NO IMPACT ON PRODUCTION FROM ESKOM ELECTRICITY SUPPLY CONSTRAINTS

Westonaria, 6 March 2014: Sibanye Gold (JSE: SGL & NYSE: SBGL) advises shareholders that Eskom has requested it, along with other large industrial consumers of electricity, to reduce power consumption by 10%. This follows an initial request to reduce consumption by 20%, due to a significant loss of generation capacity from Eskom's coal fired power stations.

Sibanye Gold has, in cooperation with Eskom, previously developed contingency plans to accommodate requests of this nature. The Company is implementing the agreed measures to reduce its power usage as requested and does not expect to incur any production losses, unless the situation escalates.

We will continue to assist in the national effort to secure the electrical grid, while managing the supply constraints to our business.
