expense items that are not major	3,935	10,133
Total operating expenses	<u>152,864</u>	<u>241,823</u>
Loss from operations	(525)	(2,378)
Interest expense	4,678	4,464
Gain on sale of Taco Cabana	(24,979)	—
Loss on extinguishment of debt	5,307	1,241
Income (loss) from discontinued operations before income taxes	<u>14,469</u>	<u>(8,083)</u>
Benefit from income taxes	(3,986)	(1,258)
Income (loss) from discontinued operations, net of tax	<u>\$ 18,455</u>	<u>\$ (6,825)</u>

FIESTA RESTAURANT GROUP, INC.

2. Dispositions (cont.)

A summary of significant investing activity and non-cash operating, investing, and financing activity of the discontinued operations from the consolidated statements of cash flows is as follows:

	Year Ended	
	January 2, 2022	January 3, 2021
Non-cash operating activities:		
Loss (gain) on disposals of property and equipment, net	\$ (217)	\$ (551)
Stock-based compensation	1,860	730
Impairment and other lease charges	132	1,116
Loss on extinguishment of debt	5,307	1,241
Gain on sale of Taco Cabana	(24,979)	—
Depreciation and amortization	7,799	16,197
Investing activities:		
Capital expenditures:		
New restaurant development	\$ —	\$ (854)
Restaurant remodeling	(1,283)	(745)
Other restaurant capital expenditures	(5,050)	(4,728)
Corporate and restaurant information systems	(169)	(1,559)
Total capital expenditures	(6,502)	(7,886)
Proceeds received from sale of Taco Cabana	74,910	—
Proceeds from disposals of properties	1,307	4,305
Proceeds from sale-leaseback transactions	3,083	3,966
Net cash provided by investing activities – discontinued operations . . .	<u>\$ 72,798</u>	<u>\$ 385</u>
Supplemental cash flow disclosures:		
Interest paid on long-term debt (including capitalized interest of \$0 and \$57, respectively)	\$ 4,338	\$ 4,001
Supplemental cash flow disclosures of non-cash investing and financing activities:		
Accruals for capital expenditures	\$ —	\$ 1,027
Accruals for financing costs associated with debt amendment	—	277
Right-of-use assets obtained in exchange for lease liabilities:		
Operating lease ROU assets	5,156	18,466
Finance lease ROU assets	—	33
Right-of-use assets and lease liabilities reduced for terminated leases:		
Operating lease ROU assets	2,695	953
Operating lease liabilities	3,443	1,217

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

3. Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets, consist of the following:

	January 1, 2023	January 2, 2022
Prepaid contract expenses	\$ 4,471	\$ 4,462
Other	1,210	1,244
	<u>\$ 5,681</u>	<u>\$ 5,706</u>

4. Property and Equipment

Property and equipment consisted of the following:

	January 1, 2023	January 2, 2022
Leasehold improvements ⁽¹⁾	\$ 135,805	\$ 132,641
Equipment	119,029	117,652
Assets subject to finance leases	850	850
	<u>255,684</u>	<u>251,143</u>
Less accumulated depreciation and amortization	<u>(168,578)</u>	<u>(161,259)</u>
	<u>\$ 87,106</u>	<u>\$ 89,884</u>

(1) Leasehold improvements include the cost of new buildings constructed on leased land.

Assets subject to finance leases primarily pertain to buildings leased for certain restaurant locations and fleet vehicles, and had accumulated amortization at January 1, 2023 and January 2, 2022 of \$0.6 million and \$0.6 million, respectively.

Depreciation and amortization expense for property and equipment for the years ended January 1, 2023, January 2, 2022 and January 3, 2021 was \$20.1 million, \$20.6 million and \$22.0 million, respectively.

5. Goodwill

The Company is required to review goodwill for impairment annually or more frequently when events and circumstances indicate that the carrying amount may be impaired. If the determined fair value of goodwill is less than the related carrying amount, an impairment loss is recognized. The Company performs its annual impairment assessment as of the last day of the fiscal year and has determined its reporting unit to be its operating segment, Pollo Tropical.

There were no changes in goodwill or goodwill impairment losses recorded for the Pollo Tropical reporting unit during the years ended January 1, 2023, January 2, 2022 and January 3, 2021.

