Edelweiss Financial Services, Inc.

NOTES TO FINANCIAL STATEMENTS March 31, 2022

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Nature of Business

Edelweiss Financial Services, Inc. (the Company) is a broker-dealer registered with the Securities and Exchange Commission (SEC) and a member of the Financial Industry Regulatory Authority, Inc. (FINRA). The Company was incorporated on May 29, 2013 under the laws of the State of New York and approved by FINRA as a registered broker dealer on February 24, 2015.

The Company provides Chaperoning services to its affiliate entities selling Indian securities pursuant to Rule 15a-6 of the Securities Exchange Act, and distributes research produced by its affiliate entities in India to Institutional customers in the United States.

Basis of Presentation

The Company maintains its books and records on the accrual basis of accounting for financial reporting purposes, which is in accordance with U.S. generally accepted accounting principles and is required by the SEC and FINRA.

Income Taxes

The Company has adopted the provisions of FASB Accounting Standards Codification 740-10, Accounting for Uncertainty in Income Taxes. Under FASB ASC 740-10, the Company is required to evaluate each of its tax positions to determine if they are more likely than not to be sustained if the taxing authority examines the respective position. A tax position includes an entity's status and the decision not to file a return. The Company has evaluated each of its tax positions and has determined that it has no uncertain tax positions for which a provision or liability for income taxes is necessary.

Cash and cash equivalents

The Company considers all liquid debt instruments purchased with maturity dates of three months or less to be cash equivalents.

Deferred Taxes

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined based on the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year the differences are expected to reverse. The effect of the change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date. The Company does not have deferred taxes at March 31, 2021.

Estimates

The presentation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

On April 1, 2018, the Company adopted ASU 2014-09 Revenue from Contracts with Customers and all subsequent amendments to the ASU (collectively, "ASC 606"), using the modified retrospective method of adoption, which creates a single framework for recognizing revenue from contracts with customers that fall within its scope.

Revenue is measured based on a consideration specified in a contract with a customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control over goods or services to a customer. Services within the scope of ASC 606 include investment banking M&A advisory fees to related parties and investment research services.

These services include agreements to provide chaperoning services to related parties for which they charge a fee plus any reimbursable expenses and commissions paid to its representatives. Revenue from reimbursed expenses is recognized as the expenses are incurred. Commission expenses are paid to the registered representatives generally over a 4 year period based on written agreements. The representative must be employed for the subsequent years to receive these commissions. Commission expense and related reimbursed commission income are recognized in the same period thus it has no effect on net income.

The Company also provides research services to customers and this revenue is recognized as the research is reported used by the customer.

Concentration of Credit Risk

The Company maintains its cash in bank deposit accounts, which at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk for cash.

Furniture and equipment

Furniture and equipment are stated at cost less accumulated depreciation and impairment losses, if any. Depreciation is computed using the straight-line method over the estimated useful lives of the respective asset class as follows:

<u>Asset Class</u>	<u>Useful Life</u>
Office furniture and equipment	5 years
Computers	3 years

New Accounting Pronouncements

The Company is evaluating new accounting standards and will implement as required.

Leases

The Company recognizes and measures its leases in accordance with FASB ASC 842, Leases. The Company is a lessee in several noncancelable operating leases, for office space, computers, and other office equipment. The Company determines if an arrangement is a lease, or contains a lease, at inception of a contract and when terms of an existing contract are changed. The Company recognizes a lease liability and a right of use ("ROU") asset at the commencement date of the lease. The lease liability is initially and subsequently recognized based on the present value of its future lease payments. Variable payments are included in the future lease payments when those variable payments depend on an index or a rate. The discount rate is the implicit rate if it is readily determinable or otherwise the Company uses its incremental borrowing rate. The implicit rates of our leases are not readily determinable and accordingly, we use our incremental borrowing rate based on the information available at the commencement date of all leases. The Company's incremental borrowing rate for a lease is the rate of interest it would have to pay on a collateralized basis to borrow an amount equal to the lease payments under similar terms and in a similar environment. The ROU asset is subsequently measured throughout the lease term at the amount of the remeasured lease liability (i.e. present value of the remaining lease payments), plus unamortized initial direct costs, plus (minus) any prepaid (accrued) lease payments, the unamortized balance of lease incentives received, and any impairment recognized. Lease cost for lease payments is recognized on a straight-line basis over the lease term.

The Company has elected, for all underlying classes of assets, to not recognize ROU assets and lease liabilities for short-term leases that have a lease term of 12 months or less at lease commencement, and do not include an option to purchase the underlying asset that the Company is reasonably certain to exercise. We recognize lease cost associated with our short-term lease on a straight-line basis over the lease term. The Company's short term lease payments for the year were \$26,670.

2.
