Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Key Operating Metrics, page 19

2. You make inventory adjustments to arrive at motor fuel gross profit cents per gallon on page 19 and adjusted EBITDA on page 20. Inventory adjustments are a normal, recurring expense to operate your business. Furthermore, you disclose in your risk factors on page 10 of your most recent 10-K report that your financial condition and results of operations are influenced by changes in the prices of motor fuel, which may adversely impact your margins, your customers' financial condition and the availability of trade credit. Tell us how you considered Question 100.01 of the CD&I's on Non-GAAP Financial Measures with respect to the inventory adjustments. Please also tell us why your presentation of these non-GAAP measures, excluding inventory adjustments, do not represent individually tailored measurement methods substituted for those of GAAP. Refer to Rule 100(b) of Regulation G and Question 100.04 of the Non-GAAP Financial Measures Compliance and Disclosure Interpretations updated April 14, 2018.

In closing, we remind you that the company and its management are responsible for the accuracy and adequacy of their disclosures, notwithstanding any review, comments, action or absence of action by the staff.

You may contact Yolanda Guobadia, Staff Accountant, at (202) 551-3562 or Gus Rodriguez, Accounting Branch Chief, at (202) 551-3752 with any questions.

Sincerely,
