... But access to alternatives remains limited

Alternative Investments are growing rapidly...

... but "mass affluent" investors remain under allocated

Alternative AUM

- Opportunities to tap into alpha
- Less correlation to public markets
- Better risk-adjusted returns during periods of market volatility

- Lack of information
- Lack of access
- Historically high minimum check size

Today's Turbulent Market Creates a Unique Opportunity for Growth

Equity Market Volatility Drives Investors to Alternatives

- Public equities and bonds experienced significant losses and volatility in 2022
- Volatility drives need for retail access to non-correlated investments

Raising Interest Rates Help Expand Product Offerings

- Flexibility in product offerings allows investors to target bespoke investments to diversify portfolio risks
- New lending products, which provide timely expansion opportunities

Rising Inflation Can Benefit Property Owners

- Inflation is driving rental rate growth, benefiting property cash flow
- Strong cyclical move to real assets coming in 2023/24