The Company's annual goodwill impairment assessments as of January 1, 2023, January 2, 2022 and January 3, 2021 were performed using a qualitative assessment, which included examining key events and circumstances affecting fair value and indicated that it is more likely than not that the Pollo Tropical reporting unit's fair value is greater than its carrying value.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

5. Goodwill (cont.)

A summary of changes in goodwill during the years ended January 1, 2023, January 2, 2022 and January 3, 2021 is as follows:

	January 1, 2023	January 2, 2022	January 3, 2021
Goodwill, gross.	\$ 56,307	\$ 56,307	\$ 56,307
Accumulated impairment losses.	—	—	—
Goodwill.	<u>\$ 56,307</u>	<u>\$ 56,307</u>	<u>\$ 56,307</u>

6. Impairment of Long-Lived Assets and Other Lease Charges (Recoveries)

The Company reviews its long-lived assets, principally property and equipment and lease ROU assets, for impairment at the restaurant level. The Company has elected to exclude operating lease payments and liabilities from future cash flows and carrying values, respectively, in its impairment review. In addition to considering management's plans, known regulatory or governmental actions and damage due to acts of God (hurricanes, tornadoes, etc.), the Company considers a triggering event to have occurred related to a specific restaurant if the restaurant's cash flows, exclusive of operating lease payments, for the last twelve months are less than a minimum threshold or if consistent levels of cash flows for the remaining lease period are less than the carrying value of the restaurant's assets. If an indicator of impairment exists for any of its assets, an estimate of undiscounted future cash flows, exclusive of operating lease payments, over the life of the primary asset for each restaurant is compared to that long-lived asset group's carrying value, excluding operating lease liabilities. If the carrying value is greater than the undiscounted cash flow, the Company then determines the fair value of the asset and if an asset is determined to be impaired, the loss is measured by the excess of the carrying amount of the asset over its fair value. There is uncertainty in the projected undiscounted future cash flows used in the Company's impairment review analysis. If actual performance does not achieve the projections, the Company may recognize impairment charges in future periods, and such charges could be material.

A summary of impairment of long-lived assets, which also includes right-of-use asset impairment, and other lease charges (recoveries) is as follows:

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021
Impairment of long-lived assets	\$ 2,288	\$ 2,095	\$ 7,318
Other lease charges (recoveries)	(874)	(557)	705
	<u>\$ 1,414</u>	<u>\$ 1,538</u>	<u>\$ 8,023</u>

The Company closed one Pollo Tropical restaurant as a result of a lease termination in 2022. Additionally, the Company closed one Pollo Tropical restaurant as a result of a lease termination, one Pollo Tropical restaurant as the result of the sale of a property and two Pollo Tropical restaurants as a result of a limited restaurant portfolio review in 2020.

Impairment charges in 2022 were related primarily to eight underperforming Pollo Tropical restaurants, one of which closed in the fourth quarter of 2022, for which continued performance declines resulted in a decrease in the estimated future cash flows. Other lease charges (recoveries) consist of net gains from lease terminations and a lease term reassessment.

Impairment charges in 2021 were related primarily to five underperforming Pollo Tropical restaurants for which continued sales declines coupled with the impact of expected sales declines resulted in a decrease in the estimated future cash flows and impairment of equipment from previously closed restaurants. Other lease charges (recoveries) consist of net gains from lease terminations.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

6. Impairment of Long-Lived Assets and Other Lease Charges (Recoveries) (cont.)

Impairment charges in 2020 were related primarily to three underperforming Pollo Tropical restaurants, two of which were closed in the third quarter of 2020, for which continued sales declines coupled with the impact of expected sales declines resulted in a decrease in the estimated future cash flows. Additionally, impairment charges consisted of the write-down of saucing islands and self-service soda machines that were removed from Pollo Tropical dining rooms as a result of COVID-19 and the write-down of assets held for sale to their fair value less costs to sell. Other lease charges in 2020 related primarily to lease termination charges of \$0.9 million for Pollo Tropical restaurant locations the Company decided not to develop, net of a gain from lease terminations of \$(0.2) million.

The Company determined the fair value of restaurant equipment, for those restaurants reviewed for impairment, based on current economic conditions, the Company's history of using these assets in the operation of its business and the Company's expectation of how a market participant would value the assets. In addition, for those restaurants reviewed for impairment where the Company owns the land and building, the Company utilized third-party information such as a broker quoted value to determine the fair value of the property. The Company also utilized discounted future cash flows to determine the fair value of assets for certain leased restaurants with positive discounted projected future cash flows. The Company utilized current market lease rent and discount rates to determine the fair value of right-of-use lease assets. These fair value asset measurements rely on significant unobservable inputs and are considered Level 3 in the fair value hierarchy. The Level 3 assets measured at fair value associated with impairment charges recorded during the years ended January 1, 2023 and January 2, 2022 totaled \$1.7 million and \$0.4 million, respectively.

