

**Freedom Day Dividend ETF**  
(MBOX) NYSE, Arca Inc.

Before you invest, you may want to review the Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, reports to shareholders, and other information about the Fund, including the Fund's Statement of Additional Information, online at [www.freedomdaydividend.com](http://www.freedomdaydividend.com). You can also get this information at no cost by calling 215-882-9983 or by sending an e-mail request to [ir@alphaarchitect.com](mailto:ir@alphaarchitect.com). The current Prospectus and Statement of Additional Information dated May 3, 2021 are incorporated by reference into this Summary Prospectus.

**FREEDOM DAY DIVIDEND ETF**

Fund Summary

**Investment Objective**

Freedom Day Dividend ETF (the "Fund") seeks dividend growth.

**Fees And Expenses**

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund ("Shares"). You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the table or example.

**Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)**

Management Fee	0.39%
Distribution and/or Service (12b-1) Fees	None
Other Expenses <sup>1</sup>	<u>0.00%</u>
Total Annual Fund Operating Expenses	0.39%

<sup>1</sup> Other Expenses are estimated for the current fiscal year.

**Example**

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. You may also pay brokerage commissions on the purchase and sale of Shares, which are not reflected in the example. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>One Year:</b>	<b>Three Years:</b>
\$40	\$125

## Portfolio Turnover

The Fund may pay transaction costs, including commissions when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. At the date of this Summary Prospectus, the Fund has not yet commenced operations and portfolio turnover data therefore is not available.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by investing in equity securities that the Sub-Adviser (Freedom Day Solutions, LLC) believes have the potential to provide rising dividend income streams to the Fund over time.

Generally, the Sub-Adviser recommends investments using both fundamental analyses and quantitative methods. The Sub-Adviser analyzes the universe of equity securities trading on U.S. stock exchanges with market capitalizations generally above \$1 billion. That is, the Fund will invest in large- and mid-capitalization companies.

The Sub-Adviser strives to identify dividend-paying companies with the potential for increasing dividend payments in the future. The Sub-Adviser first analyzes securities using a fundamental analysis, which seeks to measure the security’s intrinsic value as measured by price multiples, earnings ratios, and other measures of value relative to the price of the security. Thereafter, the Sub-Adviser uses quantitative metrics to seek to identify dividend-paying companies that have potential for multiple dividend increases over time. The Sub-Adviser will assess company metrics, such as dividend payment history (both short-term (trailing twelve months) and long-term (multiple-year periods)), free cash flow, dividend growth rate, and other technical factors to assess the likelihood of a candidate company’s ability to provide ongoing, and increasing, dividend payments. Using those techniques, the Sub-Adviser scores potential investments based on its estimate of their dividend strength. Using those scores, the Sub-Adviser ranks potential investments. In general, the Sub-Adviser evaluates potential candidates on a monthly basis. In addition, market movements or other factors may induce the Sub-Adviser to re-evaluate the Fund’s portfolio holdings more frequently. The Sub-Adviser generally assigns less weight to a company’s current dividend yield or declared dividends than the other factors noted above.

The Fund is generally expected to hold securities of approximately 30 to 50 companies at any given time. The Fund is not managed relative to a particular securities index or securities benchmark. Rather, Sub-Adviser makes investment recommendations based on the results of its research processes. During normal market conditions, the Fund’s portfolio will be comprised of securities ranked highest based on the Sub-Adviser’s assessment of their potential to generate increased levels of dividend payments over time.

Under normal circumstances, the Fund will invest at least 80% of its net assets, plus borrowings for investment purposes, in dividend-paying securities. The Fund’s 80% policy is non-fundamental and can be changed without shareholder approval. However, Fund shareholders would be given at least 60 days’ notice prior to any such change.

## Principal Risks

An investment in the Fund involves risk, including those described below. *There is no assurance that the Fund will achieve its investment objective.* An investor may lose money by investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.

**Investment Risk.** When you sell your Shares of the Fund, they could be worth less than what you paid for them. The Fund could lose money due to short-term market movements and over longer periods during market downturns. Securities may decline in value due to factors affecting securities markets generally or particular asset classes or industries represented in the markets. The value of a security may decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or to factors that affect a particular industry or group of industries. During a general downturn in the securities markets, multiple asset classes may be negatively affected. Therefore, you may lose money by investing in the Fund.

**Equity Investing Risk.** An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally.

**High Dividend Style Risk.** While the Fund may hold securities of companies that have historically paid a high dividend yield or the Sub-Adviser determines appears likely to pay a high dividend in the future, those companies may reduce or discontinue their dividends, thus reducing the yield of the Fund. Low priced securities in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield securities, in certain market conditions, may be worse than the market return of other investment strategies or the overall stock market.

