Launch Academy

Feb 2016 – Present • 2 yrs 3 mos

San Francisco Bay Area

I've been working in the field of online education and transformative learning for years. I've helped both world-renowned luminaries and emerging teachers alike to develop authentic, highly engaging, and lucrative online learning platforms for their expanding global communities.

My passion is helping teachers, authors and experts accelerate the growth of their business by translating their awesome content into world-class online learning programs — with the intention of creating a growing community of Global Messengers that will change the world. Voila — Launch Academy was born!

Launch Academy is a comprehensive 6-month training program (online + retreat) that will provide you with the frameworks, tools, templates, coaching support and intimate learning community so you can effectively map out your online curriculum, create your integrated marketing plan, build your learning platform, and launch your first multi-week online course.

Launch Academy has been developed specifically for teachers, authors, speakers and experts who currently have teaching content that they want to translate into an online learning experience.

I'm passionate about helping teachers, authors and mission-driven organizations build transformative online learning programs and global learning communities that inspire, engage and unite people across cultures. My coaching and training programs have helped a wide variety of aspiring 'global messengers' create highly successful and engaging online learning programs while expanding their reach around the world. What excites me most is helping the up and coming teachers that have a powerful message to share with the world, bringing all of us change agents together in community to make a HUGE difference on our planet.