7. Other Liabilities

Other current liabilities consist of the following:

	January 1, 2023	January 2, 2022
Operating lease liabilities	\$ 10,496	\$ 10,381
Accrued workers' compensation and general liability claims.	2,623	3,083
Sales and property taxes	981	921
Other	3,580	3,647
	<u>\$ 17,680</u>	<u>\$ 18,032</u>

Other non-current liabilities consist of the following:

	January 1, 2023	January 2, 2022
Accrued workers' compensation and general liability claims.	6,000	6,432
Deferred compensation.	273	320
Other	935	1,011
	<u>\$ 7,208</u>	<u>\$ 7,763</u>

8. Leases

The Company utilizes land and buildings in its operations under various operating and finance lease agreements. The Company does not consider any one of these individual leases material to the Company's operations. Initial lease terms are generally for 20 years and, in many cases, provide for renewal options and in most cases rent escalations. As of January 1, 2023, the Company's leases have remaining lease terms of 0.5 years to 18.0 years. Some of the Company's leases include options to extend the lease for up to 30 additional years. Certain leases require contingent rent, determined as a percentage of sales as defined by the terms of the applicable lease agreement. For most locations, the Company is obligated for occupancy related costs including payment of property taxes, insurance and utilities. Variable lease payments included in rent expense consist of such contingent rent, certain rent payments based on changes in an index and certain occupancy related costs, such as variable common area maintenance expense and

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

8. Leases (cont.)

property taxes. The Company is not subject to residual value guarantees under any of the lease agreements. Many of the Company's real estate leases contain usage restrictions, but its leases do not contain financial covenants and restrictions.

During the year ended January 3, 2021, the Company completed five sale-leaseback transactions with third parties. The sale-leaseback transactions do not provide for any continuing involvement by the Company other than normal leases where the Company intends to use the property during the lease term. The net proceeds of the sales were \$13.3 million which resulted in a net gain of \$2.7 million which is included within other expense (income), net, on the consolidated statement of operations. The leases have initial terms of 20 years plus renewal options and have been accounted for as operating leases.

Lease expense consisted of the following:

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021
Operating lease cost	\$ 25,946	\$ 26,375	\$ 26,026

Total discounted lease liabilities	165,851	429
Less current portion	(10,496)	(62)
Long-term portion of lease liabilities	<u>\$ 155,355</u>	<u>\$ 367</u>

The Company subleases land and buildings related to closed restaurant locations under various operating sublease agreements. Initial sublease terms are generally for the period of time remaining on the head lease term and, in some cases, subleases provide for renewal options and in most cases rent escalations. As of January 1, 2023, the Company's subleases have remaining sublease terms of 0.5 years to 14.5 years. Some of the Company's subleases include options to extend the lease for up to 25 years. Variable lease payments included in sublease income consist of certain occupancy related costs, such as variable common area maintenance expense and property taxes where the Company makes the real estate payment and is reimbursed by the lessee. The sublease agreements do not include residual value guarantees. Consistent with the Company's real estate leases, many of the subleases contain usage restrictions, but its subleases do not contain financial covenants and restrictions.

8. Leases (cont.)

The undiscounted cash flows to be received under operating subleases were as follows:

	Operating Leases
2023.....	\$ 6,308
2024.....	6,365
2025.....	6,536
2026.....	6,737
2027.....	6,868
Thereafter	41,805
Total	<u>\$ 74,619</u>

9. Long-Term Debt

Long-term debt at January 1, 2023 and January 2, 2022 consisted of the following:

	January 1, 2023	January 2, 2022
Finance leases	\$ 429	\$ 501
Less: current portion of long-term debt	(62)	(63)
	<u>\$ 367</u>	<u>\$ 438</u>

Senior Credit Facility. On November 23, 2020, the Company terminated its former senior secured revolving credit facility, referred to as the “former senior credit facility,” and entered into a new senior secured credit facility among the Company and the lenders, which is referred to as the “senior credit facility.” The senior credit facility is comprised of a term loan facility (the “term loan facility”) of \$75.0 million and a revolving credit facility (the “revolving credit facility”) of up to \$10.0 million and matures on November 23, 2025. The senior credit facility also provides for potential incremental term loan borrowing increases of up to \$37.5 million in the aggregate, subject to, among other items, compliance with a minimum Total Leverage Ratio and other terms specified in the senior credit facility. As required by the terms of the senior credit facility, the proceeds from the sale of Taco Cabana were used to fully repay the outstanding term loan borrowings on August 16, 2021. The early repayment was subject to a 103% loan prepayment premium. On January 1, 2023, there were no borrowings under the revolving credit facility.

The senior credit facility provides that the Company must maintain minimum Liquidity (as defined in the senior credit facility) of \$20.0 million (the “Liquidity Threshold”) until January 3, 2022. The senior credit facility also provides that the Company is not required to be in compliance with the Total Leverage Ratio under the senior credit facility until January 3, 2022 or the date in which Liquidity is less than the Liquidity Threshold. The Company will be permitted to exercise equity cure rights with respect to compliance with the Total Leverage Ratio subject to certain restrictions as set forth in the senior credit facility.

Borrowings under the senior credit facility bear interest at a rate per annum, at the Company’s option, equal to either (all terms as defined in the senior credit facility):

- 1) the Base Rate plus the Applicable Margin of 6.75% with a minimum Base Rate of 2.00%, or
- 2) the LIBOR (or Benchmark Replacement) Rate plus the Applicable Margin of 7.75%, with a minimum LIBOR (or Benchmark Replacement) Rate of 1.00%.