**Mid-Capitalization Companies Risk.** Investing in securities of medium- capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies. Often medium-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

**Management Risk.** The Fund is actively-managed and may not meet its investment objective based on the Adviser's or Sub-Adviser's success or failure to implement investment strategies for the Fund.

**Quantitative Security Selection Risk.** Data for some companies may be less available and/or less current than data for companies in other markets. The Sub-Adviser uses quantitative models, and its processes could be adversely affected if erroneous or outdated data is utilized. In addition, securities selected using a quantitative model could perform differently from the financial markets as a whole as a result of the characteristics used in the analysis, the weight placed on each characteristic and changes in the characteristic's historical trends.

**Concentration Risk.** The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, to the extent that the Fund may, from time to time, concentrate its investments in the securities of a particular issuer or issuers, industry, group of industries, sector, or asset class.

**Geopolitical/Natural Disaster Risks.** The Fund's investments are subject to geopolitical and natural disaster risks, such as war, terrorism, trade disputes, political or economic dysfunction within some nations, public health crises and related geopolitical events, as well as environmental disasters, epidemics and/or pandemics, which may add to instability in world economies and volatility in markets. The impact may be short-term or may last for extended periods.

#### **ETF Risks**

- **Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.** The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- **Premium-Discount Risk.** The Shares may trade above or below their net asset value ("NAV"). The market prices of Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of, and demand for, Shares on the NYSE, Arca Inc. (the "Exchange") or other securities exchanges. The trading price of Shares may deviate significantly from NAV during periods of market volatility or limited trading activity in Shares.

- **Secondary Market Trading Risk.** Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares.
- **Trading Risk.** Although the Shares are listed on the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. In stressed market conditions, the liquidity of the Fund's Shares may begin to mirror the liquidity of its underlying portfolio holdings, which can be significantly less liquid than the Fund's Shares, potentially causing the market price of the Fund's Shares to deviate from its NAV.

**New Sub-Adviser Risk.** Although the Sub-Adviser's principals and the Fund's portfolio managers have experience managing investments in the past, the Sub-Adviser has no experience managing investments for an ETF, which may limit the Sub-Adviser's effectiveness. In addition, the Sub-Adviser currently has small staff and limited resources, which may limit its ability to continue to provide sub-advisory services if key members become incapacitated.

**New Fund Risk.** The Fund is a recently organized management investment company with limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

## PERFORMANCE

The Fund has not commenced operations as of the date of this Summary Prospectus. Performance information will be available in the Summary Prospectus after the Fund has been in operation for one full calendar year. When provided, the information will provide some indication of the risks of investing in the Fund by showing how the Fund's average annual returns compare with a broad measure of market performance. Past performance does not necessarily indicate how the Fund will perform in the future. Updated performance information will be available at [www.freedomdaydividend.com](http://www.freedomdaydividend.com).

## Investment Adviser & Investment Sub-Adviser

Investment Adviser: Empowered Funds, LLC ("Adviser")

Investment Sub-Adviser: Freedom Day Solutions, LLC ("Sub-Adviser")

## Portfolio Managers

Ryan Krueger, Investment Manager of the Sub-Adviser, has been primarily responsible for the day-to-day management of the Fund since its inception. Mr. Krueger provides his recommendations to Mr. Brandon Koepke, Portfolio Manager of the Adviser, who, since the Fund's inception, is also primarily and jointly responsible for the day-to-day management of the Fund.

## Summary Information about Purchases, Sales, Taxes, and Financial Intermediary Compensation

### Purchase and Sale of Fund Shares

The Fund issues and redeems Shares on a continuous basis only in large blocks of Shares, typically 10,000 Shares, called "Creation Units," and only APs (typically, broker-dealers) may purchase or redeem Creation Units. Creation Units generally are issued and redeemed 'in-kind' for securities and partially in cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Once created, individual Shares generally trade in the secondary market at market prices that change throughout the day. Market prices of Shares may be greater or less than their NAV. **Except when aggregated in Creation Units, the Fund's shares are not redeemable securities.**

**Tax Information**

The Fund's distributions generally are taxable to you as ordinary income, capital gain, or some combination of both, unless your investment is in an Individual Retirement Account ("IRA") or other tax-advantaged account. However, subsequent withdrawals from such a tax-advantaged account may be subject to federal income tax. You should consult your tax advisor about your specific tax situation.

**Purchases Through Broker-Dealers And Other Financial Intermediaries**

If you purchase Shares through a broker-dealer or other financial intermediary, the Fund and its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend Shares over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
