Berkeley, California 94710

**Re: Caribou Biosciences, Inc.**  
**Amendment No. 1 to Draft Registration Statement on Form S-1**  
**Submitted June 11, 2021**  
**CIK No. 0001619856**

Dear Dr. Haurwitz:

We have reviewed your amended draft registration statement and have the following comments. In some of our comments, we may ask you to provide us with information so we may better understand your disclosure.

Please respond to this letter by providing the requested information and either submitting an amended draft registration statement or publicly filing your registration statement on EDGAR. If you do not believe our comments apply to your facts and circumstances or do not believe an amendment is appropriate, please tell us why in your response.

After reviewing the information you provide in response to these comments and your amended draft registration statement or filed registration statement, we may have additional comments.

Draft Registration Statement on Form S-1 - Amendment No. 1

Prospectus Summary

Overview, page 1

1. Please revise your pipeline table so that the Phase 2 and Phase 3 trials are graphically depicted in two different columns, or tell us the basis for your belief that you will be able to conduct Phase 2/3 trials for all your product candidates. While we note your revised disclosure in response to our prior comment 1 below the pipeline table that "Phase 3 may not be required if Phase 2 is registrational," we believe it is overly speculative to depict these two columns as being part of the same clinical trial at this stage. To this point, we note your disclosure on page 30 that "the general approach for FDA approval of a new

biologic is for the sponsor to provide dispositive data from at least two adequate and well-controlled clinical trials of the relevant biologic in the applicable patient population."

Strategic Agreements, page 149

2. We note your response to our prior comment 10 and re-issue the comment as it relates to the AbbVie Agreement. Please revise the description of the upper range of the royalty payments to a range within ten percentage points (for example, between twenty and thirty percent).

Financial Statements

Note 2. Summary of Significant Accounting Policies

Revenues, page F-9

3. Your expanded disclosures indicate that certain of the your license agreements have, for accounting purposes, two performance obligations: a license and a material right for annual license renewal agreements. Please better describe the nature and accounting for these agreements, including whether the licenses granted represent a right to use or a right to access; the factors considered in concluding that these two performance obligations were individually distinct; the expected contract term with all reasonably likely renewal periods; and how you determined the transaction price and allocated revenues to each performance obligation. Clarify whether or not the annual maintenance fees referenced on pages F-23 and F-52 related to these agreements and if so, how. Please reference the technical guidance upon which you relied.

You may contact Franklin Wyman at 202-551-3660 or Jeanne Baker at 202-551-3691 if you have questions regarding comments on the financial statements and related matters. Please contact Dillon Hagius at 202-551-7967 or Irene Paik at 202-551-6553 with any other questions.

Sincerely,

Division of Corporation Finance  
Office of Life Sciences