In addition, the senior credit facility requires the Company to pay a commitment fee of 0.50% per annum on the daily amount of the unused portion of the revolving credit facility.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

9. Long-Term Debt (cont.)

The outstanding borrowings under the revolving credit facility are prepayable without penalty or premium (other than customary breakage costs). The outstanding borrowings under the term loan facility were voluntarily prepayable by the Company, and the senior credit facility required that proceeds received when certain prepayment events (as defined in the senior credit facility) occurred must be used to reduce the outstanding revolver and term loan borrowings under the senior credit facility. Voluntary and mandatory prepayments of the term loan facility were subject to payment of an Applicable Premium as defined under the senior credit facility.

The Company's senior credit facility contains customary default provisions, including without limitation, a cross default provision pursuant to which it is an event of default under this facility if there is a default under any of the Company's indebtedness having an outstanding principal amount in excess of \$5.0 million which results in the acceleration of such indebtedness prior to its stated maturity or is caused by a failure to pay principal when due.

The senior credit facility contains certain covenants, including, without limitation, those limiting the Company's ability to, among other things, incur indebtedness, incur liens, sell or acquire assets or businesses, change the character of its business in any material respects, engage in transactions with related parties, make certain investments, make certain restricted payments or pay dividends.

The Company's obligations under the senior credit facility are secured by all of the Company's and its subsidiaries' assets (including a pledge of all of the capital stock and equity interests of our subsidiaries).

Under the senior credit facility, the lenders may terminate their obligation to advance and may declare the unpaid balance of borrowings, or any part thereof, immediately due and payable upon the occurrence and during the continuance of customary defaults which include, without limitation, payment default, covenant defaults, bankruptcy type defaults, defaults on other indebtedness, certain judgments or upon the occurrence of a change of control (as specified in the senior credit facility).

As of January 1, 2023, the Company was in compliance with the financial covenants under its senior credit facility. At January 1, 2023, \$10.0 million was available for borrowing under the revolving credit facility.

At January 1, 2023, there were no principal payments required on borrowings under the senior credit facility over each of the next five years.

Interest expense on the Company's long-term debt was \$0.2 million, \$4.9 million and \$4.7 million for the years ended January 1, 2023, January 2, 2022 and January 3, 2021, respectively. For the years ended January 2, 2022 and January 3, 2021, \$4.7 million and \$4.5 million, respectively, was included in income (loss) from discontinued operations.

For the years ended January 2, 2022 and January 3, 2021, the Company recognized a loss on extinguishment of debt totaling \$5.3 million and \$1.2 million, respectively, for unamortized deferred financing costs related to the capacity reduction and termination of the term loan under its senior credit facility and its former senior credit facility, which is included in income (loss) from discontinued operations for the years ended January 2, 2022 and January 3, 2021.

10. Income Taxes (cont.)

The Company establishes a valuation allowance to reduce the carrying amount of deferred income tax assets when it is more likely than not that it will not realize some portion or all of the tax benefit of its deferred tax assets. The Company evaluates whether its deferred income tax assets are probable of realization on a quarterly basis. In performing this analysis, the Company considers all available positive and negative evidence including historical operating results, the estimated timing of future reversals of existing taxable temporary differences and, when appropriate, estimated future taxable income exclusive of reversing temporary differences and carryforwards. In 2019, the Company determined that it was more likely than not that its deferred tax assets would not be fully realized in future periods and established a valuation allowance against federal and state deferred tax assets. At January 1, 2023 and January 2, 2022, the Company had a valuation allowance of \$25.8 million and \$20.4 million, respectively, against deferred income tax assets where it was determined to be more likely than not that the deferred income tax assets will not be realized through the reversal of existing deferred tax liabilities. The valuation allowance increased \$5.4 million in 2022, of which \$6.6 million is recorded in continuing operations related to changes in the Company's deferred tax assets and liabilities and a decrease of \$1.2 million is recorded in discontinued operations primarily related to adjustments to the capital loss carryforward resulting from the sale of Taco Cabana that the Company does not expect to realize. The valuation allowance increased \$10.3 million in 2021 of which \$1.2 million is recorded in continuing operations related to changes in the Company's deferred tax assets and liabilities and \$9.0 million is recorded in discontinued operations primarily related to the capital loss carryforward resulting from the sale of Taco Cabana that the Company does not expect to realize. The Company's 2021 income tax provision also includes \$0.7 million from changes in tax laws and rates and changes in judgement about the realization of deferred tax assets. The Company's ability to utilize deferred income tax assets and estimate future taxable income for federal and state purposes can significantly change based on future events and operating results.

The Company has deferred tax benefits of \$1.2 million related to federal employment tax credits which, if unutilized after various times beginning in 2038, will have a reduced value of \$0.3 million. The Company also has a deferred tax benefit of \$1.3 million (for which a valuation allowance has been established) related to a Florida net operating loss carryforward that has no expiration date. The Company has a federal net operating loss carryforward of \$11.3 million that does not expire. In addition, the Company has federal capital loss carryforwards of \$37.3 million, which will expire in 2026 (for which a valuation allowance has been established).

The Company's effective tax rate was (6.6)%, (15.5)%, and 67.5% for the years ended January 1, 2023, January 2, 2022 and January 3, 2021, respectively. A reconciliation of the statutory federal income tax provision (benefit) to the effective tax provision (benefit) was as follows:

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021
Statutory federal income tax provision (benefit)	\$ (3,086)	\$ (1,471)	\$ (2,190)
State income taxes, net of federal benefit.	(216)	(617)	(351)

10. Income Taxes (cont.)

Tax Law Changes. On March 27, 2020, the CARES Act was signed into law. The CARES Act includes provisions that allow net operating losses in 2018, 2019 and 2020 to be carried back for up to five years and eliminates the 80% taxable income limitation on net operating loss deductions for 2018 through 2020. The CARES Act also includes technical amendments that are retroactive to 2018 which permit certain assets to be classified as qualified improvement property and expensed immediately. These changes allowed the Company to record an incremental benefit of \$3.8 million, which represents the impact of carrying net operating losses from 2018 and 2019 back to years with a higher federal corporate income tax rate as well as reclassifying certain assets as qualified improvement property and other changes to depreciation methods for certain assets made in conjunction with a cost segregation study conducted prior to filing the Company's 2019 federal income tax return in 2020.

Unrecognized Tax Benefits. The Company is currently under examination by the Internal Revenue Service for the tax years 2013 – 2019. It is not currently under examination by any other taxing jurisdictions. The tax years 2013 – 2021 remain open to examination by the taxing jurisdictions to which the Company is subject. Although it is not reasonably possible to estimate the amount by which unrecognized tax benefits may increase within the next twelve months due to uncertainties regarding the timing of any examinations, the Company does not expect unrecognized tax benefits to significantly change in the next twelve months.

A reconciliation of the changes in the gross balance of unrecognized tax benefits was as follows:

	Year Ended	
	January 1, 2023	January 2, 2022
Balance, beginning of period	\$ 1,958	\$ —
Increases related to tax positions taken during the current year	—	—
Increases (Decrease) related to tax positions taken during the prior year	(36)	1,958
Decreases related to settlements with taxing authorities	—	—
Decreases related to lapse of applicable statute of limitations	—	—
Balance, end of period	<u>\$ 1,922</u>	<u>\$ 1,958</u>

As of January 1, 2023, the total amount of unrecognized tax benefits that, if recognized, would reduce the effective tax rate, is \$1.7 million after considering the federal impact of state income taxes.

The Company recognizes interest and/or penalties related to uncertain tax positions in income tax expense. The Company recognized an expense of \$0.1 million related to interest and penalties for uncertain tax positions for the year ended January 2, 2022. The Company had no interest and penalties for uncertain tax positions for the year ended January 3, 2021. As of January 1, 2023 and January 2, 2022, the Company had accrued interest and penalties related to uncertain tax positions of \$0.1 million included within other current liabilities on the consolidated balance sheet.

11. Stockholders' Equity

Purchase of Treasury Stock

In 2018, the Company's board of directors approved a share repurchase program for up to 1,500,000 shares of the Company's common stock. In 2019, the Company's board of directors approved increases to the share repurchase program of an additional 1,500,000 shares of the Company's common stock for an aggregate approval of 3,000,000 shares of the Company's common stock. Under the share repurchase program, shares may be repurchased from time to time in open market transactions at prevailing market prices, in privately negotiated transactions or by other means in accordance with federal securities laws, including Rule 10b-18 under the Securities Exchange Act of 1934, as amended. The share repurchase program has no time limit and may be modified, suspended, superseded or terminated at any time by the Company's board of directors. Under the share repurchase program, the Company repurchased 14,746 shares of common stock valued at approximately \$0.2 million and 854,297 shares of common stock valued at approximately \$9.4 million during the years ended January 1, 2023 and January 2, 2022, respectively. Additionally, as

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

11. Stockholders' Equity (cont.)

a result of net share settlement to satisfy the minimum statutory tax withholding requirements for certain employees, the Company repurchased 104,101 shares of common stock valued at approximately \$0.7 million during the year ended January 1, 2023. The repurchased shares are held as treasury stock at cost.

Stock-Based Compensation

On April 28, 2021, the stockholders of the Company approved the Fiesta Restaurant Group, Inc. 2021 Stock Incentive Plan (the "2021 Plan") in order to be able to compensate its employees and directors by issuing stock options, stock appreciation rights, or stock awards to them under this plan. The aggregate number of shares of stock authorized for grants or awards under the 2021 Plan is 1,744,039 shares, which is comprised of an original authorization of 2,000,000 shares reduced for shares granted under the 2012 Plan subsequent to March 1, 2021. Additionally, any shares of stock granted under the 2012 Plan that are cancelled, forfeited, terminated or settled in cash become available for grants or awards under the 2021 Plan unless the awards are tendered, cancelled, forfeited, withheld or terminated in order to pay the exercise price, purchase price or any taxes or tax withholdings. As of January 1, 2023, there were 1,248,717 shares available for future grants or awards under the 2021 Plan.

During the year ended January 1, 2023, the Company granted certain employees a total of 227,781 non-vested restricted shares under the 2021 Plan that vest and become non-forfeitable over a four-year vesting period. Additionally, during the year ended January 1, 2023, the Company granted certain employees a total of 185,000 non-vested restricted shares under the 2021 Plan that vest and become non-forfeitable over a one-year vesting period. During the years ended January 2, 2022 and January 3, 2021, the Company granted certain employees in the aggregate 153,998 and 422,446 non-vested restricted shares, respectively, under the 2012 Plan. Shares granted to employees during the years ended January 2, 2022 and January 3, 2021 vest and become non-forfeitable over a four-year vesting period. Additionally, during the year ended January 3, 2021, the Company granted certain employees 366,445 non-vested restricted shares that fully vest and become non-forfeitable after two years. The weighted average fair value at the grant date for restricted non-vested shares issued during the years ended January 1, 2023, January 2, 2022 and January 3, 2021 was \$9.23 per share, \$17.43 per share and \$9.33 per share, respectively.

During the year ended January 1, 2023, the Company granted non-employee directors 80,268 non-vested restricted shares under the 2021 Plan. During the years ended January 2, 2022 and January 3, 2021, the Company granted non-employee directors 37,874 and 79,260 non-vested restricted shares, respectively, under the 2012 Plan. The weighted average fair value at the grant date for restricted non-vested shares issued to directors during the years ended January 1, 2023, January 2, 2022 and January 3, 2021 was \$6.79 per share, \$14.39 per share and \$8.16 per share, respectively. These shares vest and become non-forfeitable over a one-year vesting period, or for certain grants to new directors, over a five-year vesting period.

During the year ended January 1, 2023, the Company also granted certain employees a total of 107,539 restricted stock units under the 2021 Plan subject to performance conditions. The restricted stock units vest and become non-forfeitable at the end of a three-year vesting period. The number of shares into which these restricted stock units convert is based on the attainment of certain financial performance conditions and ranges from no shares, if the minimum performance condition is not met, to 215,078 shares if the maximum performance condition is met. The weighted average fair value at grant date for the restricted stock units granted during the year ended January 1, 2023 was \$9.02 per share. During the year ended January 1, 2023, 41,436 shares vested as a result of the departure of the former Chief Executive Officer.

During the year ended January 2, 2022, the Company granted certain employees a total of 64,089 restricted stock units under the 2012 Plan subject to performance conditions, of which 4,619 restricted stock units related to discontinued operations. The restricted stock units vest and become non-forfeitable at the end of a three-year vesting period. The number of shares into which these restricted stock units convert is based on the attainment of certain financial performance conditions and ranges from no shares, if the minimum performance condition is not met, to

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

11. Stockholders' Equity (cont.)

128,178 shares if the maximum performance condition is met. The weighted average fair value at grant date for the restricted stock units granted during the year ended January 2, 2022 was \$17.43 per share. During the year ended January 1, 2023, 21,443 shares vested as a result of the departure of the former Chief Executive Officer.

Stock-based compensation expense is measured at the grant date based on the fair value of the award and is recognized as expense over the applicable requisite service period of the award (the vesting period) using the straight-line method, or for restricted stock units subject to market performance conditions using the accelerated method. Forfeitures are recognized as they occur. Stock-based compensation expense from continuing operations for the years ended January 1, 2023, January 2, 2022 and January 3, 2021 was \$6.1 million, \$4.2 million and \$2.8 million, respectively. Stock-based compensation expense from discontinued operations for the years ended January 1, 2023, January 2, 2022 and January 3, 2021 was \$(0.1) million, \$1.9 million and \$0.7 million, respectively. As of January 1, 2023, the total unrecognized stock-based compensation expense related to non-vested shares and restricted stock units was approximately \$3.4 million. At January 1, 2023, the remaining weighted average vesting period for non-vested restricted shares was 1.4 years and restricted stock units was 1.8 years.

A summary of all non-vested restricted shares and restricted stock units activity for the year ended January 1, 2023 is as follows:

	Non-Vested Shares		Restricted Stock Units	
	Shares	Weighted Average Grant Date Fair Value	Units	Weighted Average Grant Date Fair Value
Outstanding at January 2, 2022	769,018	\$ 11.19	64,175	\$ 17.45
Granted	493,049	8.83	107,539	9.02
Vested/Released	(558,012)	10.89	(62,879)	11.89
Forfeited	(86,308)	10.97	(5,021)	17.43
Outstanding at January 1, 2023	<u>617,747</u>	<u>\$ 9.61</u>	<u>103,814</u>	<u>\$ 12.09</u>

The fair value of the non-vested restricted shares and all other restricted stock units is based on the closing price on the date of grant.

The fair value of the shares vested and released during the years ended January 1, 2023, January 2, 2022 and January 3, 2021 was \$4.5 million, \$5.4 million and \$1.2 million, respectively.

During the year ended January 1, 2023, 558,012 non-vested restricted shares and 62,879 shares subject to previously granted restricted stock units vested. A portion of these vested stock awards were net share settled. Based upon the Company's closing stock price on the vesting date, the Company withheld 104,101 shares related to previously non-vested restricted shares and 24,744 shares related to restricted stock units to settle the employees' minimum statutory obligation for the applicable income and other employment taxes. Subsequently, the Company remitted the required funds to the appropriate taxing authorities.

Total payments for the employees' tax obligations to the relevant taxing authorities were \$0.9 million for the year ended January 1, 2023 and are reflected as a financing activity within the consolidated statements of cash flows. The payments were used for tax withholdings related to the net share settlements of previously non-vested shares and restricted stock units. The payments related to the non-vested restricted shares were treated as share repurchases and recorded as an addition to treasury stock. The payments related to restricted stock units had the effect of share repurchases by the Company as they reduced the number of shares that would have otherwise been issued on the vesting date and were recorded as a reduction of additional paid-in capital.

FIESTA RESTAURANT GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except per share data)

12. Earnings (Loss) Per Share

Basic earnings (loss) per share (“EPS”) is computed by dividing net income (loss) applicable to common shares by the weighted average number of common shares outstanding during each period. Non-vested restricted shares contain a non-forfeitable right to receive dividends on a one-to-one per share ratio to common shares and are thus considered participating securities. The impact of the participating securities is included in the computation of basic EPS pursuant to the two-class method. The two-class method of computing EPS is an earnings allocation formula that determines earnings attributable to common shares and participating securities according to dividends declared (whether paid or unpaid) and participation rights in undistributed earnings. EPS is computed by dividing undistributed earnings allocated to common stockholders by the weighted average number of common shares outstanding for the period. In applying the two-class method, undistributed earnings are allocated to both common shares and non-vested restricted shares based on the weighted average shares outstanding during the period.

Diluted EPS reflects the potential dilution that could occur if the restricted stock units were to be converted into common shares. Restricted stock units with performance conditions are only included in the diluted EPS calculation to the extent that performance conditions have been met at the measurement date. Diluted EPS is computed by adjusting the basic weighted average number of common shares by the dilutive effect of the restricted stock units, determined using the treasury stock method.

For the years ended January 1, 2023, January 2, 2022 and January 3, 2021, all restricted stock units outstanding were excluded from the computation of diluted earnings per share because including restricted stock units would have been antidilutive as a result of the loss from continuing operations in the period.

The computation of basic and diluted EPS is as follows:

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021
Basic and diluted EPS:			
Loss from continuing operations	\$ (15,661)	\$ (8,085)	\$ (3,386)

(Dollars in thousands, except per share data)

13. Related Party Transactions

The Company engaged Jefferies LLC (“Jefferies”), an affiliate of one of the current members of Fiesta’s board of directors, and a subsidiary of Jefferies Financial Group, Inc, a holder of more than 20 percent of the total outstanding shares of Fiesta in connection with a refinancing of the Company’s former amended senior credit facility in 2020 and other advisory services including services related to the sale of Taco Cabana. The Company paid fees of \$1.7 million to Jefferies and reimbursed Jefferies for reasonable out of pocket and ancillary expenses of less than \$0.1 million when the refinancing was completed in 2020. The Company paid Jefferies a transaction fee of \$2.0 million upon the sale of Taco Cabana in the third quarter of 2021. As of January 1, 2023 and January 2, 2022, there were no amounts due to the related party recognized on the consolidated balance sheets.

14. Supplemental Cash Flow Information

The following table details supplemental cash flow information and disclosures of non-cash investing and financing activities:

	Year Ended		
	January 1, 2023	January 2, 2022	January 3, 2021
Supplemental cash flow disclosures:			
Interest paid on long-term debt	\$ 192	\$ 220	\$ 309
Income tax payments (refunds), net	411	(6,180)	(2,073)
Supplemental cash flow disclosures of non-cash investing and financing activities:			
Accruals for capital expenditures	\$ 2,892	\$ 2,860	\$ 325
Cash and restricted cash reconciliation:			
Cash	\$ 32,167	\$ 36,797	\$ 49,778
Restricted cash	3,631	3,837	3,584
Cash and restricted cash, end of year	<u>\$ 35,798</u>	<u>40,634</u>	<u>\$ 53,362</u>

15. Commitments and Contingencies

Lease Assignments. Pollo Tropical assigned two leases to third parties on properties where it no longer operates with lease terms expiring in 2033 and 2036. Although the assignees are responsible for making the payments required by the leases, the Company is a guarantor under the leases.

The maximum potential liability for future rental payments that the Company could be required to make under these leases at January 1, 2023, was \$4.4 million. The Company could also be obligated to pay property taxes and other lease-related costs. The obligations under these leases will generally continue to decrease over time as the operating leases expire. The Company does not believe it is probable that it will be ultimately responsible for the obligations under these leases.

Indemnity of Lease Guarantees. As discussed in Note 2 — Dispositions, Taco Cabana, Inc., a former wholly-owned subsidiary of the Company, was sold in the third quarter of 2021 to YTC Enterprises through a stock purchase agreement. The Company’s previous owners, Carrols remains a guarantor under 12 Taco Cabana restaurant property leases with lease terms expiring on various dates through 2030, all of which are still operating as of January 1, 2023. The Company has indemnified Carrols for all obligations under the guarantees per the terms of the Separation and Distribution Agreement entered into in connection with the spin-off of Fiesta. The Company remains liable for all obligations under the terms of the leases in the event YTC Enterprises fails to pay any sums due under the lease, subject to indemnification provisions under the stock purchase agreement.

(Dollars in thousands, except per share data)

15. Commitments and Contingencies (cont.)

The maximum potential amount of future undiscounted rental payments the Company could be required to make under these leases at January 1, 2023 was \$7.0 million. The obligations under these leases will generally continue to decrease over time as these operating leases expire, except for any execution of renewal options that exist under the original leases. No payments related to these guarantees have been made by the Company to date and none are expected to be required to be made in the future. YTC Enterprises has indemnified the Company for all such obligations and the Company does not believe it is probable it will be required to perform under any of the guarantees or direct obligations.

Legal Matters. The Company is a party to various legal proceedings incidental to the conduct of business. The Company does not believe that the outcome of any of these matters will have a material effect on its consolidated financial statements. The Company records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonably estimated. The Company evaluates, on a quarterly basis, developments in legal matters that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. If a loss contingency is not both probable and estimable, the Company does not establish an accrued liability.

During the year ended January 1, 2023, the Company recognized legal settlement proceeds of approximately \$1.3 million before legal fees within other expense (income), net, in the consolidated statement of operations.

16. Retirement Plans

Fiesta offers certain of the Company's salaried employees the option to participate in the Fiesta Corporation Retirement Savings Plan (the "Retirement Plan"). The Retirement Plan includes a savings option pursuant to section 401(k) of the Internal Revenue Code in addition to a post-tax savings option. Fiesta may elect to contribute to the Retirement Plan on an annual basis. Contributions made by Fiesta to the Retirement Plan for the Company's employees are made after the end of each plan year. For 2022 and 2021, Fiesta's discretionary annual contribution is equal to 50% of the employee's contribution up to the first 6% of eligible compensation for a maximum Fiesta contribution of 3% of eligible compensation per participating employee. Under the Retirement Plan, Fiesta contributions prior to and after 2020 begin to vest after one year and fully vest after five years of service. A year of service is defined as a plan year during which an employee completes at least 1,000 hours of service. For 2020, Fiesta's discretionary contribution is equal to 100% of the first 3% of eligible compensation plus 50% of the next 2% of eligible compensation through the second quarter of 2020. On July 1, 2020, the Company suspended its employer matching contribution through the end of the year as a result of the COVID-19 Pandemic. Fiesta contributions for 2020 vested immediately. Participating employees may contribute up to 50% of their salary annually to either of the savings options, subject to other limitations. The employees have various investment options available under a trust established by the Retirement Plan. Retirement Plan employer matching expense for each of the years ended January 1, 2023, January 2, 2022 and January 3, 2021 was \$0.2 million.

Fiesta also has a Deferred Compensation Plan which permits employees not eligible to participate in the Retirement Plan because they have been excluded as "highly compensated" employees (as so defined in the Retirement Plan) to voluntarily defer portions of their base salary and annual bonus. All amounts deferred by the participants earn interest at 8% per annum. There is no Company matching on any portion of the funds. At January 1, 2023, and January 2, 2022, a total of \$0.3 million for each period was deferred by the Company's employees under the Deferred Compensation Plan, including accrued interest.

FIESTA RESTAURANT GROUP, INC.
SCHEDULE II — VALUATION AND QUALIFYING ACCOUNTS
